

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

# CYCLOPÆDIA

OF

## BIBLICAL, THEOLOGICAL, AND ECCLESIASTICAL LITERATURE.

### SU.

**Suada**, the Roman personification of *persuasion*; the Greek *Peitho*.

**Suadēla**, the diminutive of **SUADA** (q. v.).

**Su'āh** (Heb. שׁוּאָח, *Su'ach*, *sweeping* [Ges.], or *riches* [Fürst]; Sept. Σουέ), first named of the eleven "sons" of Zophah an Asherite (1 Chron. vii, 36). B.C. apparently cir. 1020.

**Suarès** (or **Suarez**), JOSEPH MARIE, a French prelate and antiquarian, was born July 5, 1599, at Avignon, and educated at his native place. Having embraced the ecclesiastical state, he became the coadjutor of his uncle Francisco Suarez (q. v.) as provost of the cathedral, and afterwards went to Rome, where cardinal Barberini gave him charge of his library. Having received several additional honors, he was at length promoted by Urban VIII, in 1633, to the bishopric of Vaison, in which capacity he attacked Calvinism; but he finally resigned in favor of his brother Charles, and retired to Rome, where he died, Dec. 7, 1677. His antiquarian writings are enumerated in Hoefer, *Nouv. Biog. Générale*, s. v.

His brother CHARLES JOSEPH, born at Avignon in 1618, became priest in 1641, succeeded to the bishopric of Vaison in 1666, and died there Nov. 7, 1670.

A nephew of both the preceding, LOUIS ALPHONSE, born June 6, 1642, at Avignon, studied theology at the Seminary of St. Sulpice, succeeded his uncle as bishop of Vaison in 1671, held a synod there in 1673, and died March 13, 1685, near Sorgues, in Vaucluse.

A nephew of the last preceding, LOUIS MARIE, was bishop of Acqs (now Dax) in 1736, and died April 17, 1785.

**Suarez**, FRANCISCO, a Spanish Jesuit, born at Granada, Jan. 5, 1548, was a professor of reputation at Alcalá, at Salamanca, and at Rome. He was afterwards invited to Coimbra, Portugal, where he became the principal professor of divinity. He died at Lisbon, Sept. 25, 1617. He was an author of the most voluminous kind, and the Jesuits consider him the greatest and best scholastic divine that their order has produced. See his writings in Hoefer, *Nouv. Biog. Générale*, s. v. He is the principal author of the system of congruam, which is at bottom only that of Molina. Father Noël, a French Jesuit, made an abridgment of the works of this commentator (Geneva, 1782, fol.). There is a *Life* of him by Antony Deschamps (Perpignan, 1671, 4to).

**Suayambhu**, in Hindû mythology, was the son of Bramah and ancestor of the human race. His daughter Devagbhi was married to Kartama, one of the great progenitors, and bore nine daughters, who became the wives of the nine remaining progenitors. By Satarupa, the daughter of Bramah, Suayambhu became the father of five other children, whose offspring contributed towards the extension of the human family.—Vollmer, *Wörterb. d. Mythol.* s. v.

X.—A

**Su'ba** (Σουβάς v. r. Σαβύ), a name given only in the Apocrypha (1 Esdr. v, 34) among the sons of Solomon's servants who returned with Zerubbabel from the Captivity; but not found in the parallel Hebrew lists (Ezra ii, 35-37; Neh. vii, 37-39).

**Su'bai** (Συβαί), a Græcized form (1 Esdr. v, 30) of the SHALMAI (q. v.) of the Hebrew lists (Ezra ii, 46; Neh. vii, 48).

**Subarrhation**, a term denoting the delivery by the bridegroom to the bride of the ring and other gifts at the time, and during the act, of marriage.

**Subcanon**, an inferior or minor canon (q. v.).

**Subchancellor**, or **Scribe**. The notary of Italian cathedrals is the chancellor's vicar, called also registrar or matricular, and at St. Paul's, in 1280, designated as *scriptor librorum*. He acted as assistant secretary, librarian, lecturer in theology and law, and teacher of reading.

**Subchanter**, or **Succentor**, the deputy of the precentor, the principal among the vicars in choir. The precentor sat on the right-hand side of the choir, and the succentor on the left. His office was usually the gift of the chapter; occasionally, however, he was nominated by the precentor. There were two kinds of subchanters: 1. The succentor of canons, or succentor-major (first mentioned in the 11th century), at York, Bayeux, Paris, Amiens, Glasgow, Châlons, Girgenti, Wells, and Salisbury, acted as precentor's deputy with regard to the canons; he ranks after the subdean, and the office was given by the diocesan. At Amiens he installs canons in the lower stalls; at Rouen he holds a prebend and regulates processions; he is often called *préchantre* in distinction from the *grand chantre*. 2. A vicar, deputy, and assistant precentor. At Seville and Placentia and in England he tabled the ministers for service; at Chichester and Hereford he chastised the boys, and ordinarily his duties were confined to ordering processions, delating offenders, and general supervision of the lower choir: he could not correct a canon. His office appears at Chichester and St. David's in the 13th century; he corresponds to the precentor of the new foundations. At Lichfield and St. David's the subchanter is head of the Vicar's College.

**Subdeacon**. The ancient Christian Church had but two classes of officers, the *presidents*, προϊστάμενοι, ποιμένες, ἡγούμενοι, also ἐπίσκοποι, πρεσβύτεροι, and the *servants*, διάκονοι; the former being charged with functions within the field of worship, while the latter were employed in administering the charities of the Church. In time, the episcopacy was developed out of the presbyterate, and the subdiaconate from the diaconate. The latter was always regarded by the Church as of human invention, and as having been introduced "utilitatis causa" (see Morinus, *Comm. de S. Eccles. Ordinatio. Exercitatio*, xi, 1). Its introduction was, more-

over, gradual, and not uniform throughout the Church. Some churches were without subdeacons as late as the middle of the 9th century; and, before the hierarchy assumed a rigid and unchangeable form, the subdiaconate was not regarded an indispensable preliminary to the diaconate. The existence of subdeacons in the Church of Rome as early as A.D. 250 is shown in a letter of pope Cornelius to bishop Fabius of Antioch (Euseb. *Hist. Eccles.* vi, 43; comp. Jaffé, *Regest. Pontif.* No. 8); in Spain as early as A.D. 305, in ch. 30 of the Synod of Elvira; in Africa about the middle of the 3d century, in different letters of Cyprian (2, 8, 29, 30, etc.); and in the East by the middle of the 4th century, as appears from determinations of the Synod of Laodicea in 361 (Dist. xxiii, 21-23), and a letter of Athanasius (*Ad Solitar.* A.D. 330).

The subdeacons were reckoned among the class of *Ordines Minores*, and their functions were of inferior dignity. They were permitted to touch the sacred vessels if empty, in this having a pre-eminence over other *Minores*; but, in general, their duties were simply the receiving of oblations (hence *Oblationarii*), the care of the tombs of martyred saints, the guarding of church-doors during the administration of the sacrament, etc. In course of time the reading of the lesson from the epistles was added and became their leading function.

The importance of the subdiaconate was enhanced when Gregory the Great included it under the operation of the law of celibacy (Dist. xxi, 1), and yet more when its members were made eligible to the episcopal office by the Council of Benevento in the pontificate of Urban II, 1091. The question now arose whether the subdiaconate must not be counted among the *Ordines Majores*, which was finally determined by Innocent III in favor of such promotion. Subdeacons thereby acquired the rights of the superior orders as respects personal independence, etc. They assume a title at ordination, take vows of celibacy, etc., and are forbidden to return to secular life. Their ordination is, however, peculiar, in that the candidates are not presented to the consecrating bishop by the archdeacon, the laying-on of hands and questioning of the people are not used, and the consecration is performed instead by "traditio instrumentorum et vestium." The beginning of the twenty-second year was fixed by the Council of Trent (Sess. xxiii, 12, *De Reform.*) as the proper age for entering on this office, and a year is required to intervene before ordination to the diaconate may follow; bishops, however, may depart from this rule when needful (Sess. xxiii, 11; Richter, *Kirchenrecht*, § 118). At the present time, the subdiaconate exists simply as a stage on the way to higher stations, and its functions are generally performed by laymen and presbyters. The term is sometimes used in Protestant churches, but without denoting any distinction of order.

See Morinus, *De Sacris Ordinationibus*, pt. iii, exercit. 12; Thomassinus, *Vet. et Nov. Eccl. Discipl.* xx, 30 sq.; Seitz, *Recht des Pfarrramtes*, II, i, 415 sq.; Richter, *Kirchenrecht*, § 91, 103, 113; Coleman, *Ancient Christ. Exemplified*, viii, 11; Herzog, *Real-Encyclop.* s. v.; Walcott, *Sacred Archaeol.* s. v.

**Subdean.** There were three kinds of subdeans: 1. The vice-dean. 2. The dean's vicar, his subofficer, assistant when present, and deputy when absent; vicergerent in choir, as at Lichfield: both had a similar office, that of supplying the duties of the dean in his absence. 3. The capitular subdean; the perpetual subdean, who is said to hold a place which is a quasi-dignity in the gift of a bishop. He has a stall, and corresponds to the foreign archpriest having parochial charge of the close. The office was founded in Salisbury in 1021. For a full account of his duties in the several cathedrals, see Walcott, *Sacred Archaeol.* s. v.

**Subdiaconissa**, a term applied, in the early Church, to the wife of a subdeacon.

**Sphrygus**, a Roman divinity, the god of the wed-

ding-night, whose office it was to render the newly married maidens favorably disposed towards their husbands.

**Subintroductæ** (*συνεισάκτοι*) was a term applied to females kept by persons of clerical rank. Celibacy and chastity were regarded as identical from an early period in the Church, and in consequence ascetics invented the plan of remaining unmarried and taking into spiritual union with themselves young virgins (*ἀδελφαί, sorores*, sisters). The relation is already hinted at in Hermas, but becomes more frequent in the 3d century, when Cyprian condemns it. Its spiritual character was speedily lost, and it soon became necessary to legislate against the abuses to which it gave rise. The question was discussed at the trial of Paul of Samosata, at Antioch, in 269 (see Eusebius). In 805 the Council of Eleberis forbade the clergy to have "sisters" living with them; and that of Ancyra in 814, and of Nice in 825, prohibited association with all females whose relation to the clergyman did not obviate all suspicion (mother, sister, etc.). Subsequent legislation on the part of both Church and State was in the same direction; e.g. of the third Council of Carthage in 397 (Can. 17, 27) and *Cod. de Episc. et Clericis* i, 8, 19 of Honorius and Theodosius, 420; Novella cxxiii, 29; cxxvii, 1, *in fine*, of Justinian.

The practice of keeping *subintroductæ*, or *extraneæ*, developed into complete concubinage, and became so general that constantly repeated prohibitions became necessary, under penalty of degradation. Upon the whole subject, see Bruns, *Canones Apostol.*, etc. In the 11th century the term *focariæ* began to be applied to this disreputable class ("meretrices foco assidentes"); and the priests were termed *focariæ*, i. e. *concubinariis, fornicatores*. See Du Fresnoie, *Glossar.* s. v.; Gieseler, *Kirchen-gesch.* 4th ed. vol. i-iii, *passim*; Gerh. Magni (d. 1384) *Sermo de Focariis et Notoriis Fornicat.* (Dresd. 1859); Trident. Conc. Sess. xxv, 14, *De Reform.*—Herzog, *Real-Encyclop.* s. v. See AGAPETÆ.

**Subjectivism** is the doctrine of Kant that all human knowledge is merely relative, or, rather, that we cannot prove it to be absolute. According to him, we cannot *objectify the subjective*; that is, we cannot prove that what appears true to us must appear true to all intelligent beings; or that, with different faculties, what now appears true to us might not appear untrue. But to call our knowledge relative is merely calling it human, or proportioned to the faculties of a man; just as the knowledge of angels may be called angelic. Our knowledge may be admitted to be relative to our faculties of apprehending it; but that does not make it less certain. See Fleming, *Vocab. of Philosoph. Science*, s. v.

**Sublapsarians**, or **INFRALAPSARIANS**, is the name given by the orthodox Reformed theologians to those who consider the divine decree of election as dependent upon that which permitted the introduction of evil. The *supralapsarians*, on the contrary, consider the decree of election, or of predestination to eternal salvation or damnation, as the original decree upon which all others, including that permitting the introduction of evil, depend. The question consequently refers to the order in which these two decrees were promulgated, or, which amounts to the same, to a nearer appreciation of the object of predestination, i. e. whether God in issuing his decree of election considered man (and the angels) as fallen, or simply as subjects whose eternal fate was to be decided apart from the consideration of sin, although, of course, knowing what would be their conduct. Both opinions have been permitted to exist side by side in the Church even in times of the greatest intolerance, as, in reality, the question does in no way affect the *dogma* of predestination. Both systems hold to the fundamental principles that election is *absolute*, not motivated by any cause outside of God's will, *unchangeably* settled since the beginning of the world, and *infallible* in its action. Yet the Synod of Dort, in 1618-19, en-

dorsed the sublapsarian theory, Gomarus alone upholding supralapsarianism, without, however, ceasing to be considered orthodox. The synod had recognised that both systems preserved the same fundamental doctrine, and only preferred sublapsarianism as presenting that doctrine in a form less objectionable to other churches. This question had no connection whatever with Arminianism, for not even the slightest appearance of a concession to those views would have been tolerated. In 1675, at the drawing-up of the *Formula Consensus*, the Swiss refused expressly to endorse sublapsarianism for fear of appearing thereby to cast blame on the supralapsarians. The most eminent theologians, such as Beza, Piscator, Voetius, Gomarus, etc., upheld the stricter system. It is only in modern times that sublapsarianism has come to be considered as a real diminishing of the difficulties of the orthodox Reformed doctrines; but the ancients, who appreciated it more correctly, did not look upon it as such, and consequently did not oppose it. The general principles of the system were as follows: The world, and man at first, answered exactly to the divine plan: man was created in primitive purity, fell by his own voluntary act, and thus became subject to retribution, and this infallibly; and although all are bad alike, yet some are redeemed by grace and made blessed, but the others remain unredeemed, and—as all, even those who are saved, deserve—are damned. All this happens exactly as it was originally decided in the organization of the world, and because it was thus decided. The decrees were all equally promulgated by God from all eternity without one having precedence over the other. Yet we are obliged to distinguish the different decrees according to their relation to each other, as the final decree includes necessarily the means by which its object is to be attained; and these decrees concerning the means even precede the decree on the final result, yet only in causality, not in time, since there is no time with God. The supralapsarian system, on the other hand, holds that the final object of creation, independent from any other, is the revelation, the self-manifestation of God, and that in his two great attributes of mercy and justice—mercy on those he saves, justice on those he leaves to the punishment they deserve. All other decrees serve but as means for this great object of the creation; in this view God created men, then permitted the introduction of sin, thus making them objects of his salvation or of his condemnation, which were decided beforehand. In consequence of these views, that school asserts that in issuing the decree of election God looked on man merely as man, not as man fallen; hence, also, Gomarus names as objects of the decree of predestination the “creature rationalia, servabilia, damnabilia, creabilia, labiles, et reparabilia,” i. e. creatures considered yet as without any determined properties. The sublapsarians arranged the plan of creation in such a manner that God, from motives of his own, decreed to create man, and to allow him to sin, knowing that he would infallibly do so; and from these decrees they make the other decree depend—whereby some are saved, though no better than the others, and the others damned, though no worse; and this manifestation of mercy to some and of justice to others constitutes the justification of the whole. This is their whole difference. The two methods uphold the same doctrine of absolute predestination, only the supralapsarians present it in a stricter, more imperious manner, without, however, lessening the guilt of man or making God the originator of evil; the sublapsarian method is more cautious in its expression, although it upholds predestination as firmly, and the guilt of man in the Fall; for what God allowed in his plan is not permitted because God foresees what will happen, but only because he wills it. The supralapsarians, indeed, say that the Fall itself was predestined, but mean only that it was infallibly to come; while, on the other side, the sublapsarians do not in any way mean that the Fall might not have happened, that it could only be consid-

ered in the plan of creation as having occurred, or even that the entrance of sin into the world might have occurred in a different manner than in that which God freely appointed in his scheme of creation. See Hagenbach, *Dogmengesch.* 3d ed. p. 589; Schweizer, *Ref. Dogmatik*, ii, 123 sq.; the same, *Gesch. d. ref. Central-Dogmen*, ii, 43, 55, 181.

**Subleyras**, PIERRE, a French painter and engraver, was born at Uzès in 1699, and was the son of Matthieu Subleyras, a painter of considerable merit. Pierre, at the age of fourteen, went to Toulouse in order to receive lessons from Antoine Rivalx. In 1724 he went to Paris, took the course in the Academy, and in 1726 gained the first prize. He went to Rome in 1728 as royal pensioner, and died there, May 28, 1749. He painted several sacred and ecclesiastical scenes which have been greatly admired. See Hoefer, *Nouv. Biog. Générale*, s. v.

**Submission**, ACT OF, an act passed in the reign of Henry VIII, in 1534, which makes royal license necessary to the validity of certain acts of convocation.

**SUBMISSION TO GOD** implies an entire giving-up of our understanding, will, and affections to him; or, as Dr. Owen observes, it consists in—1. An acquiescence in his right and sovereignty; 2. An acknowledgment of his righteousness and wisdom; 3. A sense of his love and care; 4. A diligent application of ourselves to his mind and will; 5. Keeping our souls, by faith and patience, from weariness and despondency; 6. A full resignation to his will. See RESIGNATION.

**Subprebendary**, a prebendary in inferior orders.

**Subprecentor**, an assistant to and substitute for the precentor of a church or cathedral, whose duty it is to attend to and guide the singing in the absence of the precentor.

**Subprior**, an official in a priory, who is the prior's deputy, and is ordinarily second in rank to the prior.

**Subramanya MAHASENA**, in Hindû mythology, meaning the great leader of armies, is a surname of Kartikeya, the son of Siva and the sisters Gonya and Uma.

**Subruncinātor**, a Roman divinity who presided over the weeding and grubbing of gardens.

**Subsacrist**, an assistant to, or deputy of, the ordinary sacrist or sacristan of a church. They were keepers of the vestry and sacristy, church-cleaners, bell-ringers, etc. At Lincoln they were called stall-keepers; at York, clerks of the vestibule; and at Canterbury, vesturers.

**Subsacristan**. See SUBSACRIST.

**Subscription**, CLERICAL. Subscription to articles of religion is required of the clergy of every established Church, and of some churches not established.

“The most stringent and elaborate subscription probably ever enforced,” says Dr. Stanley, “was that in the duchy of Brunswick, when duke Julius required from all clergy, from all professors, from all magistrates, a subscription to all and everything contained in the Confession of Augsburg, in the Apology for the Confession, in the Smalcaldic Articles, in all the works of Luther, and in all the works of Chemnitz” (*Letter on State of Subscription*, p. 37). The Church of England only requires this kind of assent to the Thirty-nine Articles and the Book of Common Prayer. But it has been a matter of dispute whether it answers any valuable purpose as to religion, however necessary as a test to loyalty. All language is more or less ambiguous, so that it is difficult always to understand the exact sense, or the *animus imponentis*, especially when creeds have been long established. It is said that the clergy of the churches of England and Scotland seldom consider themselves as fettered by the Thirty-nine Articles or the Confession of Faith, when composing instructions for their parishes or the public at large. It is to be feared, in-

deed, that many subscribe merely for the sake of emolument; and though it be professedly *ex animo*, it is well known that it is not so in reality; for when any one appears to entertain conscientious scruples on the subject, he is told it is a thing of no consequence, but only a matter of form.

Stanley presents the following arguments in favor of repeal: 1. The first is, that there are signs of a growing reluctance, due in some part to the stringency of present subscriptions, on the part of thoughtful young men, to enter the ministry of the Church. 2. There is some recent evidence, especially at the universities, that the abolition of subscription has not tended to the injury of the Church or to any increased disbelief of her doctrines. 3. But, more especially, there is a growing disposition to interpret adhesion to formularies more narrowly than in former times. See Paley, *Mor. Phil.* i, 218; Dyer, *On Subscription*; Doddridge, *Lect.* lect. 70; Conybeare, *Sermon on Subscription*; *Free and Candid Disquisitions relating to the Church of England*; *The Confessional*; Duncan and Miller, *On Creeds*; Stanley, *A Letter to the Lord Bishop of London on the State of Subscription in the Church of England and in the University of Oxford*.

**Subsellium**, a term given in the early Church to the footstool provided for persons of distinction. Upon Christian monuments God is represented as using the subsellium while receiving the offerings of Cain and Abel; our Lord, when teaching his disciples; and the Holy Virgin, in the adoration of the magi. The episcopal chairs were also provided with them, and to show their submission to bishops, persons were accustomed to seat themselves thereupon. They were also called *scabellum*, *subpositorium*, *suppeditaneum*.

Subsellium was likewise a name for the seats of the presbyters, in the ancient Church, on each side of the bishop's throne, in the upper part of the chancel, called the *apsis*. Also the two lower steps in a sedilia, i. e. those for the deacon and subdeacon.

Subsellium.

**Subsexton.** See SUBSACRISTAN.

**Substance** (Lat. *sub*, under, *sto* or *stans*, to stand) is literally that which subsists by itself. In Greek, substance is denoted by *οὐσία*, hence, *that which truly is*, or *essence*, seems to be the proper meaning of substance. It is opposed to *accident*; of which Aristotle has said that you can scarcely predicate of it that it is

anything. Our first idea of *substance* is probably derived from the consciousness of self—the conviction that, while our sensations, thoughts, and purposes are changing, we continue the same. We see bodies, also, remaining the same as to quantity or extension, while their color and figure, their state of motion or of rest, may be changed. Substances are either *primary*, that is, singular, individual substances; or *secondary*, that is, genera and species of *substance*. Substances have also been divided into *complete* and *incomplete*, *finite* and *infinite*. But these are rather divisions of *being*. Substance may, however, be properly divided into matter and spirit, or that which is extended and that which thinks. Substance is given by Aristotle as one of the four principles common to all spheres of reality; the other three being form or essence, moving or efficient cause, and end. He says, further, that the individual alone has *substantial* existence, and defines *οὐσία*, in the sense of the individual substance, as that which cannot be predicated of anything else, but of which anything else may be predicated. Johannes Philoponus of Alexandria, by extending the Aristotelian doctrine, that substantial existence is to be predicated in the fullest sense only of individuals, to the dogma of the Trinity, thereby incurred the accusation of tritheism. John Scotus regarded the Deity as the substance of all things, and could not, therefore, regard individual, concrete things as substances, of which the general may be predicated and in which the accidental is contained. He views all things, rather, as contained in the divine substance. Berengarius of Tours (*De Sacra Cena*) disputes the theory of a change of *substance*, claimed by the advocates of transubstantiation, without a corresponding change in the accidents, i. e. a change in the bread and wine apparent to the senses. Roscellinus teaches that whatever is a substance is, as such, not a *part*; and the *part* is, as such, not a substance, but the result of that subjective separation of the substance into parts which we make in [thought and in] discourse. Gilbertus thus speaks: The intellect collects the universal, which exists, but not as a substance (*est, sed non subsistit*), from the particular things which not merely are (*sunt*), but also (as subjects of accidents) have substantial existence, by considering only their substantial similarity or conformity. Descartes defines *substance* as follows: "By *substance* we can only understand that which so exists that it needs nothing else in order to its existence;" and adds that, "indeed, only one substance can be conceived as plainly needing nothing else in order to its existence, namely, God; for we plainly perceive that all others cannot exist without God's assistance." Spinoza understands *substance* to be "that which is in itself, and is to be conceived by itself. There is only one substance, and that is God. This substance has two fundamental qualities or attributes cognizable by us, namely, thought and extension; there is no extended substance as distinct from thinking substance." "There are not two substances equal to each other, since such substances would limit each other. One substance cannot produce or be produced by another substance. Every substance which is in God's infinite understanding is also really in nature. In nature there are not different substances; nature is one in essence, and identical with God." Locke says, "The mind, being furnished with a great number of simple ideas, conveyed to it by sensation and reflection, remarks that a certain number of them always go together; and since we cannot imagine that which is represented by them as subsisting by itself, we accustom ourselves to suppose a substratum in which it subsists, and from which it arises; this substratum we call a *substance*. The idea of *substance* contains nothing but the supposition of an unknown something serving as a support for qualities." Leibnitz gives the name *monad* to simple, unextended *substance*; that is, a substance which has the power of action; active force (like the force of the strained bow) is the essence of substance. He held that the divisibil-

ity of matter proved that it was an aggregate of substances; there can be no smallest indivisible bodies or atoms, because these must still be extended, and would therefore be aggregates of substances; that the real substances of which bodies consist are indivisible, cannot be generated, and are indestructible, and in a certain sense similar to souls, which he likewise considers as individual substances. The individual, unextended substances were termed by Leibnitz monads. Hume remarks, "We have no clear ideas of anything but perceptions; a *substance* is something quite different from perceptions; hence we have no knowledge of a substance. The question whether perceptions inhere in a material or immaterial substance cannot be answered, because it has no intelligible sense." John Stuart Mill distinguishes substances as bodily and mental, and says, "Of the first, all we know is, the sensations which they give us, and the order of the occurrence of these sensations; i. e. the hidden cause of our sensations. Of the second, that it is the unknown recipient of them." See Fleming, *Vocab. of Philosoph. Sciences*, s. v.; Ueberweg, *History of Philosophy* (see Index).

**SUBSTANCE**, a term used in technical divinity to describe nearly the same idea as *essence* or *nature*. Thus the Son is said to be the same substance with the Father; that is, truly and essentially God, as the Father is. See **CHRISTOLOGY**.

**Substantialists**. The Lutheran heresiologist Schlisselburg gives this name as a synonym of the Manichees, in his *Catalogue of Heresies*, the second volume of which is entitled *De Secta Manicheorum seu Substantialistarum*.

**Substitution**. See **VICARIOUS SUFFERING**.

**Substrati** (i. e. *prostrators*) were penitents of the third order, so called from the custom of prostrating themselves before the bishop or priest as soon as the sermon was ended, to receive his benediction with the imposition of hands, and be made partakers of those prayers which the congregation particularly offered to God for them; after which they were obliged immediately to depart, before the communion service. They stood until this part of the service in the *nave* of the church, behind the *ambo*. This sort of penitents are mentioned in the Council of Nice, though no particular place is assigned them; but we may collect from Tertullian and Sozomen that their station was in this part of the church; for Tertullian (*De Pudicit.* c. 13), speaking of the Roman discipline, says pope Zephyrin brought penitents into the church in sackcloth and ashes, and prostrated them in the midst before the widows and presbyters, to implore their commiseration and excite their tears. They were also called *Kneelers*, or *Genuflectentes*. See Bingham, *Christ. Antiq.* bk. viii, ch. v, § 3; bk. xviii, ch. i, § 5.

**Subtreasurer**, the deputy-receiver of certain rents in a cathedral of the new foundation; a deputy-treasurer; the sacrist; a minor canon who had charge of the church goods, acted as parish priest in the precinct, provided necessities for divine service, and was librarian. The office is still partially preserved as an assistant in divine service and parochial cure of souls. At Hereford he ranked after the succentor, and sang the Founder's Mass. He is mentioned in 1290 at York, and at Chichester in the 14th century, being the treasurer's vicar, where he made the chrism of oil and balsam.

**Subucūla** (ποδήρης), a cassock, like a rochet, worn under the alb.

**Suburbicarian**, an epithet applied to those provinces of Italy which composed the ancient diocese of Rome. Concerning this two questions arise: 1. What was the extent of this district? 2. Whether it was the limit of the metropolitan or patriarchal power? Dr. Cave and others think that the notion of suburbicary churches ought not to be extended beyond the lim-

its of the *praefectus urbis*, viz. a hundred miles about Rome; or, at most, not beyond the limits of those ten provinces which were immediately subject to the civil disposition and jurisdiction of the *vicarius urbis*—viz. Campania, Tuscia and Umbria, Picenum Suburbicarium, Valeria, Samnium, Apulia and Calabria, Lucania and Brutii, Sicilia, Sardinia and Corsica—which Dr. Cave supposes to have been the exact and proper limits of the pope's patriarchal power, as he thinks the others were the bounds of his metropolitan jurisdiction.—See Bingham, *Christ. Antiq.* bk. ix, ch. i, § 847.

**Suburbs** is the rendering, in the A. V., regularly of מִגְרָשׁ, *migrash*, properly a *pasture* (1 Chron. v, 16; Ezek. xlviii, 15); hence the open country around a city used for grazing (Numb. xxxv, 2; Josh. xxi, 11; 1 Chron. vi, 40; xiii, 2, etc.), or for any other purpose (Ezek. xxvii, 28; xlv, 2; xlviii, 17). Once (2 Kings xxiii, 11) it stands for פָּרְוֹר, *parvôr*, which is but a MS. variation of פָּרְבַּר (q. v.).

**SUBURBS**, in an ecclesiastical sense, meant, in the early Church, all the towns and villages within the region or district to which the city magistrate extended his jurisdiction, whose bounds, for the most part, were the bounds of the bishop's diocese. See Bingham, *Christ. Antiq.* bk. ix, ch. ii, § 3.

**Sucat** is said to have been the proper name of St. PATRICK (q. v.).

**Succensum**, an old term for a *censer*. See **THURIBLE**.

**Succentor**, a term used to denote—1. A precentor's assistant in a cathedral church; 2. A singer in a collegiate church or chapel; 3. A subprecentor; 4. A cantor.

**Succession**, **APOSTOLICAL**, a favorite term with prelatists and High-Churchmen to designate what is claimed to be an unbroken line of clerical ordination from the apostles to the present time. In the Roman Church this claim is put forth in the most absolute and dogmatic manner through the Tridentine canons, which excommunicate and anathematize all other branches of the Christian Church as heretics and schismatics. In the Greek, Syriac, Coptic, Armenian, and Oriental churches generally, the same exclusive principle is maintained, although not avowed in so positive and formal a manner. A similar pretence is set up by many Protestants, such as the established churches of European countries, particularly of Great Britain and Ireland, and so likewise by the Vaudois, the Moravians, and others, who assert that they can trace their clerical pedigree in a direct line to the apostles; and in like manner the Protestant Episcopal Church of the United States, and other offshoots of the English Church, pride themselves upon their ecclesiastical lineage, as being in the "regular succession." On the other hand, the denominations "unchurched" by this claim justly take exception to the clerical genealogy thus arrogated, on the following grounds:

1. The phrase "*apostolic succession*" is essentially absurd and self-contradictory. Strictly construed, it can only mean that the apostles have had a continuous line of successors to the present time. But the apostolic office was *sui generis*, and by its very constitution confined to the first incumbents. This is clear from two inherent qualifications of the order itself, not to mention others.

a. It was necessary that an apostle should have been personally conversant with our incarnate Lord; he must have been an eye-witness of his miracles, have directly received his instructions, and immediately accepted the appointment at his hands (Mark iii, 14; Acts i, 21, 22). On this ground Paul bases his claim to the apostolate (1 Cor. ix, 1), by virtue of the revelation of the Gospel to him without human intervention (xi, 23; Gal. i, 1, 12). Hence the office was in its very nature intransmissible and incapable of succession, as soon, at least,

as all the "original eye-witnesses and ministers of the Word" had deceased. See APOSTLE.

b. The "sign" of an apostle was the power of conferring miraculous endowments upon others by the imposition of hands. This is often referred to in the Acts and Epistles as a distinguishing mark between them and ordinary Christians. All believers during the primitive period of the Church enjoyed these preternatural gifts, which were first imparted on the day of Pentecost (Acts ii, 4); but the apostles alone were empowered to communicate the same to subsequent accessions (viii, 19). Hence when the original apostles died, these miraculous manifestations soon ceased, and have never been renewed. The Roman Catholic Church claims, indeed, a like power of miracle-working for eminent saints of later times, but it has never had the hardihood to aver that its "apostolical succession" is invariably accompanied with this peculiar gift. How preposterous, then, for sober Christians to set up a pretension that legitimately involves such impossibilities! See GIFTS, SPIRITUAL.

2. *Even the claim of an uninterrupted clerical succession is incapable of proof.* All the modern churches of Europe and this country, which set up this claim, trace their lineage ultimately through the Roman pontiffs. But the records of the early popes are irrecoverably lost. It is not certain that Peter (q. v.) ever was in Rome, much less that he ever acted as bishop there. All efforts to make out the asserted succession thus fail at this initial point. Many other links in the chain are historically wanting. The lineage is a myth, or at best a mere eking-out of probabilities by vague and late traditions. This is now candidly admitted by the best and most careful Protestant scholars. The title is indefensible. See POPE. "I am fully satisfied," says bishop Hoadly, "that till a consummate stupidity can be happily established, and universally spread over the land, there is nothing that tends so much to destroy all due respect to the clergy as the demand of more than can be due to them; and nothing has so effectually thrown contempt upon a regular succession of the ministry as the calling no succession regular but what was uninterrupted; and the making the eternal salvation of Christians to depend upon that uninterrupted succession, of which the most learned must have the least assurance, and the unlearned can have no notion but through ignorance and credulity." (See below.)

3. *The claim is offensive and tends to bigotry and exclusiveness.* In the Roman Catholic, Greek, and Anglican churches, this tendency and result are notorious, and in the High-Church party of the Protestant Episcopal Church they are almost equally obvious. In fact, "a good churchman," as he is styled, is compelled by this fact to hold himself aloof from other communions, and such a rule is avowed, more or less distinctly, in the canons and regulations of all the bodies last named. This single circumstance is to-day one of the greatest scandals of Christendom. No principle can be just which leads to such unchristian lack of brotherly kindness. See CHARITY.

4. *The assertion is unnecessary, unwise, and based upon a wrong view of ecclesiastical polity.* The true evidences of an evangelical Church are the conversion, sanctification, and salvation of souls; the propagation of a spiritual Gospel, and the amelioration of the state of society. But the "churchly" claim referred to turns the attention of its adherents too earnestly upon their own organization and technical order, and thus leads them away from a broad and catholic spirit, and from a wholesome personal experience, as well as from the highest forms of individual and collective usefulness. The question with them habitually inclines to be, not what will best promote the welfare of Christendom at large, and most effectually promote personal holiness; but what must be done to subserve party purposes, and keep up the pretensions of a select circle. The Church is too often put in the place both of Christ and man.

This, alas, is no ideal picture; it is but the record of sad, solemn fact. Ecclesiasticism and its fellow formalism have ever been the greatest banes to genuine piety, and the direst foes to the real kingdom of God. Bigotry was excusable in Judaism; but sectarianism, of which the fable of "apostolical succession" has been the most fruitful source, is a crime under Christianity. It is both a libel on its name (John xvii, 28) and treason to its first law (1 John ii, 7; iii, 11). Wherever this assumption has been prevalent and active, religious bodies have held points of order and *esprit du corps* among their members in higher esteem than historical truth in profession or vital godliness in practice. Persecution has been more fiercely waged against secession than even against heresy. Zealots for orthodoxy have gathered many a fagot for the martyr, but sticklers for legitimacy have been foremost in kindling the pyre. Even nonconformity has at times caught the passion for its own established system, and Puritans have actually maltreated others—if not burned them at the stake—for refusing the ordinances of the so-called Church. The prelatist smiles at such pseudo-ecclesiasticism, and the Romanist looks with equal contempt upon the Anglican mimicry of "the mother Church;" while the Great Head of all weeps at this petty rivalry as to who shall be esteemed first and greatest in the brotherhood of saints. In this competition all that is more valuable in religion has been lost sight of. Laxity of morals has been winked at, while an infringement of canonical rules has been severely punished. It is the old story over again; making void the law of God by the tradition of men, tithing herbs and neglecting judgment, mercy, and faith. We need ever to revert from the symbols of Christianity to its essentials, or we shall find ourselves holding its form, but denying its power. See PRELACY.

*Literature.*—This may well be exhibited in brief by the following extract from Eadie's *Eccles. Cyclop.*, which shows how writers in the Episcopal Church are disagreed on the main elements of the question:

I. *On the Office of the Apostles, and whether they had any Successors.*—Until Christ's death the apostles were presbyters, and Christ alone was bishop. 1. This is affirmed by Stillingfleet, *Irenicum*, ii, 218; Spanheim, *Op. Theol.* i, 436; in Aytton, *Constit. of the Ch.* p. 18; Hammond, *Works*, iv, 781, who makes them deacons; Brett, *Divine Right Episcop.* lect. viii, p. 17. 2. This is contradicted, and the apostles made bishops during the same time, by Taylor [Jeremy], *Episcop. Asserted*, i. *Works*, vii, 7, etc., who contradicts himself in *ibid.* xlii, 19 sq.; Scott, in *Christian Life*, iii, 388; Monro, *Inquiry into the New Opinions*, p. 96; Rhind, *Apol.* p. 50, etc.; Willet, *Synopsis Papiami*, p. 236; archbishop of Spalato, in Aytton, *Constit. of the Ch.*, app. p. 7. Archbishop Land is very positive in affirming that Christ chose the twelve, and made them bishops over the presbyters (*Lit. and Episcop.* p. 195), and bishop Beveridge is as confident that Christ chose these same twelve as presbyters, and not bishops (*Works*, ii, 112). Again, Land asserts very positively that Christ ordained them, since the word used by Mark is *ἐκείνους*—He made them (*Lit. and Episcop.* p. 196). Beveridge, on the contrary, declares that Christ did not ordain any of them during his life, and adduces in proof the use of this very term *ἐκείνους* (*Works*, ii, 112). 3. Others, again, affirm that the apostles were not commissioned till after Christ's resurrection. Sage, quoted in Aytton, *Constit. of the Ch.* app. p. 5, 6; Saravia's *Priesthood*, Spanheim, *Op. Theol.* i, 436; Stillingfleet, *Irenicum*, i, 117, 118, and ii, 218; Whitby, *Annot. Luke* x, 1; Hammond, in *ibid.*; Bellarmine, *De Pontif.* lib. iv, c. 25; Heber [Bp.], in *Life of Jeremy Taylor*, *Works*, i, 185.

II. *The apostles were extraordinary officers, and could have no successors.* 1. This is affirmed by Pearson, *On the Creed*, p. 16, "who are continued to us only in their writings;" Whitby, in *Comment. Pref. to Titus*; Hoadly [Bp.], *Works*, fol. ii, 827; Barrow, in *Works*, fol. i, 598; Willet, in *Synopsis Papiami*, p. 164, 165; Fell [Bp.], *On Ephes.* v, 9; Hooker, *Ecol. Pol.* vol. iii, bk. vii, § iv, p. 187. Keble's edition; Chillingworth; Hinds, *History of Rise and Progress of Christ*, ii, 70-77; *On Inspiration*, p. 117; Lightfoot, *Works*, xlii, 26, 27, 30, 70, 98, etc., and in other works; Palmer, *On the Ch.* i, 169, 170; Bowers, *Hist. of the Popes*, i, 5, 6; Potter, *On Ch. Government*, p. 121, 117, Amer. ed.; Steele, *Phil. of the Evid. of Christ*, p. 102, 105, 106, 107; Doddwell, *Parzena*, ad. ext. p. 68 (comp. i, 54, 55, 62, apud Aytton); Davenant [Bp.], *On Col. vol. i*, ch. i; Brett, *Div. Right of Episcop.* lect. xlii, p. 26, apud Aytton; Stilling-

feet, *Trenctum*, ii, 290-301; Spanheim, *Fil. Dissert.* iii, Nos. 26, 27, 28; archbishop Tillotson (see quoted in *Presbyterianism*, Def. p. 117, 119). 2. This is most resolutely impugned by Land (see his *Three Speeches on the Liturgy* Episcop. etc. in Oxf. edit. 1840, passim); Nichols (William), in his *Defence of the Ch. of England*; "Bishops are successors to the apostles, both in name and thing," says Leslie, in *Letter on Episcopacy*, in *The Scholar Armed*, i, 64 et al.; Beveridge, in *Works*, ii, 88, 98, 120, 147, 149, 167, 278; Law, in his *Second Letter to the Bishop of Bangor* See, in *Oxf. Tr.* iii, 166; Stillingfleet [Bp.], in *Works*, i, 371, in art. "Bishop"; Rees, *Cyclop.*; Hicks [Bp.], Rhind, Scott, Monro (see *Ayton, Constit. of the Ch.* app. p. 8, lect. ii); Honiman [Bp.], *Survey of Naphthali*, ii, 191, etc. in Ayton; Hall [Bp.], *Episcop. by Divine Right*, pt. ii. Opinions differ as widely in the Church of England at the present day (see Smyth, *Prelatic Doctrine of Apostolical Succession Examined* [Boston, 1841]).

**Succinctorium**, or **Succinctory**, an ornament peculiar to the pope, resembling a *maniple* (q. v.), and embroidered with the holy lamb (*Agnus Dei*). It is worn on the left side, being fastened by a cincture, and is, according to some, a substitute for an alms-purse; or

*Agnus Dei on the Succinctorium.*

according to others it was only a resemblance of the ends of a ribbon, formerly worn by most bishops as a cincture over the alb, and which was called *balteum pudicitiae*, or "belt of modesty." In the East bishops wear one pendant, of a lozenge form, tasselled, and with a cross on it called *epigonation*.

**Succinèrè** (*undersinging*), a term used to describe a mode of singing in common use in the early age of the Church. A precentor began the verse, and the people joined him in the close. It was often used for the sake of variety in the same service, with alternate psalmody. Ecclesiastical historians relate that Athanasius effected his escape from the church in which he was beset by the Arian soldiery by setting the people to this kind of psalmody: he commanded the deacon to read the psalm, and the people (*ὑπακούετε, respondere* or *succinere*) to repeat this clause after him: "For his mercy endureth forever." See Bingham, *Christ. Antiq.* bk. xiv, ch. i, § 12. See ACROSTICS.

**Suc'coth** (Heb. *Sukkoth*, סוכות or [in Gen. xxxii, 17; Exod. xii, 37; xiii, 20; Numb. xxxiii, 5, 6] סֶכֶד, *booths* [as often]; Sept. Σοκχώδ v. r. Σοκχωδά, but σκηναι in Gen. and Ps.; Vulg. *Socoth* or *Soccoth*), the name of at least two Biblical places of early mention, the exact position of neither of which, however, has been clearly identified by modern researches. See also SUCCOTH-BENOTH.

1. A town of ancient date in the Holy Land, being first heard of in the account of the homeward journey of Jacob from Padan-aram (Gen. xxxiii, 17). The name is derived from the fact of Jacob's having there put up "booths" for his cattle, as well as a house for himself; and these structures, in contrast with the "tents" of the wandering life, indicate that the Patriarch made a lengthened stay there—a fact not elsewhere alluded to. Travellers frequently see such "booths" occupied by the Bedawin of the Jordan valley. They are rude huts of reeds, sometimes covered with long grass, sometimes covered with a piece of a tent. They are much used by a semi-nomad people. This fertile spot must have reminded Jacob of the banks of the Euphrates from which he had recently come. The situation is approximately indicated by the fact that Jacob was on his way from Peniel to Shechem. Peniel was apparently on the north bank of the Jabbok (Gen. xxxii, 22;

23); and it would seem that after his interview with Esau on the south bank, he turned back to avoid further intercourse with his dangerous brother; and instead of following him to Edom, he recrossed the Jabbok and descended to the valley of the Jordan, where he resolved to rest for a time amid its luxuriant pastures (see, however, Kalisch, *ad loc.*; Ritter, *Pal. und Syr.* ii, 447).

The next notice of Succoth is in Joshua's description of the territory of Gad. To this tribe the middle section east of the Jordan was allotted, including the valley of the Jordan up to the sea of Galilee. See GAD. Among the towns in the valley is *Succoth* (Josh. xiii, 27). Nothing more can be inferred from this than that it lay on the east bank of the river.

In the narrative of Gideon's pursuit of Zeba and Zalmunna it is said, "And Gideon came to Jordan, passed over . . . and said unto the men of Succoth," etc. (Judg. viii, 5). His course was eastward—the reverse of Jacob's—and he came first to Succoth, and then to Penuel, the latter being farther up the mountain than the former (ver. 8, "went up thence"). The tale there recorded of the mingled cowardice and perfidy of the inhabitants, and of Gideon's terrible vengeance, is one of the most harrowing in the Bible. At that period Succoth must have been a place of importance, when it ventured to refuse the request of Gideon. Its "princes and elders," too, are said to have numbered "threescore and seventeen men."

Though the rulers were slain, the city continued to prosper, and in the days of Solomon it was well known. The sacred historian informs us that the brazen vessels of the Temple were cast "in the circuit" (פְּצֵצָה) of the Jordan, in the clay ground, between Succoth and Zarthan" (1 Kings vii, 46; 2 Chron. iv, 17). Succoth gave its name to "a valley" (פְּצֵצָה), probably a lower section of "the circuit," or great plain of the Jordan (comp. "the vale of Siddim," which was also called an *Emek* in "the circuit of the Jordan," Ps. lx, 6).

Jerome observes, in his notes on Genesis: "There is to this day a city of this name (*Succoth*) beyond Jordan in the region of Scythopolis" (*Opera*, ii, 989, ed. Migne); but in the *Onomasticon* both Jerome and Eusebius merely state that it is the place where Jacob dwelt on his return from Mesopotamia, without indicating its site or appearing to know of its existence (s. v. "Scenes").

Burckhardt, on his way from Beisan to es-Salt, forded the Jordan two hours (about six miles) below the former, and observes in a note (*Travels in Syria*, p. 345), "Near where we crossed, to the south, are the ruins of *Sukkot*." The ruins seem to have been on the east bank of the river, though he does not expressly say so, as later travellers do (see Schwarz, *Palest.* p. 232). This may possibly be the Succoth of Jerome; but it seems too far north to suit the requirements of the narrative in Genesis. Jacob's direct road from the Wady Zerka to Shechem would have led him by the Wady Ferrah, on the one hand, or through Yanin, on the other. If he went north as far as Sukkot, he must have ascended by the Wady Maleh to Teyasir, and so through Tubās and the Wady Bidān. Perhaps his going north was a ruse to escape the dangerous proximity of Esau; and if he made a long stay at Succoth, as suggested in the outset of this article, the détour from the direct road to Shechem would be of little importance to him (see the *Bibliotheca Sacra*, Oct. 1876, p. 742 sq.).

Robinson discovered another ruin, called *Sakūt* (which is radically as well as topographically different from the *Sukkot* of Burckhardt), situated on the west bank of the Jordan, about fifteen miles south of Beisan. "Near it is a copious fountain, and the plain around it is covered with most luxuriant vegetation. The ruin is merely that of a common village, a few foundations of unhewn stones" (*Bibl. Res.* iii, 309; comp. Van de Velde, *Travels*, ii, 843). Its position on the west bank pre-

vents its being identified with the Succoth of the Bible, but it is just possible that the name may have been transferred to a spot on the other side (see Ritter, *ut sup.* ii, 446), or it may have been a crusaders' site (see Conder, *Tent Work in Palest.* ii, 62).

Until the position of Succoth is more exactly ascertained, it is impossible to say what was the valley of Succoth mentioned in *Psa.* lx, 6 and *cvi.* 7. The same word is employed (*Josh.* xiii, 27) in specifying the position of the group of towns among which Succoth occurs, in describing the allotment of Gad; so that it evidently denotes some marked feature of the country. It is not probable, however, that the main valley of the Jordan, the *Ghór*, is intended, that being always designated in the Bible by the name of "the Arabah."

2. The first camping-place of the Israelites when they left Egypt (*Exod.* xii, 37; xiii, 20; *Numb.* xxxiii, 5, 6). This place was apparently reached at the close of the first day's march. *Rameses*, the starting-place, we have shown was probably near the western end of the Wady et-Tumeyât. We have supposed the distance traversed in each day's journey to have been about thirty miles; and as Succoth was not in the Arabian desert, the next station, *Etham*, being "in the edge of the wilderness" (*Exod.* xiii, 20; *Numb.* xxxiii, 6), it must have been along the present pilgrim route called *Dub el-Ban*, about half-way between the easternmost branch of the Nile and the castle of *Ajrdû*. It was probably, to judge from its name, a resting-place of caravans, or a military station, or a town named from one of the two. We find similar names in *Scenæ Mandræ* (*Itin. Ant.*), *Scenæ Mandrorum* (*Not. Dign.*), or *Σκηνή Μανδρών* (*Not. Græc. Episcopatum*), *Scenæ Veteranorum* (*Itin. Ant. Not. Dign.*), and *Scenæ extra Gerasa* (*sic: Not. Dign.*). See, for all these places, *Parthey, Zur Erdkunde des alten Aegyptens*, p. 535. It is, however, evident that such a name would be easily lost, and, even if preserved, hard to recognise, as it might be concealed under a corresponding name of similar signification, though very different in sound, like that of the settlement of *Ionian* and *Carian* mercenaries, called *τὰ Σπαρτόμεδα* (*Herod.* ii, 154). See *EXODE; RED SEA, PASSAGE OF*.

**Succoth-Benoth** (Heb. *Sukkoth'-Benoth'*; סֻכּוֹת בְּנוֹת, *booths of daughters*; Sept. Σουκώθ Βενύθ v. r. Σουκώθ [and even Ποκώθ] Βενύθ; Vulg. *Socoth-beneth*) occurs only in 2 Kings xvii, 30, as the name of some deity whose worship the Babylonian settlers in Samaria are said to have set up on their arrival in that country. It has generally been supposed that this term is pure Hebrew, and as such most interpreters explain it to mean "the booths in which the daughters of the Babylonians prostituted themselves in honor of their idol" (i. e. Mylitta, see *Herod.* i, 199; *Strabo*, xvi, 745); others "small tabernacles in which were contained images of female deities" (comp. *Calmet, Commentaire Littéral*, ii, 897). It is in objection to both these explanations that Succoth-benoth, which in the passage in Kings occurs in the same construction with *Nergal* and various other gods, is thus not a deity at all, nor, strictly speaking, an object of worship. It should be noted, however, that the expression "made" (עָשָׂה) does not necessarily require such an interpretation. Sir H. Rawlinson thinks that Succoth-benoth represents the Chaldean goddess *Zir-bani*, the wife of *Merodach*, who was especially worshipped at Babylon, in conjunction with her husband, and who is called the "queen" of the place. *Succoth* he supposes to be either "a Hamitic term equivalent to *Zir*," or possibly a Semitic mistranslation of the term—*Zirat*, "supreme," being confounded with *Zarat*, "tents" (see the *Essay* of Sir H. Rawlinson in Rawlinson's *Herodotus*, i, 630). Gesenius arbitrarily alters the reading to סֻכּוֹת בְּנוֹת, *booths of the high-places* (*Thesaur.* s. v.); and *Movers* (*Phœnic.* i, 596) understands "involucra or secreta mulierum," having reference to phallus-worship (so *Nork*,

*Mythol.* i, 124). The rabbins (see *Kimchi* and *Jarchi*, *ad loc.*) fable that it was a goddess under the form of a hen and chickens; which Kircher (*Œd. Æg.* i, 354) regards as an astronomical emblem of the Babylonians. See *Selden, De Diis Syriis*, ii, 7, 808 sq.; *Voss, Theol. Gent.* ii, 22; *Cresusius, De Succoth Benoth*, in *Ugolino, Thesaur.* xxiii.

**Su'cathite** (Heb. only in the plur. *Sukathim'*, שֻׁכְּתִיִּים, a patronymic of unknown origin; Sept. Σουκαθίται; Vulg. in *tabernaculis commorantes*), a designation of the last-named of the three families of "scribes which dwelt at Jabez" (1 Chron. ii, 55); apparently descendants of some person named *Suchah*, a Judahite of the family of *Caleb*.

**Suckow**, CARL ADOLF, a German theologian, was born in 1802 at Münsterburg, in Silesia. He studied theology and philosophy at Breslau, was appointed in 1834 professor of theology and director of the homiletical seminary at Breslau, and died there in 1847. He wrote, *De Protevangeliis Jacobi. Pars I, De Argumento ac Indole Protevangeliis* (Vratislavia, 1830); *Gedenktage des christl. Kirchenjahres in einer Reihe von Predigten* (Breslau, 1838); *A. B. C. evangelischer Kirchenverfassung* (ibid. 1846). See *Regensburger Conversations-Lexikon*, s. v.; *Zuchold, Bibl. Theol.* ii, 1292 sq. (B. P.)

**Sud** (Σούδ v. r. [in No. 2] Σουδά, Σουσα, etc.), the name of a stream and of a person in the Apocrypha.

1. A river in the immediate neighborhood of Babylon, on the banks of which Jewish exiles lived (*Bar.* i, 4). No such river is known to geographers; but if we assume that the first part of the book of *Baruch* was written in Hebrew, the original text may have been *Sur*, the final *ר* having been changed into *ד*. In this case the name would represent, not the town of *Sora*, as suggested by *Bochart* (*Phaleg*, i, 8), but the river *Euphrates* itself, which is always named by Arab geographers "the river of *Sura*," a corruption probably of the "Sippara" of the inscriptions (*Rawlinson, Herod.* i, 611, note 4).

2. A corrupt Græcism (1 Esdr. v, 29) of the name *SIA* or ΣΙΑΗ (q. v.) in the Hebrew lists (*Ezra* ii, 44; *Neh.* vii, 47).

**Sudaili**, STEPHEN BAR, a Monophysite monk, who, according to the *Cundelabrum Sanctorum* of *Abul-faraj* (q. v.), in *Assemani, Bibl. Orient.* ii, 291, lived about A.D. 500, at first in Edessa and afterwards in Jerusalem. He is credited with the authorship of a work which circulated under the name of *Hierotheus*, the teacher and predecessor of *Pseudo-Dionysius*, in which a limitation of the duration of hell is taught on the authority of a pantheistic interpretation of 1 Cor. xv, 28. Neander regarded the ascription of this work to *Sudaili* as resting upon a mere assumption on the part of *Abul-faraj* (*Gesch. d. christl. Rel. u. Kirche*, i, 727), but without having sufficient warrant for his view.

Particulars respecting the mystico-pantheistic theology of *Sudaili* are furnished by *Xenajas* or *Philoxenus* (q. v.) of *Maabug* in a letter addressed to the presbyters *Abraham* and *Orestes* of *Edessa*, which earnestly warns them against the influence of that learned and subtle monk who formerly sojourned in their city (see extracts in *Assemani, ut sup.* p. 30-33). As there represented, *Sudaili* taught the essential unity of the Father, Son, and Spirit, of the divine and human nature of Christ, and also of God and all created existences, basing his views on 1 Cor. xv, 28, *ὅτι ὁ Θεὸς τὰ πάντα ἐν ᾧ ὄντων*. He had inscribed on the wall of his cell the words "Omnis natura Divinitati consubstantialis est," and he continued to elaborate the same idea in his writings after public opinion had compelled the erasure of the inscription in his cell. It is also charged by *Philoxenus* that *Sudaili* taught that baptism and the eucharist are superfluous, that he denied the infliction of punishment for sin at the last judgment, and that he promised to pagans and Jews the same heavenly felici-

ties as to Christians, to Judas and Simon Magus equal blessedness with Paul and Peter. It is evident that much of these assertions is dictated by malice and is grossly misrepresented. The same remark applies to the Chiliastic views of Sudaili, who was a consequential adherent of Origenistic doctrines, and must be regarded as holding a spiritualized, idealistic view of the world. He taught three world-periods—the present, corresponding to the sixth day of the week; the millennium, the great Sabbath or rest-day of the week; and the eternity of consummation or of the restoration of all things.

Nothing is known of the personal or literary career of Bar Sudaili. The violent assault of Philoxenus upon his character as a teacher and expositor of the Scriptures appears to have succeeded so far as to cause him to be regarded by all Monophysites as a dangerous heretic. The Jacobites of Syria, e. g., admitted a special sentence of condemnation against him into their formula of ordination. See Assemani, *Bibl. Orient.* vol. i and ii.—Herzog, *Real-Encyclop.* s. v.

**Sudarium**, or **Sudary** (*sweat-cloth*): 1. The *purificationum* (q. v.) for wiping the chalice; 2. The *maniple* (q. v.); 3. The *veronica* (q. v.) (the blessing of the priest's eyes with the sudarium was forbidden in 1549); 4. The banner of a bishop's staff, called also *vezillum* (q. v.).

**Sudbury**, SIMON. See SIMON OF SUDBURY.

**Suddath**, WILLIAM W., a Presbyterian minister, was born in Fairfax County, Va., July 31, 1826. He professed religion in his nineteenth year, was received by the Lexington Presbytery of the Cumberland Presbyterian Church as a candidate for the ministry, and was licensed to preach in 1847. About this time he entered Chapel Hill College, in Lafayette County, Mo.; studied theology in the Cumberland University at Lebanon, Tenn.; but before graduating he was induced, by the great interest he took in the success of Chapel Hill College, to return to Missouri and accept the professorship of languages in that college. He was afterwards elected president, which position he filled until 1857, when he accepted a call to the chair of languages in the Masonic College at Lexington, Mo. In 1858 he became enlisted for the St. Louis mission, and his far-reaching mind and noble, benevolent heart conceived a plan to relieve it of its embarrassments. But his labors were too great for his physical energies. He gave up his position in the college to engage in the work of his choice: he accepted a call from the Church in St. Joseph, but died Aug. 1, 1860, before assuming the duties of the new position. Mr. Suddath was an eloquent preacher, a scholar, and a Christian gentleman. See Wilson, *Presb. Hist. Almanac*, 1861, p. 236.

**Sudhoff**, CARL, a doctor of divinity, and prominent theologian of the Calvinistic Church of Germany, who died in the year 1865 at Frankfort-on-the-Main, is the author of, *Weihstunden* (4th ed. Hamm. 1865):—*Der Heidelberger Katechismus zergliedert* (2d ed. Kreuznach, 1854):—*De Conventientia quæ inter utrumque Gratia Instrumentum, Verbum Dei, et Sacramentum Intercedat*, etc. (ibid. 1852):—*In der Stille* (Frankfort, 1859, 2 pts.):—*Fester Grund christlicher Lehre, ein Hilfsbuch zum Heidelberger Katechismus* (ibid. 1857):—*Geschichte der christl. Kirche* (2d ed. ibid. 1861, 2 vols.):—*Communionsbuch* (2d ed. ibid. 1859):—*Christliche Religionslehre* (ibid. 1861):—*Theologisches Handbuch zur Auslegung des Heidelberger Katechismus* (ibid. 1862). Besides a number of articles for Herzog's *Real-Encyclop.*, he also wrote the lives of C. Olevianus and Z. Ursinus, published in the 8th part of *Leben und ausgewählte Schriften der Väter und Begründer der reformirten Kirche*. See Zuchold, *Bibl. Theol.* ii, 1293 sq. (B. P.)

**Su'dias** (Σουδιακ), a corrupt Greek form (1 Esdr. v, 26) of the name ΗΟΔΑΒΙΑΗ or ΗΟΔΕΒΑΗ (q. v.) of the Hebrew lists (Ezra iii, 40; Neh. vii, 43).

**Sudices**, the Fates of the Bohemians and Moravians, supposed to resemble the Roman *Parce*.

**Sudra**, in Hindûism, is the lowest of the four castes among the Hindûs, sprung from Brahma's feet and appointed to serve the other castes. It includes all inferior laborers and servants.

**Sudri**, one of the four powerful dwarfs of the Norse mythology, who support the arch of the sky at the four regions from which they derive their names. The other dwarfs are Nordri, Westri, and Austri.—Vollmer, *Wörterb. d. Mythol.* s. v.

**Suehre**, in Persian mythology, is the name of the planet Venus before it was placed in the sky. It is identical with the Arabic *Anahid*. Suehre was an exceedingly charming maiden, of whom two angels became enamoured, and who resisted their advances with the result that she was removed to the skies, while they were banished to the abyss. In her new abode she is served by thousands of celestial spirits, who adore her for her virtue and beauty.

**Suemmer OALA**, in Lamaism, is a mountain of vast elevation, which is surrounded by three others, upon whose circle rests a second circle of four mountains, all of them being of gold, with the exception of the central one, which is composed of a single green stone. These mountains are the place of abode of the free spirits, Erike Bariksan. The wicked spirits dwell in the caverns of the mountains, and their chief there holds a powerful castle.

**Suenes**, a Christian nobleman in Persia, who, refusing to deny Christ, had his wife taken from him, and given to one of the emperor's meanest slaves; and what added to his mortification was that he was ordered to wait upon his wife and the slave, which at length broke his heart.

**Sueur**, EUSTACHE LE, one of the most celebrated of French painters, was born in 1617, and after studying with his father, a sculptor, was placed in the school of Simon Vouet at Paris. He soon excelled his master, and adopted a style which is noted for its simplicity and severity. He has been termed by his admirers the French Raphael; but he was far behind that great master in every respect. He died in 1655. He painted the celebrated series of *St. Bruno*, twenty-two large pictures on wood, in the cloister of the Carthusians at Paris, before his thirtieth year:—*St. Paul Preaching at Ephesus*:—*The Gentiles Burning their Prescribed Book* (1649), engraved by Picart and Massard:—*Paul Healing the Sick*:—*Martyrdoms of St. Laurence and St. Protasius*, both engraved by Gerard Audran. He painted many other celebrated pictures, as, *Christ Scourged*:—*Christ with Martha and Mary*:—*The Presentation in the Temple*:—*The Histories of St. Martin and St. Benedict*.

**Suez**. See RED SEA.

**Suffering-day**. See GOOD-FRIDAY.

**Suffering-psalm**, the name given to Psalm xxii, "Deus, Deus meus;" used in the services of the Church on Good-Friday.

**Suffering-week**. See PASSION-WEEK.

**Sufferings of CHRIST**. See VICARIOUS SUFFERING.

**Suffetum**, COUNCIL OF (*Concilium Suffetanum*), was held in 528, at which St. Fulgentius was present. Bishop Quod-vult-Deus (who had disputed the point of precedence with him at the Council of Junga, in Africa), at his request, presided.

**Suffragan** (*suffraganeus*) is the title applied to every ecclesiastic who has to assist his superior. In this way Alcuin explains the term in a letter to Charlemagne: "Suffraganeus est nomen mediæ significationis; ideo nescimus quale fixum ei apponere debeamus, ut presbyterorum, aut abbatum, aut diaconorum, aut cæ-

tererum graduum inferiorum, si forte episcoporum nomen, qui aliquando vestre civitati subjecti erant, addere debemus" (*Opera*, p. 1160). The term is also used as synonymous with *vicarius* (see Du Fresne, *Glossarium*, s. v.). It is given more especially to bishops, however, and in respect to them with a twofold reference. A *suffragan bishop* is an *episcopus in partibus infidelium* employed as the vicar and assistant of a regular diocesan bishop; but the name is given to the latter also in view of the relation he sustains, if not exempt [see EXEMPTION], to his metropolitan. The relation sustained by all the suffragans of a province (*comprovinciales*) together with their metropolitan, and the rights belonging to the latter in his relation to the suffragans and their subordinates, have been exactly determined, and are stated in Gratian, *Causa* iii, qu. 6, and *Causa* ix, qu. 8. Various decisions occur also in the decretals, which ordain that the consecration of a metropolitan shall be performed by all his suffragans. The rights of metropolitans over their suffragans are limited. See Innocent III in c. 11, *De Officio Judicis Ordinarii*, i, 31.—Herzog, *Real-Encyklop.* s. v. See ARCHBISHOP; METROPOLITAN.

It thus appears that anciently suffragan bishops were all the city bishops of any province under a metropolitan, who were called his suffragans because they met at his command to give their suffrage, counsel, or advice in a provincial synod. In this sense the word was used in England at the time when Linwood wrote his *Provinciale* (in 1480): "They were called suffragans because they were bound to give their suffrage and assistance to the archbishop, being summoned to take part in his care, though not in the plenitude of his power." The suffragans were not the same as CHORISCOPPI (q. v.), or rural bishops. Thus it was also in other churches. The seventy bishops who were immediately subject to the bishop of Rome, as their primate or metropolitan, were called his suffragans, because they were frequently called to his synods. These bishops were called by the peculiar technical term *libra*, which stood for seventy. Their elections were regulated by the metropolitan, who either ordained them himself, or authorized their ordination. They were summoned by him to attend the provincial synods, and could not disobey such summons under pain of suspension, or some such canonical censure, which was left to the discretion of the metropolitan and the council. From the 13th to the 16th century there were in the English Church a class of bishops (1) holding nominal sees, titulars or *in partibus infidelium*, in Hungary, Greece, and Asia; (2) exiles, temporary or permanent, from bishoprics in Ireland or Scotland, who were called suffragans.

Bishops who had no metropolitan power first began to have suffragans under them in the 10th century. These were styled vicar-generals, vicegerents, *vice-episcopi*, etc. Suffragan bishops were appointed in Germany for the ordination of inferior officers and the consecration and benediction of churches, altars, baptismal waters, etc. Some attempt was made in England, at the beginning of the Reformation, to restore the choriscopi, under the name of suffragan bishops. Act 26, Henry VIII, 1534, appointed several towns for suffragan sees. One suffragan bishop was consecrated for Nottingham, and another as bishop of Dover in 1870. A permissive act for bishops suffragan in Ireland was passed in the early part of the present century, and others have recently been consecrated in the colonies. See Bingham, *Christ. Antiq.* bk. ii, ch. xv, § 13-15; ch. xvi, § 12, 17; Coleman, *Ancient Christianity*, p. 139.

**Suffrage.** In the early Church, one of the ways of designating persons to the ministry was by the ordinary course of *suffrage* and election of the Church. It was also customary for the clergy or presbytery (or the retiring bishop or presbyter) to nominate a person to fill the vacant office, which nomination was followed by the suffrages of the people—suffrages not merely testimonial, but judicial and elective. See Riddle, *Christ. Antiq.* p. 329.

The term was also used to designate—1. The public worship—the united voice and consent of the people in the petitions offered. "See now, then, both learned and unlearned, how prayers and all other *suffrages* are in common to this spiritual Church" (*Lantern of Light*, A.D. 1400). 2. A short form of petition, as in the Litany. Thus, in the Order for the Consecration of Bishops we read that in the Litany as then used, after the words "that it may please thee to illuminate all bishops," etc., "the proper *suffrage* shall be," etc. 3. The versicles after the Creed in Morning and Evening Prayer.

**Sāfs**, a sect of mystic philosophers in Persia, which was founded in the 9th century by Abul Khair. It has contained among its members many of the most noted Mohammedan scholars and poets. Schamyl, the famous Circassian leader, is said to have belonged to this sect, and to have given to it a semi-political character, directing it especially against the aggressions of the Russians. They are to be found in every part of the empire; have their acknowledged head at Shiraz, and their chief men in all the principal cities. Mr. Martyn, missionary to that country, calls them "mystic latitudinarians." For the tenets, see SŪFISM.

**Sūfism**, or **Scofism** (Arabic, *sūf*, pure, wise), a certain mystic system of philosophical theology within Islam. Its tenets are, that nothing exists absolutely but God; that the human soul is an emanation from his essence; that every man is an incarnation of Deity; and, though divided for a time from this heavenly source, will be finally reunited with him; that the highest possible happiness will arise from that reunion; and that the chief good of mankind consists in as perfect a union with the Eternal Spirit as the encumbrances of a mortal frame will allow; that, for this purpose, they should break all connection with extrinsic objects, and pass through life without attachments, as a swimmer in the ocean strikes freely without the impediments of clothes; that if mere earthly charms have power to influence the soul, the idea of celestial beauty must overwhelm it in ecstatic light. It maintains also that, for want of apt words to express the divine perfection and the ardor of our devotion, we must borrow such expressions as approach the nearest to our ideas, and speak of beauty and love in a transcendent and mystical sense; that, like a reed torn from its native bank—like wax separated from its delicious honey—the soul of man bewails its disunion with melancholy music, and sheds burning tears; like the lighted taper, waiting passionately for the moment of its extinction, as a disengagement from earthly trammels, and the means of returning to its only beloved. Sūfism teaches four principal degrees of human perfection or sanctity. 1. *Shariat*, or the lowest, is the degree of strict obedience to all the ritual laws of Mohammedanism—such as prayer, fasting, pilgrimage, almsgiving, ablutions, etc.—and the ethical precepts of honesty, love of truth, and the like. 2. *Tarikat*. This degree is attainable by those who, while strictly adhering to the outward or ceremonial injunctions of religion, rise to an inward perception of the mental power and virtue necessary for the nearer approach to the Divinity, the necessity of and the yearning for which they feel. 3. *Hakikat* (truth) is the degree of those who, by continuous contemplation and inner devotion, have risen to the true perception of the nature of the visible and invisible—who, in fact, have recognised the Godhead, and through this knowledge of it have succeeded in establishing an ecstatic relation to it. 4. *Maarifal* is the degree in which man communicates directly with the Deity, and is admitted into a mysterious union with him. Thus it will be seen that the highest aim of the Sūfi is to attain self-annihilation by losing his humanity in Deity. This is to be accomplished by abstracting his mind from all worldly objects, and devoting himself to divine contemplation. Accordingly the Sūfis neglect and despise all outward worship as useless and unneces-

sary. The Musuavi, their principal book, expatiates largely upon the love of God, the dignity of virtue, and the high and holy enjoyments arising from a union with God. All Sûfistic poetry and parlance are to be taken allegorically and symbolically. They represent the highest things by human emblems and human passions; and religion being with them identical with love, erotic terminology is chiefly used to illustrate the relation of man to God. Thus the beloved one's curls indicate the mysteries of the Deity; sensuous pleasures, and chiefly intoxication, indicate the highest degree of divine love, or ecstatic contemplation. Its principal religious writer is Jalaeddin Rumi, and its theology prevails among the learned Mussulmans, who avow it without reserve. See *Chambers's Encyclop.* s. v.; Gardner, *Faiths of the World*, s. v.; *Christian Observer*, 1819, p. 879; Mill, *Mohammedanism*.

**Suger**, abbot of St. Denis, and a leading dignitary of the Church and statesman of France in the 12th century, was born probably in the year 1081, and in the neighborhood of St. Omer, and was educated in the Monastery of St. Denis, where the crown-prince, Louis the Fat, was his companion. After completing his studies in 1103, he was employed by abbot Adam of St. Denis in the administration of distant possessions of the convent, and in their defence against the incursions of predatory knights. On the accession of Louis VI to the throne (1108), Suger became his counsellor, and contributed greatly to the subjugation of the barons, who had thrown off all responsibility, and to the establishing of the royal authority, by which the reign of Louis VI became noted in the history of France. He was also an active participant in the dispute about investiture (see the article), which at that time agitated both Church and State, taking sides with the pope, as the policy of France demanded. He was present at the Lateran Council in 1112, which annulled the concessions made by pope Paschal II to Henry V. In 1118 he met the fugitive pope Gelasius II, and, in the name of his king, placed all the resources of France at his disposal against his Italian adversaries. He subsequently negotiated a settlement of the question of investiture, in 1121, which proved satisfactory to both France and the papacy. In 1122 he became the successor of the deceased Adam in the abbacy of St. Denis, and in 1124 he visited Rome to attend the great Lateran Council, and while there so ingratiated himself with the pope, Calixtus II, that the latter proposed to create him cardinal, a project which failed by reason of the decease of the pope. He accompanied the army in a campaign against the emperor Henry V in the same year; and he was at the same time earnestly engaged in endeavoring to induce the king to release the *colones*, or lower orders in the State, from many of their pressing burdens, and to concede the right to form autonomous communes as a means of undermining the feudal system.

About 1127 Suger renounced the habits of his previous worldly life and became an ascetic; and, after having reformed himself, he undertook to enforce the Benedictine rule in all its strictness in the abbey of St. Denis. He fulfilled his spiritual functions conscientiously, and built a magnificent church while himself living in a little cell. His principal merit consists, however, in an excellent administration of the convent, in the conservation of its rights, in the artistic decoration of churches, and in the dissemination of the influences of culture throughout the surrounding wastes. His direction of the affairs of the State still continued, and, when Louis VII ascended the throne (in 1137), became even more pronounced than before. He was associated with bishop Jocelin of Soissons in the regency, and administered the government on the plan of the late king. His boldness appears in his resisting the papal interdict (in 1141) by which Innocent II sought to force a prelate into the archbishopric of Bourges against the expressed will of the king. His endeavor to restrain the king from embarking in his crusade failed; but he

was appointed regent of the country during the king's absence, in conjunction with the archbishop of Rheims and count Vermendois. Aided by the pope, he subdued the rebellious nobility, and so wisely administered the finances that he was able to honor the incessant drafts of Louis, and also to erect many edifices, and still save large sums of money to the public treasury. The height of his career was reached when he succeeded in neutralizing the endeavors of Robert of Dreux, the brother of Louis VI, who had returned from the Holy Land in 1148, to seize upon the supreme authority. At the same time, he succeeded in resisting the desires for radical reform fostered by Abelard and Pierre de Bruys, while zealously endeavoring to correct the abuses from which those desires had sprung. He was further successful in a conflict with the canons of St. Geneviève, in Paris, whose convent pope Eugene III had directed him to reform in accordance with the Benedictine rule. Louis VII, on his return, in 1149, publicly thanked the regent and called him the father of his country; and Bernard of Clairvaux and a number of foreign princes wrote to him in token of their admiration and respect. He enjoyed his fame, however, during a brief season only, and died Jan. 12, 1151. His literary remains include only sixty miscellaneous letters (in Duchesne, *Scriptores*, vol. iv.), a report of his administration of St. Denis, and a biography of Louis VI which ranks among the superior historical productions of the Middle Ages (both in Duchesne, *ut sup.*).

See *Hist. Lit. de la France*, xii, 361; Bernardi, *Essai Hist. sur l'Abbé Suger*, in *Archives Lit. de l'Europe* (Par. 1807), vol. xiv and xv; Carné, *Études sur les Fondateurs de l'Unité Nat. en France* (ibid. 1848), vol. i; Combes, *L'Abbé Suger* (ibid. 1853) (monk Wilhelm's (a contemporary) biography of Suger, in Guizot, *Coll. des Mémoires*, vol. viii.—Herzog, *Real-Encyclop.* s. v.

**Suggestum**, or **Suggestio** (*a desk*), a name frequently given to the *bema*, or sanctuary, of a church.

**SUGGESTUM LECTÖRUM**, one of several names given to the **AMBO** (q. v.), or *reader's desk*.

**Sugin** (סוגין, from סוג, or *pairs*, is a Masoretic term to denote groups of words which occur in one section several times, once in this connection and once in another connection. These instances having been noticed by the Masorites, they arranged them into סוגין, or *pairs*. Thus the *Massora Finalis* gives under the letter *He* (p. 216, col. 1) "eleven pairs, each one of which pair alternately occurs with an audible *He* (=Mappik) and with a quiescent *He* (=Rappe):" e. g. מִכְרָה (Prov. xxxi, 10) and מִכְרָה (Gen. xxv, 81); וְשָׁמְרָה (Lev. xiii, 20) and וְשָׁמְרָה (ver. 4). Or the Masorites tell us of "twenty-two words beginning and ending with *Vav*, each one of which occurs twice: once *Mila*, or with *Vav* conjunctive, and once *Milel*, or with *Vav* conversive," as וַיַּצְבְּרוּ (Gen. xli, 35) and וַיַּצְבְּרוּ (Exod. viii, 10); וַיִּרְכְּסוּ (xxviii, 28) and וַיִּרְכְּסוּ (xxxix, 21). They tell us that "there are four groups of words, each of which occurs twice in the same book: once with a word less and a letter more, and once with a word more and a letter less." The first of such a pair is "Jehovah, thy God, thou shalt fear, and him thou shalt serve" (Deut. vi, 13); the second, "Jehovah, thy God, thou shalt fear, him thou shalt serve, and to him" (x, 20), which will be best illustrated by the Hebrew, viz.:

אֵת יְהוָה אֱלֹהֶיךָ תִירָא וְאֶת־תַּעֲבָד (Deut. vi, 13).

אֵת יְהוָה אֱלֹהֶיךָ תִירָא אֲדֹנָי וְאֶת־תַּעֲבָד וְבוֹ (Deut. x, 20).

They enumerate instances in which four words occur twice in the same sentence, once with the negative particle **לֹא** and once without it, as **לֹא אֲדֹנָי** (Gen. xxiii, 11) and **אֲדֹנָי** (ver. 15), or **לֹא חֹפֵךְ** (Lev. xiii, 4) and **חֹפֵךְ** (ver. 20). They mention five pairs of words

which respectively occur once with the *Vav* conjunctive and once without it, as עֵין רֵמִין (Josh. xix, 7) and וְעֵין רֵמִין (xv, 82); יִשְׁשָׁכָר וְזִבְלוֹן (Exod. i, 8) and וְיִשְׁשָׁכָר וְזִבְלוֹן (Gen. xxxv, 23). Without increasing the number the reader is referred to Frensdorff (*Massora Magna*, p. 389 sq.), where, under the heading וְזִבְלוֹן, these pairs are given in alphabetical order. A complete list of the above-quoted instances is given by Frensdorff in his *Ochla-ve-Ochla*, p. 14, 52, § 42; p. 14, 52 sq., § 45; p. 138, § 232; p. 138, § 250; p. 138, § 261; and in Levita, *Massoreth Hammasoreth* (ed. Ginsb.), p. 178, 207, 212, 223, 229. (B. P.)

**Suicer**, JOHANN CASPAR, the author of the *Thesaurus Ecclesiasticus*, was born June 26, 1620. He was educated in Zurich, Montauban, and Saumur. In 1648 he returned to Zurich, and became pastor in the Thurgau, but was recalled in 1644 to the schools of the former city. In 1646 he became inspector of the alumnate and professor of Hebrew, ten years afterwards professor of Greek and Latin in the *Collegium Humanitatis*, and in 1660 professor of Greek and canon in the superior college (*Carolinum*). He remained in this position until 1683, and died Dec. 29, 1684.

Suicer rendered valuable service to theology by his thorough philological labors. His earliest works were text-books for students: *Sylloge Vocum Nori Test.* (Tig. 1648, and 1659 with appended compend of Greek proeody; republished in 1744 by Hagenbach):—*Syntaxis Græcæ*, etc. (1651):—*Ἐκρησθησάτω Ἐβραῖαι, quo duas Chrysostomi et duas Basilii M. Homilias Continentur*, etc. (1658 and 1681):—Joh. Frisii Tigurini *Dict. Latino-Germ. et Germ.-Lat.* (1661 sq.):—*Commenius Vestibul. Scholarum Usui felicius Accommodatus*, etc. (1665):—finally, the celebrated *Thesaurus Eccles.* (Amst. 1682, 2 vols. fol.; two enlarged eds. 1728 and 1821, with supplements):—*Lexicon Græco-Lat. et Lat.-Græcum* (1683):—and, after Suicer's death, the *Symbol. Nicæno-Const. et Antiquitate Eccles. Illustratum* (Traj. ad Rh. 1718, 4to). Various other writings were left in manuscript, and the *Lexicon Græc. Majus et Expositio Symbol. et Apost. et Athanasiani* are lost. Suicer's learning in these works, particularly the *Thesaurus*, is so evident that Charles Patin, in his *Travels*, observes that Suicer understood more Greek than all the Greeks taken together.

Suicer took but little part in the doctrinal controversies of his day. He regretted their existence, and assisted his friend Heidegger in securing a modification of the *Formula Consensus*.—Herzog, *Real-Encyclop.* s. v. See HELVETIC CONSENSUS.

**Suicide** (Lat. *sui*, one's self, and *cædere*, to kill) is defined as the killing of one's self with malice aforethought, and while in the possession of a sound mind. It is known in the law as *felo de se*, and is considered felony. In the early Church suicides were called *βιο-σάφατοι* (*biothanati*), from offering violence to themselves. Because suicide was a crime that could have no penance imposed upon it, the Church denied the suicide the honor and solemnity of a Christian burial, and allowed him to lie excommunicated and deprived of all memorial in her prayers after death. In England this crime was punished not only with forfeiture of goods and chattels, like other felonies, but the body of the suicide was buried in the night at the crossings of two highways with a stake driven through the body. This ancient rule was repealed by Statute 4 George IV, c. 51, and now the burials take place in a churchyard, but between 9 and 12 P.M.

Suicide is now generally considered a symptom of some form of insanity, permanent or temporary, in which the emotions and passions are excited or perverted. The following statistics respecting suicides are from *Chambers's Encyclopædia*, s. v.: "In the kingdom of Sweden there is calculated to be 1 suicide to every 92,875 inhabitants; in Saxony, 1 to 8446; in Russia, 1 to 84,246; in the United States, 1 to 15,000; in Paris, 1

to 2700; in St. Petersburg and London, 1 to 21,000. In all England the proportion of suicides is 7.4 to every 100,000 people." See Winslow, *Anatomy of Suicide*; Brière de Boismont, *Du Suicide et de la Folie Suicide*; Bertrand, *Traité du Suicide*; Radcliffe, *English Suicide Fields*; *Medical Critic*, 1862.

**Sukkah.** See TALMUD.

**Suk'kiim** (Heb. *Sukkiyim*, סֻכִּיִּים, *booth-dwellers* [Gesen.] or *inhabitants of Sôk* [Fürst]; Sept. Τρωγλοδῦται; Vulg. *Troglydæ*; A. V. "Sukkiims"), a nation mentioned (2 Chron. xii, 8) with the Lubim and Cushim as supplying part of the army which came with Shishak out of Egypt when he invaded Judah. If the name be Hebrew, it may perhaps be better to suppose them to have been an Arab tribe like the Scenitæ than Ethiopians. If it is borne in mind that Zerah was apparently allied with the Arabs south of Palestine [see ZERAH], whom we know Shishak to have subdued [see SHISHAK], our conjecture does not seem to be improbable. The Sukkiim may correspond to some one of the shepherd or wandering races mentioned on the Egyptian monuments, but we have not found any name in hieroglyphics resembling their name in the Bible, and this somewhat favors the opinion that it is a Shemitic appellation.—Smith. The Sept. and Vulg. render *Troglydætes*, apparently meaning the Ethiopians by that name, who lived on the western shore of the Arabian Gulf (Strabo, xvii, 786), who might have been employed as fleet and light-armed auxiliaries of the Egyptians (Heliod. *Eth.* viii, 16). Pliny (vi, 34) mentions a Troglydætic city in this direction called *Suche* (see Bochart, *Phaleg*, iv, 29). See ETHIOPIA.

**Suleviæ**, a kind of wood-goddesses among the ancient Gauls, who are known to us only from an inscription in bas-relief found near Lausanne, which includes three female figures whose hands are filled with fruit.

**Sullivan, Daniel N. V.**, a minister of the Methodist Episcopal Church, South, was licensed as a local preacher in Alabama in 1833. In 1838 he removed to Texas, and engaged in teaching. In 1840 he was received on trial into the Texas Conference, and served the Church as pastor and presiding elder until his death, at Houston, Feb. 20, 1847. He was a minister of a high order of talents, and especially eminent for his ability in defining and defending the doctrines of the Bible. See *Minutes of Annual Conferences of the M. E. Church, South*, 1847, p. 96.

**Sullivan, Lott Bumpas**, a Congregational minister, was born at Wareham, Mass., June 27, 1790, and was a graduate of Brown University in the class of 1814. For some time after leaving college he had charge of the Academy in Wrentham, Mass., at the same time reading theology with the Rev. Otis Thompson of Rehoboth, Mass. Having completed his theological studies, he went to Ohio, and was ordained pastor of the Congregational Church in the town of Lyme in that state. Here he remained about six years. Subsequently he resided for ten years and more in Western New York as a missionary in the service of the American Home Missionary Society, and performed a most acceptable work in preaching to several churches in that newly settled region. He did a like service in sparsely settled sections of New Hampshire and Vermont. For several years he resided at Shutesbury, Mass., preaching as opportunity presented. He died at Fall River, Mass., March 1, 1861. See the *Cong. Quarterly*, 1861, p. 216. (J. C. S.)

**Sullivan, Samuel B.**, a minister of the Methodist Episcopal Church, was born Jan. 27, 1825, and was converted at the age of eleven. In 1846 he was licensed to preach, and at the next session of the Erie Conference was received on trial. His ministry, though marked with many conversions, was short, for he died April 9, 1853. He was a man of more than ordinary powers of

mind—fervent, forcible, sublime, and generally powerful in his preaching. See *Minutes of Annual Conferences*, 1853, p. 248.

**Sully, Maurice de**, a French prelate, was born at Sully-sur-Loire, about the middle of the 12th century, of obscure parentage. Having acquired an education through charity, he taught letters and theology in Paris, and was at length made canon of the Cathedral of Bourges, and eventually of that of Paris, to the bishopric of which he finally attained by some means. He greatly enlarged the edifices, honors, and emoluments of that see, and died Sept. 11, 1196, leaving *Letters, Sermons*, and a French translation of the New Testament (Lyons, 1511, 8vo). See Hoefer, *Nouv. Biog. Gén. a. v.*

**Sully, Odon (or Eudes) de**, a French prelate, was born about 1165 at La Chapelle d'Angillon (Berri), being the son of Eudes Archambaud, lord of Sully. He was educated at Paris, and in 1184 became singer at the Cathedral of Bourges. In 1187 he visited Rome, and in 1196 succeeded his brother Maurice as bishop of Paris, a see which he is said by Pierre de Blois to have administered with great fidelity, but by others in a mercenary manner. He took the pope's part in the ecclesiastical quarrels of his country at the time, and was compelled to flee, leaving his property to be confiscated by the crown, but was eventually restored with additional honors. A council of Paris was held under him by the papal legate in 1201; he laid the foundation of Porrois, afterwards famous as Port-Royal; and he preached a crusade against the Albigenes. He died at Paris, July 13, 1208. See Hoefer, *Nouv. Biog. Générale, a. v.*

**Sulphur** is designated in Heb. as **שֻׁלְפֻרִית**, *gophrith* (A. V. "brimstone"), and in Greek **Σελίον** (Plutarch, *Sympos.* iv, 2, 8). In the Scriptures it is very frequently associated with "fire": "The Lord rained upon Sodom and Gomorrah brimstone and fire out of heaven" (Gen. xix, 24; see also Psa. xi, 6; Ezek. xxxviii, 22). In Job xviii, 15 and Isa. xxx, 33 "brimstone" occurs alone, but no doubt in a sense similar to that in the foregoing passages, viz. as a synonymous expression with lightning, as has been observed by Le Clerc (*Dissert. de Sodomo Subversione, Commentario Pentateuch Adjuncta*, § iv), Michaelis, Rosenmüller, and others. There is a peculiar sulphurous odor which is occasionally perceived to accompany a thunder-storm. The ancients draw particular attention to it: see Pliny (*Hist. Nat.* xxxv, 15), "Fulmina ac fulgura quoque sulphuris odorem habent;" Seneca (*Q. Nat.* ii, 53), and Persius (*Sat.* ii, 24, 25). Hence the expression in the sacred writings "fire and brimstone" to denote a storm of thunder and lightning. The stream of brimstone in Isa. xxx, 33 is, no doubt, as Lee (*Heb. Lex.* p. 123) has well expressed it, "a rushing stream of lightning." From Deut. xxix, 23, "The whole land thereof is brimstone . . . like the overthrow of Sodom," it would appear that native sulphur itself is alluded to (see also Isa. xxxiv, 9). Sulphur is found at the present time in different parts of Palestine, but in the greatest abundance on the borders of the Dead Sea. "We picked up pieces," says Dr. Robinson (*Bibl. Res.* ii, 221), "as large as a walnut near the northern shore, and the Arabs said it was found in the sea near 'Ain el-Feshkhah in lumps as large as a man's fist: they find it in sufficient quantities to make from it their own gunpowder." See Irby and Mangles (*Travels*, p. 453), Burckhardt (*Travels*, p. 394), who observes that the Arabs use sulphur in diseases of their camels, and Shaw (*Travels*, ii, 159). There are hot sulphurous springs on the eastern coast of the ancient Callirrhoe (Irby and Mangles, *Travels*, p. 467; Robinson, *Bibl. Res.* ii, 222). The pieces of sulphur, varying in size from a nutmeg to a small hen's egg, which travellers pick up on the shore of the Dead Sea, have, in all probability, been disintegrated from the adjacent limestone or volcanic rocks and washed up on the shores. Sulphur was much used by the Greeks and Romans in their religious purifications (Juv. ii, 157; Pliny, xxxv, 15); hence the Greek

word **Σελίον**, lit. "the divine thing," was employed to express this substance. Sulphur is found nearly pure in different parts of the world, and generally in volcanic districts. It exists in combination with metals and in various sulphates: it is very combustible, and is used in the manufacture of gunpowder, matches, etc. Pliny (*loc. cit.*) says one kind of sulphur was employed "ad ellychnia conficienda." See BRIMSTONE.

**Sulpicians**, or PRIESTS OF THE SOCIETY OF ST. SULPICE. This society was founded in the parish of St. Sulpice, Paris, in 1645, by Jean Jacques Olier de Verneuil. The act founding the society was dated Sept. 6, 1645, and was immediately sanctioned by the authorities. The society is specially devoted to the training of candidates for the priesthood, and is formed into two bands, one devoted to parish work and the other to teaching. Being warmly befriended by St. Vincent de Paul, the Sulpicians soon established themselves in nearly all the dioceses of France, and took the chief part in the education of the French clergy down to the Revolution of 1789. They were suppressed by Napoleon in 1812, but were restored by Louis XVIII. In 1636 Olier formed a company for colonizing the island of Montreal, who purchased it in 1640, sent out Sieur de Maisonneuve with priests and nuns in 1641, and transferred their proprietorship to the Sulpicians in 1656. In 1657 the Sulpicians De Queylus, Souard, and Galinier took possession of the island, but their claims were resisted, and a conflict of jurisdiction arose which had not been settled as late as the early part of 1876. In 1668 the Sulpicians François de Fénelon and Claude Trouvé founded the first Iroquois mission at the western extremity of Lake Ontario, but their labors were confined principally to the Indians near Montreal. In Montreal, in addition to the seminary attached to the Church of Notre Dame, founded in 1657, they possess the Theological Seminary, the Preparatory Seminary, or "College of Montreal," founded in 1773, and several other succursal churches with their residences. Invited by bishop Carroll in April, 1791, a band of four Sulpicians and three Seminarians, headed by François Charles Nagot, sailed for Baltimore, Md., where they formed for a time the clergy of the cathedral. Some of their number went to teach in the Georgetown College, and founded the St. Mary's Theological Seminary, Baltimore, with a college or preparatory school. Pope Gregory XVI raised the seminary to the rank of a university. The collegiate school was removed to Ellicott City, Howard Co., in 1849, and suppressed in 1852.

**Sulpicius SEVERUS**. See SEVERUS, SULPICIUS.

**Sulter**, in Norse mythology, was the knife of the wicked Hela. The word signifies *devouring hunger*.

**Sulzer**, SIMON, an avowed adherent and advocate of the Lutheran view of the Lord's supper in Switzerland during the period of the Reformation. He was born Sept. 22, 1508—the illegitimate child of a provost of Interlachen. After previous vicissitudes, he was recommended by Berthold Haller (q. v.) to the Council of Berne, and was thus enabled to pursue his studies at the expense of the public treasury, which he did at Basle and Strasburg. He subsequently became a teacher of ancient languages, and was employed in establishing schools throughout the canton of Berne. When Haller died he was deputed to Strasburg to negotiate the call of a successor. He took zealous part with the Strasburg theologians in their attempts at mediation, and even (in 1538) visited Saxony and had an interview with Luther. Having been won over to the position of Luther, Sulzer steadily persevered in defending the Lutheran view of the sacrament; at first in Berne, as professor of dialectics and rhetoric and subsequently of theology, as well as in the pulpit; and afterwards, beginning in 1548, at Basle, where he became pastor of St. Peter's, and in 1552 professor of Hebrew. In 1553 he became the successor of Myconius in the cathedral, and chief pastor of Basle, and with these dignities he

united in 1554 a professorship of theology. In 1568 he acquired the theological doctorate; and he filled, in addition, the position of superintendent of Röteln under the margrave Charles of Baden.

Sulzer entertained the bold project of inducing the Church of Basle to subscribe to the *Form of Concord*, and to refuse the acceptance of the second Helvetic Confession of 1566. See *HELVETIC CONFESSION*. He succeeded in causing the omission of explanatory notes from future publications of the first Helvetic Confession (of 1534), and in limiting its influence. Sulzer's views on the sacrament are given in the confession which he instigated the burghmaster of Brunn to issue in 1578 (see Hagenbach, *Gesch. d. ersten Basler Confession*). He was also successful in persuading the authorities to permit the use of the organ in the churches and on holidays, and the ringing of the so-called "pope's bell" (a gift from Felix V). He died June 22, 1585. The archives of the Church of Basle and Sulzer's family papers fell into the hands of his heirs, and were partially lost. His successor, J. J. Gryneus, promoted the Reformed theology, but Sulzer's arrangements with regard to organ and bell still continue in force.

See Herzog, *Athen. Raur.* p. 26, where a catalogue of Sulzer's writings may be found; Hundeshagen, *Confitte des Zwinglianismus, Lutherthums u. Calvinismus* (Berne, 1842), p. 105 sq.; Kirchhofer, *Berth. Haller* (Basle, 1827); Hagenbach, *Die theol. Schule Basels*, etc. (1860); Tholuck, in *Gesch. d. akad. Lebens im 17ten Jahrh.* p. 321 sq.—Herzog, *Real-Encyclop.* s. v.

**Sumeru** (or **Meru**), the north pole, a mountain of gold and precious stones on which dwell the genii and gods.

**Summānus**, an Etruscan and Roman divinity, the god of the nightly sky, the lightning-darter of the night, as Jupiter was of the day. His temple stood near the Circus Maximus, and a representation of him in clay was given in the pediment of the Capitoline temple. Whenever a tree was struck by lightning in the night, the *Arval brothers* would offer a black ram to Summanus (Pliny, *H. N.* ii, 53; August, *De Civ. Dei*, iv, 28; Varro, *De Ling. Lat.* v, 74; Livy, xxxii, 29; Ovid, *Fast.* vi, 731; Cicero, *De Div.* i, 10, etc.).

**Summer** is the invariable rendering in the A. V. of the Heb. קַיִץ, *káyits* (Chald. קַיִץ, *káyit*, Dan. ii, 35; New Test. ἥρος, *heat*), which properly signifies *harvest* of fruits (not of grain, which is קַצִּיר, strictly the *cutting-off* of the fruit (Isa. xvi, 9; Jer. viii, 20; xlviii, 32); specially *fig-harvest*, which in Palestine takes place in August, although the early figs (פְּסִיִּיִּים) ripen at the summer solstice (Isa. xxviii, 4; Mic. vii, 1); hence the harvest-time of figs, i. e. summer, especially *midsummer*, the hottest season (Psa. xxxii, 4; the droughts of summer, Prov. vi, 8; x, 5; xxvi, 1, xxx, 35; the summer-house, Amos iii, 15); also fruit, specially *figs*, as harvested (viii, 1, 2; comp. Jer. xxiv, 1 sq.). See *AGRICULTURE*; *FIG*; *HARVEST*; *PALESTINE*; *SEASON*.

**Summerfield, JOHN**, a distinguished divine and minister of the Methodist Episcopal Church, was born at Preston, England, Jan. 31, 1798. His father was a local preacher in the Wesleyan Methodist connection in England, and he educated his son in those religious principles which governed his own heart and life. At a suitable age he was put under the tuition of the Moravian Academy at Fairfield, near Manchester, where he gave early indications of that precocious genius for which he was afterwards so eminently distinguished. In 1810 he taught a night-school in order to aid his father, who had become embarrassed. Before he was fifteen he became clerk in a mercantile house in Liverpool, conducting the French correspondence. He now, through moral weakness, fell into evil habits and company, and had also an intense passion for listening to eloquent speakers, whether in the pulpit, the senate-house, at the bar, or on the stage. He would at times

shut himself up in his room and study intently for sixteen hours out of the twenty-four with insufficient nourishment. This, together with the terrible remorse he suffered, seriously and permanently injured his constitution. Established in the coal trade by his father, he was so discontented and neglectful that he brought poverty and distress upon his father's family, and was himself thrown into the Marshalsea of Dublin. Here he employed himself in drawing up the necessary memorials of his fellow-prisoners, and was so successful that he continued in this business for some time after his release. In 1817, in great distress and almost despair, he was led by a plain Methodist mechanic to services, and the same night found peace. He became the principal of a "praying association" which exercised in public, and in April, 1818, took his place among the local preachers. He was received on trial in the Methodist Conference of Ireland in 1819, emigrated to America in March, 1821, and was received on trial in the New York Conference. His first appearance in public after his arrival in New York was at the anniversary of the American Bible Society, and his speech on that occasion produced a wonderful effect, and was regarded as one of the very highest efforts of platform eloquence. The following June he was admitted into the Troy Conference. He entered on his labors in New York city, where the churches could not contain the audiences that desired to hear him. Persons of all professions and classes of society were attracted by the fame of his eloquence, and expressed their admiration of the power with which he enchaind them to the words that dropped from his lips. He continued to preach to large audiences until early in June, 1822, when his ministrations were suspended by the failure of his health. Desiring a milder climate, he was appointed delegate from the American Bible Society to the Protestant Bible Society in France. He returned to America, April 19, 1824, but was unable to perform regular service, and was appointed by the Missionary Board of the Philadelphia Conference to travel in Pennsylvania and New Jersey and to take up collections. He united with ministers of other denominations in forming the American Tract Society, and his last public act was an eloquent address at its organization. He died June 18, 1825. Mr. Summerfield was very famous as a pulpit orator; naturally eloquent, deeply devoted to the cause of God, possessed of great command of language and of a rich stock of the most useful knowledge, whenever he spoke in the name of God he poured forth from a heart overflowing with the kindest feelings a stream of evangelical truth which melted his audiences. A "godly sincerity" was evidently the pervading principle of his heart, and a tone of simplicity characterized his style of preaching. James Montgomery, the poet, said of his discourses that "the sermons are less calculated for instantaneous effect than for abiding usefulness." His only publication was, *A Discourse on Behalf of the New York Institution for the Instruction of the Deaf and Dumb* (1822). After his death appeared, *Sermons, and Sketches of Sermons*, by Rev. John Summerfield, A. M., with an Introduction by Rev. Thomas E. Bond, M. D. (N. Y. 1842, 8vo). See Holland, *Memoir of Summerfield's Life and Ministry* (1829, 8vo; 2d ed. 1830, 8vo; N. Y. 8vo; reviewed by L. Bacon in the *Amer. Quar. Rev.* vii, 141; *Christ. Quar. Spec.* ii, 118); his *Life* by Rev. William M. Willett (Phila. 8vo); Sprague, *Annals of the Amer. Pulpit*, vii, 639–654; Fish, *Pulpit Eloquence* (1857), ii, 539; Waterbury, *Sketches of Eloquent Preachers* (1864, 12mo); Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Bangs, *Hist. of the M. E. Church*, iii, 324–329; *Minutes of Annual Conferences*, i, 508; Simpson, *Cyclop. of Methodism*, s. v. (J. L. S.)

**Summer-house Silver**, a payment made in the mediæval ages by certain tenants of abbey to the abbot or prior, in lieu of providing a temporary summer habitation for him when he came from a distance to inspect the property.—Lee, *Gloss. of Liturg. Terms*, s. v.

**Summers, WILLIAM**, a minister of the Methodist Episcopal Church, was born in Fairfax County, Va., in September, 1796. He joined the Church in Leesburg, O., and in 1832 was admitted on trial in the Pittsburgh Conference. In 1834 he was ordained deacon, and in 1843 received a supernumerary relation; but his health improving, he was made effective at the next conference. In 1853 he was again placed on the supernumerary list, and that relation continued until terminated by death, which came to him in Martinville, O., March 29, 1855. He was kind, courteous, and honorable in his deportment, calm and firm in his purpose, steadfast in his friendship, and faithful and successful as a minister. See *Minutes of Annual Conferences, 1855*, p. 568.

**Summerville, JOHN**, a Methodist Episcopal minister, was born in the County of Tyrone, Ireland, March 1, 1782. He enjoyed early religious training, was received on trial in the Baltimore Conference in 1812, and filled the following appointments: Trumbull, Tuscarawas, Hinkstone, Oxford, Shenango, Letart Falls, Mansfield, Chautauqua, Ridgeway, Paint Creek, Erie, Youngstown, Deerfield, Lisbon, Canton, Hartford, Butler, Mercer, Centreville, Kittanning, Elizabeth, Waynesburg, and Birmingham. In 1836 he was made a superannuate. He died Oct. 6, 1850. See *Minutes of Annual Conferences, iv*, 602.

**Summis Desiderantes Affectibus** is the title of the bull issued by pope Innocent VIII wherein he informed the Germans that their country was overrun by witches, and appointing two inquisitors, Henry Krämer and Jacob Sprenger, for their destruction. See Kütz, *Church Hist. i*, § 115, 2.

**Summists, or Summistæ**, a name given to those scholastic divines of the Middle Ages who propounded their dogmas in works called *Summa Theologia*. This name was first adopted from the *Summa Universæ Theologiæ* of Alexander Hales, whose renown was eclipsed by that of Albertus Magnus. He was, in turn, surpassed by his disciple Thomas Aquinas, who published his famous work on divinity under the title of *Summa Totius Theologiæ*, and thereby greatly lowered the estimation in which the *Book of Sentences*, written by Peter Lombard, was held. See Van Oosterzee, *Christ. Dogmat. i*, 82.

**Summus Sacerdos** (Lat. for chief priest), a name given to bishops when it had become the fashion, in the 8d century, to deduce the institution of the ecclesiastical hierarchy from the priests and services of the Temple of Jerusalem. Romish writers apply the title exclusively to the pope of Rome.

**Sumner, John Bird**, an English prelate, was the eldest son of the Rev. R. Sumner, A.M., many years vicar of Kenilworth and Stoneley, in the County of Warwick, and was born at his father's parsonage house at Kenilworth in 1780. He was sent at an early age to Eton, where he was nominated to a king's scholarship, and, having spent several years on that royal foundation, he passed in the usual course to King's College, Cambridge, of which he became successively scholar and fellow. Not long after having completed his academical course, Mr. Sumner was invited to return as assistant master to Eton, where he remained for several years. During this time he was ordained deacon and priest. He was preferred, about 1820, to the rectory of Maple-Durham, a pleasant and retired village on the banks of the Thames, a few miles above Reading. In 1820 Mr. Sumner was promoted by the ministry of the earl of Liverpool to a canonry in the Cathedral of Durham, which he held for many years, together with his rectory of Maple-Durham. In 1828 the see of Chester became vacant, and canon Sumner, having just received his D.D. from Cambridge, was consecrated bishop in due form. The bishopric being then but poorly endowed, he was allowed to retain the canonry of Dur-

ham, but his views would not allow him to retain the rectory of Maple-Durham. While Dr. Sumner held the bishopric of Chester, the Oxford movement commenced and came to a head. From the time that the war cry of Anglo-Catholicism was first sounded in 1838 down to his death, bishop Sumner has ever been among the first and the foremost to denounce the dishonesty of the Tractarian school of theology. In his charges, in addresses, in sermons, he ever and again denounced the Tractarian doctrines and ritual. In the early part of 1848 lord John Russell, who held the post of premier at the time, offered the archbishopric of Canterbury to Dr. Sumner. The offer was accepted, and, much to the satisfaction of the evangelical portion of the Established Church, he was translated from Chester to Canterbury. In 1850 occurred the memorable event called the "Papal Aggression." To that measure of the pope, by which England was portioned out into Roman Catholic dioceses with prelates set over each, archbishop Sumner offered that opposition which was to have been expected, and he denounced the measure in terms of more than usual energy. His grace, as we learn from the "Peerage," was "primate of all England and metropolitan, one of the lords of her majesty's privy council, a governor of the Charterhouse, and visitor of Merton and All-Souls' colleges at Oxford, as well as of King's College, London, of Dulwich College, and of St. Augustine's College, Canterbury," and he enjoyed the patronage of no less than one hundred and sixty-nine livings. He was also most discreet and blameless in the distribution of his clerical patronage, bestowing his best livings on the most exemplary and painstaking of his clergy. He died Sept. 6, 1862. His works are, *Essay on the Prophecies*, etc. (London, 1802, 8vo);—*Apostolical Preaching* (1815, 8vo; 9th ed. London, 1850, 8vo);—*Records of Creation*, etc. (1816, 1817, 1818, 1825, 1833, 1838, 2 vols. 8vo; 7th ed. 1850, 8vo);—*Evidences of Christianity Derived from its Nature*, etc. (London, 1824, 8vo; N. Y. 1825, 12mo);—*Sermons and Lectures* (1827-59).

**Sumner, Joseph, D.D.**, a Congregational divine, was born at Pomfret, Conn., Jan. 19, 1740. He graduated at Yale College in 1759, was ordained pastor of the Church at Shrewsbury, Mass., June 23, 1762, and died Dec. 9, 1824. During a period of sixty-two years, he was never absent from the stated communion of his Church. He published, *A Sermon at the Ordination of Samuel Sumner* (1791);—*A Thanksgiving Sermon* (1799);—*A Half-century Sermon* (1812). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Sprague, *Annals of the Amer. Pulpit*, iv, 630, note; *Cong. Quarterly*, 1859, p. 42.

**Sumption, THOMAS**, a minister of the Methodist Episcopal Church, was born in Cecil County, Md., Dec. 5, 1802. He was converted in 1819, licensed as a local preacher in 1828, and in 1838 was received on trial into the Philadelphia Conference. He received a superannuated relation in 1874, and died in Halifax, Dauphin Co., Pa., May 9, 1874. See *Minutes of Annual Conferences*, 1875, p. 40.

**Sumptuary Laws**. At an early period Christianity controlled domestic habits in a great variety of ways both in food and dress. Excesses were condemned. Thus Clement of Alexandria says, "Other men, like the unreasoning animals, may live to eat; we have been taught to eat that we may live. For the nourishment of the body is not the work we have to do, nor is sensual pleasure the object of our pursuit, but rather the entrance into those mansions of incorruption whither the divine wisdom is guiding us. We shall therefore eat simple food, as becomes children, and merely study to preserve life, not to obtain luxury. Great varieties of cookery are to be avoided. Antiphanes, the Delian physician, considers variety and research in cookery to be a main cause of disease; yet many have no taste for simplicity, and, in the vain glory of a fine table, make it their chief anxiety to have choice fish-

as from beyond sea." They might "use a little wine for the stomach's sake," as the apostle exhorted Timothy; "for it is good to bring the help of an astringent to a languid constitution; but in small quantity, lest, instead of benefiting, it should be found to produce a fulness which would render other remedies needful; since the natural drink of a thirsty man is water, and this simple beverage alone was supplied from the cleft rock by the Lord for the use of the Hebrews of old. . . . Water is the medicine of a wise temperance. Young men and maidens should, for the most part, forego wine altogether; for to drink wine during the boiling season of youth is adding fire to fire. . . . Those who require a mid-day meal may eat bread altogether without wine, and, if thirsty, let them satisfy themselves with water only. In the evening at supper, when our studies are over and the air is cooler, wine may be used without harm perhaps, for it will but restore the lost warmth; but even then it should be taken very sparingly, until the chills of age have made it a useful medicine; and it is for the most part best to mix it with water, in which state it conduces most to health." "Precious vases, rare to be acquired and difficult to be kept, are to be put away from among us," says the same writer that we have been quoting. "Silver sofas, silver basins and saucers, plates and dishes; beds of choice woods decorated with tortoise-shell and gold, with coverlets of purple and costly stuffs, are to be relinquished in like manner. The Lord ate from a humble dish, and reclined with his disciples on the grass, and washed their feet, girded with a towel. Our food, our utensils, and whatever else belongs to our domestic economy should be conformable to the Christian institutions." "It is proper that both the woman and the man should come into the church decently dressed, with no studied steps, in silence, and with a mind trained to real benevolence; chaste in body, chaste in heart, fitted to pray to God. Furthermore, it is right that the woman should be veiled, save when she is at home; for this is respectable and avoids offence." "It is enough to have the disposition which becomes Christian women," says Tertullian. "God looks on the heart. The outward appearance is nothing. Why make a display of the change that has been wrought in us? Rather are we bound to furnish the heathen no occasion of blaspheming the Christian name, and accusing Christianity of being irreconcilable with national customs." Yet he adds, "What reasons can you have for going about in gay apparel when you are removed from all with whom this is required? You do not go the round of the temples; you ask for no public shows; you have nothing to do with pagan festivals. You have no other than serious reasons for appearing abroad. It is to visit a sick brother, to be present at the communion or a sermon; and if offices of courtesy or friendship call you among the pagans, why not appear in your own peculiar armor, that so the difference may be seen between the servants of God and of Satan?" Sumptuary laws have been passed by the State and Church, generally, however, to be disregarded. Roman laws prohibited certain luxuries in dress and food, but they were all habitually transgressed in the later times of the Republic. Such laws were in great favor in the legislation of England from the time of Edward III down to the Reformation (see statute 10 Edward III, c. 8, act 37 Edward III). In France they were as old as Charlemagne, but the first attempt to restrict extravagance in dress was under Philip IV. Scotland had also a similar class of statutes. In all these countries, however, these laws seem to have never been practically observed. Most of the English sumptuary laws were repealed by 1 James I, c. 25, but a few remained on the statute-book as late as 1856.

**Sun** (prop. שֶׁשֶׁשׁ, *shēmēsh*; ἥλιος). In the history of the creation the sun is described as the "greater light," in contradistinction to the moon, or "lesser

light," in conjunction with which it was to serve "for signs, and for seasons, and for days, and for years," while its special office was "to rule the day" (Gen. i, 14-16). The "signs" referred to were probably such extraordinary phenomena as eclipses, which were regarded as conveying premonitions of coming events (Jer. x, 2; Matt. xxiv, 29, with Luke xxi, 25). The joint influence assigned to the sun and moon in deciding the "seasons," both for agricultural operations and for religious festivals, and also in regulating the length and subdivisions of the "years," correctly describes the combination of the lunar and solar year, which prevailed, at all events, subsequently to the Mosaic period—the moon being the *measurer* (κατ' ἔξοχην) of the lapse of time by the subdivisions of months and weeks, while the sun was the ultimate *regulator* of the length of the year by means of the recurrence of the feast of Pentecost at a fixed agricultural season, viz. when the corn became ripe. The sun "ruled the day" alone, sharing the dominion of the skies with the moon, the brilliancy and utility of which for journeys and other purposes enhances its value in Eastern countries. It "ruled the day," not only in reference to its powerful influences, but also as deciding the length of the day and supplying the means of calculating its progress. Sunrise and sunset are the only defined points of time, in the absence of artificial contrivances for telling the hour of the day; and, as these points are less variable in the latitude of Palestine than in many countries, they served the purpose of marking the commencement and conclusion of the working-day. Between these two points the Jews recognised three periods, viz. when the sun became hot, about 9 A.M. (1 Sam. xi, 9; Neh. vii, 8); the double light, or noon (Gen. xliii, 16; 2 Sam. iv, 5); and "the cool of the day," shortly before sunset (Gen. iii, 8). The sun also served to fix the quarters of the hemisphere—east, west, north, and south—which were represented respectively by the rising sun, the setting sun (Isa. xlv, 6; Psa. i, 1), the dark quarter (Gen. xliii, 14; Joel ii, 20), and the brilliant quarter (Deut. xxxiii, 23; Job xxxvii, 17; Ezek. xl, 24); or otherwise by their position relative to a person facing the rising sun—before, behind, on the left hand, and on the right hand (Job xxiii, 8, 9). The apparent motion of the sun is frequently referred to in terms that would imply its reality (Josh. x, 13; 2 Kings xx, 11; Psa. xix, 6; Eccles. i, 5; Hab. iii, 11). The ordinary name for the sun, *shēmēsh*, is supposed to refer to the extreme brilliancy of its rays, producing *stupor* or *astonishment* in the mind of the beholder; the poetical names שֶׁמֶשׁ, *chammāh* (Job xxx, 28; Cant. vi, 10; Isa. xxx, 26), and חֶרֶס, *chēres* (Judg. xiv, 18; Job ix, 7) have reference to its heat, the beneficial effects of which are duly commemorated (Deut. xxxiii, 14; Psa. xix, 6) as well as its baneful influence when in excess (Psa. cxxi, 6; Isa. xlix, 10; Jonah iv, 8; Eccles. xliii, 3, 4). The vigor with which the sun traverses the heavens is compared to that of a "bridegroom coming out of his chamber," and of a "giant rejoicing to run his course" (Isa. xlix, 5). The speed with which the beams of the sun dart across the sky is expressed in the term שֶׁשֶׁשׁ, applied to them (Psa. cxxxix, 9; Mal. iv, 2).

The worship of the sun as the most prominent and powerful agent in the kingdom of nature was widely diffused throughout the countries adjacent to Palestine. The Arabians were held to have paid direct worship to it without the intervention of any statue or symbol (Job xxxi, 26; Isa. xlv, xvi, 784), and this simple style of worship was probably familiar to the ancestors of the Jews in Canaan and Mesopotamia. In Egypt the sun was worshipped under the title of Rê or Ra, and not, as was supposed by ancient writers, under the form of Osiris (Diod. Sic. ii, 1; see Wilkinson, *Anc. Egypt*, iv, 289). The name of Rê was conspicuously forward as the title of the kings—Pharaoh, or rather Phra, meaning "the sun."

(Wilkinson, *Anc. Egypt.* iv, 287). The Hebrews must have been well acquainted with the idolatrous worship of the sun during the captivity in Egypt both from the contiguity of On, the chief seat of the worship of the sun as implied in the name itself (On = the Hebrew Bethshemesh, "house of the sun," Jer. xliii, 13), and also from the connection between Joseph and Potiphar ("he who belongs to Ra"), the priest of On (Gen. xli, 45). After their removal to Canaan, the Hebrews came in contact with various forms of idolatry which originated in the worship of the sun—such as the Baal of the Phœnicians (Movers, *Phœn.* i, 180), the Molech or Milcom of the Ammonites, and the Hadad of the Syrians (Pliny, xxxvii, 71). These idols were, with the exception of the last, introduced into the Hebrew commonwealth at various periods (Judg. ii, 11; 1 Kings xi, 5); but it does not follow that the object symbolized by them was known to the Jews themselves. If we have any notice at all of conscious sun-worship in the early stages of their history, it exists in the doubtful term חַמְמָנִים, *chammânîm* (Lev. xxvi, 30; Isa. xvii, 8, etc.), which was itself significant of the sun, and probably described the stone pillars or statues under which the solar Baal (Baal-Haman of the Punic inscriptions, Gesenius, *Thesaur.* i, 489) was worshipped at Baal-Hamon (Cant. viii, 11) and other places. Pure sun-worship appears to have been introduced by the Assyrians, and to have become formally established by Manasseh (2 Kings xxi, 3, 5), in contravention of the prohibitions of Moses (Deut. iv, 19; xvii, 3). Whether the practice was borrowed from the Sepharvites of Samaria (2 Kings xvii, 31), whose gods Adrammelech and Anammelech are supposed to represent the male and female sun, and whose original residence (the Heliopolis of Berosus) was the chief seat of the worship of the sun in Babylonia (Rawlinson, *Herod.* i, 611), or whether the kings of Judah drew their model of worship more immediately from the East, is uncertain. The dedication of chariots and horses to the sun (2 Kings xxiii, 11) was perhaps borrowed from the Persians (Herod. i, 189; Curt. iii, 3, 11; Xenoph. *Cyrop.* viii, 3, 24), who honored the sun under the form of Mithras (Strabo, xv, 732). At the same time it should be observed that the horse was connected with the worship of the sun in other countries, as among the Massagetæ (Herod. i, 216) and the Armenians (Xenoph. *Anab.* iv, 5, 35), both of whom used it as a sacrifice. To judge from the few notices we have on the subject in the Bible, we should conclude that the Jews derived their mode of worshipping the sun from several quarters. The practice of burning incense on the house-tops (2 Kings xxiii, 5, 12; Jer. xix, 13; Zeph. i, 5) might have been borrowed from the Arabians (Strabo, xvi, 784), as also the simple act of adoration directed towards the rising sun (Ezek. viii, 16; comp. Job xxxi, 27). On the other hand, the use of the chariots and horses in the processions on festival days came, as we have observed, from Persia; and so also the custom of "putting the branch to the nose" (Ezek. viii, 17) according to the generally received explanation which identifies it with the Persian practice of holding in the left hand a bundle of twigs called Bersam while worshipping the sun (Strabo, xv, 733; Hyde, *Rel. Pers.* p. 345). This, however, is very doubtful, the expression being otherwise understood of "putting the knife to the nose," i. e. producing self-mutilation (Hitzig, *On Ezek.*). An objection lies against the former view from the fact that the Persians are not said to have held the branch to the nose. The importance attached to the worship of the sun by the Jewish kings may be inferred from the fact that the horses were stalled within the precincts of the temple (the term פַּרְדָּא, *parvâr*, meaning not "suburb," as in the A. V., but either a portico or an outbuilding of the Temple). They were removed thence by Josiah (2 Kings xxiii, 11). See SUN, WORSHIP OF.

In the metaphorical language of Scripture, the sun

X.—B

is emblematic of the law of God (Psa. xix, 7), of the cheering presence of God (1xxxiv, 11), of the person of the Saviour (John i, 9; Mal. iv, 2), and of the glory and purity of heavenly beings (Rev. i, 16; x, 1; xii, 1).

Arab.* p. 5, 150; Jablonski, *Opusc.* i, 187 sq.; Doughty, *Analect.* i, 189; Hyde, *Rel. Vett. Persarum*, p. 206 sq.; Eichhorn, *De Sole Invicto Mithra*, in the *Comment. Soc. Gotting.* iii, 153 sq.; Creuzer, *Symbol.* i, 738 sq.; iv, 409 sq.; Bochart, *Hieroz.* i, 141 sq.; Rosenmüller, *Morgenl.* iii, 249 sq.; Bose, *De Josia Quadrigras Solis Removente* (Lips. 1741); Pocar, *De Simulacris Solaribus Israelitarum* (Jen. 1725); Gesenius, *Monumen. Phœnic.* ii, 349.

**Sun, Children of** (Armen. *Arevurdî*), an Armenian sect which originated with Sembat, a Paulician. They were also called *Throntrakians* (or *Throndraciens*), from the village of Throntrake (Throndrac), where their Church was formed. Sembat, who originated in the province of Ararat, having entered into some connection with a certain Meleschus, a Persian physician and astronomer, was led, under his influence, to attempt a new combination of Parseeism and Christianity. This sect, though it met with no mercy from the bishops, continually revived, and spread widely in Armenia. About 1002 it made the most alarming progress, when it is said to have been joined by Jacob of Harkh. He gave a more distinctively Christian cast to its tenets; journeyed through the country, preaching repentance and inveighing against work-righteousness; and denounced the false confidence which was placed in masses, oblations, alms, and church-prayers for the forgiveness of sins. Finally, the Catholics of the Armenian Church, having secured his person, caused him to be branded with the heretical mark (a fox on the forehead), carried from place to place attended by a public cry to proclaim him a heretic, and finally killed him. See Kurtz, *Church History*, i, 71, 2; Neander, *Church History*, iii, 587.

**Sun, Worship of** (*Heliolatry*). The worship of the great orb which insures to us light, warmth, and life is as ancient as history. It existed in the earliest ages among the Phœnicians, Egyptians, Persians, and Hindûs, and later among the Greeks and Romans of the West, venerating its object under the different names of Helios or Sol, or of Baal, Osiris, or Mithras. Various forms of sacrifice and prayer characterized this worship among the different nations, but they agreed in regarding the sun as a mighty and superior deity who ruled the world with an independent authority more or less complete. The Greeks alone did not render higher honors to the sun than to the other gods regarded as of superior rank. All Eastern nations considered it as practically the supreme divinity. The Romans, too, maintained the worship of the sun after Heliogabalus had introduced it and had built a temple to Sol. See SUN.

**Sunadi** was a Hindû divinity, the wife of Utanubaden and mother of the famous Druva, a saint who ruled the kingdom of his father during 26,000 years, and was then translated by Vishnu to the pole-star.

**Sundanese Version.** Sunda is a dialect spoken in the west of the island of Java, near the Straits of Sunda, and prevails over the third of the island. The dialect belongs to the great Polynesian stock of languages, and the difficulties in mastering the same are best described by the Rev. G. J. Grashius, who studied the language with a view of rendering the translation of the Scriptures as idiomatic as possible. Mr. Grashius writes thus to the British and Foreign Bible Society (60th Report, 1864, p. 30):

"You will not be surprised to hear that I have as yet obtained but little insight into the Sundanese language. And this is not exactly a consequence of the difficulty and extent of the subject which is to be mastered—no, it is oc-

casioned by the form in which the matter presents itself. Propose to yourself to learn a language which represents itself to you as a sea in miniature, with all conceivable motions of swelling and floating objects. At one moment you see something, the next it disappears again; at one moment you think you have got hold of something, and formed a right conception of it, and the next you perceive that you are mistaken.

"The study of the Sundanese is, for the greatest part, made more difficult by the childishness which characterizes the language. There is no by-law in it, but yet such a composition of laws that a novice experiences an anxious feeling on first making acquaintance with it—anxious, namely, whether he will penetrate with pleasure into that childish form of thinking and speaking. The fear which at this point I entertained begins gradually to vanish, and I hope soon to be able to speak and write the Sundanese well, if God will but bless and prosper my undertaking.

"By-and-by I shall master the vocabulary; but in this I by no means hurry myself, because otherwise I might easily take things for granted which, by a closer insight into matters and significations, I should be obliged to unlearn. To unlearn takes time, and is very unprofitable for the freshness of mind which is a first requisite for the study of the Sundanese language."

In 1870 the British and Foreign Bible Society's *Report* shows the publication of the Gospel of St. Luke in the Sundanese, and this seems to be the only part printed by the British and Foreign Bible Society, while the Dutch Bible Society has printed the New Test., translated by Mr. Coolsma, who has also translated the Old Test. From the 74th (1878) *Annual Report* of the British and Foreign Bible Society we see that the Netherlands Missionary Union have requested the London committee to undertake the publication of Mr. Coolsma's translation of the Old Test., and that the committee have resolved to print the book of Genesis on receiving satisfactory reports as to the reception of Mr. Coolsma's New-Test. translation. (B.P.)

**Sunday.** I. *Name and Change of Day.*—Sunday is the name of the first day of the week, adopted by the first Christians from the Roman calendar (Lat. *Dies Solis*), *Day of the Sun*, so called because it was dedicated to the worship of the sun. The Christians interpreted the heathen name as implying the Sun of Righteousness with reference to his "arising" (Mal. iv, 2). It was also called *Dies Panis* (*Day of Bread*), because it was an early custom to break bread on that day. It is called, also, the Lord's day, its sacred observances being especially in his honor. The apostles themselves introduced the religious observance of Sunday, meeting for divine service (Acts xx, 7; 1 Cor. xvi, 2), and the opposition in the Christian Church to Judaism early led to the substitution of Sunday for the Sabbath; and in the epistle of Ignatius to the Magnesians it is presupposed that even the Jews who had come over to Christianity adopted the same custom. See SYNAGOGUE.

Sunday began, in 1064, at nones (8 P.M.) on Saturday and lasted until Monday. In 994 parishioners were required to attend even-song and nocturns on Saturday. In 696 the Lord's day was reckoned from evening to evening, but in 958 from Saturday nones till light on Monday morning. Islip's *Constitutions* and the Councils of Aix (789), Frejus (791), and Frankfort (794) assign as the cause that vespers are the first office of the morrow. The mediæval tradition was that our Lord was born on Sunday, baptized on Tuesday, and began his fast on Wednesday.

II. *Ecclesiastical Observance of the Day.*—The consecration of Sunday in a special manner to religious employments and the abstaining from all worldly business was established by a synodal law (canon 29, Council of Laodicea) with this restriction, that all Christians should abstain from worldly business if they were able. In the religious services of Sunday we note the following: all fasting was prohibited on that day, even in Lent; Tertullian (*De Coron. Mil.* c. 3) declaring that it was accounted a crime to fast on the Lord's day, and other authorities were equally severe in their denunciations. The reason for this observance was that the

day was considered one of joyfulness because of our Lord's resurrection. Yet this rule was not so strictly binding but that when a necessary occasion required, and there was no suspicion of heretical perverseness or contempt, men might fast upon this day (Jerome, *Ep.* 28, ad Lucinium *Beticum*).

It may here be remarked that another custom was to pray standing on the Lord's day, in memory of our Lord's resurrection. The great care and concern of the primitive Christians for the religious observance of Sunday is seen in their ready and constant attendance upon all the offices and solemnities of public worship, and this, too, even in times of persecution; from their studious observance of the vigils, or nocturnal assemblies preceding the Lord's day; from their attendance, in many places, upon sermons twice a day, and at evening prayers; and from the censures inflicted upon those who violated the laws concerning the religious observance of the day. The celebration of the eucharist was a standing part of divine service every Lord's day, and every communicant was expected to partake thereof. See Bingham, *Christ. Antiq.* bk. xx, ch. ii, § 9-12; bk. xvi, ch. ix, § 2.

The mode in which the early Christians spent the Lord's day is thus described by Dr. Jamieson in his *Manners and Trials of the Primitive Christians*:

"Viewing the Lord's day as a spiritual festivity, a season in which their souls were specially to magnify the Lord and their spirits to rejoice in God their Saviour, they introduced the services of the day with psalmody, which was followed by select portions of the prophets, the gospels, and the epistles, the intervals between which were occupied by the faithful in private devotions. The plan of service, in short, resembled what was followed in that of the vigils, though there were some important differences, which we shall now describe. The men prayed with their heads bare, and the women were veiled, as became the modesty of their sex, both standing—a position deemed the most decent, and suited to their exalted notions of the weekly solemnity—with their eyes lifted up to heaven and their hands extended in the form of a cross, the better to keep them in remembrance of Him whose death had opened up the way of access to the divine presence. The reading of the sacred volume constituted an important and indispensable part of the observance; and, effectually to impress it on the memories of the audience, the lessons were always short and of frequent recurrence. Besides the Scriptures, they were accustomed to read aloud several other books for the edification and interest of the people—such as treatises on the illustration of Christian morals by some pastor of eminent reputation and piety, or letters from foreign churches containing an account of the state and progress of the Gospel. This part of the service—most necessary and valuable at a time when a large proportion of every congregation were unacquainted with letters—was performed at first by the presiding minister, but was afterwards devolved on an officer appointed for that object, who, when proceeding to the discharge of his duty, if it related to any part of the history of Jesus, exclaimed aloud to the people, 'Stand up; the gospels are about to be read;' and then always commenced with 'Thus saith the Lord.' They assumed this attitude, not only from a conviction that it was the most respectful posture in which to listen to the counsels of the King of kings, but with a view to keep alive the attention of the people—an object which, in some churches, was sought to be gained by the minister stopping in the middle of a Scriptural quotation and leaving the people to finish it aloud. The discourses, founded for the most part on the last portion of Scripture that was read, were short, plain, and extemporary exhortations, designed chiefly to stir up the minds of the brethren by way of remembrance, and always prefaced by the salutation, 'Peace be unto you.' As they were very short, sometimes not extending to more than eight or ten minutes' duration, several of them were delivered at a diet, and the preacher was usually the pastor of the place, though he sometimes, at his discretion, invited a stranger, or one of his brethren known to possess the talent of public speaking, to address the assembly. The close of the sermon by himself, which was always the last of the series, was the signal for the public prayers to commence. Previous to this solemn part of the service, however, a crier commended infidels of any description that might be present to withdraw, and the doors being closed and guarded, the pastor proceeded to prepare a prayer, the burden of which was made to bear a special reference to the circumstances of the various classes who, in the primitive Church, were not admitted to a full participation in the privileges of the faithful. First of all, he prayed, in the name of the whole company of believers, for the catechumens—young persons, or recent converts

from heathenism who were passing through a preparatory course of instruction in the doctrines and duties of Christianity—that their understandings might be enlightened, their hearts receive the truth in the love of it, and that they might be led to cultivate those holy habits of heart and life by which they might adorn the doctrine of God their Saviour. Next, he prayed for the penitents who were undergoing the discipline of the Church that they might receive deep and permanent impressions of the exceeding sinfulness of sin, that they might be filled with godly sorrow, and might have grace, during the appointed term of their probation, to bring forth fruits meet for repentance. In like manner, he made appropriate supplications for other descriptions of persons, each of whom left the church when the class to which he belonged had been commended to the God of all grace; and then the brethren, reduced by the successive departures to an approved company of the faithful, proceeded to the holy service of communion."

Those who neglected ordinances were severely censured. Absence from church for three consecutive Sundays was to be visited with excommunication. Irregularities during attendance, such as refusing to join in prayers or receive the communion, or leaving church during sermon, were strongly condemned. In later times severe measures were employed to secure Sabbath observance, and which could only, in many cases, induce hypocrisy, or mere external attendance at church. The kirk-sessions in 1574 appointed "searchers," or "captors," to make the round of the parish and take notice of such as were "vaging abroad." The strange practice lasted for nigh a century and a half. Some of the records of the period are curious. See Walcott, *Sacred Archæol.* s. v. See LORD'S DAY.

III. *Legal Observance of the Day.*—As soon as the Christian religion came to be recognised by the State, laws were enacted for the observance of Sunday. The emperor Constantine made the first law (A.D. 321) to exempt the day from being juridical, as were the others. By this law and others he suspended all actions and proceedings of the law on this day, whether arrests, pleadings, exactions, sentences of judges, executions, excepting only such as were of absolute necessity or of eminent charity, as the manumission of slaves, the appointing of curators and guardians to orphans, and causes relating to matters of preservation and damage, legacies and trusts, exhibiting of wills, and all cases where great damage might be suffered either by delay or by death. Valentinian prohibited all arrests of men for debt, whether public or private, on this day, and Valentinian junior, with Theodosius the Great, appointed all Sundays in the year to be days of vacation from all business of the law whatsoever. In like manner, all secular business or servile employments were forbidden, except only such as men were called to by necessity or some great charity, such as harvesting. By a law of Honorius the judges were enjoined to visit the prisons every Sunday to examine the prisoners and ascertain from them whether the keepers of the prison denied them any office of humanity, and also to give orders that the prisoners, under proper guard, should be allowed to leave the prisons to bathe themselves. Later laws forbade all husbandry on the Lord's day, allowing only such work as was necessary to secure food absolutely required. The Christian laws took care to secure the honor and dignity of the Lord's day by forbidding public games, shows, or ludicrous recreations (*Cod. Justin.* lib. 3, tit. 12, *De Feriis*, eg. 11), and the Church was no less careful to guard the service of this day from the encroachment of all vain pastimes and needless recreations. The Fourth Council of Carthage made a decree (can. 88) excommunicating any person who should forsake the services of the Church to attend a public show.

In England Sunday laws were of early date. The code of Ina, king of the West Saxons (about 693), punished servile work by fine. Alfred the Great (876) forbade work, traffic, and legal proceedings; while the statute 27 Henry IV, c. 5, enacts that all fairs and markets on Sundays, except in harvest, shall cease on pain of forfeiture of goods. The statute 5 and 6 Edward VI,

c. 3, makes Sundays, with Christmas and Easter, holy-days, but permits work in harvest and in cases of necessity. The statute 1 Elizabeth, c. 2, punishes by fine persons absenting themselves from church without excuse. James I, in 1618, issued his *Book of Sports* (q. v.), in which he declared certain games, sports, etc., lawful on Sundays after divine service. This book was reissued by Charles I in 1638. The statute 29 Charles II, c. 7, enacted "that no tradesman, artificer, workman, laborer, or other person whatsoever shall do or exercise any worldly labor, business, or work of their ordinary callings upon the Lord's day, or any part thereof (works of necessity and charity only excepted);" and "that no person or persons whatsoever shall publicly cry, show forth, or expose to sale any wares, merchandise, fruit, herbs, goods, or chattels whatsoever upon the Lord's day or any part thereof." This, somewhat modified by subsequent laws, is the present Sunday law of England, and is the foundation of the laws on the subject in the United States.

In America the Puritan colonists established, to the full extent of their power, the observance of Sunday as the Christian Sabbath. The early laws of Massachusetts, Connecticut, Georgia, South Carolina, and Virginia compelled attendance at church, the Massachusetts law (1782) providing that such attendance was not obligatory where there was no place of worship which the person could conscientiously attend. When the Federal government was formed and the separation of Church and State was fully recognised, the earlier Sunday laws were modified in conformity with this principle. The courts have been careful to distinguish between Sunday observance as a religious and as a civil institution, and to enforce only the latter. The following are the grounds upon which our Sunday laws rest: The right of all classes, so far as practicable, to rest one day in seven; to worship undisturbed on the day set apart by the majority of the people; the decent respect which should be paid to the religious institutions of the people; the value to the State of Sunday observance, as contributing to popular intelligence and morality. With the partial exception of Louisiana, Sunday laws exist in every state in the Union. These laws differ somewhat in detail and strictness, but the following general characteristics may be noted: Sunday is everywhere held as a *dies non*; public affairs are suspended; legislatures do not sit; courts are not held, except city police-courts for an hour or two; legal processes are not served. In most of the states common labor and traffic are forbidden; contracts made for service on Sunday are invalid; public amusements are prohibited or restricted. In some states exception is made in favor of those who observe the seventh day of the week. In Louisiana the only Sunday law is that which makes it (with Christmas, New-year's-day, etc.) a public rest-day, and provides that citations shall not issue, nor proceedings be had, nor suits instituted on that day, and that it shall not be reckoned in computing interest and in protests, etc. The Constitution of the United States provides that Sunday shall not be reckoned in the ten days within which the president may return any bill; the Federal courts and offices of the departments are closed; the post-office service is restricted; no session of Congress is held, or, if held on that day, it is considered as being part of the preceding Saturday; and provision is made by an act of Congress for the observance of Sunday by the army and navy. Federal legislation respecting Sunday proceeds no further. The constitutionality of Sunday laws has been decided frequently by the highest courts of the several states. Some of our statutes define the extent of the Lord's day. In Connecticut the courts have defined it as extending only from day-break to the closing of daylight on Sunday. Generally, in New England, it is from sunset on Saturday to sunset on Sunday; but for many purposes, and probably in most of the states for all purposes, it begins only

at midnight between Saturday and Sunday and ends with the next midnight.

In France, during the Revolution, when the Christian calendar was abolished and the decade substituted for the week, every tenth day was made a rest-day, and its observance was enforced by a law (17 Thermidor, an. vi) which required the public offices, schools, workshops, stores, etc., to be closed, and prohibited sales except of eatables and medicines, and public labor except in the country during seed-time and harvest. When the Gregorian calendar was restored, Sunday was recognised in the *Code Napoléon* (art. 25, 260). The law of Nov. 18, 1814, prohibiting ordinary labor, traffic, etc., and declared by the courts in 1838 and 1845 to be still in force, is, practically, a dead letter.

In Switzerland recent legislation has granted to railway employes and all government office-holders at least one Sunday in every three; and still further restriction of Sunday labor is being sought in some of the cantons. The question is agitated in Belgium and Germany of better protection by law of Sunday rest for operatives. See Cox, *Literature of Sub. Question* (Edinb. 1866); *Amer. Law Rev.* vol. ii; *Prot. Episcopal Quar. Rev.* vol. vii; Hopkins, *Sabbath and Free Institutions*, in doc. 29 of N. Y. Sabbath Committee; Judge W. Allen, opinion in *Lindenmüller vs. The People*, 33 Barbour, 548; Hesse, *Bampton Lectures* (1860); Schaff, *Anglo-Amer. Sabbath* (1863). See SABBATH.

**Sunday, JOHN, or Shah-Wun-Dais**, was a native Indian, born in New York State in 1795-6. He belonged to the Mississauga section of the Ojibway nation, and when a young man he served in the British army against the United States. He was converted in 1826, and shortly after was appointed a leader among the converted Belleville Indians. He was the earliest evangelical pioneer to the tribes on the north waters of Lakes Huron and Superior. In 1832 he was received into the Conference and was ordained in 1836, and the same year accompanied Rev. William Lord to England to plead the cause of missions, and remained a year at that work. A large part of his ministerial labor was performed under the direction of Rev. William Case; and he had charge of Alderville, Rice and Mud Lake, and Muncietown circuits. He died Dec. 14, 1875. See *Minutes of the Ontario Conference*, 1876, p. 12.

**Sunday-school.** Among the modern developments of Christianity, Sunday-schools, and what is known as the Sunday-school enterprise, are prominent. To persons familiar with their objects and the scriptural precepts by which they are sanctioned, it seems strange that so long a period elapsed before they came into actual existence. That a leading duty of the Church was to teach all nations was made plain in the great commission of our Lord to his disciples. That little children were included in the scope of that commission was evident from the great Teacher's own command to "suffer little children to come unto him and forbid them not," as well as from his impressive charge to Peter, "Feed my lambs." While evidence is not lacking to indicate that the Christians of the apostolic age both comprehended the duty enjoined by our Lord and illustrated it in adaptation to their circumstances, yet there are too many proofs that in the centuries immediately following, that duty fell into abuse and neglect amid the rapidly growing corruptions of the Church. The ceremonious catechetical system of the 4th and 5th centuries was a labored but poor apology for that neglect, and when it came to an end no substitute was left in its place. Hundreds of years then went by without any general effort on the part of the Church for the religious instruction of children. Following the Reformation of the 16th century catechization in the elements of Scripture doctrine was gradually introduced into most of the Protestant churches, but it was rarely extended to any beyond the recognised children of the Church.

I. *Origin and Early History of the Sunday-school*

**System.**—It was not till near the close of the 18th century that the modern system of Sunday-school instruction took its rise. Although in numerous instances previously catechization had been practiced on the Lord's day, and in several cases individuals remote from each other in time and locality had assembled children for instruction on that day, yet nothing like a general system of teaching the young on Sundays, whether in secular or religious learning, was known prior to 1780. The system that then arose was purely philanthropic in its design, and in its origin contemplated only local results. From an early period in the 17th century, pin-making had been an important industry in the old city of Gloucester, England. This manufacture employed great numbers of small children, not only residents of the place, but gathered in from surrounding regions. Vast numbers of these children were wholly uneducated, and, being without parental restraint or moral supervision, they naturally fell into gross disorder and immorality, especially on Sundays, when the factories were not in operation. The first person who undertook to remedy this distressing state of things was Mr. Robert Raikes (q. v.), a printer residing in Gloucester, and a member of the Church of England. He found four persons who had been accustomed to instruct children in reading, and engaged their services to receive and instruct such children as he should send to them every Sunday. The children were to go soon after ten in the morning, and stay till twelve. They were then to go home, and return at one; and after reading a lesson, they were to be conducted to Church. After Church they were to be employed in repeating the catechism till half after five, and then to be dismissed with an injunction to go home without making a noise, and by no means to play in the street. This was the general outline of the regulations as stated by Mr. Raikes, in his celebrated letter of June 5, 1784, which conclusively identifies him as the originator of the Sunday-school movement.

As has often happened in other cases of great results from small beginnings, there have been various endeavors to fix the origin of Sunday-schools at earlier periods than that named above. Although it is not difficult to establish priority in several cases, yet there is no other instance of an actual Sunday-school from which continuity or serial connection can be traced down to the present time. If, therefore, mere priority were in question, it would be necessary to go back to the period of Moses, under whom the catechetical system of the Jews was appointed, culminating in the grand sabbatical year (Deut. xxxi, 10-13). But as it is not the origin of catechization (q. v.) which is under consideration, but rather of that form of catechization which, in modern times, is known as the Sunday-school system, it is safe to accept the general verdict of history, according to which Robert Raikes is recognised as its founder. When once the idea of Sunday instruction for the ignorant children of Great Britain was fairly developed, it was seen to have not only great intrinsic merit, but perfect adaptation to other places. Hence the schools of Mr. Raikes soon began to be imitated in all directions, with results of the most encouraging character. A Sunday-school Society was formed in London, and, in various ways, so general an interest was awakened on the subject that in the course of a few years Sunday-schools were commenced in nearly every part of England. They did not, however, become universal, nor in the largest degree useful, until a higher idea than that of mere philanthropy became embodied in them. The plan of employing hired teachers not only made it necessary to raise large amounts of money, but necessarily placed a limit upon their extension and permanence. Besides, it was not possible to secure the best quality of teaching by any appeal to mercenary motives. In discussing this subject at a comparatively early period of the history of Sunday-schools, the Rev. John Angell James said: "Hiring teachers can scarcely be expect-

ed to possess either the zeal or the ability of those who now engage in the work from motives of pure benevolence. Gratuitous instruction was an astonishing improvement of the system, and which does not appear to have entered into the views of its benevolent author. 'If we were asked,' says a writer in the *Sunday-school Repository*, 'whose name stood next to that of Robert Raikes in the annals of Sunday-schools, we should say, the person who first came forward and voluntarily proffered his exertions, his time, and his talents to the instruction of the young and the poor; since an imitation of his example has been the great cause of the present flourishing state of these institutions, and of all that future additional increase which may be reasonably anticipated.'

While it may not be possible to fix upon any one person as having been the first to commence gratuitous effort in the teaching of Sunday-schools, it is not difficult to determine, from the history of the times, who was probably more instrumental than any other man in establishing and diffusing the system of gratuitous and Christian instruction in those schools. It was the Rev. John Wesley, who, for more than thirty years prior to the first Sunday-school of Raikes, had been in the habit of assembling children in various parts of England for the purpose of religious instruction. It was he who, having recorded in his journal, July 18, 1784, that he found Sunday-schools springing up wherever he went, also recorded these memorable, if not prophetic, words: "Perhaps God may have a deeper end therein than men are aware of. Who knows but some of these schools may become nurseries for Christians?" From that time forward notices of Sunday-schools were frequent in his journals. The following is a brief specimen: "July 27, 1787.—We went on to Bolton. Here are eight hundred poor children taught in our Sunday-schools, by about eighty masters, who receive no pay but what they are to receive from their great Master." This record corresponds to the statement made in Myle's *History of the People called Methodists* (Lond. 1803). Having referred to Sunday-schools as an excellent institution begun by Mr. Raikes, the author says, "Mr. Wesley no sooner heard of it than he approved of it. He published an account of it in the *Arminian Magazine* for January, 1785, and exhorted his societies to imitate this laudable example. They took his advice. Laboring, hard-working men and women began to instruct their neighbors' children, and to go with them to the house of God on the Lord's day." Whatever was done by others, the Methodists, from the beginning, practiced only gratuitous instruction in their Sunday-schools. By them the same institution and modes of instruction were simultaneously introduced into the United States of America, under bishop Asbury, who sustained to the American Methodist societies a similar relation to that of Mr. Wesley in England.

As early as the year 1784 the following paragraph was incorporated in the *Discipline of the Methodist Episcopal Church*:

"What shall we do for the rising generation? Who will labor for them? Let him who is zealous for God and the souls of men begin now. 1. Where there are ten children whose parents are in society, meet them at least an hour every week. 2. Talk with them every time you see any at home. 3. Pray in earnest for them. 4. Diligently instruct and vehemently exhort all parents at their own houses. 5. Preach expressly on education."

In sequence of this mandatory rule, addressed primarily to ministers, but involving the co-operation of the laity, Sunday-schools were established in many places. Of one of those schools a very definite and satisfactory record was made. It was taught in 1786, in Hanover County, Va., at the house of Mr. Thomas Crenshaw, who, in 1827, forty-one years later, was a living witness of the fact, as was also the Rev. John Charleston, a minister of thirty-nine years' service in the Church, who had been converted in that school (Bangs, *Hist. of the M. E. Church*). Further historic evidence of the early

adoption of organized Sunday-school effort by the Church referred to grew out of the fact that persecution arose on account of its endeavors to instruct the colored children of the South. In Charleston, S. C., the Rev. George Daughaday "was severely beaten on the head, and subsequently had water pumped on him from a public cistern, for the crime of conducting a Sabbath-school for the benefit of the African children in that vicinity." Nevertheless, the Methodist Conference, which met in Charleston in February, 1790, resolved to continue the work. Its minute on the subject was in these words:

"*Query*. What can be done to instruct poor children, white and black, to read?

"*Ans*. Let us labor, as the heart and soul of one man, to establish Sunday-schools in or near the place of public worship. Let persons be appointed by the bishops, elders, deacons, or preachers, to teach *gratis* all that will attend, and have a capacity to learn. . . . The Council shall compile a proper school-book to teach them learning and piety."

At the period of the origin of Sunday-schools the Methodist Episcopal Church found one of its principal fields of action in the Southern States, being drawn thither by the great spiritual destitution of the inhabitants. But it is easy to understand that, owing to the sparseness of the population and to other reasons, the condition of that region was not favorable to the rapid development and permanent establishment of Sunday-schools. The same thing was, to some extent, true of the entire United States, owing to the general exhaustion of the country following the war of the Revolution and the unsettled condition of affairs in a newly organized government. Hence nearly or quite a quarter of a century passed by before Sunday-schools became common in either the Southern or Northern States.

Meantime they had been making steady and successful progress in Great Britain, where they were promoted by two classes of agencies, the philanthropic and the religious. Owing to the low state of public education in that country, hundreds of thousands of children were wholly dependent upon Sunday-schools for the first elements of instruction. Hence reading and writing were universally taught in the Sunday-schools—the former as essential to the perusal of the Word of God or the Catechism, which from the first were the text-books for all pupils able to use them.

Although much and well-rewarded effort was put forth in behalf of Sunday-schools from purely philanthropic motives, yet the greatest progress made by them and the highest results secured through them were in sequence of avowed and consistent religious effort. When, at length, this species of effort became general, Sunday-schools assumed a position of importance and of promise not before realized. About the same period they began to develop what may be called their cumulative power. This was seen when the first generation of Sunday-school scholars had grown up to become teachers, and felt themselves moved to do for others what had been done for them. In this manner the teaching force in Sunday-schools became greatly augmented. Besides, cases were not rare in which the grown-up scholars of Sunday-schools became ministers of the Gospel, while others, continuing in secular life, became prominent men in business and in society. The strong and effective support rendered by such persons, as well as by many others of less prominence, gave a new impetus to the Sunday-school enterprise, which has been enlarging and repeating itself ever since.

The enlistment of the press as an auxiliary to Sunday-schools was an event of great importance. For a considerable period Sunday-school work was done at a great disadvantage for lack of suitable books of all kinds, not excepting copies of the Scriptures. The organization of the British and Foreign Bible Society in 1804, and subsequently of numerous other societies for the publication and diffusion of the Word of God, tended to a general supply of the Holy Scriptures in forms and at

prices adapted to extensive use in Sunday-schools. Besides Testaments, Bibles, and elementary instruction-books, the first publications introduced extensively into Sunday-schools were called reward-books, on account of their being presented to children as an encouragement for punctual and regular attendance and for the memorization of lessons. At first they were tracts and story-books, in paper covers, of very inferior quality, no others being attainable. About 1810 the Religious Tract Society of London began issuing children's books, prepared and printed specially with reference to Sunday-school patronage. The demand for such books increased in the ratio of their production, so that other religious societies, and even miscellaneous publishers, found it to their interest to provide them. At length the idea of introducing circulating-libraries into Sunday-schools came into vogue, and with it a still greater publication of books designed for juvenile reading, and also for the instruction and aid of teachers.

There are no data for accurately tracing the numerical growth of Sunday-schools in the earlier periods of their history. Nevertheless, it is pleasing to know that some of the workers of those days were not inattentive to the broader aspects of the enterprise in which they were engaged. It was estimated by the Sunday-school Society of London, in 1786, that within five years after the opening of Raikes's first school 250,000 scholars had been enrolled in the schools then established. About forty years later (1827) the American Sunday-school Union estimated that the aggregate number of scholars enrolled in the Sunday-schools of different countries was 1,250,000.

II. *The Second Period of the Sunday-school Enterprise.*—This enterprise, at the present writing, has had a recognised existence of about one hundred years. In considering its history, it seems proper to divide its first century into two periods of fifty years each. The first, which has been summarily sketched above, may be denominated its initial and formative period. The second, now closing, constitutes its period of adolescence. We must look to the future for its full development.

Owing to causes noticed above, it was not earlier than from 1825 to 1830 that the Sunday-school cause came generally and prominently before the American public. Between the years named two leading Sunday-school unions (q. v.) were organized—one in Philadelphia and one in New York. About that time several great publishing societies were established that have given much auxiliary aid to Sunday-school efforts. The idea of religious instruction as the one great business of Sunday-schools had then found universal acceptance. The development of public secular instruction had by that time become so general, at least in the Northern and Central States of the American Union, that Sunday-schools had little occasion to go out of their proper sphere. The movement in behalf of general education in England had begun, having been greatly stimulated by the results of Sunday-schools. The purchase and use of Sunday-school libraries had become common in both countries, and the means of supplying them with suitable books were improving. In short, the Sunday-school enterprise was fairly launched, but no more than that. All the general improvement and progress of the intervening fifty years, together with the united and consecutive efforts of the multiplied workers in Sunday-schools, have been needed to bring those schools to the position they at present occupy.

There are two methods of indicating the progressive advance and the actual results of Sunday-schools. The one is by general statements, and the other by the comparative showing of such numerical statistics as may be found trustworthy. As neither of these modes is fully adequate, both will here be employed to a limited extent, in order that they may as far as possible supplement each other. Within the last fifty years Sunday-schools have come to be regarded as an essential branch of Church action, not merely in England and America,

but throughout the Protestant world, whether in home or mission fields. They have also been adopted by Roman Catholics and Jews in Protestant countries. Not to speak of the influence of Sunday-schools in the last-named bodies, it is safe to say that the great majority of all the ministers, missionaries, and communicants of all the Protestant churches of the world are at this time the *alumni* of Sunday-schools, and, as such, their active friends and supporters. The recognised necessities of these schools have given rise to important changes in church architecture, by which nearly every church is provided with accommodations for the instruction of the young in graded classes, ranging from infancy upwards. They have called into existence not only an extensive literature, but also a varied psalmody, contemplating the special tastes and wants of the young. While in England they have been chiefly limited to the poorer and middle classes of the people, in the United States they have claimed, and in fact assumed, a relation to public (week-day) schools corresponding to that which the Sabbath holds to the secular days of the week. In this relation they seek to supplement public and general education with the moral and religious influences of Christianity. In this view, they secure the attendance of scholars from the higher as well as lower classes of the community, and enlist for their instruction a quality of talent and an amount of effort which money could never hire.

In passing from general though significant statements like these to such showings as may be made in figures, it seems necessary to explain that Sunday-school statistics, as minute and comprehensive as are now seen to be desirable, are very difficult to obtain on a large scale. Only in rare instances have governments been interested to collect them, and comparatively few of the promoters of Sunday-schools have so far recognised their importance as to take the requisite steps for securing them. Consequently, up to the present time, there has not been a uniformity of method and the extent of co-operation necessary to making up comprehensive exhibits of numbers and results. The most, therefore, that has been up to this time possible in the way of such exhibits has been to form estimates based upon accurate statistics taken within certain districts or churches, and extending the *pro rata* outward. About the middle of the 19th century an effort was made in England, under government sanction, to ascertain the number and attendance of the Sunday-schools of that country. On a given Sunday (March 30, 1851) the Sunday-schools of England and Wales were simultaneously inspected; and there were found in 23,514 schools, 302,000 teachers and 2,280,000 scholars. The number of children enrolled as scholars was 2,407,409, or about three fifths of the number of children between the ages of five and fifteen enumerated by the census taken within the same limits. A similar proportion of children in American Sunday-schools at the same period would have reached the number of 3,000,000. If to those aggregates the probable number of Sunday-schools in Scotland, Ireland, and other countries at the same date be added, it seems safe to believe that there were in Sunday-schools throughout the world, at the end of 1850, not less than 6,000,000 scholars. Similar estimates made at the end of another quarter of a century indicate that at the end of 1875 there were in operation in all countries 110,000 Sunday-schools, embracing 1,500,000 teachers and 10,000,000 scholars. One statistician of some prominence has since estimated that there are in the United States alone not less than 81,858 Sunday-schools and 6,896,696 scholars. On that basis the above aggregate for all countries might be enlarged. To illustrate the thoroughness with which Sunday-school statistics are taken by at least one of the American churches, and also the instructiveness of such statistics when taken through a series of years, we subjoin the official summary of the Methodist Episcopal Church for the year 1878: Sunday-schools, 19,904;

Sunday-school officers and teachers, 212,442; scholars, 1,511,389; scholars over fifteen years of age, 493,704; scholars under fifteen and not in infant classes, 445,502; scholars in infant classes, 276,553; average attendance, 962,375; volumes in Sunday-school libraries, 1,911,263; annual expenses of the schools, \$516,876.96; contributions to the Sunday-school Union for establishing new and aiding poor schools, \$32,968.27; officers and teachers who were communicants in the Church, 169,993; scholars who were communicants, 302,145; conversions in connection with the Sunday-schools, 77,644. The total membership of the Church at the same period was 1,688,783, or 35,000 less than the aggregate number of teachers and scholars in the Sunday-schools. A retrospective comparison of the increase of members in the same Church from year to year shows a striking correspondence to the number of reported conversions in the Sunday-schools. To the extent that the above statistics may be considered representative of the condition and work of Sunday-schools in the American churches, they render superfluous any argument to prove the magnitude of that work and its auxiliary power for the promotion of Christian influence.

It is not to be supposed that results of the importance indicated in the foregoing sketch have naturally arisen from the spontaneous growth of Sunday-schools. On the other hand they are only to be attributed to the divine blessing upon the systematic and well-directed efforts of intelligent Sunday-school workers extending through successive years. In fact, a considerable portion of the second half century of Sunday-schools had passed away before it could be said that these schools were thoroughly popular with even the Christian public of America; nor did they become so without great and continuous exertions on the part of enthusiastic friends of the cause. As one great agency for accomplishing that result, Sunday-school conventions were appointed and held in various places and in a great variety of circumstances. There were conventions for cities and towns, for counties, for districts, for conferences, and for states. Some of them were managed by single denominations and some by a union of all denominations. In these conventions, prominent Sunday-school workers came in contact with masses of people, answering objections, diffusing information, and stimulating zeal. Such gatherings gave an opportunity for the discussion of new methods, and became a great agency for the promotion of all real improvements in the organization and conduct of Sunday-schools even in the remotest sections of the land. In proportion as the Sunday-school idea became popular, and agitation in its behalf became unnecessary, conventions of Sunday-school friends and workers began to take the form of institutes after the analogy of teachers' institutes designed to elevate the standard of secular instruction. For a long period the most that was thought possible to be done for the higher training and special instruction of Sunday-school teachers, was sought to be accomplished through superintendents' and pastors' Bible-classes. But at length it was found practicable, with no design of superseding the Bible-classes referred to, to secure many of their benefits on a more popular scale, coupled with the enthusiasm derived from the assembly of numbers of people interested in common objects. Hence at Sunday-school conventions and institutes, lectures were given on important topics, apparatus and new publications were exhibited and explained, and model and normal classes were taught and trained by skilled teachers. By these public proceedings, not only was the better classification and instruction of Sunday-schools promoted, but an *esprit du corps* was aroused among teachers; and in many schools normal departments were established for the special instruction and qualification of teachers.

The success of Sunday-school institutes and normal classes reacted upon the conventional idea and caused it to expand into that of Sunday-school assemblies, de-

signed to continue in session from one to three weeks at a time. In connection with the growing American habit of taking summer vacations and of gathering in masses at popular resorts, Sunday-school assemblies, under wise and energetic management, have speedily grown to be influential of great good and promissory of long continuance. The Chautauqua Sunday-school Assembly, held on the borders of a beautiful lake in Western New York, under the presidency of Dr. John H. Vincent, may be considered at once the originator and model of various similar assemblies already held, and now said to be established for regular annual sessions in different parts of the United States; e. g. at Clear Lake, Ia.; Lake Bluff, Ill.; Loveland and Lakeside, O.; the Thousand Island Park in the St. Lawrence River; and at Round Lake, near Saratoga, N. Y. These assemblies are designed to do, for vast and widely separated sections of America, what was contemplated by the London Sunday-school Union in the erection of a building at 56 Old Bailey, in the heart of London. In that building is a Sunday-school museum and a large hall in which courses of lectures are given, while in other rooms training-classes are taught and competitive examinations held. While the centre of a million-peopled city affords some peculiar advantages for the objects above indicated, and specially in being accessible at all seasons of the year, yet the ample spaces and the romantic associations of a beautiful American grove adapted to such uses leave nothing to be desired in view of the objects of the assembly and during the season allotted to it. Many of the constructions are somewhat rude, but the appointments are in excellent taste and constantly improving. Everything, however, is made subservient to the grand idea of intellectual and spiritual improvement, with specific reference to the promotion of Christ's kingdom upon earth through the agency of Christian instruction. No one can properly appreciate the importance and future bearing of the agencies now under notice without considering that each coming generation will require, in its turn, to be trained and fitted for the ever-expanding work of teaching all nations the truths of the Gospel.

It may here be remarked that Sunday-school conventions have not been limited even to large states; in fact, they have been expanded so as to enlist national and even international representation. A World's Sunday-school Convention met in London in 1862, and a German National Sunday-school Convention in Hamburg in 1874. In the United States, in 1875, twenty-one State Sunday-school conventions were held, besides one of a national and one of an international character. The meeting of leading and delegated Sunday-school workers from different churches and nations has had a happy tendency towards the promotion of practical Christian union on the largest scale. One of the best evidences of this may be instanced in the general adoption since 1872 of a system of international lessons for Bible study. Uniform schemes of simultaneous study had been previously adopted to a considerable extent, especially in Great Britain, where they had long been promoted by the London Sunday-school Union, but never officially accepted throughout the kingdom. As early as 1860 Mr. Orange Judd, editor of the *American Agriculturist*, originated a scheme of lessons having all the essential features of the present International Series—namely, a selection of about seven consecutive verses for each week, in historical order, from the several portions of Scripture. At his suggestion Dr. James Strong drew up such a scheme, which was printed in tabular form in the *Agriculturist* for February, 1862, and hundreds of thousands of copies of it were distributed and used in the Sunday-schools of various denominations throughout the United States. A similar plan was published in the same manner the following year, and in 1862 the first of four consecutive question-books, entitled *Lessons for Every Sunday in the Year*, was prepared under the same auspices, and published in New York.

In 1865 the London system, with some modifications, was brought to the attention of the American public by Rev. J. H. Vincent, then editing a Sunday-school periodical in Chicago. The question was soon after proposed by him in a Sunday-school institute, "Is it practicable to introduce a uniform system of lessons into all our schools?" This question was earnestly and hopefully discussed in various ways for several years following; until, at the National Convention at Indianapolis in 1872, it was answered in the affirmative by a large vote. When the project was agreed to by representatives of the leading denominations in America, it was through friendly correspondence endorsed by the London Sunday-school Union, and has since been in actual and extensive use on both sides of the Atlantic. The international use of systems of lessons, prepared by joint committees, has had a happy tendency to promote increased interest in scriptural study throughout the world. This mode of simultaneous study has been greatly popularized by the publication of notes and comments on the uniform lessons in hundreds of periodicals in various countries and in different languages. At the present time, the system of international study seems to have won general favor throughout the Protestant world, and to have the promise of a long, if not permanent, continuance.

In closing this article, it seems proper to say that it is in the United States that the greatest work has been done in the preparation and publication of Sunday-school literature, although not without a great debt of obligation to English writers. Here Sunday-school circulating-libraries were first adopted as an essential auxiliary of Sunday-school effort. By this means, the influences of the Sunday-school were projected through the secular days of the week. In this country also, Sunday-school requisites and periodicals, combining both elegance and cheapness, have been published in the greatest profusion. The Sunday-school libraries of the United States have, in fact, become so numerous and important as to have challenged and secured a partial enumeration in the official census of the government. The census of 1870 reported 33,580 libraries, and 8,346,153 volumes in those libraries. This aggregate, large as it is, does not include the State of Connecticut, and for other reasons is evidently far below the facts in the case at the present time. No other libraries are so widely diffused as those of Sunday-schools; they are not only found in cities, where most great libraries are established, but in the remotest sections and neighborhoods of the land, and everywhere they are free to all who by attendance on Sunday-schools become entitled to draw their books for themselves or their friends. In so vast an aggregate of volumes, it would not be strange if there were some of an indifferent or even of a very objectionable character. But such would be only exceptions to the general rule that Sunday-school libraries furnish wholesome and attractive reading to millions of youths and children, many of whom, without them, would have no reading, or only that which is bad.

The most cursory view of the various agencies now in active operation as parts of the Sunday-school enterprise can hardly fail to impress any thoughtful mind with the moral grandeur of that enterprise as a whole. Especially will any true Christian that contemplates the feeble beginning of 1780, in comparison with the vast array of Sunday-school activities and agents at work in 1880, be led to exclaim, What hath God wrought through the instrumentality of those who have endeavored to obey the command "Feed my lambs!" When, moreover, he considers the glorious results of the Sunday-school efforts of the past hundred years, and the cumulative power of those that may be made in the centuries to come, he will see that the problem of the world's conversion is in process of solution. (D. P. K.)

SUNDAY-SCHOOL SOCIETIES, UNIONS, etc. As-

sociated Christian effort may be designated as the generic agency by which, under the divine blessing, the great results of the Sunday-school enterprise have been accomplished. Such effort has assumed two forms—1, local; 2, general—each correspondent and supplementary to the other. Local associations, whether in neighborhoods or churches, have from the first been necessary as a means of raising the money to found, and of enlisting the teachers to instruct, Sunday-schools. General associations were also, from an early day, seen to be important for the purpose of awakening public interest and of diffusing information both as to the necessity and the best means of instructing in religious truth. They have likewise had an important function to perform in prompting and guiding individual and local effort in the work of organizing and maintaining Sunday-schools, becoming at the same time an important bond of union between great numbers of schools not locally connected. General associations for these objects have assumed, somewhat interchangeably, the title of societies and unions, the latter predominating, apparently, on account of its expressiveness of their character and objects. The most important of those established in England and America will now be enumerated in chronological order.

I. *English*.—1. In 1785 "The Society for Promoting Sunday-schools in the British Dominions" was organized in London. It was under the leadership of William Fox, who in various ways proved himself to be a true philanthropist, but specially in his zeal, liberality, and personal efforts for the education and moral elevation of the lower classes of his countrymen. This society, during the first sixteen years of its existence, paid out £4000 for the services of hired teachers in Sunday-schools. When, however, the plan of gratuitous teaching came to be universally adopted, and Christians and churches became generally enlisted in promoting Sunday-schools from purely religious motives, the importance and influence of this society declined until it became extinct.

2. In 1803 "The London Sunday-school Union" was organized. It was composed of lay Sunday-school workers of different denominations of Christians residing within a radius of five miles from the city post-office. This limitation was adopted as a measure of convenience and unity of action, but with no design of limiting the influence of the union to the circle thus described. This union has had an honorable and prosperous career from its origin to the present time. It has never controlled a large amount of funds, nor been able to take statistics on any scale of great importance; but it has steadily and consistently pursued its specific designs, and in so doing has been able, from its central position, to influence favorably the Sunday-school cause not only throughout Great Britain, but throughout the world. The following have been its more important functions: 1. The publication of Sunday-school requisites, lesson-papers, and periodicals. Of the latter, *The Sunday-school Teachers' Magazine* and several juvenile monthlies have long held a high rank. 2. The promotion of activity and improvement in the work of Sunday-school instruction. For this object the position of the union, in the practical centre not only of London, but of England, has been eminently favorable. This advantage has been diligently and wisely improved by a succession of intelligent and faithful workers, who, by personal and co-operative efforts, have kept the standard of Sunday-school instruction continually advancing. As a permanent means to this important end, they have secured the erection of a fine building in a central location, in which they maintain courses of lectures, training and model classes, together with competitive examinations for teachers.

3. In 1810 "The Religious Tract Society" of London was founded. This society, although not bearing the name Sunday-school in its title, or specifically naming Sunday-school objects in its constitution, has nevertheless been, from its origin to the present time, one of the

most serviceable auxiliaries to the Sunday-school enterprise. Its publications have been unrivalled for cheapness, elegance, religious character, and adaptation to Sunday-school wants. As such they have challenged and secured the patronage of all Sunday-school workers throughout the British dominions. Vast numbers of them have been reprinted in the United States.

Of several other general associations we are not able to assign the exact date of origin. The order of their establishment is indicated in the list, and the specific object of each is sufficiently expressed by its title. They are as follows: "The Church of England Sunday-school Institute;" "The Ragged Sunday-school Institute;" "The Wesleyan Methodist Sunday-school Union." The Wesleyan Methodist Church has long had a form of denominational action in behalf of both weekday and Sunday school education. It has, moreover, through its publication-office, issued many books for Sunday-schools, as well as requisites and juvenile periodicals. Between the years 1860 and 1870 it thought proper to adopt more specific measures in behalf of its Sunday-school work. Hence the institution of the union last named, and the appointment of a connectional Sunday-school secretary. In general, it may be remarked that the greater part of the churches throughout Great Britain maintain their Sunday-schools by individual Church effort, often aided by the co-operative influence of local unions.

II. *American*.—1. Not counting the Church action alluded to in the preceding article, the first general Sunday-school organization established in the United States dated from Jan. 11, 1791. It was formed in Philadelphia, under the title of "The First-day or Sunday School Society." It was composed of members representing different denominations of Christians, among whom were several members of the Society of Friends. "The first article of the constitution of this society required that the instruction given in the schools established under its auspices or receiving its beneficence should 'be confined to reading and writing from the Bible and such other moral and religious books as the society may from time to time direct.' The teachers were paid for their services." Like its predecessor of similar design in London, this society did not have a very long or influential career. Neither did the New York Sunday-school Union, formed in 1816, nor the Philadelphia Sunday and Adult School Union formed in Philadelphia in 1817.

2. In 1824 the last-named association was merged in "the American Sunday-school Union." This union, like that of London, is composed of laymen belonging to different denominations of Christians; but from the first it has assumed and maintained a far more prominent position and more aggressive modes of action than its English prototype. It has undertaken the double work of the publication of Sunday-school literature and the missionary enterprise of founding Sunday-schools on the frontier and in all destitute portions of the United States. For these objects, it has appealed to its supporting churches for funds. Those appeals have been honored in large amounts from year to year; and thus, during more than half a century, it has carried forward a grand and expanding work in many places where denominational effort could not have commanded success. As an indication of the work it is and has been accomplishing, we subjoin its principal items of statistics for the year ending March 1, 1879: Sunday-schools organized, 1087, containing 4915 teachers and 39,769 scholars. Schools aided, 2718, containing 16,622 teachers and 152,962 scholars. Miles travelled by its agents and missionaries, 232,622. Addresses delivered, 5521. Bibles distributed, 2137. Testaments distributed, 6668. Families visited, 14,140. It has expended in missionary operations an aggregate of \$2,471,620, while the value of books and papers it has put in circulation is not less than \$7,000,000. It is easy to perceive that such a system of evangelical effort, steadily and ener-

getically pursued for a long series of years, must result in an amount of good quite beyond the power of figures to enumerate or words to express. When to this grand idea is added that of the influence of a rich and abundant Sunday-school literature, diffused on business principles and through business agencies among the various Sunday-schools of the land, the mind strives in vain to comprehend the full extent of the significance and hopefulness of this system of effort. From the nature of its work, the American Sunday-school Union is unable to take what may be called permanent statistics, or to follow the schools it has founded into their subsequent changes and developments. Its office is usually that of a pioneer, making preliminary organizations which, in the course of years—and often of a very few years—expand, subdivide, and become merged in the more permanent work of the various churches.

3. In 1827 "The Sunday-school Union of the Methodist Episcopal Church" was organized in New York, in a form which also contemplated the publication and diffusion of religious tracts and the Holy Scriptures. Although all these objects had been previously contemplated and promoted by regular Church action as taken in 1784 and subsequently, it was thought proper, in 1827, to make special efforts in their behalf by the joint and special organization referred to. In 1840 the Sunday-school Union under notice was reorganized as a separate institution, and in 1844 its interests and functions were brought into greater prominence by the appointment of an official Sunday-school editor, who was also made corresponding secretary of the union. These movements were in harmony with the original policy of the Church that instituted them, namely, to promote Sunday-school instruction as a branch of regular Church action. For such action on a large scale circumstances at the last-named period were highly favorable. The Church had then become extended throughout the whole country, so that it could reach almost any inhabited place by its regular agencies. Its plan, therefore, was to stimulate its ministers and members to universal activity, in accordance with its rules, adopted in 1784 and 1790. This plan saved the great expense of sending out and maintaining special Sunday-school missionaries, while it made sure of responsible and resident agents wherever the work was undertaken. By similar agencies it was sought everywhere to promote a higher grade of Sunday-school activity and improved methods of instruction. For the production of an extensive and varied Sunday-school literature, provided under official editorship, the union was able to avail itself of an organized and most effective publishing establishment, owned by the Church, with the best of facilities for diffusing its printed matter. In these circumstances, all collections for the missionary department of Sunday-school effort were applied directly and exclusively to the distribution of books, at cost price, to be used by persons engaged in founding new or maintaining poor schools. Probably no more thorough and efficient system of Church effort in behalf of Sunday-schools was ever organized, inclusive of the system of statistics by which its workings are shown from year to year. Some of the results of the action of that system, running on in regular course, may be inferred from the statistical summaries given in the foregoing article.

4. "The Protestant Episcopal Sunday-school Union" was organized in New York, at about the period when the two unions last named had their origin; but, for some reason, it never secured a strong support from the Church in whose interest it was founded and whose name it bore. It acted for a time as a publication society, being often aided by individual congregations in the issue of particular books. After some years of a rather languid existence, its interests were sold out to a private bookseller. A similar result occurred to the Evangelical Knowledge Society, an organization also projected, about 1850, by ministers and members of the

Protestant Episcopal Church, in the idea of securing and diffusing a more evangelical literature than that furnished by the union last named.

5. It is proper to say here that neither the Presbyterian nor Baptist churches of the United States have organized Sunday-school unions. They have availed themselves to a large extent of the publications of the American Sunday-school Union, and also, in part, of the juvenile literature issued by their respective boards of publication, as well as that of the American Tract Society.

6. In 1832 "The Massachusetts Sabbath-school Society" was founded in Boston, by representatives of the Congregational churches of New England. Its modes of action were denominational, and its publications were numerous and good, but after some years of independent existence the interests of the society were blended with those of the Congregational Publishing Society and the American Home Missionary Society. Neither of those societies publish Sunday-school statistics.

7. "The (Dutch) Reformed Sunday-school Union" was organized in New York about 1850, and for several years proceeded quite actively to promote the Sunday-school interests of the Church it represented. It published a small catalogue of Sunday-school books and requisites, but did not long maintain a separate existence, its interests having been merged in those of a publishing society of a more general character.

8. It is not within the scope of this article to notice the numerous local Sunday-school associations that have sprung up in the cities, towns, counties, or even states of the American Union. Many of them have had but a brief existence. Others have been maintained for continuous years, happily illustrating the principles of Christian union, but rarely engaging in the enterprise of publication. Some of them have collected statistics, but usually within limited spheres.

9. The Foreign Sunday-school Association of New York and vicinity had a germinal existence as far back as 1864, but did not secure an incorporation till 1878. It is composed of practical Sunday-school workers, who, by means of correspondence, co-operation with missionaries, and judicious donations, seek to promote the organization and maintenance of Sunday-schools in countries foreign to the United States and outside of the British possessions. It claims to have "been the means of planting 1977 Sunday-schools in Germany, 1130 in France, 150 in Italy, 30 in Portugal, 40 in Japan, 405 in German Switzerland, besides some schools in China, Greece, Hungary, Holland, and other countries." Its published report for 1879 contains numerous interesting facts, and authorizes the hope that in years to come grand results may ensue from beginnings which are at first necessarily feeble, so far as human agency is involved.

The fact that the Sunday-school enterprise, during the first century of its history, has, with the divine blessing, come so fully to pervade English-speaking countries, and has made a hopeful commencement in many and remote foreign nations, deserves to be taken as a promise of success during the centuries to come of inestimable extent and value. (D. P. K.)

**Sunday Service** of the METHODIST EPISCOPAL CHURCH was an abridgment of the Prayer-book of the Church of England, prepared by Mr. Wesley. It was arranged for the use of the Methodists in America, when he recommended their organization into a Methodist Episcopal Church. It was entitled *The Sunday Service of the Methodists of North America, with other Services*, and was adopted by the General Conference of 1784. It was published in connection with the *Discipline* (Phila. 1785; Lond. 1786). This appears to have been the last time the *Sunday Service* was published in connection with the *Discipline*, and at the General Conference of 1792 all reference to the use of a Sunday Service was stricken out. It gradually dropped out of use. The M. E. Church, South, in 1866, ordered that the Prayer-

book as printed by Mr. Wesley in 1786 should be re-printed for the use of their Church, and the same service is used in many Wesleyan churches in England, though generally the churches using a service prefer the regular English Prayer-book. See Simpson, *Cyclop. of Methodism*, s. v.

**Sundays, SPECIAL.** There are a number of Sundays in the year which have received names suggested by events happening upon or near those days. We give below a classified list:

**ADVENT** (q. v.). The Sundays in Advent are called in the Greek Church by a certain number in connection with St. Luke's Gospel; thus, Advent Sunday is the "Tenth of Luke." The third Sunday in Advent is called *Gaudete*, from the Introit.

**AFTER EPIPHANY** (q. v.). It is called in the Greek Church "Sunday after the Lights;" in the north of Italy "Marriage Sunday," from the Gospel. The second Sunday after Epiphany is known as the "Fifteenth of Luke."

**Before SEPTUAGESIMA** (q. v.), called in the Greek Church "Sunday of the Publican and Pharisee."

**SEPTUAGESIMA** (q. v.), called by the Greeks "Sunday of the Prodigal," and in the West "Close of Alleluia."

**SEXAGESIMA** (q. v.), in the Greek Church "Sunday of Apocryphos," because meat is not eaten beyond it. It was also called "Sunday of the Sower."

**QUINGUAGESIMA** (q. v.), called *Quingagesima Paenitentiae*; also *Isto Miti* (Psa. xxxi. 2), from the Introit; in Germany "Priest's Fortnight," ecclesiastics commencing their fast on this day; and in the Greek Church *Tyrophagus*, because cheese is no longer eaten.

**IN LENT** (q. v.).

1. **Quadragesima** (q. v.), called *Invocavit* (Psa. xcl. 15); in the East "Orthodox Sunday" in England (994) "Holy Day."

2. **Reminiscere**, from the Introit (Psa. xxv. 6); and in France "Transfiguration," from the Gospel in the Paris use.

3. **Oculi**, from the Introit (Psa. xxv. 15); and in the East "Adoration of the Cross."

4. **Lætare** (Isa. liv. 1), "Sunday of the Golden Rose" (q. v.); "Refreshment Sunday" (Gen. xliii); "Midlent Sunday;" in the Greek Church "Sunday of the Great Canon," from a special hymn. In England it was known as "Care-Sunday" (*Kar*, a penalty); "Mothering-Sunday" (Gal. vi. 21), when all persons made their offerings in the cathedral or mother-church; "Simnel" or "Carling Sunday," from eating flue wheat-cakes or beans on this day.

5. **Judica** (Psa. xliii. 1), "Passion Sunday;" "Dimanche Reprus," from veiling the images; "Sunday of the Quintain" in France, from the sports of the day; "Black Sunday" in Germany, from the veiling of the crosses when the words "Jeens hid himself" were read.

**PALM-SUNDAY** (q. v.), also "Sunday of the Willow-boughs."

**EASTER** (q. v.).

1. First Sunday after Easter, or Octave, has various appellations: *Dominica in Albis*, persons who were baptized at Easter laying aside the white robes then received; *Dies Neophytorum*, the newly baptized being then recognised as actual members of the Church; *Quinquagesima* (q. v.); *Pascha Clausum*, close of Easter; *Octava Infantium*, in allusion to the newly baptized; *Quasimodogeniti*, in allusion to man's renovation by the Resurrection.

2. The second Sunday was known as that of the "Three Ointment-bearers," from the Gospel; "St. Thomas," or "Renewal Sunday" (John xx. 27); *Misericordias Domini*, from the Introit (Psa. xxiii. 6); "Sunday of White Cloths" or "after the exhibition of relics."

3. "Of the Paralytic" in the Greek Church; in the Latin, *Jubilate*, from the Introit (Psa. lxi. 2).

4. Mid-Pentecost; in the Greek Church "Of the Samaritan;" in the Latin from the Introits, *Cantate* (Psa. xcvi. 1), *Rogate* (Song of Sol. ii. 14); *Exaudi* (Psa. xxvii. 7).

5. Rogation (q. v.); in the Greek Church "Of the Blind-man."

**WHIT-SUNDAY** (q. v.).

**TRINITY SUNDAY** (q. v.); in the East "All Saints' Sunday;" in France "King of Sundays," or "Blessed Sunday." 1. "Sunday of the rich man and Lazarus" was the term used to designate the first Sunday after Trinity. 15. "Sunday of the Lilies" is the name by which the fifteenth Sunday after Trinity is known.

**After Ascension:** in the East "Sunday of the 319," in allusion to the Nicene fathers; at Rome "Sunday of Roses," so called by Innocent III in 1130, roses being thrown from the roof of Santa Maria Rotunda, symbolical of the gifts of the Spirit. Sundays after Pentecost, Sundays from Whit-Sunday to Advent; but in England, anciently as now, Sundays after Trinity.

**Sunias**, an epithet of the Grecian *Minerva*, from her temple at Sunium in Attica (Pausan. i. 1, 1).

**Sunisactanism** (*συνεστακτος*, introduced with), a name given to the practice by which many of the clergy evaded the rigorous laws respecting celibacy. It is sometimes called *domesticism*, and consisted in keeping female inmates in their dwellings, with whom they professed to live in chaste affection, but who were known to be concubines. Jerome and Chrysostom severely rephended the clergy on account of the gross licentiousness of which they were guilty, while at the same time they were professing the highest purity. See AGAPETÆ.

**Sunna**, one of the Norse asas, the daughter of Mundilfare, the star-god. Her brother and herself were possessed of extraordinary beauty, which induced their parents to name them the sun and moon (Sol, or Sunna, and Maani); but the gods considered the bestowal of such names a crime, and accordingly kidnapped the children, afterwards placing them in charge of the sun and the moon wagons which were formed out of sparks of fire which flew from Muspelheim into the kingdom of the asas. The horses which drew the wagons were named Alswidur and Arvarkur (the "universal scorcher" and the "early wake"). They speeded rapidly on their courses because Skoll and Hate, two mighty giants in the form of wolves, followed swiftly on their heels to devour them. It would seem that the ancient Germans also worshipped the sun under this title as a shining, light-radiating being. See NORSE MYTHOLOGY.

**Sunna** (Arab. *custom, legal usage*) originally denotes among Moslems the sayings and the example of Mohammed and his community, provided they are in accordance with the Koran, the meaning of which, however, is itself explained by the Sunna. The term is therefore (though incorrectly) used for the collections of moral and legal traditions traced to the Prophet, which supplement the Koran, somewhat like the Mishna (q. v.), which supplements the laws of the Pentateuch. The Sunna not only comprises religious doctrines and practice, but also civil and criminal laws and the usages of common life—the way to eat and to drink, and to dress, and the like. This tradition is first heard of during the civil wars among the adherents of the new faith, about half a century after the Flight. The single traditions, as we now possess them, rarely exceed six lines. The diction is carefully wrought, and the form is that of a dialogue. For the credibility and canonicity of a tradition it was originally necessary that it should have been *heard* by one truthful witness; but this law was much relaxed in after-time. At the end of the 3d century (H.), a countless number of individual collections (*Mosnad*), mostly of an apocryphal character, had been produced by different theologians, but the first who sifted them critically, and without regard to any special theological system, was Bochary (d. 256 H.). His collection contains 7275 single traditions, 4000 of which, however, occur twice in the work. Moslim, his pupil, supplemented Bochary with another collection, containing 12,000, again including 4000 repetitions. Besides these, there are four more "canonical" collections—by Abû Dawûd (d. 275 H.), Tirmidzy (d. 279), Nasâ'y (d. 303), and Mâga (d. 273). The Sunna, as we have it in these collections, contains, broadly speaking, more truth than it is generally supposed to contain, and, critically used, is, besides the Koran, the most authentic source of Islam. A selection from the different collections (both canonical and otherwise), called *Mishcat Al-Masabih*, has been translated into English by Capt. Matthews (Calcutta, 1809). Fragments from Bochary are found in the German translation, by Von Hammer, in the *Fundgruben des Orients*. See SONNA.

**Sunnites**, traditionists, or believers in the Sunna (q. v.); the name of the "orthodox" Moslems, as opposed to the Shiites (q. v.). They are subdivided into four principal sects, who, though at issue on different

minor points, yet are acknowledged by each other to belong to the faithful and to be capable of salvation, and they each have a special oratory at Mecca. The first of these sects are the Hanefites, founded by Abû Hanifa, who died 150 years after the Hegira. They are emphatically called "the followers of reason," while the other three are guided exclusively by tradition. They allow reason to have a principal share in their decisions on legal and other points. To this sect belong chiefly the Turks and Tartars. The second sect are the Malekites, founded by Malek Ibn-Ans, who died at Medina about 180 H. As one of the chief proofs of his real piety and humility, it is recorded that when asked for his decision on forty-eight questions, he would only decide on sixteen, freely confessing his ignorance about the others. In Barbary and other parts of Africa, the greatest part of his adherents are found. Mohammed Al-Shâfe'i, born in Palestine, 150 H., but educated in Mecca, is the founder of the third sect, the Shâfeites. He was a great enemy of the scholastic divines, and seems altogether to have been of an original cast of mind. He never swore by God, and always took time to consider whether he should at all answer any given question or hold his peace. The most characteristic saying recorded of him is, "Whosoever pretends to love both the work and the Creator at the same time is a liar." He is accounted of such importance that, according to his contemporaries, "he was as the sun to the world, and as health to the body;" and all the relations of the traditions of Mohammed were said to have been asleep until he came and woke them. He appears to have been the first who reduced Moslem jurisprudence into a method, and thus made it, from a number of vague sayings, a science. His followers are now chiefly found in Arabia and Persia. Ahmed Ibn-Hanbal founded the fourth sect, the Hanbalites. He was born 164 H., and was a most intimate friend of Shâfe'i. His knowledge of the traditions (of which he could repeat not fewer than a million) was no less famed than was his piety. He taught that the Koran was not created, but everlastingly subsisted in the essence of God—a doctrine for which he was severely punished by the caliph Al-Motasem. On the day of his death, no less than 20,000 unbelievers (Jews, Christians, and Magians) are said to have embraced the Mohammedan faith. Once very numerous, the Hanbalites now are but very rarely met with out of Arabia. On the differences between the Sunnites and Shiites, see SHIITES. See SONNITES.

**Sunyabadis**, a sect of Hindû Atheists, or rather Nihilists, who held that all notions of God and man are fallacies, and that nothing exists. Whatever we look upon is regarded as vacuity. Theism and Atheism, Maya and Brahm, all is false, all is error.

**Suovetaurilia**, peculiar sacrifices among the ancient Romans, so named because they consisted of a pig, a sheep, and an ox. These were offered at the general lustration of the Roman people, which took place every five years. The Suovetaurilia, indeed, formed a part of every lustration, and the victims were carried around the thing to be purified, whether it was a city, a people, or a piece of land. The same sacrifices existed among the ancient Greeks, under the name of Trittya. A representation of the celebration of these sacrifices is found on the Triumphal Arch of Constantine at Rome. See SACRIFICE.

**Sup** (*δειπνέω*). Our information on this subject is but scanty. The early Hebrews do not seem to have given special names to their several meals, for the terms rendered "dine" and "dinner" in the A. V. (Gen. xliii, 16; Prov. xv, 17) are in reality general expressions, which might more correctly be rendered "eat" and "portion of food." In the New Test. we have the Greek terms *ἀριστον* and *δειπνον*, which the A. V. renders respectively "dinner" and "supper" (Luke xiv,

12; John xxi, 12), but which are more properly "breakfast" and "dinner." There is some uncertainty as to the hours at which the meals were taken. The Egyptians undoubtedly took their principal meal at noon (Gen. xliii, 16); laborers took a light meal at that time (Ruth ii, 14; comp. ver. 17); and occasionally that early hour was devoted to excess and revelling (1 Kings xx, 16). It has been inferred from those passages (somewhat too hastily, we think) that the principal meal generally took place at noon. The Egyptians do, indeed, still make a substantial meal at that time (Lane, *Mod. Egypt.* i, 189), but there are indications that the Jews rather followed the custom that prevails among the Bedawin, and made their principal meal after sunset, and a lighter meal at about 9 or 10 A.M. (Burckhardt, *Notes*, i, 64). For instance, Lot prepared a feast for the two angels "at even" (Gen. xix, 1-3); Boaz evidently took his meal late in the evening (Ruth iii, 7); the Israelites ate *flesh* in the evening, and *bread* only, or manna, in the morning (Exod. xvi, 12); the context seems to imply that Jethro's feast was in the evening (xviii, 12, 14). But, above all, the institution of the Paschal feast in the evening seems to imply that the principal meal was usually taken then: it appears highly improbable that the Jews would have been ordered to eat meat at an unusual time. In the later Biblical period we have clearer notices to the same effect. Breakfast took place in the morning (John xxi, 4, 12), on ordinary days not before 9 o'clock, which was the first hour of prayer (Acts ii, 15), and on the Sabbath not before 12, when the service of the synagogue was completed (Josephus, *Life*, § 54); the more prolonged and substantial meal took place in the evening (*ibid.* § 44; *War*, i, 17, 4). The general tenor of the parable of the great supper certainly implies that the feast took place in the working-hours of the day (Luke xiv, 15-24); but we may regard this, perhaps, as part of the imagery of the parable rather than as a picture of real life. See SUPPER.

The posture at meals varied at different periods. There is sufficient evidence that the old Hebrews were in the habit of *sitting* (Gen. xxvii, 19; Judg. xix, 6; 1 Sam. xx, 5, 24; 1 Kings xiii, 20), but it does not hence follow that they sat on chairs; they may have squatted on the ground, as was the occasional, though not perhaps the general, custom of the ancient Egyptians (Wilkinson, *Anc. Egypt.* i, 58, 181). The table was in this case but slightly elevated above the ground, as is still the case in Egypt. At the same time, the chair was not unknown to the Hebrews, but seems to have been regarded as a token of dignity. The Hebrew term is *kissé* (כִּסֵּה). There is only one instance of its being mentioned as an article of ordinary furniture, viz. in 2 Kings iv, 10, where the A. V. incorrectly renders it "stool." Even there it seems probable that it was placed more as a mark of special honor to the prophet than for common use. As luxury increased, the practice of sitting was exchanged for that of reclining. The first intimation of this occurs in the prophecies of Amos, who reprobates those "that lie upon beds of ivory, and stretch themselves upon their couches" (vi, 4); and it appears that the couches themselves were of a costly character—the "corners" or *edges* (iii, 12: the word is *peáh*, פֶּאֶה, which will apply to the *edge* as well as to the angle of a couch. That the seats and couches of the Assyrians were handsomely ornamented appears from the specimens given by Layard [*Nineveh*, ii, 300-302]), being finished with ivory, and the seat covered with silk or damask coverlets. (The A. V. has "in Damascus in a couch;" but there can be no doubt that the name of the town was transferred to the silk stuffs manufactured there, which are still known by the name of "damask.") Ezekiel, again, inveighs against one who sat "on a stately bed with a table prepared before it" (xxiii, 41). The custom may have been borrowed, in the first instance, from the Babylonians and Syrians,

among whom it prevailed at an early period (Esth. i, 6; vii, 8). A similar change took place in the habits of the Greeks, who are represented in the Heroic Age as *sitting* (*Il.* x, 578; *Od.* i, 145), but who afterwards adopted the habit of reclining, women and children excepted. Sitting appears to have been the posture usual among the Assyrians on the occasion of great festivals. A bas-relief on the walls of Khorsabad represents the guests seated on high chairs (Layard, *Nineveh*, ii, 411). In the time of our Saviour reclining was the universal custom, as is implied in the terms (*ἀνακτιοῦσαι, κατακτιοῦσαι, ἀνακλίνεσθαι, κατακλίνεσθαι*) used for "sitting at meat," as the A. V. incorrectly has it. The couch itself (*κλίνη*) is only once mentioned (Mark vii, 4; A. V. "tables"), but there can be little doubt that the Roman *triclinium* had been introduced, and that the arrangements of the table resembled those described by classical writers. Generally speaking, only three persons reclined on each couch, but occasionally four, or even five. The couches were provided with cushions, on which the left elbow rested in support of the upper part of the body, while the right arm remained free. A room provided with these was described as *ιστρωμένον*, lit. "spread" (xiv, 15; A. V. "furnished"). As several guests reclined on the same couch, each overlapped his neighbor, as it were, and rested his head on or near the breast of the one who lay behind him; he was then said to "lean on the bosom" of his neighbor (*ἀνακτιοῦσαι ἐν τῷ κόλπῳ*, John xiii, 23; xxi, 20; comp. Pliny, *Epist.* iv, 22). The close proximity into which persons were thus brought rendered it more than usually agreeable that friend should be next to friend, and it gave the opportunity of making confidential communications (John xiii, 25). The ordinary arrangement of the couches was in three sides of a square, the fourth being left open for the servants to bring up the dishes. The couches were denominated respectively the highest, the middle, and the lowest couch; the three guests on each couch were also denominated highest, middle, and lowest—the terms being suggested by the circumstance of the guest who reclined on another's bosom always appearing to be *below* him. The *protoklisia* (προτοκλισία, Matt. xxiii, 6), which the Pharisees so much coveted, was not, as the A. V. represents it, "the uppermost room," but the highest seat in the highest couch—the seat numbered 1 in the annexed diagram. See ACCUBATION.

Some doubt attends the question whether the females took their meals along with the males. The present state of society in the East throws no light upon this subject, as the customs of the harem date from the time of Mohammed. The cases of Ruth amid the reapers (Ruth ii, 14), of Elkanah with his wives (1 Sam. i, 4), of Job's sons and daughters (Job i, 4), and the general intermixture of the sexes in daily life, make it more than probable that they did so join; at the same time, as the duty of attending upon the guests devolved upon them (Luke x, 40), they probably took a somewhat irregular and briefer repast. See DINE.

Before commencing the meal, the guests washed their hands. This custom was founded on natural decorum; not only was the hand the substitute for our knife and fork, but the hands of all the guests were dipped into one and the same dish; uncleanliness in such a case would be intolerable. Hence not only the Jews, but

Washing before or after a Meal. (From Lane's *Modern Egyptians*.)

the Greeks (*Od.* i, 136), the modern Egyptians (Lane, i, 190), and many other nations have been distinguished by this practice; the Bedawin, in particular, are careful to wash their hands *before*, but are indifferent about doing so *after* their meals (Burckhardt, *Notes*, i, 63). The Pharisees transformed this conventional usage into a ritual observance, and overlaid it with burdensome regulations—a wilful perversion which our Lord reprobates in the strongest terms (Mark vii, 1-13). Another preliminary step was the grace or blessing, of which we have but one instance in the Old Test. (1 Sam. ix, 13), and more than one pronounced by our Lord himself in the New Test. (Matt. xv, 36; Luke ix, 16; John vi, 11); it consisted, as far as we may judge from the words applied to it, partly of a blessing upon the food, partly of thanks to the Giver of it. The Rabbinical writers have, as usual, laid down most minute regulations respecting it, which may be found in the treatise of the Mishna entitled *Berachoth*, ch. vi-viii. See WASH.

The mode of taking the food differed in no material point from the modern usages of the East; generally there was a single dish, into which each guest dipped his hand (Matt. xxvi, 23); occasionally separate portions were served out to each (Gen. xliii, 34; Ruth ii, 14; 1 Sam. i, 4). A piece of bread was held between the thumb and two fingers of the right hand, and was dipped either into a bowl of melted grease (in which case it was termed *ψωμιον*, “a sop,” John xiii, 26) or into the dish of meat, whence a piece was conveyed to the mouth between the layers of bread (Lane, i, 193, 194; Burckhardt, *Notes*, i, 63). It is esteemed an act of politeness to hand over to a friend a delicate morsel

A Party at Dinner or Supper. (From Lane's *Modern Egyptians*.)

(John xiii, 26; Lane i, 194). In allusion to the above method of eating, Solomon makes it a characteristic of the sluggard that “he hideth his hand in his bosom, and will not so much as bring it to his mouth again” (Prov. xix, 24; xxvi, 15). At the conclusion of the meal grace was again said, in conformity with Deut. viii, 10, and the hands were again washed. See MEAL.

Thus far we have described the ordinary meal. On state occasions more ceremony was used, and the meal was enlivened in various ways. Such occasions were numerous, in connection partly with public, partly with private events. In the first class we may place the great festivals of the Jews (Deut. xvi; Tob. ii, 1); public sacrifices (Deut. xii, 7; xxvii, 7; 1 Sam. ix, 13, 22; 1 Kings i, 9; iii, 15; Zeph. i, 7); the ratification of treaties (Gen. xxvi, 30; xxxi, 54); the offering of the tithes (Deut. xiv, 26), particularly at the end of each third year (xiv, 28). In the second class, marriages (Gen. xxix, 22; Judg. xiv, 10; Esth. ii, 18; Tob. xiii, 19; Matt. xxii, 2; John ii, 1); birthdays (Gen. xl, 20; Job i, 4; Matt. xiv, 6, 9); burials (2 Sam. iii, 35; Jer. xvi, 7; Hos. ix, 4; Tob. iv, 17); sheep-shearing (1 Sam. xxv, 2, 36; 2 Sam. xiii, 23); the vintage (Judg. ix, 27); laying the foundation-stone of a house (Prov. ix, 1-5); the reception of visitors (Gen. xviii, 6-8; xix, 3; 2 Sam. iii, 20; xii, 4; 2 Kings vi, 23; Tob. vii, 9; 1 Macc. xvi, 15; 2 Macc. ii, 27; Luke v, 29; xv, 28; John xii, 2); or any event connected with the sovereign (Hos. vii, 5). “The day of the king,” in this passage, has been variously understood as his birthday or his coronation; it may, however, be equally applied to any other event of similar importance. On each of the above-mentioned occasions a sumptuous repast was prepared; the guests were previously invited (Esth. v, 8; Matt. xxii, 3), and on the day of the feast a second invitation was issued to those that were bidden (Esth. vi, 14; Prov. ix, 3; Matt. xxii, 3). The visitors were received with a kiss (Tob. vii, 6; Luke vii, 45); water was produced for them to wash their feet with (Luke vii, 44); the head, the beard, the feet, and sometimes the clothes were perfumed with ointment (Psa. xxiii, 5; Amos vi, 6; Luke vii, 38; John xii, 3); on special occasions robes were provided (Matt. xxii, 11; comp. Trench, *On Parables*, p. 230); and the head was decorated with wreaths (Isa. xxviii, 1; Wisd. ii, 7, 8; Josephus, *Ant.* xix, 9, 1). This custom prevailed extensively among the Greeks and Romans. Not only were chaplets worn on the head, but festoons of flowers were hung over the neck and breast (Plutarch, *Symp.* iii, 1, 3; Martial, x, 19; Ovid, *Fast.* ii, 739). They were generally introduced after the first part of the entertainment was completed. They are noticed in several familiar passages of the Latin poets (Horace, *Carm.* ii, 7, 24; *Sat.* ii, 3, 256; Juven. v, 36). The regulation of the feast was under the superintendence of a special officer, named ἀρχιτρικλινος (John ii, 8; A. V. “governor of the feast”), whose business it was to taste the food and the liquors before they were placed on the table, and to settle about the toasts and amusements; he was generally one of the guests (Ecclus. xxxii, 1, 2), and might therefore take part in the conversation. The classical designation of this officer among the Greeks was *συμπροσιταρχος*; among the Romans *magister* or *rex convivi*. He was chosen by lot out of the guests (Smith, *Dict. of Antiq.* p. 925). See ARCHITRICLINUS. The places of the guests were settled according to their respective rank (Gen. xliii, 33; 1 Sam. ix, 22; Mark xii, 39; Luke xiv, 8; John xiii, 23); portions of food were placed before each (1 Sam. i, 4; 2 Sam. vi, 19; 1 Chron. xvi, 3), the most honored guests receiving either larger (Gen. xliii, 34; comp. Herod. vi, 57) or more choice (1 Sam. ix, 24; comp. *Il.* vii, 321) portions than the rest. The importance of the feast was marked by the number of the guests (Gen. xxix, 22; 1 Sam. ix, 22; 1 Kings i, 9, 25; Luke v, 29; xiv, 16), by the splendor of the vessels (Esth. i, 7), and by the profusion or the excellence of the viands (Gen. xviii, 6; xxvii, 9; Judg. vi, 19; 1 Sam. ix, 24; Isa. xxv, 6; Amos vi, 4). The meal

was enlivened with music, singing, and dancing (2 Sam. xix, 35; Psa. lxi, 12; Isa. v, 12; Amos vi, 5; Eccles. xxxii, 8-6; Matt. xiv, 6; Luke xv, 25), or with riddles (Judg. xiv, 12); and amid these entertainments the festival was prolonged for several days (Esth. i, 3, 4). Entertainments designed almost exclusively for drinking were known by the special name of *mishteh* (מִשְׁתֶּה). This resembled the *comissatio* of the Romans, which took place after the supper, and was a mere drinking revel, with only so much food as served to whet the palate for wine (Smith, *Dict. of Antiq.* p. 271).—Smith. See BANQUET. Instances of such drinking-bouts are noticed in 1 Sam. xxv, 36; 2 Sam. xiii, 28; Esth. i, 7; Dan. v, 1; they are reprobated by the prophets (Isa. v, 11; Amos vi, 6). Somewhat akin to the *mishteh* of the Hebrews was also the *kómos* (κῶμος) of the apostolic age, in which gross licentiousness was added to drinking, and which is frequently made the subject of warning in the Epistles (Rom. xiii, 13; Gal. v, 21; Eph. v, 18; 1 Pet. iv, 3). See DRINK.

**Super-altar**, a term given—1. To a portable altar, placed on the altar itself at the time of the celebration of the Christian eucharist, or set up separately. Hincmar (867) allowed the use of a consecrated slate, marble, or a black stone slab, probably owing to the needs of the Crusaders and the deficiency of churches. It was large enough to contain the chalice and host. See ALTAR, PORTABLE. 2. Ordinarily and commonly this term is applied to the ledge behind the altar, on which relics, flowers, candlesticks, and the altar-cross stand. It is very frequently so applied in the ancient Church of England.

**Superannuated PREACHERS** are ministers in the Methodist churches who, by reason of age, infirmity, or afflictions, are disabled from preaching, but remain members of the Annual Conferences. In the American churches they retain all the rights and privileges of active ministers except being eligible to appointments. In the English Wesleyan Church, if members of the Legal Hundred or Constitutional Conference, they cease to be members of that body. Their restoration to the effective relation depends upon the vote of the Conference.

I. *Rights, etc.*—When a superannuated preacher lives out of the bounds of his Conference, he is entitled to a seat in the Quarterly Conference, and the privileges of membership in the Church where he resides. He is entitled, if needy, to receive a share of the proceeds of the collection taken in the churches for Conference claimants, and of the chartered fund. Each Quarterly Conference is directed to estimate the amount needed for the support of these preachers or their widows, and forward a certificate to the Annual Conference. The case is considered by the Conference stewards, and on their report the amount to be distributed is decided by the vote of the Conference.

II. *Duties, etc.*—It is the duty of the superannuated preacher to forward annually to the Conference of which he is a member a certificate of his Christian and ministerial character, signed by the presiding elder of the district or the preacher in charge of the work where he resides. Without such certificate he has no claims on the Conference for support.

In 1876 there were in the Methodist Episcopal Church 1103 superannuated preachers. The Methodist Episcopal Church, South, in 1875, reported 259. See *Discipline of the M. E. Church*; Simpson, *Cyclop. of Methodism*, s. v.

**Superattendants.** The Greek word *ἐπισκοπος*, *episcopus*, has always been retained in the Church to denote the chief minister in sacred things. It was sometimes translated by Latin writers into *superattendants*, i. e. superintendent. See BISHOP.

**Superbia**, the Roman personified *pride*, a daughter of *Æther* and *Earth*.

**Supererogation** (*opus supererogationis*). The distinction between *præcepta* and *consilia evangelica*, or between the positive duties enjoined by the law and the moral requirements of the Gospel, which the faithful are at liberty to comply with or not, referring chiefly to 1 Cor. vii, 6, and treated in the *Catechism. Roman.* iii, 3, 24, is of very ancient origin. Scholastic theology insisted most particularly on that distinction, and established it in the form in which it has since been held by all orthodox Roman Catholics. If the observance of the obligatory commandments constitutes all the duties of man, then his undertaking to accomplish the non-obligatory *consilia* may be looked upon as a sort of traffic, the object of which is to gain by this accomplishment a certain degree of *merit*. We acquire by it a sort of surplus, and this is what is designated as *opus supererogationis*. This doctrine of supererogatory merits is not symbolical, for the Council of Trent does not express itself on that point. On the other hand, the principle that the righteous may fully satisfy the divine law *pro hujus vite statu* by works done in God is fully established by Conc. Trid. Sess. vi, can. 16. This is also the case with the other principle, "Si quis dixerit, hominis justificati bona opera ita esse dona Dei, ut non sint etiam bona ipsius justificati merita, aut ipsum justificatum bonis operibus . . . non vere mereri augmentum gratiæ, vitam æternam et ipsius vite æternæ . . . consecutionem atque etiam gloriæ augmentum; anathema sit" (Sess. vi, can. 32). Finally, the symbolic books of the Roman Catholic Church recognise also the voluntary assumption of the vows of obedience, poverty and chastity (Sess. xxv, can. 1), of which Bellarmine (*De Monachis*, c. viii) says they are "nec præcepta nec indifferentia, sed Deo grata et ab illo commendata." If a satisfactory fulfilment of the law is possible, if good works constitute a desert, then the scholastic notion of the *opera supererogativa* becomes a natural consequence. This doctrine, in short, is the result of the system. It is the natural consequence of that conception of the law in relation to the justification of man. It is supported by tradition from the time of Alexander of Hales (*Summa*, pt. iv, qu. 23, a. 2, m. 3; Albertus Magnus, *Sent.* iv, dist. 20, a. 16, 17; Thomas Aquinas, *Suppl. tert. part. Summæ Theol.* qu. 13, a. 1), and has not only never been denied, but always asserted and defended against all attacks by the most eminent theologians of the Roman Catholic Church. The assertion "ut unus posset pro altero satisfacere," in the *Catech. Rom.*, can only be explained in view of that doctrine. If we now inquire further into its consequences, as attempted by more modern theologians, Möhler, for instance (*Neue Untersuchungen*, 2d ed. p. 305 sq.), we find an inextricable confusion in the conception of the law. Möhler starts from the admission that the moral law, as the absolute will of God, and the unity of the human will with the divine by love, which it requires, cannot be surpassed. Yet his conception of the law is erroneous and a mere abstraction, for, on the one hand, he considers it as without limits, infinite; and, on the other, as resolving itself into a number of separate commandments, each of which constitutes a duty. Thus considered, no one can do more than the law requires, though any one can do more than is required by the separate commandments taken individually. From the moment that by his entering into communion with Christ love becomes the ruling principle of a man's life, he has absolutely fulfilled the moral law. Regeneration being presupposed, there are yet different degrees in the effects of love, and these degrees are not regulated by any law. Hence every one may accomplish certain duties as if they were not duties for him, thus overstepping the common limits of duty and attaining to a higher degree of perfection. According to this argumentation, the moral law would constitute, so to speak, an imaginary quantity, consisting, on the one hand, in the complete body of the divine commandments, and, on the other, in a number of imputations separate from these commandments, and very difficult to define particular-

ly. This, then, brings us back again to the distinction between *præcepta* and *consilia*, as the basis of the *opera supererogativa*. Protestantism, on the contrary, looks upon the divine law as one indivisible, and being in this form the rule of all human life and action. Objectively, it is the expression of the idea of that which is good in itself, while subjectively it finds its accomplishment in love. But in order to satisfy the manifold exigencies of life, it presents itself also in the form of a plurality of commandments. These, however, are not to be considered as separate from each other, nor, when taken together, as forming an incommensurable whole; but, as it is man's duty to do in every circumstance that which is good in itself, *each distinct commandment is to be looked upon as the seal of the complete moral idea, as the whole divine law in its relation to the circumstance under consideration*. As to which of the many commandments finds its application in a given case, this is a question entirely distinct from that which is objectively to be defined. The perception of it is given to the regenerate by the Holy Spirit through a conscience filled with love. It is evident that in this system there is no possibility of supposing a human power in those regenerated in Christ by virtue of which they could, under any circumstance, do more than is required of them, i. e. more than that which is absolutely good in itself. Thus, we may not only assert *in abstracto* that the young woman who devotes her life to taking care of the sick, or the missionary, does not thereby attain a higher degree of moral perfection than others who contribute but a mite towards the advancement of the kingdom of God. All depends in this respect on the individual, and on the position in which God has placed him. Thus, a young woman who, having an aged mother dependent on her care, should enter an order—such, for instance, as the Sisters of Mercy—would do a bad action. Of the woman who anointed him our Lord said himself, "She hath done what she could" (Mark xiv, 8). In Luke xvii, 10, he says, "When ye shall have done all those things which are commanded you, say, We are unprofitable servants." Of the stewards, it is required that they should be found faithful, and nothing else. Of Christ himself it is said that he was "obedient unto death, even the death of the cross" (Phil. ii, 8), and to be more than obedient is impossible, while to be less is to be disobedient. The contrary doctrine, which ascribes merits to man aside from the grace of God, is not only immoral, but positively irreligious. It is even illogical when looked at from the Roman Catholic standpoint, since (Möhler, p. 300) no living man ever accomplishes the whole law. See Janow, *De Regulis*; *Conf. Aug.* art. xxvii; *Apol.* n. 140, 163, 187, 269; *Art. Smalc.* iii, 3, 322; *Conf. Angl.* xiv.

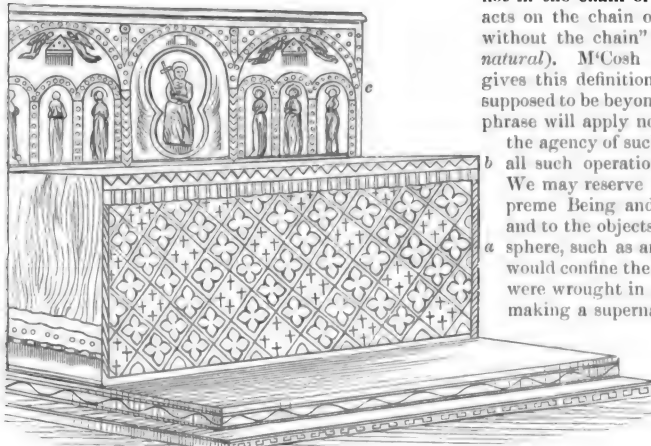

We should neglect one of the principal consequences of the theory of the *opus supererogativum* if we forgot to consider its relation to indulgences (q. v.). While the sacrament of penance and the absolution connected with it grant exemption from sin and from eternal punishment, the Church possesses a means of lessening or even remitting the temporal punishments required by divine justice by means of indulgences. These temporal punishments are otherwise to be undergone partly on this earth, as penances and ecclesiastical expiations (*pœnæ vindicativæ*), partly afterwards in purgatory (Perrone, ix, 2). But whence does the Church possess the power thus to set up as the "representative of God's mercy and justice in our time," and as such to exercise such a right of grace as is so far from being ecclesiastical in its character that it extends (under some restriction) even beyond this life? How can it defend the assumption of a *potestas conferendi indulgentias a Christo concessa*, mentioned in Conc. Trid. Sess. xxv? On this point they refer, as was already done by Alexander of Hales, to the *thesaurus supererogationis perfectorum* founded by the supererogatory merits of Christ and of the saints: "Est indulgentia remissio pœnæ temporalis adhuc post absolutionem sacramentalem peccatis debi-

tæ, in foro interno coram Deo valida, facta per applicationem thesauri Ecclesiæ a superiore legitimo" (Perrone, ix, 1). That there exists such a fund capable of atoning for all the sins of humanity, of any kind, the basis and foundation of which are the infinite merits of the Son of God as man, and of Christ in his saints (Klee, *Dogm.* ii, 335), is considered as *fidei proximum*. Aside from the fact that it is implicitly established by the sanction of indulgences (Conc. Trid. Sess. xxv, can. 21), it is confirmed by the express declarations of popes Clement VI (*Const. Unigenitus*), Leo X, Pius V, Gregory XIII, Pius VI, and Benedict XIV. See also Alex. Ales. pt. iv, qu. 23, a. 1, m. 1; Albertus Magnus, *Sent.* iv, dist. 20, a. 17, 18; Thomas Aquinas, pt. iii, qu. 25, a. 1; *Sent.* iv, dist. 20, qu. 1, a. 3; *Summ. adv. Gent.* iii, 156; Bonaventura, *Sent.* iv, dist. 20, pt. ii, qu. 1; Bellarmine, *De Indulg.* c. ii, iii; Veronius, *Regula Fidei*, ii, 4; Bossuet, *Exposition*, § 8; Ballerini [Peter], *Summ. Theol. Præl.* iii. Still there may remain some doubt as to whether the *merita* on which the system of indulgences rests is to be considered as active performances in the strict sense of the *opus supererogationis*, or as unmerited sufferings, such as those undergone by the saints, and which were not to be considered as punishments, but which thus served to atone beforehand for the faults afterwards committed by the universality of sinners. It is only in the first case that the doctrine of the *opus supererogationis* forms the basis of the system of indulgences, or the notion of the *opus supererogativum* must also embrace the superfluous sufferings of the perfect; and on this the orthodox writers of the Roman Catholic Church do not agree. In their polemical defences of the doctrine of a fund of merits, they mostly base themselves on the second consideration. If we leave these, we find in their other works so much that is obscure and indefinite on this as well as on most other points that it is impossible for Protestant expositors to attempt to define the doctrine of the Church without being at once accused by Roman Catholics of misunderstanding their authors. The same Möhler who in *Neue Untersuchungen*, § 68, derives the *thesaurus* from the excessive sufferings of some, in § 69, p. 411, considers good works as efficient as undeserved sufferings in freeing the yet ensnared members of the body of Christ. This is still more expressly asserted by Klee (*Dogm.* ii, 334) and Bellarmine (*De Monach.* c. vii, viii). And it could not be otherwise, for the *thesaurus*, that basis of indulgences, the product of the "merita Christi et sanctorum, quatenus hæc satisfactoria sunt," is alone "norunt theologi omnes opera bona esse meritoria, impetratoria, et satisfactoria." Thus the *opera supererogativa* contribute unquestionably to making up the fund of merits imparted to those who need it in the form of indulgences. "Les bonnes œuvres de tous les hommes, le sang des martyrs, les sacrifices et les larmes de l'innocence s'accablent sans relâche pour faire équilibre au mal. L'action de grâces, la prière, les satisfactions, les secours, les inspirations, la foi, l'espérance et l'amour circulent de l'un à l'autre comme des fleuves bienfaisans" (De Maistre, *Soirées de St.-Petersbourg*).

This doctrine of the *opus supererogationis* was attacked by Wycliffe (*Dial.* p. 287), and sharply criticised in Joh. von Wesel's *Adv. Indulg. Disput.* The position of the Reformers on that question may be seen in Melancthon (*Loci, De Satisfactione*) and Calvin (*Inst.* iii, 5). It was afterwards treated by Chemnitz (i, *De Bonis Opp.* qu. 3; ii, *De Indulg.*), Chamier (*Panstratia Cathol.* iii, lib. 24, *De Satisfactionibus Alienis*), and Jo. Gerhard (*Loc.* xv, 9, ed. Cotta). The Synod of Pistoja (*Propos. XLI*), in 1876, took the same views in the Roman Catholic Church. If Protestant polemicists have occasionally failed to observe that the vicarious satisfaction of the saints does not refer to sin itself, but to the temporal consequences of sin pardoned, this has, nevertheless, made no practical difference. We may also notice here the evident incongruity between the Roman Catholic essays on this subject and the fundamental truth of Christ's all-sufficient merits. For, admitting

the fundamental distinction made by the Thomists between *meritum de condigno* and *meritum de congruo*, since the merit of Christ remains still the active principle of the supererogatory merits of the saints, the latter cannot increase the *value* of the merits of Christ, but only the *quantity* or *number*. "Per modum cumuli adjiciuntur satisfactionibus Christi, quin istis ulla ratione derogetur." The merits of others, consequently, are reversible merely as satisfactory services, not as personal moral actions, and thus are looked upon only as means of application of the merits of Christ as manifested in supererogative works. "Non habent nisi rationem medii, quo Christi pretium nobis applicatur" (Bellarmine, *De Indulg.* i, 4, n. 4).—Herzog, *Real-Encyklop.* s. v. See MERIT.

**Superfrontalè**, a term applied to — 1. The back wall of the altar, which received either stone-reliefs or a metal covering with embossed designs and enamel-work. 2. The modern name for a covering for the top of the altar, which commonly hangs down about six inches all round and is fringed. It is ordinarily made of silk velvet, satin, or damask, and is placed over the three white linen cloths which customarily cover and preserve the altar slab.

Altar. (From St. Denis.)  
a, Frontal; b, Superfrontal No. 2; c, Superfrontal No. 1.

**Superhumeral Cloth**, a term used to designate the *amice* (q. v.).

**Superhumeralè**, a term for the archiepiscopal *pall* (q. v.).

**Superindicta** were taxes imposed by the Roman emperors, beyond the ordinary canonical taxes, upon great exigencies and extraordinary occasions. The ordinary taxes were called *indictiones*, so those extraordinary were called *superindictiones*. From these the clergy were universally exempted by several laws of the Christian emperors.—Bingham, *Christ. Antig.* bk. v, ch. iii, § 8.

**Superinspector**, a word by which Latin writers have translated *episcopus* (ἐπίσκοπος), or *bishop* (q. v.).

**Superinstitution** is, in the Anglican Church, the institution to a benefice over the head of a beneficiary supposed to be dead after prolonged absence.

**Superintendent**. 1. The officer of the early Church who was also called *overseer*, or *bishop* (ἐπίσκοπος). 2. The officer in the English Wesleyan Church who has charge of a circuit; he is responsible to the Conference for the maintenance of discipline and order in all the societies of the circuit, and presides as chief pastor in all circuit courts. The superintendent or one of his colleagues must make the circuit plan, arrange for the quarterly visitation of the classes, change or re-elect the stewards—the nomination being with himself, the

vote with the leaders' or quarterly meetings. All the minor details connected with the management of the circuit are in his hands. 3. An ecclesiastical superior in several Reformed churches where episcopacy is not admitted, particularly among the Lutherans in Germany and the Calvinists in some other places. The superintendent is similar to a bishop, only his power is somewhat more restrained than that of our diocesan bishops. He is the chief pastor, and has the direction of all the inferior pastors within his district or diocese.

**Superior**, an official exercising jurisdiction; the chief of a confraternity, brotherhood, sisterhood, monastery, or convent. In most orders the "superior" or other head of a convent is elected by the members of the convent, and the superiors in a province elect the provincial.

**Superioress**, a female superior of a convent or nunnery.

**Supernatural**. This is a word which is popularly used in opposition to "natural," things and events which are not within the ordinary concrete experience and knowledge of mankind being looked upon as forming part of a separate system of things and events. "That is supernatural, whatever it be, that is either not in the chain of natural cause and effect, or which acts on the chain of cause and effect in nature from without the chain" (Bushnell, *Nature and the Supernatural*). McCosh (*On the Supernatural*, p. 146, 147) gives this definition: "We may speak of whatever is supposed to be beyond the natural as *preternatural*. The phrase will apply not only to the divine action, but to the agency of such beings as ghosts and demons—to all such operations as witchcraft and necromancy. We may reserve the phrase *supernatural* to the Supreme Being and to the works performed by him, and to the objects created by him beyond the natural sphere, such as angels and the world to come. We would confine the word *miracle* to those events which were wrought in our world as a sign or proof of God making a supernatural interposition or a revelation

to man. We must not look upon creation as *supernatural*, but we do look upon it as *miraculous*." So far as our investigation pushes out into the world of nature, we find that law and order exist, and every increase of knowledge reveals to us further illustrations of the assertion that "order is to man. Belief in the supernatural does not, therefore, require us to believe in any violation of law, since all reasoning which starts from what we know leads to the conclusion that "supernatural phenomena are as much the result of law as phenomena which are called 'natural.'" See MIRACLE.

**Supernaturalist**, a name commonly given in Germany at the end of the last and the beginning of the present century to all who believed in supernatural agency as exerted in the inspiration of the Scriptures, the performance of the miracles therein recorded, etc. Their opponents are called *Antisupernaturalists*.

**Supernumerary PREACHER**. 1. In the Methodist Episcopal Church, a "supernumerary preacher is one who, because of impaired health, is temporarily unable to perform effective work. He may receive an appointment or be left without one, according to the judgment of the Annual Conference of which he is a member; but he shall have no claim upon the beneficiary funds of the Church except by vote of the Conference, and he shall be subject to all the limitations of the *Discipline* in respect to reappointment and continuance in the same charge that apply to effective preachers. In case he be left without an appointment, he shall have a seat in the Quarterly Conference, and all the privileges of membership in the place where he may reside" (*Discipline*, xviii, 1). In 1800, on motion of Dr. Coke, super-

numerary preachers, their widows and orphans, were to have the same support which was then accorded to effective preachers. The funds of the Conferences increasing, as well as the advantages of membership multiplying, great difficulties arose, and in 1860 the General Conference abolished the relation so far as the Annual Conferences were concerned. In 1864 the relation was restored with the definition at present given, with the provision that no supernumerary preacher shall have a claim upon the beneficiary funds of the Church without a vote of the Annual Conference. In 1876 the number of supernumerary preachers was reported at 701.

2. Among the English Wesleyans, in order to secure the relation of supernumerary the consent must be obtained of the May District Meeting. They receive a maintenance according to the number of years they have been in the active work. This is derived from the Annuitant Society, which is in reality their own life-assurance fund, and provides, to a certain extent, for the support and education of their children. Upon entering into business they are reckoned as local preachers, after four years as superannuated, and if members of the legal hundred, are superseded. They are under the supervision of the District Meeting; and if their names are on the minutes, they are members of the Quarterly, Local Preachers', and District Meetings. See Simpson, *Cyclop. of Methodism*, s. v.

**Superpellice** (or *Superpelliceum*), a SURPLICE (q. v.).

**Superpositio**, a word used in the ancient Church to designate a fast, which lasted not only through the day, but till the morning of the following day, or for several days together, as was usual in the Passion week. The stations, or fasts on stationary days, terminated at three o'clock in the afternoon. See FASTING; STATION.

**Superpurgation**, purgation or cleaning beyond what is needed.

**Super-alab**, or SUPER-TABLE. See ALTAR, PORTABLE.

**Superstition** (δαιδαμονία, *dæmon-terror*). Festus, governor of Judæa, informed Agrippa that Paul had disputed with the other Jews concerning matters of their own superstition (Acts xxv, 19), in which he spoke like a true pagan, equally ignorant of the Christian religion and of the Jewish. Paul, writing to the Colossians (ii, 23), recommends to them not to regard false teachers, who would persuade them to a compliance with human wisdom in an affected humility and superstition; and, speaking to the Athenians, he says, "I perceive that in all things ye are too superstitious" (Acts xvii, 22). The heathen idea of religion has always been one of terror. A superstitious man looks on God as a severe and rigid master, and obeys with fear and trembling. Varro says the pious man honors and loves God, the superstitious man dreads him, even to terror; and Maximus Tyrius observes that a man truly pious looks on God as a friend full of goodness, whereas the superstitious serves him with base and mean flattery. In the New Test., however, the word "superstition" or "superstitious" is used in a less offensive sense. Festus, a governor newly arrived in his province, would hardly have paid so ill a compliment to Agrippa, a king of the Jewish religion, as to call his religion superstitious; and when Paul at Athens tells the Areopagites that they are too superstitious, he uses a word no doubt susceptible of a good as well as of a bad sense, as it would have been highly indecorous, nor less unnecessary, to calumniate the religious disposition of his judges whom he was addressing. If we take the word in the sense of worship or reverence, Festus may say, "Paul and the Jews differ in respect of certain objects of spiritual reverence," and Paul may say, "I perceive ye are greatly attached to objects of spiritual reverence," not only without offence, but as a very graceful

X.—C

introduction to a discourse which proposed to describe the only proper object of such reverence. See PAUL.

The Hebrews were never given to such gross superstition as the heathen nations of antiquity; yet there are traces of the same weakness of the human mind in their various modes of divination (q. v.) and their views of possessed persons (q. v.). A special instance has been found in the case of Azazel (q. v.); also in the satyr (q. v.) and the night-monster (q. v.). See also SPECTRE.

The modern Mohammedans are given to superstitions. Those of Egypt may be found in Lane's *Modern Egyptians*, i, 322, 336, 376; ii, 283, 308, 312. In Palestine the peasantry have numerous superstitions: they believe in incantations, in charms, in divination by sand and other means, and in the evil eye, their children being left purposely dirty, or even besotted, in order to avoid the consequences of an envious look. The belief in spirits is also general. These include, first, the Jan, or powerful dæmon, good or bad, the latter kind having for bodies the tall smoke-pillars of the whirlwind, so commonly seen in summer; secondly, the Afrit, who is seemingly equivalent to a ghost; thirdly, the ghoul or hag of the cemetery, which feeds on the dead (a place haunted by one of these dæmons is carefully avoided, or at least never approached without the most polite salutations, intended to appease the unseen spirit); fourthly, there are Kerâd, or goblins, whose name is akin to the Arabic word for monkey; lastly, there is the Shaitân, or Satan, a name often applied to human beings of an evil disposition (Conder, *Tent Work in Palest.* ii, 233). See DÆMON.

On the general subject, see Xavier, *De Superstitione Judaica*. (Hamb. 1720); Reineccius, *id.* (pref. to Christiani's *Werke* [Leips. 1705]); Spizelius, *Δαιδαμονία Ebraeo-gentilis* (ibid. 1608); Manzel, *De Voce Δαιδαμονία* (Rost. 1758); and the monographs cited by Danz, *Wörterb.* s. v. "Aberglaube." See WITCH.

**SUPERSTITION** (Lat. *superstitio*) had for its ancient sense that of worship over and above that which was appointed by proper authority. Hence religious systems not recognised by the Roman State were called "superstitions," Christianity itself being for some centuries among the number. The word has been used so indefinitely that it is difficult to determine its precise meaning. It does not seem always to have been used in a bad sense in old English, as is shown by Acts xvii, 22, where it represents δαιδαμονία, a word used by the apostle as indicating that the Athenians were a God-fearing people who would not refuse to listen to his appeal about the "unknown God." Superstition must not be understood to mean an "excess of religion, as if any one could have too much of true religion, but any *misdirection* of religious feeling, manifested either in showing religious veneration or regard to objects which deserve none—that is, properly speaking, the worship of false gods—or in an excess of veneration for an object deserving some veneration, or the worship of God through the medium of improper rites and ceremonies" (Whately, *On Bacon*, p. 155). It is generally defined to be the observance of unnecessary and uncommanded rites and practices in religion; reverence of objects not fit for worship; too great nicety, fears, or scrupulousness; or extravagant devotions; or religion wrong directed or conducted. The word may be applied to the idolatry of the heathens, the traditions of the Jews, the unscriptural rites of the Catholics; to the dependence placed by many on baptism, the Lord's supper, and other ceremonies. It may be extended to those who, without any evidence, believe that prophecies are still uttered or miracles are performed. Some forms of intellectual scepticism involve superstition of a far more dangerous kind than that involved in the credulity of ignorant piety, as belief in witchcraft, magic, table-turning, spirit-rapping, etc.

Superstition, says Claude, usually springs either (1) from servile fear, which makes people believe that God

is always wrathful, and invents means to appease him; or (2) from a natural inclination we all have to idolatry, which makes men think they see some ray of the Divinity in extraordinary creatures, and on this account worship them; or (3) from hypocrisy, which makes men willing to discharge their obligations to God by grimace and by zeal for external services; or (4) from presumption, which makes men serve God after their own fancies. See Claude, *Essay on the Composition of a Sermon*, ii, 49, 299; Saurin, *Sermons* (Eng. ed.), v, 49; Gregory, *Essays*, Essay 3; Blunt, *Dict. of Hist. Theol.* s. v.; Buck, *Dict.* s. v.; Fleming, *Vocabulary of Phil. Science*, s. v.

**Supertōtus**, a long garment like a modern great-coat, resembling a straight-cut cloak in some particulars, worn over the secular and religious dress in mediæval times as a protection against the weather.

**Superville**, DANIEL DE, a Protestant theologian, was born at Saumur, in August, 1657, of a respectable Dutch family, and, being early designated for the sacred ministry, studied theology at Saumur and Geneva, and in 1683 was called to take charge of the Church of Loudun. On the Revocation of the Edict of Nantes, he took refuge in Rotterdam, whence he could not be drawn by offers from Berlin, Loudun, and Hamburg. In 1691 the authorities of the city created for him an express pastorate, which he occupied till his death, June 9, 1728. He was of a sweet disposition, a lively imagination, and a happy delivery. He published several sermons and devotional works, which are enumerated in Hoefer, *Nouv. Biog. Générale*, s. v.

**Supervisor Cantōrum**, the master of the choristers.

**Supervisor Opëris**, the superintendent of works, also called *magister operis*.

**Suph** (סֻפְּה), a sea-need [see FLAG], Jon. ii, 6) is the characteristic epithet of the Red Sea (q. v.), which abounds in sedge (Exod. x, 19, and often). In one passage (Deut. i, 1) it has been supposed by some to designate a place, but no locality of that name has been discovered, and most interpreters (with the Sept. and Vulg.) understand it there to stand for the Red Sea (by the omission of סֻפְּה, sea). So in Numb. xxi, 14, סֻפְּהָ, *suphâh* (Sept. Ζωόβ; Vulg. *Mare Rubrum*), some think a place (perhaps the same) to be indicated, but others with better reason render the word as an appellative, *storm*, i. e. violence (as in Job xxi, 18, and elsewhere).

**Supper** δειπνον (Mark vi, 21; Luke xiv, 12, 16; John xii, 2, etc.; sometimes rendered "feast"), a word used indifferently in the Homeric age for the early or the late meal, its special meaning being the *principal* meal. In later times, however, the term was applied exclusively to the late meal—the δόπρον of the Homeric age. It was the chief meal of the Jews, and also of the Greeks and Romans, being taken towards or at evening, after the labors of the day were over (Matt. xxiii, 6; Mark xii, 39; Luke xx, 46). In the New Test. it is also specially spoken of the paschal supper (John xiii, 2; iv, 21, 20), and of the Lord's supper (1 Cor. xi, 20); and of any meal (ver. 21); metaphorically of a marriage-feast, as figurative of the Messiah's kingdom (Rev. xix, 9); and of heaps of the slain as a feast for birds of prey (ver. 17). See SUP.

A modern Oriental supper-party is thus described by Lamartine: "Our apartments consisted of a pretty

Arab Repast.

court, decorated with Arabic pilasters, and with a spouting fountain in the centre falling into a large marble basin; round this court were three rooms and a divan, that is to say, a chamber larger than the others, formed by an arcade, which opened on the inner court, and which had neither door nor shutters to close it. It is a place of transition between the house and the street, serving as a garden to the lazy Mussulmans, its motionless shade supplying for them that of the trees, which they have neither the industry to plant nor energy to go and seek where nature herself causes them to grow. Our rooms, even in this magnificent palace, would have appeared ruinous to the poorest hut of our peasants; the windows had no glass, an unknown luxury in the East, notwithstanding the rigor of winter in these mountains; no beds, tables, or chairs; nothing but the naked walls, mouldering and riddled with rat and lizard holes; and as a floor, the beaten clay, uneven, and mixed with chopped straw. Slaves brought mats of rush, which they stretched upon this floor, and Damascus carpets, with which they covered the mats; they afterwards brought a small table of Bethlehem manufacture, made of wood, encrusted with mother-of-pearl. These tables are not half a foot either in diameter or in height; they resemble the trunk of a broken column, and are not capable of holding more than the tray on which the Mohammedans place the five or six dishes which compose their repasts. Our dinner, which was served on this table, consisted of a pilau, of a dish of sour milk mixed with oil, and certain gourds like our cucumbers, stuffed with hashed mutton and boiled rice. This is, in fact, the most desirable and savory food which one can eat in the East. No knives, spoons, or forks; they eat with the hands: but the repeated ablutions render this custom less revolting for the Mussulmans." See EATING.

**SUPPER OF THE LORD** (Κυριακὸν δειπνον), so called by Paul in his historical reference to the Passover supper as observed by Jesus on the night in which he was betrayed (1 Cor. xi, 20; Matt. xxvi, 20-31).

**I. Scriptural Statements.**—Several controverted points may perhaps be best adjusted by a connected harmony of the last Passover of the Lord, constructed from the evangelic narratives alluding to it, but filling up the various omitted circumstances from the known Passover rites. See PASSOVER.

"Now, when it was evening, Jesus sat down with the twelve (Matt.) apostles" (Mark). The first customary washing and purifications being performed, the blessing over the *first cup* of wine, which began the feast, would be pronounced, probably in the usual form—"We thank thee, O God, our Heavenly Father, who hast created the fruit of the vine." Considering the

peculiarity of the circumstances, and the genius of the new dispensation about to be established—that the great Teacher had already declared the superiority of simple forms to the involved traditions of the Jewish doctors, and that his disciples alone were present on this occasion—it may be supposed that, after the blessing over the herbs, the recital of the liturgy (or *hagadah*) explanatory of the redemption of their ancestors from Egyptian bondage would be somewhat simplified, and perhaps accompanied with new reflections.

Then probably the *second cup* of wine was mingled, and with the flesh of the paschal lamb, feast-offerings, and other viands, placed before the Lord. "And he said unto them, With desire have I desired to eat this Pascha with you before I suffer; for I say unto you, I shall no more eat thereof until it be fulfilled in the kingdom of God. And he took the [second] cup, and gave thanks, and said, Take this, and divide among you, for I say unto you, I will not henceforth drink of the fruit of the vine until the kingdom of God shall come" (Luke).

When the wine distributed to each would be drunk off, one of the unleavened cakes would next be broken, the blessing said over it, and a piece distributed to each disciple, probably with the usual formula—"This is the bread of affliction which your fathers did eat in the land of Egypt;" i. e. not the identical bread, transubstantiated, but a memorial or sign of it. The company would then proceed with the proper supper, eating of the feast-offering, and, after a benediction, of the paschal lamb.

The translation of the phrase *δείπνον γενομένου* (which immediately follows) by "supper being ended" has much confused the various narratives, and led many to think that Judas was present at the Lord's supper, properly so called. The true reading probably is *γινόμενον* (not *γενομένου*), as understood by the Arabic and Persic translators, in the sense "while supper was about," or "during supper-time."

"And as they were at supper, the devil having now put it into the heart of Judas to betray him; Jesus, knowing that the Father had given all things into his hands, and that he was come from God, and was going to God, riseth from supper; and," after due preparations, "began to wash the disciples' feet" (John). After this striking symbolic exhortation to humility and mutual service (John xiii, 6-20), "Jesus was troubled in spirit, and bare witness, and said, Verily, verily, I say unto you, that one of you will betray me. Then the disciples looked on one another, doubting of whom he spake" (John). "And they were very sorry, and began each of them to say unto him, Lord, is it I?" (Matt.). "One of the disciples, leaning back on Jesus' breast, saith unto him, Lord, is it I? Jesus answered, He it is to whom I shall give a sop, when I have dipped it. And after dipping the sop he giveth it to Judas Iscariot. Then Satan entered into him. Jesus saith unto him, What thou doest, do quickly. He then, on taking the sop, went immediately out; and it was night" (John).

The supper would then proceed until each had eaten sufficient of the paschal lamb and feast-offering.

"And as they were eating, Jesus took the bread," the other unleavened cake left unbroken, "and blessed" God "and brake it, and gave it to the" eleven "disciples, and said, Take eat; this is my body (Matt., Mark), which is broken for you: this do in remembrance of me" (Luke, Paul, 1 Cor. xi, 24).

The supper being concluded, the hands were usually washed the second time, and the *third cup*, or "cup of blessing" (1 Cor. x, 16) prepared, over which the master usually gave thanks for the covenant of circumcision and for the law given to Moses. Jesus, therefore, at this juncture announced, with peculiar appropriateness, his New Covenant.

"After the same manner, also, Jesus took the cup after supper, and, having given thanks, gave it to them,

saying, Drink all of you out of it; for this is my blood of the new covenant, which is shed for many for forgiveness of sins (Matt.): this do, as oft as ye drink, in remembrance of me" (1 Cor. xi, 24). "But I say unto you, I shall not drink henceforth of this fruit of the vine, until that day when I drink it new (*καινόν*) with you in my Father's kingdom" (Matt.).

"And when they had sung a hymn" (Matt.), probably the Hallel, our Lord discoursed long with his disciples about his approaching death and departure (John xiii, 31; xiv, 31); and when he had finished he said, "Arise, let us go hence." "And they went out on to the Mount of Olives" (Matt.).

II. *Ecclesiastical Usage.*—A multitude of disputes and controversies have existed in the Church, from the earliest ages of Christianity, regarding the nature, observance, and elements of the Lord's supper. On these points the reader may consult the following works: Pierce, Waterland, Cudworth, Hoadley, and Bell, *On the Eucharist*; Orme, *Lord's Supper Illustrated* (Lond. 1832); Goodman, *On the Eucharist* (ibid. 1841); Coleman, *Christ. Antiq.*; Halley, *On the Sacraments* (ibid. 1845); De Linde and Mearns, *Prize Essays on the Jewish Passover and Christian Eucharist* (ibid. 1845).

The early Church appears, from a vast preponderance of evidence, to have practiced communion weekly, on the Lord's day.

The custom, which prevailed during the first seven centuries, of mixing the wine with water, and in the Greek Church with *hot* water, appears to have originated with the ancient Jews, who mingled their thick wine with water (Mishna, *Terumoth*, xi). Maimonides (in *Chomets ve-Matsah*, § vii) states that the proportion of pure wine in every cup must not be less than the fourth part of a quarter of a hin, besides water which must needs be mingled, that the drinking of it may be *the more pleasant*. The raisin-wine often employed both by the ancient and modern Jews (*Arabah Turim*, § 483, date 1300) contains water of course. Remnants of this custom are still traceable in the East. The Nestorian Christians, as late as the 16th century, as we find from the old travellers, celebrated the eucharist in such wine, made by steeping raisins one night in water, the juice being pressed forth (Osorius, *De Reb. Emanuel*, lib. iii; Boter, *Rel.* ii, 3; Odoard Barbosa, ap. Ramm, i, 313; Brerewood, *On the Diversities of Languages* [1622], p. 147). The Christians of India (said to be converted by St. Thomas) used raisin-wine, as also do some of the Syrian churches at the present day (Ross, *Panseebia* [1683], p. 492; Ainsworth, *Travels in Asia Minor* [1842]). The third Council of Braga would not permit the use of the pure "fruit of the vine," for they condemned as heretics "those who used no *other wine* but what they pressed out of the clusters of grapes, which were then presented at the Lord's table" (Bingham, *Christ. Antiq.* bk. v, ch. ii). The wine used by our Lord was of course fermented, as no other could have been procured at that season of the year, and as it seems to be contrasted with the *new* wine of the heavenly kingdom (Matt. xxvi, 29). See WINE.

As regards the bread, many of the Eastern churches use unfermented bread in the communion. The Greek Church adopts a leavened bread, but the Roman Church has it unleavened; and this difference has been the cause of much controversy, though it seems easy to decide which kind was used by Jesus, the last supper having been on one of the 'days of unleavened bread,' when no other kind could be eaten in the land of Judaea." The Protestant churches, generally, pay little regard to the *nature* of the elements, but use the ordinary bread, as well as wine, of the country. It was probably from regarding in a similar way the bread and wine as mere ordinary beverage that some of the ancient sects gave up the wine altogether, and substituted other things. Epiphanius (*Heres.* 49) and Augustine (*Heres.* 28) mention an ancient sect of Christians in Phrygia, called Artotyrites, because they used bread

and cheese. Others made use of bread and water only; and the third Council of Braga (A.D. 675) condemns a custom of communicating in bread and milk. See **LORD'S SUPPER**.

**Supplicatio**, a solemn thanksgiving or supplication to the gods among the ancient Romans, on which occasion the temples were thrown open, and the statues of the gods carried on couches through the public streets that they might receive the prayers of the people. A *supplicatio* was appointed by the senate when a victory had been gained, or in times of public danger and distress.

**Supplication of Beggars** is a book which appeared mysteriously in London about A.D. 1527, setting forth the rapacity and licentiousness of the clergy. It eventually came into the hands of Henry VIII, who, after hearing it read, said, "If a man should pull down an old stone-wall, and begin at the lower part, the upper part might chance to fall upon his head," thus broadly intimating that the clergy were the foundations of the rotten old Church; and should an attempt be made to reform them, the whole structure would tumble down. See Burchard, *Hist. of Congregationalism*, i, 26.

**Supplication of Commons** is a notable book published in 1546, with the full title of *A Supplication of the Poor Commons to the King*. It was a sort of counterpart to the *Supplication of Beggars*, and made complaints against the character and conduct of the clergy, especially the monks. See Strype, *Memoirs*, i, 608-621; Burchard, *Hist. of Congregationalism*, i, 33.

**Supplicationēs** (Gr. *ἀντιλεία*), in its original signification, is but another name for *prayers* in general, of whatever kind, that either were made publicly in the church or by any private person. The term is applied both to litanies and short prayers, with brief petitions and responses. See **LITANY**.

**Supralapsarians**, persons who hold that God, without any regard to the good or evil works of men, has resolved, by an eternal decree, *supra lapsum*, antecedently to any knowledge of the fall of Adam, and independent of it, to reject some and save others; or, in other words, that God intended to glorify his justice in the condemnation of some, as well as his mercy in the salvation of others; and for that purpose decreed that Adam should necessarily fall. See **SUBLAPSARIANS**.

**Supramanya**, a Hindû deva, son of Siva, and sprung from the eye in the forehead of that god. He fought the giant Sura Parpma, and with the most powerful weapon of his father split him in two, after seven days of battle. The festival Kandershasta is celebrated in his honor.

**Supremacy, PAPAL**. The papists claim for the See of Rome, represented in the person of the pope, "a principality of power over all others, as the mother and mistress of all Christian churches;" and all other patriarchs are required to receive their palls from the Roman pontiff. This doctrine is chiefly built on the supposed primacy of Peter, of whom the pope is the pretended successor; a primacy so far from being countenanced by Scripture that we find it there absolutely forbidden (Luke xxii, 24; Mark ix, 35). The authority of the Roman See was first recognised by the fourth Lateran Council, A.D. 1215, and was first protested against by the authors of the Reformation. The title of "mother of churches," claimed by the Church of Rome, must certainly belong to the Church at Jerusalem, and was given to that Church by the second Council of Constantinople, A.D. 381. See **PRIMACY**.

**SUPREMACY, ROYAL**. In the Church of England all ecclesiastical jurisdiction is annexed to the crown; and it is ordained that no foreign potentate shall exercise any power, civil or religious, within the limits of that kingdom. Canon ii of the Church of England says:

"Whosoever shall hereafter affirm that the king's majesty hath not the same authority in causes ecclesiastical that the godly kings had among the Jews and Christian emperors of the primitive Church, or impeach any part of his regal supremacy in the said causes restored to the crown, and by the laws of this realm therein established, let him be excommunicated *ipso facto*, and not restored, but only by the archbishop, after his repentance and public revocation of those his wicked errors."

In the United States, of course, no supremacy or interference in spiritual affairs on the part of the civil authorities is recognised.

**Sur** (Heb. *Sûr*, סור, removed, as in Isa. xlix, 21; Sept. *ai ôdoi*; Vulg. *Sur*), the name of one of the gates of the Temple at Jerusalem (2 Kings xxiii, 6); called in the parallel passage (2 Chron. xxiii, 5) "the gate of the foundation," יסוד, *yesôd* (which is the preferable reading), being apparently that which led across to Zion by the causeway or bridge. See **TEMPLE**.

**Sur** (Σούρ; Vulg. omits), one of the places on the sea-coast of Palestine, which are named as having been disturbed at the approach of Holofernes with the Assyrian army (Judith ii, 28). It cannot be Tyre, the modern *Sûr*, since that is mentioned immediately before. Some have suggested *Dor*, others a place named *Sora*, mentioned by Stephanus of Byzantium as in Phœnicia, which they would identify with *Athlit*; others, again, *Sûrafend*. But none of these are satisfactory. The apocryphal character of the book itself makes us suspicious of the accuracy of the name. See **JUDITH**.

**Sura Deva**, in Hindû mythology, is the goddess of wine, who sprang out of the milk-sea when the mountain Mandar was cast into it, in order to prepare the drink amrita.

**Sura Parpma**, in Hindû mythology, is the giant with whom Supramanya (q. v.) fought. After he had been cut into pieces by the latter, one half changed itself into a peacock, and the other half into a cock. Siva used the first as an animal for riding, and the second served as a watcher for the house in which the wagon of Siva stood.

**Surcingle** is a band of black silk or stuff, fringed at the ends, and bound round the waists of the clergy so as to confine and keep the cassock in place.

**Surenhusius** (*Surenhus*), WILLEM, professor of Greek and Hebrew at Amsterdam, flourished in the end of the 17th and the beginning of the 18th century. He edited a beautifully printed edition of the *Mischna*, *sive totius Hebræorum Juris, Rituum, Antiquitatum, et Legum Oralium Systema, cum Clarissimorum Rubbinorum Maimonidis et Bartenoræ Commentariis Integris*, etc. (Amst. 1690-1703, 6 vols. fol.), which has ever since remained the best edition (see Wolf, *Bibl. Hebr.* ii, 886). He published also ספרי משנה, *sive Biβλος Καταλλαγῆς*, in quo secundum Vett. Theoll. Hebb. formulas allegandi et modos interpretandi conciliantur loca ex V. in N. T. allegata (ibid. 1713, 4to), a work of unsurpassed value on the subject to which it relates.

**Sureties** is a name given to sponsors in virtue of the security given through them to the Church that the baptized shall be "virtuously brought up to lead a godly and a Christian life." See **SPONSOR**.

**Surety** (some form of סר, *arab*, to barter, and especially to deposit a pledge, either in money, goods, or in part payment, as security for a bargain; ἔγγυος). "Suretyship" in the A. V. is usually the rendering for תוקים, *tokeim*, literally in marg. "those that strike (hands)," from תָּקַע, *to strike* (Gesenius, *Thesaur.* p. 1517). The phrase תְּשֻׁמֶת יָד, *tesûmeth yâd* (Sept. παραθήκη), "depositing in the hand," i. e. giving in pledge, may be understood to apply to the act of pledging, or virtual, though not personal, suretyship (Lev. vi, 2 [Heb. v, 21]). In the entire absence of commerce,

the law laid down no rules on the subject of suretyship; but it is evident that in the time of Solomon mercantile dealings had become so multiplied that suretyship in the commercial sense was common (Prov. vi, 1; xi, 15; xvii, 18; xx, 16; xxii, 26; xxvii, 13). But in older times the notion of one man becoming a surety for a service to be discharged by another was in full force (see Gen. xlv, 32), and it is probable that the same form of undertaking existed, viz. the giving the hand to (striking hands with), not, as Michaelis represents, the person who was to discharge the service—in the commercial sense the debtor—but the person to whom it was due, the creditor (Job xvii, 8; Prov. vi, 1; Michaelis, *Laws of Moses*, § 151, ii, 322, ed. Smith). The surety, of course, became liable for his client's debts in case of his failure. In later Jewish times the system had become common, and caused much distress in many instances, yet the duty of suretyship in certain cases is recognised as valid (Ecclus. viii, 13; xxix, 14, 15, 16, 18, 19). See PLEDGE.

The earliest form of suretyship mentioned in Scripture is the pledging of person for person, as when Judah undertook with his father to be surety for Benjamin (עֲרָבָה, *I will exchange for him*, put myself in place of him, Gen. xliii, 9); and when circumstances emerged which seemed to call for the fulfilment of the obligation, he actually offered himself in the room of Benjamin. In this sense the psalmist asks God to be surety for him for good (Psa. cxix, 122), as did also, in his great distress, Hezekiah (Isa. xxxviii, 14), though the sense here is a little weakened in the A. V. by the rendering "undertake for me." More commonly, however, the kind of suretyship spoken of had reference to pecuniary obligations or debts, and forms the subject of prudent advice and warnings in the book of Proverbs (vi, 1; xi, 15; xvii, 18; xx, 16). In the first of these passages, the dangerous practice of entering into sureties is put in two forms—first, "if thou be surety for thy friend," then "if thou hast stricken thy hand with a stranger;" there being no further difference between them than that the one has respect to the thing itself, the other to the mode of going about it: the person agreeing to become surety gave his hand to his friend. Hence, also, in Prov. xvii, 18, a man "who strikes hands," that is, readily becomes a surety, is declared to be void of understanding. In the highest sense the term is applied to Christ, who, in his character as mediator, is represented as "the surety (ἑγγυος) of a better covenant" (Heb. vii, 22), having made himself responsible for all that in this covenant was required to be accomplished for the salvation of those who were to share in its provisions. See MEDIATION.

**SURETTY.** In the ancient Church the clergy were forbidden to be bondsmen or sureties for any other man's appearance in court, because it was thought that such sort of encumbrances might bring detriment to the Church in distracting her ministers from constant attendance upon divine service.

**Surin, JEAN JOSEPH**, a French ascetic writer, was born at Bordeaux in 1600, entered the Order of the Jesuits at fifteen years of age, and soon distinguished himself by his profound piety and knowledge of human nature. In 1634 he was sent to take charge of the Ursuline convent in London, and began a series of exorcisms against the evil spirits supposed to prevail there, but eventually became himself the victim of the dæmoniacal possession, and was required to return to Bordeaux. In 1637 he again went to London, and remained there, with partial seasons of lucidity, for many years, but was at length removed from place to place in hopes of relief. He recovered his sanity in 1658, and died at Bordeaux, April 21, 1665, leaving several works on practical religion, which are enumerated in Hofer, *Nouv. Biog. Générale*, s. v.

**Surinam (Negro-English) Version.** Negro-English, or, as it might be designated with equal propriety,

Negro-Dutch, is the language of the Dutch colony of Surinam, in Guiana, and is current among a population of at least 100,000 people. Ever since 1788 there has existed in Surinam a mission of the United Brethren. The language is a compound of English and Dutch, with a sprinkling of Spanish, Portuguese, French, and African or Indian words. Prior to the year 1813, the greater part of the New Test. was translated into that language. In 1828 Moravian missionaries completed a version of the entire New Test. The MS. was sent to Germany, and was revised by Hans Wied, who for upwards of twenty years had resided in Surinam, and who expressed the opinion that the translation was "as perfect as possible." With the aid of the British and Foreign Bible Society, an edition of 1000 copies was printed in London. This edition was soon exhausted, and, as a result of these publications, more than 12,000 converts were added to the Church. Another edition of the New Test. and Psalms was prepared by the Moravian missionary Treu, and, with the aid of the Netherlands and the British and Foreign Bible societies, 2000 copies were printed in 1846. Whether the Old Test. has been translated and printed, we are not able to say. (B. P.)

**Surius, LAURENTIUS**, a Carthusian monk, was the child of Lutheran, or, as others say, of Romish parents. He was born at Lubeck in 1522, and educated at Frankfurt-on-the-Oder and at Cologne. At the latter place he became acquainted with Canisius (q. v.), and joined the Roman Catholic Church. In 1542 he entered the Carthusian Order and devoted himself to monastic asceticism and literary labor. He displayed both zeal for Romanism and hatred for the Reformation, whose leaders he charged with having borrowed their doctrines from Mohammed. Besides translating various mystical writings by Tauler, Ruysbroeck, Suso, etc., Surius composed a *Commentarius Brevis Rerum in Orbe Gestarum ab Anno 1500* (Lov. 1566). This book was designed to oppose the famous Protestant work by Sleidan (q. v.), but was devoid of any particular value; but it was, nevertheless, carried forward by Isselt and others to 1673. Additional works by Surius are, *Homiliæ sive Conciones Præstantissimorum Eccl. Doctorum*, etc. (Col. 1569-76). — *Concilia Omnia*, etc. (ibid. 1567); — and *Vitæ Sanctorum ab Aloysio Lipomanno olim Conscriptæ* (ibid. 1570-76, 6 vols. fol.), which was repeatedly reprinted, the best edition being that of Cologne, 1618. A seventh vol. was added after the death of Surius by the Carthusian Jacob Mosander. Surius died May 23, 1578. See *Biog. Universelle*, tom. xlv (Par. 1826); and Herzog, *Real-Encyklop.* s. v.

**Surlet (de Chokier)**, the name of an old French family, which dates from the year 1170, and culminated in the person of Fastré Baré de Surlet, who died about 1473. The emperor Ferdinand II ennobled the family of Surlet in 1630 with the title de *Chokier*. The following members deserve mention here:

1. JEAN, born at Liege, Jan. 14, 1571, studied at Louvain, and took his degrees at Orleans. He became canon of St. Lambert, abbé of St. Hadelin of Visé, and vicar-general of the diocese of Liege, where he distinguished himself by his zealous charity and erudition. He died about 1655, leaving several works on ecclesiastical matters, for which see Hofer, *Nouv. Biog. Générale*, s. v.

2. JEAN ERNEST, nephew of the preceding, became canon of Liege and abbé of Visé. He founded the house of the Incurables and that of the Filles Repenties at Liege, and died about 1683.

3. JEAN FRÉDÉRIC, uncle of Jean, was a learned canon of Liege, who wrote *Enchiridion Præcationum* (Liege, 1636), and died March 15, 1635.

**Surname.** Names were at first expressive, as those of Scripture. According to Du Cange, surnames were originally written, not after the Christian-name, but above it, and so were "supernomina"—overnames. The first or Christian name is usually given in bap-

**tism.** Hereditary surnames did not exist in England till after the Norman Conquest. They are taken from locality, as Field or Forest; from occupation, as Fisher or Miller, Pilgrim or Palmer; from personal qualities, as Black or Brown; from natural objects, as Lemon or Lamb, Peel or Hog, Steel or Jewel, etc. As distinct from the surname, the sirname or sire's-name is a natural addition, with son, Mac, or Fitz, O, ap, wich, or sky (all signifying son), as Donaldson or Macdonald, Fitzgerald, O'Connell, Alexandrowich, Petrousky — ap Howel becoming Powel, and ap Richard becoming Prichard.

**Surplice** (Lat. *superpelliceum*, over the pelisse), a long, loose linen garment worn by clergymen of the Church of England during the performance of divine service. Surplices are also worn by the fellows of colleges or halls, and by all the scholars and students in the universities of Oxford and Cambridge upon Sundays, holidays, and even during their attendance at the college chapels or churches. It is also worn for the service of the choir. Its use dates back to an early day. Paulinus sent a lamb's-wool coat to Severus, and Ambrose complains of the use of beaver skins and silk dresses. The white garment of the clergy is mentioned by Gregory Nazianzen, Jerome, Clement of Alexandria, Honorius, and Ivo of Chartres. The Council of Basle required the surplice to reach below the middle of the thigh. The Gilbertines wore a hooded surplice. At Burgos, in summer, the canons wear, instead of a cope and mozzetta (their winter habit), a sleeved surplice raised on the shoulders. The name is first mentioned by Odo of Paris and Stephen of Tournay, in the 12th century. The origin of the surplice is thus given by Durand: "It was so called because anciently this garment was put upon leathern coats made of the skins of dead animals (*super tunicas pellicas de pellibus mortuorum animalium factas*), symbolically to represent that the sin of our first parents, which brought man under the necessity of wearing garments of skin, was now hid and covered by the robe of Christ's innocence and grace." The name and color (white) signify holiness of life joined to penitence. The use of the surplice was strongly objected to by the Calvinistic and Zwinglian reformers on the Continent, and by the Puritans in England, who regarded it as a relic of popery. The argument against it is to be found in Beza, *Tractat. Theolog.* iii, 29; and its defence in Hooker, *Eccles. Polity*, v, 29. Much controversy has been held of late years as to the propriety of the surplice being worn by the preacher in the pulpit, which is contrary to the more general practice of the Anglican Church. The surplice and alb (q. v.) are slight variations of what was originally one vestment. Foreign surplices are much shorter than those used in England. In Italy the short surplice is called a *cotta*. See ORNAMENTS, ECCLESIASTICAL.

**Surplice-fee** is a fee paid to the clergy for occasional duties. This seems to have been unknown in the ancient Church; indeed, several laws were passed by the early Church commanding the gratuitous performance of all religious offices.

**Surrogate** is a name (meaning one substituted, or appointed in the place of another) commonly applied in ecclesiastical usage to an officer delegated by the bishop to grant licenses for marriages, probates of wills, etc., in large towns. A surrogate is, properly speaking, the deputy or substitute of an ecclesiastical judge.

**Sursum Corda.** In the ancient service of the Church, it was the duty of the deacon to summon each class of worshippers separately to engage in prayer by saying, "Let us pray." Other forms for announcing the time of prayer were also used, as "Give audience," "Lift your heart" (*Sursum corda*). This rite is described in detail in the eighth book of the *Apostolical Constitutions*, where it is said that the high-priest or celebrant at mass says, "Lift up your hearts," and the faithful respond, "We lift them up unto the Lord." In

its English form it is found in the Communion Service of the Church of England.

**Surtur**, in Norse mythology, is the mighty ruler of Muspelheim, the implacable enemy of the asas, who, in the conflagration of the universe, will lead the armies of the sons of Muspel, join himself with the serpent Midgard and the wolf Fenris, assail the residences of the gods, besiege all the asas in a tremendous battle, and finally bring on the overthrow of the world. See NORSE MYTHOLOGY.

**Surya**, in Hindû mythology, is the sun (not the sun-god, for that is called Indra), which in India is an object of worship as the celestial genius. He rides in a car drawn by seven green horses, whose leader is called Arun. A thousand genii are in his train, who adore him and sing hymns to him. Surya is often removed from his car, and has impressed the earth with numerous legends of his power. He has many names, among which, however, the following twelve are chief, indicating his attributes in various relations, and also measurably the months: Varuna, Surya, Vedang, Bhanu, Indra, Ravi, Gobasti, Yama, Svarna reta, Divakai, Mitra, and Vishnu (in the permanent sense of the word). Among all nations we find at the lowest stages the powers of nature, and especially the heavenly bodies, adored as mighty deities. See URANOLATRY.

**Sus.** See CRANE; HORSE.

**Su'sa** (Esth. xi, 8; xvi, 18). See SHUSHAN.

**Su'sanchite** (Chald. only in the emphat. plur., *Susankayê*, שושנקי; Sept. Σουσαναχῆται; Vulg. *Susanechæi*) is found once only (in Ezra iv, 9, where it occurs among the list of the nations whom the Assyrians had settled in Samaria, and whose descendants still occupied the country in the reign of the Pseudo-Smerdis). There can be no doubt that it designates the *Susians*, either the inhabitants of the city Susa or those of the country (Sisis or Susiana) of which Susa was the capital. Perhaps as the Elamites are mentioned in the same passage, and as Daniel (viii, 2) seems to call the country Elam and the city Shushan (or Susa), the former explanation is preferable. See SHUSHAN.

**Susan'na** (Σουσάννα v. r. Σωσάννα; i. e. שושנה, *Shoshannâh*, a lily [q. v.]), the name of two females in the Bible. The name likewise occurs in Diod. Sic. as that of the daughter of Ninus (ii, 6); and *Sheshan* (1 Chron. ii, 31, 34, 35) is of the same origin and meaning (Gesen. *Thesaur.* s. v.).

1. The heroine of the story of the Judgment of Daniel in the Apocrypha, otherwise called

SUSANNA, THE HISTORY OF, being one of the appendices to the canonical book of Daniel. See DANIEL, APOCRYPHAL ADDITIONS TO.

1. *Title and Position.*—This Apocryphal piece has different titles. Sometimes it is called (Σουσάννα) *Susanna*, sometimes (Δανιήλ) *Daniel*, and sometimes (Διάκρισις Δανιήλ) *The Judgment of Daniel*. Equally uncertain is its position. The Vat. and Alex. MSS. and the Vet. Lat. place it before the first chapter of Daniel, while the Sept., after the Cod. Chisianus and Theodotion, ed. Complu., put it after ch. xii.

2. *Design.*—The object of this attractive story is to celebrate the triumph of womanly virtue over temptations and dangers, and to exalt the wisdom of Daniel in saving the life of the pious heroine. Chrysostom rightly sets forth the beautiful lesson of chastity which this story affords, when he says, "God permitted this trial, that he might publish Susanna's virtue and the others' incontinence; and, at the same time, by her exemplary conduct, give a pattern to the sex of the like resolution and constancy in case of temptation" (*Serm. de Susanna*). The story of Susanna is therefore read in the Roman Church on the vigil of the fourth Sunday in Lent, and in the Anglican Church on Nov. 22.

3. *Character, Author, Date, and Original Language.*—Though the form of this story, as we now have it, shows that it is greatly embellished, yet there is every reason to believe that it is not wholly fictitious, but based upon fact. The paronomasias in Daniel's examination of the elders, when he is represented as saying to the one who affirmed he saw the crime committed, *ἦν ὄξινον, under a mastich-tree*, "the angel of God hath received sentence of God, *οὐρανὸν σε μέσον, to cut thee in two*;" and to the other, who asserted he saw it committed, *ἦν πῖνον, under a holm-tree*, "the angel of the Lord waiteth with the sword, *πῖσαν σε μέσον, to cut thee in two*," only prove that the Greek is an elaboration of an old Hebrew story, but not that it originated with the Alexandrine translator of Daniel. The Song of Solomon may have suggested material to the author. The opinion of Eusebius, Apollinarius, and Jerome, that the prophet Habakkuk is the author of the History of Susanna is evidently derived from the Greek inscription of the History of Bel and the Dragon. See APOCRYPHA.

2. One of the women who ministered to our Lord's personal wants out of their private means (Luke viii, 2, 3). A.D. 28.

SUSANNA was held by the ancient Church to be a symbol of resurrection, and also a type of the persecuted Church—the two elders representing the pagans and the Jews. Representations of her are frequently found in France, in cemeteries, on sarcophagi. She is sometimes standing between two old men, sometimes between two trees behind which the men are hiding. Sometimes she is represented as a lamb between a fox and a leopard. In France she still appears as the representative of the Christian Church, the persecutors being Arians, Goths, and Vandals.—Martigny, *Dict. des Antiq. Chrét. s. v.*

Antique Representations of Susanna.

**Susceptōrēs** (receivers), a term applied—1. To deaconesses, who assisted in undressing and dressing candidates for baptism, in anointing, and the like. 2. To sponsors, with special reference to the services rendered immediately before and after the rite of baptism.

**Su'si** (Heb. *Susi*, סוסי, *horseman*; Sept. Σουσί), the father of Gaddi, which latter was the commissioner from the tribe of Manasseh to explore Canaan the first time (Numb. xiii, 11). B.C. ante 1657.

**Susil**, FRANZ, a Roman Catholic divine, was born in 1804 at Neu-Rausnitz, near Austerlitz. In 1827 he re-

ceived holy orders, and in 1837 was appointed professor at Brünn. He died June 1, 1868, at Bystric, in Moravia. Susil was one of the most prominent theologians and poets of Moravia. Of his works, which are all written in the Czechian language, we mention the *Works of the Apostolic Fathers* (1837, and often):—*Ecclesiastical Hymns* (1846; 2d ed. 1859):—and a *Commentary on the Gospels* (1864-67), 4 vols. See *Literarischer Handweiser für das katholische Deutschland*, 1868, No. 69, p. 307 sq. (B. P.)

**Suso**, HEINRICH, a Mystic, was born March 21, 1300, at Constance. His real name was *Von Berg*; but, having been greatly influenced by the tender piety of his mother, he assumed her name when her death, in his eighteenth year, caused him to seek satisfaction for his soul in inward peace. He had been a student at Constance and Cologne, and now was strongly influenced by Master Eckart; but imagination and feeling were more powerful with him than the speculative faculty. His mysticism required a concrete form in which to clothe the idea, and such he found in the "wisdom" of the writings of Solomon. Identifying this "eternal wisdom" now with Christ and again with the Blessed Virgin, he expended upon it his love and the devotion of his life. He graved upon his breast, with an iron pencil, the name of Jesus. Having returned to the Convent of Constance, he gave himself to solitary mortifications, and had many visions. While there he also wrote his (German) book *On the Eternal Wisdom*, in 1338, which was designed to teach pious souls how to imitate Christ in his sufferings. Having reached the age of forty years, he concluded his penances and became a preacher, or, as he phrased it, "a knight of God," and his labors were largely beneficial to the community. He entered into relations with other mystical teachers, especially Tauler and Heinrich von Nördlingen. He induced many noble ladies to devote themselves to a quiet and charitable life, aided in the formation of organizations of the Friends of God (q. v.), and founded a Brotherhood of the Eternal Wisdom, for which he composed a rule and a number of prayers. These labors exposed him to criticism and even dangers. He was even accused of disseminating the heretical teachings of the Brothers of the Free Spirit (q. v.). In his latter days he was chosen prior of his convent. Soon afterwards he related the history of his inner and outer life to his friend the nun Elizabeth Stäglin, and she wrote the narrative without his knowledge; but it was subsequently revised and completed by his hand, and received into the collection of his works as part first. Part second was the book of *Eternal Wisdom*; part third, his book of *Truth*, like the other in dialogue form, and intended to satisfy the inquiries of a disciple of the truth. The conclusion consists of several miscellaneous letters. Suso died Jan. 25, 1365, in the Dominican convent at Ulm. His writings evince no connected system. His matter is generally borrowed, and only the imaginative, romantic style is peculiar to him. His fundamental idea is that of Eckart, that *being* forms the highest conception, and that *being* is God. All created being is a mirror of God, and to recognise God in this mirror is to *speculate*. No name can exhaust the idea of God. He is equally "an eternal nothing" and the "most essential something;" he is a "ring whose centre is everywhere and whose circumference is nowhere." To gaze upon God is the highest joy. Creatures are eternal in God as their "Exemplar," and they have no distinguishing qualities until after their "outflow" from God, when they have entered into the creature state. They all have the yearning to return into their original and restore the interrupted unity. Similar is Suso's representation of the Trinity. The Son is the Eternal Word which proceeds from the Father; the love which reunites them is the Holy Spirit. The sin-stained human soul can find no other way to God than Christ, and more particularly than the imitation of his sufferings. The distinction between Creator and creat-

ure never ceases, however; so that, despite his mystical spirit, Suso does not cross the line where the pantheistic blending of the created and the Eternal Spirit begins. Suso was, in brief, the representative of poetic mysticism—a real poet, who is unable to apprehend an idea without clothing it in symbolic form; and he was in no true sense either a philosopher or a practical man of affairs. Suso's writings appeared at Augsburg, 1482 and 1512, fol. Diepenbrock published them in 1829 at Ratibon (2d ed. 1838); in Latin, by Surius (q. v.), 1555 and often. From the Latin they were rendered into French and Italian, and even into German again. A book, *Von den neun Felsen* (*Of the Nine Rocks*), which was long attributed to Suso, was written in 1392 by the Strasburger Rulman Merswin.—Herzog, *Real-Encyclop.* s. v.

**Suspension**, an ecclesiastical act of two kinds: 1. One of the several sorts of punishment inflicted upon offending members of the clergy. This relates either to the revenues of the clergyman or to his office, and hence is called *suspensio a beneficio* and *suspensio ab officio*. Suspension from benefice deprives the offender of the whole or a part of his revenue. Suspension from office is various: *ab ordine*, where a clerk cannot exercise his ministry at all; *ab officio*, where he is forbidden to exercise it in his charge or cure. In all these cases the incumbent retains his order, rank, and benefice in distinction to the penalties of solemn deposal and degradation, by which he forfeits all rights of his order and benefice. All persons who can excommunicate can suspend. Suspension must be preceded by a monition, and its cause must be stated in the formal act: "Forasmuch as you have been proved to have committed such and such things, therefore we suspend you from the office and execution of your orders." Every act of jurisdiction, such as absolution, is null and void during suspension, if it has been publicly announced; but the ministration of baptism or communion is valid. Suspension is removed by absolution, by revocation of the sentence, by expiration of its time, and by dispensation. 2. The other sort of suspension, which extends also to the laity, is suspension from entering a consecrated building, church, or chapel, or from hearing divine service, "commonly called mass," and from receiving the holy sacrament; which, therefore, may be called a temporary excommunication. See André, *Du Droit Canonique*, i, 943; ii, 1110; Maillane, *Du Droit Canonique*, v, 352; Blunt, *Dict. of Doctrinal Theology*, s. v.; Riddle, *Christ. Antiq.* p. 342.

**Suspicion** consists in imagining evil of others without proof. It is sometimes opposed to charity, which thinketh no evil. "A suspicious temper checks in the bud every kind affection; it hardens the heart, and estranges man from man. What friendship can we expect from him who views all our conduct with distrustful eyes, and ascribes every benefit we confer to artifice and stratagem? A candid man is accustomed to view the characters of his neighbors in the most favorable light, and is like one who dwells amid those beautiful scenes of nature on which the eye rests with pleasure. On the contrary, the suspicious man, having his imagination filled with all the shocking forms of human falsehood, deceit, and treachery, resembles the traveller in the wilderness who discerns no objects around him but what are either dreary or terrible; caverns that open, serpents that hiss, and beasts of prey that howl." See Barrow, *Sermons*; Gisborne, *Sermons*; Dwight, *Theology*; James, *On Charity*.

**Sustentation Fund**. 1. *English Wesleyan*.—A fund formed in the several districts which has for its object the raising of such an amount in each district as, being divided among the poorer circuits, will secure to their preachers a much larger salary than could be paid them without supplementary aid. The whole is under the supervision of Conference. 2. *Free Church of Scotland*.—A fund provided for the support of ministers of that Church. The idea was probably derived by Dr. Chal-

mers from the Wesleys; and a scheme was devised by him and made public before the Disruption, and is now carried into operation throughout Scotland. The amount of this fund for 1873 to 1874 was £152,112.

**Sutcliffe** (or **Soutcliffe**), **Matthew**, an English divine, was educated at Trinity College, Cambridge. In 1586 he was installed archdeacon of Taunton, and on Oct. 22, 1588, confirmed dean of Exeter. He died in 1629. He acquired some celebrity by his *College of Polemical Divines*, which came to naught shortly after his death. Among his works are, *A Treatise of Ecclesiastical Discipline* (Lond. 1591, 4to):—*De Presbyterio, ejusque Nova in Ecclesia Christiana Politia* (ibid. 1591, 4to):—*De Catholica et Orthodoxa Christi Ecclesia* (ibid. 1592, 2 vols.):—*De Pontificis Injusta Dominatione in Ecclesia, contra Bellarminum* (ibid. 1599, 5 vols.):—*De Turco-Papismo, or Resemblance between Mahometanism and Popery* (ibid. 1599, 4to):—*De Purgatorio*, etc. (ibid. 1599, 4to):—*De Vera Christi Ecclesia* (ibid. 1600, 4to):—*De Missa, adversus Bellarminum* (ibid. 1603, 4to):—*De Indulgentiis et Jubilæo* (ibid. 1606, 2 vols. 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Sutcliffe**, **Robert Burns**, a minister of the Methodist Episcopal Church, was born in Yorkshire, England, in 1815, and came to America in 1835, settling in Trenton, N. J. In 1854 he was admitted on trial into the New Jersey Conference, and was actively employed up to the time of his death, which occurred at Vincenttown, Feb. 18, 1874. See *Minutes of Annual Conferences*, 1874, p. 36.

**Suthdure** (*Sax. south door*), the place where canonical purgation was performed. When a fact charged against a person was unproved, the accused was brought to the south door of his parish church, and then, in the presence of the faithful, made oath of his innocence. This is one reason why large south porches are found in ancient churches.

**Suthreh Shahis**, a division of the Sikhs in Hindustan whose priests may be known by particular marks. Thus they make a perpendicular black streak down the forehead, and carry two small black sticks, each about half a yard in length, with which they make a noise when they solicit alms. They lead a wandering life, begging and singing songs in the Punjabi and other dialects, mostly of a moral and mystic tendency. They are held in great contempt, and are frequently disreputable in character. They consider Tegg Bahader, the father of Guru Govind, as their father.

**Sutphen**, **Joseph Walworth**, a Presbyterian minister, was born at Sweden, N. Y., in 1825. He entered Hamilton College, and graduated in 1847; after which he entered the Union Theological Seminary, in 1848; from whence he graduated in 1851. He was ordained with a view of his entering the foreign field as missionary, and on Nov. 7, 1851, departed for Marsovan, in the Turkish empire. His service was brief, as he had but scarcely begun his labors when he was called to the heavenly world.

**Sutphen**, **Morris Crater**, D.D., a Presbyterian minister, was born Dec. 1, 1837, at Bedminster, N. J. He united with the Church Aug. 16, 1855. He graduated from Princeton College in 1856. After teaching in a private family in Virginia, he entered Princeton Theological Seminary, from whence he graduated after a three years' course. In both college and seminary he gained a high position as a scholar. He was licensed by the Presbytery of Elizabethtown, at Rahway, N. J., and on May 1, 1860, was ordained by the Presbytery of Philadelphia, and installed as collegiate pastor of the Spring Garden Church in that city, to serve as co-pastor with the venerable John McDowell, D.D., at whose death, Feb. 13, 1863, he became sole pastor. After a pastorate of great fidelity and fruitfulness, in which he became quite popular, he became collegiate pastor with

the venerable J. McElroy, D.D., of the Scotch Church in New York, and was installed April 28, 1866. He was obliged to resign in 1872, on account of aphonia, which a journey to Europe failed to remedy. After his return he spent a winter in Florida, and made an effort to supply the pulpit of the Jacksonville Church, but was obliged to relinquish it. Returning to the North, his health continued to fail, and he died at Morristown, N. J., June 18, 1875. Dr. Sutphen was a talented, popular, and useful preacher, a man of genial spirit, a Christian gentleman, a laborious pastor, and a hard student, and was successful in all departments of Christian work. He was offered the presidency of three colleges, and at one time a professorship in one of the theological seminaries of the Church, but to none of these did he consider his health adequate. He was engaged during the latter part of his life in preparing a *Manual of Family Worship*. (W. P. S.)

**Sutra** is the second division of the sacred writings of the Buddhists, addressed to the laity. The following will show how these sacred writings are classified: The *Dhamma*, divided into the *Suttani* and *Abhidhammi*; again divided into—1. *Winaya*, or discipline; 2. *Sutra*, or discourses; 3. *Abhidhamma*, or pre-eminent truths. The Sutra Pitaka contains seven sections, called *Sangis*; and, including both text and commentary, has 396,500 stanzas. See Hardy, *Eastern Monachism*.

**Sutri** (near Rome), COUNCIL OF (*Concilium Sutrinum*), was held in December, 1046, by Henry the Black, king of Germany. Gregory VI was invited to this council, and came, hoping to be recognised as sole pontiff; but, finding various difficulties and obstacles in the way, he renounced the papacy, stripped himself of his ornaments, and gave back the pastoral staff, after having held the papal chair about twenty months. After the council, Henry, accompanied by the prelates who had been present, went to Rome, and by common consent of the Romans and Germans, Suidger was elected pope, who took the name of Clement II, and was consecrated on Christmas-day. See Mansi, *Concil.* ix, 943; Baronius, *Annal.* A.D. 1046.

**Suttee** (Sansk. *sati*, *virtuous*, i. e. wife), the name given in Hindustan to a woman who voluntarily sacrifices herself by burning upon the funeral pyre of her husband, and also to the rite itself. The practice has not been confined to India, where it has had effect for many centuries, but has existed in other countries. Diodorus Siculus gives an instance which occurred in the army of Eumenes more than 300 years B.C. The period of its origin in India is unknown, though it is certainly of great antiquity. Although the practice is not enjoined by their sacred books, yet it is based by the orthodox Hindûs on the injunction of their Shastras, and there can be no doubt that various passages in their Purânas and codes of law countenance the belief which they entertain of its merit and efficiency. Thus the *Brahma-Purâna* says, "No other way is known for a virtuous woman after the death of her husband; the separate cremation of her husband would be lost (to all religious intents). If her lord die in another country, let the faithful wife place his sandals on her breast, and, pure, enter the fire." The faithful widow is pronounced no suicide by the recited text of the *Rig-Veda*. The code of Vyâsa says, "Learn the power of that widow who, learning that her husband has deceased and been burned in another region, speedily casts herself into the fire." And the code of Angiras, "That woman who, on the death of her husband, ascends the same burning pile with him is exalted to heaven, as equal in virtue to Arundhati (the wife of Vasishtha). She follows her husband to heaven, and will dwell in a region of joy for so many years as there are hairs on a human body, viz. thirty-five millions. As long as a woman (in her successive migrations) shall decline burning herself, like a faithful wife, on the same fire with her deceased lord,

so long shall she not be exempted from springing again to life in the body of some female animal. When their lords have departed at the fated time of attaining heaven, no other way but entering the same fire is known for women whose virtuous conduct and whose thoughts have been devoted to their husbands, and who fear the dangers of separation."

The mode of performing suttee varies in some unimportant respects, but its principal features are the same. An oblong space, seven feet by six feet, is enclosed by bamboo stakes about eight feet long, driven into the earth, within which a pile is built of straw, boughs, and logs of wood. After certain prayers and ablutions have been gone through with, the body of the deceased husband is brought from the house and placed upon the pile; sometimes in a little arbor of wreathed bamboos, hung with flowers within and without. Then the wife appears, and is unveiled by the Brahmins, herself removing the ornaments from her person, distributing them among her friends, by whom they are highly prized. She reserves only one jewel, the *tali*, or amulet, placed round her neck by her deceased husband on the nuptial day. Led by the principal Brahmin, she walks three times around the pile, and then ascends to the side of her husband. Embracing the body, she lies or sits beside it, whereupon the nearest relative applies the torch. The shrieks of the dying woman, if she utters any, are drowned by the shouts of the spectators and the noise of drums.

Efforts to suppress this rite were made as early as the 16th century by the Mohammedan emperor Akbar, but without much effect. The practice continued to such an extent that between 1815 and 1826 there were 7154 cases reported in Bengal alone. In 1829 lord Bentinck, governor-general, enacted a law declaring all aid, assistance, or participation in any act of suttee to be murder, and punishable as such. In 1847, during lord Hardinge's administration, the prohibitory edict was extended to the native states in subsidiary alliance with the government of India, and the practice may be considered to be practically extinct.

An attempt, of late years, has been made by rajah Radhankant Deb to show that in a text belonging to a particular school of the *Black Yajur-Veda* there is really a passage which would justify the practice of suttee; but the text cited by him is of doubtful canonicity; and, moreover, there is a text in the *Rig-Veda* which, if properly read, directs the widow, after attending to her husband's funeral ceremonies, to return home and attend to her domestic duties. See Wilson, *On the Supposed Vaidik Authority for the Burning of Hindû Widows* (Lond. 1862), vol. ii.

**Sutton, Alvah A.**, a minister of the Methodist Episcopal Church, was born in Vermont, June 19, 1846. He went to Minnesota in 1869, and engaged in teaching and farming. In 1873 he took work under the presiding elder, and supplied Long Prairie charge for two years. In 1875 he was ordained deacon, admitted into the Minnesota Conference, and appointed to the Brainerd Mission. He died Feb. 15, 1876. See *Minutes of Annual Conferences*, 1876, p. 126.

**Sutton, Amos**, an English missionary, was born at Sevenoaks, Kent, in 1798. He was ordained for the mission work at Derby in 1824, and sent to Orissa, India. He left this field once for a visit to England and America. His death took place at Cuttack, India, Aug. 17, 1854. He translated the Scriptures into Oriya, compiled an Oriya dictionary, grammar, and lesson-book, besides writing *The Family Chaplain* (Calcutta, 1831—32, 2 vols. 8vo):—*Rise and Progress of the Mission at Orissa* (Phila. 18mo):—*Orissa and its Evangelization* (Derby, Eng. 8vo; Boston, 1850, 8vo):—*Hymn-book for Mission Congregations*:—and *Guide to the Saviour*.

**Sutton, Charles Manners**, D.D., an English prelate, was the fourth son of lord George Manners Sutton, and was born in 1755. He was educated at Emmanuel

College, Cambridge; appointed dean of Peterborough, 1791; bishop of Norwich, 1792; dean of Windsor, 1794; and archbishop of Canterbury, 1805. He died July 21, 1828. He published, *Five British Species of Orobanche* (*Transactions of the Linn. Soc.* 1797, iv, 173):—*Sermons* (1794, 4to; 1797, 4to). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Sutton, Christopher**, a learned English divine, was a native of Hampshire, and entered Hart Hall, Oxford, in 1582, aged seventeen years, but was soon transferred to Lincoln College. He was made prebendary of Westminster, 1605; prebendary of Lincoln, 1618, and died in 1629. He published, *Disce Mori* (Lond. 1600, 24mo, with several later editions, N. Y. 1845, 16mo):—*Disce Vivere* (Lond. 1608, 12mo; 1853, 18mo; N. Y. 16mo):—*Godly Meditations upon the Most Holy Sacrament of the Lord's Supper* (Lond. 1622, 12mo; late editions, 1838, 1847, 1849; Oxf. 1839, 1844, 18mo; N. Y. 1841, 16mo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Sutton, Henry**, a minister of the Methodist Episcopal Church, was born near Princeton, N. J., July 20, 1808. Leaving home, he resided for some time in Trenton, N. J., where he united with the Church. After preaching a year, he entered the Philadelphia Conference on trial in 1835. In 1858 he was made supernumerary, and after sustaining that relation for several years, was placed on the superannuated list, and there remained until his death, in Philadelphia, Pa., March 23, 1876. He was then a member of the Wilmington Conference. See *Minutes of Annual Conferences*, 1877, p. 12.

**Sutton, Richard**, the co-founder of Brasenose College, Oxford, was the younger son of Sir William Sutton. Of the time or place of his birth we have no certain account, but we know that he practiced as a barrister of the Inner Temple. In 1490 he purchased some estates in Leicestershire, and afterwards increased his landed property in different counties. In 1498 he was a member of Henry VIII's privy council, and in 1505 was one of the governors of the Inner Temple. We find him, in 1513, acting as steward of the Monastery of Sion, near Brentford, Middlesex. He died about 1524. His bequests were almost all of a religious or charitable kind. His benefactions to Brasenose College were especially liberal, he having completed the building and doubled its revenues, besides leaving to it several valuable estates. He bore the expense of publishing the very rare book *The Orchard of Syon*.

**Sutton, Stephen B.**, a minister of the Methodist Episcopal Church, was born in Clermont County, O., Feb. 14, 1819, and united with the Church in February, 1837. He was licensed to preach March 16, 1844, and was admitted on trial into the Indiana Conference in October, 1851. He died at Martinsville, December, 1868. Mr. Sutton was very successful in his work, having admitted about 1275 persons into the Church. See *Minutes of Annual Conferences*, 1864, p. 201.

**Sutton, Thomas** (1), founder of the Charterhouse school and hospital, was born at Knaith, Lincolnshire, in 1532. He was educated at Eton and Cambridge, but at what college is uncertain. After traveling abroad for some time, he returned home in 1562; was retained by the duke of Norfolk, and afterwards became secretary to the earl of Warwick and his brother, earl of Leicester. In 1569 he became master of ordinance at Berwick, and shortly after obtained a patent for the office of master-general of the ordnance of the North, which he retained until 1594. He entered into business, and was at the time of his death (at Hackney, Dec. 12, 1611) the richest untitled subject in the kingdom. He endowed the Charterhouse in 1611 with the bulk of his property. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Sutton, Thomas** (2), D.D., an English clergy-

man, was born at Bampton, Westmoreland, and entered Queen's College, Oxford, in 1602, at the age of sixteen. He became perpetual fellow in 1611, lecturer of St. Helen's, Abington, Berks, and minister of Calham, and afterwards minister of St. Mary Overies, Southwark. He was drowned at sea in 1623. He published separate *Sermons* (Lond. 1615, 8vo; 1616, 8vo; 1626, 4to; 1631, 4to):—*Lectures on Romans*, ch. xi (1632, 4to):—and left in MS. *Lectures on Romans*, ch. xii, and *Psalms cxix.* See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Sutton, William**, a minister of the Methodist Episcopal Church, was born in Virginia about 1783, and in 1810 was licensed to preach. In 1823 he was ordained deacon by bishop McKendree, and in 1829 elder by bishop Roberts, and after this gave the Church faithful service for twenty-nine years. He died at London, Madison Co., O., Dec. 13, 1858. See *Minutes of Annual Conferences of the M. E. Church, South*, 1859, p. 190.

**Suva**, in Japanese mythology, is the god of the chase and the tutelary patron of all hunters. Large processions are annually formed in his honor.

**Svafilfur**, in Norse mythology, was a famous horse of the giant who built the castle of the gods. He projected a great fortress for the *asas* who were defending themselves against the ice-giants; and he offered himself as an architect to erect it, provided they would give him three winters to finish it, and the beautiful Freia as a wife and the sun and moon as servants. By the advice of Loke, the *asas* accepted the offer, on the condition that he should fulfil it in one winter, and without any other help than the horse Svafilfur. The giant agreed to this, and his horse exhibited such extraordinary strength that he easily lifted stones of the greatest weight, which would have required a hundred horses to carry; and the building was already completed, except a single gate, before the *asas* had thought it possible. They then threatened Loke with death if he did not break up the contract. Loke thereupon assumed the form of a beautiful mare, and so engaged the stallion Svafilfur that he broke the rope by which he was held and followed Loke, who took him far enough away. From this connection sprang Odin's famous eight-footed horse Sleipner, who was fleetier than the wind and never tired. The architect saw himself deserted by his help, and sought to assume his gigantic form in order to finish the work with all his strength; but in the dilemma of the gods as to whether in that case they should abide by their word, or whether the giant should not be required to finish the work as he was, Thor suddenly appeared with his hammer and slew the giant.

**Svaha**, in Hindû mythology, was the spouse of the fire-god Agni.

**Svainshaugi**, or SWAINS' HILL, in Norse mythology, was a place which appears to have been originally the residence of dwarfs, inasmuch as the *Edda* mentions several of these as coming thence to Orwanga (arrow-field) and Jorwall (iron or battle field).

**Svaixdunoka**, in Slavic mythology, was the brilliant bride of the star-god. She was worshipped by the heathen Prussians as a friendly, benign goddess, who kept the stars in their courses when her husband dropped their reins in his wild chase on the moon-car through storm and cloud.

**Svaixtix**, in Slavic mythology, was the god of the stars and of sunlight, whom the ancient Prussians revered in common with the Wends and Slavs in Pomerania, etc. He was represented in exceedingly rich clothing, had flames and rays about his head, and a tuft of hair on the middle of his crown, which rose like a flame of fire. From old Rhetrean works of art we infer, notwithstanding the inscription which calls him *Belbog* (i. e. *biali bog*, a good deity, in opposition to *Czernebog*,

the evil god), that he was a malicious deity, since he appears as fierce and forbidding; but we must bear in mind that sculpture must rise to a high grade before noble and inviting forms can be represented. This art was at that time in such infancy that we can only wonder how the figures are shapely at all. Svaixtix was the most benevolent deity; he illuminated the night by the glimmer of the stars, by the aurora and the snow-light, and, like the sun-god, imparted growth to seeds and warmth and fruitfulness to the soil.

**Svakons**, in Lettish mythology, were soothsayers who foretold fortunes from flame and the smoke of a light.

**Svalgoni**, in Lettish mythology, were priests who understood nuptial ceremonies, examined bridegrooms and brides who were about to marry, tied the conjugal knot, and pronounced the blessing upon them in the name of Deity.

**Svantevit**, in Slavic mythology, was the most revered and conspicuous of the gods among the Wends. At Arkona, on the island of Rügen, stood his gigantic image, which was far and wide, for the whole southern coast of the Baltic Sea, the central point of worship. Svantevit was an enormous colossus, which on four necks bore four heads with shorn hair and short beard. His clothing was like that of the Wends in general: a gown extending to the knees, made of cloth or felt, with long wide sleeves; a girdle held it together; the legs were bare; on the feet he wore coarse bark shoes; an immense sword hung at his side; and in the right hand he carried a large bow resting on the ground; his left hand held a cornucopia, which was annually filled with

Figure of Svantevit.

wine. In addition to these insignia, his image, which stood in Rhetra, had also a long-bearded human head on the breast. Svantevit was both a good and an evil deity, as the cornucopia and the bow indicated—the latter for war, the former for peace. He overshadowed the whole earth with his four heads; hence his counsel was highly prized and his oracles were the most conspicuous, as his cultus involved earthly power and authority. He was worshipped with drunken revelries, and large offerings, including, not unfrequently, human victims, were made; but, it would seem, only when he was angry. His service was attended to by one high-priest, who, on the day of the great harvest festival, personally swept the temple, and that with restrained respiration, so as not to offend the god with his breath. Wine only was poured into his great cornucopia; and from the quantity that remained over from the preceding year an augury was drawn as to the abundance or otherwise of the next year's crop. The temple and the image of the god were destroyed by Waldemar I, on the baptism of the people. The public worship of this god thereafter ceased, although it privately continued, so that even now many old peasants regard the spot with superstitious awe. The interpretation of the name as *Holy Veit* (Sanctus Vitus) is probably only an instance of the corruption or extension of language.

**Svartalfhein**, in Norse mythology, was the native place of all evil genii or black elves.

**Svarthöfde**, in Norse mythology, was the original ancestor of all magicians, who learned his art from the gods themselves, and transmitted it to his descendants.

**Svasudes**, in Slavic mythology, was the god of summer, represented by the warm beams of spring that introduced summer. He was worshipped by the Wends and Slavs as a deity of the second rank.

**Svava**, in Norse mythology, was a beautiful daughter of king Eylimi, who became famous through Helgi Haddinga, the son of Hiorward, king of Norway. The last had made a vow to call his own the fairest woman of the earth; and thus he already had three wives—Alfhild, the mother of Hedin; Säreid, the mother of Humlung; and Sinriod, the mother of Hilmung—when he heard that Sigurlin was the handsomest of women. He immediately wooed her through the jarl Atli, but was rejected through fear of other suitors. Thereupon he made war upon her father, and at length seized Sigurlin. She was, however, already the mother of a son, the famous Helgi, who remained quiet until the kind-hearted Svava aroused him, gave him the name of Helgi, and allied herself to him as a godmother. Defended by the bad and charming Walkur, and armed with a never-failing sword, Helgi signalized himself by deeds of the greatest heroism; but he was, nevertheless, slain by Atli, the son of Hrodmar. No sooner, however, was Helgi reborn as the son of king Sigmund and the beautiful Borghild than Svava also reappeared in a second incarnation as the Shield virgin Sigrun. Helgi was but one day old when he stood in armor and longed for the battle and victory. He crept, in female attire, into the house of the powerful but wicked king Hundringur, explored it as a waiting-maid, and then attacked and slew him in a dreadful contest. Helgi next wooed the beautiful and formerly loved Svava, now Sigrun; but had yet to undergo many a severe contest, since she was already betrothed to Hodbrod, a son of king Gramnar of Sweden, but not loved by her. Helgi attacked him also, overcame and slew him in a battle at Frekastein, and was approaching the goal of his wishes when a new obstacle arose in the person of his own brother Hedin. The latter was returning home to Julaabend when he met an ugly old witch, out of the forest, riding on a wolf, which she drove with reins of twisted snakes, and she offered herself as a Walkur to the beautiful youth as a protectress; but when he dislained her, she angrily cried, "Thou shalt pay for this with Braga's cup." When Hedin reached his home, he wildly swore that he would possess himself of Sigrun, his brother's bride, and he accordingly went immediately to seek his brother for that purpose. The latter not only treated him kindly, but, having been already mortally wounded in battle, surrendered her to his brother. When Helgi arrived in Walhalla, all the joys of heaven could not supply the place of the beautiful Sigrun; he therefore returned to his tomb, and rested there all night by the side of the lovely Sigrun till the morning light announced the end of his delight; and, mounting his steed, he returned to the halls of Walhalla. Helgi was a third time born as the second Haddinga, while Svava, likewise, a third time appeared as Kara, daughter of Halldan, who was king of Denmark, and, with the spouse of his daughter, ruled over land and sea.

**Sverga Divi**, in Hindû mythology, is a section of genii who execute the immediate commands of Indra, the Indian sun-god. They seem not to have a large form, since they often ask human help in order to defend them against the Assurs, or evil genii.

**Sviartovit** (Slavic, *holy warrior*), the most celebrated deity of the ancient Baltic Slavonians, whose temple and idol were at Arkona, the capital of the island of Rügen. This last stronghold of Slavonic idolatry was taken and destroyed, A.D. 1168, by Waldemar I, king of Denmark. See SLAVONIANS.

**Svidor and Svipall**, in Norse mythology, are sur-names of *Odin*.

**Svipul**, in Norse mythology, was one of the beautiful Walkurs, or female spirits who order the battle.

**Swaddle** (סִבּוּל, *to bandage, σπαργάνω*; but סִבּוּל, in Lam. ii, 23, means *to bear upon the palm*), to swathe an infant with cloths in order to keep its tender limbs from injury, a practice common in the East (Ezek. xvi, 4; Luke ii, 7). See BIRTH.

**Swaddlers**, an absurd nickname given by the Irish Roman Catholics to the early Methodists. It is said to have originated from John Cennick preaching a sermon on the Babe "wrapped in swaddling-clothes," the ignorant Roman Catholics who heard it or heard of it supposing the "swaddling-clothes" to be an invention of the Protestants. In the year 1738 a ballad-singer named Butler actually raised riots in Dublin and elsewhere to the cry of "Five pounds for the head of a swaddler!" and he and his allies called themselves "Antiswaddlers."

**Swahili Version.** The Swahili, which was formerly described as *Kisuaheli* (that is, "according to Swahili"), is spoken at Zanzibar and for a considerable distance down the East Coast of Africa, besides being likely to become an important means of communication with inland tribes. The language is evidently an offshoot of the Kaffir family, but is strongly impregnated with Arabic words, being a connecting-link between the two opposite families of speech. A tentative translation of the New Test. was made by the Rev. Dr. Krapf when in Eastern Africa a few years ago, but he never so far perfected his work as to render it prudent to propose its publication. Independently of Dr. Krapf's work, the attention of others had been drawn to this important subject; and when the Rev. Dr. Steere returned to England in 1869 he brought with him a translation of St. Matthew and the book of Psalms, which he had himself prepared during a residence of several years at Zanzibar. In the same year the Gospel of St. Matthew was printed; and as this was the first time any part of the Scriptures had been published in that language, and the circulation must of necessity be limited, only a small edition was issued. In 1871 the book of Psalms was printed, which was followed in 1875 by the publication of St. John's Gospel, and in 1877 by that of St. Luke, the latter as translated by the late missionary Rebmann, but with the orthography made to conform to that of bishop Steere. From the Report for the year 1877, we see that a proposal was made to use the Arabic characters for this version, but the committee of the British and Foreign Bible Society could not approve of it, inasmuch as the weight of evidence went to show that any natives who were acquainted with the Arabic characters could read the pure Arabic version, while for the rest the Kisuaheli in Roman characters was far simpler. Altogether the missionaries circulated in about nine years (i. e. since the publication of St. Matthew in 1869 to March 30, 1878) 4048 copies. Thus encouraged, bishop Steere is preparing a translation of the other books of the Bible. (B. P.)

**Swaim, John Sanford**, a minister of the Methodist Episcopal Church, was born at Chatham, N. J., May 1, 1806, and united with the Church at the age of fourteen. He was admitted on trial in the Philadelphia Conference in 1834, and continued actively engaged in the pastorate until 1863. He then entered the Christian Commission, and was appointed to Hilton Head. In 1864 he was made supernumerary, and appointed missionary to Jacksonville, Fla. Finding the climate congenial to his health, he continued to reside there until his death, Nov. 18, 1875. See *Minutes of Annual Conferences*, 1876, p. 42.

**Swaim, Samuel Budd**, D.D., an able minister of the Baptist denomination, was born at Pemberton, N. J., June 22, 1809, and was a graduate of Brown Uni-

versity in the class of 1830 and of the Newton Theological Institution in the class of 1833. He was ordained at Haverhill, Mass., Nov. 7, 1833. For some time he was professor in Granville College (now Denison University). In 1838 he took charge of the First Baptist Church in Worcester, Mass., where his ministry was an eminently successful one, and continued sixteen years. From 1854 to 1862 he was pastor in West Cambridge, and then became an agent for the American Baptist Home Missionary Society. His death took place Feb. 3, 1865. (J. C. S.)

**Swain, Charles W.**, a minister of the Methodist Episcopal Church, was born at New Bedford, Mass., Oct. 22, 1793. He united with the Church in Richmond, Clermont Co., O., in 1819, and in 1831 was admitted on trial into the Ohio Conference, and in due time received deacon's and elder's orders. He was actively engaged in the ministry (excepting one year's service as agent of the Ohio Wesleyan University) until the fall of 1855. In 1856 he took a superannuated relation, and made his home in Easton until his death, April 25, 1870. Mr. Swain assisted in organizing a temperance society in New Richmond, O., as early as Sept. 1, 1829, the first of the kind west of the Alleghany Mountains. See *Minutes of Annual Conferences*, 1870, p. 166.

**Swain, Nathan**, a Methodist Episcopal minister, was born in 1767, and converted when fourteen years of age. In 1799 he was admitted on trial in the Philadelphia Conference, in 1801 admitted into full connection and ordained deacon, and in 1803 ordained elder. He continued effective, with the exception of two years, until 1816, when he took a supernumerary relation, which he sustained until 1832, when he became superannuated, and so remained until his death, March 1, 1845. See *Minutes of Annual Conferences*, iv, 14.

**Swain, Richard**, a Methodist Episcopal minister, was a native of New Jersey. In 1789 he was admitted on trial, in 1791 into full connection, and filled the following stations: Trenton, N. J., in 1789; Flanders, in 1790-91; Middletown Circuit, Conn., in 1792; New London, in 1793; Salem, N. J., in 1794; Burlington, in 1795; Freehold, in 1796; Trenton, in 1797; Freehold, in 1798; Salem, in 1799 and 1800; Bethel, in 1801; Cape May, in 1802; Salem, in 1803. He became supernumerary in 1804-7, and died Jan. 17, 1808. He was a man of great usefulness in the ministry. See *Minutes of Annual Conferences*, i, 159; Stevens, *Hist. of the M. E. Church*, iv, 280; Bangs, *Hist. of the M. E. Church*, ii, 252.

**Swallow** is the rendering, in the A. V., of two Heb. words, and possibly the true meaning of a third. None of them, however, are very clearly identifiable according to modern scientific classification.

1. דֶּרֹר, *derôr*, prop. *liberty* (as often rendered), i. e. strictly *swiftness*, occurs in two passages only with reference to a bird: Psa. lxxxiv, 3 (Heb. 4), "The swallow [hath found] a nest;" Prov. xxvi, 2, "as the swallow by flying." The ancient versions, in the former passage, understand a *turtle-dove* (Sept. τρυγών; Vulg. *turtur*), and in the latter a *sparrow* (σποιδός, *passer*). The radical signification of the word favors the idea that it may include the swallow, with other swiftly flying or free birds. The old commentators (so the rabbins), except Bochart (*Hieroz.* ii, 590 sq.), who renders it "columba fera," apply it to the swallow, from the love of freedom in this bird and the impossibility of retaining it in captivity (De Wette, Umbreit, Ewald, Gesenius, *Thesaur.* p. 355). It is more likely that it was so named from its rapidity of flight. It probably, therefore, is more properly the "swift" or "black martin," and probably the *dururi*, mentioned by Forskål as migrating to Alexandria from Upper Egypt about the end of October (*Descript. Anim.* p. 10). The frequenting of public buildings by this class of birds (Herod. i, 159; Ælian, *V. H.* v, 17) is proverbial (Schultens, *Monum.*

Vett. Arab. Carm. p. 1; Niebuhr, *Reisen*, ii, 270). See SPARROW.

2. צְנִיָּר, 'agûr, the *twitterer*, also occurs twice: Isa. xxxviii, 14, "Like a crane [or] a swallow, so did I chatter;" Jer. viii, 7, "The turtle and the crane and the swallow observe the time." In both these passages it is associated with a third term, סִס, *sûs* (v. r. סִיס, *sis*), rendered "crane," but in the former passage the connective ו ("and," "or") is wanting. The Sept. in Isa. renders both words by the single one χελιδών, Vulg. *pullus hirundinis*; and in Jer. χελιδών ἀγροῦ, *hirundo et ciconia*; thus agreeing with the A. V. in denoting the swallow. Bochart, however (*Hieroz.* ii, 614 sq.), maintains that 'agûr is the proper Hebrew designation of the crane. He compares the word with the Chald. כּוּרְכִיָּא, *kurkeya*, the Arab. *kurki*, the Gr. γέρανος, the Welsh *garan*, and the Germ. *kran*, all of which are, like it, onomatopoeitic. The twittering or querulous sound (צִצְצִי) and the migratory habit are both characteristics which meet in the crane; its cry is often compared by the poets with that of a person in distress or grief, and its migratory habits are frequently dwelt upon by ancient writers (Aristot. *Anim.* viii, 12; Ælian, *Anim.* iii, 13, 23; Pliny, x, 31; Quint. Curt. *Smyrn.* ii, 107; xiii, 102 sq.). This view has been followed by Rosenmüller, Maurer, and Henderson in their comments on Isaiah. Gesenius, though seeming to favor this view in his commentary on Isaiah, repudiates it in his *Thesaurus*, where he treats 'agûr as a verbal adjective signifying *chattering* or *twittering*, and regards it as an epithet of the swallow in the passage in Isaiah, and as a designation of the swallow in that in Jeremiah. This is followed by Knobel (*Der Prophet Jesaja erklärt*). It is in favor of this that in the former the copulative is wanting between the two words; but this may be explained as a case of asyndeton (as in Hos. vi, 3; Hab. iii, 11, etc.); whereas the insertion of the ו in the other passage seems clearly to prove that 'agûr and *sûs* denote different birds. Hitzig, indeed, proposes to strike out this copula, but without sufficient reason. Maurer derives צְנִיָּר from an Arabic root signifying *turbavit aquam*, so as to designate an aquatic bird; Knobel would trace it to another Arabic root meaning *to mourn piteously*. The סִס, *sûs*, if distinct from the צְנִיָּר, 'agûr, is probably a large species of swallow, and the latter term, when not a mere epithet of the former, probably signifies a peculiar kind of heron. *Sis*, however, may perhaps be an imitative name expressive of the swallow's voice or twitter; and in Dr. Kennicott's remark that in thirteen codices of Jeremiah he read *Isis* for *sûs* we find the source of the ancient fable of the Egyptian *Isis* being transformed into a swallow. See CRANE.

Whatever be the precise rendering, the characters ascribed in the several passages where the names occur are strictly applicable to the swallow, viz. its swiftness of flight, its nesting in the buildings of the Temple, its mournful, garrulous note, and its regular migration, shared, indeed, in common with several others. We may observe that the garrulity of the swallow was proverbial among the ancients (see Nonn. *Dionys.* ii, 133, and Aristoph. *Batr.* 98). Hence its epithet κωιδός, "the twitterer," κωιδός δὲ τὰς χελιδόνας, Athen. 622. See Anacr. 104, and ὁρρογογή, Hesiod, *Op.* 566; and Virgil, *Georg.* iv, 306. Although Aristotle, in his *Natural History*, and Pliny, following him, have given currency to the fable that many swallows bury themselves during winter, yet the regularity of their migration, alluded to by the prophet Jeremiah, was familiarly recognised by the ancients. See Anacreon (*Od.* xxxiii). The ditty quoted by Athen. (360) from Theognis is well known—

ἮΛΣ' ἤλπε χελιδόν, καλὰς ὥρας ἄγουσα,  
καλοῦν ἐναυτοῖν, ἐπὶ γαστέρα λευκὰ, ἐπὶ νῶτα μέλαινα.

So Ovid (*Fast.* ii, 853), "Prenuntiis veris hirundo."

The species of Syria and Palestine, so far as they

The Swift (*Cypselus apus*).

are known, appear all to be the same as those of Europe. The following are the most abundant: 1. *Cypselus apus*, the common swift or black martin, distinguished by its larger size, short legs, very long wings, forked tail, and by all the toes of the feet turning forward: these, armed with small, crooked, and very sharp claws, enable the bird to hang against the sides of walls, but it cannot rise from the ground on account of the length of its wings. The last two, but more particularly this species, we take to be the *derôr*, on account of the name *durâr*, already mentioned; which was most probably applied to it because the swift martin prefers towers, minarets, and ruins to build in, and is, besides, a bird to which the epithet "free" is particularly applicable. On the European coast of the Mediterranean it bears the name of *barbota*, and in several parts of France, including Paris, is known by the vulgar name of "le Juif," the Jew; and, finally, being the largest and most conspicuous bird of the species in Palestine, it is the type of the heraldic martlet, originally applied in the science of blazon as the especial distinction of Crusader pilgrims, being borrowed from Oriental nations, where the bird is likewise honored with the term *hagi*, or pilgrim, to designate its migratory habits. The *derôr* being mentioned as building on the altar seems to imply a greater generalization of the name than we have given it; for habits of nesting in immediate contact with man belong only to the house and window swallows; but in the present instance the expression is not meant to convey a literal sense, but must be taken as referring to the whole structure of the Temple, and in this view the swift bears that character more completely than the other. It is not necessary to dilate further on the history of a genus of birds so universally known. 2. *Hirundo rustica*, or *domestica* (var. *Cahirica*), the chimney swallow, with a forked tail, marked with a row of white spots, whereof *Hirundo Syriaca*, if at all different, is most likely only a variety. 3. *Chelidon urbana*, the martin, or common window swallow. 4. *Cotyle riparia*, sand-martin, or shore-bird, not uncommon in Northern Egypt, near the mouths of the Delta, and in Southern Palestine, about Gaza, where it nestles in holes, even on the sea-shore. Besides these, the Eastern or russet swallow (*Hirundo rufula*, Tem.), which nestles generally in fissures in rocks, and the crag-martin (*Cotyle rupestris*, Linn.), which is confined to mountain gorges and desert districts, are also common. (See *Ibis*, i, 27; ii, 386.) The crag-martin is the only member of the genus which does not migrate from Palestine in winter. Of the genus *Cypselus* (swift), besides the one first noted above, the splendid alpine swift (*Cypselus melba*, Linn.) may be seen in all suitable localities. A third species, peculiar, so far as is yet known, to the north-east of Palestine, has recently been described under the name of *Cypselus Galileensis*. See Tristram, *Nat. Hist. of the Bible*, p. 204; Wood, *Bible Animals*, p. 381 sq.; Lewysohn, *Zoologie des Talmuds*, p. 206. See BIRD.

**Swan** is the rendering, in the A. V., of תִּנְשֵׁמֶת, *tinshémeth*, in two of the three passages where this word occurs, namely, Lev. xi, 18; Deut. xiv, 16, where it stands in the list of unclean birds (Sept. πορφυρίων, ἰβίς; Vulg., copyingly, *porphyrio*, *ibis*; Samaritan the same). Bochart (*Hieroz.* ii, 290) explains it *noctua* (owl), and derives the name from שָׁמָם, *shamám*, "to astonish," because other birds are startled at the apparition of the owl. Gesenius suggests the *pelican*, from שָׁפָף, "to breathe, to puff," with reference to the inflation of its pouch. Whatever may have been the bird intended by Moses, these conjectures cannot be admitted as satisfactory, the owl and pelican being both distinctly expressed elsewhere in the catalogue. Giggeus wavered between these two; and Dr. Mason Harris, seemingly not better informed, and confounding the American red species with the white one of Africa, guessed that *porphyrio* must mean the *flamingo*. Parkhurst, deriving the word from שָׁשׁ, *nashám*, "to breathe," was inclined to render *tinshémeth* by "goose;" but as this bird is not by the present Jews deemed unclean, it may be confidently assumed that no mistake in this matter can have occurred during any period, and consequently that the goose cannot have been marked unclean by the law and afterwards admitted among the clean birds with its name transferred to another species. The *Hebrew Dictionary* by Selig Newman, it is true, renders *tinshémeth* "swan;" but the Polyglots show the great uncertainty there is in several of the names of both the chapters in question. The swan, for which some recent scholars contend, asserting that it was held sacred in Egypt, does not occur, so far as has been ascertained, in any Egyptian ancient picture, and is not a bird which, in migrating to the south, even during the coldest seasons, appears to proceed farther than France or Spain, though, no doubt, individuals may be blown onward in hard gales to the African shore. Only two instances of swans have been noticed so far to the south as the sea between Candia and Rhodes: one where a traveller mentions his passing through a flock reposing on the sea during the night; the other recorded by Hasselquist, who saw one on the coast of Egypt. But it may be conjectured that they mistook pelicans for swans, particularly as the last mentioned are fresh-water birds, and do not readily take to the true salt sea. Mr. Strickland, indeed, says of the mute swan (*Cygnus olor*), that it visits Smyrna Bay in winter; and Mr. Yarrell, on the authority of Mr. Bennett, tells us that the hooper (*C. ferus*) sometimes goes as far south as Egypt and Barbary. He adds that "they visit Corfu and Sicily in very severe winters; and Mr. Drummond saw a few on the lakes of Biserta, and one in the Lake of Tunis at the end of April, 1845." But these are very rare instances. Nor, if it had been known to the Israelites, is it easy to understand why the swan should have been classed among the unclean birds. The renderings of the Sept., *porphyrio* and *ibis*, are either of them more probable. Neither of these birds occurs elsewhere in the catalogue. The porphyrio, or purple gallinule, cannot have been unknown to the translators, as it was, no doubt, common in the Alexandrian temples, and was then, as it is now, seen both in Egypt and Palestine. Πορφυρίων, *porphyrio antiquorum*, Bp., the purple water-hen, is mentioned by Aristotle (*Hist. Anim.* viii, 8), Aristophanes (*Av.* 707), Pliny (*Hist. Nat.* x, 63), and is more fully described by Athenæus (*Deipn.* ix, 388). The circumstance of the same Heb. name being given to the chameleon (see below) may have arisen from both having the faculty of changing colors, or being iridescent; the first, when angry, becoming green, blue, and purple—colors which likewise play constantly on the glossy parts of the second's plumage. The porphyrio is superior in bulk to the common water-hen, or gallinule; has a hard crimson shield on the forehead, and flesh-colored legs; the head, neck, and sides are of a beautiful turquoise

blue, the upper and back parts of a dark but brilliant indigo. It is allied to the corn-crake, and is the largest and most beautiful of the family *Rallidae*, being larger than the domestic fowl. From the extraordinary length of its toes, it is enabled, lightly treading on the flat leaves of water-plants, to support itself without immersion, and apparently to run on the surface of the water. It frequents marshes and the seige by the banks of rivers in all the countries bordering on the Mediterranean, and is abundant in Lower Egypt. Athenæus has correctly noted its singular habit of grasping its food with its very long toes and thus conveying it to its mouth. It is distinguished from all the other species of *Rallidae* by its short, powerful mandibles, with which it crushes its prey, consisting often of reptiles and young birds. It will frequently seize a young duck with its long feet, and at once crunch the head of its victim with its beak. It is an omnivorous feeder, and, from the miscellaneous character of its food, might reasonably find a place in the catalogue of unclean birds. Its flesh is rank, coarse, and very dark-colored. It was anciently kept tame in the precincts of pagan temples, and therefore, perhaps, was marked unclean, as most, if not all, the sacred animals of the heathens were. When, in the decline of idolatry, the dog, peacock, ibis, the purple bird in question, and other domesticated ornaments of the temples had disappeared, Gesner's researches show how early and long the writers of the Middle Ages and of the Revival of Literature were perplexed to find again the porphyrio of the ancients, although modern naturalists have not the shadow of a doubt upon the subject, the species being, moreover, depicted upon Egyptian monuments. The *Porphyrio hyacinthinus* is the species most common in Europe, although there are several others in Asia and Africa; *Porphyrio erythropus*, abundant on the southeast coast of Africa, appears to be that which the pagan priests most cherished.

Purple Gallinule (*Porphyrio hyacinthinus*).

The same Heb. word *tinshémeth* (תִּנְשֵׁמֶת; Sept. ἀσπάλαξ v. r. σπάλαξ; Vulg. *talpa*) in Lev. xi, 30, being found among the unclean "creeping things that creep upon the earth," evidently no longer stands for the name of a bird, and is rendered "mole" by the A. V., adopting the interpretation of the Sept., Vulg., Onkelos, and some of the Jewish doctors. Bochart has, however, shown that the Heb. *chôled* (חֹלֵד), the Arabic *khuld* or *khuld*, denotes the "mole," and has argued with much force in behalf of the "chameleon" being the *tinshémeth*. The Syriac version and some Arabic MSS. understand "a centipede" by the original word, the Targum of Jonathan a "salamander;" some Arabic versions read *sammâbras*, which Golius renders "a kind of lizard." In Lev. xi, 30, the "chameleon" is given by the A. V. as the translation of the Heb. *chôuch* (חֹוּחַ), which in all

probability denotes some larger kind of lizard. See CHAMELEON. The only clue to an identification of *tinshémeth* is to be found in its etymology, and in the context in which the word occurs. Bochart conjectures that the root (נשם), *nashám*, to breathe) from which the Heb. name of this creature is derived has reference to a vulgar opinion among the ancients that the chameleon lived on air (comp. Ovid, *Met.* xv, 411, "Id quoque quod ventis animal nutritur et aura," and see numerous quotations from classical authors cited by Bochart, *Hieroz.* ii, 505). The lung of the chameleon is very large, and when filled with air it renders the body semi-transparent; from the creature's power of abstinence, no doubt, arose the fable that it lived on air. It is probable that the animals mentioned with the *tinshémeth* (Lev. xi, 30) denote different kinds of lizards; perhaps, therefore, since the etymology of the word is favorable to that view, the chameleon may be the animal intended by *tinshémeth* in the above passage. As to the change of color in the skin of this animal, numerous theories have been proposed; but, as this subject has no scriptural bearing, it will be enough to refer to the explanation given by Milne-Edwards, whose paper is translated in vol. xvii of the *Edinburgh New Philosophical Journal*. The chameleon belongs to the tribe *Dendrosauria*, order *Sauria*; the family inhabits Asia and Africa and the south of Europe. The *Chameleo vulgaris* is doubtless the species mentioned in the Bible. See Tristram, *Natural History of the Bible*, p. 249; Wood, *Bible Animals*, p. 87, 488. See LIZARD.

SWAN (myth. and astron.), a beautiful constellation in the Milky-way, which may be readily known from the five bright stars, arranged in the form of a cross, of which it is composed. It is situated between Cepheus and Vulpes, to the east of the Lyre. On bright wintry nights the naked eye may count a hundred and fifty stars in this large constellation. The Swan commemorates the form chosen by Jupiter when he deceived Nemesis and Leda, or possibly the singing swan, sacred to Apollo, into which Orpheus was, at death, transformed.

**Swan, Roswell Randall**, a Congregational minister, was born at Stonington, Conn., June 16, 1778; was fitted for college by Rev. Hezekiah N. Woodruff, of Stonington, and graduated from Yale College in 1802. He united with the College Church Dec. 1, 1799. His purpose to enter the ministry was not formed until March, 1804, and shortly after he commenced the study of theology under Dr. Emmons, of Franklin, Mass. In October of the same year, after a severe illness, he continued his studies with Dr. Perkins, of West Hartford. His license to preach was granted him by the Hartford North Association, at Northington, Feb. 6, 1805. Owing to ill-health, he did not immediately settle, but in December took charge of an academy in Stonington, and supplied the vacant Church there. He was ordained pastor of the Church in Norwalk Jan. 14, 1807, where he continued until his death, March 22, 1818. See Sprague, *Annals of the Amer. Pulpit*, ii, 485.

**Swan, Samuel**, a Presbyterian minister, was born in the island of Dominica, Nov. 30, 1798. While Samuel was a child his father returned to his native country, Scotland. Here the son received a liberal education, completing his course at the Glasgow University. At the age of nineteen he came with the family to Philadelphia, from whence he soon went to Princeton Seminary. He was licensed to preach by the Philadelphia Presbytery April 17, 1823, and received as a licentiate in the Presbytery of Huntington, Pa. He received a call from the Sinking Valley Church, which he declined to accept, and was dismissed to the Redstone Presbytery. His next call was to the churches of Fairfield, Ligonier, and Donegal, which he accepted, and was installed June 17, 1824. He proved to be a devoted, self-denying, and successful pastor, and for seventeen years and a half retained the esteem and growing confidence of his three churches. Becoming seriously crippled by

a shivered limb, he was compelled to relinquish so extensive a charge, and he accordingly resigned, and accepted a call to the Johnstown Church, Pa., where he was installed in 1841. Half of his time was occupied by the Church at Armagh. Here he continued until 1855. In 1856 he removed to Leland, La Salle Co., Ill., where he made an extensive purchase of land; and though he had no pastoral charge, he continued to preach the Gospel as he had opportunity. From 1869 to 1871 he resided at Aurora, Ill. For the purpose of giving his children an education, he returned East, and, though advanced in years, continued to preach until the end of his pilgrimage, Aug. 5, 1877. (W. P. S.)

**Swanger, John P.**, a minister of the Methodist Episcopal Church, was born in Mifflin County, Pa., Feb. 15, 1836. He was converted and united with the Church in 1854, and in 1859 was received on trial in the East Baltimore Conference. His ministry, however, was of short duration, as he died June 29, 1867, in Baltimore. See *Minutes of Annual Conferences*, 1868, p. 27.

**Swarm** is the rendering, in the A. V., of two very different Hebrew words.

1. **עֲדָה**, *'edáh* (usually rendered "congregation" or "assembly"), is employed to designate the swarm of bees and honey found by Samson in the lion's carcass (Judg. xiv, 8). The lion which Samson slew had been dead some little time before the bees had taken up their abode in the carcass, for it is expressly stated that "after a time" Samson returned and saw the bees and honey in the lion's carcass, so that "if," as Oedmann has well observed, "any one here represents to himself a corrupt and putrid carcass, the occurrence ceases to have any true similitude, for it is well known that in these countries, at certain seasons of the year, the heat will, in the course of twenty-four hours, so completely dry up the moisture of dead camels, and that without their undergoing decomposition, that their bodies long remain, like mummies, unaltered and entirely free from offensive odor." To the foregoing quotation we may add that very probably the ants would help to consume the carcass, and leave, perhaps, in a short time, little else than a skeleton. Herodotus (v. 114) speaks of a certain Onesilus, who had been taken prisoner by the Amathusians and beheaded, and whose head, having been suspended over the gates, had become occupied by a swarm of bees; comp. also Aldrovandus (*De Insect.* i, 110). Dr. Thomson (*Land and Book*, ii, 362) mentions this occurrence of a swarm of bees in a lion's carcass as an extraordinary thing, and makes an unhappy conjecture that perhaps "hornets," *debabir* in Arabic, are intended, "if it were known," says he, "that they manufactured honey enough to meet the demands of the story." It is known, however, that hornets do not make honey, nor do any of the family *Vespidae*, with the exception, so far as has been hitherto observed, of the Brazilian *Nectarina mellifica*. See BEE.

2. **צִרְבֵּי**, *'arób*, is the term applied to the fourth of the plagues (q. v.) of Egypt (Exod. viii, 8-31; "divers sorts of flies," *Psa.* lxxviii, 45; cv, 31). It is regarded by most interpreters as a species of *gaidfly*, or *tabanus* (Michaelis, *Supplem.* p. 1960), such as is still very troublesome to animals in Egypt (Forskål, *Descr. Anim.* p. 85; Rüppell, *Arab.* p. 73). See Bochart, *Hieroz.* iii, 472; Werner, in the *Miscell. Lips.* Nov. iii, 201 sq. See FLY.

**Swayze, John J.**, a minister of the Methodist Episcopal Church, was born at Poughkeepsie, N. Y., Aug. 30, 1812. He was received on trial in the Pittsburgh Conference in 1829, and labored with great acceptability, filling the office of presiding elder nine successive years. He took a superannuated relation in 1852, and died Feb. 18, 1853. See *Minutes of Annual Conferences*, 1853, p. 242.

**Swayze, William**, a Methodist Episcopal minister, was born in Sussex County, N. J., Nov. 18, 1784.

In his youth he was led by a pious African to hear a Methodist preacher near Baltimore, was converted, and soon after felt impressed that it was his duty to preach the Gospel, and labored as a local preacher to great advantage for several years. He was admitted into the New York Conference on trial in May, 1807, and for eight years labored successfully within the bounds of that conference. "He became emphatically a 'son of thunder,' attracting great crowds of people to his ministry, and speaking with a power and pathos that few have ever equalled, moving and exciting many—some to tears, others to cry for mercy, while others would shout for joy" (Gregg, p. 177). In 1816 he was transferred to the Ohio Conference; in 1817 appointed to Columbus Circuit; in 1818 to Deer Creek Circuit, including Chillicothe; in 1820 presiding elder of Ohio District, where "his labors, for almost four years, were crowned with unexampled success." In 1824, by the division made by the General Conference, he fell in the Pittsburgh Conference, and was appointed to Erie District; in 1828 to Canton District; in 1830, conference missionary; in 1832, retransferred to Ohio Conference; in 1834 to Pittsburgh Conference; after which, he was superannuated until death, March 29, 1841. See *Minutes of Annual Conferences*, iii, 238; Stevens, *Hist. of the M. E. Church*, iv, 339-341. (J. L. S.)

**Swearing** (some form of אָזח or שְׁפָט, *shp'ut*), is an appeal to God in attestation of the truth of what one says, or in confirmation of what one promises or undertakes. The Latin term is *jusjurandum* or *juramentum*. Cicero (*De Officiis*, iii, 29) correctly terms an oath a religious affirmation; that is, an affirmation with a religious sanction. This appears from the words which he proceeds to employ: "Quod autem affirmate, quasi Deo teste, promiseris, id tenendum est. Jam enim non ad iram deorum, quæ nulla est, sed ad justitiam et ad fidem pertinet;" which in effect means that an oath is an appeal to God, as the source and the vindicator of justice and fidelity. Hence it appears that there are two essential elements in an oath—first, the human, a declared intention of speaking the truth or performing the action in a given case; secondly, the divine, an appeal to God, as a being who knows all things and will punish guilt. According to usage, however, there is a third element in the idea which "oath" commonly conveys, namely, that the oath is taken only on solemn, or, more specifically, on juridical occasions. The canon law gives all three elements when it represents *judicium, veritas, justitia* as entering into the constitution of an oath—*judicium*, judgment or trial on the part of society; *veritas*, truth on the part of the oath-taker; *justitia*, justice on the part of God.

The practice of taking oaths existed before the time of Moses. It is found as early as the days of Abraham, who made the oldest servant of his family swear he would select for Isaac a wife of his own kindred (Gen. xxiv, 2, 3, 37). It is here observable that the oath is a private, not a judicial one; only that the authority of Abraham, as patriarch, must be taken into account. An oath was sometimes a public and general bond, obliging the parties who took it to a certain course—a case in which it appears to have been spontaneous and voluntary; as when, in Judges xxi, the men of Israel swore, saying, "There shall not any of us give his daughter unto Benjamin to wife" (comp. ver. 5). From 1 Kings xviii, 10, it appears to have been customary to require, on occasions of great concern, a public oath, embracing even an entire "kingdom and nation;" but whether taken individually or by some representative we have no means of ascertaining. Such a custom, however, implying as it does a doubt of the public faith of a people, would hardly be submitted to, unless on the part of an inferior.

Oaths did not take their origin in any divine command. They were a part of that consuetudinary law which Moses found prevalent, and was bound to respect, since no small portion of the force of law lies in custom,

and a legislator can neither abrogate nor institute a binding law of his own mere will. Accordingly, Moses made use of the sanction which an oath gave, but in that general manner, and apart from minute directions and express words of approval, which shows that he merely used, without intending to sanction, an instrument that he found in existence and could not safely dispense with. Examples are found in Exod. xxii, 11, where an oath is ordered to be applied in the case of lost property; and here we first meet with what may strictly be called a judicial oath (Lev. vi, 3-5).

An oath, making an appeal to the divine justice and power, is a recognition of the divinity of the being to whom the appeal is made. Hence to swear by an idol is to be convicted of idolatry. Such an act is accordingly given in Scripture as a proof of idolatry and a reason for condign punishment. "How shall I pardon thee for this? Thy children have forsaken me, and sworn by them that are no gods" (Jer. v, 7; xii, 16; Amos viii, 14; Zeph. i, 5).

This appeal to God was in frequent use among the Hebrews, as a confirmation of both statements (Matt. xxvi, 74) and promises (1 Sam. xix, 6; xx, 17; 2 Sam. xix, 23; xv, 21; 1 Macc. vii, 35. For covenant oaths, see Gen. xxxi, 53 sq.; Josh. ix, 15; 2 Kings xi, 4; 1 Macc. vii, 15; Josephus, *Ant.* xiv, 1, 2. For oaths of allegiance see 2 Sam. xv, 21; Josephus, *Ant.* xv, 10, 4) in both public and private life (e. g. Judg. xxi, 5; 1 Kings xviii, 10; Ezra x, 5; and Gen. xxvii, 37; l, 5; Matt. xiv, 7), as also before the Judges (Exod. xxii, 11; Lev. vi, 3, 5); but the Mosaic law does not attempt to regulate its use. Perjury is forbidden (xix, 12), but on religious grounds, as a profanation of God's name. The usual oath was by Jehovah (Deut. vi, 13; comp. Gen. xiv, 22; Judg. xxi, 7; Ruth i, 17; 1 Sam. xiv, 44; 2 Sam. xix, 7; 1 Kings i, 29; ii, 23; Isa. xix, 18; lxx, 16; Jer. iv, 2; xxxviii, 16), while the apostates swore by strange gods (v, 7; xii, 16; Amos viii, 14; Zeph. i, 5). Sometimes an oath was made by the life of the person addressed (2 Kings ii, 2; 1 Sam. i, 26; xx, 3; comp. Euripides, *Hel.* 835), by the life of the king (1 Sam. xvii, 55; xxv, 26; 2 Sam. xi, 11), or by his head, even when not in his presence (a common oath in Egypt, Gen. xlii, 15, and still used in Persia, Rosenmüller, *Morgenl.* i, 200 sq.; Morier, *Second Journey*; comp. Strabo, iii, 557; Herodotus, iv, 68; Curtius, vi, 11, 18; Lucian, *Catapl.* 11; Suetonius, *Calig.* 27; Vegetius, *De Re Mil.* ii, 5; Tertullian, *Apol.* 52; Zorn, *Biblioth. Antiq.* i, 812 sq. In the Gospel according to Nicodemus, Pilate swears by the safety of Cæsar; comp. Rein, *Röm. Criminalrecht*, p. 534). More rarely, the oath was by the head of the swearer (Matt. v, 36; comp. Virgil, *Æn.* ix, 300; Ovid, *Trist.* iv, 4, 45; Juvenal, vi, 17), by some important member of the body, as the eyes (Ovid, *Amor.* iii, 3, 13; Tibullus, iii, 6, 47; Plautus, *Menæc.* v, 9, 1); by the earth (Matt. v, 35; Sil. Ital. viii, 105; Euripides, *Hippolytus*, 1029); by heaven and the sun (Matt. v, 34; Talmud *Babyl. Berach.* 55; comp. Kor. xci, 5; liii, 1; lvi, 17; Virgil, *Æn.* xii, 176, 197; ix, 429; Aristophanes, *Eq.* 705; Plutarch, 129; Euripides, *Medea*, 746; Pausanias, viii, 18, 1; Philostratus, *Her.* ii, 11; and Wetstein, i, 305); by the angels (Josephus, *War.* ii, 16, 4). It was a part of the punctiliousness of the later Jews to prefer rather to swear by the sun, the earth, or heaven than by God himself (Philostratus, ii, 271). Some swore by the Temple (Matt. xxiii, 16; comp. Lightfoot, p. 280), or parts of it (Matt. xxiii, 16; comp. Wetstein *ad loc.*), or by Jerusalem, the holy city (Matt. v, 35; Mishna, *Kethuboth*, ii, 9; Lightfoot, p. 280). So among other ancient nations, the altar was touched in swearing (comp. Doughtæus, *Analect.* ii, 26; Lakemacher, *Observ.* ix, 112 sq. on Sil. Ital. iii, 82. On the oath CORBAN [q. v.], see Josephus, *Aption*, i, 22, 453).

The form of swearing by Jehovah, always the most usual oath (see above), was very simple—"The Lord do this or that to me if I swear falsely" (Ruth i, 17; 2 Sam. iii, 9, 35; 1 Kings ii, 28; 2 Kings vi, 31), or "As Jeho-

vah liveth" (וְיָהוָה חַי, or אֱלֹהִים חַי, Ruth iii, 13; Judg. viii, 19; 2 Sam. ii, 27; Jer. xxxviii, 16); at greater length, "Jehovah be a true and faithful witness between us" (יְהוָה יְהִי עֵד בֵּינָנוּ לְאֱמֶת, Jer. xlii, 5). Formulas of terrible import were used by the later Jews (see Josephus, *Life*, § 53; comp. Lysias, *Pro. Con. Aristoph.* 32). Of the ceremonies usually observed by those who took oaths we know but little. In patriarchal antiquity it was usual to put the hand under the thigh (Gen. xxiv, 2; xlvii, 29). On this practice Aben-Ezra observes, "It appears probable to me that the meaning of this custom was as if the superior said, with the consent of his slave, 'If thou art under my power, and therefore prepared to execute my commands, put thy hand, as a token, under my thigh.'" Winer, however, thinks that, as it was usual to swear by the more important parts of the human frame, so this was a reference to the generative powers of man. But see on this interpretation, as well as on the general question of swearing by parts of the body, Meiner, *Gesch. der Rel.* ii, 286 sq. It is, however, certain that it was usual to touch that by which a person swore. Other instances may be seen in Nidek, *De Populor. Adorat.* p. 213 sq., and p. 218, which go immediately to confirm the idea advanced by Winer. The Targum of Jonathan (on Gen. xxiv, 2) supposes the hand to have been placed on the section of circumcision (comp. Jerome, *ad loc.*). Gramberg (*Religiönsid.* i, 439) most strangely connects this custom with the licentious worship of Baal and Astarte. (For other views see Dreyer, *Miscel. üb. einige Gegenst. des deutsch. Rechts*, p. 115 sq.; Mähni, in Berthold's *Journ.* vii, 118 sq.).

The more usual employment of the hand was to raise it towards heaven; designed, probably, to excite attention, to point out the oath-taker, and to give solemnity to the act (Gen. xiv, 22, 23). In the strongly anthropomorphic language of parts of the Scripture even God is introduced saying, "I lift up my hand to heaven, and say, I live forever" (Deut. xxxii, 40). Some suppose that a similar license is employed whenever the Almighty is represented as in any way coming under the obligation of an oath (Gen. xxii, 16, 17; Exod. vi, 8; Ezek. xx, 5; Heb. vi, 17). Instead of the head, the phylactery was sometimes touched by the Jews on taking an oath (Maimon. *Shebuoth*, c. 11). Even the Deity is sometimes introduced as swearing by phylacteries (*Tanch.* fol. vi, 3; Otho, *Lex.* p. 757). "Giving the hand" (Ezek. xviii, 12) was a ceremony used between equals; the violation of this pledge was believed to be a most atrocious crime, and hence the prophet denounces vengeance on the king of Babylon, who had broken a covenant after having "given his hand." We meet with the representation of the pledge given by the joining of hands, in connection with some religious ceremony, on many ancient coins, of which the accompanying engravings are specimens. They are taken from golden coins in the British Museum. See HAND. Swearing by dipping the hands in the blood

sq. Some oaths they declared invalid: "If any one swear by heaven, earth, the sun, and such things, although there may be in his mind while using these words a reference to Him who created them, yet this is not an oath; or if any one swear by one of the prophets or by some book of Scripture, having reference to Him who sent the prophet and gave the book, nevertheless this is not an oath" (Maimon. *Hal. Shebuoth*, c. 12). So the Mishna (*Shebuoth*, c. 4): "If any one adjures another by heaven or earth, he is not held bound by this." It is easy to see that oaths of this nature, with authoritative interpretations and glosses so lax, could hardly fail to loosen moral obligation, and to lead to much practical perjury and impiety. Minute casuistical distinctions undermine the moral sense. When a man may swear and yet not swear, by the same formula appear to bind himself and yet be free, contract with his associates an obligation from which he may be released by religious authorities, the basis of private virtue and the grounds of public confidence are at once endangered. Besides, the practice of unauthorized and spontaneous oath-taking, which seems even in the earlier periods of Jewish history to have been too common, became, about the time of our Lord, of great frequency, and must have tended to lower the religious as well as weaken the moral character. Peter's conduct is a striking case in point, who "began to curse and to swear, saying, I know not the man" (Matt. xxvi, 74). An open falsehood thus asserted and maintained by oaths and imprecations shows how little regard there was at that time paid to such means of substantiating truth. The degree of guilt implied in such lamentable practices is heightened by the emphasis with which the Mosaic law guarded the sanctity of the divine name and prohibited the crime of perjury and profanation (Exod. xx, 7; Lev. xix, 12; Deut. v, 11; Matt. v, 33).

The levity of the Jewish nation in regard to oaths, though reproved by some of their doctors (Otho, *Lex.* p. 351; Philo, ii, 194), was notorious; and when we find it entering as an element into popular poetry (Martial, xi, 9) we cannot ascribe the imputation to the known injustice of heathen writers towards the Israelites. This national vice, doubtless, had an influence with the Esenes (q. v.) in placing the prohibition of oaths among the rules of their reformatory order. Modern Orientals habitually use the exclamation *Inshallah* ("in the name of God") on the most trivial occasions.

That no case has been made out by Christian commentators in favor of judicial swearing we do not affirm; but we must be excused if we add that the case is a very weak one, wears a casuistical appearance, and as if necessitated in order to excuse existing usages and guard against errors imputed to unpopular sects, such as the Quakers and Mennonites. If inferential and merely probable conclusions, such as the case consists of, may be allowed to prevail against the explicit language of Jesus and James, Scripture is robbed of its certainty, and prohibitions the most express lose their force. For instance, it has been alleged that our Lord himself took part in an oath when, being adjured by the high-priest, he answered "Thou hast said" (Matt. xxvi, 63, 64). But what has this to do with his own doctrine on the point? Placed at the bar of judgment, Jesus was a criminal, not a teacher, bound by the laws of his country—which it was a part of his plan never unnecessarily to disregard—to give an answer to the question judicially put to him, and bound equally by a regard to the great interests which he had come into the world to serve. Jesus did not swear, but was sworn. The putting the oath he could not prevent. His sole question was, Should he answer the interrogatory?—a question which depended on considerations of the highest moment, and which he who alone could judge decided in the affirmative. That question in effect was, "Art thou the Messiah?" His reply was a simple affirmative. The employment of the adjuration was the

Coins struck to Commemorate Peace.

of a victim was the most solemn form of oath among the ancient Greeks, and was chiefly used in concluding alliances offensive and defensive. See COVENANT.

The Rabbinical writers indulge in much prolixity on the subject of oaths, entering into nice distinctions, and showing themselves exquisite casuists. A brief view of their disquisitions may be seen in Otho, *Lex.* p. 347

act of the magistrate, to have objected to which would have brought on Jesus the charge of equivocation, if not of evasion, or even the denial of his "high calling." The general tendency of this article is to show how desirable it is that the practice of oath-taking of all kinds, judicial as well as others, should at least be diminished till, at the proper time, it is totally abolished; for whatsoever is more than a simple affirmation cometh from the Evil One, *ἐκ τοῦ πονηροῦ* (Matt. v, 37), and equally leadeth to evil. See Lydii *Diss. de Juramento*; Nicolai, *De Juram. Hebræorum, Græcorum, Romanorum, aliorumque Populorum*; Seldenii *Diss. de Juramentis*; Molembecii *De Juramento per Genium Principis*; Spencerii *Diss. de Juramento per Anchialum*—all of which may be found in vol. xxvi of Ugolini's *Thesaurus Antiq. Sacr.* See also Hansen, *De Jurament. Vett.* in Grævius, *Thesaurus*; Carpov, *Appur.* p. 652 sq.; Steinler, *De Jurejur. Sec. Discip.* Heb. (Lips. 1736); Purmann, *De Jurejur. ex Mente Hebr.* (Frankf. 1782); Valckenaer, *De Ritib. in Jurejur. a Vet. Hebr. et Græc. Observ.* (Frankf. 1785; and in Oelrich's *Collect.* I, ii, 175 sq.); especially Bassek, *De Jurejur. Vet. impr. Rom.* (Traj. ad Rh. 1727); Lasaulx, *Ueb. d. Eid bei d. Griech.* (Witzb. 1844); *Ueb. d. Eid bei d. Röm.* (ibid. 1844); Otho, *Lex. Rabbin.* p. 347 sq. A more recent authority may be found in Stäudlin, *Geschichte der Vorstell. s. v. "Eide"*; see also Tyler, *Oaths: their Origin*, etc. See OATH.

**SWEARING, PROFANE**, was severely condemned in the ancient Church, and seems to have been a common practice. Swearing, or foolish or wicked adjurations by any creature or demon, by the emperor's genius, by angel and by saint, were reprobated. Perjured persons were placed under special penance. Profanity is also punishable by the civil law of Great Britain, and by the laws of some of the states of the United States.

**Sweat** (סִיט, Gen. iii, 19; שִׁיט, Ezek. xlv, 18; ἰδρώς, Luke xxii, 44) was one of the physical phenomena attending our Lord's agony in the garden of Gethsemane as described by Luke (xxii, 44): "His sweat was as it were great drops (literally clots, Σπυγαί) of blood falling down to the ground." The genuineness of this verse and of the preceding has been doubted, but is now generally acknowledged. They are omitted in A and B, but are found in the Codex Sinaiticus (Σ), Codex Bezae, and others, and in the Peshito, Philoxenian, and Curetonian Syriac (see Tregelles, *Greek New Test.*; Scrivener, *Introd. to the Crit. of the New Test.* p. 434), and Tregelles points to the notation of the section and canon in ver. 42 as a trace of the existence of the verse in the Codex Alexandrinus.

Of this malady, known in medical science by the term *diapedesis*, there have been examples recorded both in ancient and modern times. Aristotle was aware of it (*De Part. Anim.* iii, 5). The cause assigned is generally violent mental emotion. "Kammergiesser," quoted by Dr. Stroud (*Phys. Cause of the Death of Christ*, p. 86), "remarks, 'Violent mental excitement, whether occasioned by uncontrollable anger or vehement joy, and in like manner sudden terror or intense fear, forces out a sweat, accompanied with signs either of anxiety or hilarity.' After ascribing this sweat to the unequal constriction of some vessels and dilatation of others, he further observes: 'If the mind is seized with a sudden fear of death, the sweat, owing to the excessive degree of constriction, often becomes bloody.'" Dr. Millingen (*Curiosities of Medical Experience*, p. 489, 2d ed.) gives the following explanation of the phenomenon: "It is probable that this strange disorder arises from a violent commotion of the nervous system, turning the streams of blood out of their natural course, and forcing the red particles into the cutaneous excretories. A mere relaxation of the fibres could not produce so powerful a revulsion. It may also arise in cases of extreme debility, in connection with a thinner condition of the blood."

The following are a few of the instances on record which have been collected by Calmet (*Diss. sur la Sueur*

*du Sang*), Millingen, Stroud, Trusen (*Die Sitten, Gebräuche und Krankheiten d. alt. Hebr.* [Breslau, 1853]), in addition to those given under BLOODY SWEAT. Scherkius (*Obs. Med.* iii, 458) says that in the plague of Misenno in 1554 a woman who was seized sweated blood for three days. In 1552 Conrad Lycosthenes (*De Prodigis*, p. 623, ed. 1557) reports, a woman sick of the plague sweated blood from the upper part of her body. According to De Thou (I, xi, 326, ed. 1626), the governor of Montemar, being seized by stratagem and threatened with death, was so moved thereat that he sweated blood and water. In the *Mélanges d'Histoire*, (iii, 179), by Dom Bonaventure d'Argonne, the case is given of a woman who suffered so much from this malady that, after her death, no blood was found in her veins. Another case of a girl of eighteen who suffered in the same way is reported by Mesaporiti, a physician at Genoa, accompanied by the observations of Valisneri, professor of medicine at Padua. It occurred in 1703 (*Phil. Trans.* No. 308, p. 2144). There is still, however, wanted a well-authenticated instance in modern times observed with all the care and attested by all the exactness of later medical science. That given in Caspar's *Wochenschrift*, 1848, as having been observed by Dr. Schneider, appears to be the most recent, and resembles the phenomenon mentioned by Theophrastus (*London Med. Gaz.* 1848, ii, 958). For further reference to authorities, see Copeland, *Dict. of Medicine*, ii, 72.

**Swedberg, JESPER**, bishop of Skara, in Sweden. His father's name was *Jacobson*, but, according to a frequent Swedish custom, the son, on taking his degree at the university, assumed the name of Swedberg. He was born Aug. 28, 1653, in the province of Dalecarlia. Having received a university education, he was ordained in 1685, and became successively court chaplain, professor of theology in the University of Upsala (1692), and provost of the cathedral there. He was a pious, eloquent, and active man, a somewhat voluminous writer, chiefly on devotional subjects. He stood high in his native country, and many of his hymns are still among the favorite ones in the Swedish Lutheran service. He was the father of Emanuel Swedenborg. He was made bishop of Skara in 1702, about the time that he visited England. The Swedish Church in London and the Swedish congregations settled on the banks of the Delaware, in America, were placed by the king under his episcopal supervision; and his letters to the latter colony, still preserved in the records of the Church at Wilmington, show a warm interest in their affairs. From the information which he had obtained from this correspondence he published a work concerning America, a copy of which is in the library of Harvard College. He also published a *Psalm-Book* (1694), which was suppressed as pietistic; and the first *Swedish Grammar* (1722). Bishop Swedberg died July 26, 1735. (W. B. H.)

**Sweden**, a kingdom in the northern part of Europe. In conjunction with Norway it forms the Scandinavian peninsula, occupying itself the larger part of this peninsula. Its geographical position is between lat. 55° 20' and 69° N. and long. 11° 10' and 24° 10' E., and it extends not far from 1000 miles from north to south, and in its greatest breadth 300 miles from east to west. It is bounded on the north by Norwegian Lapland, east by Russia, south by the Gulf of Finland and the Baltic, and west by the Sound, the Cattegat, and Norway. The country has the characteristic features of all northern regions. Many parts of it, especially in the north, are barren and unproductive. Its immense forests are a source of great revenue, the wood being used not only for fuel, but entering quite generally into the construction of the exterior as well as the interior parts of all buildings, and furnishing also a profitable article for export. All the grains peculiar to northern countries are raised in Sweden, not only in sufficient quantity for home consumption, but also for export.

In some of the metals it is very rich, and no small part of the wealth of the country comes from the working of mines of gold, silver, iron, copper, etc. The description which has been given of Norway, so far as the natural productions of the country are concerned, will apply to Sweden, and renders any minute detail in this respect unnecessary. See **NORWAY**.

The great political divisions of Sweden are three—Gothland, Svealand, and Norrland. Gothland has thirteen subdivisions, Svealand eight, and Norrland five—the whole giving an area of 171,730 square miles, and having a population of a little more than four millions and a quarter. The largest city is Stockholm, having a population in 1874 of nearly 150,000. The only other city of considerable size in Sweden is Gothenburg, which has a population of over 60,000; but there is quite a large number of cities and towns having a population of over 12,000.

**I. History.**—The early history of Sweden is involved in great obscurity, nor do we find much in that history that will interest the general reader until we come down to the time of Gustavus Vasa, who, with great heroism, made an attack on Christian II, and succeeded in obtaining the throne in 1523. The next character that stands out prominently on the pages of Swedish history is Gustavus Adolphus, the great champion of the Protestant faith, and the powerful foe with whom Austria had to contend during the important period of the Thirty Years' War. Gustavus was most fortunate in his counsellors and statesmen, especially in his chancellor, the wise and good Oxenstiern (q. v.), who, after the death of his sovereign at the battle of Lutzen in 1662, was intrusted with the management of affairs during the minority of Christina, the daughter of Gustavus, who succeeded to the throne. Passing over a few years, we come to the period during which the celebrated Charles XII sat on the throne, whose wonderful martial exploits form one of the most brilliant pages of modern history. At the commencement of his reign the kingdom of Sweden was at the height of its power and of its glory. When he closed his administration, and, by his death, Sweden came under the dominion of his sister, Ulrica Eleonora, its prospects were far from flattering. She surrendered herself to the control of her husband, Frederick of Hesse-Cassel, whose administration of the affairs of Sweden was most unfortunate and humiliating. In making terms of peace with the enemies with whom she had been at war for so long a time, cessions of large territories which were once within the boundaries of the kingdom had to be made. Ulrica dying without issue, the throne passed into the hands of Adolphus Frederick, in fulfilment of one of the terms of peace prescribed by the empress of Russia in the treaty of 1743. His reign of twenty years was one of constant commotion and trouble. At his death, in 1771, his son Gustavus III succeeded to the crown and reigned twenty years, when he was assassinated, and his son Gustavus IV, a minor in age, came to the throne, with his uncle, the duke of Södermannland, as regent. For various reasons the young king, after a few years, was compelled to abdicate, and his uncle, the regent, under the title of Charles XIII, became king. Upon his decease, Feb. 5, 1818, the French marshal Bernadotte was elected king, taking the title of Charles XIV. During his reign of twenty-six years, Sweden enjoyed a good degree of prosperity, and recovered, in considerable measure, what she had lost under the reigns of his predecessors. At his death, in 1844, his son Oscar I succeeded him and perfected the plans of his father for developing the resources of the country and adding to its material wealth. His reign lasted fifteen years (1844-59), during the last two of which, on account of his ill-health, his son and successor had acted as regent. This son, Charles XV, was king for thirteen years (1859-72). During his administration, liberal ideas gained the ascendancy, and the result was the introduction into the government of many constitutional re-

forms. Charles died in 1872, and was succeeded by the present king, Oscar II.

**II. Religion.**—Christianity was first introduced into Sweden in the year 830 by Anshar, a monk of Corbey, Westphalia, although the Swedish historians assert that many of the people embraced the Gospel still earlier, and that in 813 a church was erected at Linköping by Herbert, a Saxon ecclesiastic. The labors of Anshar were followed up by his successor, Rembert, who founded several churches, but gained few converts. Several of Rembert's successors failed to prosecute the work, and Christianity became almost extinct; and it was not until 1026 that Sweden became a Christian state. The Reformation commenced in Sweden in 1524 under Gustavus I, who secretly encouraged the preaching of Lutheran doctrines, in order, when he had formed a party of sufficient strength, to seize the revenues of the dominant Church and abolish its worship. One of the most popular and able missionaries of the Reformation was Olaf Petri, who published the New Test. in the Swedish language. The bishops called upon the king to suppress the translation, who treated their proposal with indifference, and consented to a public disputation at Upsala between the Romish and Protestant parties. This controversy tended to open the eyes of the people to the errors of the Romish creed, and they welcomed the missionaries to their houses. Gustavus seized at once two thirds of the whole ecclesiastical revenues, and authorized the clergy to marry and mix with the world. He also declared himself a Lutheran, nominated Lutherans to the vacant sees, and placed Lutherans in the parish churches. In the course of two years the Romish worship was solemnly and universally abolished, and the Confession of Augsburg was received as the only rule of faith. John, who succeeded to the throne in 1569, had married Catharine of Poland, a Roman Catholic, and soon displayed a decided leaning towards the old faith. In the fervor of his zeal he prepared a new liturgy, entitled "Liturgy of the Swedish Church, Conformable to the Catholic and Orthodox Church." This liturgy was rejected by the mass of the clergy of both churches, and even the papal sanction was refused. Still, the king so far prevailed as to induce the Swedish Church to revise its liturgy, and to declare all opposed to revision guilty of schism. On his death, his brother Charles became regent, and one of his first acts was to induce the Synod of Upsala (1598) to abolish the liturgy prepared by the late king and depose those ecclesiastics who had defended it. Sigismund, hearing of these proceedings, came to Sweden and inaugurated violent measures in behalf of the Romish faith, which were so generally opposed by clergy and people that he returned in disgust to Poland. Charles took up the work of reform, caused a decree to be published in 1600 that the Confession of Augsburg should be the only rule of faith in Sweden, that all Romish priests should leave the country in six weeks, and prescribing general conformity under penalty of banishment. Under queen Christina the Church sank into a deplorable condition of spiritual declension and decay. There was a religious awakening, however, under the preaching of Ulstadius, who suffered for his zeal by a long imprisonment. To put an end to what was called in ridicule *Pietism*, an act was passed in 1713, and a still more stringent one in 1726, prohibiting, under heavy penalties, all private religious meetings or conventicles. These harsh measures and the desire for true spirituality led a number of the people to seek permission to have the old books used in the churches of their parishes, or to have regularly ordained pastors serve them, promising themselves to maintain them, in addition to paying all dues, as formerly, to the parish priest. This was refused, and they withdrew from the worship of the national Church, enduring many disabilities, as denial of marriage, fines, and penalties. It was not till 1873 that dissenting ministers were allowed to marry.

The established Church of Sweden is Lutheran, all

sects of Christians, however, being tolerated. The king nominates the archbishop and the bishops from a list of names presented to him by the ecclesiastical authorities. The archbishop of Upsala is the head of the Swedish Church, having under him eleven bishops. All ecclesiastical matters of importance are subject to the decision of the king. A revolution in religious matters is now going on in Sweden which cannot fail, in time, to make itself felt in its influence on the future destiny of the national Church. Especially prosperous have been the missionary operations of the Baptists under the labors of the Rev. Andreas Wiberg and his fellow-laborers. Thousands of converts have been gathered into Baptist churches, and the work of evangelization seems to be but in its infancy.

In 1854 the Rev. O. P. Petersen was commissioned by the Missionary Society of the Methodist Episcopal Church to open missions in the Scandinavian missionary; he had, as an assistant missionary, Peter Larssen, who went to Sweden and visited several families at Calmar. A mission was begun in 1864 at Wisby, in the island of Gothland, and from that time the work has been very prosperous. The General Conference of 1876 ordered the Swedish mission to be organized into an Annual Conference, which was effected under the presidency of bishop Andrews at Upsala, Aug. 7, 1876. The following is a summary of the statistics of the mission for 1879: Number of ministers, 54; local preachers, 69; Sunday-schools, 138; teachers and officers, 505; Sunday-school scholars, 5500; members and probationers, 6800; churches, 38; probable value of churches, \$396,825.

III. *Education*.—To the credit of Sweden it is to be said that she has provided most liberally for the education of the young. There is a common-school system, instruction being gratuitous, and children not attending the regular government schools are obliged to furnish certificates that they are under the tuition of private teachers. The result of all this careful and systematic attention to education is that seldom is a Swede found who cannot read and write. The higher seats of learning are well patronized. The University of Upsala takes high rank among the literary institutions of Northern Europe. Its home is in the town from which it takes its name—Upsala, forty-five miles north-west of Stockholm, a place of some 12,000 inhabitants. The attendance of students is large, as high sometimes as 1500, who gather here not only to pursue the regular course of collegiate study, but to listen to lectures from the professors of theology, law, medicine, and philosophy. The university has a valuable library of over 100,000 volumes, several museums and collections, a botanical garden, and an observatory. Both the army and the navy are well represented by schools, the former having two well-conducted institutions, one at Carlberg and another at Marieberg, designed especially for the training of officers of the engineering and artillery departments, and the latter having a school for naval cadets at Stockholm. There are to be found in Sweden—as there are in all countries where the people are well educated—in all towns and villages, libraries, museums of art, etc., societies for the promotion of science and literature, publications in the form of newspapers and periodicals of many kinds, so that the diffusion of knowledge is wide-spread and healthy.

IV. *Literature*.—See Adlerfeldt, *Histoire Militaire de Charles XII* (Paris, 1741, 3 vols. 12mo); Brown, *Memoirs of the Sovereign of Sweden and Denmark* (Lond. 1804, 3 vols. 8vo); Arndt, *Erinnerungen aus Schweden* (Berlin, 1818, 8vo); Dunham, *History of Denmark, Sweden, and Norway* (Lond. 1833-34, 3 vols. 12mo); Gall, *Reise durch Schweden in 1836* (Bremen, 1838, 2 vols. 12mo); Laing, *Tour in Sweden in 1838* (Lond. 1839, 8vo); Sylvanus, *Rambles in Sweden and Gothland, with Etchings by the Way-side* (ibid. 1847, 8vo); Tham, *Beskrifning öfver Sveriges Rike* (Stockh. 1849-56, 7 vols. 8vo); Maryatt, *Year in Sweden and Gothland* (Lond. 1862, 8vo).

**Swedenborg, EMANUEL**, the founder of the New Jerusalem Church (q. v.), was born in Stockholm, Sweden, Jan. 29, 1688. His ancestry were not noble, but of high respectability among the miners of the great Stora-Koppaberg, in the province of Dalecarlia. His father, Jesper Swedberg (q. v.) or Svedberg, married Sarah, daughter of Albrecht Behm, assessor of the Royal Board of Mines. Emanuel was their second son and third child. After the elevation of the father to the prelate as bishop of Skara, the name was changed and the family ennobled by queen Ulrica Eleonora in 1719.

Reared amid pious influences, the accounts we have of his earliest years seem to indicate a childhood of unusual thoughtfulness and susceptibility to religious impressions. He says of himself, "From my fourth to my tenth year my thoughts were constantly engrossed by reflecting on God, on salvation, and on the spiritual affections of man. I often revealed things in my discourse which filled my parents with astonishment, and made them declare, at times, that certainly the angels spoke through my mouth." Great care was bestowed on his education, which was acquired principally at the University of Upsala, where he took his degree of Ph.D. in 1709, in his twenty-second year. He then visited England, spending a year at Oxford and three more on the continent of Europe. At this time he was already a member of the Royal Society of Sciences of Upsala, corresponding with it while abroad. He sought everywhere the society of the learned, and commenced publishing works almost immediately on his return, some of them poetical, others mathematical. His mind took an industrious and practical turn, and for many years he was almost wholly employed in scientific pursuits, in mining, engineering, and physiological studies. His family connections were influential—one sister married Eric Benzelius, afterwards archbishop of Upsala; another was the wife of Lars Benzelius, governor of a province, whose son became a bishop; while other members of the family rose to ecclesiastical and civil dignities. He had a large circle of friends among the nobility and higher classes, and enjoyed abundant patronage at court. His rank entitled him to a seat in the Swedish Parliament, and about 1721 he was appointed by Charles XII assessor of the Board of Mines, which made him also a member of the Cabinet. In 1724 he was solicited to accept the professorship of mathematics in the University of Upsala, but preferred the position he already occupied.

Twelve years later we find him beginning to publish his philosophical works: first, *Opera Philosophica et Mineralia* (Leipsic and Dresden, 3 vols. fol.), under the patronage of the duke of Brunswick; afterwards, his *Principia: The Principles of Natural Things, or New Attempts at a Philosophical Explanation of the Phenomena of the Elementary World*:—then came *Outlines of a Philosophical Argument on the Infinite and the Final Cause of Creation, and on the Intercourse between the Soul and the Body*:—followed, a few years later, by the *Economy of the Animal Kingdom* (Amsterdam, 2 vols. 4to); and the *Animal Kingdom* (vol. i, at the Hague; vol. ii, Lond. 1745). There were many other tracts, essays, and volumes of minor importance, his last work of this nature being the *Worship and Love of God*. These works are generally acknowledged as belonging to the highest order of philosophical thought. His declared object in all his investigations was to behold the wisdom and goodness of the Creator in all his works; giving his life to the discovery of truths, determined to rise through their different degrees to those of the highest order, for the sake of doing something useful to mankind and advancing the best interests of society. The accounts show him to have been at this period a man of solid virtue, piety, and decorum. These are the "rules of life" which he wrote down and preserved for his own guidance:

1. Often to read and meditate on the Word of God.
2. To submit everything to the will of Divine Providence.

3. To observe in everything a propriety of behavior, and always to keep the conscience clear.

4. To discharge with fidelity the functions of my employment and the duties of my office, and to render myself in all things useful to society.

He was a member of the principal scientific and philosophical societies of Northern Europe.

In 1745, at the age of fifty-seven—in the full maturity of his powers, in the enjoyment of honorable station, and of an enviable reputation at home and abroad for worth, learning, and extraordinary capacity—he ceased from his other labors and began to devote himself to theology, to the promulgation of the doctrines of the New Jerusalem Church. Having been, as he declared, called by the Lord to be the messenger of a New Dispensation of Heavenly and Divine Truth, he was no longer at liberty to pursue his former courses of occupation and study, but thenceforward applied himself, with all the diligence of his character, to the duties of his new office. The following are some of his own words with respect to this "call" and mission, written to Rev. Dr. Hartley, rector of Winwick, England, in reply to inquiries. After speaking of the circumstances of his previous career, he continues, "But I regard all that I have mentioned as matters respectively of little moment; for, what far exceeds them, I have been called to a holy office by the Lord himself, who most graciously manifested himself in person to me, his servant, in the year 1743, when he opened my sight to the view of the spiritual world, and granted me the privilege of conversing with spirits and angels, which I enjoy to this day. From that time I began to print and to publish various *arcana* that have been seen by me or revealed to me—as, respecting heaven and hell, the state of man after death, the true worship of God, the spiritual sense of the Word, with many other most important matters conducive to salvation and true wisdom. The only reason of my later journeys to foreign countries has been the desire of being useful, by making known the *arcana* intrusted to me." At another time, late in life, he writes, to the landgrave of Hesse-Darmstadt, "The Lord, our Saviour, had foretold that he would come again into the world, and that he would establish there a new Church. He has given this prediction in the Apocalypse (xxi and xxii), and also in several places in the evangelists. But, as he cannot come into the world again in person, it was necessary that he should do it by means of a man, who should not only receive the doctrine of this new Church in his understanding, but also publish it by printing; and so the Lord had prepared me for this office from my infancy; he has manifested himself in person before me, his servant, and sent me to fill it. This took place in the year 1743. He afterwards opened the sight of my spirit, and thus introduced me into the spiritual world, and granted me to see the heavens and many of their wonders, and also the hells, and to speak with angels and spirits, and this continually for twenty-seven years. I declare, in all truth, that such is the fact. 'This favor of the Lord in regard to me has only taken place for the sake of the new Church which I have mentioned above, the doctrine of which is contained in my writings.' Except in this chief object and in the character of his writings, his habits of life underwent no change. His outward demeanor remained the same, with an increase of spiritual piety and prayerfulness, the same dignity and quiet urbanity of manner marked his intercourse with others, the same solid sense and enlightened intelligence characterized his conversation. His intercourse with the best society of the realm and the most eminent men of his time was uninterrupted. He retained his seat in the Swedish Parliament, and became more prominent in State affairs than he had ever been before.

Swedenborg's first theological publication, and his largest work, is the *Arcana Cœlestia*, or *Heavenly Mysteries*, a commentary, in eight quarto volumes, on the book of Genesis, with a large part of Exodus; in which, with many other observations and doctrines, the text is

unfolded as to what he calls its "spiritual sense." The design seems to be to discover a Christian meaning and application in all things of the "law and the prophets;" the method pursued does not appear to be much unlike that of other Christian commentators, except in the extent to which the principles of symbolism are carried and the results arrived at. He maintains that such a secondary sense runs through all the books given by immediate divine dictation—Law, Former Prophets, Later Prophets, and Psalms—and that these books are written according to a uniform law, called that of "correspondence," or the law of universal analogy between spiritual and natural things, which law it is one great object of his writings to unfold. His citations and comparison of Scripture texts are remarkably full and exhaustive.

From the time of his alleged "call," he wrote and published almost constantly until his death. The *Arcana* was finished in 1756. His succeeding works are, *An Account of the Last Judgment, and the Destruction of Babylon; showing that all the Predictions in the Apocalypse are at this Day Fulfilled: Being a Relation of Things Heard and Seen* (Lond. 1758):—*Concerning Heaven and its Wonders, and concerning Hell; from Things Heard and Seen* (ibid. 1758):—*The Four Leading Doctrines of the New Jerusalem, viz. Concerning the Lord, Sacred Scripture, Faith, and Life* (Amster. 1763):—*Angelic Wisdom concerning the Divine Love and the Divine Wisdom* (ibid. 1763):—*Angelic Wisdom concerning the Divine Providence* (ibid. 1764):—*The Apocalypse Revealed, wherein are Disclosed the Arcana there Foretold, which have hitherto Remained Concealed* (ibid. 1766):—*The Apocalypse Explained according to the Spiritual Sense; in which are Revealed the Arcana which are there Predicted and have been hitherto Deeply Concealed* (published after his death, in 5 vols. 8vo), a much larger and fuller work than the preceding:—*The Delights of Wisdom concerning Conjugal Love: after which follow the Pleasures of Insanity concerning Scortatory Love* (Amster. 1768). The *True Christian Religion, containing the Universal Theology of the New Church, Foretold by the Lord in Daniel vii, 13, 14, and in Revelation xxi, 1, 2* (ibid. 1771), contains his body of divinity, and is divided into fourteen chapters, under appropriate heads. There are also a number of minor treatises and tracts. All these works were written originally in Latin, and were distributed by the author to the principal universities and seats of learning.

In addition to his philosophical acquirements, Swedenborg was learned also as a Hebrew and Greek scholar. He died in London, March 29, 1772, maintaining to the last the truth of his alleged disclosures. He did not attempt to collect congregations, nor organize a church. For an account of the followers of his doctrines, see *NEW JERUSALEM CHURCH*. (W. B. H.)

**Sweet, Elisha**, a minister of the Methodist Episcopal Church, was born at Gorham, Ontario Co., N. Y., in 1810. He was admitted into the Genesee Conference in 1847, in which conference and the East Genesee he spent his ministerial life, three years of which he was superannuated. He died Sept. 7, 1869. See *Minutes of Annual Conferences*, 1870, p. 281.

**Sweet, John Davis**, a Baptist minister, was born at Kingston, Mass., Oct. 16, 1838. He was the son of a Unitarian clergyman. From his early life he developed a marked taste for literary pursuits, and in his preparatory studies took high rank as a scholar. In the fall of 1857 he entered Harvard College, one year in advance, and distinguished himself by his application to his college tasks. Having overworked himself, he sought to recruit his health by foreign travel. Returning home, he embarked in business; but, his friends urging him to direct his attention to the ministry, he abandoned his secular pursuits, and was ordained as pastor of the Baptist Church in Billerica, Mass., in October, 1863, where he remained nearly five years—1863–68—

securing in a marked degree the affection of his Church and the respect of the people of the village in which he had his home. He was publicly recognised as pastor of the First Baptist Church in Somerville, Mass., May 4, 1868. He had commenced his work in the new field of his labor, and was prosecuting it with rare success, when he was stricken down by disease. One of the last records which he made in his diary a few days before his death was the following: "In looking over my ministry of nearly seven years, I feel I ought to drop on my knees and thank God that he ever called me to this glorious work. Some are always speaking of the trials of the ministry; but I can say, on reviewing mine, that it has been one bright day, with few clouds to dim the brightness. I love the work." He died in August, 1869. See Warren [G. F.], *Memorial Sermon*. (J. C. S.)

**Sweet Cane.** See CANE.

**Sweet Singers**, a small Scottish sect, called from their founder, John Gib, the GIBBIES (q. v.). They forsook all worldly business, and professed to be entirely devoted to fasting and prayer in the open fields. The name "Sweet Singers" was given to them from their habit of "wailing a portion" of the more mournful psalms. They renounced and denounced the use of metrical psalms, the translation of the Bible, Longer and Shorter Catechisms, the Confession of Faith, the Covenant, names of months and days, the use of churches and church-yards; all kinds of tolls, custom, and tribute, all sports, and, indeed, everything and everybody but themselves. They finally undertook a pilgrimage to the Pentland Hills, where they remained some days, with a resolution to sit till they saw the smoke of the desolation of Edinburgh, which their leader had predicted. They were committed to prison in Edinburgh in April, 1681, but were soon released. See Blunt, *Dict. of Sects*, s. v.; McCrie, *Scottish Church History*, ii, 195.

**SWEET SINGERS**, the English RANTERS (q. v.) of the 17th century, so called by some contemporary writers.

**Sweet Wine.** See WINE.

**Sweetman, Joseph**, a Presbyterian minister, was born at Freehold, Monmouth Co., N. J., March 9, 1774. His mother was a granddaughter of Walter Kerr, who was banished from Scotland for his unwavering adherence to Covenanter principles and his opposition to prelacy. When Joseph was about three months old, his parents removed to Charlton, Saratoga Co., N. Y. He graduated at Union College in 1797, being one of the three students that composed the graduating class, and receiving its first honors. He studied theology privately, was ordained by Albany Presbytery, and installed pastor of Salem Church, Washington Co., N. Y., Sept. 17, 1800. On account of failing health, he resigned his pastoral charge Oct. 8, 1817, and was never again installed pastor of a Church, but from that time till his death devoted himself to aiding young men in preparing for the ministry. He was the founder of the "Sweetman Scholarship" in Princeton Theological Seminary, N. J. He died Dec. 10, 1863. Mr. Sweetman was vigorous in intellect and eloquent in manner. He was a very benevolent man; that he might have to give, he was industrious, economical, and prudent. See Wilson, *Presb. Hist. Almanac*, 1863, p. 57; also 1864, p. 198.

**Sweetser, Seth**, D.D., a Congregational minister, was born at Newburyport, Mass., March 15, 1807. He was prepared for college in Newburyport Academy, under the tuition of Leonard Withington, D.D., and graduated from Harvard College in 1827. He then taught school for two years (1827-29) in Geneseo, N. Y., after which he returned to Harvard College as a tutor, remaining there until 1831, when he entered Andover Theological Seminary, where, after a full course of three years, he graduated in 1834. He was ordained Nov. 23,

1836, and was called to Gardiner, Me., where, after preaching two years, he was dismissed, Nov. 8, 1838, to the pastorate of the Calvinist Church, Worcester, Mass., was installed Dec. 19 of the same year, and remained in this office until his death, having had a colleague after 1874. Here the great work of his life was done. He was a trustee of Leicester Academy and of Phillips Academy, Andover, from 1850, and president of the latter board from 1864. He was a trustee of the Worcester Free Industrial Institute and of Worcester Memorial Hospital. He was also a member of the council of the American Antiquarian Society, a corporate member of the American Board of Commissioners for Foreign Missions from 1854, one of the vice-presidents of the American Home Mission Society from 1864, and president of the American Education Society. From 1866 to 1873 he was overseer of Harvard College, during which time he published various *Reports*, *Sermons*, and *Addresses*; also several articles in the *Bibliotheca Sacra*. He died from the effect of a spinal injury and pulmonary disease combined March 24, 1878. (W. P. S.)

**Swell**, in music, a set of pipes in an organ with a separate key-board, and forming a separate department, which are capable of being increased or diminished in intensity of sound by the action of a pedal on a series of shades or shutters overlapping each other like Venetian window-blinds, within which the pipes in question are enclosed. On a well-constructed swell a practiced performer can imitate not only a gradual *crescendo* and *diminuendo*, but also a *sforzando*, a very small opening sufficing to make an immediate burst upon the ear; while, when the shutters are closed, an imitation of an echo is produced.

**Swelling** (גִּבּוֹן, *gabn*, "excellency," "pride," etc.) OF JORDAN is a phrase occurring in the A. V. at Jer. xii, 5; xlix, 19; l, 44, but which should be rendered "pride of Jordan," as in Zech. xi, 3. It refers to the verdure and thickets along the banks, lined with willows, tamarisks, and cane, in which the lions once made their covert; but has no allusion to overwhelming billows from a rise of the waters (Reland, *Palest.* p. 274). See JORDAN.

**Swert** (or **Sweerts**), FRANCIS, a Flemish historian and antiquary, was born in Antwerp in 1567. He devoted much of his time to study, and published a great many works which brought him considerable reputation: *Narrationes Historice in Deorum Deorumque Capita*, etc. (Antwerp, 1602, 4to); *Lacrime in Funere Ab. Ortelii, cum Ortelii Vita* (1601, 8vo); *Meditationes J. Cardinalis de Turrecremata in Vitam Christi, cum Vita Card.* etc. (Cologne, 1607, 12mo); *Selectæ Orbis Christianæ Deliciæ* (ibid. 1608, 1625, 8vo). He died in 1629.

**Swift, Elisha Pope**, D.D., an eminent divine of the Presbyterian Church, was born at Williamstown, Mass., Aug. 12, 1792. His paternal grandfather was the Hon. Heman Swift; his father, the Rev. Seth Swift, pastor at one time of the Congregational Church in Williamstown; and his mother was a descendant of Rev. John Eliot, well known in the annals of American history as the "Apostle to the Indians." He graduated with honor at Williams College, Sept. 1, 1813, and at the Theological Seminary, Princeton, N. J., in 1816; was licensed by New Brunswick Presbytery at Lawrenceville, N. J., April 24, 1816, and on Sept. 19 of the same year he met the American Board of Commissioners for Foreign Missions at Hartford, Conn., and was accepted as a foreign missionary, though he was informed that he could not be sent abroad for some months. On Sept. 3, 1817, he was ordained by a Congregational council as an evangelist to the heathen, the late Lyman Beecher, D.D., preaching the ordination sermon in Park Street Church, Boston, Mass. The interval between his licensure and his entering a permanent field of labor, a period of some two and a half years,

was filled up with laborious efforts in behalf of the foreign missionary cause—travelling, for the most part, on horseback, preaching almost daily, collecting funds, forming auxiliary societies, and awakening the people everywhere to the claims of this great enterprise. At length he was obliged, on account of the want of funds on the part of the board, to relinquish his long-cherished desire of being a foreign missionary. In October, 1818, he became pastor of the Church in Dover, where he labored diligently, but under great discouragements; in November, 1819, he was installed by a committee of the Redstone Presbytery as pastor of the Second Presbyterian Church of Pittsburgh, Pa., and immediately entered upon his labors in that community, which he subsequently adorned and blessed until he became secretary and general agent for the Western Foreign Missionary Society, March 1, 1833. "This society," to use his own language, "has since become, as it was intended at its very outset it should, the Board of Foreign Missions of the General Assembly of the Presbyterian Church" (a history of which is published in the *Presb. Hist. Almanac* for 1861). He was also deeply interested in theological education, and took an active part in the establishment of the Allegheny Theological Seminary, Allegheny, Pa.; and was connected with it from its inception until his death, a period of forty years. He was one of the first directors, also an agent to collect funds, and the first instructor in theology, which office he held for about two years and for which he declined to receive any remuneration. In 1835 he received a unanimous call to become the pastor of the First Presbyterian Church in Allegheny, and after about twelve months, during which time he made such arrangements as to secure the continued efficiency of the Missionary Society, he accepted the invitation, and was installed in this, his last, longest, and most important pastorate. He died April 3, 1865. Dr. Swift was a man of uncommon power of intellect and unusual tenderness of heart. As a Christian he was pre-eminent for his humility and devotion. He took a deep interest in all educational, eleemosynary, or Christian enterprises, and was a patriot in the truest sense of the term. He was a leader in all the various courts of the Church, made so by the breadth of his views, the wisdom of his counsels, the integrity and loveliness of his character, and his manifest freedom from all selfishness and ambition. It was, however, as a preacher that he shone most conspicuously. See Wilson, *Presb. Hist. Almanac*, 1866, p. 172.

**Swift, Job**, a Congregational minister, was born at Sandwich, Mass., June 17 (O. S.), 1743, and removed in early youth to Kent, Conn. He graduated from Yale College in 1765, having made a profession of religion while in college. He studied theology under Dr. Belamy, was licensed to preach in 1766, and in 1767 became pastor of the Church in Richmond, Mass. After a pastorate of seven years he left Richmond, and, having preached in different places for about a year, became pastor in Amenia, N. Y. In the spring of 1788 he removed to Manchester, Vt., where he preached between two and three years. On May 31, 1786, he was settled over the Church in Bennington, from which he made many missionary tours into the western and northern sections of the state. Leaving Bennington June 7, 1801, he removed to Addison, on Lake Champlain, where he purchased a farm. He established a Church there and officiated as its pastor, and also continued his missionary labor. He died on a missionary tour at Enosburg, Oct. 20, 1804. Mr. Swift acted as a chaplain in the army during most of the Revolutionary war. See Sprague, *Annals of the Amer. Pulpit*, i, 640.

**Swift, Jonathan, D.D.**, a prelate and satirist, was born in Dublin, Nov. 30, 1667, and when about a year old was carried by his nurse to Whitehaven, Cumberland, England, where he was kept for three years. His father, who died three months before he was born, left

his family in great poverty, and they were supported by relatives. Swift, when six years old, was sent to the school of Kilkenny, and remained there until removed to Trinity College, Dublin, which he entered as a pensioner, April 24, 1682. He received his degree of A.B. Feb. 15, 1685, but he remained in the college until 1688, when he went to England to visit his mother, and was on her recommendation admitted into the house of Sir William Temple. In 1694 he went to Ireland, took orders in the Church—that of deacon Oct. 18, 1694, of priest Jan. 13, 1695—and obtained a small living, which he threw up in two years and returned to England. He lived as a friend with Temple until the death of the latter, Jan. 27, 1698, and in 1699 accompanied lord Berkeley to Ireland as his chaplain and private secretary. Being deprived of this office, he was given the rectory of Agher, and the vicarages of Laracor and Ruthbeggan, worth altogether £230 a year. The

Laracor Church.

prebend of Dunlavin was bestowed upon him soon afterwards. He still continued to reside with lord Berkeley until 1700, when the latter returned to England and Swift took possession of Laracor. He performed his duties as a country clergyman with exemplary diligence. His appointment to the deanery of St. Patrick's was made Feb. 23, 1713, and early in June he left England to take possession. He soon returned to England on a political mission, and again visited England to solicit the remission of the "first-fruits." In 1741 Swift's memory failed, his understanding was much impaired, and he became subject to violent fits of passion which soon terminated in furious lunacy. In 1742 he sank into a state of quiet idiocy, and died Oct. 19, 1745. Dr. Samuel Johnson (*Lives of the English Poets*) gives the following estimate of dean Swift: "He was a churchman rationally zealous; he desired the prosperity and maintained the honor of the clergy; of the Dissenters he did not wish to infringe the toleration, but he opposed their encroachments." To his duty as dean he was very attentive. In his Church he restored the practice of weekly communion, and distributed the sacramental elements in the most solemn and devout manner with his own hand. He came to Church every morning, preached commonly in his turn, and attended the evening anthem, that it might not be negligently performed. The suspicions of his irreligion proceeded in a great measure from his dread of hypocrisy; instead of wishing to seem better, he delighted in seeming worse than he was. In London he went to early prayers lest he should be seen at Church; he read prayers to his servants every morning with such dexterous secrecy that Dr. Delany was six months in his house before he knew it. He gave great attention to political matters, and, indeed, it is to his political writings that he is principally indebted for his fame. In addition to these works, some poems, etc., he published several *Sermons* and *Tracts* upon religious and ecclesiastical matters. Of his works several editions have been printed, that of Sir Walter Scott being considered the best (Edinb. 1819, 19 vols. 8vo). See Allibone, *Dict. of*

*Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.; *English Cyclop.* s. v.; Darling, *Cyclop. Bibliog.* s. v.

**Swift, Seth**, brother of Job Swift, was a Congregational minister. He was born in Kent, Conn., Oct. 30, 1749, graduated at Yale in 1774, studied theology under Dr. Bellamy, and was ordained pastor of the Church in Williamstown, Mass., May 27, 1776, which charge he retained until his death, Feb. 13, 1807. He was greatly beloved by his people, and honored and revered by the whole community. See Sprague, *Annals of the Amer. Pulpit*, i, 645.

**Swift Beast.** See CAMEL.

**Swinden, Tobias**, an English clergyman, was rector of Cuxton, Kent, in 1688, and vicar of Shorne in 1689. He died in 1719. He published, *Sermon on Luke xi, 2* (1713, 8vo):—*An Enquiry into the Nature and Place of Hell*, which he located in the sun (Lond. 1714, 8vo; translated into French by Bion [Amst. 1728, 8vo], and German). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Swine** (חזיר, *chazir*; Sept. ὄγ, ὄγιος, ὄγ; New Test. χοίρος). Allusion will be found in the Bible to these animals, both in their domestic and in their wild state. See Tristram, *Nat. Hist. of the Bible*, p. 145; Wood, *Bible Animals*, p. 292.

1. The flesh of swine was forbidden as food by the Levitical law (Lev. xi, 7; Deut. xiv, 8). The abhorrence which the Jews as a nation had of it may be inferred from Isa. lxxv, 4, where some of the idolatrous people are represented as "eating swine's flesh," and as having the "broth of abominable things in their vessels;" see also lxxvi, 3, 17, and 2 Macc. vi, 18, 19, in which passage we read that Eleazar, an aged scribe, when compelled by Antiochus to receive in his mouth swine's flesh, "spit it forth, choosing rather to die gloriously than to live stained with such an abomination." The use of swine's flesh was forbidden to the Egyptian priests, to whom, says Sir G. Wilkinson (*Anc. Egypt.* i, 322), "above all meats it was particularly obnoxious" (see Herodotus, ii, 47; *Ælian, De Nat. Anim.* x, 16; Josephus, *Apion*, ii, 14), though it was occasionally eaten by the people. The Arabians also were disallowed the use of swine's flesh (see Pliny, *H. N.* viii, 52; Koran, ii, 175), as were also the Phœnicians, *Æthiopians*, and other nations of the East.

No other reason for the command to abstain from swine's flesh is given in the law of Moses beyond the

general one which forbade any of the mammalia as food which did not literally fulfil the terms of the definition of a "clean animal," viz. that it was to be a cloven-footed ruminant. The pig, therefore, though it divides the hoof, but does not chew the cud, was to be considered unclean; and consequently, inasmuch as, unlike the ass and the horse in the time of the Kings, no use could be made of the animal when alive, the Jews did not breed swine (*Lactant. Instit.* iv, 17). It is, however, probable that dietetical considerations may have influenced Moses in his prohibition of swine's flesh. It is generally believed that its use in hot countries is liable to induce cutaneous disorders; hence in a people liable to leprosy the necessity for the observance of a strict rule. "The reason of the meat not being eaten was its unwholesomeness, on which account it was forbidden to the Jews and Moslems" (Sir G. Wilkinson's note in Rawlinson's *Herodotus*, ii, 47). Ham. Smith, however (*Kitto, Cyclop.* s. v.), maintains that this reputed unwholesomeness of swine's flesh has been much exaggerated; and recently a writer in Colburn's *New Monthly Magazine* (July 1, 1862, p. 266) has endorsed this opinion. Other conjectures for the reason of the prohibition, which are more curious than valuable, may be seen in Bochart (*Hieroz.* i, 806 sq.). Callistratus (apud Plutarch. *Sympos.* iv, 5) suspected that the Jews did not use swine's flesh for the same reason which, he says, influenced the Egyptians, viz. that this animal was sacred, inasmuch as by turning up the earth with its snout it first taught men the art of ploughing (see Bochart, *Hieroz.* i, 806, and a dissertation by Casel, entitled *De Judæorum Odio et Abstinentia a Porcina ejusque Causis* [Magdeb.]; also Michaelis, *Comment. on the Laws of Moses*, art. 203, iii, 230, Smith's transl.). Although the Jews did not breed swine during the greater period of their existence as a nation, there can be little doubt that the heathen nations of Palestine used the flesh as food. See Plumptre, *Bible Educator*, i, 280 sq.

At the time of our Lord's ministry it would appear that the Jews occasionally violated the law of Moses with respect to swine's flesh. Whether "the herd of swine" into which the devils were allowed to enter (Matt. viii, 32; Mark v, 13) were the property of the Jewish or Gentile inhabitants of Gadara does not appear from the sacred narrative; but that the practice of keeping swine did exist among some of the Jews seems clear from the enactment of the law of Hyrcanus, "ne cui porcum alere liceret" (Grotius, *Annot. ad Matt.* loc. cit.). Allusion is made in 2 Pet. ii, 22, to the fondness which swine have for "wallowing in the mire;" this, it appears, was a proverbial expression, with which may be compared the "amica luto sus" of Horace (*Ep.* i, 2, 26). Solomon's comparison of a "jewel of gold in a swine's snout" to a "fair woman without discretion" (Prov. xi, 22), and the expression of our Lord, "neither cast ye your pearls before swine," are so obviously intelligible as to render any remarks unnecessary. The transaction of the destruction of the herd of swine already alluded to, like the cursing of the barren fig-tree, has been the subject of most unfair cavil: it is well answered by Trench (*Miracles*, p. 173), who observes that "a man is of more value than many swine;" besides which it must be remembered that it is not necessary to suppose

Ancient Egyptian Pigs; rarely seen in the sculptures, and never before the 18th dynasty.  
1. Sows with young pigs. 2. Young pigs. 3. Boars. 4 is a whip, knotted like some of our own. 5, a gaid, or noose, often used as the emblem of a shepherd.

that our Lord sent the devils into the swine. He merely permitted them to go, as Aquinas says, "quod autem porci in mare præcipitati sunt non fuit operatio divini miraculi, sed operatio dæmonum e permissione divina;" and if these Gadarene villagers were Jews and owned the swine, they were rightly punished by the loss of that which they ought not to have had at all. See Tacit. *Hist.* v, 4; Juven. *Sat.* xiv, 98; Macrob. *Sat.* ii, 4; Josephus, *Ant.* xiii, 8, 2; Philo, *Opp.* ii, 631; Mishna, *Baba Kama*, vii, 7; Talm. Hieros. *Shekal.* fol. 47, 8; Lightfoot, *Hor. Heb.* p. 315 sq.; Otho, *Lex. Rab.* p. 580 sq.

2. The wild boar of the wood (Ps. lxxx, 13) is the common *Sus scrofa* which is frequently met with in the woody parts of Palestine, especially in Mount Tabor. The allusion in the psalm to the injury the wild boar does to the vineyards is well borne out by fact. "It is astonishing what havoc a wild boar is capable of effecting during a single night; what with eating and trampling underfoot, he will destroy a vast quantity of grapes" (Hartley, *Researches in Greece*, p. 284). See BOAR.

**Swinerton**, ASA V., a minister of the Methodist Episcopal Church, was born at Danvers, Mass., in 1802. He joined the New England Conference on trial in 1831. When the Providence Conference was formed in 1841, he continued on the district of which he was presiding elder, and thus became a member of the latter Conference. He continued to labor, with the exception of one year (supernumerary), until 1863, his death taking place at Monument, Mass., Oct. 12 of that year. See *Minutes of Annual Conferences*, 1864, p. 51.

**Swiney**, SAMUEL T., a minister of the Methodist Episcopal Church, South, was born in West Feliciana Parish, La. Of the circumstances of conversion, etc., we have no particulars. He joined, probably, the Mississippi Conference in 1856, and after a number of years became supernumerary, and died Aug. 14, 1869. See *Minutes of Annual Conferences of the M. E. Church, South*, 1869, p. 341.

**Swinnock**, GEORGE, an English clergyman, was vicar of Great Kymble, Bucks, from which he was ejected for nonconformity in 1662. He afterwards became pastor at Maidstone, where he died in 1673. His writings are: *Heaven and Hell Epitomized* (Lond. 1659, 8vo; 1663, 4to);—*Christian Man's Calling* (in 3 pts. 4to: i, 1662; ii, 1663; iii, 1665);—also *Sermons*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

**Swinton**, JOHN, an English divine and antiquary, was born in 1703 at Bexton, Cheshire. He was educated at Wadham College, Oxford, was chaplain to the factory at Leghorn, and died April 4, 1777, keeper of the university records at Oxford. He contributed vols. vi and vii (the *Life of Mohammed* and the *History of the Arabs*) to the *Modern Universal History*, and wrote many learned dissertations on Phœnician and other antiquities. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Swithin**, ST., an English ecclesiastic of the 9th century, was chaplain to king Egbert, and tutor to his son Ethelwolf, by whom he was made chancellor. He had the charge of the education of king Alfred, whom he accompanied to Rome. In 852 he was consecrated bishop of Winchester. William of Malmesbury records of him that he was "a rich treasure of all virtues, and those in which he took most delight were humility and charity to the poor." The origin of the tribute called "Peter's pence" (q. v.) has often been assigned to Swithin, and he is said to have procured an act of the Witenagemote enforcing, for the first time, the universal obligation of paying tithes. Swithin died July 2, 862. See Mrs. Jameson, *Legends of the Monastic Orders*, p. 89.

**Swithin's Day.** The following is said to be the

origin of the old adage "If it rain on St. Swithin's Day, there will be rain more or less for forty succeeding days." In the year 865 St. Swithin, bishop of Winchester—to which rank he was raised by king Ethelwolf the Dane—was canonized by the then pope. He was singular for his desire to be buried in the open church-yard, and not in the chancel of the minster, as was usual with other bishops, which request was complied with; but the monks, on his being canonized, taking it into their heads that it was disgraceful for the saint to lie in the open church-yard, resolved to remove his body into the choir, which was to have been done with solemn procession on July 15. It rained, however, so violently on that day, and for forty days succeeding, as had hardly ever been known, which made them set aside their design as heretical and blasphemous; and instead they erected a chapel over his grave, at which many miracles are said to have been wrought. The value to be placed upon the popular notion that if it rain on July 15 it will do so for forty succeeding days may be learned from the following facts from the Greenwich observations for twenty years: It appears that St. Swithin's Day was wet in 1841, and there were 23 rainy days up to Aug. 24; 1846, 26 rainy days; 1851, 13 rainy days; 1853, 18 rainy days; 1854, 16 rainy days; and in 1856, 14 rainy days. In 1842 and following years St. Swithin's Day was dry, and the result was, in 1842, 12 rainy days; 1843, 12 rainy days; 1844, 20 rainy days; 1846, 21 rainy days; 1847, 17 rainy days; 1848, 31 rainy days; 1849, 20 rainy days; 1850, 17 rainy days; 1852, 19 rainy days; 1855, 18 rainy days; 1857, 14 rainy days; 1858, 14 rainy days; 1859, 18 rainy days; and in 1860, 29 rainy days. These figures show the superstition to be founded on a fallacy, as the average of twenty years proves rain to have fallen upon the largest number of days when St. Swithin's day was dry.

**Switzerland**, the *Helvetia* of the Latins, is one of the smallest of the European states, lying between 45° 49' and 47° 50' N. lat., and 5° 55' and 10° 30' E. long., its extreme length from E. to W. being 210 miles, and its extreme breadth not far from 140 miles. It has an area of nearly 16,000 English miles, and is bounded north by Germany, from which it is separated by the Rhine and Lake Constance; on the east by Austria, the valley of the Rhine and the Rhetian Alps being the dividing line between the two countries; on the south by Italy and France, and on the west by France. It is the most mountainous country in Europe, being covered throughout its entire extent by the Alps, which are grouped into several branches. The highest and best-known peaks of the Alps in Switzerland are Matterhorn, or Mont Cervin, Finster-Aarhorn, and Jungfrau. Mont Blanc was once included in the mountains of Switzerland, but at the close of the Franco-Italian war it was transferred to France. The principal lakes of Switzerland are Lake of Neuchâtel, Lake of Geneva, Lake Thun, Lake Lucerne, Lake Zurich, and Lake of Constance. Its great rivers are the Rhine and the Rhone, with their many tributary streams. The glaciers are the great feeders of these streams and rivers, and are in themselves objects of great interest to the lover of nature. The climate of Switzerland is generally cold, as might be expected, the region of perpetual snow being more extensive than in any other mountain system in Europe. In the lowlands and valleys the temperature is warmer, and many of the productions which grow so luxuriantly in Italy are raised there. Agriculture furnishes the chief employment to the inhabitants of this country. There are some kinds of manufactures carried on which are productive, such as cotton, embroidery, and silk stuffs of various kinds. The Swiss also pay great attention to the manufacture of watches, the annual production, in fine, of the cantons being not far from seventeen and a half millions of dollars.

**I. History.**—Our earliest knowledge of Switzerland carries us back to the time when the inhabitants were

alluded to in Roman history as the Helvetii. In those early days, not far from a century before the commencement of the Christian era, they successfully resisted the attacks of the Romans. The *Commentaries* of Cæsar give us interesting accounts of the attempts of the legions under his command to subdue these hardy dwellers of the mountains and valleys of Helvetia. After many years, by degrees, the Roman arms brought these proud-spirited foes into subjection, and for several centuries the conquerors held dominion over the country. Invasions from the northern tribes of Europe laid waste many sections of the land. These barbarians of the North were at last all brought under the power of the Franks, and Christianity became the prevailing faith. Without tracing the political history of Switzerland through the various phases through which it passed during several centuries, it may suffice to say that it became a federal republic in 1481, and the people are now living under a revised constitution, which was accepted by them in the spring of 1874. This constitution guarantees to the inhabitants of the twenty-five cantons into which Switzerland is divided those rights and immunities which are found in all properly constituted republics. All citizens are equal in the eye of the law. Privileges of place or birth have ceased. Absolute liberty of conscience everywhere prevails. The press is free. The right of association is guaranteed, with the exception that the Jesuits and organizations kindred to them are forbidden. The capital of the confederated states is Berne.

**II. Religion.**—Christianity was first introduced into Switzerland about A.D. 610 by St. Gall, a native of Ireland and pupil of Columban. He was one of twelve Irish monks who labored to disseminate Christianity throughout Europe. They first took up their residence at the head of Lake Zurich, and, burning with zeal, set fire to the pagan temples, casting the idols into the lake. Driven away by the inhabitants, they settled at Brezentz, but at the end of two years were banished from this place also, and all left for Italy except St. Gall, who was too ill to be removed. He repaired to a sequestered spot, and with a few adherents built the Monastery of St. Gall in the canton of the same name. After his death, several of his scholars and monks from Ireland continued his work, until paganism lost its hold and Romanism was substituted in its place.

With reference to the Reformation, D'Aubigné says: "From 1519 to 1526 Zurich was the centre of the Reformation, which was then entirely German, and was propagated in the eastern and northern parts of the confederation. Between 1526 and 1532 the movement was communicated from Berne; it was at once German and French, and extended to the centre of Switzerland, from the gorges of the Jura to the deepest valleys of the Alps. In 1532 Geneva became the focus of the light; and the Reformation, which was here essentially French, was established on the shores of the Leman Lake, and gained strength in every quarter." The main instrument in commencing and carrying forward the work of Reformation in Switzerland was Ulrich Zwingli (q.v.). In 1513 he commenced the study of the Greek language; and from 1516, when he began to expound the Word of God as preacher in the Abbey of Einsiedeln, Zwingli dates the Swiss Reformation. The influence of the pure faith was soon extensively felt, so that, by the year 1522, we find Erasmus estimating "those" in the cantons "who abhorred the see of Rome" at about 200,000 persons. Gradually changes in the mode of worship were introduced. In 1523 we find the Council of Zurich requiring that "the pastors of Zurich should rest their discourses on the words of Scripture alone;" the abolition of images in churches soon followed; marriage was no longer prohibited to the clergy; and in 1525 the mass was superseded by the simple ordinance of the Lord's supper. In Appenzell the Reformation began about 1521, in Schaffhausen about the same time. The sacramentarian controversy between Luther and

Zwingli, and their respective followers, was detrimental to the cause of truth in both Germany and Switzerland; and in the latter, as well as in the former, the rise of the Anabaptist body was both a source of injury and reproach. In the year 1527 Berne became professedly a Reformed canton, and for mutual security allied itself, in 1529, with the canton of Zurich. In 1530, at the Diet of Augsburg, when the Lutheran Confession was presented, the Swiss divines presented another drawn up by Bucer, known, from the four towns it represented—namely, Constance, Strasburg, Lindau, and Meiningen—as the Tetrapolitan Confession. The two confessions only differed as to the sense in which Christ was understood to be really present in the Lord's supper. At this time, also, Zwingli individually presented a confession, to which we find Eck replying. The five Romish cantons, having made ample preliminary preparations, determined by force of arms to check the further progress of Reformed principles in the confederation. The French sympathies of Zwingli, and his hostility to Charles V, deprived the Protestant cantons of German support in the approaching conflict. The Protestant cantons formed a confederacy, and by a resolution adopted at Aarau, May 12, 1531, instituted a strict blockade of the five cantons. Goaded on by the consequent famine and its attendant miseries, these last determined on war, and entered the field on Oct. 6 of the same year, the first engagement, taking place at Cappel, proving most disastrous to Zurich and fatal to Zwingli. The Reformation now took the direction of Geneva, its opinions being first proclaimed by William Farel about 1532. He was banished, but was succeeded by Anthony Fromment, who soon shared the same fate. The following year they were recalled, and the bishops fled. In 1535 the Council of the city proclaimed their adherence to the Reformed faith. The following year witnessed the arrival of John Calvin, and on July 20, 1539, the citizens abjured popery and professed Protestantism. Prior to this, a reaction of the popish and conservative elements in the State led to such dissensions and opposition that Calvin and Farel were banished, but, at the earnest entreaty of the citizens, the former returned in 1541. Whatever difference of opinion there may be with reference to the theological views of the great Genevan Reformer, there can be none as to his intellectual ability, and his wonderful organizing and executive power. His legal training (in early life he had studied law) qualified him to frame a civil code for Geneva, the good effects of which were apparent in the improved state of public morals. "Through his influence," says Hase, "Geneva became a republic firmly established, governed by an oligarchy, pervaded by an ecclesiastical spirit, and renowned in the history of the world. Thither resorted all who during that age were persecuted for their faith, and it became the acknowledged centre of a Reformed Church." See CALVIN. For some years after the death of Calvin (1564), the religious history of Switzerland is closely identified with that of the Catholic reaction from the Reformation. Hopes which had been cherished with regard to the rapid progress of a purer form of Christianity in Germany and France and Switzerland were doomed to be disappointed. For many years the Roman Catholic power in the last of these countries seemed to have the predominance. Towards the close of the 17th century, the strife between the two great religious parties, the papists and the Protestants, began to assume a more open character, and in 1703 the Catholic and the Protestant cantons took up arms against each other. A civil war was carried on for several years. At last, in 1712, a fierce battle was fought at Villmergen, and victory was on the side of the Protestants. The Catholics were completely routed, and two thousand of their number were left dead on the battle-field. See REFORMATION.

At present, a majority of all the inhabitants of Switzerland are Protestants. In eleven of the cantons the Catholics outnumber the Protestants, although the

ecclesiastical government is in a certain sense under the control of the cantonal government. The pope has attempted to do certain things in the regulation of the affairs of those over whom he claims to exercise jurisdiction, but his acts have been declared illegal by the civil authorities, and they are null and void. The "Old Catholics" have obtained possession of several parish churches in three or four of the cantons. The present constitution of Switzerland grants complete and absolute liberty of conscience and of creed. No one can incur any penalties whatsoever on account of his religious opinions. No one is bound to contribute to the expenses of a Church to which he does not belong. Free worship is guaranteed, civil marriage is compulsory, and subsequent religious service is optional. The cantons have the right to maintain peace and order between different religious communities, and to prevent encroachments of ecclesiastical authorities upon the rights of citizens. Bishops must receive the approval of the federal government. Liberty of press, petition, and association is guaranteed; but Jesuits, and all religious orders and associations which are affiliated to them, are prohibited. Of late years much evangelizing work has been done by the Presbyterians, Baptists, and Methodists. In 1849 the Methodist Episcopal Church organized the "Germany and Switzerland Mission," which in 1856 was constituted the German Mission Conference, with Switzerland as one of its districts. The following are its statistics for 1879: Number of preachers, 15; local preachers, 7; Church members, 8441; probationers, 675; Sunday-schools, 119; Sunday-school scholars, 7526; churches, 17; value of churches, \$1,268,296. There is also a Methodist book establishment at Bremen and a theological school at Frankfurt-on-the-Main.

See *Mémoires et Documents publiés par la Société d'Histoire et d'Archéologie de Genève* (Geneva, 1841-47, 5 vols.); Wilson, *Hist. of Switzerland*, in Lardner's *Cabinet Cyclopædia*; Gaillieur, *La Suisse* (ibid. 1855-56, 2 vols. 4to); Inglis, *Switzerland* (Lond. 1840, 8vo); Shaw, *History of Switzerland* (N. Y. 1875).

**Sword**, in the A. V., is the usual rendering of *חֶרֶב*, *chêreb* (from *חָרַב*, to lay waste), which was simply a large knife, as it is rendered in Josh. v, 2; Ezek. v, 1, 2. Less frequent words are *רֶשֶׁתַּח*, *rétsach*, Psa. xlii, 10 [11], a crushing or outbreak ("slaughter," Ezek. xxi, 27); *שֶׁלַח*, *shêlach* (Job xxxiii, 18; xxxvi, 12; Joel ii, 8), a dart, as elsewhere rendered; N. T. *ρομφαία*, a sabre, or long and broad sword (Luke ii, 35; Rev. i, 16; ii, 12, 16; vi, 8; xix, 15, 21); elsewhere *μάχαρα*, a dagger, or short sword. See ARMOR.

1. The first mention of this principal offensive weapon in Bible history is in the narrative of the massacre at Shechem, when "Simeon and Levi took each man his sword, and came upon the city boldly and slew all the males" (Gen. xxxiv, 25). But there is an allusion to it shortly before in a passage undoubtedly of the earliest date (Ewald, i, 446, note): the expostulation of Laban with Jacob (Gen. xxxi, 26). After this, during the account of the conquest and of the monarchy, the mention of the sword is frequent, but very little can be gathered from the casual notices of the text as to its shape, size, material, or mode of use. Perhaps if anything is to be inferred it is that the *chêreb* was not either a heavy or a long weapon. That of Ehud was only a cubit, i. e. eighteen inches, long, so as to have been concealed under his garment, and nothing is said to lead to the inference that it was shorter than usual, for the "dagger" of the A. V. is without any ground, unless it be a rendering of the *μάχαρα* of the Sept. But even assuming that Ehud's sword was shorter than usual, yet a consideration of the narratives in 2 Sam. ii, 16, and xx, 8-10, and also of the ease with which David used the sword of a man so much larger than himself as Goliath (1 Sam. xvii, 51; xxi, 9, 10), goes to show that the *chêreb* was both a lighter and a shorter weapon

than the modern sword. What frightful wounds one blow of the sword of the Hebrews could inflict, if given even with the left hand of a practiced swordsman, may be gathered from a comparison of 2 Sam. xx, 8-12 with 1 Kings ii, 5. A ghastly picture is there given us of the murdered man and his murderer. The unfortunate Amasa actually disembowelled by the single stroke, and "wallowing" in his blood in the middle of the road—the treacherous Joab standing over him, bespattered from his "girdle" to his "shoes" with the blood which had spouted from his victim!

The *chêreb* was carried in a sheath (*חֶרֶב־בְּחֶמֶר*, 1 Sam. xvii, 51; 2 Sam. xx, 8, only; *בְּחֶמֶר*, 1 Chron. xxi, 27, only) slung by a girdle (1 Sam. xxv, 18) and resting upon the thigh (Psa. xlv, 3; Judg. iii, 16), or upon the hips (2 Sam. xx, 8). "Girding on the sword" was a symbolical expression for commencing war, the more forcible because in times of peace even the king in state did not wear a sword (1 Kings iii, 24); and a similar expression occurs to denote those able to serve (Judg. viii, 10; 1 Chron. xxi, 5). Other phrases, derived from the *chêreb*, are, "to smite with the edge (literally 'mouth'; comp. *στόμα*; and comp. 'devour,' Isa. i, 20) of the sword"—"slain with the sword"—"men that drew sword," etc.

Swords with two edges are occasionally referred to (Judg. iii, 16; Psa. cxlix, 6), and allusions are found to "whetting" the sword (Deut. xxxii, 41; Psa. lxiv, 3; Ezek. xxi, 9). There is no reference to the material of which it was composed (unless it be Isa. ii, 4; Joel iii, 10); doubtless it was of metal, from the allusions to its brightness and "glittering" (see the two passages quoted above, and others), and the ordinary word for blade, viz. *לֶהָב*, "a flame." From the expression (Josh. v, 2, 3) "swords of rock," A. V. "sharp knives," we may perhaps infer that in early times the material was flint.—Smith. See KNIFE.

Ancient Persian Swords and Daggers.

a. From the sculptures at Persepolis; b. From those at Shiraz; c. From those at Takht-i-Bostan.

2. The Egyptian sword was straight and short, from two and a half to three feet in length, having generally a double edge, and tapering to a sharp point. It was used for cut and thrust. They had also a dagger, the handle of which, hollowed in the centre, and gradually increasing in thickness at either extremity, was inlaid with costly stones, precious woods, or metals; and the pommel of that worn by the king in his girdle was frequently surmounted by one or two heads of a hawk, the symbol of Phrah, or the Sun, the title given to the monarchs of the Nile. It was much smaller than the sword: its blade was about ten or seven inches in length, tapering gradually in breadth, from one inch and a half to two thirds of an inch, towards the point; and the total length, with the handle, only completed a foot or sixteen inches. The blade was bronze, thicker in the

Ancient Egyptian Daggers.

1. Stuck in the belt; 2. Without the sheath; 3. In the sheath; 4. Back of the sheath.

middle than at the edges, and slightly grooved in that part; and so exquisitely was the metal worked that some retain their pliability and spring after a period of several thousand years, and almost resemble steel in elasticity. Such is the dagger of the Berlin collection, which was discovered in a Theban tomb, together with its leathern sheath. The handle is partly covered with metal, and adorned with numerous small pins and studs of gold, which are purposely shown through suitable openings in the front of the sheath; but the upper extremity consists solely of bone, neither ornamented nor covered with any metal casing. Other instances of this have been found; and a dagger in Mr. Salt's collection, now in the British Museum, measuring eleven and a half inches in length, had the handle formed in a similar manner. There was also a falchion called *shopsh*, or *khopsh*, resembling in form and name the *κοπίς*, or *chopper*, of the Argives, reputed to be an Egyptian colony. It was more generally used than the sword, being borne by light- as well as heavy-armed troops; and that it was a most efficient weapon is evident as well from the size and form of the blade as from its weight, the back of this bronze or iron blade being sometimes cased with brass (Wilkinson, *Anc. Egypt.* i, 358).

3. Assyrian swords, like the sceptres, as seen on the monuments, were often richly decorated. The hilt was generally ornamented with several lions' heads, arranged to form both handle and cross-bar. The scabbard or sheath was elaborately embossed or engraved (Layard, *Nineveh*, ii, 234).

Ancient Assyrian Sword.

1. The hilt; 2. End of the sheath.

4. The Greek and Roman sword (*gladius*, *ξίφος*, poet. *ἀορ*, *φάργαρον*, a glaive, by the Latin poets called *ensis*) had generally a straight two-edged blade, rather broad, and nearly of equal width from hilt to point. The Greeks and Romans wore them on the left

a. Greek; b. Roman; c. Ancient, but uncertain; d. Dacian.

side, so as to draw them out of the sheath (*vagina*, *κολεός*) by passing the right hand in front of the body to take hold of the hilt with the thumb next to the blade. The early Greeks used a very short sword. Iphicrates, who made various improvements in armor about B.C. 400, doubled its length. The Roman sword was larger, heavier, and more formidable than the Greek (see Smith, *Dict. of Antiq.* s. v. "Gladius"). The swords of the most ancient times were made of brass or copper, hardened by some process now unknown; and this continued to be the case long subsequently with the Greeks and Romans, as well as among the Phoenicians (Kitto, *Pict. Bible*, note at Numb. xxxi, 8).

5. The sword is the symbol of war and slaughter (Lev. xxvi, 25; Isa. xxxiv, 5; Rev. xix, 17, 18), of divine judgment (Deut. xxxii, 41; Psa. xvii, 13; Jer. xii, 12; Rev. i, 16), and of power and authority (Rom. xiii, 4). The Word of God is called "the sword," i. e. the weapon or instrument, of the Spirit (Eph. vi, 17).

a. Syrian sabre; b. Syrian dervish's sabre; c. Turkish sabre; d. Dagger of the prince royal of Persia; e. Albanian dirk; f. Yataghan of a domestic of the Turkish grand visier; g. Janissary's dagger; h. Bedawin Arab's dagger and sheath.

**SWORD, BROTHERS OF THE**, was an order of knight sword-bearers, founded at the beginning of the 13th century in Livonia; hence the order was sometimes called Livonian Brethren of the Sword. In 1237 the Order of the Teutonic Knights amalgamated with them, and they together gradually subdued all the territories surrounding the Gulf of Riga. (See illustration on opposite page.)

**Sword-dance**, in Hindûism, is a religious dance performed by Hindû bayaderes who have dedicated themselves to some deity, and involving the display of great skill. Swords are fastened, edge upward, to two long poles, which are inclined against a wall so as to form two half-ladders. The bayaderes ascend these and dance on them, assuming the most graceful attitudes, and displaying inimitable skill and grace of bodily form. While the art of dancing on such vibrating blades may be exceedingly difficult, the reward of the dancers is correspondingly great, so that they are not unfrequently enriched by the receipts from a single performance.

Sword Brother.

**Swords** and a ducal cap are blessed on Christmas eve, at the midnight mass, by the pope, in order to be sent to favored kings, as Edward IV, 1478; Henry VII, 1505; Henry VIII, 1517. The last gift of this kind was made by Leo XII to the duc d'Angoulême in 1825.

**Swormstedt**, LEROY, a prominent minister of the Methodist Episcopal Church, was born in Maryland Oct. 4, 1798. When eighteen years of age he professed conversion, and was licensed to preach Jan. 2, 1818. His entrance into the itinerant work was through the Ohio Conference in August, 1818. He was ordained deacon in 1820, and elder in 1822. In 1830 he was appointed presiding elder, and occupied that office until elected assistant agent of the Western Book Concern. After filling this position for eight years, he was elected principal agent in 1844, and continued to be such until 1860, when he took a superannuated relation. After this he declined rapidly in health, and died Aug. 27, 1863. Mr. Swormstedt was a man of vigorous health, scrupulously punctual, an energetic and methodical preacher, and a rigid disciplinarian. See *Minutes of Annual Conferences*, 1863, p. 144.

**Syagrius**, ST., a French prelate, was born at Autun about 520, of a Gallo-Roman family, and was raised to the episcopal see of Autun about 560, being ordained by Germain, bishop of Paris. His house was a kind of school, where many distinguished ecclesiastics were educated; and he founded likewise a hospital, and adorned the churches of the same city. He deeply sympathized with the conquered Franks. He was active in the ecclesiastical affairs of his time, and died Aug. 27, 600. See Hoefer, *Nouv. Biog. Générale*, s. v.

**Sybāris**, in Greek mythology, was a monster who occupied a cave on Parnassus and devastated the land around. By the command of the oracle a youth was to be sacrificed to him, and the task fell by lot upon Alcioneus, son of Diomus, who, adorned with a garland, was brought to the cave; but, charmed with the beauty and youth of the victim, Eurybatus took the garland, went into the cave, fought the monster, and hurled it down a precipice.

**Sycamine** (*συκάμινος*; Vulg. *morus*) is mentioned once only in the Bible, viz. in Luke xvii, 6, "If ye had faith as a grain of mustard-seed, ye might say to this sycamine-tree, Be thou plucked up," etc. There is no reason to doubt that the *συκάμινος* is distinct from the *συκομωπαία* of the same evangelist (xix, 4), although we learn from Dioscorides (i, 180) that this name was sometimes given to the *συκόμορος*. See

Black Mulberry-tree (*Morus nigra*).

**SYCAMORE.** The sycamine is the mulberry-tree (*morus*), as is evident from Dioscorides, Theophrastus (*H. P.* i, 6, 1; 10, 10; 13, 4, etc.), and various other Greek writers (see Celsius, *Hierob.* i, 288). A form of the same word, *συκαμηννα*, is still one of the names for the mulberry-tree in Greece (see Heldreich, *Nutzpflanzen Griechenlands* [Athens, 1862], p. 19: "*Morus alba* L. and *M. nigra* L., ἡ Μορρά, Μορρηνα, and Μορρηά, also Συκαμηννα; pelasg. *muri*"). In his learned essay on the *Trees and Shrubs of the Ancients* (1865), Dr. Daubeny adopts the distinction pointed out by Bodeus and confirmed by Fraas: the *sycamoros* of the Romans, the *συκόμορος* or *συκάμινος* (ἐν Αἰγυπτῷ) of Dioscorides, the *συκάμινος Αἰγυπτία* of Theophrastus, is the sycamore-fig, or *Ficus sycomorus* of modern botany. On the other hand, the *συκάμινος* of the Greeks, used simply and without the qualification "Egyptian," the *συκαμηνία* of Dioscorides, is the *morus* of the Romans—our mulberry. Dr. Sibthorpe, who travelled as a botanist in Greece for the express purpose of identifying the plants known to the Greeks, says that in Greece the white mulberry-tree is called *μωρία*; the black mulberry-tree, *συκαμηνία*. Not only is it the species whose fruit is prized, but it may

Black Mulberry Fruit, Leaf, and Blossom.

be questioned whether the *Morus alba* had found its way into those regions before the introduction of the silk-worm had made its favorite food an object of cultivation. Believed to be a native of Persia, the mulberry, commonly so called, *Morus nigra*, is now spread over the milder regions of Europe, and is continually mentioned by travellers in the Holy Land. As the mulberry-tree is common, as it is lofty and affords shade, it is well calculated for the illustration of the above passage of Luke. See Tristram, *Nat. Hist. of the Bible*, p. 396; Thomson, *Land and Book*, ii, 296. See MULBERRY.

**Sycamore** is the invariable rendering, in the A. V., of the Heb. שִׁקְמָה, *shikmah*' (which, however, occurs in the sing. only in the Talmud, *Shebi'ith*, ix, 2; the Bible employs indifferently the masc. plur. שִׁקְמִים, *shikmim*, 1 Kings x, 27; 1 Chron. xxvii, 28; 2 Chron. i, 15; ix, 27; Isa. ix, 10; Amos vii, 14; and the fem. plur. שִׁקְמוֹת, *shikmôth* (Psa. lxxviii, 47), and of the Greek συκομωαία (Luke xix, 4). The Sept. always translates the Heb. word by συκάμινος, *sycomine*, meaning doubtless the Egyptian tree, the συκάμινος Αἰγυπτία of Theophrastus, which is really the sycamore (Dioscorides, i, 180). See Gesenius, *Thesaur. Heb.* p. 1476 b; Rosenmüller, *Alterthumskunde*, iv, 281 sq.; Celsius, *Hierob.* i, 810). The sycamore, or fig-mulberry (from σῦκον, *fig*, and μύρον, *mulberry*), is in Egypt and Palestine a tree of great importance and very extensive use. It attains the size of a walnut-tree, has wide-spreading branches, and affords a delightful shade. On this account it is frequently planted by the waysides. Its leaves are heart-shaped, downy on the underside, and fragrant. The fruit grows directly from the trunk itself on little sprigs, and in clusters like the grape. To make it eatable, each fruit, three or four days before gathering, must, it is said, be punctured with a sharp instrument or the finger-nail (comp. Theophrastus, *De Caus. Plant.* i, 17, 9; *Hist. Pl.* iv, 2, 1; Pliny, *H. N.* xiii, 7; Forskål, *Descr. Plant.* p. 182). This was the original employment of the prophet Amos, as he says vii, 14 ("a gatherer," בֹּרֵךְ, Sept. κνιζων, the exact term employed by Theophrastus). Hasselquist (*Trav.* p. 260; Løyd, 1766) says, "The fruit of this tree tastes pretty well; when quite ripe it is soft, watery, somewhat sweet, with a very little portion of an aromatic taste." It appears, however, that a species of gall insect (*Cynips sycomori*) often spoils much of the fruit. "The tree," Hasselquist adds, "is wounded or cut by the inhabitants at the time it buds, for without this precaution, as they say, it will not bear fruit" (p. 261). In form and smell and inward structure it resembles the fig, and hence its name. The tree is always verdant, and bears fruit several times in the year without being confined to fixed seasons, and is thus, as a permanent food-bearer, invaluable to the poor.

Sycamore Fig and Leaf.

In Lower Egypt it buds in March, and ripens early in June, and by the poor of that country as well as of Palestine enormous quantities are consumed. The wood of the tree, though very porous, is exceedingly durable. It suffers neither from moisture nor heat. The Egyptian mummy coffins, which are made of it, are still perfectly sound after an entombment of thousands of years. It was much used for doors and large furniture, such as sofas, tables, and chairs (Wilkinson, *Anc. Egypt.* ii, 110). So great was the value of these trees that David appointed for them in his kingdom a special overseer, as he did for the olives (1 Chron. xxvii, 28); and it is mentioned as one of the heaviest of Egypt's calamities that her sycamores were destroyed by hailstones (Psa. lxxviii, 47). The modern Haïpha was the city of sycamores (*Sycominon*, Reland, *Palaest.* p. 1024), and the remains of its grove are still recognisable (Stanley, *Sinai and Pal.* p. 145). It was into a sycamore in the plain of Jericho that Zacchæus climbed in order to get a sight of Jesus passing by (Luke xix, 4); and at the broken aqueduct of Herod's Jericho Mr. Tristram lately found "a fine old sycamore fig-tree, perhaps a lineal descendant, and nearly the last, of that into which Zacchæus climbed" (*Land of Israel*, p. 509). That which is called sycamore in North America, the *Occidental plane* or *button-wood* tree, has no resemblance whatever to the sycamore of the Bible. The name is also applied to a species of maple (the *Acer pseudo-platanus*, or *fulse plane*), which is much used by turners and millwrights. See Mayer, *De Sycomoro* (Lips. 1694); Warnekros, *Hist. Nat. Sycomori*, in the *Repert. für bibl. Lit.* xi, 224 sq.; xii, 81 sq.; Tristram, *Nat. Hist. of the Bible*, p. 397; Thomson, *Land and Book*, i, 22 sq. See FIG.

**Syceas**, in Greek mythology, was one of the Titans whom, when Jupiter pursued him, his mother-Earth, received into her womb.

**Sy'char** (Συχαρ in S, A, C, D; but rec. text Συχάρ with B; Vulg. *Sichar*; but Codd. Am. and Fuld. *Sychar*; Syriac *Socar*), a place named only in John iv, 5, as "a city of Samaria called Sychar, near the ground which Jacob gave to Joseph his son; and there was the well of Jacob." Sychar was either a name applied to the town of Shechem, or it was an independent place.

1. The first of these alternatives is now almost universally accepted. In the words of Dr. Robinson (*Bibl. Res.* ii, 290), "In consequence of the hatred which existed between the Jews and the Samaritans, and in allusion to their idolatry, the town of Sichem received, among the Jewish common people, the by-name Sychar." It seems to have been a sort

Sycamore (*Ficus sycomorus*) near Ashkelon. (From a photograph by the Editor.)

geographer, that proves the place "to lie under the tropic, the gnomon at midday casting no shadow." But although excavations have been carried on considerably below the pavement, which has been turned up in search of the well it was thought to cover, no other results have been obtained than that this shrine was a very improbable site for such an observatory, even if it ever existed; and that Strabo was strangely misinformed, since the Egyptians themselves could never in his time have imagined this city to lie under the tropic; for they were by no means ignorant of astronomy, and Syene was, even in the age of Hipparchus (B.C. 140, when the obliquity of the ecliptic was about  $23^{\circ} 51' 20''$ ), very far north of that line. The belief that Syene was in the tropic was, however, very general in the time of the Romans, and is noticed by Seneca, Lucan, Pliny, and others. But, as Sir J. G. Wilkinson remarks, "a well would have been a bad kind of observatory if the sun had been really vertical; and if Strabo saw the meridian sun in a well, he might be sure he was not in the tropic" (*Mod. Egypt and Thebes*, ii, 286). The same writer adds, "Unfortunately, the observations of the ancient Greek writers on the obliquity of the ecliptic are not so satisfactory as might be wished; nor are we enabled, especially as La Grange's theory of the annual change of obliquity being variable is allowed to be correct, to ascertain the time when Aswan might have been within the tropic, a calculation or traditional fact in which, perhaps, originated the erroneous assertion of Strabo." The latitude of Aswan is fixed by Wilkinson at  $24^{\circ} 5' 30''$ , and the longitude is usually given as  $32^{\circ} 55'$ .

**Sygn**, in Norse mythology, was one of the female *asas*, goddess of justice, who takes charge of decisions and prevents any one denying anything. She guarded the doors of the palace of Wingolf, so that foreigners could not enter unawares.

**Sykes, Arthur Ashley**, an English divine, was born in London about 1684. He was educated at St. Paul's School, and was admitted to Corpus Christi College, Cambridge, 1701, taking his degree of A.B. in 1704-5 and A.M. in 1708. After leaving college he served as assistant in St. Paul's School, but was collated to the vicarage of Godmersham, Kent, in 1712-13, by archbishop Tenison. In April, 1714, he was instituted to the rectory of Dry-Drayton, Cambridgeshire, and in the August following resigned the vicarage of Godmersham. He was instituted to the rectory of Rayleigh, Essex, November, 1718, and resigned the living of Dry-Drayton. In December following he was appointed afternoon preacher of King Street Chapel, Golden Square, a chapel of ease to St. James's, Westminster. The morning preachingship becoming vacant in 1721, Mr. Sykes was appointed to it. In January, 1723-24, he was appointed to the prebend of Alton-Borealis, Salisbury, and three years after became precentor of the same cathedral. He also received the following appointments: assistant preacher at St. James's, Westminster, April, 1725; dean of St. Burien, Cornwall, February, 1739; pro-chancellor of Winchester, Oct. 15, 1740. He died Nov. 15, 1770. His published works number sixty-three, of which we notice, *An Essay upon the Truth of the Christian Religion* (Knapp, 1725, 8vo); 2d ed. 1775, 8vo); — *Principles and Connection of Natural and Revealed Religion* (1740, 8vo); — *Credibility of Miracles and Revelation* (1742, 8vo); — *Essay on Sacrifices* (1748, 8vo); — *Scripture Doctrine of Redemption of Man by Jesus Christ* (1755, 8vo); — *Paraphrase and Notes upon the Epistle to the Hebrews* (1755, 4to). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Sykes, Oliver**, a minister of the Methodist Episcopal Church, was born at Suffield, Conn., 1778. He was converted in his twenty-second year, and in 1806 was received on trial into the New York Conference. In 1810 he became superannuated, and held that relation through most of his life. He died Feb. 11, 1853. He left property, about \$2500, to the Missionary Society,

for the benefit of the China Mission. See *Minutes of Annual Conferences*, 1853, p. 212.

**Sylea**, in Greek mythology, was a daughter of king Corinthus and wife of Polypemon, to whom she bore Sinis, the pine-tree bender, a notorious robber.

**Syleus**, in Greek mythology, was a tyrant of Aulis, who compelled all foreigners who entered his dominions to labor in his garden. Hercules killed him, together with his daughter Xenodice. Another daughter was educated by her brother Diceus; she fell in love with Hercules, and died of grief because she could not be his. He also loved her so deeply that he was with difficulty restrained from casting himself upon her funeral pyre.

**Syllabæ enthronisticæ** (Συλλαβὰι ἐνθρονιστικαί), circular letters written by bishops recently installed to foreign bishops, to give them an account of their faith and orthodoxy, that they might receive letters of peace and communion from them. See Bingham, *Christ. Antiq.* bk. ii, ch. xii, § 10.

**Syllabus**, an abstract; a compendium containing the heads of a lecture or sermon.

**SYLLABUS** (Gr. συλλαβός, a collection, i. e. catalogue), PAPAL, is the title given to the appendix to the encyclical letter issued by pope Pius IX, Dec. 8, 1864. It was "a list of the principal errors of the day pointed out in the consistorial allocutions, encyclical and other apostolical letters of pope Pius IX," and enumerating, under ten general heads or sections, eighty of these errors. These ten sections of errors are entitled, "I. Pantheism, Naturalism, and Absolute Rationalism;" "II. Moderate Rationalism;" "III. Indifferentism, Toleration;" "IV. Socialism, Communism, Secret Societies, Bible Societies, Clerico-liberal Societies;" "V. Errors respecting the Church and her Rights;" "VI. Errors of Civil Society, as much in themselves as considered in their relations to the Church;" "VII. Errors in Natural and Christian Morals;" "VIII. Errors as to Christian Marriage;" "IX. Errors regarding the Civil Power of the Sovereign Pontiff;" "X. Errors referring to Modern Liberalism." Some of the specifications under these general heads have respect to religious freedom, the separation of Church and State, the civil contract of marriage, education outside of the control of the Roman Catholic Church, the conflict between the civil law and the spiritual authority of the Church, the immunities of the clergy, the cessation of the pope's temporal power, etc. Much excitement was created by the appearance of this bull and syllabus, especially in France; Jules Baroche, minister of public worship, forbidding the bishops to publish the syllabus and the doctrinal part of the bull. Elsewhere the civil governments did not interfere.

For literature, see Schulte, *The Power of the Romans over Princes, Countries, etc.* (1871); Fessler, *True and False Infallibility of the Popes* (Vienna, 1871; Lond. and N. Y. 1875); Gladstone, *The Vatican Decrees in their Bearing on Civil Allegiance* (1874), with replies by Newman, Manning, and others.

**Syllia**, in Greek mythology, was a nymph beloved by Apollo, and the mother by him of Xeuxippus.

**Sylliturgus** (Συλλειτουργός), a Greek term to designate the assistant during the offering of the Christian sacrifice.

**Sylphs**, in the fantastic system of the Paracelsists, are the elemental spirits of the air, who, like the other elemental spirits, hold an intermediate place between immaterial and material beings. They eat, drink, speak, move about, beget children, and are subject to infirmities like men; but, on the other hand, they resemble spirits in being more nimble and swift in their motions, while their bodies are more diaphanous than those of the human race. They also surpass the latter in their knowledge both of the present and the future, but have no soul; and when they die, nothing is left. In form they are ruder, taller, and stronger than men, but stand nearest to them of all the elemental spirits, and as a

of nickname (perhaps from שָׁקֶר, *shéker*, "falsehood," spoken of idols in Hab. ii, 18; or from שִׁכְכֹר, *shikkôr*, "drunkard," in allusion to Isa. xxviii, 1, 7), such as the Jews were fond of imposing upon places they disliked; and nothing could exceed the enmity which existed between them and the Samaritans, who possessed Shechem (John iv, 9). It should not be overlooked that John appears always to use the expression λεγόμενος, "called," to denote a sobriquet or title borne by place or person in addition to the name, or to attach it to a place remote and little known. Instances of the former practice are xi, 16; xx, 24; xix, 13, 17; of the latter, xi, 54. The son of Sirach speaks of "the foolish people that dwell in Sikima" (i, 28). See Lightfoot, *Opera*, ii, 586; Lange, *Life of Christ*, ii, 337; Hengstenberg, *On St. John* iv, 5. Jerome, in speaking of Paula's journey, says, "She passed *Sichem*, not, as many erroneously call it, *Sichar*, which is now *Neapolis*" (*Epist. ad Eustoch.* in *Opp.* i, 888, ed. Migne). In his questions on Genesis he says that, according to Greek and Latin custom, the Heb. *Sichem* is written *Sicina*; but that the reading *Sichar* is an error: he adds that it was then called *Neapolis* (*Opp.* ii, 1004, ed. Migne). So Adamnan writes to Arculf, who travelled in the 7th century: "He visited the town called in Hebrew *Sichem*, but by the Greeks and Latins *Sicina*, and now more usually *Sychar*" (*Early Travels*, Bohn, p. 8). In the 12th century Phocas says, "Sichar was the metropolis of the Samaritans, and was afterwards called *Neapolis*" (Reland, *Palæst.* p. 1009).

On the contrary, Eusebius (*Onomast.* s. v. Συχαρ and Λουζά) says that Sychar was in front of the city of Neapolis; and, again, that it lay by the side of Luza, which was three miles from Neapolis. Sychem, on the other hand, he places in the suburbs of Neapolis by the tomb of Joseph. The Bordeaux Pilgrim (A.D. 333) describes Sechim as at the foot of the mountain, and as containing Joseph's monument and plot of ground (*villa*). He then proceeds to say that a thousand paces thence was the place called Sechar. Moreover, had such a nickname been applied to Shechem so habitually as its occurrence in John would seem to imply, there would be some trace of it in those passages of the Talmud which refer to the Samaritans, and in which every term of opprobrium and ridicule that can be quoted or invented is heaped on them. It may be affirmed, however, with certainty that neither in Targum nor Talmud is there any mention of such a thing. Lightfoot did not know of it. The numerous treatises on the Samaritans are silent about it, and recent close search has failed to discover it. See SHECHEM.

But Jerome's view soon became the prevailing one, and has continued to be so. Robinson adheres strongly to it: and in regard to one of the chief objections urged on the other side, that Jacob's well, which stands at the entrance into the valley where Shechem or Nablûs is situated, is about a mile and a half from the town, so that a woman would hardly have gone so far to draw water, since there was plenty of good water near at hand, he thinks that the town probably had extensive suburbs in the Gospel age which did not exist in the time of Eusebius, and might have approached quite near to the well of Jacob—just as Jerusalem anciently extended much farther north and south than at the present day (*Researches*, iii, 121). Porter takes the same general view, and says, in regard to the distance of the well, that persons "who use such arguments know little of the East. The mere fact of the well having been Jacob's would have brought numbers to it had the distance been twice as great. Even independent of its history, some little superiority in the quality of the water, such as we might expect in a deep well, would have attracted the Orientals, who are, and have always been, epicures in this element" (*Handbook for Pal.* p. 342). It may be added that there is no need for supposing this well to have been the one commonly frequented by the people of Nablûs. The visit of the

woman to it may have been quite an occasional one, or for some specific purpose.

2. It has been thought that Sychar may be identified with the little village of *Askar*, on the south-eastern declivity of Mount Elbal (Van de Velde, *Memoir*, p. 350; Thomson, *Land and Book*, ii, 206). The etymology, however, is against it, and also the topography. Our Lord was on his way to Galilee. The great road runs past the mouth of Wady Nablûs. Jacob's well is on the southern side of the opening; and Askar about half a mile distant on the northern side. The main road passes quite close to both. Our Lord sat down by the well while the disciples turned aside into the city to buy bread. Had Askar been the city, this would have been unnecessary; for by continuing their route for a short distance farther they would have been within a few paces of the city. There is, besides, a copious spring at Askar. In the *Quarterly Statement* of the "Pal. Explor. Fund," for July, 1877, p. 149 sq., Lieut. Conder gives a further description of the village of Askar, and some additional reasons for identifying it with Sychar; but they are not conclusive.

**Sy'chem** (Acts vii, 16). See SHECHEM.

**Sy'chemite** (Judith v, 16). See SHECHEMITE.

**Sycites**, in Greek mythology, was a surname of *Bacchus* in Lacedæmon, as having been the first to plant the fig (*συκίη*).

**Sydesmen** (more properly *Synodsmen*) are Church officers, anciently appointed to assist the church-wardens in making presentments of ecclesiastical offences at the bishop's *synods* or visitations. By the 90th canon, they are to be chosen yearly, in Easter week, by the parish priest and parishioners, if these can agree; otherwise they are to be appointed by the ordinary of the diocese. Of late years this office has devolved on the church-wardens. The old English term for sydesmen was "sithcondmen," or "sithcundmen."

**Sye'lus** (Συήλος v. r. Ἡσύηλος and ἡ σύνοδος), a corrupt Greek form (1 Esdr. i, 8) for *Jehiel* (q. v.) of the Heb. (2 Chron. xxxv, 8).

**Sye'nè** (Heb. *Sevenêh*, שִׁבְנִי; Sept. Συήνη; Vulg. *Syene*), a town of Egypt on the frontier of Cush, or Ethiopia. The prophet Ezekiel speaks of the desolation of Egypt "from Migdol to Seveneh, even unto the border of Cush" (xxix, 10), and of its people being slain "from Migdol to Seveneh" (xxx, 6). Migdol was on the eastern border [see MIGDOL], and Seveneh is thus rightly identified with the town of Syene, which was always the last town of Egypt on the south, though at one time included in the nome Nubia. Its ancient Egyptian name is *Sun* (Brugsch, *Geogr. Inschrift.* i, 155, tab. i, No. 55), preserved in the Coptic *Souan*, *Senon*, and the Arabic *Asuân*. The modern town is slightly to the north of the old site, which is marked by an interesting early Arab burial-ground, covered with remarkable tombstones, having inscriptions in the Cufic character. Champollion suggests the Coptic derivation *sa* "causative," and *ouên* or *ouên*, "to open," as if it signified the opening or key of Egypt (*L'Égypte*, i, 161-166), and this is the meaning of the hieroglyphic name. It is the natural boundary of Egypt at the south (Ptolemy, ix, 5; Pliny, *Hist. Nat.* v, 10; xii, 8; Strabo, p. 787, 815), being situated at the foot of the first cataract on the Nile (Murray, *Handbook for Egypt*, p. 463). See *Jour. Sac. Lit.* Oct. 1851, p. 158. See EGYPT.

Syene is represented by the present *Asuân* or *Es-Suân*, which exhibits few remains of the ancient city, except some granite columns of a comparatively late date and the shrine of a small temple. This building has been supposed by late travellers to have contained the famous well of Strabo (*Geog.* xvii, p. 817), into which the rays of a vertical sun were reported to fall at the summer solstice—a circumstance, says the

consequence hold intercourse with human creatures. When they have children by marriage with mortals, the children have souls, and belong to the human race. Originally masculine, they have come, probably by the etherealization of poets, to be considered as feminine.

**Sylvester GOZZOLONI.** See SYLVESTRINIANS.

**Sylvester I**, pope, was born in Rome about the year 270, and was the son of Rufinus and St. Justa. At thirty years of age he is said to have been ordained by bishop (pope) Marcellinus, and on Jan. 31, 314, he was chosen to succeed Melchides in the pontificate. His administration is celebrated for the Council of Nicæa (q. v.), held in 325, which, however, Sylvester did not attend, on account of his infirmities; and he was represented by two priests, called Guy and Vincent, while Osius, bishop of Cordova, presided in his name. He is the author of several rules to the clergy. The account given of the donation to him of the city of Rome by Constantine is wholly apocryphal. He died in Rome, Dec. 31, 335, and was succeeded by Marcus.

**Sylvester II**, one of the most learned of the mediæval popes, originally called Gerbert, was born at Aurillac, in Auvergne, early in the 10th century. He was educated in the monastery of his native village, but went early to Spain, where he learned mathematics, and afterwards to Rome. He was appointed abbot of the Monastery of Bobbio, where he taught with much distinction and success. At a later period he went to Germany as preceptor of the young prince Otho, afterwards Otho II, and ultimately became secretary to the archbishop of Rheims, and director of the cathedral school, which became eminent under his care. The archbishop having been deposed, Sylvester was elected to the archbishopric; but he was afterwards set aside; the deposition of his predecessor having been declared invalid. In the year 998, however, he was appointed archbishop of Ravenna, whence he was called to the pontifical throne, April 2, 999, as the successor of Gregory V. He renounced the liberal tendencies of his earlier years, confirmed the judgment of John XV with regard to the Synod of Rheims, and established Arnulph in his archbishopric; convened a synod in 1001 at Rome, which placed the Convent of Gandersheim under the jurisdiction of the bishop of Hildesheim; and awarded title and crown to the king St. Stephen of Hungary, besides conferring on him the right to determine in ecclesiastical matters in his kingdom. While considering a plan for a crusade to the Holy Land, he died in Rome, May 12, 1003, and was succeeded by John XVIII. He was a man of rare acquirements for his age. He was an adept in mathematics and in practical mechanics and astronomy, in which departments his attainments acquired for him, among his contemporaries, the evil reputation of a magician. He is also believed to have been acquainted with Greek, and perhaps with Arabic. Of all his works, which were numerous, his letters (printed by Du Chesne in the *Historians of France*) have attracted most notice, from their bearing on the history of an obscure period. His literary remains have been published by Masson and others, more recently by Pertz, though not complete. See Richeri *Hist. Lib. iv.*, in Pertz, *Monum. Germ. Historica Script.* (Hanov. 1838), tom. iii.; Mabillon, *Vet. Analecta* (Paris, 1723), p. 102 sq.; Hock, *Gerbert od. Papst Sylvester II u. sein Jahrhundert* (Vienna, 1837). See also Budinger on the scientific and political importance of Gerbert (Cassel, 1851); Herzog, *Real-Encyklop.* s. v.; Hoefler, *Nouv. Biog. Générale*, s. v.

**Sylvester III**, antipope, was born in Rome, May 1, 1044; and while known as John, bishop of Sabina, he was set on the pontifical throne through the influence of the consul Ptolemæus, in place of the juvenile Benedict IX, who had been expelled for his vices. Sylvester reigned but three months, when the counts of Frascati took up arms to replace Benedict. The latter, seeing he was despised by the clergy, sold the tiara to John Gratian, whom he crowned as Gregory VI. The em-

peror Henry III held, in December, 1046, a council at Sutri, when the three popes were all deposed, and Clement II was elected. See POPE.

**Sylvestrians** is the name of an order of monks founded by Sylvester Gozzoloni, who was born in 1170 (or 1177) at Osimo, in the Papal States. He was educated at Padua and Bologna, and received a canonry at Osimo, which he renounced about 1217, in order to devote himself in solitude to a contemplative life of asceticism. Pupils and followers gathered about him, with whom he founded a monastery in 1231 on Mount Fano, in which the Benedictine rule was adopted, coupled with a vow of rigid poverty. Innocent IV confirmed the foundation (1247), and the order spread, particularly in Umbria, Tuscany, and Ancona. It was united with that of Vallambrosa in 1662, but again separated from it in 1681, and was endowed with new constitutions by Alexander VIII (1690), which provided for the celebration of matins at night, for reciprocal and also self-inflicted flagellations on every Wednesday and Friday in Advent and Lent, and for abstinence from the use of flesh, milk, and eggs on every Friday and every Church festival. A considerable number of convents, of nuns as well as monks, belonged to this order in its flourishing period; but it is now insignificant. Leo XII purposed to dissolve the order and incorporate its members with other organizations; but it has, nevertheless, been preserved to our time. An order of female Sylvestrians exists in Perugia. The direction of the order is placed in the hands of a general and a procurator-general, the former being chosen for four and the latter for three years. The habit is composed of a gown, scapulary, cowl, and mantle; its color is dark brown. The general wears violet, and is privileged to bear the *pontificalia* (q. v.). —Herzog, *Real-Encyklop.* s. v.

**Symæthis**, in Greek mythology, was a Trinacrian nymph, goddess of the river of the like name, beloved of Faunus, to whom she bore Actis.

**Symbol** (from σύν and βάλλω, to throw together, i. e. by comparison), an abstract or compendium, a sign or representation of something moral, by the figures or properties of natural things. Hence symbols are of various kinds, as hieroglyphics, types, enigmas, parables, fables, etc. (q. v. severally). See Lancaster, *Dict. of Scripture Symbols*; Bicheno, *Symbolical Vocabulary*, in his *Signs of the Times*; Faber, *On the Prophecies*; Jones [W.], *Works*, vol. iv.; Wemyss, *Clavis Symbolica*; Mills, *Sac. Symbolology* (Edinb. 1853); Fairbairn, *Typol. of Script.*; *Brit. and For. Evan. Rev.* 1843, p. 395. See SYMBOLISM.

**SYMBOL** (Gr. Σύμβολον, sign, token), a title anciently given to the Apostles' Creed (Cyprian, *Ep.* 76; Rufinus, *De Symbolo*; Augustine, *De Fide et Symbolo*; and Hilary, *De Trin.* cap. xii). The ecclesiastical origin of the term is much disputed, but its most probable meaning was that of a contract, or bond of our faith. One reason for the name derives it from a Greek word signifying a throwing or casting together, and alleges that the apostles each contributed an article to form the Creed, putting their joint opinion or counsel in an abridged shape. The other is the opinion that this Creed was used in times of persecution as a watchword or mark whereby Christians (like soldiers in the army) were distinguished from all others.

The term *symbol*, importing an emblem or sensible representation, is also applied in the holy eucharist to the sacred elements, which there set forth the body and blood of Christ.

**Symbolical Books.** This title designates the public confessions of faith of the different Christian churches or denominations; in other words, the writings in which an ecclesiastical communion publishes to the world the tenets that bind together its members and distinguish it from other communions of believers or unbelievers. For the *idea* of a symbol we refer to the article SYMBOLICS.

The only symbol which finds universal acceptance in the Church is the Apostles' Creed. As the Church creed *κατ' ἑξοχὴν*, it is distinguished from the Scriptures upon which it is based, but also, on the other hand, from the private writings and confessions of the teachers of the Church, however greatly the latter may be esteemed. The later symbolical books differ from the briefer symbolical formulas, which alone served the purposes of the Church before the Reformation, in being more extensive and detailed, and in constituting the confessions of particular churches only (*symbola particularia*), while the great creeds (Apostles', Nicene, Athanasian) have oecumenical value. The phrase *Libri Symbolici* originated in the Lutheran Church, and was first applied to its own confessional writings when they appeared in the *Book of Concord*; but its use extended, and has long been current in all the churches and sects of Christendom.

Considerable diversity of opinion has existed with reference to the importance and value of symbolical writings. The Church of Rome regards the symbol as the immovable and unchangeable rule of faith, and therefore as the binding norm of doctrine. This does not, according to Thomas Aquinas (*Summa Theol.* ii, 2, 1, 9), detract from the supreme authority of the Scriptures, because the symbol is merely an extract from Scripture. In substance there is but one symbol; each additional formula is simply an exposition and closer determination of the original creed. Variations are to be understood as different aspects of the truth, assumed in view of the varying oppositions it has to encounter. The Church is accordingly competent to formulate a new symbol for the exposition of the truth, though not to set aside, or even to alter, the traditional creed (Thom. Aquinas, *ut sup.*).

The Church of the Reformation asserted the sole authority of Holy Scripture in matters of doctrine; and although it received the oecumenical symbols, it determined their character as being *testimonia fidei* simply, i. e. testimonies certifying the understanding of the Word of God current in the Church at a given time. The worth of confessions is accordingly made to depend on their agreement with the Scriptures, and they may be altered and improved. The author of the *Augustana* repeatedly undertook a thorough revision of his work; Luther did the same with the *Smalcald Articles*; and the evangelical estates not only approved of Melancthon's *Variata*, but in 1537 directed their theologians at the Convention of Smalcald to revise the confession. The beginnings of an obligatory support of the confession are, however, apparent at an early day. Subscription to the *Augsburg Confession* was occasionally required during the fourth decade of the 16th century, and in 1533 the theological faculty of Wittenberg were required by statute to teach sound doctrine as contained in the ancient creeds and the *Augsburg Confession*. A growing disposition to insist on uniformity of teaching became manifest, and it was this which gave rise to the Osiandrian Controversies (q. v.). In the middle of the 16th century the various *corpora doctrinæ* began to appear: in 1560 the *Corpus Doctr. Philippicum*; in 1561 the *C. D. Pomeranicum*; in 1567 the *C. D. Pruthenicum*, etc. The conclusion was made in 1576 with the *Formula of Concord* (q. v.), and this names the writings to which symbolical authority is given by reason of a unanimous approval of their teachings, and is itself included among them. A rigid subscription was demanded in the countries where these writings were received by the civil government. The dispute with Calixtus (q. v.) led the Lutheran theologians to postulate a mediate inspiration, and consequently a divine authority, for the symbolical books; but the distinction between the canon of Scripture and such standards is nevertheless constantly preserved in word, if not always in fact. In reality, the symbolical books were regarded as *κανὼν τῆς πίστεως* throughout the 17th century side by side with the Scriptures, inasmuch as the faith was grounded directly on the symbol rather than on the Bible.

The Reformed churches have produced no written symbol which has formal authority over them all; but they have cherished a very definite conviction of confessional unity among them, as may appear from the fact that the different Reformed confessions, and particularly the more important of them, the *Helvetica*, *Gallicana*, *Scotica*, *Belgica*, etc., are received in all such churches as embodiments of the pure type of doctrine, and from the further fact that the members of a Church holding to one of these confessions may pass beyond the territory within which such confession has authority, but cannot pass from one confession to another by joining a Church which adheres to another of the Reformed confessions. All such persons are regarded simply as members of the Reformed Church. The number of Reformed symbols was influential also in directing attention upon their substance rather than upon the formulated letter, it being conceded that with respect to the latter the confession is not infallible and incapable of further improvement. Such changes, however, are not to be needlessly undertaken, nor may individuals subject the confessional standards at will to experiments in the interests of novelty. Great care has ever been exercised to preserve the purity of the confessional symbols, in some instances carried to the extent of requiring the subscription of the clergy and the officers of state to doctrinal standards settled by law. (Basle and Geneva even required such subscription of the body of their citizens. The Reformed Church of East Friesland alone never required subscription to its symbol.) The 17th century produced symbols in this body also, e. g. the *Canons of Dort* and the *Helvetic Consensus*, both of which go beyond even the *Formula of Concord* in scholastic rigidity. The beginning of the 18th century saw a reaction, however; Spener already ventured to doubt the necessity of symbols, since the Church had so long existed without them, and expressed his dissent from the doctrine of their inspiration and infallibility. A century afterwards it was conceded that obligation to adhere to the symbol holds only with reference to essentials; and a majority of critics asserted that the unessential, not directly religious and merely theological, which deserves no place at all in a creed, was greatly in excess over that which is really essential. The conflict with rationalism caused many modifications in the views of the churches; but subscription to the creed was generally insisted on, though the obligation thus assumed was often but lightly felt. In the present period, the reaction against rationalism has occasioned a revival of 17th-century confessionalism in many quarters; and, on the other hand, a liberal tendency requires a breaking-away from the authority of symbols as being simply monuments of the faith of our fathers and evidences of former conquests, and also as being adverse to the genius of Protestantism. See CONFESSION OF FAITH.

The abstract right of the Church to require submission to its standards is evident, but it is a question which must be answered, May the Protestant Church assert that right, and, if it may, then to what extent? It is evident that the more recent symbols, as being more restrictive and separative in character than the older confessions and creeds, are of inferior authority. It is also clear that the spirit and substance of a confession have greater importance than attaches to the form or letter. Neither the *Augsburg Confession* nor the *Heidelberg Catechism* constitutes the Protestant Confession of Faith, and must be regarded simply as essays towards formulating the body of Protestant doctrine, which may be tested by criticism and revised. Doctrinal purity in the concrete is, after all, a relative thing, and the Church is under the necessity of persisting in the work of grounding its teachings more solidly on the Word of God and of developing them further towards their ultimate consummation. A distinction must accordingly be admitted between heterodoxy of a more or less serious type, which consists in departing in some

points from the accepted standards of a Church, and heresy, which removes the foundations and destroys the faith itself. It is none the less certain, however, that Protestantism requires an inner unity and a durable basis of character. Every step of its progress must be in harmony with its fundamental principles, which are laid down in the confessions formulated by its founders. Those symbols attest a faith which belongs equally to our fathers and to us. The liberty of teaching, moreover, needs to be guarded, lest it degenerate into license and anarchy contrary to the Word of God and the order of the Church. Protestantism certainly has the right to protect its truth against neologizing antichristianity, and also against un-Protestant Romanism—in a word, against manifest perversion. The subscription to symbols required of its accredited teachers can hardly, however, be without conditions. Perhaps the utmost extent to which such requirement should be pressed is a cordial acceptance of principles upon which the confessions are based, leaving particulars to be determined by the conscience of the subscriber. In any case, the symbols are entitled to respect so far as to make them the subject of earnest and loving study, and to protect them against abuse from professed adherents.

*Literature.*—Early Protestant writers have no separate locus for symbolical books, and but few treat of them even incidentally (see Hase, *Hutterus Rediviv.* p. 115, note 1). Among later doctrinal writers, see Twisten (1826), i, 50 sq.; Hase (3d ed. 1842), p. 498 sq.; Martensen, p. 74 sq. Controversial writings are partially given in Hase, *ut sup.* A comprehensive monograph is Johannsen's *Wissenschaftl. u. hist. Unters. üb. d. Rechtmässigkeit d. Verpflicht. auf symb. Bücher*, etc. (Altona, 1833). See also id. *Anfänge des Symbolzwangs*, etc. (Leips. 1847); Matthes, *Vergleichende Symbolik* (ibid. 1843), p. 2 sq.; Schenkel, *Ursprüngl. Verhältn. d. Kirche zum Staat*, in the *Stud. u. Krit.* 1850, ii, 454 sq.; Höfling, *De Symb. Natura, Necessitate, Auctoritate, et Usu* (Erl. 1835); Bretschneider, *Unzulässigkeit d. Symbolzwangs*, etc. (Leips. 1841); Rudelbach, *Einkl. in d. Augsburg. Confession*, etc. (Dresd. 1841); Sartorius, *Nothw. u. Verbindl. d. kirchl. Glaubensbekenntnisse* (Stuttg. 1845); Schleiermacher, *Eigentl. Werth . . . d. symb. Bücher*, in *Ref. Alm.* (Frankf. 1819), p. 335 sq.; id. *Sendschr. an v. Cölln u. Schulz*, in the *Stud. u. Krit.* 1831, i, 3 sq.; id. *Prakt. Theologie*, p. 622 sq.; De Wette, *Lehrinheit d. evan. Kirche*, in the *Stud. u. Krit.* 1831, ii, 221 sq.; Ullmann, *Allenb. kirchl. Angel.*, etc., in the *Stud. u. Krit.* 1840, ii; Scherrer, *Die Princip. u. fakt. Stellung d. schweiz.-ref. Kirche*, etc., in the *Verhandl. d. schweiz. Prediger-gesellsch. zu St. Gallen*, 1844; *Die gegenw. Krisis d. kirchl. Lebens*, etc. (Gött. 1854); Petri, *Beleucht. d. gött. Denkschrift*, etc. (Hanov. 1854); *Erklärung der Denkschr.* (Gött. 1854); Nitzsch, *Prakt. Theol.* i.

Among editions of Lutheran symbolical writings, those of Rechenberg, *Concordia*, etc. (Lips. 1678, 8vo, and often; last ed. 1756), and of Hase, *Libri Symb. Eccl. Ev.* etc. (ibid. 1837), deserve mention. The Reformed confessions have not been gathered into a single collection, the best and most complete collection being that of Niemeyer, *Collect. Conf. in Eccl. Ref. Publicat.* (ibid. 1840), cum Append. Other collections are by Augusti (Elberfeld, 1827), German by Mess (Neuwied, 1828, 1830, 2 pts.; comp. Schweizer, *Ref. Glaubensl.* i, 122), and Heppel, *Bekenntnisschriften d. ref. Kirchen Deutschl.* (Elberfeld, 1860). The *Libri Symbolici Eccl. Romano-Catholicæ* were edited by Danz (Vimar, 1836) and Streitwolf et Klenner (Gött. 1837 sq.); the *Libri Symb. Eccl. Orientalis* by Kimmel (Jena, 1843; cum Append. ibid. 1850). For the symbolical books and writings of particular churches and denominations, see the respective articles.—Herzog, *Real-Encyklop.* s. v.

**Symbolics.** The meaning of this term will vary with that assigned to the original word from which it is derived: *σύμβολον* (from *συμβάλλειν*) has a primary reference to the fitting-together of two separate objects, e. g. the parts of a ring or of other "tessera hos-

pitalitatis." *Σύμβολον* (related to *σῆμα*) next came to denote every mark or sign by which the connection of individuals to a whole, e. g. a corporation or association, might be indicated. Such were the badges which secured admission to a banquet, the "tessera militaris," the flag, the password, etc. In time, whatever might be employed to illustrate abstract or supersensual ideas to the senses came to be termed a symbol, and this may be regarded the current meaning of the word to-day. As Christianity, like all religions, has its symbols, it is as proper to speak of *Christian symbolics* as of heathen (or ancient). A rich symbolism runs through the whole of Christian liturgics, e. g. the symbolism of the cross, etc.; but in the organism of theological study the term *symbolics* has no reference to such symbols. The reference is rather to the formulated and written *confessions* of the Church, which, more than any badge, are suited to indicate the union of individuals in one and the same ecclesiastical organization. Of these symbols the most ancient are baptismal confessions, from which the *Symbolum Apostolicum* was developed, which forms the rallying-point of all who are adherents of Christianity. Heretical tendencies afterwards compelled the Church to formulate the great creeds—the Nicene, the Niceno-Constantinopolitan, and the so-called Athanasian—in which the marks of orthodoxy were determined and made prominent; and, in addition to the foregoing so-called *ecumenical symbols*, other minor creeds and confessions were called into being by the force of events from time to time.

The rise of Protestantism furnished a new class of symbols which were intended to serve as marks of distinction between the old papal and the new evangelical churches. Of these the first was the *Augsburg Confession* (q. v.) of 1530, and the supplementary symbolical books of the Lutheran Church, closing with the *Book of Concord* in 1580. The Reformed churches framed distinct symbols of their own—the *Zwinglian*, the *Tetrapolitana*, etc. Of this class the *Thirty-nine Articles* of the Church of England, the *Heidelberg Catechism*, and the second *Helvetic Confession* (see the respective articles) acquired especial prominence. The Romish Church, for its part, was obliged, by the rise of Protestantism, to formulate its faith anew with a view to marking the features peculiar to its teachings, which was done in the *Professio Fidei Tridentina* and the *Catechismus Romanus* (see the corresponding articles). The accumulation of this wealth of material has operated decisively upon symbolics, so that the term has come to denote the science which is employed upon the doctrines that distinguish the several confessions of Christendom. Its method may be historical, statistical, polemical, or irenic; but the ground upon which it operates can only be that of comparison of dogmas.

Like the history of doctrines, to which it stands related, symbolics is a modern branch of theological science, but is possessed of so much individuality as to necessitate a separate treatment. The foundation for the science was laid in the preliminary works of Walch, Semler, Planck, and others (see below, *Literature*), while its actual beginnings date to Winer and Marheineke. The former drew up tables in which he simply presented to view, side by side, the differences existing in the various confessions, while the latter sought to exhibit the internal unity of each separate confession. It is evident that the treatment of symbolics requires the use of both these methods, and will vary according as the writer occupies the ground of one confession or another, or as he places himself above all confessions. It was because of this fact that Möhler's *Symbolik*, from the Roman Catholic point of view, drew forth the famous work of Baur from the Evangelical position (see below). The science speedily developed the necessity for examining its material, not simply in the letter of the symbolical books, but in the spirit of the confessions. Every detail has accordingly been made the subject of earnest study; and the ethical, social, political, and artistic bear-

ings and differences of the various symbols have been examined. This fact gives rise to the question whether the term symbols is adequate to the thing it is intended to represent; but all attempted substitutes have been so clumsy that they failed to win their way into favor. In Great Britain and America the subject is usually included under dogmatic theology (q. v.).

**Symbolism** is that system which represents moral or intellectual qualities by external signs or symbols. It is characteristic of the earlier and ruder stages of development, when the mind and moral nature have not yet grown to the age which takes direct cognizance of mental and moral qualities, or takes cognizance of them only through external signs that bear a real or a conventional resemblance to them. The Old Test. is full of symbolism; the Jewish Temple, like the Tabernacle which it superseded, though no image of the Deity was permitted in it, was itself a symbol of the soul of man, in which God abides, if he be holy and ready to receive him; and all its utensils, as well as all its services, were symbolical. See TYPE, and the various articles on the Old-Test. ceremonials and sacred objects. Symbolism was also naturally characteristic of the Church of the Middle Ages, which undertook to carry home to the eyes, minds, and hearts of the people spiritual truths through external symbols. The origin of some of these it is now difficult to discover. Many naturally suggest the correlative truth to the mind; others make the suggestion through historical or scriptural association. The following is a partial list of some of the principal symbols in use in the Christian churches, for a fuller account of which the reader is referred to Clements [Mrs.], *Handbook of Legendary and Mythological Art*. The glory, aureole, and nimbus all represent light or lightness, and are symbols of sanctity. The nimbus surrounds the head; the aureole the body; the glory unites the two. The nimbus attaches in Roman Catholic art to all saints; the aureole and glory only to the persons of the God-head and to the Virgin Mary. The fish is an emblem of Christ. See ICHTHYS. The cross, in its various forms, is also an emblem both of Christ and his passion. See CROSS; CRUCIFIX; LABARUM. The lamb is a common symbol of Christ. It derives its significance from the fact that it was one of the chief sacrifices of the Jewish Temple, and from the words of John the Baptist, "Behold the lamb of God, which taketh away the sin of the world" (John i, 29). The lamb is often represented in art bearing a cross. The lion is another symbol of Christ, who in Scripture is called "the Lion of the tribe of Juda" (Rev. v, 5). The pelican, which is said to bare open her breast to feed her young with blood, is an em-

blem of redemption. The dove is a symbol of the Holy Spirit (Matt. iii, 16): issuing from the mouth of the dying, it is an emblem of the soul. The olive-branch is an emblem of peace (Gen. viii, 11); the palm, of martyrdom (Rev. vii, 9). The lily represents chastity; the lamp, piety (Matt. xxv, 1–12); fire, zeal or the sufferings of martyrdom; the flaming heart, fervent piety and spiritual love; the peacock, immortality; the crow, victory: on women, it signifies the bride of Christ. The sword, axe, lance, and club indicate martyrdom; the skull and scourge, penance; the chalice, faith; the ship, the Christian Church; the anchor, faith (Heb. vi, 19). Each color also has a symbolic meaning in art, for which see article COLOR. In Roman Catholic art, also, each apostle has his own symbol, as follows: Peter, the keys, or a fish; Andrew, the transverse cross which bears his name; James the Greater, the pilgrim's staff; John, the eagle, or the chalice with the serpent; Thomas, a builder's rule; James the Less, a club; Philip, a small cross on a staff, or crossier surmounted by a cross; Bartholomew, a knife; Matthew, a purse; Simon, a saw; Thaddeus, a halberd or lance; Matthias, a lance. The various monastic orders have also each its own symbol. See Jameson and Eastlake, *History of Our Lord as Exemplified in Works of Art* (Lond. 1864, 2 vols.); Didron, *Christian Iconography, or History of Christian Art in the Middle Ages* (ibid. 1851, ed. Bohn).

**Symbolum** (Σύμβολον), a Greek term for (1) the holy eucharist; (2) a creed; (3) a bell. See SYMBOL.

**Symê**, in Greek mythology, was a nymph, daughter of Ialymus and Dotis. She was beloved of the sea-god Glaucus, who carried her off to an island near Rhodes, on the coast of Caria, which received its name from her (Athenæus, vii, 296). By Neptune she bore Chthonius, who colonized the island from Lindus.

**Symeon the Stylite**. See SIMEON, ST.

**Symmachia**, in Greek mythology, was a surname of Venus at Mantinea, in Arcadia.

**Symmachians**. The term designates the members of a sect mentioned only by Philaster (*Hær.* lxiij). He describes them as adherents of Patricius, who taught that the human body was not created by God, but by the devil, and that it should be abused in every possible way, suicide even being regarded as allowable. The Symmachians asserted also that every vice and fleshly lust should command the obedience of mankind, and that there is no future judgment for the race. It is more probable, however, that the Symmachians were disciples of Symmachus (q. v.) of Samaria, a Jew who became a Christian, consorted with the Ebionites, and furnished a Greek version of the Old Test., which stands before that of Theodotion in the Polyglot, but is of more recent date than the latter. Petavius (in *Notes on Epiphanius*, ii, 400) endeavors to trace their origin to yet another Symmachus; and Valesius (on Euseb. vi. 17) says that a Jewish-Christian sect originated with the Ebionite Symmachus, of whom Ambrose states, in a commentary on the Epistle to the Galatians, that they descended from the Pharisees, kept the whole law, called themselves Christians, and followed Photinus in the belief that Christ was merely a man. The Manichæan Faustus (see Augustine, *Contra Faust.* xix, 14), on the other hand, describes the Symmachians as Nazarenes, and Augustine adds (*Contra Cresconium*, i, 81) that they were but few in number in his time, and that they practiced both Jewish circumcision and Christian baptism. See Fabricius [Joann. Alb.], *Philastrii de Hæresibus Liber, cum Emend. et Notis* (Hamb. 1725), p. 125.—Herzog, *Real-Encyklop.* s. v.

**Symmachus**, pope from A.D. 498 to 514, is noted because of his conflicts with the civil power, and his endeavors to heighten the importance of the Roman see. At the time of his election by the Roman party, the imperial party had elected the archpresbyter Laurentius, who was pledged to sign the *Henoticon* (q. v.).

The determination of the election was left with Theodoric, king of the Goths, and resulted in favor of Symmachus, because he was the first to be anointed or was supported by a majority of votes. At a synod held at Rome in 499 it was thereupon enacted that no vote should be cast for the election of a new pope before the reigning pope had actually died, and that that candidate should be regarded as elected who was supported by all or a majority of the votes of the Roman clergy. At a synod at Rome in 502 Symmachus revoked the enactment of king Odoacer which prohibited the incumbent of the papal chair from selling any portion of the property of the Church, and at the same time he ordained that all interference in the affairs of the Church of Rome should be forbidden to the laity. This provision contributed greatly to the development of the papal power, and has always remained a cardinal principle in the administration of the Romish Church. The party of Laurentius, after a time, brought heavy charges against Symmachus, and Theodoric deputed bishop Peter of Altinum to investigate the case; but, as he became a partisan of Laurentius, the king convoked a new synod at Rome, the *Synodus Palmaris*, in 503. The life of Symmachus was endangered by the machinations of the Laurentines, and he submitted unconditionally to the decisions of the synod, in direct contradiction of his recently promulgated ordinance against the interference of laymen in ecclesiastical matters. He was acquitted without a trial. Bishop Ennodius of Ticinum, in his written defence of this synod, was the first to declare that God has reserved the judgment of the incumbent of the Roman see to himself, while other men must, according to his will, be judged by their fellows. At a synod held at Rome in 504, Symmachus promulgated detailed ordinances against all who should appropriate to themselves any of the possessions of the Church. It is worthy of note that the synods held under his pontificate addressed to him, by way of eminence, the title *Papa*. He appointed bishop Caesarius of Arles his vicar in Gaul. He banished the remaining Manichæans from Rome and caused their books to be burned, but was himself branded as a Manichæan by the emperor Anastasius. Tradition attributes to him the introduction of the *Gloria in Excelsis* into the Sunday and feast-day services of the Church. He died, as is reported, July 19, 514. See Schröckh, *Christl. Kirchengesch.* xvii, 180, 195-211; Gieseler, *Kirchengesch.* I, ii, 398-405.—Hertzog, *Real-Encyclop.* s. v.

**Symmāchus**, a translator of the Old Test. into Greek, was born in Samaria during the latter half of the 2d century. Originally a Jew, he became a Christian, but embraced the doctrine of the Ebionites.

In spite of the high reputation enjoyed by the Alexandrian version, or Septuagint (q. v.), not only among the Hellenists outside of Palestine, but also within Palestine itself, at a later time it became an object of suspicion to the stricter Jews, owing to polemical reasons, so that, against the Christians, they denied its correctness, and set up another translation in opposition to it. The first who made a version for the use of the Jews was Aquila (q. v.); not much later than Aquila, Theodotion (q. v.) prepared a second, and very soon afterwards another translation was made by Symmachus. From Epiphanius, *De Ponderibus et Mensuris*, c. xvi (whose accounts, however, Bleek pronounces fabulous), we learn that Symmachus was a Samaritan, Σύμαχος τις Σαμαρείτης τῶν παρ' αὐτοῖς σοφὸν . . . νόσας φιλαρχίαν . . . προσηλυτεύει καὶ περικείμεται δεύτερον. With Epiphanius agree Athanasius (*Synopsis*), the *Chronicon Paschale*, and Euthymius Zigabenus, in Carpoz, *Critica Sacra*, p. 567. Eusebius (*Hist. Eccles.* vi, 17; and *Demonstr. Evang.* vii, 1) calls him Ἐβωνάιος, an Ebionite, which is also the opinion of Jerome and modern critics. Fürst and Geiger call him a Jew, and a pupil of R. Meir (q. v.).

As to the time in which he lived, Epiphanius (*loc. cit.*) places him in the reign of king Severus. With this

would agree the fact that Irenæus does not name him, while he mentions Aquila and Theodotion, and that Origen already found his translation in existence. Bleek says that from Eusebius (*loc. cit.*) we may infer "that the translation of Symmachus was little known before the time of Origen, and that Origen had obtained it from a certain woman Juliane, to whom it had come from Symmachus himself." The passage in Eusebius runs thus: Ταῦτα δὲ ὁ Ὀρίγηνος μετὰ καὶ ἄλλων εἰς τὰς γραφὰς ἐρμηνεύων τοῦ Συμμάχου, σημαίνει παρὰ Ἰουλιανῆς τινος εἰληφέναι ἣν καὶ φασι παρ' αὐτοῦ Συμμάχου τὰς βίβλους διαδέξασθαι.

As to the *genius* of the translation, Epiphanius tells us that he translated in opposition to the Samaritans, πρὸς διαστροφὴν τῶν παρὰ Σαμαρείταις ἐρμηνεύσας. But this supposition is in bad taste, for, in the first place, in Gen. v Symmachus agrees with the Samaritan against the Sept.; in the second place, we cannot see how he should have made his translation in opposition to the Samaritans, who only accept the Pentateuch, while Symmachus's version is on all the books of the Old Test.; and, in the third place, none of the other Church fathers knew anything of his opposition to the Samaritans. The probability is that his whole aim was directed towards a more elegant and finer version; for Symmachus, in his version, betrays the endeavor to satisfy the *genius* of the Greek language and to keep aloof from every influence of Eastern ideas and the Hebrew original. Thus he forms periods where the original has simply co-ordinate sentences, e. g. 2 Kings i, 2, לָבוּ וַיָּשֻׁב וַיֵּלֶךְ, ἀπελθόντες πύθεσθαι; Job xxxiv, 29, וַיָּשֻׁב וַיֵּלֶךְ, αὐτοῦ δὲ ἡρεμίαν διδόντος τίς κατακρινεῖ; Psa. ix, 4, בְּשׁוּב אִיכָר אֲחֹרֶי, ἀναστροφάντων τῶν ἐχθρῶν μου. Where the Hebrew circumscribes an adverbial idea by a verb, Symmachus uses an adverb, as Gen. iv, 2, וַיֵּלֶךְ לְלֶדָה, καὶ πάλιν ἔτεκεν; or he uses the adjective for the Hebrew *nomen qualitatis*, as Psa. liv, 24, וַיֵּלֶךְ דְּמִים וּמְרִמָּה, μαιφόντοι καὶ δόλοιο. He reduces the Hebrew tropes to the corresponding Greek, e. g. 1 Sam. xx, 25, בַּעֲצָם בַּעֲצָם, ὥσπερ εἰώθει; xxv, 25, אֶל־נָא יִשְׂרָאֵל אֲדֹנָי יִשְׂרָאֵל, μὴ πρόσχες, ἀξίων; מִוֶּת תְּמוֹת, in Gen. ii, 17, becomes θνητὸς ἔσθ. He uses additions for the sake of elegance: thus, Job xxi, 18, וַיִּבְרַצַּ שְׂאוֹל יָדָיו, καὶ τάχως ἄνοστοι καὶ ἀβασάνιστοι εἰς ἄδην κατέρχονται; Ezek. xvi, 31, לְקַלֵּם אֲחֵנִי, ἐν ἀξιοπιστίᾳ συνάγουσα μισθώματα. Hebrew proper nouns are often translated etymologically, e. g. Deut. xxxii, 49, הָרַר הַחֲבִירָה, τὸ ὄρος τῶν διαβάσεων; Isa. xix, 18, עִיר הַחֲרֹם, πόλις ἡλίου.

Taken all in all, Symmachus deserves the praise which has been bestowed on his translation, which was called *versio perspicua, manifesta, admirabilis, aperta*. Jerome, *In Amos iii*, 11, speaks of Symmachus, "Non solet verborum *κακοῦηλιαν*, sed intelligentiæ ordinem sequi;" *In Isa.* v, 1, "Symmachus more suo manifestus." Eusebius, *In Psa.* xxi, 31 sq., says, σαφέστερον ὁ Σύμμαχος, and σφέδρα θαυμαστῶς ὁ Σύμμαχος; *In Psa.* xlvii, 10, οὕτως ἡρημένως θαυμαστῶς ὁ Σύμμαχος. Still we cannot characterize his style as being pure Greek or elegant; and Symmachus himself seems to have felt it, for he made a second edition of his translation, in which he corrected all such Hebraisms and harsh expressions as had crept in. Thus Jerome, *In Jer.* xcxii, says, "Symmachi *prima editio* et LXX et Theodotio *solos* (μόνοι) interpretati sunt; *secunda* quippe Symmachi vertit διόλογον;" and *In Nahum iii* he writes, "Symmachus ἀποτυμίας πλήρη, quod possumus dicere crudelitate vel severitate plena; in altera ejus editione reperi μελοκοπίας πλήρη, i. e. sectionibus carnum et frustis per membra concisis." Whether his second edition embraced all the books of the Old Test. cannot be decided with certainty, since only a few fragments of the second edition on some of the books are extant.

For philological purposes, Symmachus is just as useful as the other Greek translators. Biblical criticism may also derive some advantage from the translation, of course, by exhibiting the greatest care. Thus Psa. xxx, 13, Symmachus reads as our text, כבודי, and so also the Chaldee, Jerome, Syriac, and Theodotion, against the כבודי of the Sept., Vulg., and Arab.; in lxvi, 13, our text has לריויה, but Symmachus, the Sept., Syr., and Chald. seem to have read לריויה.

The fragments of Symmachus's version of the Old Test. are given by Flam. Nobilis in *Vet. Test. sec. LXX Lat. Reddūtum*, etc. (Rome, 1587); Drusius, *Vetorum Interpretum Græcorum in Totum V. T. Fragmenta Collecta*, etc. (Arlenheim, 1622); Bos, *V. T. ex Version. LXX Interp. etc., nec non Fragmentis Versionum Aquile, Symmachi et Theodotionis* (Fraenke, 1709); Montfaucon, *Hexaplorum Origenis quæ Supersunt*, etc. (Paris, 1713); in a later edition with notes by K. Bahrdt, Leips. and Lübeck, 1769-70). The fragments on single books were edited by Trendelenburg, *Chrestomathia Hexaplaris* (Lübeck and Leips. 1794); Spohn, *Jeremias Vates e Versione Judæorum*, etc. (Lips. 1794, 1824); Segaar, *Daniel sec. LXX et Tetraplis Origenis*, etc. (Trier, 1775); Scharfenberg, *Animadversiones quibus Fragmenta Versionum V. T. Emendantur* (Lips. 1776-81), spec. i et ii; Schleusner, *Opuscula Critica ad Versiones Græcas V. T.* (ibid. 1812).

See GREEK VERSIONS. (B. P.)

**Symmachus, QUINTUS AURELIUS**, a præfect, pontiff, and augur of Rome in its declining age, remarkable for his eloquent appeal against the ruin threatened by the triumph of Christianity; he is the author of *Epistles* still extant. His zeal for the ancient faith of Rome exercised throughout life a marked influence upon his character. He was chosen by the senate to remonstrate with Gratian on the removal of the altar of victory (A.D. 382), from their council-hall, and for curtailing the annual allowance to the Vestal Virgins. The emperor banished him from Rome, but in 384, having been appointed præfect of the city, he urged in an epistle to Valentinianus the restoration of pagan deities. In this he was unsuccessful, but without personal loss, being appointed consul under Theodosius in 391.

**Symmes, William, D.D.**, a Unitarian clergyman, was born at Charlestown, Mass., in 1731, and graduated from Harvard College in 1750, where he was a tutor from 1755 to 1758. He began to preach in the North Parish in Andover, and was ordained its pastor Nov. 1, 1758, and continued in that relation until his death, May, 1807. Dr. Symmes was a good scholar, of extensive reading, and an able divine. He published, *Thanksgiving Sermon* (1768):—*Discourse on the Duty and Advantages of Singing Praises to God* (1779):—*Sermon at the General Election* (1785). See Sprague, *Annals of the Amer. Pulpit*, viii, 35.

**Symmes, Zachariah**, a Congregational preacher, was born at Canterbury, England, April 5, 1599. He was educated at Cambridge, and after leaving the university was employed as tutor in several distinguished families. In 1621 he was appointed lecturer at Atholines, in London, and in September, 1625, he became rector of Dunstable. Embarrassed by his Nonconformity, he emigrated to New England, where he arrived in

August, 1634. He was admitted to the fellowship of the Church in Charlestown, Mass., Dec. 6, and on the 22d of the same month was elected and ordained teacher of the same Church, Rev. Thomas James being pastor. About a year afterwards he succeeded to the office of pastor, which he filled until his death, Feb. 4, 1671. See Sprague, *Annals of the Amer. Pulpit*, i, 47.

**Sympathy** (συμπάθεια, fellow-feeling) is the quality of being affected by another's affection. It was originally used, like pity and compassion, to signify our fellow-feeling with the sorrows of others, but now it is used to denote our fellow-feeling with any passion whatever. Sympathy with sorrow or suffering is compassion, with joy or prosperity is congratulation.

**Symphony** (συμφωνία) originally signified the union of several voices in a chant, but by modern musicians it is applied to an instrumental composition, generally used as a kind of introductory movement to anthems and other pieces. Symphonies are introduced with good effect in the interval of the voices, and are called *preludes* when played before the psalmody, *interludes* when they mark the distinction of verses, and *post-ludes* when introduced at the close of the psalm.

**Symphorianus**, a Gallic martyr at Autun in the reign of Aurelian. He was cited before the præfect Heraclius because he had refused to honor the statue of Berecynthia, and rejected the influence of appeals and scourgings. His mother supported him with her exhortations to fidelity. He was beheaded without the town walls and buried in a cell in the fields. His grave became so remarkable for cures and miracles that it compelled the reverence even of the heathen. The narrative in the *Acta Beati Symph.*, as here outlined, seems to involve something of fact. The worship of Berecynthia among the Ædii is a historical fact. Gregory of Tours mentions Symphorianus and the miracles wrought by his relics (*De Gloria Mart.* c. 52). Later tradition says that a church was, in time, built over his grave. The story cannot, however, date further back than the days of Gregory, as is evident from the chosen and even pompous language and the legendary conclusion. The death of Symphorianus is variously fixed in A.D. 180 (the reign of Aurelius), 270, or 280 (Aurelian). He is commemorated on Aug. 22. See the *Acta SS.* s. v.—Herzog, *Real-Encyklop.* s. v.

**Symphorosa**, the Christian widow of a martyred tribune. Hadrian had built a temple at Tibur (Tivoli), and was about to dedicate it with religious ceremonies when he learned that Symphorosa was a zealous Christian. He caused her, with her seven sons, to be summoned, and sought by persuasion to induce her to offer sacrifices. On her refusal, the emperor threatened her, and had her carried to the Temple of Hercules at Tivoli, where she was beaten with fists, hung up by the hair, and afterwards taken down and drowned. Her brother Eugene, a councillor of Tivoli, recovered the body and buried it in the suburbs. On the following day her sons were brought before the same temple and impaled in various modes, after which their bodies were thrown into a deep pit, which subsequently became known as the pit *ad septem biothancatos*. The persecution then rested for a year and a half, during which period the remains of the martyrs were interred on the Via Tiburtina and honored as they deserved. The natalities of Symphorosa and her sons are observed on July 18 (see Ruinart, *Acta Primorum Martyrum*, p. 18). The legend exists in manuscript form among the writings falsely ascribed to Julius Africanus, and may have originated in the third century, though the contents do not harmonize well with the known ordinary conduct of Hadrian. Ruinart supposes the probable period of the occurrence to have been A.D. 120. See also the *Acta SS.* sub July 18.—Herzog, *Real-Encyklop.* s. v.

**Symposia** (συνέσια, banquets) is a word occasionally used by ecclesiastical writers to describe the ancient agapæ (q. v.). These *symposia* were held at the

graves of the martyrs; and the festival was designed to be, not only a memorial of the deceased, but, according to Origen, "an odor of a sweet smell in the sight of God;" for the poor and needy, the widows and orphans, met together, and were refreshed by the charity of the rich.

**Sympson**, CUTHBERT, a layman and a deacon of the Congregational Church at Islington, of which Ruft (or Rough) was pastor. He was arrested Dec. 13, 1557, and tortured, being racked three times to make him divulge the members of the Protestant Church of which he was deacon. He was eventually burned at Smithfield, March 28, 1558. See Punchard, *Hist. of Congregationalism*, ii, 326, 347.

**Synagogue** (συναγωγή; other equivalent terms are προσευχή or προσευκτήριον, i.e. *chapel*; Heb. מִדְּבָר, or assembly of God; Aramaic כְּנֶשֶׁתָּא, the Jewish place of worship in post-Biblical and modern times. However obscure the origin of these establishments, they eventually became so important and characteristic as to furnish a designation of the Jewish Church itself in later literature.

It may be well to note at the outset the points of contact between the history and ritual of the synagogues of the Jews, and the facts to which the inquiries of the Biblical student are principally directed. 1. They meet us as the great characteristic institution of the later phase of Judaism. More even than the Temple and its services, in the time of which the New Testament, they at once represented and determined the religious life of the people. 2. We cannot separate them from the most intimate connection with our Lord's life and ministry. In them he worshipped in his youth and in his manhood. Whatever we can learn of the ritual which then prevailed tells us of a worship which he recognised and sanctioned; which for that reason, if for no other, though, like the statelier services of the Temple, it was destined to pass away, is worthy of our respect and honor. They were the scenes, too, of no small portion of his work. In them were wrought some of his mightiest works of healing (Matt. xii, 9; Mark i, 23; Luke xiii, 11). In them were spoken some of the most glorious of his recorded words (iv, 16; John vi, 59); many more, beyond all reckoning, which are not recorded (Matt. iv, 23; xiii, 54; John xviii, 20, etc.). 3. There are the questions, leading us back to a remoter past, In what did the worship of the synagogue originate? What type was it intended to reproduce? What customs, alike in nature, if not in name, served as the starting-point for it? 4. The synagogue, with all that belonged to it, was connected with the future as well as with the past. It was the order with which the first Christian believers were most familiar, from which they were most likely to take the outlines, or even the details, of the worship, organization, and government of their own society. Widely divergent as the two words and the things they represented afterwards became, the ecclesia had its starting-point in the synagogue.

I. *Name and its Signification.*—The word συναγωγή, which literally signifies a *gathering*, is not unknown in classical Greek (Thucyd. ii, 18; Plato, *Republ.* 526 D), but became prominent in that of the Hellenists. It appears in the Sept. as the translation of not less than twenty-one Hebrew words in which the idea of a gathering is implied (Tromm, *Concordant* s. v.). But, although the word is there used to denote *any kind of gathering, heap, mass, or assemblage*, such as a *gathering of fruits* (for the Heb. אֶסְפָּה, Exod. xxiii, 16; xxxiv, 22), of *water* (מִקְוֵה, Gen. i, 9; Lev. xi, 36), a *heap of stones* (גִּל, Job viii, 17), a *band of singers* (מִזְוֹר, Jer. xxxi, 4, 13), a *mass or multitude of people or soldiers* (אֶסְפָּה, דָּוִד, Isa. xxiv, 22; Ezek. xxxvii, 10), a *tribe or family* (בֵּית, 1 Kings xii, 21), etc., yet its predominant usage in this version is to denote an

*appointed meeting of people either for civil or religious purposes*, thus being synonymous with ἐκκλησία. This is evident from the fact that the Sept. uses συναγωγή 180 times for the Hebrew קָהָל, and twenty-five times for קָהָל, which in seventy instances is rendered in the same version by ἐκκλησία. The synonymous usage in the Sept. of these two expressions is also seen in Prov. v, 14, where ἐκκλησία and συναγωγή stand in juxtaposition for the Hebrew קָהָל and קָהָל. In the books of the Apocrypha, the word, as in those of the Old Testament, retains its general meaning, and is not used specifically for any recognised place of worship. For this the received phrase seems to be τόπος προσευχῆς (1 Macc. iii, 46; 3 Macc. vii, 20). In the New Testament, however, we find συναγωγή, like ἐκκλησία, used metonymically, more especially for an appointed and recognised Jewish place of worship (Matt. iv, 23; vi, 2, 5; ix, 35, etc.). Sometimes the word is applied to the tribunal which was connected with or sat in the synagogue in the narrower sense (Matt. x, 17; xxiii, 34; Mark xiii, 9; Luke xxi, 12; xii, 11). Within the limits of the Jewish Church it perhaps kept its ground as denoting the place of meeting of the Christian brethren (James ii, 2). It seems to have been claimed by some of the pseudo-Judaizing, half-Gnostic sects of the Asiatic churches for their meetings (Rev. ii, 9). It was not altogether obsolete, as applied to Christian meetings, in the time of Ignatius (*Ep. ad Trall.* c. v; *ad Polyc.* c. iii). Even in Clement of Alexandria the two words appear united as they had done in the Sept. (ἐπὶ τὴν συναγωγὴν ἐκκλησιας, *Strom.* vi, 633). Afterwards, when the chasm between Judaism and Christianity became wider, Christian writers were fond of dwelling on the meanings of the two words which practically represented them, and showing how far the synagogue was excelled by the ecclesia (August. *Enarr. in Psal. lxxx*; Trench, *Synonyms of N. T.* § 1). The cognate word, συναξις, was formed or adopted in its place, and applied to the highest act of worship and communion for which Christians met (Suicer, *Thesaur.* s. v.).

More definite than the Greek term synagogue is the ancient Hebrew name, *beth tephillah* (בֵּית תְּפִלָּה), τόπος προσευχῆς, or simply προσευχή = *house of prayer* (Acts xvi, 13, for which the Syriac rightly has בֵּית צְלוּתָא; Josephus, *Life*, 54), which is now obsolete, or *beth hak-kene'seth* (בֵּית הַכְּנֶסֶת) = *house of assembly*, which has superseded it. This definite local signification of the term synagogue among the Jews has necessitated the use of another expression for the members constituting the assembly, which is כְּנִישָׁתָא or צְבוּר, to express our secondary sense of the word ἐκκλησία.

II. *History of the Origin and Development of the Synagogue.*—1. According to tradition, the patriarchs Abraham, Isaac, and Jacob instituted the prayers three times a day (*Berakoth*, 26 b), and had places of worship (comp. the Chaldee paraphrases of Onkelos, Jonathan ben-Uzziel, and the Jerusalem Targum on Gen. xxiv, 62, 63; xxv, 27). We are informed that there were synagogues in the time of the pious king Hezekiah (*Sanhedrin*, 94 b); that the great house (בֵּית גְּדוֹל) was a stupendous synagogue; that the many houses of Jerusalem (בְּתֵי יְרוּשָׁלַיִם) which Nebuchadnezzar burned (2 Kings xxv, 9) were the celebrated 480 synagogues that existed in Jerusalem (Jerusalem *Megillah*, iii, 1), and that in Babylon the synagogue was to be seen in which Daniel used to pray (*Eruvin*, 21 a). We have the testimony of Benjamin of Tudela, the celebrated traveller of the Middle Ages, that he himself saw the synagogues built by Moses, David, Obadiah, Nahum, and Ezra (*Itinerary*, i, 90, 91, 92, 106, 153, ed. Ascher [London, 1840]). It is in harmony with this tradition that James declares "Moses of old time hath

in every city them that preach him, being read in the synagogues every Sabbath day" (Acts xv, 21; comp. Philo, ii, 167, 630; Josephus, *Apion*, ii, 18; *Baba Kama*, 82 a; Jerusalem *Megillah*, iv, 1). But these are simply traditions, which love to invest everything with the halo of the remotest antiquity.

2. In the Old Test. itself we find no trace of meetings for worship in synagogues. On the one hand, it is probable that if new moons and Sabbaths were observed at all, they must have been attended by some celebration apart from, as well as at, the tabernacle or the Temple (1 Sam. xx, 5; 2 Kings iv, 23). On the other, so far as we find traces of such local worship, it seems to have fallen too readily into a fetish religion, sacrifices to ephods and teraphim (Judg. viii, 27; xvii, 5) in groves and on high-places, offering nothing but a contrast to the "reasonable service," the prayers, psalms, instruction in the law, of the later synagogue. The special mission of the priests and Levites under Jehoshaphat (2 Chron. xvii, 7-9) shows that there was no regular provision for reading the "book of the law of the Lord" to the people, and makes it probable that even the rule which prescribed that it should be read once every seven years at the Feast of Tabernacles had fallen into disuse (Deut. xxxi, 10). With the rise of the prophetic order we trace a more distinct though still a partial approximation. Wherever there was a company of such prophets, there must have been a life analogous in many of its features to that of the later Essenes and Therapeutae, to that of the *cenobia* and monasteries of Christendom. In the abnormal state of the polity of Israel under Samuel, they appear to have aimed at purifying the worship of the high-places from idolatrous associations, and met on fixed days for sacrifice and psalmody (1 Sam. ix, 12; x, 5). The scene in 1 Sam. xix, 20-24 indicates that the meetings were open to any worshippers who might choose to come, as well as to "the sons of the prophet," the brothers of the order themselves. The only pre-exilic instance which seems to indicate that the devout in Israel were in the habit of resorting to pious leaders for blessings and instruction on stated occasions is to be found in 2 Kings iv, 23, where the Shunammite's husband asks, "Wherefore wilt thou go to him [Elisha] to-day? It is neither new moon nor Sabbath." Yet 2 Kings xxii, 8, etc.; 2 Chron. xxxiv, 14, etc., testify undoubtedly against the existence of places of worship under the monarchy. The date of Psa. lxxiv is too uncertain for us to draw any inference as to the nature of the "synagogues of God" (בְּיָדֵי אֱלֹהִים, meeting-places of God), which the invaders are represented as destroying (ver. 8). It may have belonged to the time of the Assyrian or Chaldean invasion (Vitringa, *De Synag.* p. 396-405). It has been referred to that of the Maccabees (De Wette, *Psalmen*, ad loc.), or to an intermediate period when Jerusalem was taken and the land laid waste by the army of Bagoses, under Artaxerxes II (Ewald, *Poet. Büch.* ii, 358). The "assembly of the elders," in Psa. cvii, 32, leaves us in like uncertainty.

3. During the Exile, in the abeyance of the Temple worship, the meetings of devout Jews probably became more systematic (Vitringa, *De Synag.* p. 413-429; Jost, *Judenthum*, i, 168; Bornitius, *De Synagog.* in Ugolino, *Thesaur.* xxi), and must have helped forward the change which appears so conspicuously at the time of the Return. The repeated mention of gatherings of the elders of Israel, sitting before the prophet Ezekiel and hearing his word (Ezek. viii, 1; xiv, 1; xx, 1; xxxiii, 31), implies the transfer to the land of the Captivity of the custom that had originated in the schools of the prophets. One remarkable passage may possibly contain a more distinct reference to them. Those who still remained in Jerusalem taunted the prophet and his companions with their exile, as outcasts from the blessings of the sanctuary. "Get ye far from the Lord; unto us is this land given in a possession." The proph-

et's answer is that it was not so. Jehovah was as truly with them in their "little sanctuary" as he had been in the Temple at Jerusalem. His presence, not the outward glory, was itself the sanctuary (xi, 15, 16). The whole history of Ezra presupposes the habit of solemn, probably of periodic, meetings (Ezra viii, 15; Neh. viii, 2; ix, 1; Zech. vii, 5). To that period, accordingly, we may attribute the revival, if not the institution, of synagogues, or at least of the systematic meetings on fasts for devotion and instruction (Zech. viii, 19). Religious meetings were also held on Sabbaths and fasts to instruct the exiles in the divine law, and to admonish them to obey the divine precepts (Ezra x, 1-9; Neh. viii, 1, 3; ix, 1-3; xiii, 1-3). These meetings, held near the Temple and in other localities, were the origin of the synagogue, and the place in which the people assembled was denominated בֵּית הַכְּנֶסֶת, the house of assembly; hence, also, the synagogue in the Temple itself. The elders of this synagogue handed the law to the high-priest (Mishna, *Yoma*, vii, 1; *Sotah*, vii, 7, 8), aided in the sacrifices (*Tamid*, v, 5), took charge of the palms used at the Feast of Tabernacles (*Sukkah*, iv, 4), accompanied the pilgrims who brought their first-fruits (*Tosiphta Bikkurim*, ii), officiated as judges (*Makkoth*, iii, 12), and superintended the infant-schools (*Sabbath*, i, 3). Assuming Ewald's theory as to the date and occasion of Psa. lxxiv, there must, at some subsequent period, have been a great destruction of the buildings, and a consequent suspension of the services. It is, at any rate, striking that they are not in any way prominent in the Maccabean history, either as objects of attack or rallying-points of defence, unless we are to see in the gathering of the persecuted Jews at Maspha (Mizpah), as at a "place where they prayed aforetime in Israel" (1 Macc. iii, 46), not only a reminiscence of its old glory as a holy place, but the continuance of a more recent custom. When that struggle was over, there appears to have been a freer development of what may be called the synagogue parochial system among the Jews of Palestine and other countries. The influence of John Hyrcanus, the growing power of the Pharisees, the authority of the Scribes, the example, probably, of the Jews of the "dispersion" (Vitringa, *De Synag.* p. 426), would all tend in the same direction. Well-nigh every town or village had its one or more synagogues. Where the Jews were not in sufficient numbers to be able to erect and fill a building, there was the *προσευχή*, or place of prayer, sometimes open, sometimes covered in, commonly by a running stream or on the sea-shore, in which devout Jews and proselytes met to worship, and, perhaps, to read (Acts xvi, 13; Josephus, *Ant.* xiv, 10, 23; Juvenal, *Sat.* iii, 296). Sometimes the term *προσευχή* (= בֵּית תַּפְלִיחָה) was applied even to an actual synagogue (Josephus, *Life*, § 54). Eventually we find the Jews possessing synagogues in the different cities of Syria, Asia Minor, Greece, Egypt, and wherever they resided. We hear of the apostles frequenting the synagogues in Damascus, Antioch, Iconium, Thessalonica, Berea, Athens, Corinth, Ephesus, etc. (Acts ix, 2, 20; xiii, 14; xiv, 1; xvii, 1, 10, 17; xviii, 4, 19; xix, 8). There were numerous synagogues in Palestine: in Nazareth (Matt. xiii, 54; Mark vi, 2; Luke iv, 16), Capernaum (Matt. xii, 9; Mark i, 21; Luke vii, 5; John vi, 59), etc.; and in Jerusalem alone there were 480 (Jerusalem *Megillah*, iii, 1; Jerusalem *Kethuboth*, xiii) to accommodate the Jews from foreign lands who visited the Temple. There were synagogues of the Libertines, Cyrenians, Alexandrians, Cilicians, and of the Asiatics (Acts vi, 9; comp. *Tosiphta Megillah*, ii; Babylon *Megillah*, 26 a). When it is remembered that more than 2,500,000 Jews came together to the metropolis from all countries to celebrate the Passover (Josephus, *Ant.* vi, 9, 3; *Pesachim*, 64 a), this number of synagogues in Jerusalem will not appear at all exaggerated. An idea may be formed of the large number of Jews at the time of

Christ, when it is borne in mind that in Egypt alone, from the Mediterranean to the border of Ethiopia, there resided nearly a million of Jews (Philo, *Against Flaccus*, ii, 523); and that in Syria, especially in the metropolis, Antioch, the Jews constituted a large portion of the population (Grätz [2d ed.], iii, 282).

III. *Site, Structure, Internal Arrangement, Use, and Sanctity of the Synagogue*.—1. Taking the Temple as the prototype, and following the traditional explanation of the passages in Prov. i, 21 and Ezra ix, 9, which are taken to mean that the voice of prayer is to be raised on heights (בראש תפלה), and that the sanctuary was therefore erected on a summit (לרומם את), the Jewish canons decreed that synagogues are to be built upon the most elevated ground

Probable Representation of an Ancient Synagogue. (From a stone in the ruined synagogue at Tell Hâm.)

in the neighborhood, and that no house is to be allowed to overtop them (*Tosiphta Megillah*, iii; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*, xi, 2). So essential was this law deemed, and so strictly was it observed in Persia, even after the destruction of the Temple, that Rab (A.D. 165–247) prophesied a speedy ruin of those cities in which houses were permitted to tower above the synagogue, while rabbi Ashi de-

clared that the protection of Sora was owing to the elevated site of its synagogues (*Sabbath*, 11 a). Lieut. Kitchener, however, states (*Quar. Statement of the "Pal. Explor. Fund."*, July, 1878, p. 123 sq.) that the ruins of the fourteen specimens of ancient synagogues extant in Palestine (all in Galilee) do not correspond to these Talmudical requirements as to location, nor yet to those below as to position; for they are frequently in rather a low site, and face the south if possible. Failing of a commanding site, a tall pole rose from the roof to render it conspicuous (Leyrer, in Herzog's *Real-Encyklop.* s. v.).

The riverside outside the city was also deemed a suitable spot for building the synagogue, because, being removed from the noise of the city, the people could worship God without distraction, and, at the same time, have the use of pure water for immersions and other religious exercises (Acts xvi, 13; Josephus, *Ant.* xiv, 10, 23; Juvenal, *Sat.* iii, 12, etc.; see also the Chaldee versions on Gen. xxiv, 62). See PROSEUCHA.

The building was commonly erected at the cost of the district, whether by a church-rate levied for the purpose, or by free gifts, must remain uncertain (Vitrin-ga, *De Synagog.* p. 229). Sometimes it was built by a rich Jew, or even, as in Luke vii, 5, by a friendly proselyte. In the later stages of Eastern Judaism it was

often erected, like the mosques of Mohammedans, near the tombs of famous rabbins or holy men.

2. The size of a synagogue, like that of a church or chapel, varied with the population. We have no reason for believing that there were any fixed laws of proportion for its dimensions, like those which are traced in the tabernacle and the Temple.

The building itself was generally in the form of a theatre; the door was usually on the west, so that, on entering, the worshippers might at once face the front, which was turned towards Jerusalem, since the law is that "all the worshippers in Israel are to have their faces turned to that part of the world where Jerusalem, the Temple, and the Holy of Holies are" (*Berakoth*, 30 a). This law, which is deduced from 1 Kings viii, 29; Psa. xxviii, 2, and the allegorical interpretation of Song of Songs iv, 4, also obtained among the early Christians (Origen, *Hom. v. in Num.* in *Opp.* ii, 284) and the Mohammedans (Koran, c. ii). See KEBLAH. Hence all the windows are said to have been generally in the eastern wall, so that the worshippers might look towards the holy city, in accordance with Dan. vi, 10.

Like the Temple, the synagogue was frequently without a roof, as may be seen from the following remark of Epiphanius: "There were anciently places of prayer without the city, both among the Jews and the Samaritans; . . . there was a place of prayer at Sichem, now called Neapolis, without the city in the fields, in the form of a theatre, open to the air, and without covering, built by the Samaritans, who in all things imitated the Jews" (*Contr. Hæres.* lib. iii, hæc. 80). It was this, coupled with the fact that the Jews had no images, which gave rise to the satirical remark of Juvenal—

"Nil præter nubes et cæli numen adorant."  
(*Sat.* xiv, 98.)

In some places there were temporary *summer* and *winter* synagogues; they were pulled down and re-erected at the beginning of each season, so that the style of building might be according to the period of the year (*Baba Bathra*, 3 b).

3. In the internal arrangement of the synagogue we trace an obvious analogy, *mutatis mutandis*, to the type of the tabernacle. At the wall opposite the entrance, or at the Jerusalem end, stood the wooden chest or ark (אֲרוֹן) containing the scrolls of the law. It stood on a raised base with several steps (סִפְסֵף = *subsellium*, מִזְבֵּחַ, Jerusalem *Megillah*, iii, 1), which the priests mounted when they pronounced the benediction (Numb. vi, 24–26) upon the congregation. Hence the phrase לְדוֹרֵךְ, which was retained after the destruction of the Temple to describe the act of giving the benediction to the people by the priests (*Rosh Ha-Shanah*, 31 b; *Sabbath*, 118 b). It is necessary to bear in mind that the ancient name for this ark is אֲרוֹן (comp. Mishna, *Berakoth*, v, 3, 4; *Taanith*, ii, 1, 2; *Megillah*, iv, 4, etc.), the name afterwards given to it (אֲרוֹן) being reserved for the ark-of-the-covenant table, which was wanting in the second Temple. There was a canopy (בִּרְמָה) spread over the ark, under which were kept the vestments used during the service (Jerusalem *Megillah*, iii). In some places the ark or chest had two compartments, the upper one containing the scrolls of the law, and the lower the synagogical garments of the officers of the community. The ark was not fastened to the wall, but was free, so that it might easily be taken outside the door of the synagogue in case a death occurred in the place of worship, in order that the priests should be able to attend the service; or be removed into the streets when fasts and days of humiliation were kept (Mishna, *Taanith*, ii, 1). See FAST. In later times, however, a recess was made in the wall, and the ark was kept there. This recess was called the *Sanctuary* (קֹדֶשׁ, קִדְשֵׁי הַקֹּדֶשׁ). The same thought was sometimes

Plan of Ruined Synagogue at Tell Hâm.

Jewish Synagogue in Amsterdam.

developed still further in the name of *Kophéreth*, or Mercy-seat, given to the lid or door of the chest, and in the veil which hung before it (Vitringa, p. 181). On certain occasions the ark was removed from the recess and placed on the rostrum (בִּימָה = *βῆμα*) in the middle of the synagogue (*Tosiphta Megillah*, iii; Maimonides, *Iad Ha-Chezaka Húchoth Lulab*, vii, 23). See TABERNACLES, FEAST OF. Within the ark, as above stated, were the rolls of the sacred books. The rollers round which they were wound were often elaborately decorated, the cases for them embroidered or enamelled, according to their material. Such cases were customary offerings from the rich when they brought their infant children on the first anniversary of their birthday to be blessed by the rabbi of the synagogue.

In front of the ark was the desk of the leader of the divine worship; and as the place of the ark was amphitheatrical, the desk was sometimes lower and sometimes higher than the level of the room. Hence the interchangeable phrases "*he who descends before the ark*" (הַיּוֹרֵד לְפָנֵי הַחִיבָה) and "*he who ascends before the ark*" (הַצּוֹבֵר לְפָנֵי הַחִיבָה) used to designate the leader of divine worship in the synagogue (Mishna, *Taanith*, ii, 2; *Berakoth*, v, 4; *Rosh Ha-Shanah*, iv, 7; *Megillah*, iv, 3, 5, 7, etc.).

The next important piece of furniture was the rostrum or platform (בִּימָה, בִּימָה = *βῆμα*, בִּימָה = *βῆμα*), capable of containing several persons (Neh. viii, 4; ix, 4; Josephus, *Ant.* iv, 8, 12). On this platform the lessons from the law and the prophets were read, discourses delivered, etc. (Mishna, *Sotah*, viii, 8; Babylon *Sukkah*, 51 b; *Megillah*, 26 b). See HAPHTARAH. There were no arrangements made at first for laying down the law while reading, and the one upon whom it devolved to read a portion of the pericope had to hold the roll in his hand till the second one came up to read, and relieved him of it. Afterwards, however, there was a reading-desk (אֲנָלוֹגִיֹן = *ἀναλογιστήριον*) on this platform, and the roll of the law was laid down during pauses, or when the *methurgeman* (מְדוֹרְגֵמָן = *interpreter*) was reciting in the vernacular of the country the portion

read (*Yoma*, 68 b; *Megillah*, 26 b; Jerusalem *Megillah*, iii). The reading-desk was covered with a cloth (פֶּרֶסֶת), which varied in costliness according to the circumstances of the congregation (*Megillah*, 26 b). When the edifice was large this platform was generally in the centre, as was the case in the synagogue at Alexandria (*Sukkah*, 51 b).

There were also arm-chairs (קִיבּוּצִים, קִיבּוּצִים = *καθίσματα*, or seats of honor (πρωτοκαθεδρία), for the elders of the synagogue, the doctors of the law, etc. (Matt. xxiii, 2, 6; Mark xii, 39; Luke xi, 43; *Sukkah*, 51 b; Maimonides, *Hilchoth Tephila*, x, 4), to which the wealthy and honored worshipper

was invited (James ii, 2, 3). They were placed in front of the ark containing the law, or at the Jerusalem end, in the uppermost part of the synagogue, and these distinguished persons sat with their faces to the people, while the congregation stood facing both these honorable ones and the ark (*Tosiphta Megillah*, iii). In the synagogue at Alexandria there were seventy-one golden chairs, according to the number of the members of the Great Sanhedrim (*Sukkah*, 51 b). See SANHEDRIM. In the synagogue of Bagdad "the ascent to the holy ark was composed of ten marble steps, on the uppermost of which were the stalls set apart for the prince of the Captivity and the other princes of the house of David" (Benjamin of Tudela, *Itinerary*, i, 105, ed. Ascher, Lond. 1840).

There was, moreover, a perpetual light (נֵר תָּמִיד), which was evidently in imitation of the Temple light (Exod. xxviii, 20). This sacred light was religiously fed by the people, and in case of any special mercy vouchsafed to an individual, or of threatening danger, a certain quantity of oil was vowed for the perpetual lamp. This light was the symbol of the human soul (Prov. xx, 27), of the divine law (vi, 23), and of the manifestation of God (Ezek. xliii, 2). It must, however, be remarked that though the perpetual lamp forms an essential part of the synagogical furniture to the present day, and has obtained among the Indians, Greeks, Romans, and other nations of antiquity (Rosenmüller, *Morgenland*, ii, 156), yet there is no mention made of it in the Talmud. Other lamps, brought by devout worshippers, were lighted at the beginning of the Sabbath, i. e. on Friday evening (Vitringa, p. 198).

As part of the fittings, we have also to note (1) another chest for the *Haphtaroth*, or rolls of the prophets; (2) Alms-boxes at or near the door, after the pattern of those at the Temple, one for the poor of Jerusalem, the other for local charities; (3) Notice-boards, on which were written the names of offenders who had been "put out of the synagogue;" (4) A chest for trumpets and other musical instruments, used at the New-Years, Sabbaths, and other festivals (Vitringa, Leyrer, *loc. cit.*).

The congregation was divided, men on one side, wom-

en on the other, a low partition, five or six feet high, running between them (Philo, *De Vu. Contempl.* ii, 476). The arrangements of modern synagogues, for many centuries, have made the separation more complete by placing the women in low side-galleries, screened off by lattice-work (Leo of Modena, in Picart, *Cérém. Relig.* i).

4. Besides meetings for worship, the synagogues, or, more properly, the rooms connected with them, were also used as courts of justice for the local Sanhedrim (*Targum Jonathan* on Amos v, 12, 15; Jerusalem *Sanhedrin*, i, 1; Jerusalem *Baba Metsia*, ii, 8; Babylon *Ketuboth*, 5 a; *Sabbath*, 150 a), and in it the beadle of the synagogue administered the forty stripes save one to those who were sentenced to be beaten (Mishna, *Makkoth*, iii, 12; comp. Matt. x, 17; xxiii, 34). Travelers, too, found an asylum in the synagogue; meals were eaten in it (*Pesachim*, 101; *Bereshith Rabba*, c. xlv), and children were instructed therein (*Kiddushin*, 30 a; *Baba Bathra*, 21 a; *Taanith*, 24 b; *Berakoth*, 17 a; *Yebamoth*, 65 b). This, however, did not detract from its sanctity; for the synagogue once used for the divine worship was only allowed to be sold on certain conditions (Mishna, *Megillah*, iii, i, 2). When the building was finished, it was set apart, as the Temple had been, by a special prayer of dedication. From that time it had a consecrated character. The common acts of life, such as reckoning up accounts, were forbidden in it. No one was to pass through it as a short cut. Even if it ceased to be used, the building was not to be applied to any base purpose—might not be turned, e. g., into a bath, a laundry, or a tannery. A scraper stood outside the door that men might rid themselves, before they entered, of anything that would be defiling (Leyrer, *loc. cit.*, and Vitranga).

IV. *The Officers and Government of the Synagogue.*—The synagogues of the respective towns were governed by the elders (זקנים, *πρεσβύτεροι*, Luke vii, 8), who constituted the local Sanhedrim, consisting either of the twenty-three senators or the three senators assisted by four principal members of the congregation (*Megillah*, 27; Josephus, *Ant.* iv, 8, 14; *War*, ii, 20, 5; Acts vii, 5; xxi, 8), as this depended upon the size and population of the place. See SANHEDRIM. Hence these authorized administrators of the law were alternately denominated *shepherds* (פִּרְנָסִים = ποιμένες, Jerusalem *Peah*, viii; Babylon *Chagigah*, 60; *Sabbath*, 17 a; Acts xx, 28; Eph. iv, 11), the rulers of the synagogue, and the chiefs (הַכֹּהֲנִים = ἀρχισυνάγωγοι, ἀρχοντες, Matt. ix, 18, 23; Mark v, 22; Luke viii, 41; Acts xiii, 15) and overseers (מְבַרְכִּים = ποσειδῶτες, Mishna, *Tamid*, v, 1).

The president of the Sanhedrim was *ex officio* the head or chief of the synagogue, and was therefore, *καρ' ἐξοχῆν*, the ruler of the synagogue (Mishna, *Yoma*, vii, 1; *Sotah*, vii, 7), while the other members of this body, according to their various gifts, discharged the different functions in the synagogue (1 Tim. v, 17), as will be seen from the following classification. See HIGH-PRIEST.

1. *The Ruler of the Synagogue* (הַכֹּהֵן = ἀρχισυνάγωγος) and his two Associates.—Though the supreme official, like the two other members of the local court, had to be duly examined by delegates from the Great Sanhedrim, who certified that he possessed all the necessary qualifications for his office (Maimonides, *Iad Ha-Chezaka Hülchoth Sanhedrin*, ii, 8), yet his election entirely depended upon the suffrages of the members of the synagogue. The Talmud distinctly declares that "no ruler (פִּרְנָס = ποιμήν) is appointed over a congregation unless the congregation is consulted" (*Berakoth*, 55 a). But, once elected, the ruler was the third in order of precedence in the Temple synagogue—i. e. first came the high-priest, then the chief of the priests (סֹדֵק), and then the ruler of the synagogue (Mishna, *Yoma*, vii, 1; *Sotah*, vii, 7), while in the provincial synagogues the respective rulers were supreme,

and had the principal voice in the decision and distribution of the other offices. His two judicial colleagues aided him in the administration of the law. See ARCHI-SYNAGOGUES.

2. *The Three Almoners* (שְׁלִישֵׁי צַדִּיקָה = διακόννοι; Phil. i, 1; 1 Tim. iii, 8, 12; iv, 6).—The office of almoner was both very responsible and difficult, as the poor-taxes were of a double nature; and in periodically collecting and distributing the alms the almoner had to exercise great discretion from whom to demand them and to whom to give them. There were, first, the alms of the dish (תְּרומת), consisting of articles of food which had to be collected by the officials daily, and distributed every evening, and to which every one had to contribute who resided thirty days in one place; and there were, secondly, the alms of the box (קופֶּה), consisting of money which was collected every Friday, was distributed weekly, and to which every one had to contribute who resided ninety days in one place. Two authorized persons had to collect the former and three the latter. They were obliged to keep together, and were not allowed to put into their pockets any money thus received, but were to throw it into the poor-box. The almoners had the power of exempting from these poor-rates such people as they believed to be unable to pay, and to enforce the tax on such as pretended not to be in a position to contribute. They had also the power to refuse alms to any whom they deemed unworthy of them. All the three almoners had to be present at the distribution of the alms. The greatest care was taken by the rulers of the synagogue and the congregation that those elected to this office should be "men of honesty, wisdom, justice, and have the confidence of the people" (*Baba Bathra*, 8; *Aboda Sara*, 18; *Taanith*, 24; Maimonides, *Iad Ha-Chezaka Hülchoth Mathenath Anyim*, ix). Brothers were ineligible to this office; the almoners (פִּרְנָסִין נכארי צדקה) were not allowed to be near relations, and had to be elected by the unanimous voice of the people (Jerusalem *Peah*, viii).

3. *The Legate of the Congregation, or the Leader of Divine Worship* (שְׁלִישֵׁי צַדִּיקָה = ἀγγελος ἐκκλησίας, ἀπόστολος).—To give unity and harmony to the worship, as well as to enable the congregation to take part in the responses, it was absolutely necessary to have one who should lead the worship. Hence, as soon as the legal number required for public worship had assembled (מִנְיָן), the ruler of the synagogue (פִּרְנָס = ποιμήν), or, in his absence, the elders (זקנים = πρεσβύτεροι), delegated one of the congregation to go up before the ark to conduct divine service. The function of the apostle of the ecclesia (שְׁלִישֵׁי צַדִּיקָה) was not permanently vested in any single individual ordained for this purpose, but was alternately conferred upon any lay member who was supposed to possess the qualifications necessary for offering up prayer in the name of the congregation. This is evident from the reiterated declarations both in the Mishna and the Talmud. Thus we are told that any one who is not under thirteen years of age, and whose garments are not in rags, may officiate before the ark (Mishna, *Megillah*, iv, 6); that "if one is before the ark [= ministers for the congregation], and makes a mistake [in the prayer], another one is to minister in his stead, and he is not to decline it on such an occasion" (Mishna, *Berakoth*, v, 3). "The sages have transmitted that he who is asked to conduct public worship is to delay a little at first, saying that he is unworthy of it; and if he does not delay, he is like unto a dish wherein is no salt; and if he delays more than is necessary, he is like unto a dish which the salt has spoiled. How is he to do it? The first time he is asked, he is to decline; the second time, he is to stir; and the third time, he is to move his legs and ascend before the ark" (*Berakoth*, 34 b). Even on the most solemn occasions, when the whole congregation fasted

and assembled with the president and vice-president of the Sanhedrim for national humiliation and prayer, no stated minister is spoken of; but it is said that one of the aged men present is to deliver a penitential address, and another is to offer up the solemn prayers (Mishna, *Taanith*, ii, 1-4). See *FAST*. On ordinary occasions, however, the rabbins, who were the rulers of the synagogue, asked their disciples to act as officiating ministers before the ark (*Berakoth*, 34 a). But since the sages declared that "if the legate of the congregation (שליח צבור) = ἀγγελος ἐκκλησίας, ἀπόστολος) commits a mistake while officiating, it is a bad omen for the congregation who delegated him, because a man's deputy is like the man himself" (Mishna, *Berakoth*, v, 5); and, moreover, since it was felt that he who conducts public worship should both be able to sympathize with the wants of the people and possess all the moral qualifications befitting so holy a mission, it was afterwards ordained that "even if an elder (זקן = πρεσβύτερος) or sage is present in the congregation, he is not to be asked to officiate before the ark; but that man is to be delegated who is apt to officiate, who has children, whose family are free from vice, who has a proper beard, whose garments are decent, who is acceptable to the people, who has a good and amiable voice, who understands how to read the law, the prophets, and the Hagiographa, who is versed in the homiletic, legal, and traditional exegesis, and who knows all the benedictions of the service" (Mishna, *Taanith*, ii, 2; Gemara, *ibid.*, 16 a, b; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*, viii, 11, 12; comp. 1 Tim. iii, 1-7; Tit. i, 1-9). As the legate of the people, the most sacred portions of the liturgy (e. g. קריש, קריש, ברכת כהנים, כננו, which could only be offered up in the presence of the legal number, were assigned to him (*Berakoth*, 21 b, and Rashi, *ad loc.*), and he was not only the mouth-piece of those who were present in the congregation on the most solemn feasts, as on the Great Day of Atonement and New Year, but he was the surrogate of those who, by illness or otherwise, were prevented from attending the place of worship (*Rosh Ha-Shanah*, 35; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*, viii, 10).

4. *The Interpreter, or Methurgemán* (מְתוּרְגֵמָן, מְתוּרְגֵמָן).—After the Babylonian captivity, when the Hebrew language was rapidly disappearing from among the common people, it became the custom to have an interpreter at the reading-desk (בִּרְמִית) by the side of those who were alternately called up to read the several sections of the lessons from the law and the prophets. See *HAPHTARAH*. This *methurgeman* had to interpret into Chaldee or into any other vernacular of the country a verse at a time when the lesson from the law was read, as the reader was obliged to pause as soon as he finished the reading of a verse in Hebrew, and was not allowed to begin the next verse till the *methurgeman* had translated it; while in the lesson from the prophets three verses were read and interpreted at a time (Mishna, *Megillah*, iv, 4). The reader and the interpreter had to read in the same tone of voice, and the one was not allowed to be louder than the other (*Berakoth*, 45 a). The interpreter was not allowed to look at the law while interpreting, lest it should be thought that the paraphrase was written down. The office of interpreter, like that of conducting public worship, was not permanently vested in any single individual. Any one of the congregation who was capable of interpreting was asked to do so. Even a minor, i. e. one under thirteen years of age, or one whose garments were in such a ragged condition that he was disqualified for reading the lesson from the law, or a blind man, could be asked to go up to the reading-desk and explain the lesson (Mishna, *Megillah*, iv, 5; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*, xii, 10-14).

5. *The Chazzán, or Attendant on the Synagogue* (חֲזָזָן = ὑπηρέτης), was the lowest servant, and

was more like the sexton or the beadle in our churches. He had the care of the furniture, to open the doors, to clean the synagogue, to light the lamps, to get the building ready for service, to summon the people to worship, to call out (יַסְבִּיר) the names of such persons as were selected by the ruler of the synagogue to come up to the platform to read a section from the law and the prophets, to hand the law to ordinary readers, or to the ruler of the synagogue when it had to be given to the high-priest, in which case the ἀρχισυνάγωγος took the law from the *chazan*, gave it to the chief priest, who handed it to the high-priest (Mishna, *Yoma*, viii, 1; *Sotah*, vii, 7); he had to take it back after reading (Luke iv, 17-20), etc. Nothing, therefore, can be more clear than the position which this menial servant occupied in the synagogue in the time of Christ and a few centuries after. The Talmud distinctly declares that the *chazan* is the beadle or the sexton of the congregation, and not the legate or the angel of the church (חֲזָזָן הוּא שֹׁמֵר שֶׁל חֻקֵּי הָאֵלֹהִים וְאֵינוֹ שְׂרִיר צַבּוּר; comp. *Tosiphta Yoma*, 68 b; and Mishna, *Berakoth*, vii, 1, for the meaning of שֹׁמֵר). The notion that his office resembled that of "the Christian deacon," as well as the assertion that, "like the *legatus* and the *elders*, he was appointed by the imposition of hands," has evidently arisen from a confusion of the *chazan* in the days of Christ with the *chazan* five centuries after Christ. Besides, not only was this menial servant not appointed by the imposition of hands, but the *legatus* himself, as we have seen, had no laying-on of hands. It was about A.D. 520, when the knowledge of the Hebrew language disappeared from among the people at large, that alterations had to be introduced into the synagogical service which involved a change in the office of the *chazan*. As the ancient practice of asking any member to step before the ark and conduct the divine service could not be continued, it was determined that the *chazan*, who was generally also the schoolmaster of the infant school, should be the regular reader of the liturgy, which he had to recite with intonation (*Masecheth Sopherim*, x, 7; xi, 4; xiv, 9, 14; Grätz, *Gesch. der Juden*, v, 26).

6. *The Ten Ballanin, or Men of Leisure* (בְּנֵי לֵיזֵרָה).—No place was denominated a town, and hence no synagogue could legally be built in it, which had not ten independent men who could be permanently in the synagogue to constitute the legal congregation whenever required (Mishna, *Megillah*, i, 3; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*, xi, 1). These men of leisure were either independent of business because they had private means, or were stipendiaries of the congregation, if the place had not ten men who could entirely devote themselves to this purpose (Rashi, *On Megillah*, 5 a). They had to be men of piety and integrity (*Baba Bathra*, 28 a; Jerusalem *Megillah*, 1, 4). By some (Lightfoot, *Hor. Heb. in Matt. iv*, 23, and in part, Vitringa, p. 532) they have been identified with the above officials, with the addition of the alms-collectors. Rhenferd, however (Ugolino, *Thesaur.* vol. xxi), sees in them simply a body of men, permanently on duty, making up a congregation (ten being the minimum number), so that there might be no delay in beginning the service at the proper hours, and that no single worshipper might go away disappointed. The latter hypothesis is supported by the fact that there was a like body of men, the Stationarii or Viri Stationis of Jewish archaeologists, appointed to act as permanent representatives of the congregation in the services of the Temple (Jost, *Gesch. des Judenth.* i, 168-172). It is of course possible that in many cases the same persons may have united both characters, and been, e. g., at once *otiosi* and alms-collectors. In the Middle Ages these ten *Ballanin* consisted of those who discharged the public duties of the synagogue, and were identical with the rulers of the synagogue described above. Thus Benjamin of Tudela tells us that the ten presidents of the ten colleges at

Bagdad were "called the *Batlanin*, the *leisure men*, because their occupation consisted in the discharge of public business. During every day of the week they dispensed justice to all the Jewish inhabitants of the country, except on Monday, which was set aside for assemblies under the presidency of R. Samuel, master of the college denominated '*Gaon Jacob*,' who on that day dispensed justice to every applicant, and who was assisted therein by the said ten *Batlanin*, presidents of the colleges" (*Itinerary*, i, 101, ed. Ascher, Lond. 1840). This seems to favor the opinion of Herzfeld that the ten *Batlanin* are the same as the ten judges or rulers of the synagogue mentioned in *Aboth*, iii, 10, according to the reading of Bartenora (*Horayoth*, 3 b, etc.; comp. *Gesch. des Volkes Israel*, i, 392).

V. *Worship*.—1. *Its Time*.—As the Bible prescribes no special hour for worship, but simply records that the Psalmist prayed three times a day (*Psa.* lv, 18), and that Daniel followed the same example (*Dan.* vii, 11), the men of the Great Synagogue decreed that the worship of the synagogue should correspond to that of the Temple. To this end they ordained that every Israelite is to offer either public or private worship to his Creator at stated hours three times a day—(a) in the morning (*שחרית*) at the third hour=9 A.M., being the time when the daily morning sacrifice was offered; (b) in the afternoon or evening (*מנחה*) at the ninth hour and a half=3.30 P.M., when the daily evening sacrifice was offered; and (c) in the evening (*מעריב*), or from the time that the pieces and the fat of the sacrifices, whose blood was sprinkled before sunset, began to be burned till this process of burning was finished. As this process of burning, however, sometimes lasted nearly all night, the third prayer could be offered at any time between dark and dawn (*Mishna, Berakoth*, iv, 1; *Gemara, ibid.* 26 b; *Pesachim*, 58 a; *Jerusalem Berakoth*, iv, 1; *Josephus, Ant.* xiv, 4, 3). It is this fixed time of worship which accounts for the disciples' assembling together at the third hour of the day (i. e. 9 A.M.) for morning prayer (*שחרית*) on the Day of Pentecost (*Acts* ii, 1-15), and for Peter and John's going up to the Temple at the ninth hour (i. e. 3 P.M.) for (*מעריב*) evening prayer (*Acts* iii, 1), as well as for Cornelius's prayer at the same hour (x, 30). The statement in *Acts* x, 9, that Peter went up upon the house-top to pray about the sixth hour (=12 M.), has led some of our best expositors to believe that the hour mentioned in iii, 11 and x, 30 is the time when the third prayer was offered. The two passages, however, and the two different hours refer to one and the same prayer, as may be seen from the following canon: "We have already stated that the time for the evening prayer (*מנחה*) was fixed according to that of the daily evening sacrifice, and since this daily evening sacrifice was offered at the ninth hour and a half (=3.30 P.M.), the time of prayer was also fixed for the ninth hour and a half (=3.30 P.M.), and this was called the *Lesser Minchah* (*מנחה קטנה*). But as the daily evening sacrifice was offered on the fourteenth of Nisan (*כרב פסח*) at the sixth hour and a half (=12.30 P.M.), when this day happened to be on a Friday (*כרב שבי*) [see *PASSOVER*], it was enacted that he who offers his evening prayer after the sixth hour and a half (=12.30 P.M.) discharges his duty properly. Hence, as soon as this hour arrives, the time of obligation has come, and it is called the *Great Minchah*" (*מנחה גדולה*); *Maimonides, Tad Ha-Chezaka Hilchoth Tephila*, iii, 2; *Berakoth*, 26 b). This mistake is all the more to be regretted, since the accuracy in such minute matters on the part of the sacred writers shows how great is the trustworthiness of their records, and how closely and strictly the apostles conformed to the Jewish practices. The prayers three times a day were not absolutely required to be offered

in public worship in the synagogue every day. The times of public worship were (a) Monday and Thursday, which were the two market-days in the week, when the villagers brought their produce into the neighboring town and their matters of dispute before the local Sanhedrim, which held its court in the synagogue (*Jerusalem Megillah*, v, 1; *Baba Kama*, 32 a), and on which the pious Jews fasted (*Mark* ii, 18; *Luke* v, 33; xviii, 12; *Acts* x, 30); (b) the weekly Sabbath; and (c) feasts and fasts. But though not obligatory, yet it was deemed specially acceptable if the prayers were offered even privately in the synagogue, since it was inferred from *Mal.* iii, 16 that the Shechinah is present where two or three are gathered together.

2. *The Legal Congregation*.—Though it was the duty of every Israelite to pray privately three times a day, yet, as we have already seen, it was only on stated occasions that the people assembled for public worship in the legally constituted congregation, and recited those portions of the liturgy which could not be uttered in private devotion. Ten men, at least, who had passed the thirteenth year of their age (*בר מצוה*) were required to constitute a legitimate congregation (*מנין*) for the performance of public worship. This number, which evidently owes its origin to the completeness of the ten digits, is deduced from the expression *עשר* in *Numb.* xiv, 27, where it is said "how long shall I bear with this (*עשר*) congregation?" referring to the spies. As Joshua and Caleb are to be deducted from the twelve, hence the appellation congregation remains for the ten, and this number is therefore regarded as forming the legal quorum (*Mishna, Sanhedrim*, i, 6; *Maimonides, Tad Ha-Chezaka Hilchoth Tephila*, xi, 1). "The *Shema* (*שמע*) must not be solemnly recited, nor must one go before the ark to conduct public worship, nor must the priests raise their hands to pronounce the benediction, nor must the lessons from the law or the prophets be read . . . unless there are ten persons present" (*Mishna, Megillah*, iv, 3).

3. *Ritual*.—The most important features in the institutions of the synagogue are the *liturgy*, the reading of the law and the prophets, and the homilies. To know the exact words of the prayers which our Saviour and his apostles recited when they frequented the synagogue is to us of the utmost interest. That the Jews in the time of Christ had a liturgical service is certain; but it is equally certain that the present liturgy of the synagogue embodies a large admixture of prayers which were compiled after the destruction of the second Temple. Though the poetic genius of the psalmists had vanished and the Temple music was hushed, yet numerous fervent and devout spirits were still unquenched in Israel. These earnest spirits made themselves audible in the synagogue in most devout and touching prayers, embodying the new anxieties, the novel modes of persecution and oppression which the Jews had to endure from the children of Christianity—the religion newly born and brought up in the lap of Judaism—who deemed it their sacred duty to heap unparalleled sufferings upon their elder brothers. These prayers, formed after the model of the Psalms, not only ask the God of Israel to pity the sufferers, to give them patience to endure, and in his own time to confound their enemies and free them from all their troubles, but embody the teachings of the sages and the sentiments propounded by the Haggadists in the Sabbatic homilies. Hence, in describing the ritual of the synagogue, it is most essential to separate the later element from the earlier portions. As it is beyond the limits of this article to trace the rise, progress, and development of all the component parts of the liturgy in its present order, we shall simply detail those portions which are, undoubtedly, the ancient nucleus, which, beyond a question, were used by our Saviour and his disciples, and around which the new pieces were grouped in the course of time.

(1.) *The Hymnal Group* (מִסְכֵּי זִמְרוֹת).—Just as the Temple building was the prototype for the synagogue edifice, so the Temple service was the model for the ritual of the synagogue. Hence, just as the Temple service consisted of the priests' reciting the ten commandments, pronouncing the benediction upon the people (Numb. vi, 24-27), the offering of the daily morning and evening sacrifice, the Levites' chanting Psa. cxv, 1-16; 1 Chron. xvi, 8-22 (הַדְרֵי) during the morning sacrifice, and Psa. cxvi; 1 Chron. xvi, 23-36 (שִׁירֵי) during the evening sacrifice, so the ritual of the synagogue consisted of the same benediction, the chanting of the sacrificial psalms—as the sacrifices themselves could not be offered except in the Temple—and sundry additions made by Ezra and the men of the Great Synagogue. It is for this reason that the ritual began with the Temple psalms. These were followed by the group consisting of Psa. c [xix, xxxiv, xci, cxxxv, cxxxvi, xxxiii, xcii], xciii, cxlv-cl—those enclosed in brackets being omitted on the Sabbath—1 Chron. xxix, 10-13; Neh. ix, 6-12; Exod. xiv, 30-xv, 18, and sundry sentences not found in the Bible, denominated the order of the *Hymnal Sentences* or "*musical periods*." The use of this hymnal group as part of both the Temple and the synagogue service is of great antiquity, as is attested by the *Seder Olam*, xiv, and *Masechet Sopherim*; see also *Sabbath*, 118 b, where we are told that הַדְרֵי was ordained by David, and שִׁירֵי by the *Sopherim*, or scribes.

(2.) *The Shema, or Keriath Shema* (שְׁמַע קְרִיאת).—This celebrated part of the service was preceded by two benedictions, respectively denominated "*the Creator of Light*" (וְיֹצֵר אֵר) and "*Great Love*" (אֲהַבָה רַבָּה), and followed by one called "*Truth*" (אֱמֻנָה, now expanded into וְיִצִּיב). The two introductory benedictions were as follows: (a.) "Blessed art thou, O Lord our God, King of the universe, who createst light and formest darkness, who makest peace and createst all things! He in mercy causes the light to shine upon the earth and the inhabitants thereof, and in goodness renews every day the work of creation. Blessed art thou, the Creator of light!" (b.) "With great love hast thou loved us, O Lord our God; thou hast shown us great and abundant mercy, O our Father and King, for the sake of our forefathers who trusted in thee! Thou who didst teach them the love of life, have mercy upon us, and teach us also . . . to praise and to acknowledge thy unity in love. Blessed art thou, O Lord, who in love hast chosen thy people!" (Mishna, *Tamid*, v, 1; *Berakoth*, 11 b). Thereupon the ten commandments were recited, which, however, ceased at a very early period, because the Sadducees declared that this was done to show that this was the most essential portion of the revealed law (Mishna, *Tamid*, v, 1, with *Berakoth*, 14 b). Then came the *Shema* proper, consisting of Deut. vi, 4-9; xi, 13-21; Numb. xv, 37-41; which was concluded with benediction (c), entitled "*True and Established*" (אֱמֻנָה וְיִצִּיב), as follows: "It is true and firmly established that thou art the Lord our God and the God of our forefathers; there is no God besides thee. Blessed art thou, O Lord, the redeemer of Israel!" (Mishna, *Berakoth*, i, 4; Gemara, *ibid.* 13 a; Mishna, *Tamid*, v, 1; Gemara, *ibid.* 32 b). There is evidently an allusion to the reading of the *Shema* in the reply which our Saviour gave to the lawyer who asked him, "Master, what must I do to inherit eternal life?" when the lawyer forthwith recited the first sentence of the *Shema* (Luke x, 26). See *SHEMA*.

(3.) The third portion which constituted the ancient liturgy embraces the "*Eighteen*" Benedictions (שְׁמוֹנֵעַ עָשָׂר), called, κατ' ἐξοχήν, the *Prayer* (תַּפִּלָּה). They are as follows: a. (בִּרְיךְ) "Blessed art thou, O Lord our

God, the God of our fathers Abraham, Isaac, and Jacob; great, omnipotent, fearful, and most high God, who bountifully showest mercy, who art the possessor of all things, who rememberest the pious deeds of our fathers, and sendest the Redeemer to their children's children, for his mercy's sake is love, O our King, Defender, Saviour, and Shield! Blessed art thou, O Lord, the shield of Abraham!" b. (אַתָּה גִבּוֹר) "Thou art powerful, O Lord, world without end; thou bringest the dead to life in great compassion, thou holdest up the falling, healest the sick, loosest the chained, and showest thy faithfulness to those that sleep in the dust. Who is like unto thee, Lord of might, and who resembles thee (a Sovereign killing and bringing to life again, and causing salvation to flourish)? And thou art sure to raise the dead. Blessed art thou, O Lord, who raisest the dead!" c. (אַתָּה קָדוֹשׁ) "Thou art holy, and thy name is holy, and the holy ones praise thee every day continually. Blessed art thou, O Lord, the holy God!" d. (אַתָּה חוֹנֵן) "Thou mercifully bestowest knowledge upon men and teachest the mortal prudence. Mercifully bestow upon us, from thyself, knowledge, wisdom, and understanding. Blessed art thou, O Lord, who mercifully bestowest knowledge!" e. (וְהַשְׁבִּיבֵנוּ) "Our Father, lead us back to thy law; bring us very near, O our King, to thy service, and cause us to return in sincere penitence into thy presence! Blessed art thou, O Lord, who delightest in repentance!" f. (סִלְחָה) "Our Father, forgive us, for we have sinned; our King, pardon us, for we have transgressed; for thou art forgiving and pardoning. Blessed art thou, O Lord, merciful and plenteous in forgiveness!" g. (רַחֵם) "Look at our misery, contend our cause, and deliver us speedily, for thy name's sake, for thou art a mighty deliverer. Blessed art thou, O Lord, the deliverer of Israel!" h. (רִפְאוּמֵנוּ) "Heal us, O Lord, and we shall be healed; save us, and we shall be saved; for thou art our boast. Grant us a perfect cure for all our wounds; for thou, O Lord our King, art a faithful and merciful Physician. Blessed art thou, O Lord, who healest the sick of thy people Israel!" i. (בִּרְיךְ עֲלֵינוּ) "Bless to us, O Lord our God, for good this year, and all its kinds of produce; send thy blessing upon the face of the earth; satisfy us with thy goodness, and bless this year as the years bygone. Blessed art thou, O Lord, who blessest the seasons!" j. (תִּקְעַת) "Cause the great trumpet to proclaim our liberty; raise the standard for the gathering of our captives, and bring us together from the four corners of the earth. Blessed art thou, O Lord, who gatherest together the dispersed of Israel!" k. (הַשְׁבִּיבֵנוּ) "Reinstate our judges as of old, and our councillors as of yore; remove from us sorrow and sighing; and do thou alone, O Lord, reign over us in mercy and love, and judge us in righteousness and justice. Blessed art thou, O Lord the King, who lovest righteousness and justice!" l. (וְלִמְלָכֵינוּ) "Let the apostates have no hope, and let those who perpetrate wickedness speedily perish; let them all be suddenly cut off; let the proud speedily be uprooted, broken, crushed, and humbled speedily in our days. Blessed art thou, O Lord, who breakest down the enemy and humblest the proud!" m. (עַל הַצַּדִּיקִים) "On the righteous, on the pious, on the elders of thy people, the house of Israel, on the remnant of the scribes, on the pious proselytes, and on us, bestow, O Lord our God, thy mercy; give ample reward to all who trust in thy name in sincerity, make our portion with them forever, and let us not be ashamed, for we trust in thee! Blessed art thou, O Lord, the support and refuge of the righteous!" n. (וְלִירוּשָׁלַם) "To Jerusalem thy city in mercy return, and dwell in it according to thy promise; make it speedily in our day an everlasting building, and soon establish therein the throne of David. Bless-

ed art thou, O Lord, who buildest Jerusalem!" א' (אח) צמח "The branch of David, thy servant, speedily cause to flourish, and exalt his horn with thy help, for we look to thy help all day. Blessed art thou, O Lord, who causest to flourish the horn of David!" o. (שמיני) קולנו "Hear our voice, O Lord our God; have pity and compassion on us, and receive with mercy and acceptance our prayers, for thou art a God hearing prayer and supplications. Our King, do not send us empty away from thy presence, for thou hearest the prayers of thy people Israel in mercy! Blessed art thou, O Lord, who hearest prayer!" p. (רצו) "Be favorable, O Lord our God, to thy people Israel, and to their prayer; restore the worship to thy sanctuary, receive lovingly the burnt-sacrifice of Israel and their prayer, and let the service of Israel thy people be always well-pleasing to thee. May our eyes see thee return to Zion in love. Blessed art thou, O Lord, who restorest thy Shechinah to Zion!" q. (מודים) "We thankfully confess before thee that thou art the Lord our God, and the God of our fathers, world without end, and that thou art the shepherd of our life and the rock of our salvation from generation to generation; we render thanks unto thee and celebrate thy praises. Blessed art thou, O Lord, whose name is goodness, and whom it becomes to praise!" r. (שים שלום) "Bestow peace, happiness, blessing, grace, mercy, and compassion upon us and upon the whole of Israel, thy people. Our Father, bless us all unitedly with the light of thy countenance, for in the light of thy countenance didst thou give to us, O Lord our God, the law of life, loving-kindness, justice, blessing, compassion, life, and peace. May it please thee to bless thy people Israel at all times, and in every moment, with peace. Blessed art thou, O Lord, who bleesest thy people Israel with peace!"

These eighteen (really nineteen) benedictions are mentioned in the Mishna, *Rosh Ha-Shanah*, iv; *Berakoth*, iv, 3; *Tosiphta Berakoth*, iii; *Jerusalem Berakoth*, ii; *Megillah*, 17 a. We are distinctly told that they were ordained by the one hundred and twenty elders of the Great Synagogue (*Megillah*, 17 b; *Berakoth*, 33 a; *Siphre* on Deut. xxxiii, 2), and we know that the representatives of the people (אנשי מנצח) recited them in the Temple every day (*Sabbath*, 24 b), that the priests pronounced three of them upon the people every morning in the *Hall of Squares* (לשכת הגזית) in the Temple-court, and that the high-priest prayed the sixteenth (רצו) and the seventeenth (מודים) sections of this litany on the Great Day of Atonement (*Yoma*, 68 b). There can therefore be no doubt that our Saviour and his apostles joined in these prayers when they resorted to the synagogue, and that when the apostles went on the top of the house to pray at the stated hour (Acts i, 13; x, 9) these benedictions formed part of their devotions. It must, however, be remarked that the first three and the last three benedictions are the oldest; that benedictions d to m were compiled during the Maccabean struggles and the Roman ascendancy in Palestine; and benediction n was most probably compiled after the destruction of the second Temple.

But though these three groups (viz. the hymnal group, the *Shema*, and the eighteen benedictions) constituted the liturgy of the Jews when engaged in public or private devotion during the period of the second Temple, yet there were other prayers which could only be recited at public worship when the legal number (מניין) were properly assembled.

4. The order of the public worship in the synagogue was as follows:

(1.) *Morning Service*.—The congregation having washed their hands outside the synagogue, and being properly assembled, delegated one of their number to go before the ark and conduct public worship. This

legate of the congregation (צביר), who, like the rest of the congregation, was arrayed in his fringed garment, and with the phylacteries on his head and left arm [see FRINGE; PHYLACTERY], began with reciting the *Kadish* (קדיש), the people responding to certain parts, as follows: "Exalted and hallowed be his great name in the world which he created according to his will; let his kingdom come in your lifetime and in the lifetime of the whole house of Israel very speedily. [Legate and congregation] Amen. Blessed be his great name, world without end. [Legate alone] Blessed and praised, celebrated and exalted, extolled and adorned, magnified and worshipped, be thy holy name; blessed be he far above all benedictions, hymns, thanks, praises, and consolations which have been uttered in the world. [Legate and congregation] Amen. [Legate alone] May the prayers and supplications of all Israel be graciously received before their Father in heaven. [Legate and congregation] Amen. [Legate alone] May perfect peace descend from heaven, and life upon us and all Israel. [Legate and congregation] Amen. [Legate alone] May he who makes peace in his heaven confer peace upon us and all Israel. [Legate and congregation] Amen." The similarity between this very ancient *Kadish* and the Lord's Prayer needs hardly to be pointed out. After this the legate recited in a loud voice the first sentence of the *Shema*, the rest being recited quietly by him and the congregation. Then followed the eighteen benedictions, for the third of which the *Kedushah* (קדושה) was substituted in public worship. It is as follows: "Hallowed be thy name on earth as it is hallowed in heaven above, as it is written by the prophet, and one calls to the other and says [Congregation], Holy, holy, holy, is the Lord God of Sebaoth; the whole earth is filled with his glory! [Legate] Those who are opposite them respond: [Congregation] Blessed be the glory of the Eternal, each one in his station. [Legate] And in thy Holy Word it is written, thus saying: [Congregation] The Lord shall reign forever, thy God, O Zion, from generation to generation. Halleluiah! [Legate] From generation to generation we will disclose thy greatness, and for ever and ever celebrate thy holiness; and thy praise shall not cease in our mouth, world without end, for thou, O Lord, art a great and holy King. Blessed art thou, holy God and King!" On Monday, Thursday, Sabbath, feasts and fasts, lessons from the law and prophets were read, and (with the exception of Monday and Thursday) discourses delivered by the rabbins. The service concluded with the priests' pronouncing the benediction (Numb. vi, 24-27).

(2.) *The Afternoon and Evening Prayer*.—Some of the psalms in the hymnal group were omitted, otherwise the service was similar to that of the morning. The public worship of the feasts and fasts is described in the articles on the respective festivals, and in the article HAPHTARAH. The other prayers which precede and follow the three ancient groups in the present liturgy of the synagogue are not described in this article because they are of later origin. See LITURGY.

VI. *Judicial Authority*.—1. As the officers of the synagogue were also the administrators of justice, the authority which each assembly possessed extended to both civil and religious questions. The rabbins, or the heads of the synagogue, as it is to the present day, were both the teachers of religion and the judges of their communities. Hence the tribunals were held in the synagogue (Luke xii, 11; xxi, 12), and the *chazzán*, or beadle, who attended to the divine service had also to administer the stripes to offenders (iv, 17-20; comp. Mishna, *Makkoth*, iii, 12; and Matt. x, 17; xxiii, 34; Mark xiii, 9; Acts xxii, 19; xxvi, 11). The rabbins who had diplomas from the Sanhedrim, and, after the Sanhedrim ceased, from the *Gaonim* of the respective colleges at Sora and Pumbeditha (q. v.), and who were chosen by the different congregations to be their spiritual heads with the consent of the assembly, selected such of the

members as were best qualified to aid them in the administration of the communal affairs. These constituted a local self-governing and independent college; they issued all the legal instruments, such as marriage contracts, letters of divorce, bills of exchange, business contracts, receipts, etc. They had the power of inflicting corporal punishment on any offender, or to put him out of the synagogue (= excommunicate) altogether (Matt. xviii, 15-17; John ix, 22; xii, 42; xvi, 2). The punishment of excommunication, however, was very seldom resorted to, as may be seen from the fact that though Christ and his apostles opposed and contradicted the heads of the synagogue, yet they were not put out of the synagogue. In some cases they exercised the right, even outside the limits of Palestine, of seizing the persons of the accused and sending them in chains to take their trial before the Supreme Council at Jerusalem (Acts ix, 2; xxii, 5).

2. It is not quite so easy, however, to define the nature of the tribunal and the precise limits of its jurisdiction. In two of the passages referred to (Matt. x, 17; Mark xiii, 9) they are carefully distinguished from the *συνέδρια*, or councils, yet both appear as instruments by which the spirit of religious persecution might fasten on its victims. The explanation commonly given that the council sat in the synagogue, and was thus identified with it, is hardly satisfactory (Leyrer, in Herzog's *Real-Encyclop.* s. v. "Synedrien"). It seems more probable that the council was the larger tribunal of twenty-three, which sat in every city [see COUNCIL], identical with that of the seven, with two Levites as assessors to each, which Josephus describes as acting in the smaller provincial towns (*Ant.* iv, 8, 14; *War.* ii, 20, 5), and that under the term synagogue we are to understand a smaller court, probably that of the ten judges mentioned in the Talmud (Gem. Hieros. *Sanhedr.* loc. cit.), consisting either of the elders, the chazzan, and the legate, or otherwise (as Herzfeld conjectures, i, 392) of the ten Batlanin, or *otiosi* (see above, IV, 6).

VII. *Relations of the Jewish Synagogue to the Christian Church.*—It is hardly possible to overestimate the influence of the system thus developed. To it we may ascribe the tenacity with which, after the Maccabæan struggle, the Jews adhered to the religion of their fathers, and never again relapsed into idolatry. The people were now in no danger of forgetting the law, and the external ordinances that hedged it round. If pilgrimages were still made to Jerusalem at the great feasts, the habitual religion of the Jews in, and yet more out of, Palestine was connected much more intimately with the synagogue than with the Temple. Its simple, edifying devotion, in which mind and heart could alike enter, attracted the heathen proselytes who might have been repelled by the bloody sacrifices of the Temple, or would certainly have been driven from it unless they could make up their minds to submit to circumcision (Acts xxi, 28). See PROSELYTE. Here, too, as in the cognate order of the scribes, there was an influence tending to diminish and ultimately almost to destroy the authority of the hereditary priesthood. The services of the synagogue required no sons of Aaron; gave them nothing more than a complimentary precedence. See PRIEST; SCRIBE. The way was silently prepared for a new and higher order, which should rise in "the fulness of time" out of the decay and abolition of both the priesthood and the Temple. In another way, too, the synagogues everywhere prepared the way for that order. Not "Moses" only, but "the prophets" were read in them every Sabbath day; and thus the Messianic hopes of Israel, the expectation of a kingdom of heaven, were universally diffused.

1. It will be seen at once how closely the organization of the synagogue was reproduced in that of the Ecclesia. Here also there was the single presbyter-bishop [see BISHOP] in small towns, a council of presbyters under one head in large cities. The *legatus* of the synagogue appears in the *ἀγγελος* (Rev. i, 20;

ii, 1), perhaps also in the *ἀπόστολος*, of the Christian Church. To the elders as such is given the name of Shepherds (Eph. iv, 11; 1 Pet. v, 1). They are known also as *ἡγούμενοι* (Heb. xiii, 7). Even the transfer to the Christian proselytes of the once distinctively sacerdotal name of *ιερεὺς*, foreign as it was to the feelings of the Christians of the apostolic age, was not without its parallel in the history of the synagogue. Sevea, the exorcist Jew of Ephesus, was probably a "chief priest" in this sense (Acts xix, 14). In the edicts of the later Roman emperors, the terms *ἀρχιερεὺς* and *ιερεὺς* are repeatedly applied to the rulers of synagogues (Cod. Theodos. *De Jud.*, quoted by Vitringa, *De Decem Otiosis*, in Ugolino, *Thes.* xxi). Possibly, however, this may have been, in part, owing to the presence of the scattered priests, after the destruction of the Temple, as the rabbins or elders of what was now left to them as their only sanctuary. To them, at any rate, a certain precedence was given in the synagogue services. They were invited first to read the lessons for the day. The benediction of Numb. vi, 22 was reserved for them alone.

2. In the *magisterial functions* of the synagogue also we may trace the outline of a Christian institution. The *ἐκκλησία*, either by itself or by appointed delegates, was to act as a court of arbitration in all disputes among its members. The elders of the Church were not, however, to descend to the trivial disputes of daily life (*τὰ βιωτικά*). For these any men of common-sense and fairness, however destitute of official honor and position (*οἱ ἐξουθενημένοι*), would be enough (1 Cor. vi, 1-8). For the elders, as for those of the synagogue, were reserved the graver offences against religion and morals. In such cases they had power to excommunicate, to "put out of" the Ecclesia, which had taken the place of the synagogue, sometimes by their own authority, sometimes with the consent of the whole society (v, 4). It is worth mentioning that Hammond and other commentators have seen a reference to these judicial functions in James ii, 2-4. The special sin of those who frowned upon the rich was, on this view, that they were "judges of evil thoughts," carrying respect of persons into their administration of justice. The interpretation, however, though ingenious, is hardly sufficiently supported.

3. The *ritual* of the synagogue was to a large extent the reproduction (here also, as with the fabric, with many inevitable changes) of the statelier liturgy of the Temple. It will be enough, in this place, to notice in what way the ritual, no less than the organization, was connected with the facts of the New-Test. history, and with the life and order of the Christian Church. Here, too, we meet with multiplied coincidences. It would hardly be an exaggeration to say that the worship of the Church was identical with that of the synagogue, modified (a) by the new truths, (b) by the new institution of the supper of the Lord, (c) by the spiritual *charismata*.

(1.) From the synagogue came the use of fixed forms of prayer. To that the first disciples had been accustomed from their youth. They had asked their Master to give them a distinctive one, and he had complied with their request (Luke xi, 1), as the Baptist had done before for his disciples, as every rabbi did for his. The forms might be, and were, abused. The Pharisee might in synagogues, or, when the synagogues were closed, in the open street, recite aloud the devotions appointed for hours of prayer, might gabble through the *Shema* ("Hear, O Israel," etc., from Deut. vi, 4), his *Kadish*, his *Shemoneh Esreh*, the eighteen *Berakoth*, or blessings, with the "vain repetition" which has reappeared in Christian worship. But for the disciples this was, as yet, the true pattern of devotion, and their Master sanctioned it. To their minds there would seem nothing inconsistent with true heart-worship in the recurrence of a fixed order (*κατὰ ρᾶν*, 1 Cor. xiv, 40), of the same prayers, hymns, doxologies, such as all liturgical study leads us to think of as existing in the apostolic

age. If the gifts of utterance which characterized the first period of that age led for a time to greater freedom, to unpremeditated prayer, if that was in its turn succeeded by the renewed predominance of a formal fixed order, the alternation and the struggle which have re-appeared in so many periods of the history of the Church were not without their parallel in that of Judaism. There also was a protest against the rigidity of an unbending form. Eliezer of Lydda, a contemporary of the second Gamaliel (cir. A.D. 80-115), taught that the legate of the synagogue should discard even the *Shemóneh Esréh*, the eighteen fixed prayers and benedictions of the daily and Sabbath services, and should pray as his heart prompted him. The offence against the formalism into which Judaism stiffened was apparently too great to be forgiven. He was excommunicated (not, indeed, avowedly on this ground), and died at Cæsarea (Jost, *Gesch. des Judenth.* ii, 36, 45).

(2.) The large admixture of a didactic element in Christian worship, that by which it was distinguished from all Gentile forms of adoration, was derived from the older order. "Moses" was "read in the synagogues every Sabbath day" (Acts xv, 21), the whole law being read consecutively, so as to be completed, according to one cycle, in three years, according to that which ultimately prevailed and determined the existing divisions of the Hebrew text (Leyrer, *loc. cit.*), in the fifty-two weeks of a single year. See BIBLE. The writings of the prophets were read as second lessons in a corresponding order. They were followed by the *Derash*, the λόγος παρακλήσεως (Acts xiii, 15), the exposition, the sermon of the synagogue. The first Christian synagogues, we must believe, followed this order with but little deviation. It remained for them before long to add "the other Scriptures" which they had learned to recognise as more precious even than the law itself, the "prophetic word" of the New Test., which, not less truly than that of the Old, came, in epistle or in narrative, from the same Spirit. See SCRIPTURE.

(3.) To the ritual of the synagogue we may probably trace a practice which has sometimes been a stumbling-block to the student of Christian antiquity, the subject-matter of fierce debate among Christian controversialists. Whatever account may be given of it, it is certain that Prayers for the Dead appear in the Church's worship as soon as we have any trace of it after the immediate records of the apostolic age. It has been well described by a writer whom no one can suspect of Romish tendencies as an "immemorial practice." Though "Scripture is silent, yet antiquity plainly speaks." The prayers "have found a place in every early liturgy of the world." (Ellicott, *Destiny of the Creature*, serm. vi.) How, indeed, we may ask, could it have been otherwise? The strong feeling shown in the time of the Maccabees, that it was not "superfluous and vain" to pray for the dead (2 Macc. xii, 44), was sure, under the influence of the dominant Pharisaic scribes, to show itself in the devotions of the synagogue. So far as we trace back these devotions, we may say that there also the practice is "immemorial," as old, at least, as the traditions of the Rabbinic fathers (Buxtorf, *De Synagog.* p. 709, 710; McCaul, *Old Paths*, ch. xxxviii). The writer already quoted sees a probable reference to them in 2 Tim. i, 18 (Ellicott, *Past. Epistles*, ad loc.). But it is by no means certain that Onesiphorus was at that time dead. See DEAD, PRAYERS FOR THE.

(4.) The conformity extends, also, to the times of prayer. In the hours of service this was obviously the case. The third, sixth, and ninth hours were, in the times of the New Test. (Acts iii, 1; x, 3, 9), and had been, probably, for some time before (Psa. lv, 17; Dan. vi, 10), the fixed times of devotion, known then, and still known, respectively as the *Shacharith*, the *Mincáh*, and the *'Arabith*; they had not only the prestige of an authoritative tradition, but were connected respectively with the names of Abraham, Isaac, and Jacob, to whom, as to the first originators, their institution was ascribed

X.—F

(Buxtorf, *De Synagog.* p. 280). The same hours, it is well known, were recognised in the Church of the second, probably also in that of the first, century (Clem. Al. *Strom.* loc. cit.; Tertull. *De Orat.* c. xxv). The sacred days belonging to the two systems seem, at first, to present a contrast rather than a resemblance; but here, too, there is a symmetry which points to an original connection. The solemn days of the synagogue were the second, the fifth, and the seventh; the last, or Sabbath, being the conclusion of the whole. In whatever way the change was brought about, the transfer of the sanctity of the Sabbath to the Lord's day involved a corresponding change in the order of the week, and the first, the fourth, and the sixth became to the Christian society what the other days had been to the Jewish.

The following suggestion as to the mode in which this transfer was effected involves, it is believed, fewer arbitrary assumptions than any other [see SABBATH], and connects itself with another interesting custom, common to the Church and the synagogue. It was a Jewish custom to end the Sabbath with a feast, in which they did honor to it as to a parting king. The feast was held in the synagogue. A cup of wine, over which a special blessing had been spoken, was handed round (Jost, *Gesch. des Judenth.* i, 180). It is obvious that, so long as the apostles and their followers continued to use the Jewish mode of reckoning—so long, i. e., as they fraternized with their brethren of the stock of Abraham—this would coincide in point of time with their *deipnon* on the first day of the week. A supper on what we should call Sunday evening would have been to them on the second. By degrees [see LORD'S SUPPER] the time became later, passed on to midnight, to the early dawn of the next day. So the Lord's supper ceased to be a supper really. So, as the Church rose out of Judaism, the supper gave its holiness to the coming, instead of deriving it from the parting day. The day came to be κυριακή, because it began with the *deipnon* κυριακόν. Gradually the Sabbath ceased as such to be observed at all. The practice of observing both, as in the Church of Rome up to the fifth century, gives us a trace of the transition period. See SUNDAY.

(5.) From the synagogue, lastly, came many less conspicuous practices, which meet us in the liturgical life of the first three centuries. Ablution, entire or partial, before entering the place of meeting (Heb. x, 22; John xiii, 1-15; Tertull. *De Orat.* c. xi); standing and not kneeling, as the attitude of prayer (Luke xviii, 11; Tertull. *ibid.* c. xxiii); the arms stretched out (Tertull. *ibid.* c. xiii); the face turned towards the Kiblah of the east (Clem. Al. *Strom.* loc. cit.); the responsive Amen of the congregation to the prayers and benedictions of the elders (1 Cor. xiv, 16). In one strange exceptional custom of the Church of Alexandria we trace the wilder type of Jewish, of Oriental devotion. There, in the closing responsive chorus of the prayer, the worshippers not only stretched out their necks and lifted up their hands, but leaped with wild gestures (*ρούς τε πόδας κινεῖσιν*), as if they would fain rise with their prayers to heaven itself (Clem. Al. *Strom.* vii, 40). This, too, reproduced a custom of the synagogue. Three times did the whole body of worshippers leap up simultaneously as they repeated the great *ter-sanctus* hymn of Isaiah vi (Vitranga, p. 1100 sq.; Buxtorf, ch. x).

VIII. Literature.—Jerusalem *Megillah*, c. iii; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*; Vitranga, *De Synagoga Vetere* (Weissenfels, 1726); Zunz, *Die gottesdienstlichen Vorträge der Juden* (Berlin, 1832), p. 366 sq.; id. *Die Ritus des synagogalen Gottesdienstes* (ibid. 1859); Edelmann, *Higajon Leb* (Königsb. 1845); Herzfeld, *Geschichte des Volkes Israel* (Nordhausen, 1855, 1857), i, 24-30, 127, 391-394; ii, 129-134, 183-223; Jost, *Geschichte des Judenthums* (Leipsic, 1857-58), i, 88 sq., 168 sq., 262 sq.; Duschak, *Illustrirte Monatschrift für die gesammten Interessen des Judenthums* (Lond. 1865), i, 83 sq., 174 sq., 409 sq. See also Burmann, *Ezerith. Acad.* ii, 3 sq.; Reland, *Antiq. Sacr.* i, 10; Carpov,

*Appar.* p. 307 sq.; Hartmann, *Verbind. des A. T. mit d. Neuen*, p. 225 sq.; Brown, *Antiquities of the Jews*, i, 590 sq.; Allen, *Modern Judaism*, ch. xix; the monographs of Bornitz, *De Vet. Synagogis* (Vitemb. 1650); Leovardic, *De Synagoga et Ecclesia* (s. l. et an.); Rhenferd, *De Otiosis Synagoga* (Franec. 1686); id. *Archisynagogus Otiosus* (ibid. 1688); Tentzel, *De Proseuchis Samar.* (Vitemb. 1682); and the dissertations cited by Darling, *Cyclop. Bibliog.* col. 1811. See WORSHIP.

SYNAGOGUE, THE GREAT (post-Biblical Hebrew, **בֵּית הַתְּפִלָּה**; Aramaic, **כְּנִישְׁתָּא רַבָּתָא**; late Greek and Latin, *συναγωγή μεγάλη*, *Synagoga Magna*), the Great Assembly, or the Great Synod, according to Jewish tradition, denotes the council first appointed after the return of the Jews from the Babylonian captivity to reorganize the religious life, institutions, and literature of the people. Our information on the subject is chiefly from Rabbinical sources.

I. *Name and its Signification.*—Though the verb **בָּנָה**, to gather, to assemble, occurs in the Old Test. (Esth. iv, 16; 1 Chron. xxii, 2; Ezek. xxii, 21; xxxix, 28; Psa. cxlvii, 2), yet the noun **בֵּית הַתְּפִלָּה**, assembly, *synagoge*, does not occur in Biblical Hebrew. In the Hebrew Scriptures the terms **קָהָל**, **קָהָל**, and **אֲסִיְפָה** are used for congregation, assembly [see ECCLESIASTES], and there can be but little doubt that the non-Biblical **בֵּית הַתְּפִלָּה** is designedly employed to distinguish this assembly from all other gatherings. See SYNAGOGUE. This is also the reason why the article is prefixed to the adjective alone, and not also to the noun—viz. **בֵּית הַתְּפִלָּה**, the Great Synagogue—inasmuch as this singles it out from the other *synagogues*, provincial or local, both great and small, which obtained at the same time, and which were designed for different objects. When Ewald asserts that “in the Mishnic language the substantive and the adjective *never* have the article together (*Lehrbuch*, § 293 a, note), we need only refer to *Sabbath*, xvii, 4; *Yoma*, iv, 3; *Taanith*, iii, 7; *Ke-thuboth*, vi, 7; *Nedarim*, iii, 11; *Nazir*, viii, 1; *Baba Buthra*, iv, 3; and to innumerable other passages, in refutation of this assertion. According to the most ancient tradition, this assembly or synagogue was styled great because of the great work it effected in restoring the divine law to its former greatness, and because of the great authority and reputation which it enjoyed (Jerusalem *Megillah*, iii, 7; Babylon *Megillah*, 13 b; *Yoma*, 69 b; *Erubin*, 13 b; *Zebachim*, 102; *Sanhedrin*, 14 a). The enactments of the Great Synagogue are often quoted in the name of **אֲנָשֵׁי בֵּית הַתְּפִלָּה**, the men of the Great Assembly, or those who successively constituted its members during the long period of its existence. The abbreviated forms of these two names to be met with in Jewish literature are **כְּנִשְׁתָּא** = **כְּנִשְׁתָּא רַבָּתָא** and **הַגְּדוּלָּה** = **הַגְּדוּלָּה רַבָּתָא**, *Megillah*, 17 b, 18 b). Sometimes this assembly is also designated the 120 elders (**זְקֵנֵי הַגְּדוּלָּה**, *Megillah*, 17 b, 18 b).

II. *Origin, Date, and Development of the Great Synagogue.*—It is supposed by many that Ezra was the founder of the Great Synagogue, and that he, in fact, was its president. Grätz, however, has adduced the following arguments to prove that Nehemiah originated it after the death of Ezra: 1. The very name of Ezra is not even mentioned in the Biblical register of the representatives (Neh. ix; Ezra v), and it is inconceivable to suppose that the originator would have been omitted; and, 2. Nehemiah, as is well known, went twice from Shushan to Jerusalem to restore order—viz. in the twentieth year of Artaxerxes's reign (B.C. 446), and considerably after the thirty-second year of his reign (B.C. cir. 410). On his second arrival he found Jerusalem in a most deplorable condition: the chiefs of the families had formed alliances with Sanballat the Hönite and Tobiah the Ammonite, enemies of the Jews;

the Sabbath was desecrated, and the law of God and of the sanctuary were disregarded (Neh. xiii, 6-31). Now the convention of the Great Synagogue was held expressly for the removal of these very evils; and since the representatives distinctly bound themselves by a most solemn oath to abstain from mixed marriages, to keep the Sabbath holy, and to attend sacredly to the sanctuary and its requirements, there can be no doubt that the synod was convened by Nehemiah after his second visit to Jerusalem to devise means in order to meet these perplexing points, and that because these evils disturbed the order of the community, therefore they were made the principal and express objects of the first synod. It is the position of ch. x recording the convention of the Great Synagogue which has caused this error. But it is well known that the book of Nehemiah is not put together in chronological order. Grätz has shown a position of the different chapters in accordance with the above view (Frankel, *Monatsschrift*, vi, 62). See EZRA. It is obvious, however, that Nehemiah acted in perfect concert with Ezra, and hence there is no substantial error in attributing the Great Synagogue to the latter.

As to its date, the convention of this Great Synagogue was most probably one of Nehemiah's last acts, and it must have taken place after the death of Artaxerxes, else Nehemiah could not have remained in Jerusalem, since even the second permission to visit that city was granted to him on condition that he should return to Shushan. It could not therefore have taken place before B.C. 424. The Great Synagogue was most probably held a few years after the above date of Nehemiah's second visit. Ezra was doubtless then dead, and this is the reason why his name does not occur in the register of the representatives. The whole period of the Great Synagogue embraces about 104 years (B.C. 404-300), or from the latter days of Nehemiah to the death of Simon the Just (q. v.), who was the last link of the chain constituting the synod (*Aboth*, i, 2). It then passed into the Sanhedrim, when the whole of its constitution was changed. See SANHEDRIM.

The existence of the Great Synagogue, which is attested by the unanimous voice of Jewish tradition, was first questioned by Richard Simon (*Hist. Crit. du Vieux Test.* lib. i, cap. viii). Jacob Alting, with more boldness, rejected it altogether as one of the inventions of tradition (“*Synagoga magna enim nec uno tempore nec uno loco vixit, eoque synagoga non fuit, rerum commentum est traditionariorum, qui nullum alioquin nexum παραδόμεως reperire poterunt*,” *Opp.* v, 382). He was followed by Rau (*Diatribē de Synag. Magna* [Ultraj. 1726], p. 66, etc.) and Aurivillius (*De Synag. vulgo dicta Magna* [ed. J. D. Michaelis, Götting. 1790]). De Wette (*Einleitung in das A. T.* § 14) contemptuously dismisses it as “a tradition which vanishes as soon as the passages are looked at whereon it is based, and as not even being a subject for refutation.” Those who condescend to argue the matter reject this tradition because it is not mentioned in the Apocrypha, Josephus, Philo, or the *Seder Olam*, and because the earliest record of it is in the tract of the Mishna entitled *Aboth*, which belongs to the 1st or 2d century of our æra, but probably represents an earlier age. But surely this argument from the silence of a few writers cannot set aside the express and positive testimony of the Mishna, the Talmud, and the earliest Jewish works. In like manner, the book of Ecclesiasticus, in its catalogue of Jewish heroes (ch. l), does not mention Ezra: Josephus never alludes to the tribunal of twenty-three members, and the earliest patristic literature of the Jews does not breathe a syllable about the Maccabean heroes. Would it be fair to conclude from this silence that Ezra, the tribunal, and the Maccabees are a myth? In confirmation of the records in the Talmudic literature about the Great Synagogue, the following circumstantial evidence is to be adduced: The errors of the Samaritans became rampant after the death of Nehemiah, while of

the high-priests between Eliashib and Onias I some were insignificant men and others were reprobates. Judaism, moreover, has no record whatever of any distinguished persons during this period. We should therefore have expected the religion of the people to be at the lowest ebb. "But instead of declining, we find Judaism rapidly rising. No trace is to be found in the whole of this period of the disturbances, misconceptions, and errors which prevailed in the time of Ezra, Nehemiah, and Zerubbabel. The law and the precepts were pre-eminently revered. The ancient collection of Ben-Sirach's sayings, which reflects the spirit of the people in the pre-Simonian age, breathes a fervent enthusiasm for the inspired law (comp. *Ecclesiasticus*, ii, 16; vii, 29; ix, 15; x, 19; xv, 1; xix, 17; xxi, 11; xxiii, 27, and especially ch. xxiv). Who, then, has kindled and sustained such an enthusiasm and religious spirit, if not an assembly similar to that convened by Nehemiah?" (Grätz, in Frankel's *Monatsschrift*, vi, 63, etc.).

III. *Number of Members and their Classification.*—We are told that Nehemiah organized the Great Synagogue (comp. *Neh.* x, 1–10 with *Midrash Ruth*, c. iii; *Jerusalem Shebiith*, v, 1), and that it consisted of 120 members (*Jerusalem Berakoth*, ii, 4; *Jerusalem Megillah*, i; *Babylon Megillah*, 17 b). In looking at the register of the Great Assembly recorded in Nehemiah (x, 1–8), it will be seen that—*a.* Only sixteen out of the twenty-four chiefs of the priests (1 Chron. xxiv, 7–18) are enumerated, and that for the eight that are wanting four private persons are given, viz. Zidkijah, Daniel, Baruch, and Meshullam. *b.* Of the six or seven chief Levites—viz. Jeshua, Bani, Kadmiel, Hodijah, Sherebiah, Hashabniyah—who returned with Zerubbabel and Ezra (*Neh.* ix, 4, 5; *Ezra* v, 18, 19, 24), Bani is omitted, and twelve private individuals are mentioned who were undoubtedly the doctors of the law (מְבִינִים; *Neh.* viii, 7; ix, 3). *c.* Of the forty-five chiefs of the people (רִאשֵׁי הָעָם) only half are known as heads of families, and the rest are again distinguished private individuals. Here the families of David and Joab (comp. *Ezra* viii, 2, 9) are missing. *d.* Of the representatives of the cities there are only two mentioned—viz. Anathoth and Nebo—which plainly shows that others are omitted, since these two places did not at all distinguish themselves to be thus singled out. Now, in looking at the peculiar position in which they are placed among the heads of the people in the register of the exiles, it will be seen that the family of Hariph (*Josh.*) stand first; then follow the names of thirteen cities (viz. Gibeon, Bethlehem, Netophah, Anathoth, Beth-azmaveth, Kirjath-jearim, Chephirah, Beeroth, Ramah, Gaba, Michmas, Beth-el, and Ai); Nebo concludes the catalogue of the cities, and the family of Magbish follows upon it (*Ezra* ii, 18–30; *Neh.* vii, 24–33), which exactly corresponds with the order in the register of the Great Synagogue; Hariph begins, then come cities, i. e. Anathoth; Nebo comes last, and then again Magbish (*Neh.* x, 19, 20). It has been supposed, therefore, that the above-named cities are to be inserted between Hariph and Anathoth. If we add to these fifteen cities the other five specified in the register (viz. Lod, Hadid, Ono, Jericho, and Tekoa—vii, 36, 37), which were represented by this synod, we have in all twenty cities. Under this view, eight divisions of the priests are wanting—the family of Bani is missing from the Levites, seven families of the heads of the people have disappeared—and thirteen of the representatives of the cities have dropped out. Now, if we supply those which seem to have been dropped, and add them up with the private individuals mentioned in the register, we obtain the following representatives in the Great Synagogue: twenty-eight priests, consisting of the twenty-four divisions and the four private individuals; nineteen Levites, being the seven families and the twelve private persons; fifty Israelites, twenty-nine being chiefs of the people and twenty-one private persons—making in all ninety-sev-

en, with Nehemiah ninety-eight, while the remaining twenty-two are the deputations of the cities. We may thus obtain the 120 members of the Great Synagogue mentioned by the unanimous voice of tradition. It will also be seen from the above that these 120 members represented five classes, viz.: 1. *The chiefs of the priestly divisions* (רִאשֵׁי בֵּית אֵב); 2. *The chiefs of the Levitical families* (רִאשֵׁי הַלְוִיִּים); 3. *The heads of the Israelite families* (רִאשֵׁי הָעָם); 4. *Representatives of cities, or the elders* (זְקֵנִים; *πρεσβύτεροι*); 5. *The doctors of the law* (מְבִינִים; *γραμματεῖς*), from all grades. This number, however, if thus made up, was most probably restricted to the time of Nehemiah, as there can be no doubt that the assemblies which were afterwards held consisted of a smaller number, since, at the time when the Great Synagogue is held to have passed over into the Great Sanhedrim, the representatives consisted of seventy, which became the fixed rule for the Sanhedrim (q. v.).

IV. *The Work of the Great Synagogue.*—At its first organization under Nehemiah, if the above be its true origin, the representatives bound themselves by a most solemn oath (בְּאֵלֶּה וּבְשׁוֹבוֹתָהָם) to carry out the following six decisions, which were deemed most essential for the stability of the newly reconstructed State: 1. Not to intermarry with heathens; 2. To keep the Sabbath holy; 3. To observe the sabbatical year; 4. Every one to pay annually a third of a shekel to the Temple; 5. To supply wood for the altar; 6. Regularly to pay the priestly dues (*Neh.* x, 28–39). The foundation for the reorganization and reconstruction of the State and the Temple-service being thus laid at the first meeting of this synod, the obtaining of the necessary materials for the successful rearing-up of the superstructure and the completion of the edifice demanded that the synod should occasionally reassemble to devise and adopt such measures as should secure the accomplishment of the plan and the permanent maintenance of the sanctuary. To this end the members of the Great Synagogue are believed to have collected the canonical Scriptures. This was called forth by the effects of the first decision, which involved the expulsion of Manasseh, son of the high-priest Joiada, by Nehemiah and the synod for refusing compliance with that decision—i. e. to be separated from his heathen wife, the daughter of Sanballat (xiii, 23–29). In consequence of this his father-in-law, Sanballat, obtained permission to build an opposition temple on Mount Gerizim, in which Manasseh became high-priest, and whither he was followed by many of the Jews who sympathized with him. This proceeding, however, compelled them to deny the prophets, because their repeated declarations about the sanctity of Jerusalem did not favor the erection of a temple out of the ancient metropolis. To erect a wall of partition between the Jews and these apostates, and to show to the people which of the ancient prophetic books were sacred, the *Sopherim* and the men of the Great Synagogue compiled the canon of the prophets. As the early prophets and the great prophets—i. e. Isaiah, Jeremiah, and Ezekiel—like the Pentateuch, were already regarded as sacred, it only remained for the Great Synagogue to complete the prophetic canon by inserting into it the twelve minor prophets, which this synod accordingly did, as may be seen from *Baba Bathra*, 15; *Aboth di Rabbi Nathan*, c. i; 2 Macc. xii, 13. Although some of these authorities are no longer clear about the books inserted into the canon, yet they all testify to the fact that the members of the Great Synagogue were engaged in collecting the canonical books of the prophets. The Hagiographa were not as yet made up, as is evident from the fact that the younger Sirach did not even know the expression מְבִינִים, but used the general term *τὰ ἅλλα* to denote them (*Preface to Ecclesiasticus*), and that in Alex-

andria additions were made to the book of Esther, and other books were inserted in what we now call the Hagiographa, as well as from the circumstance that the canonicity of some of the Hagiographa continued to be a point of difference between the schools of Shammai and Hillel, which could not have been the case if the canon of the Hagiographa had been definitely made up. They also compiled the ritual for private and public worship [see *SYNAGOGUE*]; and, finally, they introduced schools for the study of the divine law (*בית יערי*), and defined the precepts of Holy Writ. The whole of this is indicated in the epitome of the three grand maxims transmitted to us in the laconic style of the Mishna: "The prophets transmitted the divine law to the men of the Great Synagogue, who propounded the three maxims—be cautious in judging, get many disciples, and make a hedge about the law" (*Aboth*, i, 1). The other work of the men of the Greek synagogue which has come down to us in the name of the *Sopherim* is given in the article *SCRIBE*.

V. *Literature*.—Wassermann, in *Jost's Israelitische Annalen* (Frankfort-on-the-Main, 1840), ii, 163 sq.; Sachs, in *Frankel's Zeitschrift für die religiösen Interessen des Judenthums* (Berlin, 1845), ii, 301 sq.; Krochmal, *More Neboche Ha-Seman* (Leopoli, 1851), p. 52 sq., 102 sq., 166 sq.; Herzfeld, *Geschichte des Volkes Israel* (Nordhausen, 1855-57), i, 22 sq., 380 sq.; ii, 53, 244 sq., 264 sq.; Jost, *Geschichte des Judenthums*, i, 35 sq., 95 sq., 270 sq.; Low, *Ben Chananja* (Szegedin, 1858), i, 102 sq., 193 sq., 292 sq., 338 sq.; and especially the elaborate essay of Grätz, in *Frankel's Monatsschrift für Geschichte und Wissenschaft des Judenthums* (Leipsic, 1857), vi, 31 sq., 61 sq.; also *Jost, Gesch. des Kanons*, p. 22, note. See *CANON*.

**SYNAGOGUE AND CHURCH.** The Jewish Church is, in the catacombs, represented as a woman of majestic presence in flowing robes; but in mediæval examples, as on the doorway at Rochester Cathedral, with her eyes bandaged, the tables of the law falling from one hand, and a broken staff in the other (*Jer. v*, 16, 17). The Church is crowned and sceptred, and holds a church and a cross.

**Synallaxis**, in Greek mythology, was one of the Ionids, nymphs skilled in medicine, living on the Cytherus, a river of Elis.

**Synapte** (*συναπτή*) is a Greek term for the Greek Collect in the Liturgy of St. Mark, resembling the *ecmene* in that of St. James and of St. Chrysostom. It is used, also, to designate the holy communion.

**Synaxarium** (*συναξάριον*) is a term for an abridged form of the Greek menology (record of months), an account of the festival being celebrated.

**Synaxis** (*συναξίς*), an Eastern term signifying, respectively, 1. A collect or short prayer; 2. The holy eucharist, or the Christian sacrifice; 3. An assembly for worship; and, 4. The joint commemoration of saints.

**Syncellus** (from *συγκέλλω*, to join) was an ancient officer attached to the patriarchs or prelates of the Oriental Church as witnesses to their conversation and conduct. Others acted as clerks and stewards. It eventually became a mere title of honor.

**Syncellus**, **GEORGIUS**, a Byzantine author and an ecclesiastical dignitary of Constantinople, who lived at the close of the 8th and the beginning of the 9th century after Christ. He has left a *Chronography*, or chronological record of events, extending from the creation to the accession of the emperor Diocletian. He began with Adam, and intended to bring down his compilation to his own time, but death anticipated the completion of his task.

I. *Name*.—He is called *Georgius Abbas* and *Georgius Monachus*, and has sometimes been erroneously identified with *Georgius Hamartolos*, whose works remain still, for the most part, unpublished. The designation of *Syncellus*, which has been given to the chronogra-

pher as a distinctive appellation, is no personal name, but a title of dignity. It is derived from his ecclesiastical office in the hierarchy of the metropolitan Church of the Eastern Empire. The syncellus was originally the companion, room-mate, occupant of the same cell with the patriarch—*cohabitor*, *cellaneus*, *concellaneus*. He was to be the constant witness of the purity of the patriarch's life and the propriety of his conduct and conversation, on the same principle as that which requires members of the Jesuit Order to be always accompanied by one of the fraternity. Sometimes one syncellus was appointed, sometimes two, and sometimes more. Frequently the designation was bestowed as an honorary and honorable title. At times the office was employed as a mode of placing spies around the patriarch. The popes of Rome had their syncelli down to the time of Gregory the Great, at least, as has been proved by Ducange, who has discussed the subject with his usual exuberant learning (*Gloss. Med. et Infim. Latin.* s. v.). They were attached, also, to other prelates. The relation was naturally one of great intimacy and confidence, and consequently became one of influence and high distinction. Hence the syncellus seems frequently to have acted as coadjutor to the patriarch, and to have been for a long time regarded as in the legitimate line of succession to the patriarchate. The practice, however, of elevating the syncellus to the patriarchal throne on the death of the metropolitan appears to have never been habitual, and to have been abandoned before the end of the 9th century (*Zonaras*, XVI, xiii, 25; *Gretser* et *Goar, Comm. in Codin.* p. 105). The emperor Romanus Lecapenus made his youngest son, Theophylact, syncellus, evidently with a view to the succession to the highest place in the hierarchy (*Zonaras*, XVI, xviii). The special functions of the office seem to have been gradually abandoned, but the name and dignity were still retained when Codinus prepared his *Court-roll of the Imperial Officials* (see *Goar, Pref. ad Syncellum*, ii, 56).

II. *Life*.—George the Chronographer was syncellus to the patriarch Tarasius, who died in 806. He may have been one of those imposed on that eminent functionary by the emperor Nicephorus as a spy. We know nothing of him except from his name and his title, and from his commemoration by his friend and continuator, Theophanes. The testimony of Theophanes amounts to very little. It is simply that George, the abbot and syncellus, was a distinguished and very learned man, who faithfully and laboriously chronicled the events of the world from Adam, and diligently recorded their chronological succession; that life failed him when he had brought his chronicle down only to the accession of Diocletian; that, on the approach of death, he requested and urged his friend Theophanes to complete his design, and that Theophanes reluctantly undertook and executed this commission. Of George the Chronographer nothing more is reported. After this brief apparition on the stage of history he vanishes into thick darkness, leaving his unfinished work behind him.

III. *Works*.—The only work of George Syncellus which we possess, or know to have been written by him, is his *Chronography*, or *Universal Chronicles*, which comes down, as has been said, to the reign of Diocletian. Had life and health been spared, he would probably, like his continuator, Theophanes, and like the general tribe of mediæval chroniclers, have been fuller, more original, and more instructive in the treatment of contemporaneous events. These events were, in all likelihood, well known to him, from his social and official position, and from the diligent studies which obtained for him the reputation of extraordinary knowledge (*πολυμαθιστατος*). As he died when he had proceeded no further than the accession of Diocletian, nothing can be expected from him but fidelity of compilation and discernment in the selection and use of authorities. Faithfulness and industry may be readily conceded to him. Discretion and sagacity are scarcely among his charac-

teristics. He is exceedingly curt, harsh, dry, jejune, and often confused. His temperament, his vocation, and his times inclined him to credulity and superstition. He introduces his multitudinous extracts in a crude and undigested form, and accepts without hesitation whatever he finds in his texts. Yet his work has a very high value, and largely from this total absence of critical discrimination. It is the most extensive of the Greek chronicles that have come down to us, with the exception of the Sicilian, Alexandrine, or Paschal chronicle. The latter and the chronicle of Eusebius are the only two important chronological treatises that preceded it which have been preserved. Eusebius was sadly mutilated and fragmentary, and was in part restored by the aid of Syncellus. Scaliger, the restorer of Eusebius, contemplated the abandonment of his undertaking when he despaired of obtaining the assistance of Syncellus, which he deemed indispensable. The restoration was, indeed, impracticable without such aid, till the discovery of the complete work, in recent years, in an Armenian MS., which was published at Milan, in 1818, by Mai and Zohrab. The *Chronography* of Syncellus has thus rendered important service. It has other sources of interest. It is throughout a compilation, but a compilation which usually retains the *ipsissima verba* of the authors from whom it borrows, and which records its obligations. Thus have been preserved remnants, more or less extensive, of many writers who would otherwise have perished utterly. The citations from Eusebius have already been referred to. We owe, besides, to Syncellus nearly all that survives of Julius Africanus, most of the fragments of Manetho, and much of the little that is left of Berosus, who strangely illustrates the Book of Genesis, and corroborates the remarkable discoveries of the late George Smith. Among the shattered remnants imbedded in the chronicle of Syncellus—like broken columns, ruined architraves, dismembered friezes, and mutilated statues in mediæval walls and fortalices—may be found passages from books of various kinds, including many from partially or wholly lost Apocrypha. There are extracts from the Life of Adam, the Book of Enoch, the History of Judith, Hermes, Zosimus the philosopher, etc. Some of these excerpts are very curious, and perpetuate the memory of remarkable superstitions and of quaint legends of the antique world. It would be misplaced labor to investigate here the chronological accuracy of Syncellus, or to comment upon his chronological statements. The service has been rendered laboriously, if not altogether satisfactorily, by the Dominican Goar, who added a *Canon Chronographicus* to the *editio princeps* of the work. The history of the MS. used by Goar is curious. It was preserved in the library of the patriarch at Constantinople. It reappeared in the Royal Library of France. A notice, in Greek, appended to the MS. states that it was purchased at Corinth, for four pieces of gold (*χρυσαινοῦς*), by John Abrami (or Abrams), in the month of November, 1507, or mundane year 7016 (of the æra of Constantinople). It was probably one of the many waifs from the Ottoman capture of Constantinople. For some time it was believed to have been lost from the Royal Library. It reached Scaliger's hands. It was, in time, restored to the royal repository, where it still remains, if it did not perish in the fires of the Commune. The supposed date of this MS. is 1021. It is somewhat mutilated, and one leaf is lost; but it is the most complete MS. of this author. Dindorf regards as of much higher rank another Parisian MS., which he also employed in his recension of the text for the Bonn series of the *Byzantine Historians*. This has lost many leaves in the middle, and, like Coleridge's *Christabel*, has neither beginning nor end.

IV. *Literature*.—Georg. Syncelli *Chronographia*, Ed. J. Goar (Par. 1652). This edition is accompanied with copious emendations and annotations, with an instructive preface, and with a full chronological canon. *Georg. Syncellus et Nicephorus C. P. ex recensione Guilelmi*

Dindorfii (Bonnæ, 1829, 2 vols. 8vo). Dindorf republishes the *apparatus literarius* of Goar, and adds a reprint of Bédovii *Dissertatio de Georgii Syncelli Chronographia*. (G. F. H.)

**Syncretism** (*συνκρητισμός*, union). This term is employed in Church history to designate the movement to promote union among the various evangelical parties of Germany in the 17th century. The word occurs in Plutarch (ii, 490 B; ed. Reiske, vii, 910)—perhaps the only instance among the writers of antiquity—and is there illustrated by the idea that the Cretans, though frequently at war among themselves, were accustomed to unite their powers against the attacks of any foreign foe (*καὶ τοῦτο ἦν ὁ καλούμενος ὑπ' αὐτῶν συνκρητισμός*). Erasmus adopted the word into the *Adagia* (chil. i, cent. 1, No. 11, p. 24), and defined it to signify the union of parties who have need of each other or who desire to make head against a common foe, though they may not be influenced to form such union because they are one at heart. Both the word and the idea came into common use soon afterwards. Zwingli, for example, in a letter to Ecolampadius of the year 1525, recommends such a syncretism (*Opp.* ed. Schuler et Schulthess, vii, 390); Bucer employs the term frequently in connection with his efforts towards union after the publication of the Augsburg Confession (*Opp.* viii, 577), as does also Melancthon with reference to the same business (*Corp. Ref.* ii, 486 sq.; i, 917; *Opp. Mel.* ed. Vitemb. iv, 818). The apostate Staphylus (q. v.) charges the Reformers with being simply Babel-builders, and in setting forth his proofs represents the Lutherans as being *Syncretizantes* (Calov. *Syncret. Hist.* i, 2). Zach. Ursinus (q. v.) also employs the term in an unfavorable sense (*Opp. Ursini* [Neustadt, 1589], ii, 305, on Isa. ix, 6). Syncretism is thus shown to have been a current term with all persons of humanistic culture in the 16th century, and to have been employed, according to circumstances, with a favorable or unfavorable meaning to designate an alliance of dissenting parties in despite of all dissent. The twofold use of syncretism as a term of commendation or censure continued throughout the 17th century, but with a gradual predominance of the latter idea, arising from the increased importance which came to be attached to every variation of doctrinal beliefs. In 1603 the Romish theologian Windeck wrote against the Protestants a *Prognosticon Futuri Status Ecclesie*, in which he advised the Romanists to cultivate greater harmony, in the words "Si sapient Catholici, et ipsis cara esset reipublicæ Christianæ salus, syncretismum colerent." The Heidelberg theologian David Pareus (q. v.) responded in his *Irenicum, sive de Unionē Evangel. Concilianda*, with an appeal to both wings of the Protestant Church for an alliance against their common foe; but Leonhard Hutter rejected the idea of such an alliance as preposterous (*Ἐξέτασις Ἐλεγκτικῆ*, etc. [Wittenb. 1614]), and a Jesuit, Adam Contzen, followed in a polemic of eight hundred and sixty-one pages, entitled *De Pace Germanicæ Libri II* (Mayence, 1616, 8vo), whose principal purpose was a demonstration of the impossibility of any union between the Lutheran and Reformed parties of the Protestant Church. The tendency, scarcely interrupted by the raging of the Thirty Years' War, of Lutheran and Romanist zealots to magnify existing differences of opinion and intensify their influence drew forth the protest of Calixtus (q. v.). He stigmatized it as shameful, and urged the making of distinctions between doctrines of greater and inferior importance; and, while he wished the further development of doctrinal matters to be relegated to the schools, he also urged that a practical sympathy and fellowship be cultivated between the churches. This brought on him a storm of obloquy. The Wittenberg faculty issued two opinions, warning against such "syncretismus diversarum religionum," and deprecating the Sandomir Consensus (q. v.); and in the same year (1645) a Jesuit, Veit Erbermann, wrote a work entitled *Εἰρηνικὸν Catholicum*, etc., that de-

serves notice as being the probable source of a new interpretation of the word syncretism, by which it came to denote, not, as aforesaid, the practical association of religionists holding divergent views upon some questions, but an intermixing of the religions themselves. The new rendering of the word furnished the opponents of Calixtus with additional weapons, of which they were not slow to avail themselves. See Dannhauer, *Mysterium Syncretismi*, etc. (Strasb. 1648), where the idea of syncretism is made to include every form of hurtful association or intermixture, e. g. of Eve with the serpent, of the chemical or mechanical intermixture of heterogeneous elements in nature, etc. With Calovius (q. v.) begins emphatically the use of the term syncretism as denoting an improper and unallowable approximation of Lutheran and Reformed Christians towards each other. This view underlies the phrase *Syncretistic Controversies* (q. v.) as used in ecclesiastical history. The more benevolent meaning was gradually laid aside, and even Calixtus was constrained to refuse his consent to the application of the term to his position. The perversion has retained its hold upon the popular usage until now, and has doubtless contributed towards the unauthorized assumption of a derivation of syncretism from *συνεπάνωμι*.—Herzog, *Real-Encyklop.* s. v.

**Syncretistic Controversies.** The title applies in ordinary practice to such disputes only as originated in connection with efforts made in the second half of the 17th century to promote union and fellowship between the Protestant churches of Germany. These disputes raged less between Reformed and Lutheran theologians than between the strict and the liberal wing of the Lutheran Church itself. The progress of controversy, moreover, generally resulted in the interweaving of extraneous and foreign matters with the direct question at issue; and in this way the syncretistic controversies became also disputes with reference to the degree of freedom to be allowed theological schools and theological science, the disputants being known as *Gnesiolutherani* and *Moderatores*. The term *syncretism* (q. v.) is not broad enough to cover all these several disputes, but is in practice so employed by all parties. Everything prior to the transactions of the year 1645 must be regarded as preliminary to the syncretistic controversies proper. From that date we may distinguish three periods to the death of Calovius and the practical end of the dispute.

1. *From the Colloquy of Thorn to the Death of George Calixtus* (1645-56).—Calovius had succeeded in preventing the selection of Calixtus as the delegate of Dantzic to the Colloquy of Thorn; and when the latter was appointed to serve for Königsberg instead, Calovius caused him to be deprived of all opportunity to co-operate with the Lutheran delegates. Calixtus thereupon associated and counselled with the Reformed theologians, and thereby gave opportunity for his opponents to fasten on him the charge of an unwarrantable combining of diverse religions—a charge persistently urged, though he publicly and in writing rejected the Reformed Confession of Thorn. The next measure was a union of all the Saxon theologians, led by Weller, the superintendent of Brunswick, in a censure of the University of Helmstädt, which favored Calixtus, on the alleged ground that it had made innovations in doctrine and had departed from the generally received *Consensus Formula et Catechesis Rudorum*. To this Calixtus responded with a denial under date of Feb. 26, 1647; but with no other result than that of increasing the eagerness with which every peculiarity in the teaching of Helmstädt was scanned for the discovery of error. In Prussia, the appointment of the Calixtines Chr. Dreier and Johann Latermann to the faculty of Königsberg excited similar disputes, which called forth numerous volumes in defence of either side; and Calovius, who had been superseded by Dreier, continued to fan the flame from a distance, even after Myslenta, its originator, had died (in 1653).

The increasing prominence of the electors palatine and Brandenburg was in this period regarded with anxiety by the electoral court of Saxony, and the representatives of the latter, in the Peace Congress of Westphalia, had standing instructions, accordingly, to prevent, if possible, the concession of rights to the Reformed churches equal to those enjoyed by the Lutheran; but the endeavor failed altogether. The class of Lutheran theologians which approved the action of the congress in this regard was accordingly not in favor in electoral Saxony; and as early as Jan. 21, 1648, the theologians of Wittenberg and Leipsic were commanded to investigate the errors of the Helmstädt theologians, and state them "article by article." In the following year the elector addressed to the dukes of Brunswick a paper in which he rehearsed all the objections of his theologians against Calixtus and Helmstädt, and requested that the latter, as disturbers of the Church and State, should be forbidden to write against the Saxon divines. In November, 1650, Calovius, the redoubtable defender of Lutheran orthodoxy, was called to the faculty of Wittenberg. An immense quantity of controversial writings preceded and followed this event. The dukes of Brunswick refused to accede to the request to silence their theologians, and caused a defence of their position to be written by Horneius, and a reply to the elector by Calixtus himself; and they also rejected the proposition to convene a diet of theologians, as tending rather to increase than diminish the troubles of the Church. They proposed instead a convention of "political councillors who love peace and are acquainted with affairs;" but this was rejected by Saxony. On Jan. 9, 1654, twenty-four accredited representatives of evangelical powers united in a renewed proposition to submit the questions in dispute to a body of peacefully inclined theologians and statesmen for discussion; but the elector of Saxony, acting under the advice of his theologians, would not entertain the project. The Saxons now pursued the plan of dismissing the party of Helmstädt from the Lutheran Church more zealously than before, and in the course of their labors produced a work which was expected to serve as the confession of faith of all who would continue in the purified Church—the *Consensus Repetitus Fidei vere Lutheranae*. To secure the largest possible number of supporters, a mass of writings in harmony with its teachings was issued; but it became speedily apparent that but few were ready to adopt the new confession, and this fact, coupled with the death of George Calixtus in the spring of 1656, caused a cessation of the strife.

Five years of almost total quiet ensued, interrupted only by slight agitations in Brandenburg, where the Lutheran preacher Samuel Pomarius (q. v.) was suspended for preaching against the Reformed and the syncretists. This period was followed, however, by

2. *Renewed Conflicts* (1661-69).—The immediate occasion of strife was found in the measures taken by the landgrave of Hesse-Cassel, William VI, to secure a religious constitution for his land which should be sufficiently broad and generous to comprehend both Lutherans and Reformed under its operation. His endeavors culminated in a convention which met at Cassel, consisting of two members of the (Reformed) University of Marburg and two theologians belonging to the (Lutheran) faculty of Rinteln. A declaration was drawn up which recognised existing divergencies of opinion between the parties, but at the same time showed an agreement between them on all essential matters, and on the ground of such consent urged the exercise of brotherly love and the recognition of both parties as belonging to one Church, sharing in a common faith and looking towards a common heaven. The appearance of this declaration roused the Wittenbergers to action. They issued a circular asking the support of all good Lutherans against the Cassel colloquy, and induced the faculties of Jena and Leipsic to unite with them in admonishing the theologians of Rinteln con-

cerning the lapse of which they had been guilty. A fusillade of papers in Latin and German, aimed at both the learned world and the public, was now kept up until after the death of William VI, in 1666, when the zeal of Rinteln became much cooler in consequence of benefits conferred on the Reformed at the expense of the Lutheran party.

The renewal of the dispute in Hesse soon reacted upon Brandenburg, whose duke was brother-in-law to the landgrave, and thoroughly in sympathy with his plans. The government issued a manifesto deprecating the custom of discussing points of controversy in the pulpit and before mixed audiences, and soon afterwards (Aug. 21. 1663) a colloquy was summoned to Berlin for the purpose of "inaugurating a state of fraternal unity." The Lutherans, however, proved unyielding, the poet Paul Gerhardt (q. v.) in particular being fixed in his opposition to any compromise, and the colloquy ended without result. Various orders now followed in quick succession, by which preachers were forbidden to apply opprobrious names to their opponents in the pulpit, and also to attribute to them doctrines inferred from their principles, but not avowed by them. The Lutherans refused to sign a pledge of obedience to these edicts, this being in their eyes tantamount to a formal abandonment of their position. The government eventually compelled them to yield, though many chose deposition from office and exile rather than submission.

A new phase of the dispute began in 1664 with the publication of a great collection of *Consilia Theologica Witebergensia*, which included a multitude of judgments against Calixtus and the syncretists, and also the *Consensus Repetitus Fidei vere Lutherane*. The exclusion of the syncretists was now less aimed at than the rallying of all strict Lutherans about the *Consensus* as a new confession of faith. The terms of the *Consensus*, however, implicitly condemned Calixtus and his adherents as non-Lutheran and heretical; and the new movement accordingly drew out the son of Calixtus, Frederick Ulric, who from this time made it the object of his life to resist the persistent attacks of Calovius on his father's character and work. Both were extremists, and could not substantiate all the assertions they put forth; but the party of Calovius triumphed over Calixtus for a time through the efforts of a new combatant whom they had gained to their support—the youthful Strauch, professor of history and assessor in theology at Wittenberg. The University of Helmstädt, on the other hand, enlisted the services of Herman Conring (q. v.), a scholar and statesman of European fame, and he succeeded in so presenting to view the danger to the peace of the Church and to the liberty of teaching which grew out of the attempt to force the *Consensus* upon the Church as a confession of faith, that universities and princes were alarmed, and a period of quiet was secured, 1669.

3. *Final Conflict*.—Calovius reopened the war in 1675 with accustomed energy; and although the temper of the time was changing, and disgust with the interminable quarrel began to be manifested, he was able, by 1679, to compel the entire University of Jena to disavow all sympathy with syncretism. This, however, proved to be his last victory. His aged patron, the elector Johann Georg II of Saxony, died in the following year, and the new ruler was not so fond of controversy as the old one had been. In 1682 the *Historia Syncretica*, which Calovius had made a storehouse of the details of his life-long contest, and published anonymously to evade the law forbidding such publications, was bought up and prevented from circulating among the people by the government. He died of apoplexy Feb. 21, 1686. No considerable features in connection with the syncretistic controversy appear after the death of Calovius. Lutherans and members of the Reformed Church in Germany neither desired nor sought fraternity with each other during more than another century. When the Revocation of the Edict of Nantes occurred, in 1685, only the Reformed population in Germany welcomed

the fugitive Protestants from France. The end of the controversy—a peaceful separation between theology and religion, the regulation of the boundaries intervening between Church and school, between confession and science, between that which is and that which is not, obligatory upon all Christians—was not attained. Calovius held pure doctrine to be the one thing needful, and regarded that as fixed and settled, so that every soul is required to simply accept it as the truth. Calixtus did not believe the acceptance of doctrine to be, upon the whole, the essential thing in Christianity, nor that all doctrine has equal importance; and he held that the points of belief which a Christian absolutely must receive are but few. He was thus able to overlook minor differences and desire fraternity among all Protestant Christians.

The literature of the controversy is vast. See especially Calovius, *Hist. Syncret.*; Walch, *Streitigkeiten d. luth. Kirche*, pt. i and iv; Tholuck, *Akad. Leben d. 17ten Jahrh.* (1854), pt. ii; id. *Lebenszeugen d. luth. Kirche* (Berl. 1859); id. *Kirchl. Leben d. 17ten Jahrh.* (ibid. 1861); Gass, *Gesch. d. prot. Dogmatik* (ibid. 1857), vol. ii; and the works mentioned s. v. "Calixtus, George."—Herzog, *Real-Encyclop.* s. v.

**Syncretists** (*συγκρητισταί*, *unionists*), persons who advocate a system of union and harmony which was attempted to be introduced into the Lutheran Church in the 17th century. It originated with Calixtus, professor of divinity at Helmstädt, who, in examining the doctrines professed by the different bodies of Christians, discovered that, notwithstanding there were many things to be reprobated, there was so much important truth held by them in common that they ought to banish their animosities, and live together as disciples of one common Master. His object was to heal the divisions and terminate the contests which prevailed. Like most men of a pacific spirit, he became the butt of all parties. He was accused of Calvinism, Roman Catholicism, Arianism, Socinianism, Judaism, and even Atheism. His bitterest opponent was Buscher, a Hanoverian clergyman, who published a book against him entitled *Crypto-Papismus Novæ Theologiæ Helmstädiensis*. The subject was taken up by the Conference held at Thorn in the year 1645, to which Calixtus had been sent by the elector of Brandenburg; and the whole force of the Saxon clergy was turned against him, as an apostate from the strict and pure principles of Lutheranism. This great man continued, however, with consummate ability, to defend his views and repel the attacks of his enemies till his death, in 1656. But this event did not put a stop to the controversy. It continued to rage with greater or less violence till near the close of the century, by which time most of those who took part in it had died. To such a length was the opposition to Calixtus at one time carried that, in a dramatic piece at Wittenberg, he was represented as a fiend with horns and claws. Those who sided with him were called *Calixtines* or *Syncretists*. See SYNCRETISM.

**Syndics** (*σύνδικοι*), or DEFENSÖRES, were officers whose duty it was to watch over the rights of the poor and of the Church, to act as superintendents of the *Copiate* (q. v.), and to see that all clerks attended the celebration of morning and evening service in the church. See Bingham, *Christ. Antiq.* bk. iii, ch. ii.

**Synecdēmi** (*συνέκλητοι*, *fellows-pilgrims*), a name given by the Paulicians in the 9th century to their teachers, because they were all equal in rank, and were distinguished from laymen by no rights, prerogatives, or insignia.

**Synedrians** (from *σύνεδρος*, *a sitting together*), a name given by the Novatians to orthodox Christians, because they charitably decreed in their synods to receive apostates and such as went to the Capitol to sacrifice into their communion again upon their sincere repentance.

**Synergism** (*συνεργίω*, to work together) is the doctrine that the human will co-operates with divine grace in the work of conversion, as it was advanced by Erasmus in his controversy with Luther, and afterwards represented by Melancthon and his school. Luther taught that sin had absolutely ruined man, making of his reason a ravenous beast and of his will a slave, so that it is impossible for him to contribute in any way towards his conversion; and in the first edition of his *Loci Communes* Melancthon's teaching is in entire harmony with Luther's view. Such a view necessarily resulted in the doctrine of predestination, and both Luther and Melancthon traced everything back to God as the first cause, the sin of Judas no less than the conversion of Paul. It was, however, an unnatural view for Melancthon to hold, and he receded from it into the dualistic idea that human liberty must be recognised as a factor in conversion by the side of the divine necessity. In the third edition of the *Loci* sin is derived from the will of the devil and of man, instead of that of God; not everything, consequently, is to be ascribed to the divine causality, and there is a realm of contingencies by the side of the realm of necessity which is founded on the freedom of the human will. A certain measure of volitional freedom to perform outward works of obedience to the divine law remains to man even after the Fall; but he cannot, without the aid of the Holy Spirit, quantitatively and qualitatively fulfil that law, and accordingly in every good action three causes work together (*συνεργούν*)—the Word of God, the Holy Spirit, and the human will, which does not resist the Word of God, and is at times described directly as *facultas sese applicandi ad gratiam*. The doctrine of predestination fell, of course, so soon as man came to be regarded as other than a volitionless statue. This synergistic theory of Melancthon's was admitted into the Leipsic Interim (q. v.) in the words "God does not operate on man as on a block, but draws him in such a way that his will co-operates." It was also advocated in a polemical address by Johann Pfeffinger, professor and pastor at Leipsic (1555), against whom Amsdorff (q. v.) contended, in 1558, that "it is presumptuous to hold that man could, in the exercise of his natural powers, prepare and fit himself to receive grace." Pfeffinger had said, however, that the Holy Spirit must first arouse the will, after which the latter is required to do its part in conversion. From this personal stage the question was lifted into the schools by Flacius (q. v.). He denied all participation of the will in the work of conversion, because it is dead to all good, wanting in all powers for good, and inclined to evil constantly. God, therefore, is the sole agent in conversion, and man is not only passive, but also unwilling. To the defence of such postulates Flacius devoted two days in a disputation at Jena, which latter university now became the centre of strict Lutheranism as against Wittenberg, where the spirit of Melancthon ruled. The next measure of this Lutheran champion was the publication of the *Weimar Book of Confutations*, which committed the duke of Saxony to the defence of orthodoxy, and served, at the same time, to refute all the errors of the time. It likewise occasioned the overthrow of Strigel (q. v.), who had been forced to aid in making a first draft of the book, but was unwilling to admit into it any of the improvements suggested by Flacius, and wrote against it in the form in which it was given to the world. He was seized and imprisoned on Easter-day, 1559, but was soon afterwards liberated in deference to the censure with which public opinion everywhere visited that act of violence; and a colloquy was ordered to be held at Weimar in August, 1560, with a view to settling the dispute. On this occasion Flacius inconsiderately asserted that original sin is not an accident, but part of the substance of man, and obstinately refused to retract the statement. The favor of the court now began to wane, and in exactly the same degree did the Flacianist divines rage against all who re-

fused to sustain their opinions. Punishment naturally followed, and reached its culmination in the dismissal from office of Flacius and his clique, Dec. 10, 1561. Strigel, on the other hand, was induced to draw up a *Declaration* of his views, and was thereupon reinstated, which event was followed by an explanatory *Superdeclaration* from the hand of superintendent Stössel, designed to conciliate the opposite party (*Cothurnus Stoesselii*, in Salig, iii, 891). Strigel, however, refused to accept the interpretation of his views given by Stössel, and took refuge "from the machinations of false brethren" in Leipsic. The Lutherans who rejected Stössel's compromise were banished, to the number of forty. The accession of John William to the throne of ducal Saxony (1567) restored the Flacianists, Flacius himself excepted, to power; a futile colloquy was held for the purpose of giving peace to the Church at Altenburg, Oct. 21, 1568; and the duke was eventually constrained to order the forming of the *Corpus Doctrinæ Thuringicum* (Jena, 1571) with a view to the protection of assailed orthodoxy. The *Formula of Concord* gave the finishing stroke to the conflict, and settled it substantially in harmony with the Flacian view. See Salig, *Hist. d. Augsburg. Conf.* i, 648; Walch, *Religionsstreitigkeiten innerhalb d. luth. Kirche*, i, 60; iv, 86; Planck, *Gesch. d. prot. Kirche*, etc., p. 119; Döllinger, *Reformation*, iii, 437; Schmid, in *Zeitschr. f. hist. Theol.* 1849, p. 13; Preger, *M. Flacius Illyricus*, etc., ii, 104-227.—Herzog, *Real-Encyclop.* s. v.

**Synesius**, bishop of Ptolemais, was first a pagan, then a Christian, and always a rhetorician. He lived at the close of the 4th and the beginning of the 5th century of our æra. He was a late representative of the rhetorical declaimers of the Hellenic schools, and of the Neo-Platonic philosophers. He was also a pagan and a Christian poet, an elegant gentleman of leisure, and a bishop of the African Church. Contrasts were combined and reconciled in the man and in his career. He lived in an age of transitions; and he is, in his writings and in his fortunes, typical of the age in which he lived. The biography and the literary remains of Synesius are much more interesting and instructive for the light which they shed upon the social, intellectual, and religious condition of provincial life in the Roman empire during the first period of its manifest dissolution than for any influence exercised by him on the literature, the philosophy, the paganism, or the Christianity of his times, or on the sentiments, convictions, or character of subsequent generations. He was designated by Casaubon "the sweetest of philosophers and the delight of the pious muses" ("suavissimus philosophus et piarum delictum musarum," *Præf. Ep. Greg. Nysseni*); yet few authors have excited so much admiration and been so seldom read. Few have been so often quoted by the few who were acquainted with him, and been so inaccessible for many generations, even to professed scholars. The attractions of Synesius are so special in their character that they address themselves to a very limited class of students. The period which he illustrates is so obscure, so disheartening, and so little considered, that only the frequenters of the by-ways of history are likely to turn their regards to it. More than two centuries intervened between two editions of his works. After this long interval, three complete editions have been published within the last twenty years. One is only a Latin version, another is a French translation, and the third is no more than a reprint of the Greek text and Latin rendering from the edition of 1640, with some slight corrections. The writings of Synesius, in prose or verse, inspired by pagan or by Christian influences, are much less notable for literary charm, for vigorous thought, or for philosophical reflection than as a presentation of the feelings, the aspirations, the struggles, the difficulties, the hazards, the gratifications, the annoyances, the occupations, and the associations of a cul-

tivated country gentleman, *de provincia*, under the reign of Arcadius and Honorius, when all parts of the empire were falling to pieces. They, accordingly, interpret the times for us, and require to be interpreted by them.

I. *Character and Circumstances of the Age.*—The life of Synesius was cast in a stormy period; and the storms were not limited to his own province, but swept over the whole empire. It was the age of general dissolution, political, social, intellectual, and religious; an age of usurpations and civil discords; of crimes in the palace and treacheries in the State; of barbarian invasions; of permanent dismemberments; of strife between pagans and Christians; of controversies, heresies, and schisms in the Christian Church; of social depravation and decay; of universal disintegration, and of rapid material decline. The date of the birth of Synesius is undetermined. If he was born in 370, it occurred only seven years after the death of the pagan emperor and the failure of his attempt to restore paganism. When Synesius died, if he died in 431, Genseric and his Vandals had seized a large part of Africa; Britain, Gaul, and Spain had been cut off from the Roman dominion. During his lifetime usurper had sprung up after usurper; Asia Minor and Greece and Italy had been ravaged by the Goths; Constantinople had been threatened and Rome thrice captured by them, and Alaric had led his wild hosts from the Alps to Scylla and Charybdis. While Synesius was still a child in the cradle, Firmus had revolted in Egypt, and the insurrection had been revived after the lapse of a few years, to be crushed out in the Gildonic war. Strangely enough, to none of these portentous events is any distinct allusion made in the remains of this author, except to the Gothic insurrection in Phrygia. There is a possible reference to the Gildonic war (*Catastasis*, ii, 1). In the early oration delivered before the emperor Arcadius there is a clear exposition of the fearful perils from the Northern hordes impending over the empire (*De Regno*, c. xxi-xxiv). Was his mind so engrossed by literary labors, by philosophical speculations, and by troubles nearer home that the great calamities of the time occurred without attracting his attention? Or was his pen arrested by despair, even in his candid communications to his friends? Yet the invasions and the mutilations of the empire in the gloomy chasm between the birth and the death of Synesius were not the most grievous calamities of those years. Even more grievous was the social condition which invited the invasions, and rendered resistance impracticable. There was no cohesion or concert between the provinces; no devotion to emperor or empire; nothing but division, isolation, misery everywhere—as a consequence, in part at least, of imperial rule and imperial administration. The organization of the government was impotent for defence, or for that vigorous attack which is often the best means of defence. It was ingeniously devised for inflicting needless and paralyzing restraint, and for extorting revenue from penury and wide-spread distress. Lands were left uncultivated and almost without inhabitants. Wide tracts relapsed into forest or marsh. The people were ground by taxes and the ruinous modes of collecting them. Movement and enterprise were prevented in order to facilitate fiscal arrangements. Bridges were broken down by time and neglect. Roads were left without repair, and became impassable. Communication was rendered difficult. Commerce, manufactures, and industry of all kinds were harassed and impeded in many ways. In numerous extensive regions banditti lurked in the woods, infested the highways, and ransacked villages. So great was the wretchedness which had driven these outcasts into nefarious courses that a presbyter nearly contemporary with Synesius undertook their exculpation. One book of the *Theodosian Code*, whose compilation falls within this age, is occupied with defining and enforcing the liabilities to municipal and other public burdens, and with regulating and restricting the exemptions from them, which were often arbitrarily and capriciously ac-

corded. The hard struggle for bare life engrossed nearly all thoughts; and irregular, treacherous, and violent proceedings became familiar, while unrestrained license was common whenever opportunities of indulgence presented themselves. The general demoralization and the social disintegration were aggravated by divisions in the Christian Church, which weakened the authority of the new religion, and by the great contention between Christianity, often sadly corrupted, and the expiring paganism, which was cognizant of its disease, but not of its approaching dissolution. All the bonds of government, law, morals, and religion were fearfully enfeebled. Full and indisputable information in regard to these sorrowful generations is contained in the *De Civitate Dei* of Augustine and the *De Gubernatione Dei* of Savian of Marseilles. Yet, despite all interruptions and apprehensions, philosophy and literature continued to be cultivated. Philosophy lost itself in Neo-Platonic fantasies and Oriental mysticism. Literature was, in large part, made up of pedantic epistles and rhetorical affectations. It was the era of Libanius, Themistius, and Symmachus. No severer censure of it need be sought than is contained in the productions of Synesius. It was, however, also the era of the great Christian orators and fathers, who contended earnestly against vice in high places, oppression and wrong wherever they were found, and the manifold distresses of the people. Ambrose, Basil, Augustine, John Chrysostom, Jerome, and the two Gregories illustrated the Christian Church in that age, and attracted the admiration of pagans as well as of the followers of their own creed. To none of them does Synesius make any reference. These, then, were the varied, and in many respects alarming, aspects of the years which measured the career of Synesius, and by them its anomalies are rendered intelligible.

II. *Life.*—Synesius was probably born about the year 370. Some authorities say in 375. His birthplace was Cyrene, the capital of Cyrenaica, the tract which stretches along the African coast westward from Egypt. Cyrene was a Dorian colony of the mythical ages; and Synesius claimed for himself the most illustrious Lacedæmonian descent. In his denunciation of Andronicus, he contrasts the splendor of his own lineage with the mean extraction of the imperial governor. "In default of other merit," says he, "I descend from Eurysthenes—from ancestors whose names, from Eurysthenes, who led the Dorians into Laconia, down to my father, are inscribed in the public registers" (*Epist.* lvii; comp. *Catastasis*, ii, 5). This deduces his line from the royal house of Sparta, though he has blundered in his statement of the ancient legend. His family was opulent (*Epist.* cxxxiii). He had a city house, and country estates in which he took unceasing delight. Nevertheless, he diligently sought exemption from civic and fiscal burdens. His love of letters and philosophy must have been manifested early, for his tastes were already decided and much accomplishment attained when he proceeded to Alexandria (394) to attend the Neo-Platonic and other courses in that tumultuous city. Here he became acquainted with the beautiful, brilliant, and unfortunate Hypatia. He enrolled himself among her disciples. He secured her esteem and regard, and always retained the warmest admiration for her. Seven of his letters are addressed to her. On returning from Egypt, he went to Athens, to complete his education at that old centre of learning and refinement, whence had issued, in the preceding generation, the emperor Julian and many of his distinguished contemporaries, pagan and Christian. He was utterly enchanted by his visit, and made no long stay (*Epist.* liv, cxxxv). After deserting Athens, he paid a second visit to Alexandria, as is shown by a graphic and humorous letter (*ibid.* iv), describing the hazards of shipwreck to which he was exposed on his return. (Druon, p. 587-589, discusses the calculations of Petavius and Tillemont, and assigns this voyage to 397.) Soon after his return, he was sent by

his fellow-citizens to Constantinople, to present their petitions and a golden crown to the young emperor Arcadius (*De Regno*, c. ii). He was a youthful ambassador. He appears to have discharged his mission with ability, acceptance, and some degree of success. The emperor was still under tutelage. Everything was in confusion. The court was distracted by bitter rivalries. Alaric had recently ravaged Greece and threatened Athens. During his stay the insurrection of the Goths in Phrygia occurred. It was no wonder that he experienced frequent inattention and disheartening procrastinations, and that he was at times reduced almost to destitution and despair. He had the honor of delivering a public harangue before the emperor. He gained influential friends, established a reputation for literary talent, and acquired elegant correspondents, who would display and eulogize his epistles at Constantinople, while he would pay the same compliment to theirs at Cyrene. One thing he accomplished for himself—immunity from public dues. An earthquake hastened and excused his departure from the capital of the Eastern Empire. On reaching home he found his country desolated by barbarian war, an affliction from which it had seldom been entirely free for five centuries. The nomads from the edges of the Libyan desert were making frightful irruptions, plundering, destroying, murdering, and meeting with little and only ineffectual resistance (*Epist.* civ, cxiii, cxxiv). The governor and officials were more studious of pillaging than of repelling other pillagers. Synesius, calling to mind his Laconian descent and the example of Leonidas, and having apparently had some military training himself in his youth, roused his neighbors to action, and led them against the spoilers. This war with the nomads, which was renewed from time to time, is mentioned in many of his letters, and forms the subject of a special tract. These productions exhibit the weakness and wretchedness of the province—the neglect, imbecility, cowardice, and rapacity of the imperial authorities, and the disgust of Synesius at the conduct of both the people and the officials. After the war was over, or, rather, in the intervals of partial or local repose, he enjoyed an elegant and learned retreat in his country residences, finding occupation in study, literary production, and rural pursuits, and relaxation in hunting, manly sports, and an active correspondence. Two years and more after the close of his embassy he revisited Alexandria. It was during this visit that he married. He received his wife from the hands of the patriarch; and to her and to his children he remained always tenderly attached. His marriage was his first visible contact with Christianity. It was, perhaps, decisive. It is no violent presumption to suppose that his wife was Christian, as he received her from the Christian bishop of Alexandria (*Epist.* cv). "The unbelieving husband *may have been* sanctified by the believing wife;" or the wife may have been chosen with a prevalent disposition to believe. There is no evidence, no intimation of this. The *Dion* was written about this time. It is pagan. The treatise *On Dreams* was composed after his marriage. It is mystical and Neo-Platonic, and accords with Christianity as little as Cicero's dialogue *De Divinatione*. After an abode at Alexandria of more than two years, and the birth of a son, he came back to Cyrene, which was shortly afterwards besieged by the barbarians. During the succeeding years he must have inclined more and more to Christianity, but without renouncing his philosophical dogmas. The date of his conversion cannot be ascertained. He must have been reputed a Christian, or "almost a Christian," when elected bishop of Ptolemais (409, 410). The episcopate was a very different function then from what it has been in serener and more settled periods. The bishop was the guide, the advocate, the protector, the support, and often the judge of the Christian flock. His civil attributes were of the utmost importance to the daily life of his people. Character was of more immediate concern to

them than doctrine. Synesius had gained and deserved the esteem and confidence of his countrymen. The metropolitan Church of Ptolemais demanded him for its bishop. He was unwilling to incur the solemn responsibilities of the position. He declined, he protested, he urged objections which might be deemed insuperable. He could not put away the wife to whom he was devoted; he was unwilling to forego the pleasures of the chase, the other recreations of the country, and the literary and philosophical ease which had been the charm of his life. He had neither relish nor aptitude, he thought, for the multifarious and exacting business which would devolve upon him. He could not surrender the Neo-Platonic convictions which he had approved, expounded, and still believed; yet he recognised that they were at variance with Christian doctrine. In an elaborate letter to his brother he presents earnestly the grounds of his hesitation and reluctance. He begs him to lay his views before the patriarch Theophilus, whose decision he agrees to receive as the decree of God (*Epist.* cv). The patriarch must have recommended his acceptance of the sacred honor, notwithstanding his *Nolo episcopari*. He was consecrated at Alexandria by Theophilus. Seven months afterwards, being still in that city, he declared that "he would have preferred many deaths to the episcopate" (*Epist.* xcv). Did he separate from his wife? Druon thinks that he did. It has been more frequently supposed that the separation was not required of him. Did he yield his convictions in regard to the pre-existence of souls, the non-resurrection of the body, and the incompatibility of Christian doctrine with revealed truth? M. Druon again confidently concludes that he did. Other inquirers, ancient and modern, believe, with more probability, that he continued to entertain them, for some time at least, after his elevation. He may have acted on the convenient principle of Scævola and Varro, which he avowed in the letter to his brother, that many things in religion are allegorical, which it is expedient to inculcate upon the vulgar, who are unable to receive truth in its purity. At any rate, he discharged with energy, resolution, integrity, and skill the administrative and other external offices of the episcopate. He boldly assailed the tyranny and rapacity of the governor of the province, and succeeded in relieving the provincials of his rule. His denunciation of Andronicus survives. Another incident of his episcopal aptitudes is preserved. He effected an amicable and satisfactory settlement between two of his suffragans for the possession of a dismantled fortress on the border of their respective dioceses. There was ample occasion for the display of his sagacity and fortitude. The ravages of the nomads were renewed. The Asurians besieged Ptolemais. The resistance of the inhabitants was sustained by the courage of their bishop, who continued zealous in seeking protection for the province, and has transmitted to our days the record of its woes. How much longer he guided his diocese we do not know. The date usually assigned for his death (430, 431) is founded on a dubious conjecture. In this date M. Druon does not concur. He considers a letter to Hypatia, written from a sick-bed, and ascribed to 413, to be his latest epistolary or other production (*Epist.* xvi) (Druon, p. 551); and believes that he escaped, by an earlier death, the affliction of knowing the tragic fate of "his teacher, mother, sister, friend." It would be strange, had he known it, that no mention of her murder occurs in letter or other treatise. A fantastic legend, two centuries after his death, attributed to him a miracle for the proof of the resurrection. The greatest of all miracles, in his case, was that, being, or having been, a Neo-Platonist, he became a bishop of the Christian Church without the full renunciation of his views; that, being a provincial of an African province, he acquired eminence in diplomacy, in philosophy, and in poetry; that, living amid the turbulences, vices, and meannesses of the 5th century, he maintained the reputation of an innocent, sincere, and gallant man.

III. *Works*.—The works of Synesius, usually brief—for the *Dion* is one of the longest—are numerous and varied. They are of great interest. We may concede to Synesius grace of expression; we may admit the exuberance of his fancy and the propriety of his reflections; we may enjoy the freshness and simplicity of many of his letters, and the unalloyed purity of his sentiments; but these merits may easily be exaggerated, and do not constitute his chief claim to enduring consideration. It is the striking portraiture of the manifold phases of an unhappy period, when civilization was sinking under a mortal agony, that gives a value to his remains far transcending their literary and philosophical excellences. These excellences were, indeed, counterbalanced by very grave defects. The style of Synesius is too often characterized by affectations, strained fancies, and a conscious craving for display. His philosophy is without originality. Yet even his philosophy merits attention, as illustrating the fine gradations by which pagan speculation melted into the semblance of Christianity without divesting itself of its pagan phrase and spirit.

The works of Synesius which survive (for his juvenile poem, the *Cymegetica*, or, *On Hunting*, has been lost) are, an *Address to Pæonius, with the Gift of an Astrolabe*, invented or improved by himself, in which he encouraged his friend to prosecute the study of astronomy:—an *Oration on Government*, delivered at Constantinople before the emperor Arcadius; it is somewhat commonplace, but is remarkable for the boldness and freedom of its utterance and for its sound sense:—*Dion*, which is so called in honor of Dion Chrysostom, his exemplar in style and habit of thought. This treats of the training of a philosopher, or, rather, of what had been the aim and the result of his own education in philosophy. It is, in some sort, a semi-pagan anticipation of the *Religio Medici* of Sir Thomas Browne. The treatise is at times transcendental, but abounds in high fancies and generous aspirations. The *Encomium on Baldness* is a rhetorical extravaganza, a counterpart and reply to Dion Chrysostom's *Eulogy of Hair*. The speculation *On Dreams* is simply a specimen of superstition and Neo-Platonic mysticism. It was honored or loaded with a commentary by Nicephorus Gregoras. The *Catastasis*, or *Catastases*—for the production consists of two distinct parts—is chiefly a mournful recitation of the miseries of Cyrenaica, induced by chronic misgovernment and oppression, and by the reiterated invasions of the nomads. It is, perhaps, the strongest testimony to the weakness, impoverishment, and disorganization of the provinces of the empire that he ascribes the calamities which he specially deplores to only one thousand Asurians, and says that they were defeated and scattered by forty imperial troopers, Unnigardæ. The second *Catastasis* is a eulogy of Anysius, the leader of these Unnigardæ, and the military chief of the province. These *Catastases* resemble the overwrought declamations of the professional rhetoricians. In the same strain, also, is the declamation *Against Andronicus*. A fable, entitled *The Egyptian*, or *On Providence*, is a regret for the deposition and a laud for the restoration of his friend and correspondent Aurelian, the prætorian præfect. A couple of brief *Homilies* are entitled to no special notice.

The most important and the most interesting of the remains of Synesius are his *Letters*, 157 or 159 in number, according as the *Denunciation of Andronicus* is excluded from or is included in the series of *Epistles*, and ten *Hymns*. The letters are of diverse style, and on the most dissimilar occasions. Some are formal letters of civility; others are written to be paraded by his correspondents among their acquaintances. These are strained, rhapsodical, and ostentatious, and are more notable for literary fligree than for their contents. Other letters are friendly communications or earnest expositions. They are simple, fresh, natural, earnest, and modern in their cast. His correspondence with his brother is direct and affectionate, and is rendered at-

tractive by the revelation of his disposition, feelings, and circumstances. The family and serious letters make a favorable contrast to the redundant epistolography of Libanius and Symmachus, and afford in an equal degree pleasure and instruction.

There is much variance of opinion in regard to both the character and the dates of the *Hymns* of Synesius. Druon has endeavored to fix their chronology, but hardly secures confidence in his conclusions. The first two were, almost certainly, the earliest. They are thoroughly Neo-Platonic, and probably pagan. The rest may be Christian, with a diminishing Neo-Platonic complexion. The only one entirely free from this philosophical characteristic is the short one numbered the tenth. Druon assigns seven of the hymns to the years preceding his conversion. This conclusion is not apt to win assent. The third hymn is Neo-Platonic, but it is as Christian as the ninth. The later Neo-Platonism apes so closely and so habitually the language and sentiments of Christianity, and the Christianity of Alexandria is often so deeply imbued with Neo-Platonism, that exact discrimination between pagan and Christian utterances is not always possible. The convictions of men were then in a transition stage in everything, and paganism and Christianity frequently lapsed into each other. There is a passage in the third hymn (ver. 210-230) which may be simply Neo-Platonic, but it bears a striking resemblance, in thought and expression, to parts of the Athanasian Creed. As the conversion of Synesius cannot be fixed to any certain date, and as he avowed his inability to renounce his philosophic opinions when chosen bishop, all the hymns may have been composed under Christian influences, and all but the last may retain Neo-Platonic tendencies, without being thereby rendered pagan. But these questions cannot be discussed here. The hymns of Synesius exhibit no eminent poetic merit. Their attraction lies in their philosophy, in their ease of expression and facility of versification. It was a strange adaptation of Anacreontic metre to fit it to philosophical and theological songs. Yet it may well be asked what meaning should be attached to the claim of Synesius, in the opening of the seventh hymn, to have been the first to tune his lyre in honor of Jesus.

IV. *Literature*.—*Synesii Opera*, ed. Turnebi (ed. princeps, Paris, 1553, fol.); *id.* ed. Morell. (ibid. 1612, fol.; corr. et aucta, 1640, 1653); *id.* apud *Cursum Patrologiæ*, etc., ed. Migne (Latin, ibid. 1859, 8vo; Greek and Latin, ibid. 1864, 8vo); Druon, *Œuvres de Synésius, trad. en Français* (ibid. 1878, 8vo); *Synesii Hymni*, ed. Boissonade, apud *Poet. Gr. Sylloge* (ibid. 1824-32); *Synesii Hymni Metrici*, ed. Flack (Tüb. 1875); *Synesii Epistolæ*, ed. Herscher, apud *Epistologr. **Synge**, EDWARD, an Irish prelate, was born at Inishonane, April 6, 1659, and was the second son of Edward, bishop of Cork. He was educated at the grammar-school at Cork, and at Christ Church, Oxford, finishing his studies in the University of Dublin. His first preferment was to two small parishes in the diocese of Meath, which he exchanged for the vicarage of Christ Church, Cork, where he served for over twenty years. In 1699 he was offered the deanery of Derry, but declined it for his mother's sake. He was chosen proctor for the chapter in the Convocation of 1703, and soon after was presented with the crown's title to the deanery of St. Patrick's, Dublin. The title being thought defective, the chancellorship was presented to Mr. Synge, which gave him the care of St. Werburgh's, Dublin. In

1713 he was chosen proctor for the chapter of St. Patrick's, and on Dr. Sterne's promotion to the see of Dromore, the archbishop of Dublin appointed Dr. Synge his vicar-general, in which office he continued until he was appointed bishop of Raphoe, in 1714. He was made archbishop of Tuam in 1716, over which see he presided until his death, July 21, 1741. He published many sermons and religious tracts, of which a collective edition, under the title of *Works* (Lond. 1740, 4 vols. 12mo; 1744, 1759), was issued. The best-known of his works is *The Gentleman's Religion*. His *Treatise on the Holy Communion* was published at Philadelphia in 1849, 32mo. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Synisactæ** (*συνησάκται*), a Greek term for priests' concubines. See SUBINTRODUCTÆ.

**Synistamēni** (*συνιστάμενοι*, *standing together*), a name given in the Eastern Church to the fourth order of penitents, called in the Latin Church *consistentes*. They were so called from their having liberty (after the other penitents were dismissed) to stand with the faithful at the altar, and join in the common prayers and see the oblation offered. Still they could not yet make their own oblations, nor partake of the eucharist. See Bingham, *Christ. Antiq.* bk. xviii, ch. ii.

**Synnada**, COUNCIL OF (*Concilium Synnadenſe*), was held about 230, or, according to some, in 256, upon the subject of Cataphrygian baptism. Baptism received out of the Church was declared to be null and void. See Mansi, *Concil.* i, 760.

**Synod** (from *σύνωδος*, *a gathering*), a meeting or assembly of ecclesiastical persons to consult on matters of religion. (See the monographs cited in Volbeding, *Index Programmatum*, p. 165.) Of these there are four kinds, viz.—1. General, where bishops, etc., meet from all nations. These were first called by the emperors; afterwards by Christian princes; till, in later ages, the pope usurped to himself the greatest share in this business, and by his legates presided in them when called. See ECUMENICAL. 2. National, where those of one nation only come together to determine any point of doctrine or discipline. The first of this sort which we read of in England was that of Herudford, or Hertford, in 673; and the last was held by cardinal Pole in 1555. See COUNCIL. 3. Provincial, where those only of one province meet, now called the *convocation* (q. v.). 4. Diocesan, where those of but one diocese meet to enforce canons made by general councils or national and provincial synods, and to consult and agree upon rules of discipline for themselves. These were not wholly laid aside till, by the act of submission (25 Hen. VIII, art. 19), it was made unlawful for any synod to meet but by royal authority. See SYNODS.

Synod is also used to signify a Presbyterian Church court, composed of ministers and elders from the different presbyteries within its bounds, and is only subordinate to the General Assembly (q. v.).

**SYNOD, ASSOCIATE**, the highest ecclesiastical court among the united Presbyterian Dissenters in Scotland, the powers of which are, in a great measure, analogous to those of the General Assembly in the established kirk. See SCOTLAND, CHURCHES IN.

**SYNOD, HOLY**, the highest court of the Russo-Greek Church, established by the czar Peter in 1723, and meeting now at St. Petersburg. Each diocese sends in a half-yearly report of its churches and schools. The members composing it are two metropolitans and as many bishops, with procurators, attorneys, and other lay officials. See RUSSIAN CHURCH.

**SYNOD, HOLY GOVERNING**, is the highest court of the Greek Church, established in Greece after the recovery of its independence. It met first at Syra in 1833, and in 1844 was recognised by the constitution, which also enacted that the king should be a member of the established Church. The members of synod

were at first appointed by the king, but are now chosen by the clergy, the bishop of Attica being perpetual president. In 1850 it was formally recognised by the patriarch of Constantinople, through the mediation of Russia, but on the condition that it should always receive the holy oil from the mother Church. See GREEK CHURCH.

**SYNOD, REFORMED**. See COVENANTERS; PRESBYTERIAN CHURCHES.

**SYNOD, RELIEF**. See SCOTLAND, CHURCHES IN.

**Synodales TESTES** were persons anciently summoned out of every parish in order to appear at the episcopal synods, and there attest or make preferment of the disorders of the clergy and people. In after-times they were a kind of empanelled jury, consisting of two, three, or more persons in every parish, who were, upon oath, to present all heretics and other irregular persons. These, in process of time, became standing officers in several places, especially in great cities, and hence were called SYDESMEN (q. v.). They were also called *Questmen*, from the nature of their office in making inquiry concerning offences. But this latter duty devolved mostly upon the church-wardens.

**Synodals** was a term applied to (1) provincial constitutions or canons read after the synods in parish churches; (2) to procurations, so called because the bishop held his synod and visitation together; (3) to the payments made a bishop by his clergy in virtue of his holding a synod. See SYNODATICUM.

**Synodaticum**, or CATHEDRATICUM, is the annual tribute paid by incumbents of benefices in the Church of Rome to the bishop of the diocese, in token of subjection to the episcopal *cathedra*. It is generally paid at the time of the convening of the diocesan synod. The earliest direct mention of this impost occurs in the transactions of the second Synod of Braga, A.D. 572 (sess. ii, can. 2, in c. 1, caus. x, qu. iii), where various extortions on the part of Spanish bishops are forbidden, and they are permitted only in connection with the visitations of their districts "in honorem cathedræ sue id est duos solidos . . . per ecclesias tollere." The same synod forbids the payment of an impost by candidates for ordination, which is also termed *cathedraticum*, but must not be confounded with the *synodaticum*. The seventh Council of Toledo, A.D. 646, confirmed the action of Braga; and Charles the Bald, in 844, directed the payment of two solidi, or an equivalent in kind (Pertz, *Monum. Germanicæ*, iii, 378), and devolved this collection for the bishops on the archpresbyters. Pope Alexander III conceded to bishops who should obtain a church from the hands of the laity the right to impose on it the *cathedraticum* (c. 9, X, *De Censibus*, iii, 39); and both Innocent III (c. 20, X, *De Censibus*) and Honorius III (c. 16, X, *De Officio Judicis Ordinarii*, i, 31) expressed themselves in favor of its being rendered. Other references may be found in Du Fresne, s. v. "Cathedraticum" and "Synodus;" Benedict XIV, *De Synod. Diocesana*, lib. v, c. vi, 1 and 2; Richter, *Kirchenrecht* (5th ed.), § 233, note 4, etc.; Gudenus, *Cod. Diplomat.* i, No. 93, p. 260. The Council of Trent discontinued the payment of many heavy impositions connected with visitations (sess. xxiv, can. 3, *De Reform.*); but various declarations of the *Congregatio pro Interpret. Conc. Trident.* have left the *cathedraticum* in force (see Ferraris, *Bibl. Canon.* s. v. "Cathedraticum;" Thomassin, *Vet. ac Nov. Eccl. Discipl.* III, ii, 32, 34; Benedict XIV, *ut sup.* 6 and 7; *Declarations* 18–26 in the edition of Trent by Richter and Schulte, *loc. cit.*).

This impost is termed *cathedraticum* "in honorem cathedræ," and *synodaticum* as being collected during the session of synod; but it has in practice been paid at other times as well, and is exacted even where no synod is held, unless a custom recognised in law forbids (Benedict XIV, *ut sup.* etc.). A tax expressive

of subordination is required in any case, amounting generally to two solidi. It must be paid by all churches and benefices and their incumbents, and also by seminaries with which benefices are incorporated, and lay unions having a church of their own. Regulars are exempt with reference to convents and convent churches in which they personally minister. The Order of St. John of Jerusalem is likewise exempt. In practice, however, it has not always been possible to collect these taxes. Austria ceased to pay them under imperial rescripts of 1783 and 1802, and in many other districts of Germany they were quietly discontinued. Their validity was decreed in Bavaria, on the other hand, so late as 1841 (see Permaneder, *Handb. d. Kirchenrechts*, 3d ed., p. 319, note).—Herzog, *Real-Encyclop.* s. v.

**Synodica** (*συνδικαί*) were letters written by a new bishop informing other bishops of his promotion, and to testify his desire to hold communion with them. A neglect to write such letters was interpreted as a refusal to hold such communion and a virtual charge of heresy upon his fellows. Circular letters summoning the bishops to a provincial synod were also called *Synodica*.

**Synoditæ** (from *σύνδοκος*, a community) were monks who lived in communities or convents, differing in this respect from the *Anchorets*.

**Synods** form a noticeable feature in the history of the general Church. Particular synods have served to indicate particular stages in the progress or retrogression of the life of the Church, as respects the development of knowledge and teaching, the formation of the worship and the constitution of the Church itself; and all synods serve, more clearly than other institutions, to reveal the ruling spirit, the measure of strength, or the type of disease, in any given period. The breadth of the field covered by this title will appear from the fact that Mansi's (q. v.) collection of the acts, etc., of councils, extending only into the 15th century, embraces 31 volumes folio.

With respect to the origin of synods opinions differ. Some authors hold them to have been divinely instituted through the agency of the apostles (Acts xv, especially ver. 28, "It seemed good to the Holy Ghost, and to us"), while others concede to them a merely accidental rise. The council in Acts xv must certainly be considered a synod, though it does not appear that it was designed to introduce a permanent institution. On the other hand, the situation of the Church and the progress of events furnished the providential conditions by which ecclesiastical assemblies became necessary, so that the theory of a merely human origin for them cannot be accepted. The history of our subject, excluding the period since the Reformation, admits of being divided into five periods.

I. *The Beginnings of the Institution of Synods as Furnished by Provincial Synods* (to A.D. 325).—The earliest of such synods of which mention is made are one alleged to have been held in Sicily in A.D. 125 against the gnostic Heracleon (q. v.), and one at Rome under bishop Telesphorus (d. 139); but there is not the slightest evidence that either of them was held. The earliest of which we have authentic information were held in Asia Minor against the Montanists (Eusebius, *Hist. Eccl.* v, 16), probably not before A.D. 150. Soon afterwards various synods were held to discuss the celebration of Easter (*ibid.* v, 23) and other questions; so that Tertullian speaks (*De Jejunis*, c. 13) of the convening of such bodies as a custom among the Greeks, and thereby at the same time implies that such assemblies were not known in his own (African) Church. Such conferences promoted Christian unity and laid the foundation for a government of the churches by superior authority. By the middle of the 3d century synods were regularly held in each year, and were attended by bishops and elders, so that they had already become a fixed and periodically recurring institution, in

which the different churches shared in the persons of their appropriate representatives (see Firmilian's letter to Cyprian, *Epp.* No. 75). The earliest synods in the West were held in Africa about A.D. 215, and soon such assemblies became frequent. The next stage in the development of synods appears in the extension of their jurisdiction over larger areas than a single district or province, by which the inauguration of œcumenical councils was prepared for. At Iconium, in 256, representatives were present from Galatia, Cilicia, etc. Every part of Spain was represented at Elvira; and the Synod of Arles, in 314, was attended by bishops from Gaul, Britain, Germany, Spain, North Africa, and Italy.

II. A.D. 325 to 869.—The œcumenical synods of the Greek Church, beginning with that of Nicæa (q. v.) and closing with the fourth Council of Constantinople (q. v.).

III. A.D. 869 to 1311.—Councils of the Western Church under the direction of the papacy, including a great number of provincial and national synods whose proceedings indicated both the utmost devotion and the most decided opposition to the rule of the popes—ending with the general Council of Vienne in Gaul (q. v. severally).

IV. A.D. 1311 to 1517.—Councils ostensibly aiming to secure reform "in head and members"—Pisa, Constance, and Basle (q. v. severally).

V. A.D. 1517 to 1563.—The Reformation and the reactionary Synod of Trent (q. v.).

For an enumeration and characterization of the more important synods see the article COUNCILS, to which we also refer for a list of sources.—Herzog, *Real-Encyclop.* s. v.

**Synodus** (*σύνδοκος*), a term applied in the early Church to the building (church) in which the synod was held. It was simply transferred from the assembly to denote the place of assembly, as was done with the word *ecclesia*.

**Synthrónus** (*σύνθρονος*), a Greek term to signify the seats of a bishop and his clergy in the bema of an Oriental Church.

**Syn'tyche** (*Συντύχη*, with Fate), a female member of the Church of Philippi, mentioned (Phil. iv, 2, 3) along with another named Euodias (or rather Euodia). A.D. 57. To what has been said under the latter head the following may be added: The apostle's injunction to these two women is that they should live in harmony with each other, from which we infer that they had, more or less, failed in this respect. Such harmony was doubly important if they held office as deaconesses in the Church, and it is highly probable that this was the case. They had afforded to Paul active co-operation under difficult circumstances (*ἐν τῷ εὐαγγελίῳ συνή-θησαν μοι*, ver. 3), and perhaps there were at Philippi other women of the same class (*αἰτίνας*, *ibid.*). At all events, this passage is an illustration of what the Gospel did for women, and women for the Gospel, in the apostolic times; and it is the more interesting as having reference to that Church which was the first founded by Paul in Europe, and the first member of which was Lydia. Some thoughts on this subject will be found in Killiet, *Comm. sur l'Épître aux Philipp.* p. 311–314.

**Synusiastæ** (*συνουσιασταί*) were those who held that the incarnation of our Lord was effected by a blending or commixture of the Divine substance with the substance of the human flesh. The name is taken from the statement of the doctrine *συνουσίωσιν γεγενησθαι καὶ κρᾶσιν τῆς Θεότητος* (Theod. *Hær. Fab.* iv, 9). Theodoret calls this sect *Polemians*, one of the Apollinarian sects; and Apollinaris himself, in the latter part of his life, added to his distinguishing heresy regarding the soul of our Lord either this heresy or one closely akin to it. At the Lateran Council in A.D. 649 were quoted two extracts from Polemon's works, from which it appears that the Synusiastæ retained the heresy regarding the soul of our Lord, denying him a human

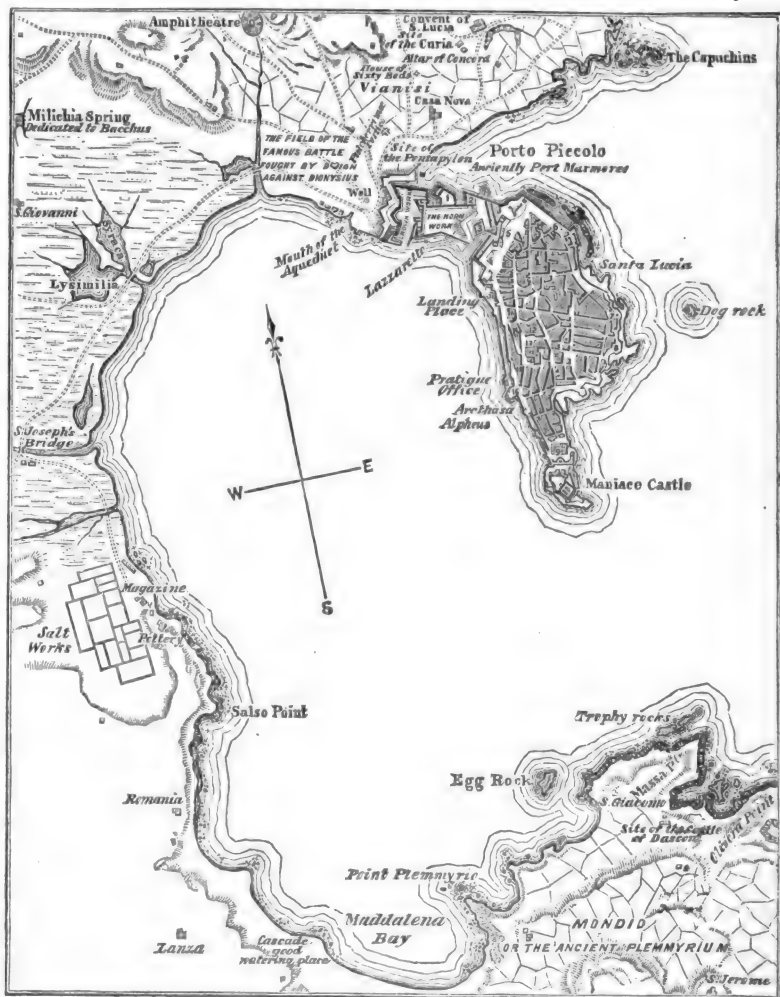

will, and asserting that he was to himself a rational soul. They seem to have been led to the adoption of the heresy in this manner. At the outbreak of the controversies regarding the incarnation, some asserted the conversion of the substance of the Godhead into the substance of flesh, others that the Divine nature supplied in Christ the place of the human soul. The attempt to hold these two tenets together resulted in a denial of an *ἐνανθρώπησις* altogether. To avoid this denial, it was allowed that the flesh of man was assumed, but so blended with the Divine substance as to eliminate that tendency to sin which it was alleged could not but be resident in human nature. Diodorus of Tarsus and Theodotus of Antioch wrote against this heresy. See Cave, *Hist. Lit.*; Blunt, *Dict. of Sects*, etc., s. v.

**Syracuse** (*Συρακούσαι*; Lat. *Syracusæ*), a celebrated city on the eastern coast of Sicily, whither Paul arrived in an Alexandrian ship from Melita, on his voyage to Rome (Acts xxviii, 12). It had a fine prospect from every entrance both by sea and land. Its port, which had the sea on both sides of it, was almost all of it environed with beautiful buildings, and all that part of it which was without the city was on both sides banked up and sustained with very fair walls of marble. The city itself, while in its splendor, was the largest and richest that the Greeks possessed in any part of the world. For (according to Strabo) it was twenty-two miles in circumference, and both Plutarch

About B.C. 210 this city was taken and sacked by Marcellus, the Roman general, and, in storming the place, Archimedes, the great mathematician, who is esteemed the first inventor of the sphere (and who, during the siege, had sorely galled the Romans with astonishing military engines of his own invention), was slain by a common soldier while intent upon his studies. After it was thus destroyed by Marcellus, Augustus rebuilt that part of it which stood upon the island, and in time it so far recovered as to have three walls, three castles, and a marble gate, and to be able to send out twelve thousand horse soldiers and four hundred ships. In A.D. 675 the Saracens seized on it, but in 1090 it was taken from them by Roger, duke of Apulia. It yet exists under its original name (Ital. *Siracusa*), and is still much frequented on account of its commodious harbor. Paul stayed here three days as he went prisoner to Rome (Acts xxvii, 12); here also Christianity was early planted, and still, at least in name, continues; but the city has lost its ancient splendor, though it is a bishop's see.

The magnificence which Cicero describes as still remaining in his time was no doubt greatly impaired when Paul visited it. The whole of the resources of Sicily had been exhausted in the civil wars of Cæsar and Pompey, and the piratical warfare which Sextus Pompeius, the youngest son of the latter, subsequently carried on against the triumvir Octavius. Augustus

Plan of Syracuse and its Environs.

restored Syracuse, as also Catana and Centoripa, which last had contributed much to the successful issue of his struggle with Sextus Pompeius. Yet the island Ortygia and a very small portion of the mainland adjoining sufficed for the new colonists and the remnant of the former population. But the site of Syracuse rendered it a convenient place for the African cornships to touch at, for the harbor was an excellent one, and the fountain Arethusa in the island furnished an unfailing supply of excellent water. The prevalent wind in this part of the Mediterranean is the W.N.W. This would carry the vessels from the corn region lying eastward of Cape Bon, round the southern point of Sicily, Cape Pachynus, to the eastern shore of the island. Creeping up under the shelter of this, they would lie either in the harbor of Messana or at Rhegium, until the wind changed to a southern point and enabled them to fetch the Campanian harbor Puteoli or Gaeta, or to proceed as far as Ostia. In crossing from Africa to Sicily, if the wind was excessive, or varied two or three points to the northward, they would naturally bear up for Malta; and this had probably been the case with the "Twins," the ship in which Paul found a passage after his shipwreck on the coast of that island. Arrived in Malta, they watched for the opportunity of a wind to take them westward, and with such a one they readily made Syracuse. To proceed farther while it continued blowing would have exposed them to the dangers of a lee-shore, and accordingly they remained "three days." They then, the wind having probably shifted into a westerly quarter so as to give them smooth water, coasted the shore and made (περιελθόντες καθηντήσαμεν εἰς) Rhegium. After one day there, the wind got round still more and blew from the south; they therefore weighed, and arrived at Puteoli in the course of the second day of the run (Acts xxviii, 12-14).

In the time of Paul's voyage, Sicily did not supply the Romans with corn to the extent it had done in the time of king Hiero, and in a less degree as late as the time of Cicero. It is an error, however, to suppose that the soil was exhausted; for Strabo expressly says that for corn and some other productions, Sicily even surpassed Italy. But the country had become depopulated by the long series of wars, and when it passed into the hands of Rome, her great nobles turned vast tracts into pasture. In the time of Augustus the whole of the centre of the island was occupied in this manner, and among its exports (except from the neighborhood of the volcanic region, where excellent wine was produced), fat stock, hides, and wool appear to have been the prominent articles. These grazing and horse-breeding farms were kept up by slave labor; and this was the reason that the whole island was in a chronic state of disturbance, owing to the slaves continually running away and forming bands of brigands. Sometimes these became so formidable as to require the aid of regular military operations to put them down; a circumstance of which Tiberius Gracchus made use as an argument in favor of his measure of an Agrarian law (Appian, *B. C.* i, 9), which would have reconverted the spacious grass-lands into small arable farms cultivated by Roman freemen.

In the time of Paul there were only five Roman col-

onies in Sicily, of which Syracuse was one. The others were Catana, Tauromenium, Thermae, and Tyndaris. Messana too, although not a colony, was a town filled with a Roman population. Probably its inhabitants were merchants connected with the wine-trade of the neighborhood, of which Messana was the shipping port. Syracuse and Panormus were important as strategical points, and a Roman force was kept up at each. Sicilians, Sicilians, Morgetians, and Iberians (aboriginal inhabitants of the island, or very early settlers), still existed in the interior, in what exact political condition it is impossible to say; but most likely in that of villeins. Some few towns are mentioned by Pliny as having the Latin franchise, and some as paying a fixed tribute; but, with the exception of the five colonies, the owners of the soil of the island were mainly great absentee proprietors, and almost all its produce came to Rome (Strabo, vi, 2; Appian, *B. C.* iv, 84 sq.; *v.*, 15-118; Cicero, *Verr.* iv, 53; Pliny, *H. N.* iii, 8). For a full account of ancient Syracuse, see Smith's *Dict. of Geog.* s. v., and the literature there cited; also Göller, *De Situ et Origine Syracusarum* (Lips. 1818); for the modern city, Bäderer, *Southern Italy*, p. 308 sq. See SICILY.

**Syr'ia**, a province and kingdom of Western Asia, the name, extent, and boundaries of which have been subjects of no little difficulty to both sacred and classical geographers. As including Palestine, it is of intense interest in Bible geography.

I. *Name*.—1. The word *Syria* does not occur in Hebrew; but in the A. V. it is the usual, though not the uniform, rendering of the word *Aram* (אַרַם). Thus in Gen. x, 22, *Aram*, the youngest son of Shem, is mentioned as the founder of the Aramean nation, from whom the whole country colonized by his descendants took its name. The country is therefore rightly called "Aram" in Numb. xxiii, 7; but the very same Hebrew word is rendered *Mesopotamia* in Judg. iii, 10, and *Syria* in x, 6.

*Aram* was a wide region. It extended from the Mediterranean to the Tigris, and from Canaan to Mount Taurus. It was subdivided into five principalities: 1. *Aram-Damasek* (called in the A. V. "Syria of Damascus"); 2. *Aram-Maachah*; 3. *Aram-Beth-Rechob*; 4. *Aram-Zobah*; and 5. *Aram-Naharaim* (*Mesopotamia* in the A. V.). These have already been described. See ARAM. When the kingdom of Damascus attained to great power under the warlike line of Hadad, it was called by way of distinction *Aram*, which unfortunately is rendered "Syria" in the A. V. (2 Sam. viii, 5, 12; 1 Kings x, 29; xv, 18; 2 Kings v, 1; xxiv, 2, etc.). This lax method of translation was borrowed from the Sept. and Vulg. versions. The Targums retain *Aram*; and it would tend much to geographical accuracy and distinctness were the Hebrew proper names uniformly retained in the A. V.

The region comprehended by the Hebrews under the name *Aram* was not identical with that which the Greek writers and the authors of the New Test. included under *Syria*. It embraced all *Mesopotamia* and *Assyria*, while it excluded *Phœnicia* and the whole territory colonized by the Canaanites. See CANAAN.

In the New Test. the name *Syria* (Συρία) is not employed with great definiteness. In fact, it is doubtful if ever the Greek geographers were agreed as to the exact boundaries of the country so called. Matthew, after mentioning the mighty works and wondrous teachings of our Lord in Galilee, says: "His fame went throughout all Syria," alluding apparently to the country adjoining Galilee on the north (iv, 24). Luke applies the name to the Roman province of which Cyrenius was governor, and which did not include Palestine (ii, 2). In the same restricted sense the word is used in Acts xv, 23. The apostles in Jerusalem wrote

Coin of Syracuse.

Ptolemy confines Syria within the same limits on the north, west, and east; but he marks its southern boundary by a line running from Dor, at the base of Carmel, by Scythopolis and Philadelphia, to Alsadamus Mons (Jebel Haurân). He thus includes Phœnicia, Galilee, and a portion of Persæ, but excludes Judæa and Idumæa (v. 15).

2. In this article the name Syria is confined to what appears to be its more strict New-Test. signification. Its boundaries may be given as follows: Palestine on the south; the Mediterranean on the west; Cilicia and Mount Amanus on the north; and the Euphrates and desert of Palmyra on the east. Its length, from the mouth of the Litâny on the south to the bay of Iskanderûn on the north, is 250 miles, and its breadth averages about 130 miles. Its area may thus be estimated at 32,500 square miles. It lies between lat.  $33^{\circ} 13'$  and  $36^{\circ} 42'$  N., and long.  $35^{\circ} 45'$  and  $38^{\circ}$  E.

III. *Physical Geography*.—Syria, like Palestine, is divided into a series of belts, extending in parallel lines from north to south. (1.) A narrow belt of plain along the seaboard. It embraces the plain of Issus, now Iskanderûn, on the north, extending as far as the bold promontory of Râs el-Khanzlr. South of the promontory is the fertile plain of Seleucia, now Suweidtyeh, at the mouth of the Orontes. Then follows the peak of Casius, which dips into the sea; and from its southern base down to the mouth of the Litâny stretches the plain of Phœnicia, varying in breadth from ten miles at Ladiktyeh to half a mile at Sidon. It is nearly all fertile; and some portions of it at Sidon, Beîrût, and Tripoli are among the richest and most beautiful in Syria. (2.) A belt of mountains, the backbone of the country. It commences with the ridge of Amanus on the north; then follows Bargylus in the centre, and Lebanon on the south. (3.) The great valley of Cœle-Syria, and its northern extension the valley of the Orontes, form the next belt, and constitute one of the most remarkable features of the country. (4.) The mountain-chain of Antilebanon, though broken by the plain of Hamath, finds a natural prolongation in the ridge which rises in the parallel of the city of Hamath and runs northward beyond Aleppo. (5.) Along the whole eastern border from north to south extends an arid plateau, bleak and desolate, the home of the roving Bedawin.

1. *Plains*.—The plains of Phœnicia have already been noticed under that head.

By far the most important part of Syria, and, on the whole, its most striking feature, is the great valley which reaches from the plain of Umk, near Antioch, to the narrow gorge on which the Litâny enters in about lat.  $33^{\circ} 30'$ . This valley, which runs nearly parallel with the Syrian coast, extends the length of 230 miles, and has a width varying from 6 or 8 to 15 or 20 miles. The more southern portion of it was known to the ancients as Cœle-Syria, or "the Hollow Syria," and has already been described. See Cœle-Syria. In length this portion is rather more than 100 miles, terminating with a screen of hills a little south of Hums, at which point the north-eastern direction of the valley also ceases, and it begins to bend to the north-west.

The plain of Hamath is very extensive. It joins Cœle-Syria on the south, and extends northward on both sides of the Orontes as far as Apamea, about seventy miles; while its breadth from the base of Lebanon to the desert is nearly thirty. Its surface is almost perfectly flat, its soil generally a rich black mould; water is abundant. Upon it once stood the large cities of Riblah, Laodicea ad Libanum, Emesa, Arethusa, Larissa, Hamath, and Apamea; all of which, with the exception of Hamath and Emesa (now Hums), are either in ruins or have dwindled down to poor villages.

The plain of Damascus and its continuation towards Haurân on the south are exceedingly fertile. See DAMASCUS.

The little plain of Issus between the mountains and the bay is now a pestilential marsh, on the borders of

which stands the miserable village of Iskanderûn, the only seaport of Antioch and Aleppo.

The plain of Suweidtyeh, at the mouth of the Orontes, is still a lovely spot, in part covered with orchards and mulberry plantations. On its northern border lie the ruins of Seleucia, the port from which Paul embarked on his first missionary journey (Acts xii, 2-4), and once so celebrated for its docks and fortifications (Polybius, bk. v).

2. *Mountains*.—(1.) The parallel ranges of Lebanon and Antilebanon have already been noticed under their own titles. At the southern end of the former is the pass called in Scripture "the entrance of Hamath" (q. v.).

(2.) Beyond this, in a line with Lebanon, rises the range of Bargylus, which extends to Antioch. It is a rugged limestone ridge, rent and torn by wild ravines, thinly peopled, and sparsely covered with oaks. Its elevation is much inferior to Lebanon, and does not average more than 4000 feet. In the parallel of Antioch the chain meets the Orontes, and there sweeps round in a sharp angle to the south-west, and terminates in the lofty peak of Casius (now Jebel Akra), which rises abruptly from the sea to a height of 5700 feet, forming one of the most conspicuous landmarks along the coast of Syria. The Bargylus range has received the name Jebel en-Nusairtyeh, from the mysterious and warlike tribe of Nusairtyeh, who form the great bulk of its inhabitants.

At the northern extremity of the range, on the green bank of the rapid Orontes, stand the crumbling walls and towers of Syria's ancient capital, Antioch (q. v.), now dwindled down to a poor town of some 6000 inhabitants. A few miles west of it, in a secluded mountain glen, are the fountains and ruins of Beîr el-Ma, which mark the site of the once celebrated Daphne (Murray, *Handbook for Syr. and Pal.* p. 602).

(3.) Beyond the valley through which the Orontes breaks narrow and wild, rises steeply another mountain-range, which runs northward till it joins the Taurus, and has an average elevation of nearly 6000 feet. The scenery of this range is very grand—deep ravines shut in by cliffs of naked rock, conical peaks clothed with the dark foliage of the prickly oak, and foaming torrents fringed with dense copses of myrtle and oleander. On the west it sends out the lofty promontory of Râs el-Khanzlr, which shuts in the plain of Suweidtyeh; and farther north the curve of the bay of Iskanderûn sweeps so close to the rocky base of the range as to leave a pass only a few feet broad between the cliff and the sea. Here are the ruins of an ancient arch marking the site of the celebrated Syrian Gates; to the north of it is the battle-field of Issus. The southern section of this range was anciently called Pieria, and gave its distinguishing name to the city (*Seleucia Pieria*) at its base; the northern section was called Amanus. The whole ridge is now usually called Jawar Dagh, though the southern portion is perhaps more commonly known as Râs el-Khanzlr.

(4.) On the eastern bank of the Orontes, near the ruins of Apamea, rises another but much lower range of hills, which runs northward, not in a regularly formed ridge, but rather in detached clumps, to the parallel of Aleppo. The hills are mainly calcareous, well wooded in places, and intersected at intervals by fertile plains and vales. They are interesting to the traveller and antiquarian as containing some of the most remarkable ruins in Syria (Murray, *Handbook*, p. 615 sq.). The southern section is called Jebel Riha, the central Jebel el-'Ala, and the northern Jebel Simân, from its having been the home of St. Simeon Stylites.

3. *The Northern Highlands*.—Northern Syria, especially the district called Commagene, between Taurus and the Euphrates, is still very insufficiently explored. It seems to be altogether an elevated tract, consisting of twisted spurs from Taurus and Amanus, with narrow valleys between them, which open out into bare and

sterile plains. The valleys themselves are not very fertile. They are watered by small streams, producing often abundant fish, and, for the most part, flowing into the Orontes or the Euphrates. A certain number of the more central ones, however, unite and constitute the "river of Aleppo," which, unable to reach either of the oceanic streams, forms (as we have seen) a lake or marsh, wherein its waters evaporate. Along the course of the Euphrates there are rich land and abundant vegetation; but the character of the country thence to the valley of the Orontes is bare and woodless, except in the vicinity of the towns, where fruit-trees are cultivated, and orchards and gardens make an agreeable appearance. Most of this region is a mere sheep-walk, which grows more and more harsh and repulsive as we approach the south, where it gradually mingles with the desert. The highest elevation of the plateau between the two rivers is 1500 feet; and this height is reached soon after leaving the Euphrates, while towards the west the decline is gradual.

4. *The Eastern Desert.*—East of the inner mountain-chain, and south of the cultivable ground about Aleppo, is the great Syrian desert, an "elevated dry upland, for the most part of gypsum and marls, producing nothing but a few spare bushes of wormwood, and the usual aromatic plants of the wilderness." Here and there bare and stony ridges of no great height cross this arid region, but fail to draw water from the sky, and have, consequently, no streams flowing from them. A few wells supply the nomad population with a brackish fluid. The region is traversed with difficulty, and has never been accurately surveyed. The most remarkable oasis is at Palmyra, where there are several small streams and abundant palm-trees. See *TADMOR*. Towards the more western part of the region along the foot of the mountain-range which there bounds it, is likewise a good deal of tolerably fertile country, watered by the streams which flow eastward from the range, and after a longer or a shorter course are lost in the desert. The best-known and the most productive of these tracts, which seem stolen from the desert, is the famous plain of Damascus—the el-Ghutah and el-Merj of the Arabs—already described in the account given of that city. See *DAMASCUS*. No rival to this "earthly paradise" is to be found along the rest of the chain, since no other stream flows down from it at all comparable to the Barada; but wherever the eastern side of the chain has been visited, a certain amount of cultivable territory has been found at its foot; corn is grown in places, and olive-trees are abundant (Burckhardt, *Travels in Syria*, p. 124-129; Pococke, *Description of the East*, ii, 146). Farther from the hills, all is bare and repulsive—a dry, hard desert like that of the Sinaitic peninsula, with a soil of marl and gravel, only rarely diversified with sand.

5. *Rivers.*—(1.) The Orontes is the largest river in Syria. It is now called el-'Asy ("The Rebellious"), and also el-Maklûb ("The Inverted"), from the fact of its running, as is thought, in a wrong direction. Its highest source is in the plain of Bukâ'a (Cœle-Syria), at the base of Antilebanon, beside the ruins of the ancient city of Lybo. It runs north-west across the plain to the foot of Lebanon, where its volume is more than trebled by the great fountain of Ain el-'Asy. Hence it winds along the plain of Hamath, passing Riblah, Hums, Hamath, and Apamea. At Antioch it sweeps round to the west through a magnificent pass, and falls into the Mediterranean at Seleucia. Its scenery is in general tame and uninteresting. Its volume above Hamath is less than that of the Jordan, but lower down it receives several tributaries which greatly increase it. Its total length is about 154 miles.

(2.) The Litâny is the next river in magnitude. Its principal sources are in the valley of Bukâ'a, at Baalbek, Zahleh, and Anjar (the ancient Chalcis). After winding down the Bukâ'a to its southern end, it forces its way through a sublime glen, which completely inter-

sects Lebanon, and falls into the sea a few miles north of Tyre.

(4.) The rivers Eleutherus, Lycus, and Adonis have been noticed in the article *LEBANON*, and the Abana and Pharpar under *DAMASCUS*.

(5.) A small stream called Nahr Koweik rises near the village of Aintab, flows southward through a narrow glen to Aleppo, waters the town and its gardens, and empties itself in winter into a marsh some twenty miles farther south. It seems to be the Chalus of Xenophon (*Anab.* i, 4, 9).

(6.) The Sajur rises a little farther to the north, in the mountains north of Aintab. Its course for the first twenty-five miles is south-east, after which it runs east for fifteen or twenty miles, finally resuming its first direction, and flowing by the town of Sajur into the Euphrates. It is a larger river than the Koweik, though its course is scarcely so long.

6. *Lakes.*—There are only two lakes of any importance in Syria.

(1.) One lies some miles north of Antioch, and is called Bahr el-Abiad, "White Lake." It is about twenty-five miles in circuit, but has a broad margin of marsh, which is flooded after heavy rains.

(2.) The other lake is on the Orontee, west of Hums, and is called Bahr Kades. It is about six miles long by from two to three broad, and is in a great measure, if not entirely, artificial. It is formed by a dam built across the valley. The water is thus raised to an elevation sufficient to supply the town and irrigate the surrounding plain (Porter, *Damascus*, ii, 344).

(3.) The Sabakhah is a salt lake, into which only insignificant streams flow, and which has no outlet. It lies midway between Balis and Aleppo, the route between these places passing along its northern shore. It is longer than the Lake of Antioch, but narrower, being about thirteen miles from east to west, and four miles only from north to south, even where it is widest.

(4.) The Bahr el-Merj, like the piece of water in which the Koweik, or river of Aleppo, ends, scarcely deserves to be called a lake, since it is little better than a large marsh. The length, according to colonel Chesney, is nine miles, and the breadth two miles (*Euphrat. Exp.* i, 503); but the size seems to vary with the seasons, and with the extent to which irrigation is used along the course of the Barada. A recent traveller, who traced the Barada to its termination, found it divide a few miles below Damascus, and observed that each branch terminated in a marsh of its own; while a neighboring stream, the Awaj, commonly regarded as a tributary of the Barada, also lost itself in a third marsh separate from the other two (Porter, in *Geograph. Journ.* xxvi, 43-46).

7. *Cities.*—The principal cities and towns of Syria are the following: Damascus, pop. 150,000; Aleppo, pop. 70,000; Beirût, pop. 80,000; Hamath, pop. 30,000; Hums, pop. 20,000; Tripoli, pop. 13,000; Antioch, Sidon, and Ladiklyeh. Besides these, which occupy ancient sites, there were in former times Palmyra, in the eastern desert; Abila, on the river Abana; Chalcis, Heliopolis, and Lybo, in the valley of Cœle-Syria; Laodicea ad Libanum, Arethusa, and Apamea, in the valley of the Orontes; Seleucia, Aradus, and Byblos [see *GEBAL*], on the sea-coast, and many others of less importance.

IV. *Political Geography.*—Syria has passed through many changes. Its ancient divisions were numerous, and constantly varying. The provinces of the Biblical Aram have already been noticed. See *ARAM*. Phœnicia was generally regarded as a distinct principality [see *PHœNICIA*], and the warlike tribes of Lebanon appear to have remained almost in a state of independence from the earliest ages. See *LEBANON*. The political divisions, as enumerated by Greek and Roman geographers, are indefinite and almost unintelligible. Strabo mentions five great provinces: 1. *Commagene*, a small territory in the extreme north, with Samosata for capital, situated on the Euphrates. 2. *Seleucia*, lying south

of the former, was subdivided into four districts according to the number of its chief cities: (1) Antioch Epiphane; (2) Seleucia, in Pieria; (3) Apamea; and (4) Laodicea. In the district of Antioch was another subdivision, situated near the Euphrates, and called Cyrrhæstia, from the town Cyrrhæstia, which contained a celebrated temple of Diana. Southward were two subdivisions (apparently) of Apamea, called Parapotamia and Chalcidice, bordering on the Euphrates, and inhabited by Scenitæ. The territory of Laodicea extended south to the river Eleutherus, where it bordered on Phœnicæ and Cœle-Syria. 3. *Cœle-Syria*, comprising Laodicea ad Libanum, Chalcis, Abilene, Damascus, Iturea, and others farther south, included in Palestine. 4. *Phœnicia*. 5. *Judea* (*Geogr.* xvi, 748 sq.).

Pliny's divisions are still more numerous than those of Strabo. It appears that each city on rising to importance gave its name to a surrounding territory, larger or smaller, and this in time assumed the rank of a province (Pliny, *H. N.* v, 14-21).

Ptolemy mentions thirteen provinces: Commagene, Pieria, Cyrrhæstia, Seleucia, Casiotis, Chalibonitis, Chalcis, Apamene, Laodicene, Phœnicia, Cœle-Syria, Palmyrene, and Bataanea, and he gives a long list of the cities contained in them. He excludes Palestine altogether (*Geogr.* v, 15).

Under the Romans Syria became a province of the empire. Some portions of it were permitted to remain for a time under the rule of petty princes, dependent on the imperial government. Gradually, however, all these were incorporated, and Antioch was the capital. Under Hadrian the province was divided into two parts: *Syria Major* on the north, and *Syria-Phœnicæ* on the south. Towards the close of the 4th century another partition of Syria was made, and formed the basis of its ecclesiastical government: 1. *Syria Prima*, with Antioch as capital; 2. *S. Secunda*, with Apamea as capital; 3. *Phœnicia Prima*, including the greater part of ancient Phœnicia—Tyre was its capital; 4. *Phœnicia Secunda*, also called *Phœnicia ad Libanum*, with Damascus for capital ("Car. a St. Paul," *Geog. Sac.* p. 287).

At the present time Syria forms a portion of three pashalics—Aleppo, Damascus, and Sidon.

V. *Climate, Inhabitants, etc.*—1. The temperature of Syria greatly resembles that of Palestine. The summits of Hermon and Lebanon are crowned with perpetual snow, and the high altitudes along these ranges are as cool as the south of England; but, on the other hand, the low marshy plains of the interior are very hot. The seaboard, being much exposed to the sun's rays, and sheltered by the mountains behind, is generally sultry and subject to fevers; but there are a few places—such as Sidon, Beirût, and Suweidîyeh—where the soil is dry and the air pure. Rain is more abundant than in Palestine, and even during summer light showers occasionally fall in the mountains.

2. The present population of Syria is estimated at 1,880,000. Arabic is their vernacular. They consist of Mohammedans, Yezidees, Druses, Romanists, Jews, and Greek Christians. The Mohammedans, who probably comprise three fourths of the whole, are seldom associated with the progress of arts or industry, and, though possessing the influence which belongs to the ruling authorities, are rarely instrumental in the creation of capital or the diffusion of civilization. Most of the commercial establishments are either in the hands of the Christian or Jewish population. The agricultural produce of Syria is far less than might be expected from the extensive tracts of fertile lands and the favorable state of the climate. Regions of the highest fertility remain fallow, and the want of population for the purposes of cultivation is most deplorable. The commerce of Syria is in an equally low state. Volney but faithfully depicted Syria when he described it as "a land of almost unparalleled natural resources, comprising within its limits every estimable variety of climate and of soil." Yet Syria, under the execrable Mus-

solman rule, is almost the lowest in the scale of nations; but even in the present state of things she produces silk, cotton, and wool—three staple articles of demand. A change has been brought about during the last few years in the external features of Oriental dress, and in Syria more especially, which, with the decline of their own manufactures, has tended to introduce the cheaper fabrics of Europe. The issue of the recent Turko-Russian war has been to place Syria under the nominal protectorate of Great Britain, with promises of social reform, which, however, the Turks are slow in bringing about. See TURKEY.

VI. *History*.—1. The first occupants of Syria appear to have been of Hamitic descent. The Canaanitish races, the Hittites, Jebusites, Amorites, etc., are connected in Scripture with Egypt and Ethiopia, Cush and Mizraim (*Gen.* x, 6, 15-18); and, even independently of the evidence, there seems to be sufficient reason for believing that the races in question stood in close ethnic connection with the Cushitic stock (Rawlinson, *Herod.* iv, 243-245). These tribes occupied not Palestine only, but also Lower Syria, in very early times, as we may gather from the fact that Hamath is assigned to them in *Genesis* (x, 18). Afterwards they seem to have become possessed of Upper Syria also, for when the Assyrians first push their conquests beyond the Euphrates, they find the Hittites (*Khatti*) established in strength on the right bank of the great river. After a while the first comers, who were still to a great extent nomads, received a Shemitic infusion, which most probably came to them from the south-east. The family of Abraham, whose original domicile was in Lower Babylonia, may, perhaps, be best regarded as furnishing us with a specimen of the migratory movements of the period. Another example is that of Chedorlaomer with his confederate kings, of whom one at least—Amraphel—must have been a Shemite. The movement may have begun before the time of Abraham, and hence, perhaps, the Shemitic names of many of the inhabitants when Abraham first comes into the country, as Abimelech, Melchizedek, Eliezer, etc. The only Syrian town whose existence we find distinctly marked at this time is Damascus (*Gen.* xiv, 15; xv, 2), which appears to have been already a place of some importance. Indeed, in one tradition Abraham is said to have been king of Damascus for a time (*Nic. Dam. Fragm.* 30); but this is quite unworthy of credit. Next to Damascus must be placed Hamath, which is mentioned by Moses as a well-known place (*Numb.* xiii, 21; xxxiv, 8), and appears in Egyptian papyri of the time of the eighteenth dynasty (*Cambridge Essays*, 1858, p. 268). Syria at this time, and for many centuries afterwards, seems to have been broken up among a number of petty kingdoms. Several of these are mentioned in Scripture, as Damascus, Rehob, Maachah, Zobah, Geshur, etc. We also hear occasionally of "the kings of Syria and of the Hittites" (1 Kings x, 29; 2 Kings vii, 6)—an expression indicative of that extensive subdivision of the tract among numerous petty chiefs which is exhibited to us very clearly in the early Assyrian inscriptions. At various times different states had the pre-eminence, but none was ever strong enough to establish an authority over the others.

2. The Jews first come into hostile contact with the Syrians, under that name, in the time of David. The wars of Joshua, however, must have often been with Syrian chiefs, with whom he disputed the possession of the tract about Lebanon and Hermon (*Josh.* xi, 2-18). After his time the Syrians were apparently undisturbed, until David began his aggressive wars upon them. Claiming the frontier of the Euphrates, which God had promised to Abraham (*Gen.* xv, 18); David made war on Hadadezer, king of Zobah, whom he defeated in a great battle, killing 18,000 of his men, and taking from him 1000 chariots, 700 horsemen, and 20,000 footmen (2 Sam. viii, 3, 4, 13). The Damascene Syrians, having endeavored to succor their kinsmen, were likewise de-

feated with great loss (ver. 5); and the blow so weakened them that they shortly afterwards submitted and became David's subjects (ver. 6). Zobah, however, was far from being subdued as yet. When, a few years later, the Ammonites determined on engaging in a war with David, and applied to the Syrians for aid, Zobah, together with Beth-Rehob, sent them 20,000 footmen, and two other Syrian kingdoms furnished 13,000 (x, 6). This army being completely defeated by Joab, Hadadezer obtained aid from Mesopotamia (ver. 16), and tried the chance of a third battle, which likewise went against him, and produced the general submission of Syria to the Jewish monarch. The submission thus begun continued under the reign of Solomon, who "reigned over all the kingdoms from the river [Euphrates] unto the land of the Philistines and unto the border of Egypt; they brought presents and served Solomon all the days of his life" (1 Kings iv, 21). The only part of Syria which Solomon lost seems to have been Damascus, where an independent kingdom was set up by Rezon, a native of Zobah (xi, 23-25). On the separation of the two kingdoms, soon after the accession of Rehoboam, the remainder of Syria no doubt shook off the yoke. Damascus now became decidedly the leading state, Hamath being second to it, and the northern Hittites, whose capital was Carchemish, near Bambuk, third. See CARCHEMISH. The wars of this period fall most properly into the history of Damascus, and have already been described in the account given of that city. See DAMASCUS. Their result was to attach Syria to the great Assyrian empire, from which it passed to the Babylonians, after a short attempt on the part of Egypt to hold possession of it, which was frustrated by Nebuchadnezzar. From the Babylonians Syria passed to the Persians, under whom it formed a satrapy in conjunction with Judæa, Phœnicia, and Cyprus (Herod. iii, 91). Its resources were still great, and probably it was his confidence in them that encouraged the Syrian satrap Megabazus to raise the standard of revolt against Artaxerxes Longimanus (B.C. 447). After this we hear little of Syria till the year of the battle of Issus (B.C. 333), when it submitted to Alexander without a struggle.

3. Upon the death of Alexander, Syria became, for the first time, the head of a great kingdom. On the division of the provinces among his generals (B.C. 321), Seleucus Nicator received Mesopotamia and Syria, and though, in the twenty years of struggle which followed, this country was lost and won repeatedly, it remained finally, with the exception of Cœle-Syria, in the hands of the prince to whom it was originally assigned. That prince, whose dominions reached from the Mediterranean to the Indus, and from the Oxus to the Southern Ocean, having, as he believed, been exposed to great dangers on account of the distance from Greece of his original capital, Babylon, resolved, immediately upon his victory of Ipsus (B.C. 301), to fix his metropolis in the West, and settled upon Syria as the fittest place for it. Antioch was begun in B.C. 300, and, being finished in a few years, was made the capital of Seleucus's kingdom. The whole realm was thenceforth ruled from this centre, and Syria, which had long been the prey of stronger countries, and had been exhausted by their exactions, grew rich with the wealth which now flowed into it on all sides. The luxury and magnificence of Antioch were extraordinary. Broad straight streets, with colonnades from end to end, temples, statues, arches, bridges, a royal palace, and various other public buildings dispersed throughout it made the Syrian capital by far the most splendid of all the cities of the East. At the same time, in the provinces, other towns of large size were growing up. Seleucia in Pieria, Apamea, and both Laodiceæ were foundations of the Seleucidæ, as their names sufficiently indicate. Weak and indolent as were many of these monarchs, it would seem that they had a hereditary taste for building; and so each aimed at outdoing his predecessors in the number, beauty, and magnificence

of his constructions. As the history of Syria under the Seleucid princes has been already given in detail in the articles treating of each monarch [see ANTIOCHUS; DEMETRIUS; SELEUCUS, etc.], it will be unnecessary here to do more than sum it up generally. The most flourishing period was the reign of the founder, Nicator. The empire was then almost as large as that of the Achæmenian Persians, for it at one time included Asia Minor, and thus reached from the Ægean to India. It was organized into satrapies, of which the number was seventy-two. Trade flourished greatly, old lines of traffic being restored and new ones opened. The reign of Nicator's son, Antiochus I, called Soter, was the beginning of the decline, which was progressive from his date with only one or two slight interruptions. Soter lost territory to the kingdom of Pergamus, and failed in an attempt to subject Bithynia. He was also unsuccessful against Egypt. Under his son, Antiochus II, called Θεός, or "the God," who ascended the throne in B.C. 261, the disintegration of the empire proceeded more rapidly. The revolt of Parthia in B.C. 256, followed by that of Bactria in B.C. 254, deprived the Syrian kingdom of some of its best provinces, and gave it a new enemy which shortly became a rival and finally a superior. At the same time, the war with Egypt was prosecuted without either advantage or glory. Fresh losses were suffered in the reign of Seleucus II (Callinicus), Antiochus II's successor. While Callinicus was engaged in Egypt against Ptolemy Euergetes, Eumenes of Pergamus obtained possession of a great part of Asia Minor (B.C. 242); and about the same time Arsaces II, king of Parthia, conquered Hyrcania and annexed it to his dominions. An attempt to recover this latter province cost Callinicus his crown, as he was defeated and made prisoner by the Parthians (B.C. 226). In the next reign, that of Seleucus III (Ceraunus), a slight reaction set in. Most of Asia Minor was recovered for Ceraunus by his wife's nephew, Achæus (B.C. 224), and he was preparing to invade Pergamus when he died poisoned. His successor and brother, Antiochus III, though he gained the surname of Great from the grandeur of his expeditions and the partial success of some of them, can scarcely be said to have really done anything towards raising the empire from its declining condition, since his conquests on the side of Egypt, consisting of Cœle-Syria, Phœnicia, and Palestine, formed no sufficient compensation for the loss of Asia Minor, which he was forced to cede to Rome for the aggrandizement of the rival kingdom of Pergamus (B.C. 190). Even had the territorial balance been kept more even, the ill policy of making Rome an enemy of the Syrian kingdom, with which Antiochus the Great is taxable, would have necessitated our placing him among the princes to whom its ultimate ruin was mainly owing. Towards the east, indeed, he did something, if not to thrust back the Parthians, at any rate to protect his empire from their aggressions. But the exhaustion consequent upon his constant wars and signal defeats—more especially those of Raphia and Magnesia—left Syria far more feeble at his death than she had been at any former period. The almost eventless reign of Seleucus IV (Philopator), his son and successor (B.C. 187-175), is sufficient proof of this feebleness. It was not till twenty years of peace had recruited the resources of Syria in men and money that Antiochus IV (Epiphanes), brother of Philopator, ventured on engaging in a great war (B.C. 171)—a war for the conquest of Egypt. At first it seemed as if the attempt would succeed. Egypt was on the point of yielding to her foe of so many years, when Rome, following out her traditions of hostility to Syrian power and influence, interposed her mediation, and deprived Epiphanes of all the fruits of his victories (B.C. 168). A greater injury was about the same time (B.C. 167) inflicted on Syria by the folly of Epiphanes himself. Not content with replenishing his treasury by the plunder of the Jewish Temple, he madly ordered the desecration of the Holy of Holies, and thus caused the

revolt of the Jews, which proved a permanent loss to the empire and an aggravation of its weakness. After the death of Epiphanes the empire rapidly verged to its fall. The regal power fell into the hands of an infant, Antiochus V (Eupator), son of Epiphanes (B.C. 164); the nobles contended for the regency; a pretender to the crown started up in the person of Demetrius, son of Seleucus IV; Rome put in a claim to administer the government; and amid the troubles thus caused the Parthians, under Mithridates I, overran the eastern provinces (B.C. 164), conquered Media, Persia, Susiana, Babylonia, etc., and advanced their frontier to the Euphrates. It was in vain that Demetrius II (Nicator) made an attempt (B.C. 142) to recover the lost territory; his boldness cost him his liberty; while a similar attempt on the part of his successor, Antiochus VII (Sidetes), cost that monarch his life (B.C. 128). Meanwhile, in the shorn Syrian kingdom, disorders of every kind were on the increase; Commagene revolted and established her independence; civil wars, murders, mutinies of the troops, rapidly succeeded one another; the despised Jews were called in by both sides in the various struggles; and Syria, in the space of about ninety years, from B.C. 154 to B.C. 64, had no fewer than ten sovereigns. All the wealth of the country had been by this time dissipated—much had flowed Romewards in the shape of bribes; more, probably, had been spent on the wars; and still more had been wasted by the kings in luxury of every kind. Under these circumstances, the Romans showed no eagerness to occupy the exhausted region, which passed under the power of Tigranes, king of Armenia, in B.C. 83, and was not made a province of the Roman Empire till after Pompey's complete defeat of Mithridates and his ally Tigranes in B.C. 64.

The chronology of this period has been well worked out by Clinton (*Fast. Hell.* iii, 308-346), from whom the following table of the kings, with the dates of their accession, is taken:

Kings.	Length of Reign.	Date of Accession.
1. Seleucus Nicator.....	32 years.	Oct. 312
2. Antiochus Soter.....	19 "	Jan. 280
3. Antiochus Theos.....	15 "	Jan. 261
4. Seleucus Callinicus.....	20 "	Jan. 246
5. Seleucus Ceraunus.....	3 "	Aug. 226
6. Antiochus Magnus.....	36 "	Aug. 223
7. Seleucus Philopator.....	12 "	Oct. 187
8. Antiochus Epiphanes.....	11 "	Aug. 175
9. Antiochus Eupator.....	2 "	Dec. 164
10. Demetrius Soter.....	12 "	Nov. 162
11. Alexander Bala.....	5 "	Aug. 150
12. Demetrius Nicator (1st reign).....	9 "	Nov. 146
13. Antiochus Sidetes.....	9 "	Feb. 137
14. Demetrius Nicator (2d reign).....	3 "	Feb. 128
15. Antiochus Grypus.....	13 "	Aug. 125
16. Antiochus Cyzenicus.....	18 "	113
17. Antiochus Eusebes and Philippus.....	12 "	95
18. Tigranes.....	14 "	83
19. Antiochus Asiaticus.....	4 "	69

4. As Syria holds an important place, not only in the Old Test., but in the New, some account of its condition under the Romans must now be given. That condition was somewhat peculiar. While the country generally was formed into a Roman province, under governors who were at first prætors or questors, then proconsuls, and finally legates, there were exempted from the direct rule of the governor, in the first place, a number of "free cities," which retained the administration of their own affairs, subject to a tribute levied according to the Roman principles of taxation; and, secondly, a number of tracts which were assigned to petty princes, commonly natives, to be ruled at their pleasure, subject to the same obligations with the free cities as to taxation (Appian, *Syr.* 50). The free cities were Antioch, Seleucia, Apamea, Epiphaneia, Tripolis, Sidon, and Tyre; the principalities, Commagene, Chalcis ad Belum (near Baalbek), Arethusa, Abila or Abilene, Palmyra, and Damascus. The principalities were sometimes called kingdoms, sometimes tetrarchies. They were established where it was

thought that the natives were so inveterately wedded to their own customs, and so well disposed for revolt, that it was necessary to consult their feelings, to flatter the national vanity, and to give them the semblance without the substance of freedom. (a.) Commagene was a kingdom (*regnum*). It had broken off from Syria during the later troubles, and become a separate state under the government of a branch of the Seleucidae, who affected the names of Antiochus and Mithridates. The Romans allowed this condition of things to continue till A.D. 17, when, upon the death of Antiochus III, they made Commagene into a province; in which condition it continued till A.D. 38, when Caligula gave the crown to Antiochus IV (Epiphanes), the son of Antiochus III. Antiochus IV continued king till A.D. 72, when he was deposed by Vespasian, and Commagene was finally absorbed into the empire. He had a son, called also Antiochus and Epiphanes, who was betrothed to Drusilla, the sister of "king Agrippa," and afterwards the wife of Felix, the procurator of Judæa. (b.) Chalcis "ad Belum" was not the city so called near Aleppo, which gave name to the district of Chalcidice, but a town of less importance near Heliopolis (Baalbek), whence probably the suffix "ad Belum." It is mentioned in this connection by Strabo (xvi, 2, 10), and Josephus says that it was under Lebanon (*Ant.* xiv, 7, 4), so that there cannot be much doubt as to its position. It must have been in the "Hollow Syria"—the modern Buk'ā'a—to the south of Baalbek (Josephus, *War.* i, 9, 2), and therefore probably at Anjar, where there are large ruins (Robinson, *Bibl. Res.* iii, 496, 497). This, too, was generally, or perhaps always, a "kingdom." Pompey found it under a certain Ptolemy, "the son of Mennæus," and allowed him to retain possession of it, together with certain adjacent districts. From him it passed to his son, Lysanias, who was put to death by Antony at the instigation of Cleopatra (about B.C. 34), after which we find its revenues farmed by Lysanias's steward, Zenodorus, the royalty being in abeyance (Josephus, *Ant.* xv, 10, 1). In B.C. 22 Chalcis was added by Augustus to the dominions of Herod the Great, at whose death it probably passed to his son Philip (*ibid.* xvii, 11, 4). Philip died A.D. 34; and then we lose sight of Chalcis, until Claudius, in his first year (A.D. 41), bestowed it on a Herod, the brother of Herod Agrippa I, still as a "kingdom." From this Herod it passed (A.D. 49) to his nephew, Herod Agrippa II, who held it only three or four years, being promoted from it to a better government (*ibid.* xx, 7, 1). Chalcis then fell to Agrippa's cousin, Aristobulus, son of the first Herodian king, under whom it remained till A.D. 73 (Josephus, *War.* vii, 7, 1). About this time, or soon after, it ceased to be a distinct government, being finally absorbed into the Roman province of Syria. (c.) Arethusa (now Restun) was for a time separated from Syria, and governed by phylarchs. The city lay on the right bank of the Orontes, between Hamah and Hums, rather nearer to the former. In the government were included the Emiseni, or people of Hums (Emesa), so that we may regard it as comprising the Orontes valley from the Jebel Erbayn, at least as high as the Bahr el-Kades, or Baheiret-Hums, the lake of Hums. Only two governors are known—Sampsiceramus, and Jamblichus, his son (Strabo, xvi, 2, 10). Probably this principality was one of the first absorbed. (d.) Abilene, so called from its capital Abila, was a "tetrarchy." It was situated to the east of Antilibanus, on the route between Baalbek and Damascus (*itin. Ant.*). Ruins and inscriptions mark the site of the capital (Robinson, *Bibl. Res.* iii, 479-482), which was at the village called el-Sûk, on the river Barada, just where it breaks forth from the mountains. The limits of the territory are uncertain. We first hear of this tetrarchy in Luke's gospel (iii, 1), where it is said to have been in the possession of a certain Lysanias at the commencement of John's ministry, which was probably A.D. 25. Of this Lysanias nothing more is known; he certainly cannot be the Lysanias who once held Chalcis, since that Lysanias died above sixty years previous-

ly. Thirteen years after the date mentioned by Luke (A.D. 38), the heir of Caligula bestowed "the tetrarchy of Lysanias," by which Abilene is no doubt intended, on the elder Agrippa (Josephus, *Ant.* xviii, 6, 10), and four years later Claudius confirmed the same price in the possession of the "Abila of Lysanias" (*ibid.* xix, 5, 1). Finally, in A.D. 53, Claudius, among other grants, conferred on the younger Agrippa "Abila, which had been the tetrarchy of Lysanias" (*ibid.* xx, 7, 1). Abila was taken by Placidus, one of the generals of Vespasian, in B.C. 69 (Josephus, *War*, iv, 7, 6), and thenceforth was annexed to Syria. (c.) Palmyra appears to have occupied a different position from the rest of the Syrian principalities. It was in no sense dependent upon Rome (Pliny, *H. N.* v, 25), but, relying on its position, claimed and exercised the right of self-government from the breaking-up of the Syrian kingdom to the reign of Trajan. Antony made an attempt against it in B.C. 41, but failed. It was not till Trajan's successes against the Parthians, between A.D. 114 and A.D. 116, that Palmyra was added to the empire. (f.) Damascus is the last of the principalities which it is necessary to notice here. It appears to have been left by Pompey in the hands of an Arabian prince, Aretas, who, however, was to pay a tribute for it, and to allow the Romans to occupy it at their pleasure with a garrison (Josephus, *Ant.* xiv, 4, 5; 5, 1; 11, 7). This state of things continued most likely to the settlement of the empire by Augustus, when Damascus was attached to the province of Syria. During the rest of Augustus's reign, and during the entire reign of Tiberius, this arrangement was in force; but it seems probable that Caligula, on his accession, separated Damascus from Syria and gave it to another Aretas, who was king of Petra, and a relation (son?) of the former. See ARETAS. Hence the fact noted by Paul (2 Cor. xi, 32), that at the time of his conversion Damascus was held by an "ethnarch of king Aretas." The semi-independence of Damascus is thought to have continued through the reigns of Caligula and Claudius (from A.D. 37 to A.D. 54), but to have come to an end under Nero, when the district was probably reattached to Syria.

The list of the governors of Syria, from its conquest by the Romans to the destruction of Jerusalem, has been made out with a near approach to accuracy, and is as shown in the adjoining table.

The general history of Syria during this period may be summed up in a few words. Down to the battle of Pharsalia, Syria was fairly tranquil, the only troubles being with the Arabs, who occasionally attacked the eastern frontier. The Roman governors labored hard to raise the condition of the province, taking great pains to restore the cities, which had gone to decay under the later Seleucidæ. Gabinus, proconsul in the years B.C. 56 and 55, made himself particularly conspicuous in works of this kind. After Pharsalia (B.C. 46) the troubles of Syria were renewed. Julius Cæsar gave the province to his relative Sextus in B.C. 47; but Pompey's party was still so strong in the East that in the next year one of his adherents, Cæcilius Bassus, put Sextus to death, and established himself in the government so firmly that he was able to resist for three years three proconsuls appointed by the Senate to dispossess him, and only finally yielded upon terms which he himself offered to his antagonists. Many of the petty princes of Syria sided with him, and some of the nomadic Arabs took his pay and fought under his banner (Strabo, xvi, 2, 10). Bassus had but just made his submission, when, upon the assassination of Cæsar, Syria was disputed between Cassius and Dolabella, the friend of Antony, a dispute terminated by the suicide of Dolabella, B.C. 43, at Laodicea, where he was besieged by Cassius. The next year Cassius left his province and went to Philippi, where, after the first unsuccessful engagement, he, too, committed suicide. Syria then fell to Antony, who appointed as his legate L. Decidius Saxa, in B.C. 41. The troubles of the empire now tempted

the Parthians to seek a further extension of their dominions at the expense of Rome, and Pacorus, the crown-prince, son of Arsaces XIV, assisted by the Roman refugee Labienus, overran Syria and Asia Minor, defeating Antony's generals, and threatening Rome with the loss of all her Asiatic possessions (B.C. 40-39). Ventidius, however, in B.C. 38, defeated the Parthians, slew Pacorus, and recovered for Rome her former boundary. A quiet time followed. From B.C. 38 to B.C. 31 Syria was governed peaceably by the legates of Antony, and, after his defeat at Actium and death at Alexandria in that year, by those of Augustus. In B.C. 27 took place that formal division of the provinces between Augustus and the Senate from which the imperial administrative system dates; and Syria, being from its exposed situation among the *provincia principis*, continued to be ruled by legates, who were of consular rank (*consulares*), and bore severally the full title of "Legatus Augusti pro prætore." During the whole of this period the province enlarged or contracted its limits according as it pleased the reigning emperor to bestow tracts of land on the native princes, or to resume them and place them under his legate. Judæa, when attached in this way to Syria, occupied a peculiar position. Partly, perhaps, on account of its remoteness from the Syrian capital, Antioch, partly, no doubt, because of the peculiar character of its people, it was thought best to make it, in a certain sense, a separate government. A special procurator was therefore appointed to rule it, who was subordinate to the governor of Syria, but within his own province had the power of a legatus. See JUDÆA. Syria continued without serious disturbance from the expulsion of the Parthians (B.C. 38) to the breaking-out of the Jewish war (A.D. 66). In B.C. 19 it was visited by Augustus, and in A.D. 18-19 by Germanicus, who died at Antioch in the last-named year. In A.D. 44-47 it was the scene of a severe famine. See AGABUS.

\* Called "Vinidius" by Tacitus.

5. A little earlier Christianity had begun to spread into it, partly by means of those who "were scattered" at the time of Stephen's persecution (Acts xi, 19), partly by the exertions of Paul (Gal. i, 21). The Syrian Church soon grew to be one of the most flourishing (Acts xiii, 1; xv, 23, 35, 41, etc.). Here the name of "Christian" first arose—at the outset no doubt a gibe, but thenceforth a glory and a boast. Antioch, the capital, became, as early probably as A.D. 44, the see of a bishop, and was soon recognised as a patriarchate. The Syrian Church is accused of laxity both in faith and morals (Newman, *Arians*, p. 10); but, if it must admit the disgrace of having given birth to Lucian and Paul of Samosata, it can claim, on the other hand, the glory of such names as Ignatius, Theophilus, Ephraem, and Babylas. It suffered many grievous persecutions without shrinking; and it helped to make that emphatic protest against worldliness and luxuriousness of living at which monasticism, according to its original conception, must be considered to have aimed. The Syrian monks were among the most earnest and most self-denying; and the names of Hilarion and Simeon Stylites are enough to prove that a most important part was played by Syria in the ascetic movement of the 4th and 5th centuries.

6. The country remained under Roman and Byzantine rule till A.D. 634, when it was overrun by the Mohammedans under Khaled. Sixteen years later Damascus was made the capital of the Mohammedan empire. In the 11th century the Crusaders entered it, captured its principal cities, with the exception of Damascus, and retained possession of them about a hundred years. For more than two centuries after the expulsion of the Crusaders, Syria was the theatre of fierce contests between the warlike hordes of Tartary and the Mameluke rulers of Egypt. At length, in A.D. 1517, it was captured by the Turks under sultan Selim I, and became a portion of the Ottoman empire.

In 1798 Bonaparte landed in Egypt with a powerful army, and, having subjected that country to the arms of France, marched into Syria, affecting the utmost respect for the Mohammedan doctrine and worship, and claiming a divine commission as regenerator of the East. He laid siege to Acre; but, the Turkish garrison being animated by the presence of 300 British sailors under sir Sidney Smith, at the expiration of sixty days the French general was compelled to retire, after the sacrifice of a large number of his most gallant soldiers. A powerful army of Turks, who had advanced from Damascus to raise the siege of Acre, were next attacked by Napoleon at the base of Mount Tabor, and routed with great slaughter, thousands being driven into the Jordan. Jaffa (Joppa) fell into his hands, and, contrary to the usages of war, 1200 prisoners were shot or despatched with the bayonet. But the French campaign in Syria was of short duration. On June 15, 1799, the army under Bonaparte arrived at Cairo, having traversed the Great Desert; and after the battle of Aboukir, in the following month, when 18,000 Turks perished on the field, the general deputed the command to Kleber, and sailed for France.

Syria remained under the Turks till 1830, when Mohammed Ali, pasha of Egypt, declaring war with his sovereign, the sultan, sent an army into Palestine, under the command of his son Ibrahim, which speedily captured Acre, Tripoli, Aleppo, and Damascus, and, defeating the Turks in various battles, crossed the Taurus, and prepared to march on Constantinople itself. The sultan was obliged to invoke the aid of Russia against the conqueror of Syria; and 20,000 Russians, under count Orloff, hastily landed on the Asiatic territory, encamping between Ibrahim and the Bosphorus. The sultan then entered into negotiation with the Egyptian general, and solemnly confirmed to Mohammed Ali the viceroyalty of the whole territory from Adana, on the frontiers of Asia Minor, to the Nile. The Syrians soon discovered that their new masters were not a whit less

rapacious than the Turks, and several insurrections took place in Mount Lebanon and various districts of Syria in 1834. The presence of Mohammed Ali himself, with large reinforcements, suppressed for a moment the spirit of disaffection, and in the following year the Druses and Christians of Lebanon were disarmed. Ground down, however, by the utmost tyranny, the Syrians again revolted in 1837; they were chastised by Ibrahim, and again reduced to subjection. In 1840, in consequence of a treaty between England, Russia, Austria, and Prussia, the seaport towns of Syria were bombarded by a British squadron; and, the Egyptians being compelled to evacuate the whole of Syria, the supremacy of the Turks was once more established over the country, which they have ever since held.

SYRIA, MISSIONS IN. The origin of the Syrian mission dates back as far as 1823. When the two American missionaries Bird and Goodell arrived in that year, the civil and the social condition of Jerusalem and Palestine were such that these gentlemen were advised to make Beirut the centre of their operations. Soon several English missionaries were added to the Protestant force at that time, and the papal Church became thoroughly alarmed. Letters were addressed from Rome to the different patriarchs to render, if possible, the undertaking of the missionaries ineffectual. The letters were answered by the anathemas against the "Bible men;" yet, notwithstanding all this, the missionaries took a hopeful view of their prospects, and commenced schools in 1824 at Beirut. The first was a mere class of six Arab children, taught daily by the wives of the missionaries. Soon an Arab teacher was engaged, and before the year ended the pupils had increased to fifty. In 1827 they had already 600 children in thirteen schools, and more than 100 of these pupils were girls. That the Romish ecclesiastics were hostile to these schools need not be mentioned. The troubles which commenced in 1826 with the invasion of the Greeks, and the constant apprehension of an approaching war, made it necessary to suspend the mission for a time, which happened in the year 1828, and thus the first period in the Syrian mission closed. The second period commences with the year 1830, when the station at Beirut was resumed. In 1834 an Arabic press arrived at Beirut, which proved a great help in the mission-work, especially in the controversy which Mr. Bird had with the papal bishop of Beirut. In 1835 a high-school was commenced, but missionary work was impeded by the wars of Lebanon. These troubles lasted till the year 1842. In the year 1844 the missionaries held a convention, the result of which was that it was recognised as a fact of fundamental importance that the people within the bounds of the mission were Arabs, whether called Greeks, Greek Catholics, Druses, or Maronites,

and that the divers religious sects really constituted one race. It was also agreed upon that wherever small companies were ready to make a credible profession of piety, they were entitled to be recognised as churches, and had a right to such a native ministry as could be given them. About that time a call for preaching came from Hasbeiya, a village of four or five thousand inhabitants, situated at the foot of Mount Hermon, and about fifty miles south-east of Beirût. A considerable body of Hasbeyians had seceded from the Greek Church, declared themselves Protestants, and made a formal application to the mission for religious instruction. Seventy-six of these people were added to the Church of Christ. A persecution against the Protestants now ensued, who fled to Abeih, where the high-school was revived under the charge of Mr. Calhoun. A chapel for public worship was fitted up, and here, as also at Beirût, there was preaching every Sabbath in the Arabic language, with an interesting Sabbath-school between the services. In the spring of the year 1845 war broke out afresh between the Druses and Maronites, and Lebanon was again purged by fire. The consequence was that the schools in the mountains were broken up; but in the following year, when Dr. Van Dyck was ordained to the work of the Gospel ministry, there were ten schools in the charge of the station at Abeih, with 436 pupils. Connected with the Beirût station were four schools for boys and girls, and one for girls alone. In Sûk el-Ghûrb, a village four miles from Abeih, a Protestant secession from the Greek Church was in progress, embracing fourteen families, and religious services were held with them every Sabbath. At Bhamdûn, the summer residence for the brethren of the Beirût station, there were a number of decided Protestants, and even in Zahleh, the hot-bed of fanaticism, there were men who openly argued from the Gospel against the prevailing errors. Missionary work had now so increased that in the year 1847 an earnest and eloquent appeal from the missionaries for an increase to their number was made to the Prudential Committee. The appeal was published, but it continued painfully true that the harvest was plentiful, while the laborers were few. In the same year the Protestants of Hasbeiya sent one of their number to Constantinople to lay their grievances before the sultan. The appeal was successful, and the principle of tolerating and acknowledging the Protestants as a Christian sect was recognised, in spite of the bull of excommunication of the Greek patriarch. The most important event, however, in the year 1848 was the formation of a purely native Church at Beirût, and the beginning of translating the Scriptures into Arabic, which was committed to Mr. Eli Smith, who was assisted by Butrus el-Bistany and Nasif el-Yasijl. In the same year Aleppo was made a missionary station, but it was left in 1855 to be cultivated by the Armenian mission, the language in that region being chiefly the Turkish. At that time the Gospel was preached steadily at sixteen places. At four of these—Beirût, Abeih, Sidon, and Hasbeiya—churches had been organized. The anathemas of the Maronite clergy, once so terrific, had lost their power, and the most influential inhabitants were on friendly terms with the mission, and in favor of education and good morals. Things had changed in the last fifteen years for the better in a most remarkable way. We have now arrived at the year 1857, which opened with the death of Dr. Eli Smith, the translator of the Bible into Arabic. He had departed at Beirût, Sabbath morning, Jan. 11, and was succeeded in the work of translation by Dr. Van Dyck, who had been removed for that purpose from Sidon to Beirût. In the year 1859 the translation of the New Test. was completed and published under the care of Dr. Van Dyck, who then proceeded with the translation and publication of the Old Test., which was completed Aug. 22, 1864. The British and Foreign Bible Society requested permission to adopt this version, instead of the one formerly issued by them. The result of a friendly nego-

tiation was that the American and the British and Foreign Bible Society agreed to publish the version conjointly from electrotype plates furnished by the former.

The civil war which broke out in Syria in 1860, and which was noted for savage massacres on Lebanon, at Hasbeiya, Damascus, and elsewhere, although doubtless injurious to the missionary work in its direct effects, was the means of an interesting development of the missionary spirit. Not less than six different missionary societies were formed, embracing nearly all the Protestants of the various towns and villages, and a commendable degree of liberality was shown by the natives in collecting and contributing. The number of converts increased, churches and stations were multiplied and provided with native preachers and pastors, and a proposal was made for a Protestant college. The demand for the Scriptures and other religious works was so great that the press was unable to meet it. In 1862 the printing alone amounted to 8000 volumes and 9000 tracts, making an aggregate of 6,869,000 pages. Besides the Protestant college, which was proposed in 1861 and incorporated in 1863, in accordance with the laws of the state of New York, a theological seminary was commenced at Abeih in May, 1869, which opened with seven students. In the year 1870 the Syrian mission was transferred from the American Board to the Presbyterian Board of Missions, under whose care it is still carried on.

Beirût is one of the missionary centres for the revival of Bible Christianity in Bible lands. Among the chief instrumentalities for the development of this city are the benevolent and literary institutions founded by foreign missionary zeal. First among them are the American Protestant institutions under the care of the Presbyterian Board of Foreign Missions in New York. They are manned by a noble band of Christian scholars, as Drs. H. H. Jessup, D. Bliss, C. V. A. Van Dyck, G. E. Post, and Profs. James S. Dennis, E. R. Lewis, and Hall. In the year 1877, when Dr. Philip Schaff visited Beirût, a new mission chapel, with a native pastor, had just been opened in the eastern part of the city. There are the American Female Seminary and the printing-press and Bible depository, which sent forth in 1876 no less than 38,450 volumes (or 13,786,980 pages) of Bibles, tracts, and other books, including a series of text-books and juvenile works. There is the "Syrian Protestant College," which is independent of the mission, but grew out of it, and promotes its interest. In 1877 it numbered over 100 pupils of different creeds and nationalities. The college embraces, besides the literary department—Arabic language and literature, mathematics, the natural sciences, the modern languages, and Turkish law and jurisprudence—a medical school, under the management of Dr. Post; an observatory, under Dr. Van Dyck, who sends daily by telegraph meteorological observations to the observatory of Constantinople; a library, and a museum of natural curiosities. The entire Syrian mission of the American Presbyterian Board embraces, according to the statistics of 1879, 29 American missionaries (12 men and 17 women), 3 native pastors, 112 teachers, 15 licensed preachers, 10 other helpers—total force, 140; 12 churches, 716 communicants, 115 received on profession, 66 preaching-places, and 45 Sunday-schools with 1895 pupils. The principal stations outside of Beirût are Tripoli, Abeih, Sidon, and Zahleh. Besides these flourishing Presbyterian institutions, the schools of Mrs. M. Mott, Miss Jessie Taylor, and the deaconesses of Kaiserswerth deserve most honorable mention. The Jesuits are also very active in Beirût in the interest of the Roman Catholic Church. They are just now issuing a new Arabic translation of the Bible, evidently in opposition to Dr. Van Dyck's translation, which is widely circulated in the East. From Dr. Schaff's work, *Through Bible Lands*, we subjoin the following statistics concerning the

BEIRÛT SCHOOLS AT THE CLOSE OF 1877.

Besides Beirût, we may mention Damascus, the hot-bed of Mohammedan fanaticism. A daily diligence connects this place with Beirût. "It seems a hopeless task," says Dr. Schaff, "to plant Protestant Christianity in such a place as Damascus. Nevertheless, the thing has been done, and not altogether without result." Since 1843 the United Presbyterian Church of America and the Presbyterian Church of Ireland have maintained jointly a mission, with a church for converts from Jews and Greek Christians, and with schools. The buildings were burned during the massacre of 1860, but have been substantially rebuilt. The Protestant community there is now larger than before the massacre. Worship is conducted twice every Sunday in Arabic, and occasionally in English. Besides this Presbyterian mission, there is an Episcopal mission, with a chapel built by the London Society for Promoting Christianity among the Jews. Adjoining the chapel are several fine schoolrooms for boys and girls. Altogether this society employs there a missionary staff of five persons. Connected with this society is also a depot, where Bibles and other books, such as the *Pilgrim's Progress*, are for sale. The missionary operations at Damascus are but small beginnings; but the time is not far distant when, as Abd-el-Kader prophesied, "the mosques of Damascus will be turned into Christian churches."

From the work recently published by Dr. Schaff, *Through Bible Lands*, we extract the following table.

In conclusion, we will mention the fact that the last mission year has been signalized by the establishment of a British protectorate over Syria and all Asiatic Turkey, and by a new departure in the Syrian Protestant College, in the adoption of the English language as the common medium of instruction. See Anderson, *History of the Missions of the American Board of Commissioners for Foreign Missions to the Oriental Churches* (Boston, 1872-73, 2 vols.); Schaff, *Through Bible Lands* (N. Y., 1879); besides the annual reports of the different societies. Some of the publications from the Jesuit press at Beirût are mentioned in *Literarischer Handweiser*, 1864, p. 209 sq. (B. P.)

Among the most notable missionary efforts in Pales-

tine are the German colonies at Haifa and Jaffa. They belong to a religious society known as "The Temple," which originated among the Pietists of Württemberg, who accept Bengel's theory of the prophecies of the book of Revelation as set forth in his *Gnomon of the N. T.* In 1867 an expedition of twelve men, sent out from the parent society at Kirschenhardtshof, established themselves at Semûneh, near Nazareth, but soon died of malarial fever. On Aug. 6, 1868, another company set out, and, arriving in Palestine in October, separated into two colonies, one settling at Haifa, under the presidency of G. D. Hardegg, and the other at Jaffa, under Christopher Hoffmann. Their object was a religious one, to prepare the Holy Land for Christ's personal coming in the Millennial reign. They purchased land, built houses, and have addressed themselves at once to agriculture. At Jaffa they have two settlements—one called Sarôva, about two and a half miles north of the town, consisting in 1872 of ten houses; the second, near the walls of Jaffa, was bought from the surviving members of an American colony which came to grief (for this last see Ridgway, *Lord's Land*, p. 485), and this settlement included thirteen houses, with a school and a hotel. The Jaffa colony in all numbered in 1872 one hundred men, seventy women, and thirty-five children; two of the colonists were doctors, and some twenty were mechanics, the rest being farmers. The Haifa colony in 1875 numbered 311, having been lately reinforced by new arrivals from Germany. Both colonies are well established, having neat and comfortable houses, and signs of external prosperity, being engaged in various trades and manufactures, as well as farming. They have little influence, however, over the native population and small security for permanence, although for the present fully tolerated by the Turkish authorities and highly respected by their neighbors (see Conder, *Tent-Work in Palest.* ii, 301 sq.).

At Jaffa there has lately been likewise established an agricultural colony of Jews from Germany, who have a small but flourishing establishment just outside the city.

Besides the episcopal mission in Jerusalem [see PAL-ESTINE, MISSIONS IN], the Church of England has mission stations at Nablûs and various other points in Palestine, where religious services are held with more or less regularity. At Nazareth is an elegant Protestant church founded by the English Missionary Society in connection with the Anglo-Prussian bishopric of Jerusalem, where an ordained clergyman (formerly Rev. J. Zeller, now Rev. F. Bellamy) officiates, assisted by a native catechist. In the same town is a hospital founded by the Edinburgh Medical Missionary Society, which dispenses medical aid to all applicants; and likewise an orphanage, established by the Ladies' Society for Promoting Female Education in the East, which educates and cares for about forty girls, chiefly of Christian parentage. See TURKEY.

Missionary work has thus a foothold in Syria, but owing to the severe Moslem laws against proselytism, it accomplishes as yet but little direct spiritual results (see Collins, *Miss. Enterprise in the East*, Lond. 1873).

**Syr'iac** (Dan. ii, 4), or SYRIAN TONGUE (Ezra iv, 7) or LANGUAGE (2 Kings xviii, 26; Isa. xxxvii, 11), is the rendering in the A. V. of the Hebrew אַרַמִּית, *Aramith*, which is the fem. of

ܐܪܡܝܐ, *Aramaean*, used adverbially i. q. *Aramaice*, in Aramaic. See ARAMÆAN.

**Syriac Language.** This represents the Western dialect of that branch of the Shemitic or Syro-Arabian languages usually termed the Aramaean (q. v.), the Eastern being represented by the Chaldee (q. v.). The affinity between the Chaldee and Syriac is indeed so close that but for a few orthographical changes, and especially the difference in written character, they would scarcely be distinguishable. In speech they could hardly have differed more than the several dialects of the Greek (e. g. the Doric, Æolic, Attic) from each other. While the Chaldee is written in the square character, now usually called the Hebrew, the Syriac is written in a very different and more cursive hand, and exhibits (in addition to the peculiar forms for final letters, as usual in all the Shemitic group) a method of combining certain letters or running them together in writing, similar to the practice

in Arabic. There are also two forms of the characters (which correspond precisely to the Hebrew in number and power)—the ordinary or light-stroke form now generally used in printing, and an older form called the Estrangelo, of heavier strokes and more uncouth shape. The vowel-points also (of which there are five, corresponding in general to the modern vowels *a, e, i, o, u*, as pronounced in Italian) differ entirely from the Hebrew (and Chaldee), and, moreover, vary in these two methods of writing; with the ordinary letters they consist of modified forms of the Greek vowels (*a, e, i, o, u*), while in the Estrangelo they are denoted by two dots in various positions. Other orthographical peculiarities of the Syriac as compared with the Hebrew and Chaldee are the use of a small line (*linea occultans*) beneath silent letters, the suppression altogether of the Sheva when silent, the disuse of the Dagesh (some writers, however, employing a dot above a Begad-Kephath letter, called *Kushoi*, i. e. "hardness," to remove the aspiration, and a dot beneath it, called *Rukok*, i. e. "softness," to retain the aspiration), and the indication of the plural (when identical in form with the singular) by two horizontal dots placed above it, called *Ribbui*, i. e. "increase." For the leading differences in the formation and construction of words in Syriac, which are throughout analogous with the Chaldee, see ARAMÆAN LANGUAGE.

ܐ = ܐ = ܐ	Name.	Form.	Power.	Greek.	Hebrew.	the inferior version of the Old Test., consists of certain historical works of the Early and Middle Ages, particularly the writings of Ephrem Syrus (q. v.), and a number of religious poems and hymns (see <i>Select Hymns and Homilies</i> [Lond. 1853], translated from the Syriac by Rev. H. Burgess). General treatises on the Syriac language and literature, many of them in connection with the Hebrew, but exclusive of those that treat likewise of the Chaldee, are by the following: Lysius (Regiom. 1726), Michaelis	
ܐ ܐ ܐ	Pethocho	or	ܐ	α	-		
ܐ ܐ ܐ	Rebotso	or	ܐ	ε	-		
ܐ ܐ ܐ	Chevtoso	or	ܐ	ι	-		
ܐ ܐ ܐ	Zekopho	or	ܐ	ο	-		
ܐ ܐ ܐ	Etsotho	or	ܐ	υ	-		

The ancient or proper Syriac is believed to be now wholly a dead language, and is used only in the old liturgies and sacred books. The modern Syriac, which is used almost solely by the Nestorian Christians of Persia, and to some extent by their Koordish neighbors, differs considerably from the old Syriac, or that of literature. The principal value of a knowledge of the latter is its use in the elucidation of rare words in the Old Test. and the comparison with the Heb. roots; and it is also of much importance from the fact that the oldest and best version of the New Test. (the Peshito) is in this language. See SYRIAC VERSIONS. The principal literature of the Syriac, besides this and

[J. B.] (Hal. 1756), Michaelis [J. D.] (Gött. 1768, etc.), Agrell (Upsal, 1791; Lond. 1816), Svanborg (Upsal, 1795), Lengerke (Regiom. 1836), Larsow (Berol. 1841). See the *Jour. of Sac. Lit.* Oct. 1862; an art. on the *Syro-Arabian Languages and Literature*, in the *Christ. Rev.* xvii, 393 sq.; on *Syriac Biblical Literature*, in the *Church Rev.* v, 36 sq.; on *Syriac Philology*, in the *Biblioth. Sacra*, viii, 554 sq.; and the list in Uhlemann's *Syr. Grammar*, p. 22 sq.

Grammars on the Syriac, exclusively, are those of Dillherr (2d ed. Hal. 1646), Opitius (Leips. 1691), Leusden (Ultraj. 1658), Beveridge (Lond. 1658), Michaelis [C. B.] (Hal. 1741), Michaelis [J. D.] (Gött. 1784), Adler (Alton. 1784), Zel (Lemgo, 1788), Tyschen (Rost. 1793), Yates (Lond. 1821), Ewald (Erlang. 1826), Hoffmann, (Hal. 1827), Uhlemann (Berl. 1829; N. Y. 1855), Tullberg (Lond. 1827), Phillips (2d ed. ibid. 1845), Cowper (ibid. 1860), Merx (Halle, 1867). A *Grammar of the Modern Syriac Language*, by Rev. D. T. Stoddard, is printed in the *Jour. of the Amer. Oriental Society* (N. Y. 1855), vol. v, No. 1. Lexicons have been executed by Gutbir (Hamb. 1667; new ed. by Henderson, Lond. 1836) and Schaaf (Lugd. Bat. 1708); the abstract of the Syriac part of Castell's *Heptaglot Lex.* by Michaelis [J. D.] (Gött. 1788); Smith, *Thesaurus* (Lond. 1858), pt. i. A new and extensive Syriac lexicon was undertaken by Prof. Bernstein of Germany. Syriac chrestomathies are those of Kirsch (Leips. 1789), Grimm (Lemgo, 1795), Knaes (Gött. 1807), Hahn and Sieffert (Leips. 1825), Oberleitner (Vien. 1826), Döpke (Gött. 1829), Wenig (Innsbr. 1865), and Rödiger (2d ed. Halle, 1868). The most convenient reading-book for beginners is the *Syriac New Test.*, published by Bagster (Lond.), and containing a brief lexicon edited by Dr. Henderson. See *SEMITIC LANGUAGES*.

**Syriac Literature.** The Syriac literature is pre-eminently religious. The oldest monument is the Syriac version of the Bible, called the *Peshitha* or *Peshito*, for which see *SYRIAC VERSIONS*. Like the Jews, the Syrians treated their Bible in Masoretic manner, which may be seen from the superscriptions added to some books. Thus we read at the end of Job, *שְׁלֹם כְּתָבָא*, i. e. "Here ends the book of the just and noble Job; it contains 2553 verses." The result of critical care for the Peshito is contained in a work speaking of the variety of single readings, of the correct reading of difficult words, and in which the pronunciation of proper names according to the Greek mode is taught. The title of this collection is *כורסא דשמהא ודקריחא דעתיקא*, i. e. "Book of the names and readings of the Old and New Test. according to the Karkaphic recension." The latter expression denotes that the work was prepared in the Jacobitic monastery *Karkaph*, which by a mistake lent the name and idea of a *Karkaphic* or *Karkaphensian recension* (see Martin, *Tradition Karkaphienne, ou la Massore chez les Syriens* [Paris, 1870]). After this, all notices concerning a Karkaphensian version which are found in the introductions to and cyclopædias and dictionaries of the Bible must disappear once for all. The same French writer also called attention to the fact that, like the Jews, who have an Eastern and Western, a Babylonian and Palestinian, Masorah, so likewise we must distinguish between an Eastern and Western, a Nestorian and Jacobitian, Masorah among the Syrians; and this he laid down in his *Syriens Orientaux et Occidentaux* (ibid. 1872): "Essai sur les deux principaux dialectes Araméens;" to which we may add a third essay by the same author: *Histoire de la Ponctuation ou de la Massore chez les Syriens* (ibid. 1875). These three essays are very important for the reading and understanding of the Syriac version. Passing over the other versions, which will be treated in the art. *SYRIAC VERSIONS*, we must state that the *deuterocanonical books*,

which are not found in Lee's edition of the Peshito, were already translated before the 4th century, for Ephrem the Syrian already quotes them. Thus under the formula of *γέγραπται* he cites Eccles. iii, 6, 7, 9, 12, 13 (*Opp. Græc.* i, 85); xi, 5 (*ibid.* p. 92); iv, 7 (*ibid.* p. 101); with *καθὼς γέγραπται* he quotes Wisd. iv, 7; viii, 1-17 (*ibid.* p. 241); iii, 1; iv, 15 (*ibid.* p. 256); vii, 16 (*ibid.* ii, 28); Eccles. ii, 1 he introduces with *ὡς ἡ γραφή φησι* (*ibid.* ii, 327), etc. In 1861 Lagarde published the apocryphal books of the Old Test. under the title *Libri Apocryphi V. T. Syriace*; Ceriani, in his *Monumenta Sacra et Profana*, tom. i, published the apocalypse of Baruch and the epistle of Jeremiah; in the 5th vol. the 4th book of Esdras; and in the 7th vol. (Mediol. 1874) he published the Wisdom of Solomon and Ecclesiasticus.

The apocryphal literature of the New Test., as far as it has been published, is given by Renan, *Fragments du Livre Gnostique intitulé Apocal. d'Adam ou Penitence ou Testament d'Adam*, publié d'après deux versions Syr., in the *Jour. As. sér. v*, tom. ii, p. 427; by Lagarde, in *Didascalia Apostolorum Syriace* (Lips. 1854); by Cureton, in his *Ancient Documents*, and Lagarde's *Reliquia Juris Eccles. Antiquissima Syriace*, 1856; by H. Cowper, in the *Apoc. Gospels and other Documents*, etc. (2d ed. Lond. 1867); and by Wright, *Contributions to the Apocryphal Literature of the New Test., collected and edited from Syrian MSS. in the British Museum* (ibid. 1865).

Between the translation of the Scriptures and the classic period of Syriac literature there existed a gap covering about three hundred years, which is now filled through Cureton's *Ancient Syriac Documents relative to the Earliest Establishment of Christianity in Edessa* (Lond. 1864). Eusebius, in his *Church History*, tells us that he translated the correspondence between Christ and king Abgar of Edessa, together with the narrative of the healing and conversion of that king by Thaddeus, one of the seventy disciples, from the archives of Edessa. A part of this report has been found in Nitrian MSS. of the 5th and 6th centuries, under the title *The Doctrine of Addai* (lately published, with an English translation by Phillips, Lond. 1876). From this we learn that Addai, one of the seventy, converted not only the king Abgar Ukkama, but also a great many of the people, and built churches in and about Edessa. Addai was succeeded by Aggæus, who was murdered. Besides Aggæus, a good many others suffered martyrdom, for which comp. *Acta Martyrorum Orient. et Occident.* (Rom. 1748, 2 tomi, ed. Assemani).

**I. Orthodox Writers.**—Towards the middle of the 4th century begins the *golden æra of Syriac literature*, and under this head we mention Jacob, bishop of Nisibis (q. v.). Although later MSS. contain something under his name, yet no genuine works are now extant. Contemporary with Jacob was Aphraat or Farhad, surnamed the "Persian sage," the author of homilies written between 337 and 345, and published by Antonelli in the Armenian, with a Latin paraphrase, in 1756, but of late in the original Syriac by Wright (Lond. 1869). Prof. Bickell translated eight of these homilies into German (in the *Bibliothek der Kirchenväter* [Kempten, 1874], No. 102, 103). On Aphraat see Sasse, *Prolegomena in Aphraatis Sapientis Persæ Sermones Homileticos* (Lips. 1878), and Schönfelder, in the *Tübinger theolog. Quartalschrift*, 1878, p. 195-256.

Of greater renown was Ephrem (q. v.), who died in A.D. 373, and whose writings were translated not only into Latin and Greek, but also into the Armenian, Coptic, Arabic, Abyssinian, and Slavonic. Besides Ephrem, we mention Gregory, abbot in Cyprus about 390, author of epistles; Balæus, whose hymns are given by Overbeck in his *S. Ephraemi Syri, Rabula, Balæi aliorumque Opera Selecta* (Oxford, 1865); by Wenig, in his *Schola Syriaca* (Innsbruck, 1866); and in a German translation by Bickell, in *Ausgewählte Gedichte der syrischen Kirchenväter* (Kempten, 1872). Balæus's contemporary

was Cyrillonas, whose hymns were also translated by Bickell (*loc. cit.*).

Towards the end of the 4th and beginning of the 5th century lived and wrote Maruthas, bishop of Tagrit, author of a martyrology (printed in Assemani's *Bibliotheca*) and hymns. The canons of the Synod of Seleucia (410) concerning Church discipline, and bearing his name and that of Isaac, bishop of Seleucia, have been published after a Paris MS. by Lamy: *Concilium Seleuciae et Ctesiphontis habitum anno 410, ed. vert. illustr.* (Louvain, 1869); Rabula, bishop of Edessa (died 435), author of epistles, canons, and hymns, for which comp. Overbeck (*loc. cit.*) and Bickell. In the year 460 died Isaac the Great (q. v.), presbyter of Antioch. His hymns are translated by Zingerle, in the *Tübinger theolog. Quartalschrift*, 1870, and by Bickell, in the *Kemptner Bibliothek der Kirchenwäter*, 1872, No. 44. The latter has also published *S. Isaaci Antiocheni, Doctoris Syrorum, Opera omnia, ex omnibus, quotquot extant, Codicibus Manuscriptis cum varia lectione Syriace Arabiceque primus edidit, Latine vertit, Prolegomenis et Glossario auxit* (Giessen, 1873-77, 2 vols.); see also Zingerle, *Monumenta Syriaca ex Romanis Codicibus Collecta* (Eniponti, 1869), i, 13-20. Contemporary with Isaac was the monk Dada, who wrote about three hundred works on Biblical, homiletical, and hagiographical matter. About the same time lived Cosmas, the biographer of Simeon the Stylite (see *Biblioth. Orient.* and *Acta Martyrum Oriental.*). Towards the end of the 5th and beginning of the 6th century lived Joshua the Stylite of Edessa, author of a chronicle covering the years 495-507, which has been edited by Martin, *Chronique de Josué le Stylite, écrite vers l'an 515. Texte et Traduction* (Leips. 1876), and Jacob, bishop of Sarug (q. v.). In the work by Abbelüs, *De Vita et Scriptis S. Jacobi Batnarum Sarugi in Mesopotamia Episcopi* (Louvain, 1867), three biographies of Sarug are given. More recent is Martin's *Evêque-Poète au Ve et au VIe Siècles, ou Jacques de Saroug, sa Vie, son Temps, ses Œuvres, ses Croqances, in the Revue des Sciences Ecclésiastiques*, Oct. and Nov. 1876, p. 309-352, 385-419. According to Martin, Sarug was a heretic, for he says, "Jacob was born, lived, and died in heresy; he loved everything which the Church condemned, and condemned everything that the Church loved at that time." His hymns Bickell published in a German translation in the *Ausgewählte Gedichte syrischer Kirchenwäter*. Of Sarug's writings, some were published in the *Monumenta Syriaca*, i, 21-96; ii, 52-63; 76-166; in Assemani's *Acta Martyr.* ii, 230; Cureton, *Ancient Documents*, p. 86 sq.; Wenig, *Scholu Syr.* p. 155; by Zingerle, in the *Zeitschrift der deutsch. morgenl. Gesellschaft*, 1858, p. 115; 1859, p. 44; 1860, p. 679; 1864, p. 751; 1866, p. 511; by the same author, six homilies were published at Bonn in 1867. Martin published in the *Zeitschrift der deutsch. morgenl. Gesellschaft*, 1875, p. 107-137, *Discours de Jacques de Saroug sur la Chute des Idoles*; and *ibid.* 1876, p. 217-275, *Lettres de Jacques de Saroug aux moines du Convent de Mar Bessus et à Paul d'Edesse, relevées et traduites*; Dr. R. Schröter, *ibid.* 1877, p. 360, the *Consolatory Epistle to the Himeritic Christians*, in the original Syriac, with notes. In the 6th century also lived John Saba, a monk, a native of Nineveh, author of sermons and epistles, published in Greek (Leips. 1770), and Isaac of Nineveh (q. v.) (see *Monumenta Syriaca*, i, 97-101), author of an ascetic work in seven books, and known in the Greek translation, made by Fabricius and Abraham, and given under the title *Libri de Contemptu Mundi*, in the 11th vol. of the *Magna Bibliotheca Patrum*, where they are erroneously ascribed to Isaac of Antioch. With Isaac of Nineveh the list of orthodox writers is closed, and we come now to

II. *Heterodox Writers*.—1. *The Nestorians*.—Without entering upon the history of these Christians, we will only remark that the catalogue of Ebedjesu on Nestorian writers was first published by Abraham Echellensis (Rome, 1653), but more correctly by Assemani in the

3d vol. of his *Biblioth. Orient.* Besides, we find many literary and historical notices in Assemani's catalogue of the Oriental MSS. of the Vatican Library, or in the *Bibliotheca Apostol. Vatic. Codicum MSS. Catalogus S. E. et J. S. Ass. recensuerunt Tom. II, complectens Libros Chald. sive Syros* (*ibid.* 1758), and in the Appendix by Cardinal Mai, in the *Catal. Cod. Bibl. Vatic. Arab.* etc., *item ejus partis Hebr. et Syriac. quam Assemani in editione prætermiserunt* (*ibid.* 1831). See NESTORIANS.

The earliest writers among the Nestorians were Barsuma (q. v.), bishop of Nisibis and author of epistles; Narses (d. 496), surnamed "the Harp of the Spirit," author of commentaries on the Old Test., three hundred and sixty orations, a liturgy, a treatise on the sacrament of baptism, another on evil morals, various interpretations, paracletic sermons, and hymns (see Schönfelder, *Hymnen, Proklamationen u. Martyrergesänge des Nestorian Breviers*, in the *Tübinger theolog. Quartalschrift*, 1866, p. 177 sq.); Mar Abba (d. 552), who wrote a commentary on the Old Test. and a translation of the Old Test. from the Sept., the latter not extant; Abraham of Kashkar, author of epistles and a commentary on the dialectics of Aristotle; Paul of Nisibis, an exegetical writer; Babæus or Babi, surnamed "the Great," archimandrite of Nisibis in 563, a voluminous writer and author of *On the Incarnation*, an exposition of the ascetical treatise of Evagrius of Pontus, a history of the Nestorians, hymns for worship through the circle of the year, an exposition of the sacred text, monastic rules, etc.; Iba, Kuma, and Proba, doctors of Edessa, who translated in the 5th century the commentaries of Theodore of Mopsuestia and the writings of Aristotle into Syriac; Hanana of Adiabene, an exegetical writer; Joseph the Huzite, a mystic; John Saba, author of epistles; John of Apamea, author of ascetical treatises. Famous as grammarians and lexicographers were Honain Ibn-Ishak (d. 876), Bar-Ali (about 885), Bar-Bahlul (about 963), and Elias bar-Shinaja (d. 1049).

Of the writers whose works were published, at least in parts, we mention Jesuabih of Adiabene, patriarch about 660, and author of *Da-Huphok Chusobee*, or *On the Conversion or Change of Opinions*, an exhortation to certain disciples, and a ritual; Thomas Margensis, about the middle of the 9th century, author of a history of the monastery of Beth-Abe, published by Assemani; John bar-Abgora, patriarch about 900, and author of canons, Church questions, and decisions, in part given by Assemani; George, metropolitan of Arbela and Mossul, author of an explanation of the liturgy, by Assemani; and Timothy II, patriarch about 1318, author of a treatise on the sacraments, also given by Assemani. The ethical work, *The Book of the Bee*, by Solomon, bishop of Bassora (about 1222), has lately been published with a Latin translation by Schönfelder, *Salomonis Ep. Basorensis Liber Apis, Syriacum Arabicumque textum Latine vertit* (Bamberg, 1866); George Varda, two of whose hymns are given in an English translation by Badger, in his *The Nestorians and their Rituals* (Lond. 1852), ii, 51, 83, 95; Chamis bar-Kardache, whose hymn on the incarnation is also given by Badger (*loc. cit.* p. 39). The latest writer among the Nestorians was Ebedjesu (q. v.), metropolitan of Saba (d. 1318).

After the 16th century, a great part of the Nestorians returned to the Church of Rome. From their midst a number of polemical writings in the Syriac language were published against the errors of their countrymen, as the *Three Discourses on Faith*, about the year 1600, by the archimandrite Adam (afterwards as bishop of Amida, called Timothy). These discourses are given by P. Strozza, in his *De Dogmatibus Chaldeorum Disput.* (Rom. 1617), and in *Synodaliu Chaldeorum* (*ibid.*), where also the synodical letter of the patriarch Elias to Paul V, in a Latin translation, and the hymn of the patriarch Ebedjesu in honor of Pius IV, in the Syriac, is given. About 1700 the patriarch Joseph II wrote the *Clear Mirror*, parts of which are given by Assemani, and

in our days the Chaldean priest Jos. Guriel published at Rome (1858) his *Lectiones Dogmaticæ de Dignâ Incarnatione quas in Perside habebat*.

2. *The Monophysites*.—Of this class of writers we mention John, bishop of Tella, whose canons were published by Lamy in *De Syrorum Fide in Re Eucharistica*, p. 62-97 (see also Land, *Anecdota Syriaca*, ii, 169, and *Cod. Mus. Brit.* add. 12,174, fol. 152); Paul, bishop of Callinicum, the first translator of Severus's writings; Xenajas or Philoxenus (q. v.), bishop of Hierapolis (Mabug), the author of a Bible translation, commentaries *De Trinitate et Incarnatione* and *De Uno ex Trinitate Incarnato et Passio* (Jacob of Edessa calls Xenajas one of the four classic writers of Syria); Simeon, bishop of Betharsam (d. 525), author of epistles, given by Assemani in the *Bibl. Orient.* i, 346, 361; Peter of Callinicum (578-591), author of polemical works and hymns (see *Cod. Mus. Brit.* add. 14,691, p. 69); John of Ephesus (q. v.), author of an ecclesiastical history; Jacob of Edessa (q. v.), author of a recension of the Syro-Hexaplaric translation, fragments of which are given by Ceriani in the 2d and 5th vols. of his *Monumenta Sacra*; besides, he wrote commentaries and scholia on the Holy Scriptures (published by Philipps, *Scholia on Passages of the Old Test.* [Lond. 1864]), epistles (given in the *Bibl. Orient.* i, 479, and by Wright, in the *Jour. of Sac. Lit.* Jan. 1867), canons (given by Lagarde, in *Reliquiæ Juris Eccles. Syr.* p. 117, and by Lamy, in *De Syrorum Fide in Re Eucharistica*, p. 98); his essay on the *Shem Hammephorash* was published by Nestle in the *Zeitschrift der deutsch. morgenl. Gesellschaft*, 1878, iii, 465 sq.; he also introduced a more correct vocalization (see Martin, *Jacques d'Edesse et les Voyelles Syriennes* [Paris, 1870]); George, bishop of the Arabs, in the beginning of the 8th century (see Lagarde, *Analecta*, p. 108-134); Dionysius, patriarch of Telmarchar, who, perusing the works of Eusebius, Socrates, and John of Ephesus, wrote annals from the Creation to A.D. 775, the first book of which was published by F. Tullberg, *Dionysii Telmahhrensensis* (Upsala, 1850), lib. i; John of Dara (q. v.), author of four books on the resurrection of the body (extant), two books on the ecclesiastical and celestial hierarchies, four books on the priesthood, and a liturgy (see Zingerle, in the *Tübinger theol. Quartalschrift*, 1867, p. 183-205; 1868, p. 267-285; *Monumenta Syriaca ex Rom. Collecta*, i, 105 sq., and Overbeck, *loc. cit.* p. 409); Moses bar-Cephas (q. v.), author of a commentary on the Paradise (published by Masius in a Latin translation at Antwerp in 1569); besides, he wrote on the hexæmeron, an exposition of the Old and New Test., tracts on the liturgy, and seven homilies: Masius's *Mosis Barceph. 3 Libri Comment. de Paradiso ad Ignat. Lat. redd.* is also found in the *Bibl. Patr. Lugdun.* xvii, 456; Dionysius bar-Calib (d. 1171), commentator; of his commentaries only those on the four gospels are extant: he also wrote on the incarnation and sacraments (not extant), against certain heresies (not extant), and an oration and tracts on ordination, schism, and confession (extant); John of Mardin (d. 1165) (see the *Bibl. Orient.* ii, 217 sq.); Jacob of Maiperkin, author of a dogmatical work, *The Book of Treasures*, mentioned by Assemani, and an address to such as are to be ordained (given in part in a Latin translation by Denzinger in his *Ritus Orientalium in Administrandis Sacramm.* [Witzburg, 1863], ii, 106 sq.). The series of monophysitic writers is closed by a man who surpassed all his predecessors, namely, Gregory Abulfaraj bar-Hebræus. As the literature given under the art. ABULFARAJ (q. v.) is very deficient, and has of late greatly increased, we give it here by way of supplement. As a historian, Bar-Hebræus proved himself in his chronicle, which is now complete in the edition by Abbelis and Lamy, *Gregorii bar-Hebræi Chronicon Ecclesiasticum quod e Codice Musei Britannici Descriptum Conjuncta Opera Ediderunt, Latinitate Donarunt Annotationibusque Theologicis, Historicis, Geographicis et Archæologicis Illustrarunt* (Louvain, 1872, 1874, 1877,

3 vols.); that part of the chronicle which treats of the crusade of king Richard I of England is given in the original with an English translation in the *Syriac Reading Lessons*, published by Bagster and Sons (Lond.). Of his dogmatical works, we mention *Menorath Kudshi*, i. e. "the lamp of the sanctuary," a body of theology extant in Arabic, written in the Syrian character; *Kothobo Dazeljie*, i. e. "the book of rays," a compendium of theology, extensively described by Assemani. He also wrote *Kothobo da-Dubori*, i. e. "the book of morals," a compendium of ethics, chiefly deduced from the fathers and ascetical writers, and *Kothobo da-Tunoye Maphre-goni*, "the book of pleasant narratives," a collection of anecdotes, stories, and sentiments from Persian, Indian, Hebrew, Mohammedan, and Christian writers, in twenty chapters (see Adler, *Brevi Linguae Syriacæ Institutio* [Altona, 1784]). The ecclesiastical and civil law he treats in his *Kothobo da-Hudoye*, i. e. "the book of directions," published in a Latin translation by Mai in the 10th vol. of his *Scriptorum Veterum Nova Collectio* (Rom. 1838). His *Autsar Rozi*, or "treasury of mysteries"—his greatest exegetical work—is a commentary on the Holy Scriptures, and has elicited many monographs. Larsow's intention to publish a new edition has not been realized. Of monographs, we mention the general *Proemion* and the *Scholia on Job*, in *Kirsch Chrestom. Syr.* (Leips. 1832, ed. Bernstein), p. 143, 186; Rhode, *Abulpharagii Scholia in Psa. v et xviii* (Breslau, 1832); Winkler, *Carmen Debore cum Scholiis Barhebraeum* (ibid. 1839); Tullberg, *Scholia in Isajam et in Psalmos Scholiorum Specimen* (Proem. et Scholia in Psa. i, ii, xxii [Upsala, 1842]); Knobloch, *Greg. B. H. Scholia in Psa. lxxviii, primum ed. et ill.* (Breslau, 1852); Koren and Wennberg, *Greg. B. H. Scholia in Jerem.* (Upsala, 1852); id. *Greg. B. H. Scholia in Psa. viii, xl, xli, l* (Breslau, 1857, ed. R. S. F. Schröter); id. *Scholia in Gen. xli, l; Exod. xxxii-xxxiv; Judg. v*, in *Zeitschrift der deutsch. morgenl. Gesellsch.* xxiv, 495 sq.; id. *Scholia on Psa. iii, ir, vi, vii, ix-xv, xxiii, liii* (together with bar-Hebræus's preface to the New Test. in the same review, xxix, 247-303); id. *Greg. B. H. Scholia in Job i* (Breslau, 1858, ed. Bernstein); Schwarz, *Gregorii bar-Ebhrya in Evangelium Johannis Commentarius. E Thesouro Mysteriorum Desumptum, edidit* (Gött. 1878); Klamroth, *Gregorii Abulpharagii bar-Ebhrya in Actus Apostolorum et Epistulas Catholicas Adnotationes, Syriace* (ibid. 1878). He was also not only distinguished as a poet and grammarian, but combined also both qualities in that of a grammatical poet. His short grammar in metre was published by Bertheau, *Greg. B. H. Gramm. Linguae Syr. in Metro Ephraemico* (Gött. 1843), while Martin published the *Œuvres Grammaticales d'Abulpharagii dit bar-Hebræus* (Paris, 1872, 2 vols.). Of his poems, Wolff published a *Specimen Carminum pr. ed. vert. ill.* (Lips. 1834), and Lengerke, *Ab. Carmm. Syrr. aliquot adhuc inedita ed. vert. ill.* (Königsberg, 1836-38); but lately they have been published by A. Seebabi, *Gregorii bar-Hebræi Carmina Correcta, ac ab eodem Lexicon Adjunctum* (Rom. 1877). See MONOPHYSITES.

3. *Monothelitic Writers*.—The only writer who certainly belonged to this sect was Thomas of Haran, bishop of Kapharlab, who in 1089 sent an apology of the monothelitic doctrine to the patriarch John of Antioch. But there is a controversy whether the patriarch of Antioch, John Maro, was a Catholic, monothelite, or a mystical person, and whether the Maronites were already orthodox before the crusades. The writings which go under his name, the *Metul Kokumotha*, a treatise on the priesthood, and a commentary on the liturgy, are not his—the former belongs to John of Dara, the latter to Dionysius bar-Calib. But there is no reason to deny him the authorship of the treatise on the faith of the Church against the Monophysites and Nestorians, which is preserved in a MS. dated 1392, and written in Syriac with an Arabic translation.

III. *Translations*.—The translations made from the

Greek into Syriac are very numerous, especially of the writings of the apostolic fathers. The Syrians had both epistles of Clement of Rome to the Corinthians (see Lagarde, *Clementis Romani Recognitiones Syriace* [Lips. 1861]; id. *Clementina* [ibid. 1865]; Funk, *Die syrische Uebersetzung der Clemensbriefe*, in the *Theolog. Quartalschrift*, 1877, p. 477; and Hilgenfeld, *Die Briefe des römischen Clemens und ihre syrische Uebersetzung*, in the *Zeitschrift für wissenschaft. Theol.* 1877, xx, pt. 4). On the seven epistles of Ignatius of Antioch, see, as for the controversy, the art. IGNATIUS OF ANTIOCH, and add Lipsius, *Ueber das Verhältniss der 3 syr. Briefe des Ignatius zu den übrigen Recenss. der ignat. Literatur* (ibid. 1859), and Merx, *Meletemata Ignatiani* (Breslau, 1861).

A somewhat peculiar work is the *Gnomology* mentioned by Origen, and ascribed to Sixtus I (in the beginning of the 2d century), published in Latin by Hilsemsium in 1574 and by Siber in 1725. Lagarde has published it in the Syriac according to Nitrian MSS. in his *Analecta*. Very important also are the contributions of the Syrian Church to the apologetic literature of the 2d century. In Cureton's *Spicilegium* we find an oration of Melito of Sardes, written about A.D. 160 to Marc Aurel, in which he tries to show the folly of polytheism and seeks to gain him for the Christian faith. A German translation of this oration was made by Wette, in the *Tübinger Quartalschrift*, 1862. Besides this oration, Cureton also gives some fragments from Melito's writings on the body and soul, on the cross and faith. In the same *Spicilegium* we find another apologetic work, which is otherwise mentioned as the "oration to the Greeks" by Justin. The Syrian text ascribes it to Ambrose, a Greek. Fragments of a Syrian translation of Irenæus are given by Pitra in the *Spicilegium Solesmense* (Paris, 1852), i, 3, 6.

The Nitrian MSS. also contain much material pertaining to the works of Hippolytus, the author of the *Philosophumena*. Lagarde, who published a Greek edition of Hippolytus (*Hippolyti Romani quæ feruntur omnia Græce* [Lips. 1858]), has collected the Syrian fragments in his *Analecta*, p. 79-91; and in his *Appendix ad Anallecta sua Syriaca* (ibid. 1858), he gives Arabic fragments of Hippolytus's commentary on the Apocalypse. As for the Syriac fragments, they contain an extract of Hippolytus's commentary on Daniel. Chapters viii and xi he refers to Persia, Alexander, and Antiochus Epiphanes; the four kingdoms (ch. ii and vii) are the Babylonian, Persian, Macedonian, and Roman; the ten horns (ch. vii) he refers to ten kingdoms growing out of the Roman empire, three of which—Egypt, Ethiopia, and Libya—will be annihilated by the antichrist. Besides the commentary on Daniel, these fragments also contain a scholium on the authors, division, collection, and order of the Psalms, fragments of a commentary on the Song of Songs, also fragments of a treatise on the resurrection (in which the deacon Nicolaus is designated as the author of the Nicolaitans) addressed to the empress Mammæa, on the Passover, the four animals by Ezekiel, and the genealogy of Jesus Christ.

In Lagarde's *Reliquiæ Juris Eccles. Antiquissimæ Syriacæ* (Lips. 1856), we also have the minutes of the Carthaginian Synod of 256, together with Cyprian's epistles and the *Epistola Canonica* of Peter of Alexandria in the Syrian version, while the *Analecta* by the same author contain Syriac writings and fragments of Gregory Thaumaturgus. A fragment of an epistle of pope Felix I to Maximus of Alexandria is contained in Zingerle's *Monumenta Syriaca*. This much for the ante-Nicene period. As to the *post-Nicene period*, we mention two works of Harris Cowper, *Analecta Nicæna* (Lond. 1857), fragments relating to the Council of Nice, and *Syriacæ Miscellanies* (ibid. 1861), or extracts relating to the first and second general councils, and various quotations. In these two works we have Constantine's invitatory address to the bishops of the Nicene

Council, his decree against Arius, and the episcopal signatures to councils of the 4th century.

A great favorite with the Syrian translators was Eusebius of Cæsarea, whose ecclesiastical history is preserved for the greatest part in London and St. Petersburg MSS. of the 5th and 6th centuries. Specimens of the Syriac translation were given by Cureton in the *Corpus Ignatianum*, in the *Spicilegium* and *Ancient Documents*, while Wright is preparing a Syriac edition, who also edited and translated in the *Jour. of Sac. Lit.* July, Oct., 1866, a treatise *On the Star*, ascribed to Eusebius, and which is found in a MS. of the 6th century. The *Theophany* (Σεοφανεία), long lost, was discovered by Tattam in a Nitrian monastery, and was edited, under the title *Eusebius on the Theophania or Divine Manifestation of Jesus Christ*, by Lee (Lond. 1842), who also translated the same into English (ibid. 1843). The MS. is now in the British Museum, and Lee assigns it to A.D. 411. The *Theophania* has the same object in view as the *ἀπόδειξις εὐαγγελική*, the *Demonstratio Evangelica*. It speaks in the *first book* of the Logos, the mediator between God and the world, and the prototype of the divine ideas expressed in the Creation, refuting at the same time atheism, polytheism, pantheism, and materialism. The *second book* treats of the fall and sin, and of the necessity of a divine intervention for the conversion and sanctification of mankind; the *third* speaks of the incarnation of the divine Logos, his redeeming death, resurrection, etc.; the *fourth* speaks of the fulfilment of the prophecies of Christ concerning the extension of his kingdom, the destruction of Jerusalem, the Temple, etc.; the *fifth book* refutes the objections made to Christ's miracles as being magical humbug or invented by his disciples.

Of greater import are the *Festal Letters* of Athanasius, long lost in the Greek original, but found in a Nitrian MS., from which they were edited by Cureton in 1846, who also published an English translation in 1848; another English translation is given by Burgess and Williams in the *Library of the Fathers* (Oxford, 1854); they were translated into German and annotated by Larsow (Leips. 1852), while the original, with a Latin translation, is given by Mai in the *Nova Patrum Bibliotheca* (Rom. 1853), vi, 1-168.

Besides the writers already mentioned, we must name Titus, bishop of Bostra, who wrote four books against the Manicheans, imperfect in the Greek, but complete in the Syriac translation, and edited by Lagarde, *Titii Bostreni contra Manicheos Libri IV Syriacæ* (Berl. 1859); Cyril of Alexandria, whose commentary on Luke has been edited by Payne Smith, *S. Cyrilli Alex. Archiep. Commentarii in Lucæ Evangelium* (Oxford, 1858). Of the translations of Gregory of Nyssa and Chrysostom only a few fragments have been published (see Zingerle, *Monumenta Syriaca*, i, 111, 117). The *Physiologus*, erroneously ascribed to Basil, was published (1795) by Tyschen, *Physiologus Syrus, seu Hist. Animalium xxii in Sacra Scriptura Memoratorum*. A part of the *Paradise*, an account of the acts and discourses of the most eminent Egyptian monks, erroneously ascribed to Palladius and Jerome, has been published by Dietrich, *Codd. Syriacorum Specimina, quæ ad Illustrandam Dogmatibus de Cæna Sacra, nec non Scripturæ Syr. Historiam facerent* (Marburg, 1855).

After the 5th century the translations from Greek Church fathers gradually cease, because the Syrians from that time on either belong to the Nestorians or Monophysites. The Nestorians translated the writings of Diodorus and Theodore of Mopsuestia for excerpts from their writings (see Lagarde, *Analecta*), while Theodore's commentary on Genesis has lately been published by Sachau, *Theodori Mopsuesteni Fragmenta Syriaca, edidit atque in Lat. serm. vertit* (Lips. 1869); the Monophysites translated Severus's writings, whose homilies were translated at the same time by Paul of Callinicum, and later by Jacob of Edessa. Four visitation discourses of Severus are translated into Latin from the

Syriac by Mai in *Scriptt. Veterum, Nova Coll.* ix, 742 sq. Some fragments from Jacob's translation of Severus's homilies are published by Martin, who also published Jacob's epistle to George, bishop of Sarug, concerning Syriac orthography (see *Jacobi Episc. Edesseni Epistola ad Georgium Episc. Sarugensem de Orthographia Syriaca; subsequuntur ejusdem Jacobi necnon Thomæ Diaconi Tractatus de Punctis aliisque Documenta in eandem materiam* (Paris, 1869), to which must be added Phillips, *A Letter by Mar Jacob on Syriac Orthography*, also a *Tract* by the same author, and a *Discourse by Gregorius bar-Hebr. on Syriac Accents* (Lond. 1869), to which are added appendices. In fine, we mention the translation of the epistles of pope Julius I, which is given by Lagarde in his *Analecta*, p. 67-79, while the original Greek is contained in Mai's *SS. Vett. Nova Coll.* vii, 165, and in the Appendix to Lagarde's *Titi Bostreni*. Of translations from other languages besides the Greek, little is to be said, unless we mention the works into modern Syriac issued from the press at Urumiah, as the translation of the Bible, of Baxter's *Rest of the Saints, Bunyan's Pilgrim's Progress*, etc.

IV. *Liturgies*.—The Syrian churches are rich in sacramental liturgies. The Eastern Syrians use a liturgical form which has been transmitted to them by the apostles of Edessa and Seleucia, Addai and Maris, while the Western Syrians use the liturgy of James, which has become the basis for the liturgical service throughout the Orient. The works which treat on the Oriental liturgies are Assemani's *Codex Liturg.* (Rom. 1749-66); Renaudot, *Liturgiarum Orient. Collectio* (Par. 1716); Daniel, *Cod. Lit.* (Lips. 1853), tom. iv; Neale, *History of the Holy Eastern Church* (Lond. 1850); Neale and Littledale, *The Liturgies of SS. Mark, James, Clement, Chrysostom, and Basil, and the Church of Malabar* (2d ed. ibid. 1869), translated with introduction and appendices.

The liturgical service (*Kurbano*, "the oblation or access;" also *Kudsho*, "the holy ritual") of all the Syrian churches consists of two principal parts, the first being performed in the public congregation, composed alike of the faithful and the general hearers, but the second available only to the baptized, or believers. This latter part is called *anaphora*, or "the uplifting," a term referring both to the presentation of the eucharistic materials on the altar and to the devotional elevation of the mind in the communicants. Of these anaphoras, a few are the productions of Syrian fathers; the rest are versions or adaptations from the Greek. The oldest anaphora is that of James, which is the basis of that great number of anaphoras which are used among the Jacobites and Maronites. The lesser liturgy of James is an abridgment of the former by Gregory bar-Hebreus. This is used on comparatively private occasions, as baptisms and matrimony. To Peter, chief of the apostles, are ascribed the Jacobitic anaphoras, found by Renaudot and by Howard in his *Christians of St. Thomas and their Liturgies from Syriac MSS.* (Oxf. and Lond. 1864). The *Liturgy of the Twelve Apostles*, compiled by Luke, is found by Renaudot, Howard, Neale, and Littledale. There are also liturgies ascribed to John, Mark, Clement of Rome, Dionysius of Athens, Ignatius of Antioch, Matthew the pastor, Xystus and Julius (bishops of Rome), and Celestine, whose liturgy Wright published (*The Liturgy of St. Celestine, Bishop of Rome*) in the *Jour. of Sac. Lit.* April, 1867, p. 332. To orthodox Greek fathers are ascribed the anaphoras of Eustathius of Antioch, Basil, Gregory of Nazianzum, Chrysostom, and Cyril of Alexandria. To orthodox Syrians are ascribed the anaphoras of Maruthas, Jacob of Sarug, and Simeon the Persian. To Greek heretics belong the anaphoras of Severus of Antioch and Dioscurus of Alexandria.

All these anaphoras are either spurious or very dubious, while those prepared by the bishops, especially the patriarchs of the Syrian Jacobites, have more historical

foundation in their favor. Of such we mention Philoxenus, Jacob Bardeus, Thomas of Charchel, John of Basora, Jacob of Edessa, Eleazar bar-Sabatha of Babylon (also called "Philoxenus of Bagdad" in the 9th century), Moses Barcephala, John bar-Shushan (d. 1073), John of Haran and Mardin (d. 1165; in Catholic missals erroneously called "Chrysostom"), Dionysius bar-Calib, the patriarchs Michael the Elder, John Scriba or the Lesser (towards the beginning of the 13th century), John Ibn-Maadani (d. 1263), Gregory bar-Hebreus, Dioscorus of Kardu (at the end of the 13th century), and Ignatius Ibn-Wahib (d. 1332).

All the anaphoras which we have mentioned are published either in the original or in a translation, but there are some which are extant only in MS. or known from incidental quotations. Altogether there are about sixty anaphoras belonging to the family of Syro-Jacobitic liturgies.

From the West-Syrian liturgies we come now to East-Syrians, who, as we have already stated, used a liturgical form transmitted to them from Addai and Maris, which is the *Norma normans*, while sometimes the anaphoras of Theodore of Mopsuestia and Nestorius is used. The latter was, according to Ebedjesu, translated by Thomas of Edessa and Marabba. The anaphoras of Narses, Barsumas, and Diodore of Tarsus, mentioned by Ebedjesu, are lost. The liturgy of the apostles, together with the Gospels and Epistles, is found in Syriac in the *Missale Chaldaicum ex Decreto S. Congreg. de Propaganda Fide editum* (Rom. 1767); *Ordo Chaldaicus Missal Beatorum app. juxta Ritu Eccles. Malabar.* (ibid. 1774); *Ordo Chaldaicus Ritu et Lectionum juxta Morem Eccl. Mal.* (ibid. 1775); *Tukhsa we Kerjane da Chedata wa de Attiketha akh Tekhsa Kaldaja de Malabar* (ibid. 1844) (comp. also Renaudot, Neale, and Littledale [*loc. cit.*]).

V. *Ritual*.—The main work on this subject is Denzinger's *Ritus Orientalium, Coptorum, Syrorum et Armenorum in Administrandis Sacramentis* (Würzburg, 1863-64, 2 vols.), who collected his material from Assemani, *Codex Liturg. Ecclesiae Universae in XVI lib. distributus* (Rom. 1749-66), and perused that left by the late Renaudot, as well as the documents copied for that purpose by Zingerle from MSS. at Rome. The ritual for "baptism" among the Nestorians, said to be used by the apostles Addai and Maris, and fixed by Jesubab of Adiabene in the 7th century, is found in the *Cod. Lit.*, by Badger in his *Nestorians*, and Denzinger. The Jacobites have many baptismal rituals, one of which is ascribed to James, the brother of the Lord; while another, transmitted by Christ to the apostles, and instituted by Severus, is, according to a Florentine MS., said to have been translated into Syriac by Jacob of Edessa (comp. Assemani, *Bibliotheca Medicea, Laurentiana et Palatina Codicum Manuscript. Orient. Catalogus* [Flor. 1742], p. 83). The same Severus is said to have prepared two other baptismal rituals; besides, there is one by Philoxenus for cases of emergency. In three forms (for a boy, a girl, and many candidates) we have an order of baptism ascribed to Jacob of Edessa; another, called after St. Basil, is said to be of Melchitic origin, although the Jacobites use it. All these orders are found by Assemani and Denzinger. The Maronites also use the formulæ of the apostles James and Jacob of Edessa; besides, they have one by Jacob of Sarug, an anonymous one, and one named after St. Basil. The latter two are only found by Denzinger, the first also by Assemani. The distribution of the "eucharist" is described in the liturgies. The "penitential rite" as prescribed by the Nestorian Jesubab of Adiabene, together with that of the Jacobite Dionysius bar-Calib and other Jacobitic documents, are given by Denzinger, who also gives the Nestorian and Maronitic rite of "ordination," on which also see Lee, *The Validity of the Holy Orders of the Church of England* (Lond. 1869). The order for "matrimony" according to the Nestorian and Jacobitic rite is also given by Denzinger. The

sacrament of "extreme unction" has gradually disappeared among the Nestorians, although there is no doubt that it existed at an early time, as may be seen from several allusions made to it by Ephrem (see also *Cod. Vat. Syr.* 119, p. 127-128). The Jacobitic *Ordo Lumpadis* (as this sacrament is called by the Western Syrians), Denzinger gives after Trombelli *Tractatus III de Extrema Unctione* (Bologna, 1776). In conclusion, we only add that the extensive Nestorian ritual for the burial of a priest is given in English by Badger (*loc. cit.* ii, p. 282 sq.), and in the *Officium Defunctorum, ad Usus Maronitarum Gregorii XIII Impensa Chaldaicis Characteribus Impressum* (Rom. 1585), we find the ritual for the dead, both clerical and lay.

VI. *The Breviary*.—On this subject see, besides the breviaries, Badger (*loc. cit.* ii, 16-25), Dietrich (*Commentatio de Psalterii Usu Publico et Divisione in Ecclesia Syriaca* [Marburg, 1862]), and the art. *BREVIARY* in this Cyclopædia. The Nestorian office in its present form may be traced back to the 5th century. As early as the 5th century Theodul wrote on the mode of the recitation of the psalms in the office (q. v.). Narses wrote proclamations and hymns for the same, and Micha and Abraham of Bethrabban treat of the *Kathismata* (q. v.) of the nocturn. In the 6th century, Marabba instituted antiphons (canons) for all psalms, while Babæus arranged the hymns for the days of the saints and other festivals. In the 7th century, according to the testimony of Thomas Margensis, the *Proprium de Tempore* (chudra) was arranged by Jesubab of Adiabene, which occasionally was altered by the insertion of new prayers and hymns, until it received its final revision about 1250 in the monastery of Deir Ellaiha at Mosûl.

For better understanding, it is necessary to know the division of the Psalter among the Nestorians, which almost corresponds to that of the Greek Church. The book of Psalms is divided into twenty hullalas, to which is added as the twenty-first the song of Exod. xvi and Deut. xxxii. The hullalas are again subdivided into fifty-seven (inclusive of Exod. xvi and Deut. xxxii, sixty) marmithas. Each marmitha is preceded by a prayer and succeeded by the *Gloria Patri*. Each psalm has an antiphon (canon) after the first verse, which serves very often to impress the whole with a specific Christian character. The psalms thus arranged were printed at Mosûl in 1866 and twice at Rome, *Psalterium Chaldaicum in Usus Nationis Chald. editum* (1842), and *Breviarium Chald. in Usus Nat. Chald. a Jos. Guriel, secundo editum* (1865). As it is not the object of this article to give a description of the breviary, we here mention only, for such as are interested, Dietrich, *Morgengebete der allen Kirche des Orients für die Festzeiten* (Leips. 1864); *Takhsa de teshmeshatha itanjatha de jaumatha shechime ve da star ve methida Kethaba dakdam vadebathar* (Mosûl, 1866); Schönfelder, in the *Tübinger Quartalschrift*, 1866, p. 179 sq.

The Western Syriac or Jacobitic office, with which the Maronitic corresponds for the greater part, is distinguished not only from the Eastern Syriac, but also from all others, in not having the psalms as its main substance. The Jacobitic office is found in *Breviarium Feriale Syriacum SS. Ephraemi et Jacobi Syrorum juxta Ritum ejusdem Nationis, quod incipit a Feria II usque ad Sabbatum inclusive; additis variis Hymnis ac Benedictionibus. Ab Athan. Saphar Episcopo Mardin* (Rom. 1696). The Sunday office may be found in *Officium Feriale juxta Ritum Ecclesie Syrorum* (ibid. 1851). The office for the Passion week was published by Clodius from a Leipzig MS. in 1720, *Liturgie Syriacæ Septimanæ Passionis Dom. N. I. Chr. excerptum e Cod. MS. Biblioth. Lips. ed. ac notis illustr.*

The Maronitic festival office is found in *Officia Sanctorum juxta Ritum Ecclesie Maronitarum* (Rom. 1666, 2 vols. fol.), and in *Breviarium Syriacum, Officium Feriale juxta. Rû. Eccl. Syr. Maron. Innocentii X Pont. Max. Jussu Editum, Denuo Typis Excusum* (5th ed.

ibid. 1863), with an appendix containing the *Officium Defunctorum* and other prayers. An edition of the office was published on Mount Lebanon in 1855, *Be shem abba va vera va ructia de Kudsha alaha sharira tabeinan shechimetha akh ejada de ita de Maronaje*.

It may not be out of order to speak here of the Syrian Church lectionary. The MSS. of the Syriac New Test. are strangers to the modern division of the books into chapters and verses, instead of which they divide the several books (except the Apocalypse) into reading-lessons of different lengths, but averaging about fifteen of our verses. Thus the first lesson (Matt. i, 1-17) is for the Sunday before Christmas; the second (ver. 18-25) is entitled the revelation to Joseph; the third (ii, 1-12), vespers of Christmas; the fourth (ver. 13-18), matins of slaughter of the infants, etc. The four Gospels contain 248 lessons, of which seven are unappropriated or serve for any day, and the remaining 241 serve for 252 different occasions. The Acts and the Epistles (which are collectively called the *Apostles*) contain 242 lessons, of which twenty are unappropriated, and the remaining 222 serve for 241 occasions. On most of the occasions there was one lesson appointed from the Gospels, and one also from the Apostles. A tabular view of these lessons is given in the first appendix to Murdock's *New Test.* from the Syriac Peshito version (N. Y. 1869).

VII. *Hymnology*.—According to Hahn, the first hymnologist of the Syrians was the celebrated Gnostic Bardesanes, who flourished in the second half of the 2d century. In this he is in some degree supported by Ephrem in his *Fifty-third Homily against Heretics* (ii, 553), where, although he does not actually assert that Bardesanes was the inventor of measures, yet he speaks of him in terms which show that he not only wrote hymns, but also imply that at least he revived and brought into fashion a taste for hymnology:

"For these things Bardesanes  
Uttered in his writings.  
He composed odes,  
And mingled them with music;  
He harmonized psalms  
And introduced measures—  
By measures and balances  
He divided words.  
He thus concealed for the simple  
The bitter with the sweet:  
For the sickly do not prefer  
Food which is wholesome.  
He sought to imitate David,  
To adorn himself with his beauty  
So that he might be praised by the likeness.  
He therefore set in order  
Psalms one hundred and fifty,  
But he deserted the truth of David,  
And only imitated his numbers."

It is to be regretted that of the hymns of Bardesanes—which, it appears, in consequence of their high poetic merit, exercised an extensive influence over the religious opinions of the age in which he lived, and gave so much strength and popularity to his Gnostic errors—a very few fragments only remain. These fragments are to be found scattered through the works of Ephrem. For Bardesanes, see the excellent monograph by Hahn, *Bardesanus Gnosticus Syrorum Primus Hymnologus* (Lips. 1819), who makes the following beautiful remark: "Gnosticism itself is poetry; it is not therefore wonderful that among its votaries true poets should have been found. Tertullian mentions the psalms of Valentinus; and Marcus, his disciple, a contemporary of Bardesanes, inculcated his Gnosticism in a song, in which he introduced the Æons conversing" (*loc. cit.* p. 28).

Harmonius, the son of Bardesanes, stands next in the history of this subject, both chronologically and for his successful cultivation of sacred poetry. He was educated in the language and wisdom of Greece, and there can be no question that he would make his knowledge of the exquisite metrical compositions of that literature bear on the improvement of his own. This is said on

the presumption that the accounts of the ecclesiastical historians Sozomen and Theodoret are credible. The former states, in his *Life of Ephrem*, lib. iii, c. 16, that "Harmonius, the son of Bardesanes, having been well educated in Grecian literature, was the first who subjected his native language to metres and musical laws (πρώτον μέτροις καὶ νόμοις μουσικοῖς τὴν πατριὸν φωνὴν ὑπαγαγεῖν), and adapted it to choirs of singers, as the Syrians now commonly chant—not, indeed, using the writings of Harmonius, but his numbers (τοῖς μέλεσι); for, not being altogether free from his father's heresy and the things which the Grecian philosophers boasted of concerning the soul, the body, and regeneration (παλιγγενεσίας), having set these to music he mixed them with his own writings." The notice of Theodoret is yet more brief. He says (lib. iv, c. 29): "And since Harmonius, the son of Bardesanes, had formerly composed certain songs, and, mingling his impiety with the sweetness of music, enticed his hearers and allured them to destruction, having taken from him metrical harmony (τὴν ἁρμονίαν τοῦ μέλους), Ephrem mixed godliness with it," etc. This statement is not confirmed by Ephrem, who attributes to the father what the Greek historians ascribe to the son. Hahn admits, without any expressed hesitation, the testimony of the Greek historians, their mistake as to the invention of the metres excepted, and ingeniously traces to Harmonius certain features of the Syriac poetry (*Ueber den Gesang in der syrischen Kirche*, p. 61). Assemani, in his *Bibliotheca Orientalis*, i, 61, makes an incidental allusion to Harmonius, intimating that in the later transcriptions of Syriac literature his name and influence were acknowledged, since both he and his father, Bardesanes, are mentioned in MSS. as the inventors of metres.

Until we come to Ephrem, there is one more name which has historical or traditional importance in Syriac metrical literature—that is Baleus, or more properly Balai, who, as Hahn says (*Bardesanus*, p. 47), "gave his name to the pentasyllabic metre, because the orthodox Syrians entertained a horror of Bardesanes." Before Ephrem, according to the catalogue of Ebedjesu, lived Simeon, bishop of Seleucia, who suffered martyrdom about the year 296. Two of his hymns are, according to Assemani, to be found in the sacred offices of the Chaldeans. The greatest of all hymn-writers whose works are extant, and whose hymns have been translated into German as well as into English (see Burgess, *Metrical Hymns and Homilies* [Lond. 1853]), was Ephrem Syrus (q. v.). Besides these writers, the following are mentioned by Ebedjesu: Paulona, a disciple of Ephrem; Marutha, bishop of Maiphercata; Narses of Edessa, surnamed "the harp of the spirit," who used the hexasyllabic metre; Jacob of Edessa; Bahi bar-Nisibone, about A.D. 720; Jacob, bishop of Chalatia, about A.D. 740; Shalita, bishop of Rashana, about A.D. 740; Saliba of Mesopotamia, about A.D. 781; Chabib-Jesu bar-Nun of Bethabara, about A.D. 820; Jesujahab bar-Malkun of Nisibis, about A.D. 1222; Chamisius bar-Kardachi; George Varda, about 1538; Simeon, bishop of Amiola, about 1616; and Gabriel Henna.

VIII. *Literature*.—Assemani, *Bibliotheca Orient. Clementine-Vatic.* (Rom. 1719–28, 3 vols.; abridg. ed. by Pfeiffer, Erlangen, 1776, 2 vols.); Assemani [S. E. and J. S.], *Bibliotheca Apostol. Vatic. Codic. MSS. Catal.* (Rom. 1785 sq.); Mai, *Catal. Codd. Bibl. Vatic. Arab. etc., item ejus partis Hebr. et Syriaci quam Assemani in editione sua prætermiserunt* (ibid. 1831); Rosen, *Catal. Codd. MSS. Orientalium qui in Museo Britannico asservantur* (Lond. 1838 sq.); Wiseman, *Horæ Syriacæ* (Rom. 1829); Wenrich, *De Auctorum Græc. Versionibus et Commentariis Syriacis* (Lips. 1842). Besides the works already mentioned in this article, see the article "Syrische Sprache u. Literatur" in the *Regensburger Allgemeine Real-Encyklop.*; Etheridge, *The Syriac Churches and Gospels* (Lond. 1846); Bickell, "Sy-

risches für deutsche Theologen" in the *Liter. Handweiser*, No. 77, 78, 79, 80, 82, 86, 88, 91, 92; id. *Conspetus Rei Syrorum Literariæ Additis Notis Bibliographicis et Excerptis Anecdoticis* (Münster, 1871); Hermann, *Bibliotheca Orientalis et Linguistica* (Halle, 1870); and Friederici, *Bibliotheca Orientalis* (Lond. 1876, 1877, 1878). **Syriac Versions.** The following account of the translations of the Holy Scriptures in the ancient Syriac language is sufficiently copious on the general subject. See VERSIONS.

1. *The Old Testament*.—There are two Syriac translations of this part of the Bible, one made directly from the original, and the other from an ancient Greek version.

A. *From the Hebrew*.—1. *Name*.—In the early times of Syrian Christianity there was executed a version of the Old Test. from the original Hebrew, the use of which must have been as widely extended as was the Christian profession among that people. Ephrem the Syrian, in the latter half of the 4th century, gives abundant proof of its use in general by his countrymen. When he calls it "our version," it does not appear to be in opposition to any other Syriac translation (for no other can be proved to have then existed), but in contrast with the original Hebrew text, or with those in other languages (Ephrem, *Opera Syr.* i, 380, on 1 Sam. xxiv, 4). At a later period this Syriac translation was designated *Peshito*, a term in Syriac which signifies *simple* or *single*, and which is thought by some to have been applied to this version to mark its freedom from glosses and allegorical modes of interpretation (Hävernick, *Einleit.* I, ii, 90). It is probable that this name was applied to the version after another had been formed from the Hexaplar Greek text. (See below.) In the translation made from Origen's revision of the Sept., the critical marks introduced by him were retained, and thus every page and every part was marked with asterisks and obeli, from which the translation from the Hebrew was free. It might, therefore, be but natural for a bare text to be thus designated, in contrast with the marks and the citations of the different Greek translators found in the version from the Hexaplar Greek.

2. *Date*.—This translation from the Hebrew has always been the ecclesiastical version of the Syrians; and when it is remembered how in the 5th century dissensions and divisions were introduced into the Syrian churches, and how from that time the Monophysites and those termed Nestorians have been in a state of unhealed opposition, it shows not only the antiquity of this version, but also the deep and abiding hold which it must have taken on the mind of the people, that this version was firmly held fast by both of these opposed parties, as well as by those who adhere to the Greek Church, and by the Maronites. Its existence and use prior to their divisions is sufficiently proved by Ephrem alone. But how much older it is than that deacon of Edessa we have no evidence. From Bar-Hebræus (in the 13th century) we learn that there were three opinions as to its age: some saying that the version was made in the reigns of Solomon and Hiram; some that it was translated by Asa, the priest who was sent by the king of Assyria to Samaria; and some that the version was made in the days of Addai the apostle and of Abgarus, king of Osroëne (at which time, he adds, the *Simple* version of the New Test. was also made) (Wiseman, *Horæ Syriacæ*, p. 90). The first of these opinions, of course, implies that the books written before that time were then translated; indeed, a limitation of somewhat the same kind would apply to the second. The ground of the first opinion seems to have been the belief that the Tyrian king was a convert to the profession of the true and revealed faith held by the Israelites; and that the possession of Holy Scripture

in the Syriac tongue (which they identified with his own) was a necessary consequence of this adoption of the true belief: this opinion is mentioned as having been held by some of the Syrians in the 9th century. The second opinion (which does not appear to have been cited from any Syriac writer prior to Bar-Hebræus) seems to have some connection with the formation of the Samaritan version of the Pentateuch. As that version is in an Aramæan dialect, any one who supposed that it was made immediately after the mission of the priest from Assyria might say that it was then first that an Aramæan translation was executed; and this might afterwards, in a sort of indefinite manner, have been connected with what the Syrians themselves used. James of Edessa (in the latter half of the 7th century) had held the third of the opinions mentioned by Bar-Hebræus, who cites him in support of it, and accords with it.

It is highly improbable that any part of the Syriac version is older than the advent of our Lord, those who placed it under Abgarus, king of Edessa, seem to have argued on the theory that the Syrian people then received Christianity; and thus they supposed that a version of the Scriptures was a necessary accompaniment of such conversion. All that the account shows clearly is, then, that it was believed to belong to the earliest period of the Christian faith among them: an opinion with which all that we know on the subject accords well. Thus Ephrem, in the 4th century, not only shows that it was then current, but also gives the impression that this had even then been long the case. For in his commentaries he gives explanations of terms which were even then obscure. This might have been from age: if so, the version was made comparatively long before his days; or it might be from its having been in a dialect different from that to which he was accustomed at Edessa. In this case, then, the translation was made in some other part of Syria; which would hardly have been done unless Christianity had at such a time been more diffused there than it was at Edessa. The dialect of that city is stated to have been the purest Syriac; if, then, the version was made for that place, it would no doubt have been a monument of such purer dialect. Probably the origin of the Old Syriac version is to be compared with that of the Old Latin [see VULGATE]; and it probably differed as much from the polished language of Edessa as did the Old Latin, made in the African province, from the contemporary writers of Rome, such as Tacitus. Even though the traces of the origin of this version of the Old Test. be few, yet it is of importance that they should be marked; for the Old Syriac has the peculiar value of being the first version from the Hebrew original made for Christian use, and, indeed, the only translation of the kind before that of Jerome which was made subsequently to the time when Ephrem wrote. This Syriac commentator may have termed it "our version" in contrast with all others then current (for the Targums were hardly versions), which were merely reflections of the Greek and not of the Hebrew original.

3. *Origin*.—The proof that this version was made from the Hebrew is twofold: we have the direct statements of Ephrem, who compares it in places with the Hebrew, and speaks of this origin as a fact; and who is confirmed (if that were needful) by later Syrian writers; we find the same thing evident from the internal examination of the version itself. Whatever internal change or revision it may have received, the Hebrew groundwork of the translation is unmistakable. Such indications of revision must be afterwards briefly specified.

From Ephrem having mentioned *translators* of this version, it has been concluded that it was the work of several: a thing probable enough in itself, but which could hardly be proved from the occurrence of a casual phrase, nor yet from variations in the rendering of the same Hebrew word; such variations being found in al-

most all translations, even when made by one person—that of Jerome, for instance; and which it would be almost impossible to avoid, especially before the time when concordances and lexicons were at hand. Variations in general phraseology give a far surer ground for supposing several translators.

It has been much discussed whether this translation were a Jewish or a Christian work. Some, who have maintained that the translator was a Jew, have argued from his knowledge of Hebrew and his mode of rendering. But these considerations prove nothing. Indeed, it might well be doubted if in that age a Jew would have formed anything except a Chaldee Targum; and thus diffuseness of paraphrase might be expected instead of closeness of translation. There need be no reasonable objection made to the opinion that it is a Christian work. Indeed it is difficult to suppose that, before the diffusion of Christianity in Syria, the version could have been needed.

4. *History*.—The first printed edition of this version was that which appeared in the Paris Polyglot of Le Jay in 1645; it is said that the editor, Gabriel Sionita, a Maronite, had only an imperfect MS., and that, besides errors, it was defective as to whole passages, and even as to entire books. This last charge seems to be so made as if it were to imply that books were omitted besides those of the Apocrypha, a part which Sionita confessedly had not. He is stated to have supplied the deficiencies by translating into Syriac from the Vulgate. It can hardly be supposed but that there is some exaggeration in these statements. Sionita may have filled up occasional hiatus in his MS.; but it requires very definite examination before we can fully credit that he thus supplied whole books. It seems needful to believe that the defective books were simply those in the Apocrypha, which he did not supply. The result, however, is, that the Paris edition is but an infirm groundwork for our speaking with confidence of the text of this version.

In Walton's Polyglot, 1657, the Paris text is reprinted, but with the addition of the apocryphal books which had been wanting. It was generally said that Walton had done much to amend the texts upon MS. authority; but the late Prof. Lee denies this, stating that "the only addition made by Walton was some apocryphal books." From Walton's Polyglot, Kirsch, in 1787, published a separate edition of the Pentateuch. Of the Syriac Psalter there have been many editions. The first of these, as mentioned by Eichhorn, appeared in 1610; it has by the side an Arabic version. In 1625 there were two editions; the one at Paris edited by Gabriel Sionita, and one at Leyden by Erpenius from two MSS. These have since been repeated; but anterior to them all, it is mentioned that the seven penitential Psalms appeared at Rome in 1584. An English *Translation of the Psalms of David* was made from the Peshito by A. Oliver (Bost, 1861).

In the punctuation given in the Polyglots, a system was introduced which was in part a peculiarity of Gabriel Sionita himself. This has to be borne in mind by those who use either the Paris Polyglot or that of Walton; for in many words there is a redundancy of vowels, and the form of some is thus exceedingly changed.

When the British and Foreign Bible Society proposed more than fifty years ago to issue the Syriac Old Test. for the first time in a separate volume, the late Prof. Lee was employed to make such editorial preparations as could be connected with a mere revision of the text, without any specification of the authorities. Dr. Lee collated for the purpose six Syriac MSS. of the Old Test. in general, and a very ancient copy of the Pentateuch; he also used in part the commentaries of Ephrem and of Bar-Hebræus (see the *Class. Journal*, 1821, p. 245 sq.). From these various sources he constructed his text, with the aid of that found already in the Polyglots. Of course the corrections depended on the editor's own judgment; and the want of a specification of

the results of collations leaves the reader in doubt as to what the evidence may be in those places in which there is a departure from the Polyglot text. But though more information might be desired, we have in the edition of Lee (Lond. 1823) a veritable Syriac text, from Syriac authorities, and free from the suspicion of having been formed in modern times by Gabriel Sionita's translating portions from the Latin.

But we now have in the MS. treasures brought from the Nitrian valleys the means of far more accurately editing this version. Even if the results should not appear to be striking, a thorough use of these MSS. would place this version on such a basis of diplomatic evidence as would show positively how this earliest Christian translation from the Hebrew was read in the 6th or 7th century, or possibly still earlier: we could thus use the Syriac with a fuller degree of confidence in the criticism of the Hebrew text, just as we can the more ancient versions of the New Test. for the criticism of the Greek.

In the beginning of 1849 the Rev. John Rogers, canon of Exeter, published *Reasons why a New Edition of the Peshito, or Ancient Syriac Version of the Old Testament, should be published*. There was a strong hope expressed soon after the issue of Canon Rogers's appeal that the work would be formally placed in a proper manner in the hands of the Rev. Wm. Cureton, and thus be accomplished under his superintendence at the Oxford University press. Canon Rogers announced this in an Appendix to his pamphlet. This, however, has not been effected.

The only tolerable lexicon for the Old-Test. Peshito is Michaelis's enlarged reprint of Castell (Gött. 1878, 2 pts. 8vo), for Bernstein did not live to publish more than one part of his long-expected lexicon. See SYRIAC LANGUAGE.

5. *Identity.*—But, if the printed Syriac text rests on by no means a really satisfactory basis, it may be asked, How can it be said positively that what we have is the same version substantially that was used by Ephrem in the 4th century? Happily, we have the same means of identifying the Syriac with that anciently used as we have of showing that the modern Latin Vulgate is substantially the version executed by Jerome. We admit that the common printed Latin has suffered in various ways, and yet at the bottom and in its general texture it is undoubtedly the work of Jerome: so with the Peshito of the Old Test., whatever errors of judgment were committed by Gabriel Sionita, the first editor, and however little has been done by those who should have corrected these things on MS. authority, the identity of the version is too certain for it to be thus destroyed, or even (it may be said) materially obscured.

From the citations of Ephrem, and the single words on which he makes remarks, we have sufficient proof of the identity of the version; even though at times he also furnishes proof that the copies as printed are not exactly as he read. (See the instances of accordance, mostly from the places given by Wiseman, *Hor. Syr.* p. 122, etc., in which Ephrem thinks it needful to explain a Syrian word in this version, or to discuss its meaning, either from its having become antiquated in his time, or from its being unused in the same sense by the Syrians of Edessa.)

The proof that the version which has come down to us is substantially that used by the Syrians in the 4th century is, perhaps, more definite from the comparison of words than it would have been from the comparison of passages of greater length; because in longer citations there always might be some ground for thinking that perhaps the MS. of Ephrem might have been conformed to later Syriac copies of the sacred text; while, with regard to peculiar words, no such suspicion can have any place, since it is on such words still found in the Peshito that the remarks of Ephrem are based. The fact that he sometimes cites it differ-

ently from what we now read only shows a variation of copies, perhaps ancient, or perhaps such as is found merely in the printed text that we have.

6. *Relations to other Texts.*—It may be said that the Syriac in general supports the Hebrew text that we have: how far arguments may be raised upon minute coincidences or variations cannot be certainly known until the ancient text of the version is better established. Occasionally, however, it is clear that the Syriac translator read one consonant for another in the Hebrew, and translated accordingly: at times another vocalization of the Hebrew was followed.

A resemblance has been pointed out between the Syriac and the reading of some of the Chaldee Targums. If the Targum is the older, it is not unlikely that the Syriac translator, using every aid in his power to obtain an accurate knowledge of what he was rendering, examined the Targums in difficult passages. This is not the place for formally discussing the date and origin of the Targums (q. v.); but if (as seems almost certain) the Targums which have come down to us are almost without exception more recent than the Syriac version, still they are probably the successors of earlier Targums, which by amplification have reached their present shape. Thus, if existing Targums are more recent than the Syriac, it may happen that their coincidences arise from the use of a common source—an earlier Targum.

But there is another point of inquiry of more importance: it is, how far has this version been affected by the Sept. and to what are we to attribute this influence? It is possible that the influence of the Sept. is partly to be ascribed to copyists and revisers; while, in part, this belonged to the version as originally made. For, if a translator had access to another version while occupied in making his own, he might consult it in cases of difficulty; and thus he might unconsciously follow it in other parts. Even knowing the words of a particular translation may affect the mode of rendering in another translation or revision. Thus a tinge from the Sept. may easily have existed in this version from the first, even though in whole books it may not be found at all. But when the extensive use of the Sept. is remembered, and how soon it was superstitiously imagined to have been made by direct inspiration, so that it was deemed canonically authoritative, we cannot feel wonder that readings from the Sept. should have been, from time to time, introduced; this may have commenced probably before a Syriac version had been made from the Hexaplar Greek text; because in such revised text of the Sept. the additions, etc., in which that version differed from the Hebrew would be so marked that they would hardly seem to be the authoritative and genuine text. (See the article following.)

Some comparison with the Greek is probable even before the time of Ephrem; for, as to the apocryphal books, while he cites some of them (though not as Scripture), the apocryphal additions to Daniel and the books of Maccabees were not yet found in Syriac. Whoever translated any of these books from the Greek may easily have also compared with it in some places the books previously translated from the Hebrew.

7. *Revisions.*—In the book of Psalms this version exhibits many peculiarities. Either the translation of the Psalter must be a work independent of the Peshito in general, or else it has been strangely revised and altered, not only from the Greek, but also from liturgical use. Perhaps, indeed, the Psalms are a different version; and that in this respect the practice of the Syrian churches is like that of the Roman Catholic Church and the Church of England in using liturgically a different version of the book so much read ecclesiastically.

It is stated that, after the divisions of the Syrian Church, there were revisions of this one version by the Monophysites and by the Nestorians; probably it would

be found, if the subject could be fully investigated, that there were in the hands of different parties copies in which the ordinary accidents of transcription had introduced variations.

The *Karkaphensian* recension mentioned by Bar-Hebraeus was only known by name prior to the investigations of Wiseman; it is found in two MSS. in the Vatican. In this recension Job comes before Samuel; and immediately after Isaiah the minor prophets. The Proverbs succeed Daniel. The arrangement in the New Test. is quite as singular. It begins with the Acts of the Apostles and ends with the four Gospels; while the epistles of James, Peter, and John come before the fourteen letters of Paul. This recension proceeded from the Monophysites. According to Assemani and Wiseman, the name signifies *mountainous*, because it originated with those living about Mount Sagar, where there was a monastery of Jacobite Syrians, or simply because it was used by them. There is a peculiarity in the punctuation introduced by a leaning towards the Greek; but it is, as to its substance, the Peshito version.

B. *The Syriac Version from the Hexaplar Greek Text.*—1. *Origin and Character.*—The only Syriac version of the Old Test. up to the 6th century was apparently the Peshito as above. The first definite intimation of a portion of the Old Test. translated from the Greek is through Moses Agheleus. This Syriac writer lived in the middle of the 6th century. He made a translation of the *Glaphyra* of Cyril of Alexandria from Greek into Syriac; and, in the prefixed epistle, he speaks of the versions of the New Test. and the *Psalter*, "which Polycarp (rest his soul!), the chorepiscopus, made in Syriac for the faithful Xenaia, the teacher of Mabus, worthy of the memory of the good" (Assemani, *Bibliotheca Orientalis*, ii, 83). We thus see that a Syriac version of the Psalms had a similar origin to the Philoxenian Syriac New Test. We know that the date of the latter was A.D. 508; the *Psalter* was probably a contemporaneous work. It is said that the Nestorian patriarch Marabba, A.D. 552, made a version from the Greek; it does not appear to be in existence, so that, if ever it was completely executed, it was probably superseded by the Hexaplar version of Paul of Tella; indeed, Paul may have used it as the basis of his work, adding marks of reference, etc.

This version of Paul of Tella, a Monophysite, was made in the beginning of the 7th century, for its basis he used the Hexaplar Greek text—that is, the Sept., with the corrections of Origen, the asterisks, obeli, etc., and with the references to the other Greek versions. The Greek text at its basis agrees, for the most part, with the Codex Alexandrinus. But it often leans to the Vatican, and not seldom to the Complutensian texts. At other times it departs from all.

The Syro-Hexaplar version was made on the principle of following the Greek, word for word, as exactly as possible. It contains the marks introduced by Origen, and the references to the versions of Aquila, Symmachus, Theodotion, etc. In fact, it is from this Syriac version that we obtain our most accurate acquaintance with the results of the critical labors of Origen.

2. *History.*—Andreas Masius, in his edition of the book of Joshua (Antwerp, 1574), first used the results of this Syro-Hexaplar text; for, on the authority of a MS. in his possession, he revised the Greek, introducing asterisks and obeli, thus showing what Origen had done, how much he had inserted in the text, and what he had marked as not found in the Hebrew. The Syriac MS. used by Masius has long been lost; though in this day, after the recovery of the Codex Reuchlini of the Apocalypse (from which Erasmus first edited that book) by Prof. Delitzsch, it could hardly be a cause for surprise if this Syriac Codex should again be found.

It is from a MS. in the Ambrosian library at Milan that we possess accurate means of knowing this Syriac version. The MS. in question contains the Psalms,

Job, Proverbs, Ecclesiastes, Canticles, Wisdom, Ecclesiasticus, minor prophets, Jeremiah, Baruch, Daniel, Ezekiel, and Isaiah. Norberg published, at Lund in 1787, the books of Jeremiah and Ezekiel from a transcript which he had made of the MS. at Milan. In 1788 Bugati published at Milan the book of Daniel; he also edited the Psalms, the printing of which had been completed before his death in 1816; it was published in 1820. The rest of the contents of the Milan Codex (with the exception of the apocryphal books) was published at Berlin in 1835, by Middeldorpf, from the transcript made by Norberg; Middeldorpf also added the fourth (second) book of Kings from a MS. at Paris. Rördm issued *Libri Judicum et Ruth secundum Versionem Syriaco-Hexaplaarem ex Codice Musei Britannici nunc primum editi, Græce translatis, Notisque illustrati* (in two fasciculi, 1859, 1861, Copenhagen, 4to). A competent scholar has undertaken the task of editing the remainder—Dr. Antonio Ceriani, of Milan. In 1861 appeared his *Monumenta Sacra et Profana* (Milan, tom. i, fascic. i), containing, among other ancient documents, the Hexaplar-Syriac Baruch, Lamentations, and the Epistle of Jeremiah. In the preface the learned editor states his intention to publish, from the Ambrosian MS. and others, the entire version, even the books printed before, of whose inaccurate execution he speaks in just terms. A second part has since appeared.

Besides these portions of this Syriac version, the MSS. from the Nitrian monasteries now in the British Museum would add a good deal more: among these there are six from which much might be drawn, so that part of the Pentateuch and other books may be recovered. These MSS. are like that at Milan, in having the marks of Origen in the text, the references to readings in the margin; and occasionally the Greek word itself is thus cited in Greek. The following is the notation of these MSS., and their contents and dates:

- 12,138 (besides the Peshito Exodus), *Joshua* (defective), cent. vii. "Translated from a Greek MS. of the Hexapla, collated with one of the Tetrapla."
- 12,134, *Exodus*. A.D. 697.
- 14,434, *Psalms* formed from two MSS. cent. viii (with the Song of the Three Children subjoined to the second). Both MSS. are defective. Subscription, "According to the Sept."
- 14,437, *Numbers* and 1 *Kings*, defective (cent. vii or viii). The subscription to 1 *Kings* says that it was translated into Syriac at Alexandria in the year 927 (A.D. 616).
- 14,442, *Genesis*, defective (with 1 Sam. Peshito). "According to the Sept." (cent. vi).
- 17,108, *Judges* and *Ruth*, defective (cent. vii or viii). Subscription to *Judges*, "According to the Sept.;" to *Ruth*, "From the Tetrapla of the Sept."

Rördm issued at Copenhagen in 1859 the first portion of an edition of the MS. 17,108: another part has since been published. Some of these MSS. were written in the same century in which the version was made. They may probably be depended on as giving the text with general accuracy.

C. *Other Texts.*—The list of versions of the Old Test. into Syriac often appears to be very numerous; but on examination it is found that many translations, the names of which appear in a catalogue, are really either such as never had an actual existence, or else that they are either the version from the Hebrew, or else that from the Hexaplar text of the Sept., under different names, or with some slight revision. To enumerate the supposed versions is needless. It is only requisite to mention that Thomas of Harkel, whose work in the revision of a translation of the New Test. will have to be mentioned, seems also to have made a translation from the Greek into Syriac of some of the apocryphal books—at least, the subscriptions in certain MSS. state this.

II. *The Syriac New-Testament Versions.*—These we may conveniently enumerate under five heads, including several recensions under some of them, but treating separately the notable "Curetonian text."

A. *The Peshito-Syriac New Test.* (text of Widmanstadt and Cureton's Gospels).—In whatever forms the Syriac New Test. may have existed prior to the time

of Philoxenus (the beginning of the 6th century), who caused a new translation to be made, it will be more convenient to consider all such most ancient translations or revisions together; even though there may be reasons afterwards assigned for not regarding the version of the earlier ages of Christianity as absolutely one.

1. *Date*.—It may stand as an admitted fact that a version of the New Test. in Syriac existed in the 2d century; and to this we may refer the statement of Eusebius respecting Hegesippus, that he "made quotations from the Gospel according to the Hebrews and the Syriac," *ἐκ τοῦ κατ' Ἑβραίους εὐαγγελίου καὶ τοῦ Συριακοῦ* (*Hist. Eccl.* iv, 22). It seems equally certain that in the 4th century such a version was as well known of the New Test. as of the Old. It was the companion of the Old Test. translation made from the Hebrew, and as such was in habitual use in the Syriac churches. To the translation in common use among the Syrians, orthodox, Monophysite, or Nestorian, from the 5th century and onward, the name of Peshito has been as commonly applied in the New Test. as the Old. In the 7th century at least the version so current acquired the name of *old*, in contrast to that which was then formed and revised by the Monophysites.

Though we have no certain data as to the origin of this version, it is probable on every ground that a Syriac translation of the New Test. was an accompaniment of that of the Old; whatever therefore bears on the one, bears on the other also.

2. *History*.—There seem to be but few notices of the old Syriac version in early writers. Cosmas Indicopleustes, in the former half of the 6th century, incidentally informs us that the Syriac translation does not contain the Second Epistle of Peter, 2 and 3 John, and Jude. This was found to be correct when, a thousand years afterwards, this ancient translation became again known to Western scholars. In 1552, Moses of Mardin came to Rome to pope Julius III, commissioned by Ignatius, the Jacobite (Monophysite) patriarch, to state his religious opinions, to effect (it is said) a union with the Romish Church, and to get the Syriac New Test. printed. In this last object Moses failed both at Rome and Venice. At Vienna he was, however, successful. Widmanstadt, the chancellor of the emperor Ferdinand I, had himself learned Syriac from Theodosius Ambrosius many years previously; and through his influence the emperor undertook the charge of an edition which appeared in 1555, through the joint labors of Widmanstadt, Moses, and Postell. Some copies were afterwards issued with the date of 1562 on the back of the title.

In having only three Catholic epistles, this Syriac New Test. agreed with the description of Cosmas; the Apocalypse was also wanting, as well as the section John viii, 1-11; this last omission, and some other points, were noticed in the list of errata. It also wants some words in Matt. x, 8 and xxvii, 35; two verses in Luke xxii—viz. 17, 18; and 1 John v, 7, all which are absent from Syriac MSS. In 2 Cor. v, 8 it has *in the heaven of purity*, which is found in Nestorian sources alone; but it has the usual reading in Heb. ii, 9, not the Nestorian one *χωρὶς ᾀσῶν*. The editors appear to have followed their MSS. with great fidelity, so that the edition is justly valued. In subsequent editions endeavors were made conjecturally to amend the text by introducing 1 John v, 7 and other portions which do not belong to this translation. One of the principal editions is that of Leusden and Schaaf; in this the text is made as full as possible by supplying every lacuna from any source; in the punctuation there is a strange peculiarity, that in the former part Leusden chose to follow a sort of Chaldean analogy, while, on his death, Schaaf introduced a regular system of Syriac vocalization through all the rest of the volume. The Lexicon which accompanies this edition is of great value. This edition was first issued in 1708: more copies, however, have the date 1709; while some have the false and dishonest state-

ment on the title-page, "Secunda editio a mendis purgata," and the date 1717. The late Prof. Lee published an edition in 1816, in which he corrected or altered the text on the authority of a few MSS. This is so far independent of that of Widmanstadt. It is, however, very far short of being really a critical edition. In 1828 the edition of Mr. William Greenfield (often reprinted from the stereotype plates), was published by Messrs. Bagster; in this the text of Widmanstadt was followed (with the vowels fully expressed), and with certain supplements within brackets from Lee's edition. For the collation with Lee's text Greenfield was not responsible. There are now in Europe excellent materials for the formation of a critical edition of this version: it may, however, be said that, as in its first publication the MSS. employed were honestly used, it is in the text of Widmanstadt in a far better condition than is the Peshito Old Test. The best lexicon, which also serves for a concordance, is Schaaf's (1709, 4to). The Peshito has been translated into English by Etheridge (1846, 1849, 2 vols. 12mo); and better by Murdock (in 1 vol. 8vo, N. Y. 1851).

3. *Character*.—This Syriac version has been variously estimated: some have thought that in it they had a genuine and unaltered monument of the 2d, or perhaps even of the 1st century. They thus naturally upheld it as almost co-ordinate in authority with the Greek text, and as being of a period anterior to any Greek copy extant. Others, finding in it indubitable marks of a later age, were inclined to deny that it had any claim to a very remote antiquity. Thus La Croze thought that the commonly printed Syriac New Test. is not the Peshito at all, but the Philoxenian executed in the beginning of the 6th century. The fact is, that this version as transmitted to us contains marks of antiquity, and also traces of a later age. The two things are so blended that, if either class of phenomena alone were regarded, the most opposite opinions might be formed. The opinion of Wettstein was one of the most perverse that could be devised: he found in this version readings which accord with the Latin; and then, acting on the strange system of criticism which he adopted in his later years, he asserted that any such accordance with the Latin was a proof of corruption from that version: so that with him the proofs of antiquity became the tokens of later origin, and he thus assigned the translation to the 7th century. With him the real indications of later readings were only the marks of the very reverse. Michaelis took very opposite ground to that of Wettstein; he upheld its antiquity and authority very strenuously. The former point could be easily proved, if one class of readings alone were considered; and this is confirmed by the contents of the version itself. But, on the other hand, there are difficulties, for very often readings of a much more recent kind appear; it was thus thought that it might be compared with the Latin as found in the Codex Brixianus, in which there is an ancient groundwork, but also the work of a reviser is manifest. Thus the judgment formed by Griesbach seems to be certainly the correct one as to the peculiarity of the text of this version. He says (using the terms proper to his system of recensions): "Nulli harum recensionum Syriaca versio, prout quidem typis excusa est, similis, verum nec ulli prorsus dissimilis est. In multis concinit cum Alexandrina recensione, in pluribus cum Occidentali, in nonnullis etiam cum Constantinopolitana, ita tamen ut quæ in hanc posterioribus demum seculis invecata sunt, plerique repudiet. *Diversis ergo temporibus ad Græcos codices plane diversos iterum iterumque recognita esse videtur*" (*Nov. Test. Proleg.* lxxv). In a note Griesbach introduced the comparison of the Codex Brixianus, "Illustrari hoc potest codicum nonnullorum Latinorum exemplo, qui priscam quidem versionem ad Occidentalem recensionem accommodatam representant, sed passim ad juniores libros Græcos refectam. *Ex hoc genere est Brixianus demum Latinus, qui non raro a*

Græco-Latinis et vetustioribus Latinis omnibus solus discedit, et in Græcorum partes transit." Some proof that the text of the common printed Peshito has been re-wrought will appear when it is compared with the Curetonian Syriac Gospels.

4. *Minor Recensions.*—Whether the whole of this version proceeded from the same translator has been questioned. Not only may Michaelis be right in supposing a peculiar translator of the Epistle to the Hebrews, but also other parts may be from different hands; this opinion will become more general the more the version is studied. The revisions to which the version was subjected may have succeeded in part, but not wholly, in effacing the indications of a plurality of translators. The Acts and Epistles seem to be either more recent than the Gospels, though far less revised; or else, if coeval, far more corrected by later Greek MSS.

There is no sufficient reason for supposing that this version ever contained the four catholic epistles and the Apocalypse, now absent from it, not only in the printed editions but also in the MSS.

Some variations in copies of the Peshito have been regarded as if they might be styled Monophysite and Nestorian recensions; but the designation would be far too definite, for the differences are not sufficient to warrant the classification.

The MSS. of the *Karkaphensian* recension (as it has been termed) of the Peshito Old Test. contain also the New with a similar character of text.

B. *The Curetonian Syriac Gospels.*—This, although in reality but a variety of the Peshito, exhibits such marked peculiarities that it may almost be called a distinct version.

1. *History, Date, and Contents.*—Among the MSS. brought from the Nitrian monasteries in 1842, Dr. Cureton noticed a copy of the Gospels differing greatly from the common text; and this is the form of text to which the name of "Curetonian Syriac" has been rightly applied. Every criterion which proves the common Peshito not to exhibit a text of extreme antiquity, equally proves the early origin of this. The discovery is in fact that of the object which was wanted, the want of which had been previously ascertained. Dr. Cureton considers that the MS. of the Gospels is of the fifth century, a point in which all competent judges are probably agreed. Some persons, indeed, have sought to depreciate the text, to point out its differences from the Peshito, to regard all such variations as corruptions, and thus to stigmatize the Curetonian Syriac as a corrupt revision of the Peshito, barbarous in language and false in readings. This peremptory judgment is as reasonable as if the old Latin in the Codex Vercellensis were called an ignorant revision of the version of Jerome. The judgment that the Curetonian Syriac is older than the Peshito is not the peculiar opinion of Cureton, Alford, Tregelles, or Biblical scholars of the school of ancient evidence in this country, but it is also that of Continental scholars, such as Ewald, and apparently of the late Prof. Bleek.

The MS. contains Matt. i-viii, 22; x, 31-xxiii, 25; Mark, the four last verses only; John i, 1-42; iii, 6-vii, 37; xiv, 11-29; Luke ii, 48-iii, 16; vii, 33-xv, 21; xvii, 24-xxiv, 41. It would have been a thing of much value if a perfect copy of this version had come down to us; but as it is, we have reason greatly to value the discovery of Dr. Cureton, which shows how truly those critics have argued who concluded that such a version must have existed, and who regarded this as a proved fact, even when not only no portion of the version was known to be extant, but also when even the record of its existence was unnoticed. For there is a record showing an acquaintance with this version, to which, as well as to the version itself, attention has been directed by Dr. Cureton. Bar-Salibi, bishop of Amida in the 12th century, in a passage translated by Dr. C. (in discussing the omission of three kings in the genealogy in Matthew), says: "There is found occasionally a Syriac copy,

made out of the Hebrew, which inserts these three kings in the genealogy; but afterwards it speaks of *fourteen* and not of *seventeen* generations, because fourteen generations has been substituted for seventeen by the Hebrews on account of their holding to the septenary number," etc. This shows that Bar-Salibi knew of a Syriac text of the Gospels in which Ahaziah, Joash, and Amaziah were inserted in Matt. i, 8; there is the same reading in the Curetonian Syriac: but this might have been a coincidence. But in ver. 17 the Curetonian text has, in contradiction to ver. 8, *fourteen* generations and not *seventeen*; and so had the copy mentioned by Bar-Salibi: the former point might be a mere coincidence; the latter, however, shows such a kind of union in contradiction as proves the identity very convincingly. Thus, though this version was unknown in Europe prior to its discovery by Dr. Cureton, it must in the 12th century have been known as a text sometimes found; and, as mentioned by the Monophysite bishop, it might be more in use among his co-religionists than among others. Perhaps, as its existence and use is thus recorded in the 12th century, some further discovery of Syriac MSS. may furnish us with another copy so as to supply the defects of the one happily recovered.

2. *Relation to the Peshito and to Older Texts.*—In examining the Curetonian text with the common printed Peshito, we often find such identity of phrase and rendering as to show that they are not wholly independent translations; then, again, we meet with such variety in the forms of words, etc., as seems to indicate that in the Peshito the phraseology had been revised and refined. But the great (it might be said characteristic) difference between the Curetonian and the Peshito gospels is in their readings; for while the latter cannot in its present state be deemed an unchanged production of the 2d century, the former bears all the marks of extreme antiquity, even though in places it may have suffered from the introduction of readings current in very early times.

The following are a few of the very many cases in which the ancient reading is found in the Curetonian, and the later or transition reading in the Peshito. For the *general authorities* on the subject of each passage, reference must be made to the notes in critical editions of the Greek New Test.

Matt. xix, 17, *τι με ἔρωτες περὶ τοῦ ἀγαθοῦ; the ancient reading, as we find in the best authorities, and as we know from Origen; so the Curetonian: τι με λέγετε ἀγαθόν; the common text with the Peshito. Matt. xx, 22, the clause of the common text, καὶ τὸ ἄπιστος αὐτὸν βαπτίσματα, are in the Peshito; while we know from Origen that they were in his day a peculiarity of Mark: omitted in the Curetonian with the other best authorities. In fact, except the Peshito and some revised Latin copies, there is no evidence at all extant for these words prior to the 6th century. Matt. v, 4, 5: here the ancient order of the beatitudes, as supported by Origen, Tertullian, the canons of Eusebius, and Hilary, is that of placing μακάριοι οἱ πραεῖς, κ. τ. λ., before μακάριοι οἱ πενθῶντες, κ. τ. λ.; here the Curetonian agrees with the distinct testimonies for this order against the Peshito. In i, 18, we know from Irenæus that the name "Jesus" was not read; and this is confirmed by the Curetonian: in fact, the common reading, however widely supported, could not have originated until Ἰησοῦς χριστός was treated as a combined proper name, otherwise the meaning of τοῦ δὲ Ἰησοῦ χριστοῦ ἡ γένεσις would not be "the birth of Jesus Christ," but "the birth of Jesus as the Christ." Here the Curetonian reading is in full accordance with what we know of the 2d century in opposition to the Peshito. In vi, 4 the Curetonian omits αὐτός; in the same ver. and in ver. 6 it omits ἐν τῷ φανερῷ: in each case with the best authorities, but against the Peshito. Matt. v. 44 has been amplified by copyists in an extraordinary manner: the words in brackets show the amplifications, and the place from which each was taken: ἐγὼ δὲ λέγω ὑμῖν, Ἀγαπᾶτε τοὺς ἐχθρούς ὑμῶν [εὐλογεῖτε τοὺς καταραμένους ὑμῶν, Luke vi, 28; καλῶς ποιεῖτε τοὺς μισούντας ὑμᾶς, ver. 27], καὶ προσέχετε ὑπὲρ τῶν [ἐπηρεαζόντων ὑμᾶς καὶ, ver. 35] διωκόντων ὑμᾶς. The briefer form is attested by Irenæus, Clement, Origen, Cyprian, Eusebius, etc.: and though the inserted words and clauses are found in almost all Greek MSS. (except Codices Vaticanus and Sinaiticus), and in many versions, including the Peshito, they are not in the Curetonian Syriac. Of a similar kind are Matt. xviii, 35, τὰ πα-*

ροπαῖματα αὐτῶν: Luke viii, 54, ἐκβαλὼν ἔβω πάντας καὶ: ix, 7, ἐπ' αὐτοῦ; ver. 54, ὡς καὶ ἡλίαις ἐποίησεν: xi, 2, γενήσῃτο τὸ Σέλημά σου ὡς ἐν οὐρανῷ καὶ ἐπὶ τῆς γῆς: ver. 28, τοῦ προσήκοντος: ver. 44, γραμματεῖς καὶ φαρισαῖοι ὑποκριταί: John iv, 43, καὶ ἀπελθόντες: v, 16, καὶ ἤκουσαν αὐτὸν ἀποκτείναι: vi, 51, ἢν ἐγὼ ὁσσω: ver. 69, τοῦ ζῶντος.

On the other hand, the Curetonian often changes the text for the worse, as in the following examples:

In Luke xxiv the fortieth verse is omitted, contrary to the Peshito and the most ancient uncial MSS. A, B, &c. In Matt. xxii, 35, καὶ λέγων is read by the Curetonian; but it is absent from the Peshito, which is supported by B and &c. In vii, 22, the words "have we not eaten and drunk in thy name?" are inserted without any MS. authority, apparently from Luke xiii, 26. In xi, 23, instead of the usual Greek text, it has "thou shalt not be exalted to heaven, but;" contrary to all authority, and betraying at the same time a Greek original with μὴ. In xxi, 9, it is added at the end, "and many went out to meet him, and were rejoicing and praising God concerning all that which they saw," words wholly unauthorized. In ver. 23, ὁδὸς κοινοῦ is omitted without authority. In xxiii, 18, from δε εὐν το ἐστιν are also left out, contrary to all external evidence. In Luke viii, 16, is the unauthorized addition "he set forth another parable." In xi, 29, "except the sign of the prophet Jonas" is omitted, contrary to MSS. Luke xx, 13 is omitted without authority. In xxii, ver. 20 is wanting, and ver. 19 is put before ver. 17: ἀδόμοτον is also absent in ver. 19 without authority. In John v, 8, we have the addition "go away to thy house." So, too, in ver. 9, "and he took up his bed" is omitted. In vi, 20, μὴ φοβεῖσθε are left out, against MS. authority.

The following are points of comparison with the noted early MSS.:

It often agrees with B, C, D, and the old Latin version before it was corrected by Jerome, especially its MSS. a, b, c; with D most of all. Very seldom does it coincide with A alone. Thus in Matt. xix, 9 the words καὶ ὁ ἀπολελυμένην γαμήσας, μοιχᾶται are omitted, as in D, a, b, e, f; and to ver. 28 a long passage is added which is only in D, a, b, c, d. It omits xvi, 2, 8, with B and two other uncial MSS.; though the old Italic has them, as well as D. In xiii, 55, it has *Joseph* with B, C, the old Italic, Vulgate, and other authorities.

3. *Hebrew Original of Matthew.*—It is not needful for very great attention to be paid to the phraseology of the Curetonian Syriac in order to see that the Gospel of Matthew differs in mode of expression and various other particulars from what we find in the rest. This may lead us again to look at the testimony of Bar-Salibi; he tells us, when speaking of this version of Matthew, "there is found occasionally a Syriac copy made out of the Hebrew;" we thus know that the opinion of the Syrians themselves in the 12th century was that this translation of Matthew was not made from the Greek, but from the Hebrew original of the evangelist: such, too, is the judgment of Dr. Cureton: "this Gospel of Matthew appears at least to be built upon the original Aramaic text, which was the work of the apostle himself" (*Preface to Syriac Gospels*, p. vi).

We know from Jerome that the Hebrew Matthew had מחר where the Greek has ἐπιούσιον. We do not find that word here, but we read for both ἐπιούσιον and σήμερον at the end of the verse, "constant of the day." This might have sprung from the interpretation, "morrow by morrow," given to מחר; and it may be illustrated by Old-Test. passages, e. g. Numb. iv, 7. Those who think that if this Syriac version had been made from Matthew's Hebrew we ought to find מחר here forget that a translation is not a verbal transference.

We know from Eusebius that Hegesippus cited from the gospel according to the Hebrews, and from the Syriac. Now in a fragment of Hegesippus (Routh, i, 219) there is the quotation, μακάριοι οἱ δοῦλοὶ ὑμῶν οἱ βασιλεῖς καὶ τὰ ὕα ὑμῶν τὰ ἀκούοντα, words which might be a Greek rendering from Matt. xiii, 16, as it stands in this Syriac gospel as we have it, or probably also in the Hebrew work of the apostle himself.

From these and other particulars, Dr. Cureton concludes that in this version Matthew's gospel was translated from the apostle's Hebrew (Syro-Chaldaic) origi-

nal, although injured since by copyists or revisers. The same view is maintained by the abbé Lehir (*Etude*, etc. [Par. 1859]); but it is vigorously rejected by Ewald (*Jahrb. d. bibl. Wissenschaft*, vol. ix) and many later critics.

C. *The Philoxenian Syriac Version, and its Revision by Thomas of Harkel.*—Philoxenus, or Xenaïas, bishop of Hierapolis or Mabug at the beginning of the 6th century (who was one of those Monophysites that subscribed the *Henoticon* of the emperor Zeno), caused Polycarp, his chorepiscopus, to make a new translation of the New Test. into Syriac. This was executed in A.D. 508, and it is generally termed Philoxenian from its promoter. In one passage Bar-Hebræus says that it was made in the time of Philoxenus; in his *Chronicon* that it was done by his desire; and in another place of the same work that it was his own production. Moses Agheleus (Assemani, *Biblioth. Oriental*, ii, 83) states that its author was Polycarp, rural bishop of Philoxenus. In an Arabic MS., quoted by Assemani (*ibid.* ii, 23), Philoxenus is said by a Jacobite author to have translated the four Gospels into Syriac.

1. *History.*—This version has not been transmitted to us in the form in which it was first made; we only possess a revision of it, executed by Thomas of Harkel in the following century (*The Gospels*, A.D. 616). Pococke, in 1630, gives an extract from Bar-Salibi, in which the version of Thomas of Harkel is mentioned; and though Pococke did not know what version Thomas had made, he speaks of a Syriac translation of the Gospels communicated to him by some learned man whom he does not name, which, from its servile adherence to the Greek, was no doubt the Harklean text. In the *Bibliotheca Orientalis* of Assemani there were further notices of the work of Thomas; and in 1730 Samuel Palmer sent from the ancient Amida (now Diarbekir) Syriac MSS. to Dr. Gloucester Ridley, in which the version is contained. Thus he had two copies of the Gospels, and one of all the rest of the New Test., except the end of the Epistle to the Hebrews and the Apocalypse. No other MSS. appear to have yet come to light which contain any of this version beyond the Gospels. From the subscriptions we learn that the text was revised by Thomas with three (some copies say two) Greek MSS. One Greek copy is similarly mentioned at the close of the Catholic epistles.

Ridley published in 1761 an account of the MSS. in his possession, and a notice of this version. He had intended to edit the text: this was, however, done by White, at different times from 1778 to 1803. After the publication of the Gospels, the researches of Adler brought more copies into notice of that part of the Harklean text. From one of the MSS. in the Vatican, John's Gospel was edited by Bernstein in 1851. It will be noticed that this version differs from the Peshito in containing all the seven Catholic epistles.

2. *Character.*—In describing this version as it has come down to us, the text is the first thing to be considered. This is characterized by extreme literality: the Syriac idiom is constantly bent to suit the Greek, and everything is in some manner expressed in the Greek phrase and order. It is difficult to imagine that it could have been intended for ecclesiastical reading. It is not independent of the Peshito, the words, etc., of which are often employed. As to the kind of Greek text that it represents, it is just what might have been expected in the 6th century. The work of Thomas in the text itself is seen in the introduction of obeli, by which passages which he rejected were condemned; and of asterisks, with which his insertions were distinguished. His model in all this was the Hexaplar Greek text. The MSS. which were used by Thomas were of a different kind from those employed in making the version; they represented in general a much older and purer text. The margin of the Harklean recension contains (like the Hexaplar text of the Sept.) readings mostly, apparently, from the Greek MSS. used. It has been ques-

tioned whether these readings are not a comparison with the Peshito; if any of them are so, they have probably been introduced since the time of Thomas. It is probable that the Philoxenian version was very literal, but that the slavish adaptation to the Greek is the work of Thomas; and that his *text* thus bore about the same relation to that of Philoxenus as the Latin Bible of Arias Montanus does to that of his predecessor Pagninus. For textual criticism this version is a good authority as to the text of its own time, at least where it does not merely follow the Peshito. The amplifications in the margin of the book of Acts bring a MS. used by Thomas into close comparison with the Codex Bezae. One of the MSS. of the Gospels sent to Ridley contains the Harklean text, with some revision by Bar-Salibi.

The marginal readings are probably the most valuable part of the version in a critical view. One of the Greek MSS. compared by Thomas had considerable affinity to D in the Gospels and Acts. Of 180 marginal readings, about 130 are found in B, C, D, L, i, 33, 69, etc. With D alone of MSS. it harmonizes nineteen times in the Gospels; with D and B seven times. With the Alexandrian, or A, alone, it agrees twice, but with it and others, D, L, eight times. With the Vatican, or B, alone, it harmonizes twice, but with it and others four times (see Adler, p. 130, 131).

D. *Syriac Versions of Portions Wanting in the Peshito*.—(I.) *The Second Epistle of Peter, the Second and Third of John, and that of Jude*.—The fact has already been noticed that the old Syriac version did not contain these epistles. They were published by Pococke in 1630 from a MS. in the Bodleian. The version of these epistles so often agrees with what we have in the Harklean recension that the one is at least dependent on the other. The suggestion of Dr. Davidson (*Biblical Criticism*, ii, 196) that the text of Pococke is that of Philoxenus before it was revised by Thomas seems most probable. But, if it is objected that the translation does not show as great a knowledge of Greek as might have been expected in the translation of the rest of the Philoxenian, it must be remembered that here he had not the Peshito to aid him. In the Paris Polyglot these epistles were added to the Peshito, with which they have since been commonly printed, although they have not the slightest relation to that version.

(II.) *The Apocalypse*.—In 1627 De Dieu edited a Syriac version of the Apocalypse from a MS. in the Leyden library, written by one "Caspar from the land of the Indians," who lived in the latter part of the 16th century. A MS. at Florence, also written by this Caspar, has a subscription stating that it was copied in 1582 from a MS. in the writing of Thomas of Harkel in 622. If this is correct, it shows that Thomas by himself would have been but a poor translator of the New Test. But the subscription seems to be of doubtful authority; and, until the Rev. B. Harris Cowper drew attention to a more ancient copy of the version, we might well be somewhat uncertain if this were really an ancient work. It is of small critical value, and the MS. from which it was edited is incorrectly written. It was in the MS. which Abp. Usher sent as a present to De Dieu in 1631, in which the *whole* of the Syriac New Test. is said to have been contained (of what version is unknown), that having been the only complete MS. of the kind described; and of this MS., in comparison with the text of the Apocalypse printed by De Dieu, Usher says, "the Syriac lately set out at Leyden may be amended by my MS. copy" (Todd, *Walton*, i, 196, note). This book, from the Paris Polyglot and onward, has been added to the Peshito in this translation. Some have erroneously called this Syriac Apocalypse the *Philoxenian*, a name to which it has no title: the error seems to have originated from a verbal mistake in an old advertisement of Greenfield's edition (for which he was not responsible), which said "the *Apocalypse* and the *Epistles* not found in the Peshito are given from the Philoxenian version."

(III.) *The Syriac Version of John viii*, 1-11.—From the MS. sent by Abp. Usher to De Dieu, the latter published this section in 1631. From De Dieu it was inserted in the London Polyglot, with a reference to Usher's MS., and hence it has passed with the other editions of the Peshito, where it is a mere interpolation.

A copy of the same version (essentially) is found in Ridley's *Codex Barsalibei*, where it is attributed to Maras, 622; Adler found it also in a Paris MS. ascribed to Abbas Mar Paul.

Bar-Salibi cites a different version, out of Maras, bishop of Amida, through the chronicle of Zacharias of Melitina. See Assemani (*Biblioth. Orient.* ii, 53 and 170), who gives the introductory words. Probably the version edited is that of Paul (as stated in the Paris MS.), and that of Maras the one cited by Bar-Salibi; while in Ridley's MS. the two are confounded. The Paul mentioned is apparently Paul of Tela, the translator of the Hexaplar Greek text into Syriac.

E. *The Jerusalem Syriac Lectionary*.—The MS. in the Vatican containing this version was pretty fully described by S. E. Assemani in 1756 in the catalogue of the MSS. belonging to that library; but so few copies of that work escaped destruction by fire that it was virtually unpublished and its contents almost unknown. Adler, who, at Copenhagen, had the advantage of studying one of the few copies of this catalogue, drew public attention to this peculiar document in his *Kurze Uebersicht seiner biblisch-kritischen Reise nach Rom* (Altona, 1783), p. 118-127, and, still further, in 1789, in his valuable examination of the Syriac versions. The MS. was written in 1031 in peculiar Syriac writing; the portions are, of course, those for the different festivals, some parts of the Gospels not being there at all. The dialect is not common Syriac; it was termed the *Jerusalem Syriac* from its being supposed to resemble the Jerusalem Talmud in language and other points. The grammar is peculiar; the forms almost Chaldee rather than Syriac; two characters are used for expressing PH and P.

In Adler's opinion its date as a version would be from the 4th to the 6th century; but it can hardly be supposed that it is of so early an age, or that any Syrians then could have used so corrupt a dialect. It may rather be supposed to be a translation made from a Greek lectionary, never having existed as a substantive translation. To what age its execution should be assigned seems wholly uncertain. A further account of the MS. of this version, drawn up from a comparison of Assemani's description in the Vatican catalogue, and that of Adler, with the MS. itself in the Vatican Library, is given in Horne's *Introd.* iv, 284-287. The only complete passage published till recently was owing to Adler—viz. Matt. xxvii, 3-32; and scholars could only repeat or work upon what he gave. But the version has been published entire by Minischalchi Erizzo (Vercina, 1861, 1864, 2 vols. 4to; the first containing the text, with a Latin translation; the second, prolegomena and a glossary). Critical editors of the Greek Testament cannot now overlook this very valuable document, whose readings are so important. It contains the following portions of the Gospels: all Matthew except iii, 12; v, 34-41; vi, 25-34; vii, 19-23; viii, 14-19; x, 9-15, 23-31, 34-36; xi, 16-26; xii, 1-29, 38-50; xiii, 1-43, 55-58; xiv, 1-13, 35, 36; xv, 1-20, 29-31; xvi, 1-12, 20-28; xvii, 20, 27; xviii, 5-9, 11, 21, 22; xix, 1, 2, 13-15; xx, 17-28; xxi, 44-46; xxvi, 40-48; all Mark except i, 12-34, 45; ii, 13, 18-22; iii, 6-35; iv, v, 1-23, 35-43; vi, 6-13, 31-56; vii, 1-23; viii, 1-26, 32, 33; ix, 1-15, 31, 41-50; x, 1-31, 46-52; xi, 1-21, 26-33; xii, 1-27; xiii; xiv; xv, 1-15, 33-42; all Luke except i, 69-75, 77-79; iii, 23-38; iv, 1-15, 37-44; v, 12-16, 33-39; vi, 11-16, 24-30, 37-49; vii, 17, 18, 30-35; viii, 22-25, 40; ix, 7-26, 45-56; x, 13-15, 22-24; xi, 1-26, 34-54; xii, 1, 13-15, 22-31, 41-59; xiii, 1-10, 30-35; xiv, 12-15, 25-35; xv, 1-10; xvi, 1-9, 16-18; xvii, 1, 2, 20-37; xviii, 1, 15-17, 28-34; xix, 11-48; xx, 9-44; xxi, 5-7,

20-24, 37, 38; xxii, 40, 41, 46-71; xxiii, 1-31, 50-56; all John except ii, 23-25; iii, 34-36; iv, 1-4, 43-45; vi, 34, 45, 46, 71; vii, 30-36; xi, 46, 55-57; xiii, 18-30; xix, 21-24.

As to the readings, it appears to us that they are such as characterized the 5th and 6th centuries. The text is not that of N, B, Z, or even D, but rather that of A and C. In Matt. vi, it has the doxology of the Lord's Prayer, which is not in N, B, D, Z; it has John vii, 53-viii, 11; contains John v, 3, 4; has the usual order of the fourth and fifth verses in Matt. v; and has the later enlarged form of ver. 44. It also contains the last twelve verses of Mark xvi, contrary to N and B; has *uioç*, not *θεός*, in John i, 18; and in Matt. xxii, 35 has the later reading *καὶ λέγων*, omitted in B, L, and the Peshito. It has also *οἱ δώδεκα* in Luke xxii, 14, with A, C, E, etc., but contrary to N, B, D, the Curetonian Syriac, and Italic. In John i, 27 it has the words *ἐμ-προσθέν μου γέγονεν*, contrary to N, B, L, and the Curetonian Syriac; but with A, E, F, etc., the old Italic, Vulgate, and Peshito. In Matt. xix, 17 it has the old and genuine *τι με ἰρωτᾷς περὶ τοῦ ἀγαθοῦ*, in John iii, 15, *μη ἀπόληται ἀλλὰ* are omitted with N and the Curetonian Syriac, E, etc. On the whole, while it is easy to see a number of the oldest readings in the text, such as those in N, B, the old Italic, D, etc., yet the readings of a later period prevail. Its text, though often differing from the Peshito, is neither older nor better.

III. *Literature*.—Adler, *N. T. Versiones Syriacæ, Simplex, Philoxeniana et Hierosolymitana denuo examinata* (1789); Wiseman, *Horæ Syriacæ* (1827); Ridley, *De Syriacarum N. Fæderis Versionum Indole atque Usu*, etc. (1761); Winer, *Commentatio de Versionis N. T. Syriacæ Usu Critico caute Instituendo* (1823); Wichelhaus, *De Novi Test. Versione Syriaca Antiqua quam Peschito vocant* (1850); Bernstein, *De Charklensi N. T. Translatione Syriaca Commentatio* (1857); Cureton, *Antient Recension of the Syriac Gospels* (preface, etc., 1858); Lee, *Prolegomena to Bagster's Polyglot*; Reusch, *Syrus Interpres cum Fonte N. T. Græco collatus* (1741); Storr, *Observationes super N. T. Versionibus Syriacis* (1772); Löhlein, *Syrus Ep. ad Ephesios Interpres* (1835); Michaelis [J. D.], *Curæ in Versionem Syriacam Actuum Apostolicorum* (1755); Credner, *De Prophetarum Min. Vers. Syr. quam Peschito vocant Indole* (1827); the *Introductions* of De Wette, Herbst, and Bleek, with Davidson's *Treatise on Biblical Criticism*, vol. ii; also the literature referred to by Walch, *Bibl. Theol.* iv, 143 sq.; Rosenmüller, *Handbuch*, iii, 19 sq., 91 sq.; Danz, *Theol. Wörterb.* p. 927; Darling, *Cyclop. Bibliog.* col. 70; and Herzog, *Real-Encyclop.* s. v.

SYRIAC (*Peshito*) VERSION, RELATION OF, TO THE SEPTUAGINT AND CHALDEE. One of the most mooted points which have vexed scholars is the question as to the relation of the Peshito to the Sept. and Chaldee version.

I. *Relation to the Septuagint*.—A good deal has been written concerning this question, *pro* and *con*. To the former side belong Gesenius, Credner, Hävernick, and Bleek; to the latter, Hirzel and Herbst. Without adducing the arguments used on both sides, it must be admitted that an influence of the Sept. upon the Peshito cannot be denied, and to this supposition we are led by a comparison of the one with the other. To make our assertion good, we will present the following passages from different books, and the reader can draw his own inferences. We commence with the book of Genesis:

ii, 2. Sept. *τῇ ἑκτη*—Syr. *שְׁתִּיתַיָּא*. From the art. *Talmudic Notices on the Septuagint*, s. v. SEPTUAGINT in this *Cyclopædia*, it will be seen that the Sept. changed here purposely "seventh" into "sixth." If the Peshito version were made only from the original Hebrew, there was no reason why the *חֲשִׁבִּיתַיָּא* of the Hebrew should

be translated as if it read *חֲשִׁבִּיתַיָּא*, like the reading of the Sam., Sam. vers., and Syr., which all followed the Sept.

ii, 4. *אֲרִיִן וְשָׁמִים*—Sept. *τὸν οὐρανὸν καὶ τὴν γῆν*; Syr. *שָׁמַיָּא וְאַרְצָא*.

23. *מֵאִשׁ*—Sept. *ἐκ τοῦ ἀνδρός αὐτῆς*; Syr. *דִּמְנָא גְבִירָא*.

24. *וְחַיּוֹן*—Sept. *καὶ ἔσονται οἱ δύο*; Syr. *דְּנַחְוּוֹן תְּרִיחוֹן*.

iii, 2. *מִפְרִי עֵץ*—Sept. *ἀπὸ πάντων ξύλων*; Syr. also has *בָּל*.

7. *עֹלָא*—Sept. *φύλλα*; Syr. *טְרַפְסָא*.

9. *וְיֹאמֶר*—Sept. *καὶ εἶπεν Ἀδὰμ*; Syr. also supplies *אַדָּם*.

11. *וְיֹאמֶר*—Sept. *καὶ εἶπεν αὐτῷ ὁ θεός*; Syr. *דִּמְנָא מְרִיא*.

16. *וְלֹא־הָאִשָּׁח*—Sept. *καὶ τῇ γυναικί*; Syr. *וְלֹא־הָאִשָּׁח*.

iv, 8. *אֲחִיו*—Sept. *διελθόμενον εἰς τὸ πέδιον*; Syr. *בְּרָא לְחֻקְלָהָ*.

10. *וְיֹאמֶר*—Sept. *καὶ εἶπε κύριος*; Syr. *דִּמְנָא מְרִיא*.

*צַעֲרִים*—Sept. *βοῶ*; Syr. *גְּלָא*.

16. *לֹכֵן*—Sept. *οὐχ οὕτως*; Syr. *לֹא־חֻכְנָא*.

17. *כֶּשֶׁם*—Sept. *ἐπὶ τῷ ὀνόματι*; Syr. *עֲלֵשֶׁם*.

25. *אֲחִי־אִשְׁתּוֹ*—Sept. *ἔθαν τὴν γυναῖκα αὐτοῦ*; Syr. *לְחֻוָּא אֲנַתְחָא*.

*וְחֻלְדַּ*—Sept. *καὶ συλλαβούσα ἔτεκεν*; Syr. *וְחֻלְדַּת*.

v, 23. *וְיָדִיר*—Sept. *καὶ ἐγένοντο*; Syr. *וְחֻוֹן* (id. ver. 31).

29. *מִמַּעַשְׁנִי*—Sept. *ἀπὸ τῶν ἐργῶν ἡμῶν*; Syr. *בִּין עֲבָדִין*.

*בִּין*—Sept. *καὶ ἀπὸ*; Syr. *וְבִין*.

vi, 20. *מִכָּל*—Sept. and Syr. *וּמִכָּל*.

vii, 2. *שְׁנִים*—Sept. *δύο δύο*; Syr. *תְּרִין תְּרִין*.

8. *גַּם*—Sept. and Syr. *וְגַם*.

10. *וּמִכָּל*—Sept. and Syr. *וּמִכָּל*.

20. *חֲחִירִים*—Sept. *τὰ ὅρη ὑψηλά*; Syr. *טֹוּרָא רֵמָא*.

viii, 7. *וְיֹאמֶר יִצְחָק וְשׁוֹב*—Sept. *καὶ ἐξελθὼν οὐκ ἀνέ-*

*στρεψε*; Syr. *וּנְסַח מִפְּנֵי וְלֹא הִפֵּךְ*.

17. *כָּל*—Sept. and Syr. *וְכָל* (id. ver. 19).

22. *וְקָר*—Sept. and Syr. *קָר*.

*וְקִיץ*—Sept. and Syr. *קִיץ*.

ix, 2. *בְּכָל*—Sept. *καὶ ἐπὶ πάντα*; Syr. *וּבְכָל*.

5. *וְיָמֵן אִירָא*—Sept. *ἐκ χειρὸς*; Syr. *וְיָמֵן אִירָא*.

7. *וְיֹאמֶר*—Sept. *καὶ πληρώσατε*; Syr. *וְיֹאמֶר*.

10. *בְּבִהֶמָּה*—Sept. *καὶ ἀπὸ κτηνῶν*; Syr. *וְעַם בְּעִירָא*.

xi, 27. *אֶחָא נַחֹר*—Sept. *καὶ τὸν Ναχὼρ*; Syr. *וּלְנַחֹר*.

xii, 3. *וּמִקְלָלֶךָ*—Sept. *καὶ τοῖς καταρωμένοις σε*; Syr. *וּמִלִּבְנֵיךָ*.

7. *וְיֹאמֶר*—Sept. *καὶ εἶπεν αὐτῷ*; Syr. *וְיֹאמֶר*.

13. *נָא*—Sept. and Syr. omit (id. xlii, 8).

xlii, 7. *יִשָּׁב*—Sept. *κατῴκουν*; Syr. *תְּרִבִּין*.

xiv, 1. *וְאִרְיוֹךְ*—Sept. and Syr. *וְאִרְיוֹךְ*.

*תְּרַעֲבִל*—Sept. *Θαρύβιλ*; Syr. *תְּרַעֲבִל*.

2. *וְשִׁנְאָב*—Sept. and Syr. *וְשִׁנְאָב*.

5. *בָּהֶם*, in Ham—Sept. *ἡμᾶς αὐτοῖς*; Syr. *דְּבַחֲחִין*.

6. *בְּהִרְרָם*—Sept. *ἐν τοῖς ὄρεσι*; Syr. *דְּבַטְוִיר*.

17. *שָׂדֵה*, the country—Sept. *τοὺς ἀρχοντας*; Syr. *רִישְׁנָא*.

10. *סֹדֶם עֲמֹרָה*—Sept. *σοδόμων καὶ βασιλεὺς Γομάρης*; Syr. *סֹדֶם וּמִלְכָּא דְּעֲמֹרָה*.

- xiv, 20. בירך—Sept. ὑποχειρίους σου; Syr. בארריך.  
 xv, 5. ויאמר—Sept. καὶ εἶπεν αὐτῷ; Syr. ואמר לה.  
 6. והאמן—Sept. καὶ ἐπίστευσεν Ἀβραμ; Syr. וחימין.  
 אברם.  
 xvi, 2. נא—Sept. and Syr. omit.  
 6. בירך—Sept. ἐν ταῖς χερσὶ σου; Syr. בארריך.  
 15. ירלה—Sept. ἔτεκεν αὐτῷ; Syr. דאחילד לה.  
 xvii, 16. מלכי—Sept. καὶ βασιλεῖς; Syr. ומלכא.  
 19. אלהים—Sept. ὁ θεὸς πρὸς Ἀβραάμ; Syr. לאברהם.  
 ולזרעו—Sept. καὶ τῷ σπέρματι αὐτοῦ; Syr. ולזרעהו.  
 xviii, 5. אחר—Sept. καὶ μετὰ τούτου; Syr. ובחר כן.  
 17. מאברהם—Sept. ἀπὸ Ἀβραάμ τοῦ πατρός μου; Syr. מן עברי אברהם.  
 20. כי רבה—Sept. πεπληθύντα πρὸς με; Syr. עלחקדמי.  
 29. לא אעשה—Sept. οὐ μὴ ἀπολέσω; Syr. לא אהכלאן.  
 xix, 8. אפה—Sept. ἐπεψεν αὐτοῖς; Syr. אפה להון.  
 7. ויאמר—Sept. εἶπε δὲ πρὸς αὐτούς; Syr. ואמר להון.  
 12. מן המקום—Sept. ἐκ τοῦ τόπου τούτου; Syr. מן אתרא הנא.  
 xx, 15. אבימלך—Sept. Ἀβιμέλεχ τῷ Ἀβραάμ; Syr. לאברהם.  
 xxi, 8. יצחק—Sept. Ἰσαὰκ ὁ υἱὸς αὐτοῦ; Syr. ברא לסחוקנה.  
 10. עס (2.)—Sept. and Syr. omit.  
 13. לעמא רבא—Sept. εἰς ἔθνος μέγα; Syr. לעמא רבא.  
 14. וסם—Sept. καὶ ἐπέθηκεν; Syr. וסם.  
 33. ויטע—Sept. καὶ ἐφύτευσεν Ἀβραάμ; Syr. ונצב אברהם.  
 xxii, 13. אחר—Sept. εἰς; Syr. חר.  
 16. את יחידך—Sept. τοῦ ἀγαπητοῦ δὲ ἐμέ; Syr. ליחידך מני.  
 xxiii, 14. לו—Sept. and Syr. omit.  
 19. כדם—Sept. ὃ ἐστιν ὑπέναντι; Syr. כדם.  
 xxiv, 21. מחריש—Sept. καὶ παρεσιώπα; Syr. ומחבקא.  
 25. ואף אתרח—Sept. καὶ τόπος; Syr. ואף אתרח.  
 31. ויאמר—Sept. καὶ εἶπεν αὐτῷ; Syr. ואמר לה.  
 33. ויאמר דבר—Sept. καὶ εἶπεν, ἀλάησον; Syr. ואמרין לה אמר.  
 38. לברי מן—Sept. τῷ υἱῷ μου ἐκείθεν; Syr. לברי מן.  
 חמן.  
 40. חררר—Sept. αὐτὸς ἐξαποστειλεῖ; Syr. חררר.  
 54. שלחני—Sept. ἐκπέμψατέ με ἵνα ἀπέλθω; Syr. שדרוני אזל.  
 55. ויאמר אחיה—Sept. εἶπαν δὲ οἱ ἀδελφοὶ αὐτῆς; Syr. ואמרין לה אחין.  
 אחר—Sept. καὶ μετὰ ταῦτα; Syr. ויחירין.  
 60. רבקה—Sept. ῥεβέκκαν τὴν ἀδελφὴν αὐτῶν; Syr. לרבקא חתוו.  
 xxv, 5. ליצחק—Sept. Ἰσαὰκ τῷ υἱῷ αὐτοῦ; Syr. ליסחק ברה.  
 8. ושבע—Sept. καὶ πληρῆς ἡμερῶν; Syr. ושבע יומחה.

Without enlarging our collation, it must be seen at once that the agreement between the Sept. and the Syriac version cannot be merely accidental, and the most sceptic must admit that the Sept. has been made use of by the Syriac translators. Is this inference cor-

rect, we may go a step farther and say what holds good for the one must also be good for the other; or, in other words, the Syriac translator made use of the Sept. for the other books too. And, indeed, Gesenius has produced a number of examples from the book of Isaiah to show that the Sept. was followed even in free and arbitrary interpretations (comp. his *Commentar über den Jesaia*, i, 82 sq.); and, in like manner, Credner, who has minutely examined the minor prophets in his *De Prophetarum Minorum Versionis Syriacæ quam Peshito vocant Indole*, thinks that the Sept. was employed there. A similar result will be achieved in comparing the book of Jeremiah. Thus,

- ii, 25. נואש—Sept. ἀνδριῶμαι; Syr. אחחיל: both derive it from נאש, instead of from נאש (comp. also xviii, 12).  
 34. כיעלכלל אלה—Sept. ἐπὶ πάσῃ δυνάμει; Syr. חחית כל אילן: both probably reading אלה.  
 iii, 2. כערב—Sept. κορῶνη; Syr. נעבא, reading כערב.  
 8. משבח—Sept. κατοικία; Syr. עמוררא, deriving from רשב.  
 viii, 21. השבכרתי—Sept. and Syr. omit.  
 xv, 6. נלאחתי חנחם—Sept. καὶ οὐκέτι ἀνήσω αὐτούς; Syr. וחוב לא אשבוק להון: both reading חנחם for חנחם.  
 xvii, 16. יום אגיש—Sept. ἡμέραν ἀνδρώπων; Syr. יומא דברנשא: both reading אגיש.  
 xviii, 14. מצור שני—Sept. ἀπὸ πέτρας μαστοί; Syr. מן שני: both reading שני.  
 xlviii, 2. גם מדמן תדמי—Sept. καὶ ταῦσιν παύσεται; Syr. אפן משחק אן השחקין: both regarded מדמן not as a *proper noun*, but as an Aramaic infinitive of דמם.  
 1. 21. ואל יושבי פקוד חרב. In the Masoretic text the Athnach under פקוד indicates that it belongs to יושבי. The Sept. connects פקוד with חרב, also reading חרב ἐκδίκησον μάχαιρα; in like manner the Syr. connects and translates ארתצירי חרבא.

It would be useless to adduce more examples for our supposition, since we do not write a dissertation, but for a cyclopædia which, so far as the point in question is concerned, has treated that subject in such a full way as neither the introductions to the Old Test. nor cyclopædias and dictionaries of the Bible have done before, if they ever touched this point fully.

There is yet another matter which we should not pass over, and to which, as it seems, little attention has been paid. We mean the titles of the Syriac psalms, which are found neither in the Hebrew nor in the editions of the Sept. The titles are partly historical, partly dogmatical; the former speak of David or the Jewish people, the latter of Christ and his Church. Now the question arises, if the Syriac translators really perused the Sept., as our supposition is, how is it that the titles found in the Syriac psalms are not to be met with in the Sept.? But the question is easily answered, when we consider the fact that these titles are not only found in the commentary of Eusebius, but also in the *Codez Alexandrinus*. From the latter they were reprinted in Walton's *Polyglot* (vol. vi, pt. vi, p. 137 sq.), and again by Grabe, in the fourth volume of his edition of the Sept. A comparison of the titles as found in the Alex. Codex with those in the Peshito shows that the dogmatical part of these titles are a later addition, otherwise we could not account for the omission in the Greek, if really the latter had copied the Peshito. Deducting these additions, the titles otherwise agree with each other. Thus the title of Ps. ii reads: *προφητεία περὶ Χριστοῦ καὶ κλήσεως ἐθνῶν*; Syr. דאממא מטל קריחא דאממא.

אמיר לדוד : Psa. iii, *προφητεία γεννησόμενων ἀγαθῶν τῷ Δαυὶδ*; Syr. לדוד. כל טבחה דעתידין : Psa. iv, *προφητεία τῷ Δαυὶδ περὶ ὧν πῖπον*; Syr. כל הלין דשח. לדוד.

II. *Relation to the Chaldee.*—That there is a tolerable likeness between the Syriac and Chaldee in many places cannot be denied. Gesenius has produced a number of examples from Isaiah to show that the Targum was used there (*Comment.* i, 83 sq.). Credner is of the same opinion in regard to the minor prophets (*De Prophetarum*, etc., p. 107). Hävernicks and Herbst are of an opposite opinion, and yet the original traces of a use of a Targum are too distinct to be denied, as the following examples in Genesis must show:

- ii, 1. כל חיליהון—Chald. Onk. כל צבאם. כלה חיליהון.  
 2. ואתחנניה—Chald. Onk. ונח. ואתחנניה.  
 8. מן קרים—Chald. Onk. מל קדמין. מן קרים.  
 17. משלחך—Chald. Onk. בדיליכ. משלחך.  
 24. שכן הרבא—Chald. Onk. לזח החרב. שניא דחרבא.  
 vi, 14. מדורין—Chald. Onk. מדריר. מדורין.  
 vii, 4. מחית מטרר—Chald. Onk. מטרר. מחית מטרר.  
 viii, 1. ואתחנניה—Chald. Onk. ונחו. ואתחנניה.  
 4. על טורי קרדו—Chald. Onk. על הרי אררט. על טורי קרדי.  
 22. נבטלון—Chald. Onk. יבטלון. נבטלון.  
 x, 10. בבב—Chald. Onk. בשנר. בבב.  
 xi, 28. בחיי—Chald. Onk. בחיי. בחיי.  
 xiv, 14. ית עלמוחי—Chald. Onk. את חניכוי. ית עלמוחי.

לקישיא ללבן ובכיריא; Syr. ליעקב. ליעקב נהוין.

xxxix, 9, 16. ופריש—Chald. ופריש; Syr. ופריש.

34. בעביטא דגמלא—Chald. בכר הגמל. בעביטא דגמלא.

xxxvii, 25. שוירת ערבא—Chald. ארחת ישמעאלים. שוירת דערביא.

xliv, 30. ונפשו קשורה בנפשו—Chald. ונפשה. ונפשה.

חביבא לה לך נפשה. חביבא לה לך נפשה.

xlvii, 21. ואת העם העברי אתו לערים—Chald. וית עמא אעבר יתהון מקרורי לקרורי.

i. e. and the people he made him to pass from city to city; Syr. ולעמא שני אנון מן קרא. ולעמא. This is a very obvious imitation of the Chaldee.

xliv, 3. ריש תקפי—Chald. ראשית אוני. ריש תקפי.

We could thus go on with the other books of the Pentateuch, but our examples are sufficient to show that the priority belongs to the Chaldee of Onkelos, and not to the Peshito. Our supposition being correct, the assertions of those must fall to the ground who would put Onkelos in the 2d or 3d century. On the contrary, we believe that the Targum of Onkelos belongs to the time of Christ—provided the Syriac version of the Pentateuch belongs to the 1st century of the Christian era—and thus the notices concerning Onkelos which we find in the Talmud are confirmed anew. Our examples from the book of Genesis leaving it beyond a shadow of doubt as to the dependence of the Syriac version upon the Chaldee, the Chaldee of the book of Proverbs will prove this more fully. Thus we read:

Chaldee—Prov. i, 4.  
 למתן לשברי ערימותא ולטלאי ידיעתא ותר יתחא  
 i, 12.  
 נבלענון כשיוול לחיי ולדלא מוס חך נחתי גובא  
 ii, 13.  
 תריצתא ואולין בארחתא דחשוכא  
 ii, 15.  
 דארחתהון מעקמן ומפחלין שביליהון

Syriac.  
 למתל לשברא ערימותא ולטלאי ידעתא ותריצתא  
 ונבלעיוחי אך שיכל לחיא ועדלא מוס אך נחתי  
 גובא  
 ישבקיין אורחא תריצתא ומחלקין באורחא  
 דחשוכא  
 אורחתהון מעקמן ומפחלין שביליהון

 xxiv, 64. הפל מעל הגמל—Chald. אחרכנית. אחרכנית.  
 xxvii, 3. סיפך—Chald. סיפך. סיפך.  
 xxx, 14, 15. ויברוחא—Chald. דודאים. ויברוחא.  
 28. פריש—Chald. נקכה שוכך. פריש.  
 42. והיה העשפים ללבן והקשרים ליעקב—Chald. ויבכיריא ללבן. ויבכיריא.

We will not increase the quotations, but let the student examine passages like i, 6, 8, 10, 13, 15, 18, 21–23, 25, 30, 33; ii, 1, 4, 10, 14, 17, 21; iii, 2, 4, 6–8, 12, 15, 19, 21, 25, 29; iv, 2, 3, 10, 11, 14, 18, 21–23, 25–27; v, 2, 4, 5, 7, 8, 10, 13, 16, 18, 21, 23; vi, 1, 2, 4–6, 13, 15, 16, 17, 19, 26, 28, 34; vii, 2–4, 10, 16–18, 23–25; viii, 4, 8, 10, 12, 13, 20, 23, 26, 32; ix, 4, 5, 11, 14; x, 3–5, 7, 9, 16, 22, 30, 31; xi, 7, 13, 14, 18, 21, 22, 26, 27, etc.—altogether more than 300 passages where he will find a striking similarity between these two versions.

Besides this similarity, there are a great many passages in which the Chaldee and Syriac deviate from the Hebrew, and the inner connection of both versions with each other can no longer be doubted. Thus Prov. i, 7, the Hebrew reads, יראת יהוה ראשית דעת, i. e. "The fear of God is the beginning of wisdom;" but the Chaldee reads, ריש חכמתא דחללא דיר, i. e. "The beginning of wisdom is the fear of God;" and so also the Syr. כל פשל, ריש חקמתא דחללא דמריא, or xvi, 4, כל פשל, "The Lord has made all things for himself;" the Chaldee paraphrases, כלהון עוברין, i. e. "All works of God are for those who obey him;" and thus also the

כלהון עברותי דמריא לאילין דמשתמעין לה. Without increasing the number of such passages, we will adduce some in which both versions entirely give up the Masoretic text and follow another reading: thus Prov. i, 24, for *וְלֹא תִאֲמַיִן* the Chaldee reads *וְלֹא תִאֲמַיִן*, for the translation is *וְלֹא תִאֲמַיִן*, and so also the Syriac, *וְלֹא תִאֲמַיִן*; v, 9, the Chaldee reads *וְלֹא תִאֲמַיִן* instead of *וְלֹא תִאֲמַיִן*, for the translation is *וְלֹא תִאֲמַיִן*, and so in the Syriac, *וְלֹא תִאֲמַיִן*; ix, 11, for *כִּיבִי* the Chaldee reads *כִּיבִי*, for the translation is *כִּיבִי*, and in the Syriac *כִּיבִי*. These examples, which could be increased greatly (comp. iii, 27; v, 4, 9, 19, 21; vii, 22, 23; viii, 3; ix, 11; x, 4; xi, 26; xii, 4, 19, 21, 28; xiii, 15, 19; xiv, 14; xv, 4; xix, 19, 23; xx, 4, 14, 20; xxi, 4, 30; xxii, 11, 16; xxiv, 5, 22; xxv, 20, 27; xxvi, 5, 7, 10; xxviii, 5, 11; xxix, 18, 21; xxx, 31; xxxi, 6), leave no doubt that the Chaldee and Syriac stand in a relation of dependence to each other.

But in speaking of a relation of these versions, it must not be understood as if they relate to each other as the original and copy, but this relation consists in that the author of the one version, in preparing the same, followed mostly the other without giving up his independence entirely. This we can see from the eighty-two passages in which the Chaldee follows the Masoretic text, while the Syriac deviates from it, as ii, 16; iii, 30; iv, 3, 11, 22, 25, 32; vii, 7, 8, 10, 22; viii, 7, 11, 35; ix, 12, 18; x, 10, 12, 19, 24, 26; xi, 9, 10, 16, 19, 24, 29; xii, 17, 23; xiii, 1, 10, 23; xiv, 7, 17, 22, 23, 33, 35; xv, 10, 14, 16, 17, 22, 30; xvi, 7, 26; xvii, 4, 9, 15; xviii, 1, 3, 6, 15; xix, 1, 4, 22, 29; xxi, 14; xxii, 3, 19; xxiii, 2, 6, 30, 34; xxiv, 10, 26, 32, 33; xxv, 4, 11, 10, 13, 21, 22; xxvi, 2, 11-13, 17-19, 26; xxx, 15, 19; or from those passages in which the Syriac agrees with the Masoretic text against the Chaldee, as vi, 35; vii, 15; viii, 29; x, 29; xi, 4; xiv, 24; xv, 32; xvi, 5, xvii, 5, 16; xviii, 17; xix, 2, 18; xxiii, 28; xxiv, 9, 14; xxv, 9; xxviii, 1; xxxi, 3.

To these examples from the book of Proverbs we could also add a number from other books. Future investigations based upon these must show the tenability or otherwise of our assertion. See also Schönfelder, *Onkelos und Peschito* (München, 1869); Maybaum, *Ueber die Sprache des Targum zu den Sprüchen und dessen Verhältnis zum Syrer*, in Merx, *Archiv für wissenschaftliche Erforschung des Alten Testaments*, ii, 66 sq.; Dathe, *Opuscula*, p. 106 sq.; Frankl, *Studien über die Septuaginta und Peschito zu Jeremia*, in Frankel-Grätz, *Monatsschrift*, 1872, p. 444 sq. (B. P.)

**Syr'ia-ma'achah** (1 Chron. xix, 6). See **MAACHAH**.

**Syr'ian** (אַרְמִי, *Arammī*, Gen. xxv, 20; xxviii, 5; xxxi, 20, 24; Deut. xxvi, 5, 2 Kings v, 20; fem. אַרְמִיָּה, *Arammīyāh*, 1 Chron. vii, 14, "Aramiteess;" plur. masc. אַרְמִיִּים, *Arammīm*, 2 Kings viii, 28, 29; xvi, 6 [where the text has אַרְמִיִּים, which the marg. corrects to אַרְמִיִּים, *Edomites*]; 2 Chron. xxii, 5; but "Syrians" is elsewhere the rendering of אַרָם, *Arām*; Σύροι, Luke iv, 27), an inhabitant either of Western Syria, i. e. on the Mediterranean (2 Kings v, 20), or of Eastern, i. e. Mesopotamia (Gen. loc. cit.). See **SYRIA**.

**Syrian Churches**, a general name for that portion of the Oriental Church which had its seat in Syria, and which was anciently comprehended in the patriarchate of Antioch and (after that of Jerusalem obtained a distinct jurisdiction) in the patriarchate of Jerusalem. The Syrian Church of the early centuries was exceedingly flourishing. Before the end of the 4th century it numbered 119 distinct sees, with a Christian population of several millions. The first blow to the prosperity of the Syrian Church was the fatal division which arose from the controversies on the incarnation. See **EUTYCHES**; **JACOBITES**; **MONOPHYSITES**; **NESTORIANS**. The Eu-

tychian heresy, in one or other of its forms, obtained wide extension in Syria; and the usual results of division ensued in the corruption and decay of true religion. The Moslem conquest accelerated the ruin thus begun; and from the 7th century downwards, this once flourishing Church declined into a weak and spiritless community, whose chief seat was in the mountains, and whose best security from oppression lay in the belief on the part of the conquerors of their utterly fallen and contemptible condition. Under the head **MARONITES** has been detailed the most remarkable incident in the later history of the Syrian Church. This branch of the Eastern Christianity, although for the most part divided from the orthodox Greek Church by the profession of Monophysitism, took part with the Greeks in their separation from the West, under Michael Cerularius; and the reunion of the Maronites to Rome had the remarkable result of establishing side by side, within the narrow limits occupied by the Christians under the Moslem rule in Syria, two distinct communities, speaking the same language, using the same liturgy, and following the same rites, and yet subject to two different patriarchs, and mutually regarding each other as heretics and apostates from the ancient creed of their country.

The chief peculiarity of the Syrian rite, as contradistinguished from the Greek, consists in its liturgy, and the language of that liturgy, which is Syriac, and with which the people, and, in many cases, the priests, are entirely unacquainted. The liturgy is known as the Liturgy of St. James. The Syrians agree with the Greeks in the use of unleavened bread, in administering communion under both heads, in permitting the marriage of priests (provided they marry before ordination), and in administering the unction of confirmation at the same time with baptism, even to infants.

The Christian community of Syria may at present be divided into four classes: the Maronites, the Greeks (who are also called Melchites), the Monophysites, who are called Jacobites, and the primitive Syrian Christians (not Maronites) who are in communion with Rome. This last-named community forms the small remnant of the ancient Syrian Church which remained orthodox during the controversy on the incarnation, at the time of the general lapse into Monophysitism. To these are to be added the Christians of the Latin rite. The Maronites number about 150,000; the Greeks are said to be about 50,000; the Jacobites of Syria and of Armenia Proper are said to reckon together about 40,000 families, of whom, however, but a small proportion (probably scarcely 10,000 in all) can be set down to the account of the Syrian Church. The non-Maronite Syrians who follow their national rite, but are in communion with Rome, are supposed to amount to about 4000. The resident Latins are chiefly members of the religious orders who from immemorial time have possessed convents in the Holy Land, and European Catholics who have settled permanently or for a time at Jerusalem, Beirut, and Damascus. None of these can in any way be regarded as belonging to the Syrian Church. It may be well to add that the belief, and, in most particulars, the disciplinary practice, of these several classes coincide substantially with those respectively of the same communities in the other churches of the East. All (with the exception of the Maronites and the few United Syrians) reject the supremacy of the Roman see. The Syrians of the Greek communion reject the double procession of the Holy Ghost; and the Jacobites firmly maintain their old tenet of Eutychianism. Among them all are to be found monks and religious females. All enforce celibacy on their bishops, and refuse to priests the privilege of contracting a second marriage, or of marrying after ordination. The practice of fasting prevails among all alike. They receive and practice the invocation of saints and prayers for the dead, and the use of painted, although not of graven, images. Many particulars regarding them are to be gleaned from the memoirs of recent missionaries of the several denominations, among which

the letters published from time to time by the French Society for the Propagation of the Faith, although naturally tinged with some sectarian coloring, are particularly full and interesting.—*Chambers's Encyclop.* s. v. See Etheridge, *Hist., Liturgy, etc., of Syrian Churches* (Lond. 1846); Benin, *Traditions of Syr. Churches* (ibid. 1871).

**Syrinx**, in Greek mythology, was a daughter of the river-god Lado, who, when pursued on account of her beauty by Pan, prayed to her father for relief, and was changed into a reed. Pan cut some stalks from it, joined them together with wax, and used it, in the form known to us as Pan's-pipe, in remembrance of her (Ovid, *Metam.* i, 690).

**Syrna**, in Greek mythology, was a daughter of the Carian king Damæthus. She fell from the roof of her house, and was restored by the art of Podalirius, who then married her, and built the city named after her in Caria.

**Syro-Phœnician** (Συροφονίσσα v. r. Συροφονικίσσα), a general name (Mark vii, 26) of a (female) inhabitant of the northern portion of Phœnicia, which was popularly called *Syro-Phœnicia*, by reason of its proximity to Syria and its absorption by conquest into that kingdom. See **PHœNICIA**. The name is made especially interesting to the scriptural student on account of the woman who besought our Lord in behalf of her afflicted daughter, and the miraculous cure wrought by him on the latter. Matthew calls the woman a woman of Canaan (xv, 22), being in respect to her nationality, in common with the Phœnicians, a descendant of Canaan; Mark describes her as "a Greek, a Syrophœnician by nation" (vii, 26), but Rosenmüller rightly observes that the Jews called all Gentiles Greeks (Ἕλληνες), just as the Greeks called all strangers barbarians. She was therefore a Greek, or Gentile, and a native of that part of Syria which belonged to Phœnicia. We have a curious instance of the interchange made in respect to the terms Canaanites and Phœnicians, of an earlier kind, in the case of Shaul, the son of Simeon, who is said in Genesis (xlvii, 10), according to the Sept., to be the son of a Phœnician woman, and in Exodus (vi, 15), to be the son of a Canaanitish woman. The case of the Syrophœnician woman was a very singular one, both on account of the strong faith manifested on her part, and the exercise of divine grace and power in miraculous working by Christ beyond the proper sphere of his personal ministrations. In the latter respect it stands in a sort of affinity to the cases in Old-Test. history referred to by our Lord in Luke iv, 26, 27.

The invention of the words "Syro-Phœnicia" and "Syro-Phœnicians" seems to have been the work of the Romans, though it is difficult to say exactly what they intended by the expressions. It has generally been supposed that they wished to distinguish the Phœnicians of Syria from those of Africa (the Carthaginians); and the term "Syrophœnix" has been regarded as the exact converse to "Libyphœnix" (Alford, *ad loc.*). But the Libyphœnices are not the Phœnicians of Africa generally—they are a peculiar race, half-African and half-Phœnician ("mixtum Punicum Afris genus," Livy, xxi, 22). The Syro-Phœnicians, therefore, should, on this analogy, be a mixed race, half Phœnicians and half Syrians. This is probably the sense of the word in the satirists Lucilius (ap. Non. Marc. *De Proprietat. Serm.* iv, 431) and Juvenal (*Sat.* viii, 159), who would regard a mongrel Oriental as peculiarly contemptible. In later times a geographic sense of the terms superseded the ethnic one. The emperor Hadrian divided Syria into three parts—Syria Proper, Syro-Phœnicia, and Syro-Palæstina; and henceforth a Syro-Phœnician meant a native of this sub-province (Lucian, *De Conc. Deor.* § 4), which included Phœnicia Proper, Damascus, and Palmyrène (see Rawlinson, *Herod.* iv, 243 sq.).

**Syropûlus** (also SGUROPULUS, Σγουρόπουλος,

Συῶπος), SYLVESTER, a writer on the history of the Council of Ferrara and Florence (1438 sq.), who himself participated in its business, and was one of the most determined opponents of the union between the churches of the East and West upon which the emperor, John Palæologus, had set his heart. So far did he carry his opposition that he found it advisable to resign his place as one of the six debaters in the council, and came into violent antagonism with both the patriarch and the emperor. He yielded to the emperor's commands and threats, however, so far as to sign the decree of union which had been adopted, but afterwards deplored the weakness of his action. He was a legal officer (δικαίουφύλαξ) and a chief sacristan (μέγας ἐκκλησιαρχης) at Constantinople, and also one of the five dignitaries about the patriarch who were allowed to wear the badge of the cross upon their robes; but his want of firmness in the matter of the treaty of union with the Latin Church rendered him unpopular at home and thus caused him to retire from public life. He devoted his leisure to the composition of a "true history of the untrue union between the Greeks and the Latins," thereby exciting against himself the anger of the Latins and their friends in turn, so that Romish writers like Labbe and Allatius class him unqualifiedly with Grecian liars and the worst sort of schismatics.

The work of Syropulus has important and undeniable value as a source for the history of the Synod of Ferrara. It presents a credible view of events personally engaged in by the author, and defends a position actually represented in the council, besides revealing to view a series of connected and involved incidents which, but for its narration, could not have been known at this day. The later criticism of Allatius may, nevertheless, have corrected some minor particulars of the narrative. The object of the book was to show that a real union was impossible, though the leaders on both sides, the pope, Bessarion, the patriarch, the emperor, etc., steadily drew nearer to each other, until the necessities of the Greeks decided the result, which Syropulus justly characterizes as a compromise (μεσότης) rather than a union. The final drafting of the terms of union involved extraordinary difficulties (sect. viii, 14). Book xii relates the disagreements of the Greeks while returning from the synod, and their discouraging reception at home.

The work is extant in a single edition based on a codex of the Bibliotheca Regia (N. 1247), from which Serrarius caused it to be copied in 1642 and sent to Isaac Vossius for publication; but Sir Edward Hyde, the English ambassador, caused the manuscript to be placed at the disposal of Robert Creyghton, chaplain at the court of Charles II and, later, bishop of Bath. The latter issued the book in the original Greek and accompanied it with a Latin translation under the title *Vera Hist. Unionis non Veræ inter Græcos et Latinos*, etc. (Hagæ Comitum, 1660), besides prefixing to it an eulogy of Syropulus and of the Grecian theology and Church as compared with the papal, which rendered the work still more unpalatable to Romish readers. Allatius accordingly prepared a refutation, directed more especially at Creyghton, entitled *In R. Creyghtoni Apparatus, Versionem et Not. ad Hist. Conc. Florentini*, etc. (Rom. 1665), pt. i. Creyghton's edition and also the Paris codex are incomplete, as the whole of the first book is wanting; but several other manuscript copies of Syropulus exist, so that the deficiency may perhaps be met. See Creyghton's preface, *ubi sup.*; Oudin *Comment.* iii, 2418; Cave, *Hist. Liter.* Append.; Schrökh, xxxiv, 411.—Herzog, *Real-Encyclop.* s. v.

**Syrts** (Σύρτις, "quicksands," Acts xxvii, 17). There were two quicksands on the coast of North Africa, between Cyrene and Carthage, whose shoals and eddies the ancient mariners greatly feared (Horace, *Odes*, i, 22, 5; Ovid, *Fast.* iv, 499; Tibull. ii, 4, 91). The greater of these was named *Syrts Major*, or *Magna*, and the lesser *Syrts Minor*; and old geographers used to tell many marvels respecting them (Strabo, ii, 123;

xvii, 884; Ptolemy, iv, 3; Pliny, v, 4; Solin. 27; Mela, i, 7, 4; Sallust, *Jug.* 78). Modern explorations find both of them to be highly dangerous bays, where the treacherous sandy shore is barely covered with water, and where terrific clouds of sand are suddenly raised by the wind, obscuring the sight and overwhelming men and even ships. The Greater Syrtis is now called the *Gulf of Sidra*, between Tripoli and Barea; and the Lesser the *Gulf of Cabes*. The former is specially intended in the account of Paul's shipwreck (q. v.).

See Smith, *Dict. of Class. Geog.* s. v. See QUICKSAND.

**Syrus**, in Greek mythology, was a son of Apollo and Sinope, who is said to have given name to the Syrians.

**Systaticæ** (Συστατικαί) were letters of license granted by a bishop for a clergyman to remove from his diocese to another, called by the old canons *Dismissory Letters*.

**Syzgus**. See YOKE-FELLOW.

## T.

**Ta'anach** (Heb. *Taanak'*, תַּאנַח, *sandy* [Gesenius], or *fortified* [Furst]; twice [Judg. xxi, 25; 1 Chron. vii, 29] more briefly *Tanak'*, תַּנַּח, A. V. "Tanach;" Sept. *Θανάχ* or *Θαανάχ* v. r. *Τανάχ*, *Σανάχ*, etc.), an ancient Canaanitish city, whose king is enumerated among the thirty-one conquered by Joshua (Josh. xii, 21). It came into the hands of the half-tribe of Manasseh (xvii, 11; xxi, 25; 1 Chron. vii, 29), though it would appear to have lain within the original allotment of Issachar (Josh. xvii, 11). It was bestowed on the Kohathite Levites (xxi, 25). Taanach was one of the places in which, either from some strength of position, or from the ground near it being favorable for their mode of fighting, the aborigines succeeded in making a stand (xvii, 12; Judg. i, 27); and in the great struggle of the Canaanites under Sisera against Deborah and Barak it appears to have formed the headquarters of their army (Judg. v, 19). After this defeat the Canaanites of Taanach were probably made, like the rest, to pay a tribute (Josh. xvii, 13; Judg. i, 28), but in the town they appear to have remained to the last. Taanach is almost always named in company with Megiddo, and they were evidently the chief towns of that fine, rich district which forms the western portion of the great plain of Esdraelon (1 Kings iv, 12). It was known to Eusebius, who mentions it twice in the *Onomasticon* (*Θαανάχ* and *Θαανά*) as a "very large village" standing between three and four Roman miles from Legio—the ancient Megiddo. It was known to hap-Parchi, the Jewish mediaeval traveller, and it still stands about four miles south-east of Lejjûn, retaining its old name with hardly the change of a letter. Schubert, followed by Robinson, found it in the modern *Ta'annuk*, now a mean hamlet on the south-east side of a small hill, with a summit of table-land (Schubert, *Morgenland*, iii, 164; Robinson, *Bibl. Res.* iii, 156; *Bibl. Sacra*, 1843, p. 76; Schwarz, *Palest.* p. 149). The ancient town was planted on a large mound at the termination of a long spur or promontory, which runs out northward from the hills of Manasseh into the plain, and leaves a recess or bay, subordinate to the main plain on its north side, and between it and Lejjûn (Van de Velde, i, 358). Ruins of some extent, but possessing no interest, encompass it (Porter, *Handbook*, p. 371). The houses of the present village are mud huts, with one or two stone buildings (Ridgeway, *The Lord's Land*, p. 588).

**Taanah**. See TAANATH-SHILOH.

**Ta'anath-Shi'loh** (Heb. *Taanath' Shiloh'*, תַּאנַח שִׁלֹּחַ, *Taanah* [Gesenius, *approach*; Furst, *circle*] of *Shiloh*, so called prob. from its vicinity to that place; Sept. *Τηνάθ Σηλώ* v. r. *Θήνασσα και Σέλλης*), a place mentioned (Josh. xvi, 6) as situated near the northern border of Ephraim at its eastern end between the Jordan and Janohah. See TRIBE. With this agrees the statement of Eusebius (*Onomast.* s. v.), who places Janohah twelve and *Thenath* ten Roman miles east of Neapolis. It is probably the *Thena* (Θήνα) mentioned by Ptolemy (*Geog.* v, 16, 5), one of the chief cities of Samaria, in connection with Neapolis. In the Talmud (Jerusalem *Megillah*, i), Taanath-Shiloh is said to be iden-

tical with Shiloh, a statement which Kurtz (*Gesch. des Alt. Bundes*, ii, 70) understands as meaning that Taanath was the ancient Canaanitish name of the place, and Shiloh the Hebrew name, conferred on it in token of the "rest" which allowed the tabernacle to be established there after the conquest of the country had been completed. But this is evidently conjecture arising from the probable proximity of the two places. Taanah-of-Shiloh is probably the *Ain Tana* seen by Robinson north-east of Mejdél (*Later Res.* iii, 295), and by Van de Velde (*Memoir*, p. 121, although erroneously marked *Meraj ed-Din* on his *Map*), about a mile from the road between Acrabi and Mejdél, consisting of "a small tell with a ruin, on the first lower plateau into which the Ghor descends."

**Taanith**. See TALMUD.

**Tab'aoth** (*Taba'aw* v. r. *Tab'aw*), a less correct form (1 Esdr. v, 29) of the name TABBAOTH (q. v.) of the Heb. lists (Ezra ii, 43; Neh. vii, 46).

**Tab'baoth** (Heb. *Tabba'oth*, תַּבְּבֹאוֹת, *rings* [Gesenius], or *spots* [Furst]; Sept. *Ταββαῶθ* v. r. *Ταβαῶθ* and *Ταβῶθ*), one of the Nethinim whose descendants or family returned from Babylon with Zerubbabel (Ezra ii, 43; Neh. vii, 46). B.C. ante 536.

**Tab'bath** (Heb. *Tabbath'*, תַּבְּבַת, perh. *celebrated* [Gesenius]; Sept. *Ταβᾶθ* v. r. *Ταβᾶθ*), a place mentioned in describing the flight of the Midianitish host after Gideon's night attack; they fled to Beth-shittah, to Zererah, to the brink of Abel-meholah on (בֵּית) Tabbath (Judg. vii, 22). As all these places were in or near the Ghôr, Tabbath is probably the present *Tubukhat-Fahil*, i. e. "Terrace of Fahil," a very striking natural bank, 600 feet in height, with a long horizontal and apparently flat top, which is embanked against the western face of the mountains east of the Jordan, and descends with a very steep front to the river (Robinson, *Bibl. Res.* iii, 325).

**Tab'eäl** (Isa. vii, 6). See TABELL, 1.

**Tab'eäl** (Heb. *Tabeäl'*, תַּבְּעַל, [in pause *Tabeäl'*, תַּבְּעַל, Isa. vii, 6, A. V. "Tabeal"], *God is good*; Sept. *Ταβεῖλ*), the name of two men. See also TOBIEL.

1. The father of the unnamed person on whom Rezin, king of Syria, and Pekah, king of Israel, proposed to bestow the crown of Judah in case they succeeded in dethroning Ahaz (Isa. vii, 6). B.C. ante 738. Who "Tabeal's son" was is unknown, but it is conjectured that he was some factious and powerful Ephraimite (perhaps Zichri, 2 Chron. xxviii, 7), who promoted the war in the hope of this result.—Kitto. The Aramaic form of the name [see TABRIMMON], however, has been thought to favor the supposition that he was a Syrian in the army of Rezin. The Targum of Jonathan renders the name as an appellative, "and we will make king in the midst of her him who seems good to us" (רִיבִי בֶן הַמֶּלֶךְ הַטֹּב). Rashi by *Gematria* turns the name into רִמְלָה, *Rimla*, by which apparently he would understand *Remuliah*.

2. An officer of the Persian government in Samaria in the reign of Artaxerxes (Ezra iv, 7). B.C. 519. It has been argued that he, too, was an Aramæan, from the fact that the letter which he and his companions wrote to the king was in the Syrian or Aramæan language. Gesenius, however (*Jesa*, i, 280), thinks that he may have been a Samaritan.

**Tabel'lius** (Ταβέλλιος), a Græcized form (1 Esdr. ii, 16) of the Heb. name (Ezra iv, 7) TABEL (q. v.).

**Tab'erah** (Heb. *Taberah*, תַּבְרָחָה, *consumption*; Sept. *ἐμπυρισμός*), a place in the wilderness of Paran; so called from the fact that "the fire of Jehovah burned" (תַּבְרָחָה) among the Israelites there in consequence of their complaints (Numb. xi, 3). It lay at the next station beyond Horeb, and must therefore be sought somewhere in Wady Saal. See EXOD. Keil argues (*Comment.* ad loc.) from the expression that it was "in the uttermost part of the camp," and from the omission of the name in Numb. xxxiii, that the place was identical with the station Kibroth-hattaavah next named; but he overlooks the fact that both these are separately mentioned in Deut. ix, 22.

**Tabering** (תַּבְרִינָה; Sept. *φασγόμενοι*; Vulg. *murmurantes*), an obsolete word used in the A. V. of Nah. ii, 7 in the sense of *drumming*, or making regular sounds. The Hebrew word is derived from תַּבַּר, "a timbrel," and the image which it brings before us in this passage is that of the women of Nineveh, led away into captivity, mourning with the plaintive tones of doves, and beating on their breasts in anguish, as women beat upon their timbrels (comp. Psa. lxxvii, 25 [26], where the same verb is used). The Sept. and Vulg., as above, make no attempt at giving the exact meaning. The Targum of Jonathan gives a word which, like the Hebrew, has the meaning of "tympanizantes." The A. V., in like manner, reproduces the original idea of the words. The "tabour" or "tabor" was a musical instrument of the drum type, which with the pipe formed the band of a country village. We retain a trace at once of the word and of the thing in the "tabourine" or "tambourine" of modern music, in the "tabret" of the A. V. and older English writers. To "tabour," accordingly, is to beat with loud strokes as men beat upon such an instrument. The verb is found in this sense in Beaumont and Fletcher, *The Tamer Tamed* ("I would tabor her"), and answers with a singular felicity to the exact meaning of the Hebrew. See Plumptre, *Bible Educator*, iv, 210.

**Tabernacle** is the rendering, in the A. V., of the following Heb. and Gr. words: 1. אֹהֶל, *ohel*, the most frequent term, but often signifying and rendered a common "tent;" 2. מִשְׁכָּן, *mishkân*, the distinctive term, always so rendered, except ("dwelling") in 1 Chron. vi, 32; Job xviii, 21; xxi, 28; xxxix, 6; Psa. xxvi, 8; xlix, 11; lxxiv, 7; lxxxvii, 2; Isa. xxxii, 18; Jer. ix, 19; xxx, 8; li, 30; Ezek. xxv, 4; Heb. i, 6; ("habitation") 2 Chron. xxix, 6; Psa. lxxxviii, 28; cxxxii, 5; Isa. xxii, 16; liv, 2; ("tent") Cant. i, 8; 3. סֹכֶךְ [once סֹכֶךְ, Lam. ii, 6], *sók* (Psa. lxxvi, 2), סִכְכָּה, *sikkáh* (Job. xxiii, 34; Deut. xvi, 13, 16; xxxi, 10; 2 Chron. viii, 13; Ezra iii, 4; Job xxxvi, 29; Isa. iv, 6; Amos ix, 11; Zech. xiv, 16, 18, 19), or סִכְכֵּי (Amos v, 26), all meaning a *booth*, as often rendered; 4. σκηνή, *skênê* (2 Cor. v, 1, 4), or σκηνώμα (Acts vii, 46 [rather habitation]); 2 Pet. i, 13, 14), a *tent*. Besides occasional use for an ordinary dwelling, the term is specially employed to designate the first sacred edifice of the Hebrews prior to the time of Solomon; fully called מִדְבַּר מִשְׁכָּן, *the tent of meeting*, or (especially in Numb.) מִשְׁכָּן הָעֵדֻת, *tabernacle of the congregation* (Sept. σκηνή [1 Kings viii, 4, 6, σκηνώμα] τοῦ μαρτυρίου; Philo, ἐπὶ δὲ φερήσων, *Opp.* ii, 146; Josephus, μεταφερόμενος καὶ συμπερινο-

στών ναός, *Ant.* iii, 6, 1). (In the discussion of this interesting subject we have availed ourselves of MS. contributions from Prof. T. O. Paine, LL.D., author of *Solomon's Temple*, etc., in addition to the suggestions in the book itself. For an exhaustive treatment we refer to the most recent volume and charts, entitled *The Tabernacle of Israel in the Desert*, by Prof. James Strong, Providence, 1888.)

1. *Terms and Synonyms*.—1. The first word thus used (Exod. xxv, 9) is מִשְׁכָּן, *mishkân*, from שָׁכַן, *to lie down* or *dwell*, and thus itself equivalent to *dwelling*. It connects itself with the Jewish, though not scriptural, word Shechinah (q. v.), as describing the dwelling-place of the divine glory. It is noticeable, however, that it is not applied in prose to the common dwellings of men, the tents of the patriarchs in Genesis, or those of Israel in the wilderness. It seems to belong rather to the speech of poetry (Psa. lxxxvii, 2; Cant. i, 8). The loftier character of the word may obviously have helped to determine its religious use, and justifies translators who have the choice of synonyms like "tabernacle" and "tent" in a like preference. In its application to the sacred building, it denotes (a) the ten tricolored curtains; (b) the forty-eight planks supporting them; (c) the whole building, including the roof. See DWELLING.

2. Another word, however, is also used, more connected with the common life of men; אֹהֶל, *ohel*, the *tent* of the patriarchal age, of Abraham and of Isaac and of Jacob (Gen. ix, 21, etc.). For the most part, as needing something to raise it, it is used, when applied to the sacred tent, with some distinguishing epithet. In one passage only (1 Kings i, 39) does it appear with this meaning by itself. The Sept., not distinguishing between the two words, gives σκηνή for both. The original difference appears to have been that אֹהֶל represented the uppermost covering, the black goats'-hair roof, which was strictly a tent, in distinction from the lower upright house-like part built of boards. The two words are accordingly sometimes joined, as in Exod. xxxix, 32; xl, 2, 6, 29 (A. V. "the tabernacle of the tent"). Even here, however, the Sept. gives σκηνή only, with the exception of the *var. lect.* of ἡ σκηνή τῆς σκεπῆς in Exod. xl, 29. In its application to the tabernacle, the term *ohel* means (a) the tent-roof of goats'-hair; (b) the whole building. See TENT.

3. בַּיִת, *báyith*, *house* (οἶκος, *domus*), is applied to the tabernacle in Exod. xxiii, 19; xxxiv, 26; Josh. vi, 24; ix, 23; Judg. xviii, 31; xx, 18, as it had been, apparently, to the tents of the patriarchs (Gen. xxxiii, 17). So far as it differs from the two preceding words, it expresses more definitely the idea of a fixed settled habitation. It was therefore fitter for the sanctuary of Israel after the people were settled in Canaan than during their wanderings. For us the chief interest of the word lies in its having descended from a yet older order, the first word ever applied in the Old Testament to a local sanctuary, Beth-el, "the house of God" (xxviii, 17, 22), keeping its place, side by side, with other words—tent, tabernacle, palace, temple, synagogue—and at last outliving all of them; rising, in the Christian *Ecclesia*, to yet higher uses (1 Tim. iii, 15). See HOUSE.

4. קֹדֶשׁ, *kódesh*, or קֹדֶשֶׁת, *mikdash* (ἁγίασμα, *ágiastmon*, τό ἅγιον, *ta ágia*, *sanctuarium*), the *holy*, consecrated place, and therefore applied, according to the graduated scale of holiness of which the tabernacle bore witness, sometimes to the whole structure (Exod. xxv, 8; Lev. xii, 4), sometimes to the court into which none but the priests might enter (Lev. iv, 6; Numb. iii, 38; iv, 12), sometimes to the innermost sanctuary of all, the Holy of Holies (Lev. xvi, 2). Here also the word had an earlier starting-point and a far-reaching history. En-Mishpat, the city of judgment, the seat of some old oracle, had been also Kadesh, the sanctuary (Gen. xiv, 7; Ewald, *Gesch. Isr.* ii, 307). The name

*El-Kuds* still clings to the walls of Jerusalem. See SANCTUARY.

הֵיכָל, *heykál, temple* (ναός, *templum*), as meaning the stately building, or palace of Jehovah (1 Chron. xxix, 1, 19), is applied more commonly to the Temple (2 Kings xxiv, 13, etc.), but was used also (probably at the period when the thought of the Temple had affected the religious nomenclature of the time) of the tabernacle at Shiloh (1 Sam. i, 9; iii, 3) and Jerusalem (Psa. v, 7). In either case the thought which the word embodies is that the "tent," the "house," is royal, the dwelling-place of the great king. See TEMPLE.

The first two of the above words receive a new meaning in combination with מוֹעֵד (*moéd*), and with הָעֵדוּת (*ha-edúth*). To understand the full meaning of the distinctive titles thus formed is to possess the key to the significance of the whole tabernacle.

(a.) The primary force of מוֹעֵד is "to meet by appointment," and the phrase אָהֵל מוֹעֵד has therefore the meaning of "a place of or for a fixed meeting." Acting on the belief that the meeting in this case was that of the worshippers, the A. V. has uniformly rendered it by "tabernacle of the congregation" (so Seb. Schmidt, "tentorium conventus;" and Luther, "Stiftshütte" in which *Stift* = *Pfarrkirche*), while the Sept. and Vulg., confounding it with the other epithet, have rendered both by ἡ σκηνή τοῦ μαρτυρίου, and "tabernaculum testimonii." None of these renderings, however, bring out the real meaning of the word. This is to be found in what may be called the *locus classicus*, as the interpretation of all words connected with the tabernacle. "This shall be a continual burnt-offering . . . at the door of the tabernacle of meeting (מוֹעֵד) where I will meet you (אֶנְצִי, γυνώσκωμαι) to speak there unto thee. And there will I meet (נִצְרָה, ῥάξομαι) with the children of Israel. And I will sanctify (קִדְשֵׁהָ) the tabernacle of meeting . . . and I will dwell (שִׁכְנִי) among the children of Israel, and will be their God. And they shall know that I am the Lord their God" (Exod. xxix, 42-46). The same central thought occurs in xxv, 22, "There I will meet with thee" (comp. also xxx, 6, 36; Numb. xvii, 4). It is clear, therefore, that "congregation" is inadequate. Not the gathering of the worshippers, but the meeting of God with his people, to commune with them, to make himself known to them, was what the name embodied. Ewald has accordingly suggested *Offenbarungszeit* = tent of revelation, as the best equivalent (*Alterthümer*, p. 130). This made the place a *sanctuary*. Thus it was that the tent was the dwelling, the house of God (Bähr, *Symb.* i, 81). See CONGREGATION.

(b.) The other compound phrase, אָהֵל הָעֵדוּת, as connected with עֵד (= to bear witness), is rightly rendered by ἡ σκηνή τοῦ μαρτυρίου, *tabernaculum testimonii*, die Wohnung des Zeugnisses, "the tent of the testimony" (Numb. ix, 15) "the tabernacle of witness" (xvii, 7; xviii, 2). In this case the tent derives its name from that which is the centre of its holiness. The two tables of stone within the ark are emphatically the testimony (Exod. xxv, 16, 21; xxxi, 18). They were to all Israel the abiding witness of the nature and will of God. The tent, by virtue of its relation to them, became the witness of its own significance as the meeting-place of God and man. The probable connection of the two distinct names, in sense as well as in sound (Bähr, *Symb.* i, 83; Ewald, *Alt.* p. 230), gave, of course, a force to each which no translation can represent. See TESTIMONY.

II. *History*.—1. We may distinguish in the Old Test. three sacred tabernacles.

(1.) The Ante-Sinaitic, which was probably the dwelling of Moses, and was placed by the camp of the Israelites in the desert, for the transaction of public busi-

ness. Exod. xxxiii, 7-10, "Moses took the tabernacle, and pitched it without the camp, afar off from the camp, and called it the Tabernacle of the Congregation. And it came to pass, that every one which sought the Lord went out unto the tabernacle of the congregation, which was without the camp. And it came to pass, when Moses went out unto the tabernacle, that all the people rose up, and stood every man at his tent-door, and looked after Moses until he was gone into the tabernacle. And it came to pass, as Moses entered into the tabernacle, the cloudy pillar descended, and stood at the door of the tabernacle, and the Lord talked with Moses. And all the people saw the cloudy pillar stand at the tabernacle-door: and all the people rose up and worshipped, every one in his tent-door." This was neither the sanctuary of the tabernacle described in ch. xxv sq., which was not made till after the perfect restoration of the covenant (ch. xxxv sq.), nor another sanctuary that had come down from their forefathers and was used before the tabernacle proper was built (as Le Clerc, J. D. Michaelis, and Rosenmüller supposed); but an ordinary tent used for the occasion and purpose (Keil, *Comment.* ad loc.).

(2.) The *Sinaitic* tabernacle superseded the tent which had served for the transaction of public business probably from the beginning of the Exode. This was constructed by Bezaleel and Aholiab as a portable mansion-house, guildhall, and cathedral, and set up on the first day of the first month in the second year after leaving Egypt. Of this alone we have accurate descriptions. It was the second of these sacred tents, which, as the most important, is called the tabernacle *par excellence*. Moses was commanded by Jehovah to have it erected in the Arabian desert, by voluntary contributions of the Israelites, who carried it about with them in their migrations until after the conquest of Canaan, when it remained stationary for longer periods in various towns of Palestine (as below).

(3.) The *Davidic* tabernacle was erected by David, in Jerusalem, for the reception of the ark (2 Sam. vi, 12); while the old tabernacle remained to the days of Solomon at Gibeon, together with the brazen altar, as the place where sacrifices were offered (1 Chron. xvi, 39; 2 Chron. i, 3).

2. *Varied Fortunes of the Sinaitic Tabernacle*. (1.) *In the Wilderness*.—The outward history of the tabernacle begins with Exod. xxv. It comes after the first great group of laws (ch. xix-xxiii), after the covenant with the people, after the vision of the divine glory (ch. xxiv). For forty days and nights Moses is in the mount. Before him there lay a problem, as measured by human judgment, of gigantic difficulty. In what fit symbols was he to embody the great truths without which the nation would sink into brutality? In what way could those symbols be guarded against the evil which he had seen in Egypt, of idolatry the most degrading? He was not left to solve the problem for himself. There rose before him, not without points of contact with previous associations, yet in no degree formed out of them, the "pattern" of the tabernacle. The lower analogies of the painter and the architect seeing, with their inward eye, their completed work before the work itself begins, may help us to understand how it was that the vision on the mount included all details of form, measurement, materials, the order of the ritual, the apparel of the priests. He is directed in his choice of the two chief artists, Bezaleel of the tribe of Judah, Aholiab of the tribe of Dan (ch. xxxi). The sin of the golden calf apparently postpones the execution. For a moment it seems as if the people were to be left without the Divine Presence itself—without any recognised symbol of it (xxxiii, 3). As in a transition period, the whole future depending on the patience of the people, on the intercession of their leader, a tent is pitched (probably that of Moses himself, which had hitherto been the headquarters of consultation), outside the camp, to be provisionally the tabernacle of meeting. There the mind

of the lawgiver enters into ever-closer fellowship with the mind of God (ver. 11), learns to think of him as "merciful and gracious" (xxxiv, 6); in the strength of that thought is led back to the fulfilment of the plan which had seemed likely to end, as it began, in vision. Of this provisional tabernacle it has to be noticed that there was as yet no ritual and no priesthood. The people went out to it as to an oracle (xxxiii, 7). Joshua, though of the tribe of Ephraim, had free access to it (ver. 11).

Another outline law was, however, given; another period of solitude, like the first, followed. The work could now be resumed. The people offered the necessary materials in excess of what was wanted (xxxvi, 5, 6). Other workmen (ver. 2) and workwomen (xxxv, 25) placed themselves under the direction of Bezaleel and Aholiab. The parts were completed separately, and then, on the first day of the second year from the Exode, the tabernacle itself was erected and the ritual appointed for it begun (xl, 2).

The position of the new tent was itself significant. It stood, not, like the provisional tabernacle, at a distance from the camp, but in its very centre. The multitude of Israel, hitherto scattered with no fixed order, were now, within a month of its erection (Numb. ii, 2), grouped round it, as around the dwelling of the unseen Captain of the Host, in a fixed order, according to their tribal rank. The priests on the east, the other three families of the Levites on the other sides, were closest in attendance, the "body-guard" of the Great King. See LEVITR. In the wider square, Judah, Zebulun, Issachar, were on the east; Ephraim, Manasseh, Benjamin, on the west; the less conspicuous tribes, Dan, Asher, Naphtali, on the north; Reuben, Simeon, Gad, on the south side. When the army put itself in order of march, the position of the tabernacle, carried by the Levites, was still central, the tribes of the east and south in front, those of the north and west in the rear (ch. ii). Upon it there rested the symbolic cloud, dark by day and fiery-red by night (Exod. xl, 38). When the cloud removed, the host knew that it was the signal for them to go forward (ver. 36, 37; Numb. ix, 17). As long as it remained—whether for a day, or month, or year—they continued where they were (ver. 15-23). Each march, it must be remembered, involved the breaking-up of the whole structure, all the parts being carried on wagons by the three Levitical families of Kohath, Gershon, and Merari, while the "sons of Aaron" prepared for the removal by covering everything in the Holy of Holies with a purple cloth (iv, 6-15). See ENCAMPMENT.

In all special facts connected with the tabernacle, the original thought reappears. It is the place where man meets with God. There the Spirit "comes upon" the seventy elders, and they prophesy (Numb. xi, 24, 25). Thither Aaron and Miriam are called out when they rebel against the servant of the Lord (xii, 4). There the "glory of the Lord" appears after the unfaithfulness of the twelve spies (xiv, 10) and the rebellion of Korah and his company (xvi, 19, 42) and the sin of Meribah (xx, 6). Thither, when there is no sin to punish, but a difficulty to be met, do the daughters of Zelophehad come to bring their cause "before the Lord" (xxvii, 2). There, when the death of Moses draws near, is the solemn "charge" given to his successor (Deut. xxxi, 14).

(2) *In Palestine.*—As long as Canaan remained unconquered, and the people were still therefore an army, the tabernacle was probably moved from place to place, wherever the host of Israel was for the time encamped—at Gilgal (Josh. iv, 19), in the valley between Ebal and Gerizim (viii, 30-35), again, at the headquarters of Gilgal (ix, 6; x, 15, 43); and, finally, as at "the place which the Lord had chosen," at Shiloh (ix, 27; xviii, 1). The reasons of this last choice are not given. Partly, perhaps, its central position, partly its belonging to the powerful tribe of Ephraim, the tribe of the great captain of the host, may have determined the preference. There it continued during the whole period of the judges,

X.—I

the gathering-point for "the heads of the fathers" of the tribes (xix, 51), for councils of peace or war (xxii, 12; Judg. xxi, 12), for annual solemn dances, in which the women of Shiloh were conspicuous (ver. 21). There, too, as the religion of Israel sank towards the level of an orgiastic heathenism, troops of women assembled, shameless as those of Midian, worshippers of Jehovah, and, like the *ἱερόδουλοι* of heathen temples, concubines of his priests (1 Sam. ii, 22). It was far, however, from being what it was intended to be, the one national sanctuary, the witness against a localized and divided worship. The old religion of the high-places kept its ground. Altars were erected, at first under protest, and with reserve, as being not for sacrifice (Josh. xxii, 26), afterwards freely and without scruple (Judg. vi, 24; xiii, 19). Of the names by which the one special sanctuary was known at this period, those of the "house" and the "temple" of Jehovah (1 Sam. i, 9, 24; iii, 3, 15) are most prominent.

A state of things which was rapidly assimilating the worship of Jehovah to that of Ashtaroth or Mylitta needed to be broken up. The ark of God was taken, and the sanctuary lost its glory; and the tabernacle, though it did not perish, never again recovered it (1 Sam. iv, 22). Samuel, at once the Luther and the Alfred of Israel, who had grown up within its precincts, treats it as an abandoned shrine (so Psa. lxxviii, 60), and sacrifices elsewhere—at Mizpah (1 Sam. vii, 9), at Ramah (ix, 12; x, 8), at Gilgal (ver. 8; xi, 15). It probably became once again a movable sanctuary; less honored, as no longer possessing the symbol of the Divine Presence, yet cherished by the priesthood, and some portions at least of its ritual kept up. For a time it seems, under Saul, to have been settled at Nob (xxi, 1-6), which thus became what it had not been before—a priestly city. The massacre of the priests and the flight of Abiathar must, however, have robbed it yet further of its glory. It had before lost the ark. It now lost the presence of the high-priest, and with it the oracular ephod, the Urim and Thummim (xxii, 20, xxiii, 6). What change of fortune then followed we do not know. The fact that all Israel was encamped, in the last days of Saul, at Gilboa, and that there Saul, though without success, inquired of the Lord by Urim (xxviii, 4-6), makes it probable that the tabernacle, as of old, was in the encampment, and that Abiathar had returned to it. In some way or other it found its way to Gibeon (1 Chron. xvi, 39). The anomalous separation of the two things which, in the original order, had been joined brought about yet greater anomalies, and while the ark remained at Kirjath-jearim, the tabernacle at Gibeon connected itself with the worship of the high-places (1 Kings iii, 4). The capture of Jerusalem, and the erection there of a new tabernacle, with the ark, of which the old had been deprived (2 Sam. vi, 17; 1 Chron. xv, 1), left it little more than a traditional, historical sanctity. It retained only the old altar of burnt-offerings (1 Chron. xxi, 29). Such as it was, however, neither king nor people could bring themselves to sweep it away. The double service went on; Zadok, as high-priest, officiated at Gibeon (1 Chron. xvi, 39); the more recent, more prophetic service of psalms and hymns and music, under Asaph, gathered round the tabernacle at Jerusalem (ver. 4, 37). The divided worship continued all the days of David. The sanctity of both places was recognised by Solomon on his accession (1 Kings iii, 15; 2 Chron. i, 3). But it was time that the anomaly should cease. As long as it was simply tent against tent, it was difficult to decide between them. The purpose of David, fulfilled by Solomon, was, that the claims of both should merge in the higher glory of the Temple. Some, Abiathar probably among them, clung to the old order, in this as in other things; but the final day at last came, and the tabernacle of meeting was either taken down or left to perish and be forgotten. So a page in the religious history of Israel was closed. Thus the disaster of Shiloh led to its natural consummation.

III. *Description.*—The written authorities for the restoration of the tabernacle are, first, the detailed account to be found in Exod. xxvi, and repeated in xxxvi, 8-38, without any variation beyond the slightest possible abridgment; secondly, the account given of the building by Josephus (*Ant.* iii, 6), which is so nearly a repetition of the account found in the Bible that we may feel assured that he had no really important authority before him except the one which is equally accessible to us. Indeed, we might almost put his account on one side if it were not that, being a Jew, and so much nearer the time, he may have had access to some traditional accounts which may have enabled him to realize its appearance more readily than we can do, and his knowledge of Hebrew technical terms may have assisted him to understand what we might otherwise be unable to explain. The additional indications contained in the Talmud and in Philo are so few and indistinct, and are, besides, of such doubtful authenticity, that they practically add nothing to our knowledge, and may safely be disregarded.

For a complicated architectural building, these written authorities probably would not suffice without some remains or other indications to supplement them; but the arrangements of the tabernacle were so simple that they are really all that are required. Every important dimension was either five cubits or a multiple of five cubits, and all the arrangements in plan were either squares or double squares, so that there is, in fact, no difficulty in putting the whole together, and none would ever have occurred, were it not that the dimensions of the sanctuary, as obtained from the "boards" that formed its walls, appear at first sight to be one thing, while those obtained from the dimensions of the curtains which covered it appear to give another. The apparent discrepancy is, however, easily explained, as we shall presently see, and never would have occurred to any one who had lived long under canvas or was familiar with the exigencies of tent architecture.

The following close translation of Exod. xxvi will set the subject generally before the reader. We have indicated, by the use of *italics*, marked variations from the A. V.:

1. And the tabernacle (מִשְׁכָּן) thou shalt make—ten curtains: twisted linen, and violet and purple and crimson of cochineal: cherubs, work of (an) artificer, thou shalt make them. (The) length of the one curtain (shall be) eight and twenty by the cubit, and (the breadth) four by the cubit, the one curtain: one measure (shall be) to all the curtains. Five of the curtains shall be joining each to its fellow, and five of the curtains joining each to its fellow. And thou shalt make loops (כְּלִי) of violet upon (the) edge of the one curtain from (the) end in the joining, and so shalt thou make in (the) edge of the endmost curtain in the second joining: fifty loops shalt thou make in the one curtain, and fifty loops shalt thou make in (the) end of the curtain which is in the second joining, the loops standing opposite (מִקְבְּלֵיהֶם) the one to its fellow. And thou shalt make fifty taches (פָּסָרִים) of gold, and thou shalt join the curtains one to its fellow with the taches, and the tabernacle shall be one.
7. And thou shalt make curtains of goats' (hair) for a tent (אֹהֶל) upon the tabernacle, eleven curtains shalt thou make them. (The) length of the one curtain (shall be) thirty by the cubit, and (the breadth) four by the cubit, the one curtain: one measure (shall be) to (the) eleven curtains. And thou shalt join five of the curtains separately, and six of the curtains separately; and thou shalt double the sixth curtain towards (the) forefront of the tent. And thou shalt make fifty loops upon (the) edge of the one curtain—the endmost in the joining, and fifty loops upon (the) edge of the curtain—the second joining. And thou shalt make taches of copper—fifty; and shalt bring the taches in the loops, and thou shalt join the tent, and (it) shall be one. And (the) overplus hang in (the) curtains of the tent—half of the overplus curtain shall hang upon (the) back of the tabernacle; and the cubit from this (side) and the cubit from that (side) in the overplus in (the) length of (the) curtains of the tent shall be hung upon (the) sides of the tabernacle from this (side) and from that (side), to cover it.

14. And thou shalt make (a) covering to the tent, skins of rams reddened, and (a) covering of skins of taches from above.
15. And thou shalt make the planks (טַבָּחִים) for the tabernacle, trees [wood] of acacias (אֲזֵבִיחַ), standing.
16. Ten cubits (shall be) the length of the plank, and (a) cubit and (the) half of the cubit (the) breadth of the one plank. Two hands (תַּוְנֵים) (shall there be) to the one plank, joined (מְשֻׁבָּבִים), others corresponding) [comp. xxxvi, 22] each to its fellow: so shalt thou make (or do) for all (the) planks of the tabernacle. And thou shalt make the planks for the tabernacle, twenty planks for (the) Négeb [south] quarter towards Tey-mán [the south]. And forty bases (מְשָׁבִיטִים) of silver shalt thou make under the twenty planks, two bases under the one plank for its two huds, and two bases under the one (next) plank for its two hands. And for the second rib [flank] of the tabernacle to (the) Taphón [north] quarter (there shall be) twenty planks: and their forty bases of silver, two bases under the one plank, and two bases under the one (next) plank.
22. And for (the) thighs [rear] of the tabernacle seaward [west] thou shalt make six planks. And two planks shalt thou make for (the) angles (מְשָׁבִיטִים, cutting off) of the tabernacle in the thighs [rear]: and (they) shall be twinned (מְשֻׁבָּבִים, perhaps jointed, hinged, or bolted) from below together, and shall be twins upon its head [top] towards the one ring: so shall (it) be to both of them; for the two angles shall (they) be.
25. And (there) shall be eight planks, and their bases of silver—sixteen bases, two bases under the one plank, and two bases under the one (next) plank.
26. And thou shalt make bars (בָּרִים) of trees [wood] of acacias [Shittim]; five for (the) planks of the one rib [flank] of the tabernacle, and five bars for (the) planks of the second rib [flank] of the tabernacle, and five bars for (the) planks of (the) rib [flank] of the tabernacle for the thighs [rear] seaward [west]. And the middle bar in (the) middle of the planks (shall) bar (מְשֻׁבָּבִים, be bolting through) from the end to the end.
29. And the planks thou shalt overlay (with) gold, and the rings thou shalt make (of) gold, (as) houses [places] for the bars; and thou shalt overlay the bars (with) gold.
30. And thou shalt rear the tabernacle like its judgment [style] which I made thee see in the mountain.

1. *The court* (חֲצֵר) was a large rectangular enclosure, open to the sky, and with its entrance at the east end. Its dimensions are given more than once, being 100 cubits long and 50 broad. Its construction was very simple, being composed of a frame of four sides of distinct pillars, with curtains hung upon them. In other words, it was surrounded by canvas screens—in the East called *kannáts*, and still universally used to enclose the private apartments of important personages. The pillars were probably of shittim-wood (that is, the desert acacia), a light, close-grained, imperishable wood, easily taking on a fine natural polish, though it is nowhere directly intimated of what material they were; they were five cubits in height (sufficient to prevent a person from looking over them into the enclosure), but their other dimensions are not given, so that we cannot be sure whether they were round (Ewald) or four-cornered (Bähr), probably the latter. At the bottom these pillars were protected or shod by sockets of brass (copper). It is not quite easy to say whether these sockets were merely for protection, and perhaps ornament, or if they also helped to give stability to the pillar. In the latter case, we may conceive the socket to have been of the shape of a hollow wedge or pointed funnel driven into the ground, and then the end of the pillar pushed down into its cavity; or they may have been simply plates laid on the ground, with a hole for the reception of the tenoned foot of the pillar, as in the case of the "boards" noticed below. Other appliances were used to give the structure firmness, viz. the common articles of tent architecture, ropes and pins (Exod. xxxv, 18). At the top these pillars had a capital or head (xxxviii, 17, "chapter"), which was overlaid with silver; but whether the body of the pillar was plated with any metal is not said. Connected with the head of the pillar were two other articles, *hooks*, and things called *רִשְׁקִים*,

*chashukim*, rendered "fillets," i. e. ornamental chaplets in relief round the pillar (so Ewald, *Altenthümer*, p. 335, note 5), but most probably meaning rods (so Gesenius, Fürst, and others), joining one pillar to another. These rods were laid upon the hooks, and served to attach the hangings to and suspend them from. The hooks and rods were silver, though Knobel conjectures the latter must have been merely plated (*Exod.* p. 278). The mode of adjusting these hangings was similar to that of the doorway screens and "vail" described below.

Curtain-wall of Court. (Details suggested by Assyrian sculptures.)

The circumference of the enclosure thus formed was 300 cubits, and the number of pillars is said to have been  $20 + 20 + 10 + 10 = 60$ , which would give between every two pillars a space of  $\frac{300}{60} = 5$  cubits. There has been considerable difficulty in accurately conceiving the method adopted by

Curtain-wall of Entrance to Court. (Details suggested by Assyrian sculptures.)

the writer in calculating these pillars. This difficulty arises from the corner pillars, each of which, of course, belongs both to the side and to the end. It has been supposed by many that the author calculated each one corner pillar twice; that is, considered it, though one in itself, as a pillar of the side and also as a pillar of the end. This would make in all 56 actual pillars, and, of course, as many spaces (Bähr, Knobel, etc.); that is, nineteen spaces on each side, and nine on the end. Now since the side was 100 cubits and the end 50, this would give for each side space  $\frac{100}{19} = 5\frac{5}{19}$ , and for each end space  $\frac{50}{9} = 5\frac{5}{9}$  cubits, spaces artificial in themselves and unlike each other. It is certainly most probable that the spaces of side and end were of exactly the same size, and that each of them was some exact, and no fractional, number of cubits. The difficulty may be completely removed by assuming the distance of 5 cubits to each space, and counting as in the accompanying ground-plan. Thus, since each side was 100 cubits, this needs twenty spaces. But twenty spaces need twenty-one pillars. So that, supposing us to start from the south-east corner and go along the south side, we should have for 100 cubits twenty-one pillars and twenty spaces; but of these we should count twenty spaces and pillars for the south side, and call the south-west corner pillar, not the twenty-first pillar of the side, but the first of the end. Then

The hangings (כְּלֵימָ' *kela'im*) of the court were of twined *shesh*; that is, a fabric woven out of twisted yarn of the material called *shesh*. This word, which properly means *white*, is rendered by our version "fine linen," a rendering with which most concur, while some decide for *cotton*. At all events, the curtains were a strong fabric of this glancing white material, and were hung upon the pillars, most likely outside, though that is not known, being attached to the pillars at the top by the hooks and rods already described, while the whole was stayed by pins and cords, like a tent.

The entrance, which was situated in the centre of the east end, and was twenty cubits in extent, was formed also of a hanging (technically מַסָּאָה *masák*) of "blue, purple, and scarlet, and fine twined linen, work of the רֹקֶמֶת *rokém*" (A. V. "needle-work"). The last word has usually been considered to mean *embroiderer* with the needle, and the curtain fancied to have had figures, flowers, etc., of the mentioned colors wrought into it. But such kinds of work have always a "wrong" side, and, most probably, taking into account the meaning of the word in Arabic, and the fondness of the Arabs at this day for striped blankets, the word means "weaver of striped cloth," and the hanging is to be conceived as woven with lines or stripes of blue, purple, and scarlet

Plan of the Tabernacle and its Court. (From Rignenbach's *Mosaische Stiftshütte*.)

Large enclosure—Court (open overhead). Small enclosure—the Tabernacle (covered). a. Ark in the Holy of Holies. b. Table of show-bread. c. Golden candlestick. d. Altar of incense—e, f being in the holy place. e. Laver, or basin for washing. f. Altar of burnt-offering. g. Gang or ledge around this altar for the priests to stand upon. A. Sloping ascent from the ground to this ledge. (The last two articles are in the court.)

on the white ground of *sheesh* (Knobel, Keil, etc.). In other words, the *warp*, or longitudinal threads, was of white linen, while the *woof* made cross-bars (which would hang vertically) of brilliantly dyed wool in a treble thread. They were merely spun and woven, without gold or embroidered figures.

The furniture of the court consisted of the altar of burnt-offering and the laver. These are sufficiently described under their appropriate headings. See ALTAR; LAVER. What concerns us is the position of them. In all probability, the tabernacle proper stood with its entrance exactly in the middle of the court; that is, fifty cubits from the entrance of the court; and very possibly the altar of burnt-offering stood, again, midway between the door of the court and that of the tabernacle, i. e. twenty-five cubits from each, and somewhere in the twenty-five cubits between the altar and the tabernacle stood the laver (Josephus, *Ant.* iii, 6, 2).

2. *The Tabernacle itself.*—Following the method pursued with the outer court, we begin with the walls. These were built of boards, or, rather, planks (מִשְׁכָּבִים, *kerashim*), in close contact with each other. They were of shittim-wood, overlaid with gold on both sides, ten cubits high and one and a half cubit broad, their thickness being nowhere given. From the foot of each plank came out two "tenons" (יָדוֹת, *yadôth* = hands), which must not be conceived as connecting the planks with each other laterally, as if there corresponded to a tenon in one plank a mortise in another; they were for connecting each particular plank with the ground, and must be conceived as two wedge-shaped or pointed pieces (probably of copper, or perhaps of silver), projecting from the lower end of the plank. These tenons were thrust into silver sockets, of which two were prepared for each plank, each socket being the weight of a

talent of silver. Whether these sockets were wedge-shaped or pointed, and themselves went into the ground, or whether they were mere foot-plates for the plank, with holes for the tenons to pass through into the ground (the last more probable), is not intimated. Prof. Paine has ingeniously suggested the thickness of these sockets as one sixth of a cubit [see METROLOGY], and likewise their form (half a cubit square), as in the adjoining cut. He also calculates from this size of the sockets, or foot-plates, that the planks should be (as Josephus says) one third of a span, i. e. one sixth of a cubit thick (which is quite sufficient for strength), in order to turn the corners neatly, as illustrated in the subjoined cut. This might indeed have been effected on the supposition that the planks were one cubit thick, as the accompanying cut will show; but we can hardly suppose that the planks overhung the bases which supported them. These bases did not require to en-

Bottom of the Corner Planks, shown as resting upon the Bases (according to Paine).

Planks on their Bases (according to the common view).

ter deeply into the ground, as there was no lateral strain upon them, and the whole weight of the building kept them firmly in their place. Their only object was to keep the bottom of the planks level and even. The upper ends of the planks, however, needed to be kept from separating, as they would certainly do under the traction of the stay-cords fore and aft. Hence the tenons mentioned in Exod. xxvi, 17 are carefully distinguished from those (already described) referred to in ver. 19; and they are designated (without any sockets assigned to them) by a peculiar term, מְשַׁלְּבוֹת, *meshullabôth*, which occurs here only. It is regarded by Gesenius as radically signifying *notched*, but he understands it here as meaning *joined*, a sense in which Furst and Muhlau emphatically concur, to the exclusion of that adopted by the Sept. (ἀντιπικροῦς) and the A. V. ("set in order"). Prof. Paine refers the term to the *top* of the planks, and renders it *clasp*, understanding a separate plate with holes corresponding to pins or tenons (probably all of copper) in the upper end of the planks likewise, as in the annexed cut. This is an essential provision for the stability of the structure, of which no one else seems to have thought. Nevertheless, as he privately informs us, he has since abandoned this distinction between the top and bottom tenons, and in his forthcoming second edition he will dispense with the clasps. The long middle bar, if pinned to each end plank, would subserve a similar purpose. Something of this sort is perhaps intimated by the *bolting* (בִּלְבָּרִית, *bolim*) of Exod. xxvi, 28; xxxvi, 33. The roof-curtains would likewise assist in holding the planks together.

Fastenings for the Top of the "Boards" of the Tabernacle (according to Paine).

A, a clasp. B, two boards clasped.

Of these boards, which, being one and a half cubit, i. e. about two and a half feet broad, must have been formed of several smaller ones jointed together, there were twenty on the north and twenty on the south side, thus making each side the length of thirty cubits. For the west end were made six boards, yielding nine cubits, and in addition two boards for the corners (Exod. xxvi, 22 sq.), making in all eight boards and twelve cubits; and as the end is thought (so Josephus, *Ant.* iii, 6, 3) to have been ten cubits (proportionate to that in Solomon's Temple, 1 Kings vi, 2, 20), this would imply that each corner plank added half a cubit to the width, but nothing to the length, the measurements being taken inside. Were the planks supposed a cubit thick, which is the usual calculation (but an extravagant one on account of the weight), the remaining cubit of the corner plank would exactly cover the thickness of the side plank. The description given of the corners is exceedingly perplexing, and the diversity of opinion is naturally great. The difficulties all lie in Exod. xxiv, 24. It goes on, "they shall be coupled together;" rather, they shall be "twins," or "twinned" (תִּזְמִין, *tozmin*). "They" evidently refers to the corner planks; and, setting aside the idea that they make twins together, which cannot

Corner Board of the Tabernacle (according to Riggenbach).

be, since they are at opposite corners, the expression may mean that each corner plank of itself makes twins, which it would do if it had two legs containing the angle between them. If the corner plank be two-legged, it adds necessarily something to the length, and thus destroys the measurement. One explanation is therefore to regard the end of the corner plank, *e*, as twin, i. e. corresponding to the side plank *a*. Further, each corner plank must be "entire (תמים, *tammim*) at or on its head" (A. V., with many others, considers *tammim* the same as *toämim*). Now if the "head" be not the top of the plank, but the edge or point of the corner, *f*, then the statement implies that the corner plank of the end wall, though prolonging the side wall outside, must not be cut away or sloped, for example, in the fashion indicated by the dotted lines *c d*. Once more, the words are added "unto one ring," accurately "unto the first ring." Keil (*Comment. ad loc.*) understands that "the two corner boards at the back were to consist of two pieces joined together at a right angle, so as to form, as double boards, one single whole from the top to the bottom," and that "one ring was placed half-way up the upright board in the corner or angle, in such a manner that the central bolt, which stretched along the entire length of the walls, might fasten into it from both the side and back." Murphy (*Comment. ad loc.*)

Corner Board (according to Murphy).

suggests a form which we represent by the annexed figure. But Paine's arrangement, as in the cut below, seems to us to meet all the requirements of the case in the simplest and most effectual manner. The ring and staples at the top and bottom of the corner planks formed a *hinge*, so that the adjoining planks were *twinned*, or carried together as one. That the end planks went in between the last side planks (as neatness and usage in such structures dictated), making the interior width of the tabernacle the full twelve cubits, is probable from the length of the roof-curtains presently described, if they were longitudinally arranged.

The walls or planks, in addition to the stability they may have derived from the sockets at the bottom (and perhaps the clasps at the top), were bound together by five bars or bolts, thrust into rings attached to each plank. These bars, in all probability, ran along the outside, though that is not intimated, and Ewald thinks otherwise. One bar is said to have gone in the middle (בְּתוֹךְ): this is usually taken to mean half-way up the plank, and with two bars on each side of it, above and below; but some interpret "through the heart of the boards" (Riggenbach), and others understand it of the rear bar alone. Thus there seem to have been three

Top and Bottom Parts of Corner Boards (according to Paine).

rows of bars, the top and bottom one on each of the sides being in two pieces. Josephus's account is somewhat different: "Every one," he says (*Ant. iii, 6, 3*), "of the pillars or boards had a ring of gold affixed to its front outwards, into which were inserted bars gilt with gold, each of them five cubits long, and these bound together the boards; the head of one bar running into another after the manner of one tenon inserted into another. But for the wall behind there was only one bar that went through all the boards, into which one of the ends of the bars on both sides was inserted." The whole edifice was doubtless further stayed by ropes attached to tent-pins in the ground from knobs on the outside of the planks. (See below.)

3. *Drapery of the Tabernacle.*—The wooden structure was completed as well as adorned by four kinds of hangings, each of which served a useful and even needful purpose.

(1.) *The Roof.*—The first question that arises here is whether the roof was flat, like that of Oriental houses, or peaked and slanting, as in Occidental buildings. The

General View of the Wooden Walls of the Tabernacle. (From Paine.)

The Tabernacle as restored by Fergusson.

old representations, such as Calmet's, take the former view; but to this it may be forcibly objected that it would in that case be impossible to stretch the roof-covering sufficiently tight to prevent the rain and snow from collecting in the middle, and either crushing the whole by its weight or flooding the apartments. Hence most later writers assume a peaked roof, although there is no mention of a ridge-pole, nor of supports to it; but the name "tent" given to the upper part of the edifice is itself conclusive of this form, and then these accessories would necessarily follow.

The roofing material was a canvas of goats' hair, the article still employed by the Bedawin for their tents. It consisted of eleven "curtains" (רִצְאוֹת), i. e. breadths or pieces of (this camlet) cloth, each thirty cubits long and four cubits wide, which is as large, probably, as could well be woven in the loom at once. Ten of these were to be "coupled" (רִצְאוֹת), i. e. sewed together, five in one sheet, and five in another, evidently by the selvage; thus making two large canvases of thirty cubits by twenty each. But as the building was only twelve cubits wide, one of them alone would more than suffice for a roof, even with a peak. Hence most interpreters understand that the surplus width was allowed to hang down the sides. But what is to be done with the other sheet? Fergusson (in *Smith's Dict. of the Bible*, s. v. "Temple") supposes (with interpreters in general) that the two sheets were thrown side by side across the ridge-pole, the extra length (some fifteen cubits) being extended at the eaves into a kind of wings, and the surplus width (ten cubits) furled along the slope of the gable, or perhaps stretched out as a porch. But there is no authority whatever for this disposal; and if the two pieces of canvas were intended to be thus adjoined, there appears no good reason why they should not have been sewed together at the first, like the individual breadths. Hence Paine suggests that they were designed as a *double* roof, so as the more effectually to shed rain, somewhat in the manner of a "fly" or extra roof to a modern tent. For this the size is exactly adequate. If the angle at the peak were a right angle, as it naturally would be, the gable, of course, being an isosceles triangle, eight and a half cubits would be required for each slope of the roof (they being the two legs of which twelve is the hypotenuse); thus leaving one cubit to cover each of the eaves (as specified in ver. 13), and one cubit for seams, and perhaps hems. The seams, in

order to be water-tight (especially since they ran parallel with the ridge and eaves) as well as smooth, would best be formed by overlapping the edges, in shingle style.

The sixth "curtain," or extra single piece, was to be "doubled in the fore-front of the tabernacle" (xxvi, 9, וְכִסְתָּהּ אֶל-מִדְּלִי פָנֵי הָאֹהֶל), which interpreters generally have understood as meant to close the gable. This, as Paine suggests, it would neatly do if folded in two thicknesses (like the rest of the goat's-hair cloth) across the lower part of the rear open space above the "boards," as it is just long enough (twice fifteen cubits; the surplus three cubits being employed exactly as in the case of the other sheets), and sufficiently wide (four cubits up the six of the perpendicular; leaving only a small triangle at the peak for ventilation); the gores or corners probably being tucked in between the two thicknesses of the roof-sheets. This sixth curtain, of course, was sewed *endwise* to one of the outer pieces of the under canvas.

These roof-curtains were joined by means of fifty "loops" (לִלְאוֹת, *lulaoth*) of unspecified (probably the same strong) material, and as many taches (רִקְסִים, *kerasim*) of "brass." With most interpreters, Fergusson understands these to be intended for connecting the

The Tabernacle as restored by Paine.

Rear of the Tabernacle, showing the gable curtain according to Paine.

Copper Tache in the Tabernacle "Boards," with its Attachments. (After Paine.)

edges of the two sheets together so as to form one roof-canvas. But besides the uselessness of this (as above pointed out), on this plan the rain would find an easy inlet at this imperfect suture. Hence Paine more reasonably concludes that they were designed for buttoning down the double canvas at the eaves so as to form "one tent" (xxvi, 11, אֶחָד, i. e. the upper or tent part of the building). The taches, accordingly, were not *hooks* (as most understand: Fergusson thinks "S hooks"), but knobs in the planks on the outside, placed one cubit below the top (ver. 12). The number of the taches would thus exactly correspond to the requirements of the "boards," i. e. twenty for each side and eight for the end, with one additional for each rear corner (where a tache would be needed for both edges of the board, the others being in the front edge, as the first board would necessarily have it there; in the rear boards the knob would be in the middle). See TACHE.

(2.) Another set of curtains was provided, consisting of ten pieces of stuff, each twenty-eight cubits long and four cubits wide, to be sewed into two large cloths of five "curtains" or breadths each. From the general similarity of the description, interpreters have naturally inferred that they were to be joined and used in like manner; but the necessity or practicability of employing them overhead is far from obvious. Nor does the size in that case suit; for besides the difficulty of disposing

of the surplusage in breadth (in length they would be scant if double), we naturally ask, Why were they different in number and size from the other roofing material? Prof. Paine therefore thinks that they were sewed *end to end* (the original is אֶחָד-אֶחָד, one to the other, xxvi, 3; different from לְכֶד, separately, ver. 9, of the roof-curtains) in two long pieces (they would probably have been woven thus had it been possible), and then hung double in loose drapery around the interior of the tabernacle, being just high enough (four cubits) to cover the joints of the

The Inner Curtains according to Paine.

boards and prevent any one from looking through the cracks from without. These curtains were suspended on fifty knobs or taches of gold by means of fifty loops of the same material as the curtains themselves; these fastenings may be arranged as in the case of the roof-canvas. It thus became "one tabernacle" (ver. 6, מִשְׁכָּן אֶחָד, i. e. these curtains belonged to the upright [wooden] part of the structure, in distinction from the sloping [canvas] or "tent" part above it). The material of these inner curtains was similar to that of the door of the outer court (xxvii, 16), but it was also to be embroidered with cherubim, like the interior "vail" (xxvi, 31), which will be considered below.

(3.) A coat of "rams' skins dyed red and táchash (A. V. "badgers," probably seal or some other fur) skins" was furnished as an additional covering (xxvi, 14, מִלְמָלָה, *millemálah*, from upward). This is usually regarded as a part of the roof; but to pile them there would have been sure to catch the rain, and so prove worse than useless. Paine places them on the outside of the "boards" to hide the cracks and prevent the wind and rain from driving in. Hence the number of skins is not specified; they were to form a blanket sufficiently large to cover the walls, and run up under the edge of the roof-canvas so as to catch the drip from the eaves. Doubtless the táchash fur was placed next the smooth gilding, and in its natural state, because hidden; and the rougher but more durable ram's-wool was exposed, the hair shingling downward to the weather, but dyed a brilliant color for effect. They would naturally be hung upon the copper taches, which served so many useful purposes in the "boards." They are called in ver. 14 "a covering" (מִכְשֶׁה, *mikséh*, not necessarily a roof, for it is used only of this fur robe [or some similar one, Numb. iv, 8, 12] and of the screen [whatever that may have been] of Noah's ark [Gen.

Face and Section of the "Boards" of the Tabernacle, showing their varied Attachments. (After Paine.)

viii, 13] for the *tent* (אֹהֶל, *ohel*), apparently as completing the canvas or tent-like part of the structure.

Saalschütz (*Archäol. der Hebräer*, ii, 321 sq.) represents the hangings of the tabernacle as suspended in the form of a tent, but in a peculiar form. He thinks the מִשְׁכָּן was properly the space enclosed by the boards of acacia-wood; and that these formed the outer wall, so to speak, *within* which the tabernacle, the אֹהֶל properly so called, was reared in the form of a peaked tent. Of this the byssus curtains, he supposes, formed the internal drapery, while the goats'-hair curtains, covered with leather and tacheash skins, formed the outer covering. The whole structure would thus present the appearance externally of a peaked tent, reared within a high palisade of wood, and open at the front. This representation has the advantage of allowing the ornamental curtain, and also the gilded boards with their golden rings and silver sockets, to be fully visible. There seems, however, at least one fatal objection to it, viz. that it does not fulfil the condition that the joinings of the curtains shall be over the pillars that separate the holy from the most holy place—a condition of essential significance, as we shall see.

(4.) The *doorways* of the tabernacle were formed or rather closed in a manner altogether analogous to the entrance of the exterior court, namely, by a vertical screen or sheet of cloth made of heavy material, and (in one case) still further stiffened by embroidery, similar to the piece of tapestry that hangs at the portal of modern cathedrals in Italy, or (to speak more Oriental-ly) like the flap at the opening of a modern tent and the carpet or camlet partition between the male and female apartments of a Bedawin abode. Of these there were two, each of which is denoted by a distinctive term rarely varied.

(a.) The front opening (פֶּתַח, *péthach*; A. V. "door") was closed sufficiently high to prevent a passer-by from looking in, by a "hanging" (מָסָכָה, *masák*, a screen, or "covering" from the sun [Isa. cv, 39] or from observation [2 Sam. vii, 19; Isa. xxii, 8]) of materials exactly like that of the entrance to the court already described, suspended upon five copper-socketed and gilded pillars (מְדִבְרִים) of acacia-wood by means of golden hooks (וִּיגִים, *pegs*, spoken only of these and those at the outer entrance), the whole being probably of the same height, proportions, and style in other respects as the exterior one just referred to. The number of these pillars is significant: as there were five of them, one must necessarily stand in the centre, and this one was probably carried up so as to support one end of the ridge-pole, which we have above seen is presumable. A corresponding pillar in the rear of the tent may be inferred to sustain the other end, and possibly one or more in the middle of the building.

(b.) A "vail" (פָּרֹכֶת, *paróket*, *separatrix*, used only of this particular thing, sometimes [Exod. xxxv, 12; xxxix, 34; xl, 21] with the addition of the previous term for emphasis) divided the interior into two apartments, called respectively the "holy place" and the "most holy." This partition-cloth differed only from the exterior ones in being ornamented (perhaps on both sides; comp. 1 Kings vi, 29) with figures of cherubim stitched (probably with gold thread, i.e. strips of gold-leaf rolled and twisted) upon it, apparently with the art of the embroiderer (מְעֻשֵׂה, *the work of an artificer*; A. V. "cunning work"). It was suspended upon four pillars precisely like those of the door "hanging," except that their sockets were of silver. A special statement of the text (Exod. xxvi, 33), "And thou shalt hang up the vail under the taches" (וַתַּחַת אֲתֵּי הַפָּרֹכֶת תִּתְּחַל הַיָּדֹת הַקֶּרֶסֶת), evidently meaning that the pillars to which its ends were to be attached were to be placed directly beneath the golden knobs opposite in the walls,

on which likewise hung the side-curtains, shows both that these latter were thus completed by a drapery on the remaining side of each room (it will be remembered that the front knobs likewise correspond in position to that of the doorway screen), and likewise proves the character and situation of the taches themselves (not hooks in the roof, which at the eaves was at least five cubits above the top of the "vail"). As the "vail," like the two outer screens, was stretched tight across the space it occupied, it was of course made exactly long enough for that purpose; and, thus, too, the embroidered figures (which, if of life-size, were of just the height to extend upright across the stuff—about four cubits) would show to the finest effect, not being in folds like the interior side-curtains.

It is not a little singular that the exact position of the "vail" is not otherwise prescribed than by the above requirement; nor is the length of either of the apartments which it separated given, although together they amounted to thirty cubits. On the supposition (sustained by the analogy in the Temple) that the Most Holy was an exact square, i.e. (according to our determination above) twelve cubits each way, the knob or tache opposite which it would hang must have been that which stood in the forward edge of the eighth plank from the rear of the building. Whether it was in front of or behind the pillars is not certain; but the former is probable, as it would thus seem a more effectual barrier from without. The end pillars apparently stood in immediate contact with the side walls, both in order to sustain the ends of the vail, and to leave a wider space between them for ingress and egress. The vail was suspended directly upon golden pins (A. V. "hooks") inserted in the face of the pillars near their summit; and thus differed (as did likewise the screen of the door of the tabernacle) from the hangings of the outer court, which hung upon silver rods (A. V. "fillets") (doubtless by loops running on the rods) resting on similar pins or "hooks." The reason of this difference seems to have been that the greater space between the court pillars (so as to admit animals as well as men) would have caused too much sag in the hanging without intermediate support, which could only be furnished by the rods and attachments along the upper edge.

4. *Supplementary Note.*—Since the above was in type we have reconsidered a few points concerning the structure of this edifice which admit of further elucidation.

(1.) *The "Corner-boards."*—The fact that the dimensions of the courts and the building itself were in decimal proportions, and that in the temple subsequently erected for the same purpose, which maintained multiples of these dimensions, the holy and most holy were exactly twenty cubits wide (1 Kings vi, 2), leads so strongly to the presumption that in the tabernacle these rooms were ten cubits wide, that we are disposed to recall the arrangement adopted in the foregoing discussion, which gives these apartments a width of twelve cubits, leaving for the holy place the irregular dimensions of eighteen by twelve cubits. Adopting the suggestion of Keil (*Commentary*, ad loc.) that the corner-boards were constructed of two parts, forming a right angle with each other, we have only to take a plank one and a half cubits wide, like all the others, divide it lengthwise into two portions, one four sixths and the other five sixths of a cubit wide, and fasten these together in that manner, in order to obtain the needed half cubit necessary at each end of the rear, and allow one wing of the corner-board to lap around the end of the last side-board, and cover the joint neatly and symmetrically, as in the following figure. This last is the adjustment adopted by Brown (*The Tabernacle*, etc. [Lond. 1872], p. 23), who reviews and justly rejects the conjectures of Josephus (*Ant.* iii, 6, 3), Kalisch (*Commentary*, ad loc.), and Von Gerlach (*ibid.*). His complicated arrangement of the sockets, however, is unnecessary, as may be seen from the following diagram.

The statement respecting these corner-planks in

Corner-board and Sockets.

Exod. xxvi, 24, "And they shall be *twinned* (תִּזְכְּרִים) from below, and together they shall be *complete* (תִּמְלִים) upon its top to the first (or *same*) ring," we may then understand to mean that they were to be in that manner jointed throughout their length, and were to use the first or end ring of the side-plank in common for the topmost bar, thus holding the corner firm in both directions, as seen in the accompanying figure. The topmost rear bar may have been dowelled into the end of the side-bar for further security.

"Corner-board," showing its "One Ring," in common with that of the Side-plank.

(2.) *Position of the Curtains.*—The use of these pieces of drapery will not be materially affected by this change in the width of the structure. We need only raise the peak into an acute instead of a right angle in order to dispose of the roof-canvas. The curtain across the rear gable may be wrapped a little farther along the side at each end, and it will at the same time cover the tops of the rear planks, and close the joint where the ends of the roof-curtains fall short of doing so.

On the supposition of a flat roof stretched directly across the tops of the planks, the dimensions of both sets of curtains may readily be made to correspond with the requirements of the building. The embroidered curtains may either be used around the walls, as previously, or they may be joined together into one large sheet to cover the ceiling and walls on the inside. Their length (twenty-eight cubits) would in the latter case reach to within one cubit of the ground; and their combined breadth (forty cubits) would in like manner cover the end wall (ten cubits + thirty cubits of length of building). The suture, where the two canvases are ordinarily supposed to be joined by the loops, would thus also exactly fall over the "vail," separating the holy from the most holy place.

The same would be true likewise of the goats'-hair curtains if similarly joined and spread over the roof and outside of the tabernacle, reaching to within one sixth cubit of the ground on each side and rear. The only difficul-

ty would be as to the eleventh or extra goats'-hair curtain. If this were attached in the same manner as the other breadths, it would be wholly superfluous, unless used to close the entire front, as it might be if doubled (according to the usual interpretation of Exod. xxvi, 9). But it seems agreed upon by all critics that it must be employed upon the rear of the building (as explicitly stated in ver. 12). Keil understands that it was divided between the back and the front equally; but this answers to neither passage, makes part of the rear *trebly* covered in fact, and brings (by his own confession) the suture one cubit behind the "vail" (contrary to ver. 33). Brown reviews and confutes the explanations of other interpreters (Kalisch, Von Gerlach, and Fergusson), but frankly admits his own inability to solve the problem (p. 43). Paine's interpretation is the only one that meets the case.

This last insuperable difficulty, together with the impossibility of shedding the rain and snow, seems to us a conclusive objection against the flat-roof theory of the building. Brown innocently remarks (p. 47), "Admitting that snow sometimes falls on the mountains of Sinai, it seldom, if ever, falls in the wadies or plains; and if slight showers ever do occur, they must be like angels' visits, few and far between. None of the many authors I have followed across the desert of wandering seem ever to have witnessed snow, and very rarely even rain." This last circumstance is probably owing to the fact that travellers almost invariably avoid the winter or rainy season. The writer of this article was overtaken, with his party, by a snow-storm in March, 1874, which covered the ground in the plains and bottoms of the wadies of Mount Sinai ankle-deep; and every traveller must have observed the unmistakable traces of terrific floods or freshets along the valleys of the whole region. It often rains here in perfect torrents (see Palmer, *Desert of the Exodus*, p. 33, 177). "A single thunder-storm, with a heavy shower of rain, falling on the naked granite mountains, will be sufficient to convert a dry and level valley into a roaring river in a few short hours" (*ibid.* p. 129). It is essential to any reconstruction of the tabernacle that the roof be made water-tight, and this can only be done effectually by the true tent-form, with ridge and peak. See TEXT.

5. *Furniture of the Tabernacle.*—The only piece of furniture within the inner or most holy place was the ark of the covenant; and the furniture of the outer room or holy place consisted of the altar of incense, the table of show-bread, and the "golden candlestick," the position of each of which is given in Exod. xxvi, 34, 35. They are all described in detail under their respective heads in this *Cyclopædia*, but we subjoin the following particulars as supplementary to the article on the last-named piece.

The *candelabrum*, as described in Exod. xxv, 31-37 (of which xxxvii, 17-23 is almost verbatim a copy), differs considerably from that in the account of Josephus (*Ant.* iii, 6, 7), and from the sculptured figure still extant upon the Arch of Titus (Reland, *De Spoliis Templi*, p. 6; in which work other representations, all slightly varying, are given from Rabbinical sources and coins). Hence it is probable that the "candlestick" as constructed for the tabernacle by Moses was not exactly the same in form as in the later models of Solomon's and Herod's temples; it would naturally be simpler and less ornamental in the earliest case, and the Herodian fabrication (if, indeed, this were other than that of the restoration from Babylon), to which all the later Jewish and profane statements apply (Solomon does not appear to have furnished his Temple with any other than the original candelabrum of the tabernacle), would of course depart most widely from the severity of the primitive type.

(1.) In the original object the following elements are clearly defined by the language (as above) employed: There was a main or central stem (יָרֵךְ, *yarék*, thigh,

The Golden Candelabrum of the Tabernacle. (From a restoration by the Editor.)

A. V. "shaft"), doubtless flaring or enlarged at the bottom, for a secure foot. From each side of this went off (apparently opposite each other, and at equal intervals), three arms (קָנִים, *kanim*, reeds, "branches"), having each along their course three almond-shaped calyces (גְּבִיִּים, *gebiim*, cups, "bowls"), one crown (פְּתֹר, *kaph'tôr*, circlet, "knop"), and one blossom (פֶּרַח, *pérach*, "flower"): the middle stem had four such calyces, and at least three crowns, placed each immediately beneath the several junctions of the arms with the main stem; also more than one blossom. Finally, there were seven burners (נֵרִים, *nerim*, lights, "lamps"), evidently one for the extremity of each arm, and one for the top of the central stem. Every part of the candelabrum (including the burners, only so far as applicable to them) was a continuous rounded (hammered or turned) piece of refined gold (מְכֻשָּׁשׁ אֶחָד זָהָב טָהוֹר, "one beaten work of pure gold"). It has usually been assumed that the arms were all in the same plane with the main stem, and their summits all of equal height, and equidistant from each other, as is the case with the representation on the Arch of Titus.

(2.) The following are the principal points that remain uncertain: The relative position of the calyces, crowns, and blossoms on the arms; for although they are always enumerated in this order, there is nothing to show absolutely whether the enumeration begins at the intersection with the shaft or with the extremities. The former view, which is countenanced by the rest of the description (since this proceeds upward from the base), is adopted by Dr. Conant (in the Amer. ed. of Smith's *Dict. of the Bible*, s. v. "Candlestick"); the latter, which is favored by the difficulty (or rather impossibility) of assigning more than one blossom to the summit of the central stem (as the text would then seem to require), is adopted by Prof. Paine (*Solomon's Temple*, etc., p. 10). The signification of the terms is not decisive: for the *kaph'tôr*, or "knop," may quite as well signify a little ornamental ball or globular enlargement in the necks of the arms and in the stem at their points of departure, as a capital or surmounting decoration (the three ranged along the main stem certainly were not such in strictness). The *pérach*, or "flower," is regarded by both the above writers (who thus agree in making these, after all, the extreme points of the chandelier) as the "receptacles" of the lamps themselves; these last being regarded by Paine as denoted by the *gebiim*, or "bowls," having a trinal form in the case of the side arms, and a quaternary in that of the main stem

—a view which leads to great complexity in their construction and in the form of their sockets, and which, moreover, is incongruent with the number (seven only) assigned to the lights. Furthermore, in the comparison of the ornament in question with the shape of almonds, it is not clear whether the *flower* or *fruit* of that tree is referred to; we prefer the latter as being more properly designated by the simple word, and because the former is denoted by a different term in the same connection, the blossom-shaped ornament. It must also be noted that the arms had each three of the first-named ornament, and but one of the other two; whereas the main stem had four of the first, and at least three of the second and two of the third: the three kinds, therefore, did not invariably go together, although they may have done so in the case of the central stem. Perhaps the whole may be best adjusted by assigning such a group or combination of the three kinds to each summit and to each intersection of the arms with the main stem, and merely two others of one kind (the *gebia*, or "bowl") to the side arms, probably at equidistant points; the group itself consisting simply of an ovate cup-like enlargement of the rod constituting the shaft, with a raised band just above the bulb, and the rim opening into petal-like lips, forming a cavity or socket for the lamp. See LAMP.

IV. *Relation of the Tabernacle to the Religious Life of Israel*.—1. Whatever connection may be traced between other parts of the Mosaic ritual and that of the nations with which Israel had been brought into contact, the thought of the tabernacle meets us as entirely new. Spencer (*De Leg. Hebraeor.* iii, 3) labors hard, but not successfully, to prove that the tabernacles of Moloch of Amos v, 26 were the prototypes of the tent of meeting. It has to be remembered, however, (1) that the word used in Amos (*sikkûth*) is never used of the tabernacle, and means something very different; and (2) that the Moloch-worship represented a defection of the people subsequent to the erection of the tabernacle. The "house of God" [see BETHEL] of the patriarchs had been the large "pillar of stone" (Gen. xxviii, 18, 19), bearing record of some high spiritual experience, and tending to lead men upward to it (Bähr, *Symbol.* i, 93), or the grove which, with its dim, doubtful light, attuned the souls of men to a divine awe (Gen. xxi, 33). The temples of Egypt were magnificent and colossal, hewn in the solid rock, or built of huge blocks of stone as unlike as possible to the sacred tent of Israel. The command was one in which we can trace a special fitness. The stately temples belonged to the house of bondage which they were leaving. The sacred places of their fathers were in the land towards which they were journeying. In the meanwhile, they were to be wanderers in the wilderness. To have set up a bethel after the old pattern would have been to make that a resting-place, the object then or afterwards of devout pilgrimage; and the multiplication of such places at the different stages of their march would have led inevitably to polytheism. It would have failed utterly to lead them to the thought which they needed most—of a Divine Presence never absent from them, protecting, ruling, judging. A sacred tent, a moving bethel, was the fit sanctuary for a people still nomadic. It was capable of being united afterwards, as it actually came to be, with "the grove" of the older *cultus* (Josh. xxiv, 26). Analogies of like wants, met in a like way, with no ascertainable historical connection, are to be found among the Gætulians and other tribes of Northern Africa (Sil. Ital. iii, 289), and in the sacred tent of the Carthaginian encampments (Diod. Sic. xx, 65).

2. The structure of the tabernacle was obviously determined by a complex and profound symbolism, but its meaning remains one of the things at which we can but dimly guess. No interpretation is given in the law itself. The explanations of Jewish writers long afterwards are manifestly wide of the mark. That which meets us in the Epistle to the Hebrews, the application

of the *types* of the tabernacle to the mysteries of redemption, was latent till those mysteries were made known. Yet we cannot but believe that, as each portion of the wonderful order rose before the inward eye of the lawgiver, it must have embodied distinctly manifold truths which he apprehended himself and sought to communicate to others. It entered, indeed, into the order of a divine education for Moses and for Israel, and an education by means of symbols, no less than by means of words, presupposes an existing language. So far from shrinking, therefore, as men have timidly and unwisely shrunk (Witsius, *Ægyptiaca*, in Ugolino, *The-saur*, vol. i), from asking what thoughts the Egyptian education of Moses would lead him to connect with the symbols he was now taught to use, we may see in it a legitimate method of inquiry—almost the only method possible. Where that fails, the gap may be filled up (as in Bähr, *Symbol*, passim) from the analogies of other nations, indicating, where they agree, a widespread primeval symbolism. So far from laboring to prove, at the price of ignoring or distorting facts, that everything was till then unknown, we shall as little expect to find it so, as to see in Hebrew a new and heaven-born language, spoken for the first time on Sinai, written for the first time on the two tables of the covenant.

3. The thought of a graduated sanctity, like that of the outer court, the holy place, the holy of holies, had its counterpart, often the same number of stages, in the structure of Egyptian temples (Bähr, *Symbol*, i, 216). See TEMPLE.

(1.) The interior adytum (to proceed from the innermost recess outward) was small in proportion to the rest of the building, and commonly, as in the tabernacle (Josephus, *Ant.* ii, 6, 3), was at the western end (Spencer, *De Leg. Hebræor.* iii, 2), and was but little lighted. In the adytum, often at least, was the sacred ark, the culminating-point of holiness, containing the highest and most mysterious symbols—winged figures, generally like those of the cherubim (Wilkinson, *Anc. Egypt.* v, 275; Kenrick, *Egypt*, i, 460), the emblems of stability and life. Here were outward points of resemblance. Of all elements of Egyptian worship this was one which could be transferred with least hazard, with most gain. No one could think that the ark itself was the likeness of the God he worshipped. When we ask what gave the ark its holiness, we are led on at once to the infinite difference, the great gulf between the two systems. That of Egypt was predominantly *cosmical*, starting from the productive powers of nature. The symbols of those powers, though not originally involving what we know as impurity, tended to it fatally and rapidly (Spencer, *De Leg. Hebræor.* iii, 1; Warburton, *Divine Lega-tion*, ii, 4, note). That of Israel was predominantly *ethical*. The nation was taught to think of God, not chiefly as revealed in nature, but as manifesting himself in and to the spirits of men. In the ark of the covenant, as the highest revelation then possible of the Divine nature, were the two tables of stone, on which were graven, by the teaching of the Divine Spirit, and therefore by “the finger of God” (Matt. xii, 28; Luke xi, 20; see also Clement of Alexandria [*Strom.* vi, 133] and 1 Kings xviii, 46; 2 Kings iii, 15; Ezek. i, 3; iii, 14; 1 Chron. xxviii, 19), the great unchanging laws of human duty which had been proclaimed on Sinai. Here the lesson taught was plain enough. The highest knowledge was as the simplest, the esoteric as the exoteric. In the depths of the holy of holies, and for the high-priest as for all Israel, there was the revelation of a righteous Will requiring righteousness in man (Saalschütz, *Archäol.* c. 77). See ARK.

Over the ark was the *kophêreth* (“mercy-seat”), so called with a twofold reference to the root-meaning of the word. It covered the ark. It was the witness of a mercy covering sins. As the “footstool” of God, the “throne” of the Divine glory, it declared that over the law which seemed so rigid and unbending there rested the compassion of one forgiving “iniquity and trans-

gression.” Ewald, however, giving to כִּפָּר, the root of *kophêreth*, the meaning of “to scrape,” “erase,” derives from that meaning the idea implied in the Sept. ἱλαστήριον, and denies that the word ever signified ἐπίθεμα (*Alterth.* p. 128, 129). See MERCY-SEAT.

Over the mercy-seat were the cherubim, reproducing, in part, at least, the symbolism of the great Hamitic races, forms familiar to Moses and to Israel, needing no description for them, interpreted for us by the fuller vision of the later prophets (Ezek. i, 5–13; x, 8–15; xli, 19), or by the winged forms of the imagery of Egypt. Representing as they did the manifold powers of nature, created life in its highest form (Bähr, *De Leg. Hebræor.* i, 341), their “overshadowing wings,” “meeting” as in token of perfect harmony, declared that nature as well as man found its highest glory in subjection to a divine law, that men might take refuge in that order, as under “the shadow of the wings” of God (Stanley, *Jewish Church*, p. 98). Placed where those and other like figures were, in the temples of Egypt, they might be hindrances and not helps, might sensualize instead of purifying the worship of the people. But it was part of the wisdom which we may reverently trace in the order of the tabernacle that while Egyptian symbols are retained, as in the ark, the cherubim, the urim, and the thummim, their place is changed. They remind the high-priest, the representative of the whole nation, of the truths on which the order rests. The people cannot bow down and worship that which they never see. See CHERUBIM.

The material, not less than the forms, in the holy of holies was significant. The acacia or shittim-wood, least liable of woods then accessible to decay, might well represent the imperishableness of divine truth, of the laws of duty (Bähr, *Symbol*, i, 286). Ark, mercy-seat, cherubim, the very walls, were all overlaid with gold, the noblest of all metals, the symbol of light and purity—sunlight itself, as it were, fixed and embodied, the token of the incorruptible, of the glory of a great king (*ibid.* i, 282). It was not without meaning that all this lavish expenditure of what was most costly was placed where none might gaze on it. The gold thus offered taught man that the noblest acts of beneficence and sacrifice are not those which are done that they may be seen of men, but those which are known only to him who “seeth in secret” (Matt. vi, 4).

Dimensions also had their meaning. Difficult as it may be to feel sure that we have the key to the enigma, there can be but little doubt that the older religious systems of the world did attach a mysterious significance to each separate number; that the training of Moses, as afterwards the far less complete initiation of Pythagoras in the symbolism of Egypt, must have made that transparently clear to him, which to us is almost impenetrably dark. A full discussion of the subject is obviously impossible here, but it may be useful to exhibit briefly the chief thoughts which have been connected with the numbers that are most prominent in the language of symbolism. Arbitrary as some of them may seem, a sufficient induction to establish each will be found in Bähr’s elaborate dissertation (*Symbol*, i, 128–255) and other works (comp. Wilkinson, *Anc. Egypt.* iv, 190–199; Leyrer, in Herzog’s *Real-Encyklop.* s. v. “Stiftshütte”).

- ONE—The Godhead, eternity, life, creative force, the sun, man.
- TWO—Matter, time, death, receptive capacity, the moon, woman.
- THREE (as a number or in the triangle)—The universe in connection with God, the absolute in itself, the unconditioned, God.
- FOUR (the number, or in the square or cube)—Conditioned existence, the world as created, divine order, revelation.
- SEVEN (as = 3 + 4)—The union of the world and God, rest (as in the Sabbath), peace, blessing, purification.
- TEN (as = 1 + 2 + 3 + 4)—Completeness, moral and physical; perfection.
- FIVE—Perfection half attained, incompleteness.
- TWELVE—The signs of the zodiac, the cycle of the seasons; in Israel the ideal number of the people, of the covenant of God with them.

To those who think over the words of two great teachers, one heathen (Plutarch, *De Is. et Os.* p. 411) and one Christian (Clem. Al. *Strom.* vi, 84-87), who had at least studied as far as they could the mysteries of the religion of Egypt, and had inherited part of the old system, the precision of the numbers in the plan of the tabernacle will no longer seem unaccountable. If, in a cosmical system, a right-angled triangle, with the sides three, four, five, represented the triad of Osiris, Isis, Orus, creative force, receptive matter, the universe of creation (Plutarch, *loc. cit.*), the perfect cube of the holy of holies, the constant recurrence of the numbers 4 and 10, may well be accepted as symbolizing order, stability, perfection (Bähr, *Symbol* i, 225). The symbol reappears in the most startling form in the closing visions of the Apocalypse. There the heavenly Jerusalem is described, in words which absolutely exclude the literalism that has sometimes been blindly applied to it, as a city four-square—12,000 furlongs in length and breadth and height (Rev. xxi, 16). See NUMBER.

Into the inner sanctuary neither people nor the priests as a body ever entered. Strange as it may seem, that in which everything represented light and life was left in darkness and solitude. Once only in the year, on the day of atonement, might the high-priest enter. The strange contrast has, however, its parallel in the spiritual life. Death and life, light and darkness, are wonderfully united. Only through death can we truly live. Only by passing into the "thick darkness" where God is (Exod. xx, 21; 1 Kings viii, 12) can we enter at all into the "light inaccessible" in which he dwells everlastingly. The solemn annual entrance, like the withdrawal of symbolic forms from the gaze of the people, was itself part of a wise and divine order. Intercourse with Egypt had shown how easily the symbols of truth might become common and familiar things, yet without symbols the truths themselves might be forgotten. Both dangers were met. To enter once, and once only in the year, into the awful darkness—to stand before the law of duty, before the presence of the God who gave it, not in the stately robes that became the representative of God to man, but as representing man in his humiliation in the garb of the lower priests, barefooted and in the linen ephod—to confess his own sins and the sins of the people—this was what connected the atonement-day (*kippûr*) with the mercy-seat (*kophê-reth*). To come there with blood, the symbol of life, touching with that blood the mercy-seat—with incense, the symbol of adoration (Lev. xvi, 12-14), what did that express but the truth (1) that man must draw near to the righteous God with no lower offering than the pure worship of the heart, with the living sacrifice of body, soul, and spirit; (2) that could such a perfect sacrifice be found, it would have a mysterious power working beyond itself, in proportion to its perfection, to cover the multitude of sins?

From all others, from the high-priest at all other times, the holy of holies was shrouded by the heavy vail, bright with many colors and strange forms, even as curtains of golden tissue were to be seen hanging before the adytum of an Egyptian temple, a strange contrast often to the bestial form behind them (Clem. Al. *Pæd.* iii, 4). In one memorable instance, indeed, the vail was the witness of higher and deeper thoughts. On the shrine of Isis at Sais, there were to be read words which, though pointing to a pantheistic rather than an ethical religion, were yet wonderful in their loftiness, "I am all that has been (*πάν τὸ γεγόνος*), and is, and shall be, and my vail no mortal hath withdrawn" (*ἀπεκάλυψεν*) (Plutarch, *De Is. et Osir.* p. 394). Like, and yet more unlike, the truth, we feel that no such words could have appeared on the vail of the tabernacle. In that identification of the world and God all idolatry was latent, as, in the faith of Israel, in the *I am* all idolatry was excluded. In that despair of any withdrawal of the vail, of any revelation of the Divine will, there were latent all the arts of an unbelieving priestcraft, substi-

tuting symbols, pomp, ritual, for such a revelation. But what, then, was the meaning of the vail which met the gaze of the priests as they did service in the sanctuary? Colors, in the art of Egypt, were not less significant than number, and the four bright colors, probably, after the fashion of that art, in parallel bands—blue, symbol of heaven, and purple of kingly glory, and crimson of life and joy, and white of light and purity (Bähr, *Symbol* i, 305-330)—formed in their combination no remote similitude of the rainbow, which of old had been a symbol of the Divine covenant with man, the pledge of peace and hope, the sign of the Divine Presence (Ezek. i, 28; Ewald, *Alterth.* p. 333). See COLOR. Within the vail, light and truth were seen in their unity. The vail itself represented the infinite variety, the *πολυποίκιλος σοφία* of the divine order in creation (Eph. iii, 10). There, again, were seen copied upon the vail the mysterious forms of the cherubim; how many, or in what attitude, or of what size, or in what material, we are not told. The words "cunning work" in Exod. xxxvi, 35, applied elsewhere to combinations of embroidery and metal (xxviii, 15; xxxi, 4), seem to justify the conjecture that here also they were of gold. In the absence of any other evidence, it would have been perhaps natural to think that they reproduced on a larger scale the number and the position of those that were over the mercy-seat. The visions of Ezekiel, however, reproducing, as they obviously do, the forms with which his priestly life had made him familiar, indicate not less than four (ch. i and x), and those not all alike, having severally the faces of a man, a lion, an ox, and an eagle—strange symbolic words, which elsewhere we should have identified with idolatry, but which here were bearing witness against it, emblems of the manifold variety of creation as at once manifesting and concealing God.

(2.) The outer sanctuary was one degree less awful in its holiness than the inner. Silver, the type of human purity, took the place of gold, the type of the Divine glory (Bähr, *Symbol* i, 284). It was to be trodden daily by the priests as by men who lived in the perpetual consciousness of the nearness of God, of the mystery behind the vail. Barefooted and in garments of white linen, like the priests of Isis [see PRIEST], they accomplished their ministrations. Here, too, there were other emblems of divine realities. It was specially illumined by the golden lamp with its seven lights, never all extinguished together, the perpetual symbol of all derived gifts of wisdom and holiness in man, reaching their mystical perfection when they shine in God's sanctuary to his glory (Exod. xxv, 31; xxvii, 20; Zech. iv, 1-14). The shew-bread (the "bread of faces") of the Divine Presence, not unlike in outward form to the sacred cakes which the Egyptians placed before the shrines of their gods, served as a token that, though there was no form or likeness of the Godhead, he was yet there, accepting all offerings, recognising in particular that special offering which represented the life of the nation at once in the distinctness of its tribes and in its unity as a people (Ewald, *Alterth.* p. 120). The meaning of the altar of incense was not less obvious. The cloud of fragrant smoke was the natural, almost the universal, emblem of the heart's adoration (Psa. cxli, 2). The incense sprinkled on the shew-bread and the lamp taught men that all other offerings needed the intermingling of that adoration. Upon that altar no "strange fire" was to be kindled. When fresh fire was needed it was to be taken from the altar of burnt-offering in the outer court (Lev. ix, 24; x, 1). Very striking, as compared with what is to follow, are the sublimity and the purity of these symbols. It is as if the priestly order, already leading a consecrated life, were capable of understanding a higher language which had to be translated into a lower for those that were still without (Saalschütz, *Archæol.* § 77).

(3.) Outside the tent, but still within the consecrated precincts, was the court, fenced in by an enclosure, yet

open to all the congregation as well as to the Levites, those only excepted who were ceremonially unclean. No Gentile might pass beyond the curtains of the entrance, but every member of the priestly nation might thus far "draw near" to the presence of Jehovah. Here, therefore, stood the altar of burnt-offerings, at which sacrifices in all their varieties were offered by penitent or thankful worshippers (Exod. xxvii, 1-8; xxxviii, 1), the brazen laver at which those worshippers purified themselves before they sacrificed, the priests before they entered into the sanctuary (xxx, 17-21). Here the graduated scale of holiness ended. What Israel was to the world, fenced in and set apart, that the court of the tabernacle was to the surrounding wilderness, just as the distinction between it and the sanctuary answered to that between the sons of Aaron and other Israelites; just as the idea of holiness culminated personally in the high-priest, locally in the holy of holies.

V. *Theories of Later Times.*—1. It is not probable that the elaborate symbolism of such a structure was understood by the rude and sensual multitude that came out of Egypt. In its fulness, perhaps, no mind but that of the lawgiver himself ever entered into it, and even for him, one half, and that the highest, of its meaning must have been altogether latent. Yet it was not the less, was perhaps the more fitted, on that account, to be an instrument for the education of the people. To the most ignorant and debased it was at least a witness of the nearness of the Divine King. It met the craving of the human heart, which prompts to worship, with an order that was neither idolatrous nor impure. It taught men that their fleshly nature was the hinderance to worship; that it rendered them unclean; that only by subduing it, killing it, as they killed the bullock and the goat, could they offer up an acceptable sacrifice; that such a sacrifice was the condition of forgiveness, a higher sacrifice than any they could offer as the ground of that forgiveness. The sins of the past were considered as belonging to the fleshly nature which was slain and offered, not to the true inner self of the worshipper. More thoughtful minds were led inevitably to higher truths. They were not slow to see in the tabernacle the parable of God's presence manifested in creation. Darkness was as his pavilion (2 Sam. xxii, 12). He has made a tabernacle for the sun (Psa. xix, 4). The heavens were spread out like its curtains. The beams of his chambers were in the mighty waters (civ, 2, 3; Isa. xl, 22; Lowth, *De Sac. Poes.* viii). The majesty of God seen in the storm and tempest was as of one who rides upon a cherub (2 Sam. xxii, 11). If the words "He that dwelleth between the cherubim" spoke on the one side of a special, localized manifestation of the Divine Presence, they spoke also on the other of that Presence as in the heaven of heavens, in the light of setting suns, in the blackness and the flashes of the thunder-clouds.

2. The thought thus uttered, essentially poetical in its nature, had its fit place in the psalms and hymns of Israel. It lost its beauty, it led men on a false track, when it was formalized into a system. At a time when Judaism and Greek philosophy were alike effete, when a feeble physical science which could read nothing but its own thoughts in the symbols of an older and deeper system was after its own fashion rationalizing the mythology of heathenism, there were found Jewish writers willing to apply the same principle of interpretation to the tabernacle and its order. In that way, it seemed to them, they would secure the respect even of the men of letters who could not bring themselves to be prose-lytes. The result appears in Josephus and in Philo, in part also in Clement of Alexandria and Origen. Thus interpreted, the entire significance of the two tables of the covenant and their place within the ark disappeared, and the truths which the whole order represented became *cosmical* instead of *ethical*. If the special idiosyncrasy of one writer (Philo, *De Profug.*) led

him to see in the holy of holies and the sanctuary that which answered to the Platonic distinction between the visible (*αἰσθητά*) and the spiritual (*νοητά*), the coarser, less intelligent Josephus goes still more completely into the new system. The holy of holies is the visible firmament in which God dwells, the sanctuary is the earth and sea which men inhabit (*Ant.* iii, 6, 4, 7; 7, 7). The twelve loaves of the shew-bread represented the twelve months of the year, the twelve signs of the zodiac. The seven lamps were the seven planets. The four colors of the veil were the four elements (*στοιχεῖα*), air, fire, water, earth. Even the wings of the cherubim were, in the eyes of some, the two hemispheres of the universe, or the constellations of the greater and the lesser bears (Clem. Alex. *Strom.* v, 35). The table of shew-bread and the altar of incense stood on the north, because north winds were most fruitful; the lamp on the south, because the motions of the planets were southward (*ibid.* § 34, 35). We need not follow such a system of interpretation further. It was not unnatural that the authority with which it started should secure for it considerable respect. We find it reappearing in some Christian writers—Chrysostom (*Hom. in Joann. Bapt.*) and Theodoret (*Quaest. in Ezod.*); in some Jewish—Ben-Uzziel, Kimchi, Abarbanel (Bähr, *Symbol.* i, 103 sq.). It was well for Christian thought that the Church had in the Epistle to the Hebrews and the Apocalypse of St. John that which helped to save it from the pedantic puerilities of this physico-theology. It is curious to note how in Clement of Alexandria the two systems of interpretation cross each other, leading sometimes to extravagances like those in the text, sometimes to thoughts at once lofty and true. Some of these have already been noticed. Others, not to be passed over, are that the seven lamps set forth the varied degrees and forms (*πολυμερῶς καὶ πολυτρόπως*) of God's revelation, the form and the attitude of the cherubim, the union of active ministry and grateful, ceaseless contemplation (*Strom.* v, 36, 37).

3. It will have been clear from all that has been said that the Epistle to the Hebrews has not been looked on as designed to limit our inquiry into the meaning of the symbolism of the tabernacle, and that there is consequently no ground for adopting the system of interpreters who can see in it nothing but an aggregate of types of Christian mysteries. Such a system has, in fact, to choose between two alternatives. Either the meaning was made clear, at least to the devout worshippers of old, and then it is no longer true that the mystery was hid "from ages and generations," or else the mystery was concealed, and then the whole order was voiceless and unmeaning as long as it lasted, then only beginning to be instructive when it was "ready to vanish away." Rightly viewed, there is, it is believed, no antagonism between the interpretation which starts from the idea of *symbols* of great eternal truths, and that which rests on the idea of *types* foreshadowing Christ and his Work and his Church. If the latter were the highest manifestation of the former (and this is the keynote of the Epistle to the Hebrews), then the two systems run parallel with each other. The type may help us to understand the symbol. The symbol may guard us against misinterpreting the type. That the same things were at once symbols and types may take its place among the proofs of an insight and a foresight more than human. Not the veil of nature only, but the veil of the flesh, the humanity of Christ, at once conceals and manifests the Eternal's glory. The rending of that veil enabled all who had eyes to see and hearts to believe to enter into the holy of holies, into the Divine Presence, and to see, not less clearly than the high-priest, as he looked on the ark and the mercy-seat, that righteousness and love, truth and mercy, were as one. Blood had been shed, a life had been offered which, through the infinite power of its love, was able to atone, to satisfy, to purify.

The allusions to the tabernacle in the Apocalypse

are, as might be expected, full of interest. As in a vision, which loses sight of all time limits, the temple of the tabernacle is seen in heaven (Rev. xv, 5), and yet in the heavenly Jerusalem there is no temple seen (xxi, 22). In the heavenly temple there is no longer any veil; it is open, and the ark of the covenant is clearly seen (xi, 19).

4. We cannot here follow out that strain of a higher mood, and it would not be profitable to enter into the speculations which later writers have engrafted on the first great thought. Those who wish to enter upon that line of inquiry may find materials enough in any of the greater commentaries on the Epistle to the Hebrews (Owen's, Stuart's, Bleek's, Tholuck's, Delitzsch's, Alford's), or in special treatises, such as those of Van Till (*De Tabernac.* in Ugolino, *Thesaurus*, viii), Bede (*Expositio Mystica et Moralis Mosatici Tabernaculi*), Witsius (*De Tabern. Levit. Mysteriorum*, in the *Miscell. Sacr.*). Strange outlying hallucinations, like those of ancient rabbins, inferring from "the pattern showed to Moses in the Mount" the permanent existence of a heavenly tabernacle, like in form, structure, proportions to that which stood in the wilderness (Leyrer, *loc. cit.*), or of later writers who have seen in it (not in the spiritual, but the anatomical sense of the word) a type of humanity, representing the outer bodily framework, the inner vital organs (Friederich, *Symb. der Mos. Stifstshütte*, in Leyrer, *loc. cit.*, and Ewald, *Allerth.* p. 338), may be dismissed with a single glance. The Judaic and patristic opinion in the main, though not in the details, was advocated by Bähr in his *Symbolik* (1837), in which he considered the tabernacle a symbol of the universe, the court representing earth, and the tabernacle, strictly so named, heaven, though not in a material sense, but as the place and instruments of God's revelation of himself. In his work on the temple, ten years later, Bähr retracted much of his former theory, and advocated the opinion that the tabernacle symbolized the idea of the dwelling of God in the midst of Israel. Another view, which seems an exaggeration into unwarrantable detail of the true idea that each Christian is a temple of God, proceeds to adapt to the elements of human nature the divisions and materials of the tabernacle. Thus the court is the body, the holy place the soul, the holiest the spirit—true dwelling-place of God. This might do very well as a general illustration, and was so used by Luther; but the idea has been fully developed and defended against the attack of Bähr by Friederich in his *Symb. der Mos. Stifstshütte* (Leips. 1841).

5. Nevertheless, as the central point of a great symbolical and typical institute, the tabernacle necessarily possessed, both as a whole and in its contents, a symbolical and typical significance, which has been recognised by all orthodox interpreters. On this head, as we see above, much fanciful and unregulated ingenuity has been indulged; but this must not induce us to neglect those conclusions to which a just application of the principles of typological interpretation conduces.

(1.) Under the Old-Test. economy, the primary idea of the tabernacle was that of a dwelling for Jehovah in the midst of his people, and this was prominently kept in view in all the arrangements concerning the construction and location of the structure. "Let them," said God to Moses, "make me a sanctuary that I may dwell among them" (Exod. xxv, 8; xxix, 45); when the structure was completed it was set up in the midst of the congregation, and there it always remained, whether the people rested or were on their march (Numb. ii); on it rested the cloud which indicated the Divine Presence, and which by its quiescence or removal indicated the will of the Great Sovereign of Israel as to the resting or the removing of the camp (Exod. xl, 36-38); and to it the people repaired when they had sacrifice to offer to God, or counsel to ask of him (Lev. i, 3; Numb. xxvii, 2; Deut. xxxi, 14, etc.). As Judaism was strictly monotheistic, it knew but one

sacred place where Jehovah was to be found. The holy of holies, which the apostle calls "the second tabernacle" (Heb. ix, 7), was the appropriate residence of Jehovah as the God of Israel. In this the principal thing was the ark, in which was placed "the testimony" (עֲדוּתָא), and which was covered by "the mercy-seat" (כִּפֹּרֶת). The testimony was the book of the law, and it was put into the ark as a witness against the people because of their sinfulness (Deut. xxxi, 26, 27). This symbolized the great truth that the first relation into which Jehovah comes with the sinner is that of a ruler whose law testifies against the transgressor. But this testimony was *hid* by the mercy-seat, on which the blood of atonement was sprinkled by the high-priest when he entered within the veil, and on which the visible emblem of Jehovah's presence—the shechinah between the cherubim of glory—was enthroned; and in this there was an emblem of the fact that the condemning and accusing power of the law was taken away by the propitiatory covering which God had appointed. By all this was indicated the grand truth that the character in which Jehovah dwelt among his people was that of a justly offended but merciful and propitiated sovereign, who, having received atonement for their sins, had put these out of his sight, and would remember them no more at all against them (comp. Philo, *De Vit. Mosiac.* bk. iii).

In the first, or outer tabernacle, were the altar of incense, the table with the shew-bread, and the golden candlestick. The first was symbolical of the necessity and the acceptableness of prayer, of which the smoke of sweet incense that was to ascend from it morning and evening appears to be the appointed Biblical symbol (comp. Psa. cxli, 2; Luke i, 10; Rev. v, 8; viii, 3, 4). The second was emblematical of the necessity of good works to accompany our devotions, the bread being the offering of the children of Israel to their Divine King (Lev. xxiv, 8), and consecrated to him by the offering of incense along with it as emblematical of prayer. The third was the symbol of the Church, or people of God, the gold of which it was formed denoting the excellence of the Church, the seven lamps its completeness, and the oil by which they were fed being the appropriate symbol of the Divine Spirit dwelling in his people and causing them to shine (comp. Zech. iv, 2, 3; Matt. v, 14, 16; Rev. i, 12, 20).

In the fore-court of the tabernacle stood the altar of burnt-offering, on which were offered the sacrifices of the people, and the laver, in which the priests cleansed their hands and feet before entering the holy place. The symbolical significance of these is too well known to need illustration. See OFFERING; PURIFICATION.

(2.) Under the new dispensation, if we view the tabernacle as a general symbol of Jehovah's dwelling in the midst of his people, then that to which it answers can be no other than the human nature of our Lord. He was "God manifest in the flesh," "Immanuel," God with us, and in him "dwelleth all the fulness of the Godhead bodily" (1 Tim. iii, 16; Matt. i, 23; Col. ii, 9). Hence John (i, 14), in speaking of his incarnation, says, "The Word became flesh and tabernacled (ἐσκήνωσε) among us," where the language evidently points to the ancient tabernacle as the symbolical residence of Jehovah; and in the book of Revelation (xxi, 5) the same apostle, in announcing the final presence of Christ in his glorified humanity with his Church, uses the expression, "The tabernacle of God is with men." From these statements of the New Test. we may hold ourselves justified in concluding that the ancient tabernacle, viewed in its general aspect as the dwelling of Jehovah, found its antitype in the human nature of Christ, in whom God really dwelt. Viewed more particularly in its two great divisions, the tabernacle symbolized in its inner department the reign of Jehovah in his own majesty and glory, and in its outer department the service of God by propitiation and prayer. In keeping

with this, the writer of the Epistle to the Hebrews teaches (as above seen) us to regard the outer part of the tabernacle as more strictly typical of the person of Jesus Christ, and the inner of heaven, into which he has now entered. Thus he speaks of him (viii, 2) as now, in the heavenly state, "a minister of the true [i. e. *real*, ἀληθινή, as distinguished from *symbolical*] tabernacle which the Lord pitched, and not man," where the allusion seems to be partly to the fact that Christ is in heaven, and partly to the fact that he ministers there in human nature. Still more explicit is the language used in ix, 11, where the writer, after speaking of the sacerdotal services of the ancient economy as merely figurative and outward, adds, "But Christ having appeared as high-priest of the good things to come, by means of the greater and more perfect tabernacle not made with hands (that is, not of this creation), nor by means of blood of goats and calves, but by means of his own blood, entered once (for all) into the holy place, having obtained eternal redemption for us." In interpreting this passage, we would follow those who take the whole as far as the words "his own blood" as the subject of the sentence, and consequently join the clauses depending from *διὰ* with *παράγονόμενος*, and not with *εἰσέλθων*; for it seems to be more natural to suppose that the writer should say that it was by means of a more perfect tabernacle and a holier sacrifice that Christ became the high-priest of spiritual blessings than that it was by these means that he entered into the holy place. The objection to this construction which dean Alford urges, that "in that case *οὐδέ* would be left without any preceding member of the negation to follow," is of no weight, for it burdens the construction he adopts as much as that he rejects, and is to be obviated in either case by resolving *οὐδέ* into *καὶ οὐ* (see Meyer's note on ver. 12). Assuming this to be the proper construction of the passage, it seems clearly to represent the human nature of our Lord—that in which he made his soul an offering for sin—as the antitype of the ancient tabernacle in which the high-priest offered sacrifice, while the heavenly world into which he had entered as a high-priest was typified by the holy place into which the Jewish high-priest entered to appear in the symbolical presence of Jehovah. For further confirmation of this may be adduced Heb. x, 20, where the writer, speaking of the privilege enjoyed by believers under the new dispensation of approaching God through Christ, says we can do it "by a new and living way which he hath inaugurated (*ἐνεκαίνισεν*) for us through the vail (that is, his own flesh)." The allusion here is undoubtedly to the ancient tabernacle service, and the truth set forth is that as the high-priest of old went with sacrificial blood through the vail into the holy of holies, so we, as made priests unto God by Jesus Christ, may approach the immediate presence of Jehovah through that path which the Saviour has inaugurated for us by his death in human nature—that path by which he himself has preceded us as our great intercessor, and which is ever fresh and living for us. There may be some rhetorical confusion in this passage, but the general idea seems plainly this, that the body of Christ, slain for us, affords us a passage, by means of sacrifice, into the presence of God, just as the first tabernacle with its services afforded an entrance to the high-priest of old into the holy of holies (see Hofmann, *Schriftbeweis*, II, i, 405 sq.; *Weissag. u. Erfüllung*, ii, 189 sq.).

For the symbolism, in a New-Test. sense, of the various parts and uses of the tabernacle, such as the altar (*θυσιαστήριον*, Heb. xiii, 10), the vail (*καταπέτασμα*, x, 20), the mercy-seat (*ἱλαστήριον*, Rom. iii, 25), etc., see each word in its place.

6. It is proper in this connection to refer to a speculative hypothesis which, though in itself unsubstantial enough, has been revived under circumstances that have given it prominence. It has been maintained by Von Bohlen and Vatke (Bähr, i, 117, 273) that the commands and the descriptions relating to the tabernacle in the

books of Moses are altogether unhistorical, the result of the effort of some late compiler to ennoble the cradle of his people's history by transferring to a remote antiquity what he found actually existing in the Temple, modified only so far as was necessary to fit it into the theory of a migration and a wandering. The structure did not belong to the time of the Exodus, if indeed there ever was an Exodus. The tabernacle thus becomes the mythical aftergrowth of the Temple, not the Temple the historical sequel to the tabernacle. It has lately been urged as tending to the same conclusion that the circumstances connected with the tabernacle in the Pentateuch are manifestly unhistorical. The whole congregation of Israel are said to meet in a court which could not have contained more than a few hundred men (Colenso, *Pentateuch and Book of Joshua*, pt. i, ch. iv, v). The number of priests was utterly inadequate for the services of the tabernacle (*ibid.* ch. xx). The narrative of the head-money collection, of the gifts of the people, is full of anachronisms (*ibid.* ch. xiv).

Some of these objections—those, e. g., as to the number of the first-born, and the disproportionate smallness of the priesthood, have been met by anticipation in remarks under PRIEST and LEVITE. Others bearing upon the general veracity of the Pentateuch history it is impossible to discuss here. See PENTATEUCH. It will be sufficient to notice such as bear immediately upon the subject of this article. (1.) It may be said that this theory, like other similar theories as to the history of Christianity, adds to instead of diminishing difficulties and anomalies. It may be possible to make out plausibly that what purports to be the first period of an institution is, with all its documents, the creation of the second; but the question then comes, How are we to explain the existence of the second? The world rests upon an elephant, and the elephant on a tortoise, but the footing of the tortoise is at least somewhat insecure. (2.) Whatever may be the weight of the argument drawn from the alleged presence of the whole congregation at the door of the tabernacle tells with equal force against the historical existence of the Temple and the narrative of its dedication. There also, when the population numbered some seven or eight millions (2 Sam. xxiv, 9), "all the men of Israel" (1 Kings viii, 2), "all the congregation" (ver. 5), "all the children of Israel" (ver. 63) were assembled, and the king "blessed" all the congregation (ver. 14, 55). (3.) There are, it is believed, undesigned touches indicating the nomadic life of the wilderness. The wood employed for the tabernacle is not the sycamore of the valleys nor the cedar of Lebanon, as afterwards in the Temple, but the shittim of the Sinaitic peninsula. See SHITTIM-TREE; SHITTIM. The abundance of fine linen points to Egypt, the seal or dolphin skins ("badgers" in the A. V., but see Gesenius, s. v. שִׁטְמָה) to the shores of the Red Sea. See BADGER. The Levites are not to enter on their office till the age of thirty, as needing for their work as bearers a man's full strength (Numb. iv, 23, 30). Afterwards, when their duties are chiefly those of singers and gatekeepers, they were to begin at twenty (1 Chron. xxiii, 24). Would a later history, again, have excluded the priestly tribe from all share in the structure of the tabernacle, and left it in the hands of mythical persons belonging to Judah, and to a tribe then so little prominent as that of Dan? (4.) There remains the strong Egyptian stamp impressed upon well-nigh every part of the tabernacle and its ritual, and implied in other incidents. See BRAZEN SERPENT; LEVITE; PRIEST; URIM AND THUMMIM. Whatever bearing this may have on our views of the things themselves, it points, beyond all doubt, to a time when the two nations had been brought into close contact, when not jewels of silver and gold only, but treasures of wisdom, art, knowledge, were "borrowed" by one people from the other. To what other period in the history before Samuel than that of the Exodus of the Pentateuch can we refer that intercourse?

When was it likely that a wild tribe, with difficulty keeping its ground against neighboring nations, would have adopted such a complicated ritual from a system so alien to its own? The facts which, when urged by Spencer, with or without a hostile purpose, were denounced as daring and dangerous and unsettling, are now seen to be witnesses to the antiquity of the religion of Israel, and so to the substantial truth of the Mosaic history. They are used as such by theologians who in various degrees enter their protest against the more destructive criticism of our own time (Hengstenberg, *Egypt and the Books of Moses*; Stanley, *Jewish Church*, lect. iv). (5.) We may, for a moment, put an imaginary case. Let us suppose that the records of the Old Test. had given us in 1 and 2 Sam. a history like that which men now seek to substitute for what is actually given, had represented Samuel as the first great preacher of the worship of Elohim, Gad, or some later prophet, as introducing for the first time the name and worship of Jehovah, and that the Old Test. began with this (Colenso, pt. ii, ch. xxi). Let us then suppose that some old papyrus, freshly discovered, slowly deciphered, gave us the whole or the greater part of what we now find in Exodus and Numbers, that there was thus given an explanation both of the actual condition of the people and of the Egyptian element so largely intermingled with their ritual. Can we not imagine with what jubilant zeal the books of Samuel would then have been "critically examined," what inconsistencies would have been detected in them, how eager men would have been to prove that Samuel had had credit given him for a work which was not his; that not he, but Moses, was the founder of the polity and creed of Israel; that the tabernacle on Zion, instead of coming fresh from David's creative mind, had been preceded by the humbler tabernacle in the wilderness?

The objection raised against the truthfulness of the narrative (Colenso, *ibid.* ch. vii) on the ground that the entire congregation of 600,000 is said to have been convened at the door of this small structure (Lev. viii) is readily obviated by the natural interpretation that only the principal persons stood immediately near, while the multitude easily viewed the ceremonies from a convenient distance (Birke, *The Exodus of Israel*, p. 111).

Krit.* 1844, ii, 305 sq.; Riggenbach, *Die mos. Stiftshütte* (Basel, 1862, 1867); Soltan, *Vessels of the Tabernacle* (Lond. 1865); Paine, *The Tabernacle, Temple, etc.* (Bost. 1861); Kitto, *The Tabernacle and its Furniture* (Lond. 1849); Simpson, *Typ. Character of the Tabernacle* (Edinb. 1852); Brown, *The Tabernacle, etc.* (*ibid.* 1871, 1872, 8vo).

TABERNACLE is a name given to certain chapels or meeting-houses in England erected by Mr. Whitefield, and to similar places of worship reared by Robert Haldane for the accommodation of a few large congregations in Scotland, out of which have chiefly been

Stone Tabernacle at Kintore, Aberdeenshire.

formed the present churches of Congregational dissenters in that country.

*Tabernacle* is also a term applied to certain interior portions of churches, etc.: 1. A niche or hovel for an image. 2. An ambry on the right side of the altar, or behind it, for the reservation of the host, chrisam, and oil for the sick. 3. A throne carried like a litter on the shoulders of Spanish priests in the procession of *Corpus Christi*, and supporting the host. 4. A small temple over the central part of an altar for the reservation of the eucharist, contained in the pyx, and often decorated with a crown of three circlets. Its earliest form was a coffer of wood, or a little arched receptacle; then it became a tower of gold, or of circular shape, being a casket for the chalice and paten, in fact a *ciborium*. In the 15th century the tabernacle became a magnificent piece of furniture over or on the left side of the high-altar, with statues, towers, foliage, buttresses, and superb work, as at Grenoble, St. John Maurienne, Leau, Tournay, and Nuremberg, the latter sixty-four feet high, and of white stone. See CIBORIUM; DOVE; PYX.

**Tabernacles, THE FEAST OF**, the third of the three great annual festivals, the other two being the feasts of the Passover and Pentecost, on which the whole male population were required to appear before the Lord in the national sanctuary. It was a celebration of the in-gathering of all the fruits of the year, and in general import as well as time corresponded to the modern *Thanksgiving* season. See FESTIVAL.

I. *Names and their Signification*.—This festival is called—1. חַג הַסֻּכּוֹת, *Chag has-Sukkoth*; Sept. ἐορτὴ σκηνῶν, *the Festival of Tents*; Vulg. *feria tabernaculorum*; A. V. *the Feast of Tabernacles* (2 Chron. viii, 13; Ezra iii, 4; Zech. xiv, 16, 18, 19); σκηνοπηγία (John vii, 2; Josephus, *Ant.* viii, 4, 5); σκηνῶν (Philo, *De Sept.* § 24); ἡ σκηνή (Plutarch, *Sympos.* iv, 6, 2); because every Israelite was commanded to live in tabernacles during its continuance (comp. Lev. xxiii, 43).

2. חַג הָאֶסְפִּיף, *éspîf* *συμπλεΐας*, the *Feast of Ingathering* (Exod. xxiii, 16; xxxiv, 22), because it was celebrated at the end of the agricultural year, when the ingathering of the fruits and the harvest was completed. 3. It is *kar' éxôpîn* denominated חַג הַיְּהוָה, *the Festival of Jehovah* (Lev. xxiii, 39), or simply חַג, *the Festival* (1 Kings viii, 2; 2 Chron. v, 3; vii, 8, 9; Mishna, *Shekalim*, iii, 1; *Sukkah*, ii, 6; *Rosh ha-Shana*, i, 2; *Megillah*, iii, 5; *Taanith*, i, 1, 2), because of its importance, and of its being the most joyful of all festivals. The assertion of Winer (*Bibl. Realhörerbuch*, s. v. "Laubhüttenfest"), repeated by Keil (*Archäologie*, vol. i, § 85, note 3) and Bähr (*Symbolik*, ii, 660), that the rabbins call this festival יְרֵם הַמְרִיבָה, *dies multiplicationis*, is incorrect. The Mishna, which Winer quotes in corroboration of this assertion, does not denominate this festival as such, but simply speaks of the many sacrifices offered on the first day thereof: "If any one vows wine [for the Temple] he must not give less than three logs; if oil, not less than one log. . . . If he says, I do not know how much I have set apart, he must give as much as is used on the day which requires most" (*Menachoth*, xiii, 5)—i. e. as is used on the first day of the festival [of Tabernacles] when it happens to be on a Sabbath, for on such a day there are more libations used than on any other day in the year, inasmuch as 140 logs of wine are required for the different sacrifices.

The following are the principal passages in the Pentateuch which refer to this festival: Exod. xxiii, 16, where it is spoken of as the Feast of Ingathering, and is brought into connection with the other festivals under their agricultural designations, the Feast of Unleavened Bread and the Feast of Harvest; Lev. xxiii, 34-36, 39-43, where it is mentioned as commemorating the passage of the Israelites through the desert; Deut. xvi, 13-15, in which there is no notice of the eighth day, and it is treated as a thanksgiving for the harvest; Numb. xxix, 12-38, where there is an enumeration of the sacrifices which belong to the festival; Deut. xxxi, 10-13, where the injunction is given for the public reading of the law in the Sabbatical year, at the Feast of Tabernacles. In Neh. viii there is an account of the observance of the feast by Ezra, from which several additional particulars respecting it may be gathered.

II. *The Time at which this Festival was celebrated.*—The time fixed for the celebration of this feast is from the 15th to the 22d of Tishri, when the season of the year is changing for winter (Josephus, *Ant.* iii, 10, 4); i. e. in the autumn, when the whole of the chief fruits of the ground—the corn, the wine, and the oil—were gathered in (Exod. xxiii, 16; Lev. xxiii, 39; Deut. xvi, 13-15). Hence it is spoken of as occurring "in the end of the year, when thou hast gathered in thy labors out of the field." There were thus only four days intervening between this festival and the Great Day of Atonement. But though its duration, strictly speaking, was only seven days (Deut. xvi, 13; Ezek. xlv, 25), yet, as it was followed by a day of holy convocation, this festival is sometimes described as lasting eight days (Lev. xxiii, 36; Neh. viii, 18).

III. *The Manner in which this Festival was celebrated.*—As it is most essential, in describing the mode in which this feast was and still is celebrated, to distinguish between the Pentateuchal enactments and those rites, ceremonies, and practices which gradually obtained in the course of time, we shall divide our description into three periods.

1. *The Period from the Institution of this Festival to the Babylonian Captivity.*—The Mosaic enactments about the manner in which this festival is to be celebrated are as follows: The Israelites are to live in tabernacles during the seven days of this festival, "that your generations may know that I made the children of Israel to dwell in tabernacles when I brought them out of the land of Egypt" (Lev. xxiii, 42, 43). The first day alone,

X.—K

however, is to be a holy convocation (מִקְרָא קֹדֶשׁ), and a Sabbath or day of perfect cessation of business, on which no manner of secular work is to be done (ver. 35, 39); and all the able-bodied male members of the congregation, who are not legally precluded from it, are to appear in the place of the national sanctuary, as on the Passover and Pentecost (Exod. xxiii, 14, 17; xxxiv, 23). On this day the Israelites are to take "the fruit of goodly trees, with branches of palm-trees, boughs of thick trees, and willows of the brook" (Lev. xxiii, 40), most probably to symbolize the varied vegetation which grew in the different localities of their journey through the wilderness—viz. the palm-tree of the plain where the Israelites encamped, the willow at the mountain stream, from which God gave his people water to drink; and the designedly indefinite thick bush on the mountain heights over which they had to travel; while the fruits of the goodly trees represent the produce of the beautiful land which they ultimately obtained after their pilgrimages in the wilderness (Pressel, in Herzog's *Real-Encyclopädie*, s. v. "Laubhüttenfest"). As this festival, however, though symbolizing by the several practices thereof the pilgrimage through the wilderness, was nevertheless more especially designed to celebrate the completion of the harvest in the Promised Land, as typified by "the fruit of the goodly trees" in contrast to the plants of the wilderness, the Israelites are enjoined "not to appear before the Lord empty, but every one shall give as he is able, according to the blessing of the Lord thy God which he hath given thee" (Exod. xxiii, 15; Deut. xvi, 16, 17). Hence they are to offer burnt-offerings, meat-offerings, drink-offerings, and other sacrifices as follows: On the first day, the burnt-offering is to consist of thirteen bullocks, two rams, fourteen lambs, and one kid of the goats for a sin-offering, with the appropriate meat- and drink-offerings; the meat-offerings being three tenths of an ephah of flour mingled with one half of a hin of oil to each bullock, two tenths of an ephah of flour mingled with one third of a hin of oil to each ram, and one tenth of an ephah of flour mingled with one quarter of a hin of oil to each lamb; the drink-offering consisting of one half of a hin of wine to each bullock, one third of a hin of wine to each ram, and one quarter of a hin of wine to each lamb (Numb. xv, 2-11; xxviii, 12-14). The same number of rams and lambs, and one kid, are to be offered on the following days; the number of bullocks alone is to be reduced by one each day, so that on the seventh day only seven are to be offered (xxix, 12-38). There are accordingly to be offered during the seven days in all seventy bullocks, fourteen rams, ninety-eight lambs, and seven goats, with thirty-three and three-fifths ephahs of flour, sixty-four and one-sixth hins of oil, and sixty-four and one-sixth hins of wine. Moreover, the law is to be read publicly in the sanctuary on the first day of the festival every Sabbatical year (Deut. xxxi, 10-13). The six following days—i. e. 15th-22d of Tishri—are to be half-festivals; they were most probably devoted to social enjoyments and friendly gatherings, when every head of the family was to enjoy the feasts from the second or festival tithe with his son, daughter, man-servant, maid-servant, the Levite, the stranger, the fatherless, and the widow (xvi, 14). See *TITHE*.

At the conclusion of the seventh day another festival is to be celebrated, denominated *the concluding day* (יּוֹם הַשְּׁבִיעִי הַשְּׁנִי, *the eighth concluding day* (שְׁמִינִי עֶצְרָה); Sept. *éxôsiou*). Like the first day, it is to be a holy convocation, and no manner of work is to be done on it. As it is not only the finishing of the Feast of Tabernacles, but the conclusion of the whole cycle of festivals, the dwelling in the tabernacle is to cease on it, and the sacrifices to be offered thereon are to be distinct, and unlike those offered on the preceding days of Tabernacles. The burnt-sacrifice is to consist of one bullock, one ram, and seven lambs one year old, with the appropriate meat- and drink-offerings, and one goat for a sin-offering

(Numb. xxix, 36-38). The sacrifices, therefore, were to be like those of the seventh new moon and the Great Day of Atonement. Being, however, attached as an octave to the Feast of Tabernacles, the Sabbatical rest and the holy convocation, which properly belong to the seventh day of the Feast of Tabernacles, are transferred to it, and hence the two festivals are frequently joined together and spoken of as one composed of eight days. There is only one instance on record of this festival being celebrated between the entrance into the Promised Land and the Babylonian captivity (1 Kings viii, 2; 2 Chron. vii, 8-10 with Neh. viii, 17). No trace of any exposition of the Pentateuchal enactments with regard to this festival is to be found till we come to the post-exilic period.

2. *The Period from the Return from Babylon to the Destruction of the Temple.*—In the account of the first celebration of this festival after the return of the Jews from the Babylonian captivity, the concise Pentateuchal injunction is expanded. Not only are the localities specified in which these booths are to be erected, but additional plants are mentioned, and the use to be made of these plants is stated. The Jews, according to the command of Ezra, made themselves booths upon the roofs of houses, in the courts of their dwellings, in the courts of the sanctuary, in the street of the water-gate, and in the street of the gate of Ephraim, from the olive-branches, the pine-branches, the myrtle-branches, the palm-branches, and the branches of the thick trees, which they were told to gather, and dwell in these booths seven days (Neh. viii, 15-18). The Sadducees of old, who are followed by the Karaites, took these boughs and the fruits to be identical with those mentioned in Lev. xxiii, 39, 40, and maintained that these were to be used for the construction and adornment of the booths or tabernacles. The Pharisees and the orthodox Jewish tradition, however, as we shall see hereafter, interpreted this precept differently.

When the Feast of Tabernacles, like all other festivals and precepts of the Mosaic law, began to be strictly and generally kept after the Babylonian captivity, under the spiritual guidance of the Great Synagogue, the Sanhedrim, and the doctors of the law=scribes, more minute definitions and more expanded applications of the concise Pentateuchal injunction were imperatively demanded, in order to secure uniformity of practice, as well as to infuse devotion and joy into the celebration thereof, both in the Temple and in the booths. Hence it was ordained that the tabernacle or booth (סככה, *sukkah*) must be a detached and temporary habitation, constructed for the sole purpose of living in it during this festival, and must not be used as a permanent dwelling. The interior of it must neither be higher than twenty cubits, nor lower than ten palms; it must not have less than three walls; it must not be completely roofed in, or covered with any solid material, but must be thatched in such a manner as to admit the view of the sky and the stars; and the part open to the rays of the sun must not exceed in extent the part shaded by the cover. It must not be under a tree; neither must it be covered with a cloth, nor with anything which contracts defilement or does not derive its growth from the ground (Mishna, *Sukkah*, i, 1-ii, 7). The furniture of the huts was to be, according to most authorities, of the plainest description. There was to be nothing which was not fairly necessary. It would seem, however, that there was no strict rule on this point, and that there was a considerable difference according to the habits or circumstances of the occupant (Carpzov, p. 415; Buxtorf, *Syn. Jud.* p. 461). (See curious figures of different forms of huts, and of the great lights of the Feast of Tabernacles, in Surenhusius, *Mischna*, vol. ii; also a lively description of some of the huts used by the Jews in modern times in *La Vie Juive en Alsace*, p. 170, etc.) Every Israelite is to constitute the *sukkah* his regular domicile during the whole of the seven days of the fes-

tival, while his house is only to be his occasional abode, and he is only to quit the booth when it rains very heavily. Even a child, as soon as he ceases to be dependent upon his mother, must dwell in the booth; and the only persons exempt from this duty are those deputed on pious missions, invalids, nurses, women, and infants (Mishna, *Sukkah*, ii, 8, 9). The orthodox rabbins in the time of Christ would not eat any food which exceeded in quantity the size of an egg out of the booth (*ibid.* ii, 5).

The four species of vegetable productions to be used during prayer (Lev. xxiii, 39, 40) are the next distinctive feature of this festival, to which the ancient doctors of the law before the time of Christ devoted much attention. These are—1. "*The fruits of the goodly tree*" (פרי עץ הדר). As the phrase *goodly* or *splendid tree* (פרי עץ הדר) is too indefinite, and the fruit of such a tree may simply denote the fruit of any choice fruit-tree, thus leaving it very vague, the Hebrew canons, based upon one of the significations of דרר (to dwell, to rest; see Rashi on Lev. xxiii, 40), decreed that it means the *fruits which permanently rest upon the tree*—i. e. the citron, the paradise-apple (תמר, *ethróg*). Hence the rendering of Onkelos, the so-called Jerusalem Targum, and the Syriac version of הדר by *ethróg* (=κίτρινον, Josephus, *Ant.* xiii, 13, 5), *citron*. Josephus elsewhere (*ibid.* iii, 10, 4) says that it was the fruit of the *persea*, a tree said by Pliny to have been conveyed from Persia to Egypt (*Hist. Nat.* xv, 13), and which some have identified with the peach (*Malus persica*). The *ethróg* must not be from an uncircumcised tree (Lev. xix, 23), nor from the unclean heave-offering (comp. Numb. xviii, 11, 12); it must not have a stain on the crown, nor be without the crown, peeled of its rind, perforated, or defective, else it is illegal (Mishna, *Sukkah*, iii, 5, 6). 2. "*Branches of palm-trees*" (ענפי תמר). According to the Hebrew canons, it is the shoot of the palm-tree when budding, before the leaves are spread abroad, and while it is yet like a rod, and this is called *luláb* (לולב), which is the technical expression given in the Chaldee versions and in the Jewish writings for the Biblical phrase in question (Buxtorf, *Lex. Talm.* col. 1143; Carpzov, *App. Crit.* p. 416; Drusius, *Not. Maj.* in Lev. xxiii). The *luláb* must at least be three hands tall, and must be tied together with its own kind (Mishna, *Sukkah*, iii, 1, 8; Maimonides, *Iad Ha-Chezaka*, *Hilchoth Lulab*, vii, 1). 3. "*The bough of a thick tree*" (ענפי עץ עבות). This ambiguous phrase is interpreted by the ancient canons to denote "the myrtle-branch" (הדרס) whose leaves thickly cover the wood thereof: it must have three or more shoots around the stem on the same level of the stem, but if it has two shoots opposite each other on the same level, and the third shoot is above them, it is not *thick*, but is called (ענפי עץ עבות) *a thin myrtle*" (Mishna, *Sukkah*, 32 b; Maimonides, *ibid.* vii, 2). This explanation accounts for the rendering of the Chaldee paraphrases of this phrase by *hadás* (הדרס), *myrtle-branch*. If the point of this myrtle-branch is broken off, or if its leaves are torn off, or if it has more berries on it than leaves, it is illegal (Mishna, *Sukkah*, iii, 2). 4. "*The willows of the brook*" (ענפי עץ ערבה)=*salix helix* must be of that species the distinguishing marks of which are dark wood, and long leaves with smooth margin. If any one of these four kinds has been obtained by theft, or comes from a grove devoted to idolatry, or from a town which has been enticed to idolatry (comp. Deut. xiii, 12, etc.), it is illegal (*ibid.* iii, 1-5). Their legality having been ascertained, the palm, the myrtle, and the willow are bound up together into one bundle, denominated *luláb*.

It has already been remarked that the Sadducees in and before the time of Christ maintained that the boughs and fruit here mentioned (viz. Lev. xxiii, 40) are to be used for the construction and adornment of

the booths, and that they appeal to Neh. viii, 15, 16 in support of this view. This view has not only been espoused by the Karaites, the successors of the Sadducees [see SADDUCEES], but is defended by bishop Patrick, Keil, and most modern Christian interpreters. Against this, however, is to be urged that—(1.) The obvious sense of the injunction (Lev. xxiii, 40) is that these boughs are to be carried as symbols during the rejoicing, and that we should expect something more explicit than the single and simple word *וַתִּקַּחְתֶּם*, and ye shall take, had it been designed that these boughs should be employed for the construction of the booths.

(2.) The fruit (*פֵּרוֹת*)—as the margin of the A. V. rightly has it, and not *boughs*, as it is in the text with which this injunction commences—could surely not be among the materials for the construction of the booths. (3.) The law about the booths is entirely separated from the ordering of the fruit and boughs, as may be seen from a comparison of Lev. xxiii, 40 with ver. 42. (4.) The first day of this festival, as we have seen, was a holy convocation, on which all manner of work was interdicted. It is therefore against the sanctity of the day to suppose that the command to take the fruit and the boughs on the first day meant that the Israelites are to construct with these plants the booths on this holy day. (5.) The appeal to Neh. viii is beside the mark, inasmuch as different materials are there mentioned—e. g. olive-branches and pine-branches—which were actually used for making the booths, while the *hadār* fruit and the willow specified in the Pentateuchal injunction are omitted. With the regulations about the tabernacles and the boughs or *lulāb* before us, we can now continue the description of the mode in which this festival was celebrated in the Temple.

14th of Tishri was the Preparation Day (*יָוֵם הַכִּיּוֹן* = *ἡ παρασκευή*). The pilgrims came up to Jerusalem on the day previous to the commencement of the festival, when they prepared everything necessary for its solemn observance. The priests proclaimed the approach of the holy convocation on the eve of this day by the blasts of trumpets. As on the Feasts of the Passover and Pentecost, the altar of the burnt-sacrifice was cleansed in the first night-watch (Mishna, *Yoma*, i, 8), and the gates of the Temple, as well as those of the inner court, were opened immediately after midnight for the convenience of the priests who resided in the city, and for the people who filled the court before the cock crew to have their sacrifices and offerings duly examined by the priests (*ibid.* i, 8). When the first day of Tabernacles happened on the Sabbath the people brought their palm-branches or *lulābs* on the 14th of Tishri to the synagogue on the Temple mount, where the servants of the synagogue (*חֹזְנֵי הַבַּיִת*) deposited them in a gallery, while the *lulābs* of the elders of the synagogue (*זִקְנֵי הַבַּיִת*) were placed in a separate chamber, as it was against the Sabbatical laws to carry the palms on the Sabbath from the booths of the respective pilgrims to the Temple.

15th of Tishri.—At daybreak of the first day of the festival a priest, accompanied by a jubilant procession and by a band of music, descended with a golden pitcher holding three *logs* to the pool of Siloam, and, having filled it with water from the brook, he endeavored to reach the Temple in time to join his brother priests who carried the morning sacrifice to the altar (*Tosiph-ta Sikkah*, c. iii). Following in their steps, he entered from the south through the water-gate into the inner court (Mishna, *Middoth*, ii, 6; Gemara, *Sukkah*, 48 a). On reaching the water-gate, he was welcomed by three blasts of the trumpet. He then ascended the steps of the altar with another priest who carried a pitcher of wine for the drink-offering. The two priests turned to the left of the altar where two silver basins were fixed with holes at the bottom; the basin for the water was to the west and had a narrower hole, while the one

for the wine was to the east and had a wider hole, so that both might get empty at the same time. Into these respective basins they simultaneously and slowly poured the water and the wine in such a manner that both were emptied at the same time upon the base of the altar. To the priest who poured out the water the people called out, Raise thy hand! The reason for this is that when Alexander Jannai, who officiated as priest, was charged with this duty, being a Sadducee and rejecting the ordinances of the scribes, he poured the water over his feet and not into the basin, whereupon the people pelted him with their *ethrōgs*, or citrons. At this catastrophe, which nearly cost the life of the Maccabean king, Alexander Jannai called for the assistance of the soldiers, when nearly six thousand Jews perished in the Temple, and the altar was damaged, a corner of it being broken off in the struggle which ensued (Josephus, *Ant.* xiii, 13, 5; Mishna, *Sukkah*, iv, 9; Gemara, *ibid.* 48 a; 51 a; Grätz, *Geschichte der Juden* [2d ed. Leips. 1863], iii, 112, 473 sq.). See SCRIBES. The ceremony of drawing the water was repeated every morning during the seven days of the festival.

At the same time that the priests went in procession to the pool of Siloam, another jubilant multitude of people went to a place outside Jerusalem called *Motsā* (*מוֹצֵא*), which abounded in willows. These willows they gathered with great rejoicing, carried them into the Temple amid the blasts of trumpets, and placed them at the altar in such a manner that their tops overhung and formed a sort of canopy (Mishna, *Sukkah*, iv, 5). The decorating process of the altar being finished, the daily morning sacrifice was first offered, *Musāph* (*מוֹסֵף*); then the additional or special sacrifice for this festival prescribed in Numb. xxix, 12–38, which, on the first day, consisted of a burnt-offering of thirteen bullocks, two rams, and fourteen lambs, with the appropriate meat- and drink-offering, and a goat for a sin-offering, and then the peace-offerings, the vows, and the free-will offerings, which constituted the repast of the people (Jerusalem, *Sukkah*, v). While these sacrifices were offered the Levites chanted the *Great Hallel*, as on the feasts of the Passover and Pentecost. On this occasion, however, each of the pilgrims held in his right hand the *lulāb*, or palm, to which were tied the twigs of myrtle and willow as described above, and the *ethrōg*, or citron, in his left, while these psalms were chanted; and, during the chanting of Psa. cxviii, the pilgrims shook their palms three times—viz. at the singing of ver. 1, 25, and 29 (Mishna, *Sukkah*, iii, 9). When the *Musāph* chant was finished the priests in procession went round the altar once, exclaiming: Hosanna, O Jehovah; give us help, O Jehovah, give prosperity! (Psa. cxviii, 25). Thereupon the solemn benediction was pronounced by the priests and the people dispersed, amid the repeated exclamations, "How beautiful art thou, O altar!" or "To Jehovah and thee, O altar, we give thanks!" (Mishna, *Sukkah*, iv, 5; Gemara, *ibid.* 44 b, 45). Each one of the pilgrims then betook himself to his respective booth, there to enjoy his repast with the Levite, the stranger, the poor, and the fatherless who shared his hospitality. This practice explains the remarks of the evangelists (Matt. xxi, 8, 9, 15; John xii, 12, 13). It is to be remarked that on the first day of the festival every Israelite carried about his *lulāb*, or palm, all day; he carried it into the synagogue, held it in his hand while praying, and only laid it down when called to the reading of the law, as he then had to hold the scroll [see SYNAGOGUE]; carried it with him when he went to visit the sick and comfort the mourners (Mishna, *Sukkah*, 41 a; Maimonides, *Iud Ha-Chezuka*, *Hilchoth Lulab*, vii, 24).

16th–20th of Tishri.—These days were half-holydays; they were called the middle days of the festival (*חֻלֵּי הַמִּזְבֵּחַ* = *μεσούτης τῆς ἑορτῆς*, John vii, 14), or the lesser festival (*מִינוּחַ קָטָן*). Any articles of food or raiment

required for immediate use were allowed to be purchased privately during these days, and work demanded by the emergencies of the public service or required for the festival, the omission of which entailed loss or injury, was permitted to be done. See PASSOVER.

On the night of the 15th, and on the five succeeding nights, the rejoicing of the drawing of water (שִׁמְחַת בִּירַת הַשְּׁוֹאֵבָה) was celebrated in the court of the Temple in the following manner: The people assembled in large masses in the court of the women at night after the expiration of the first day of the festival. The women occupied the galleries, which were permanent fixtures in the court (Mishna, *Middoth*, ii, 15), while the men occupied the space below. Four huge golden candelabra were placed in the centre of the court; each of these candelabra had four golden basins and four ladders, on which stood four lads from the rising youths of the priests with jars of oil wherewith they fed the basins, while the cast-off garments of the priests were used as wicks. The lights of these candelabra illuminated the whole city. Around these lights pious and distinguished men danced before the people with lighted flambeaux in their hands, singing hymns and songs of praise; while the Levites, who were stationed on the fifteen steps which led into the woman's court, and corresponded to the fifteen psalms of degrees=steps (Psa. cxx-cxxiv), accompanied the songs with harps, psalteries, cymbals, and numberless musical instruments. The dancing, as well as the vocal and instrumental music, continued till daybreak. Some of these pious men performed dexterous movements with their flambeaux while dancing for the amusement of the people. Thus it is related that R. Simon II (A.D. 30-50), son of Gamaliel I, the teacher of the apostle Paul [see EDUCATION], used to dance with eight torches in his hands, which he alternately threw up in the air and caught again without their touching each other or falling to the ground (*Tosiphta Sikkah*, c. iv; Jerusalem, *Sikkah*, v, 4; Babylon, *ibid.* 53 a). It is supposed that it was the splendid light of this grand illumination which suggested the remark of our Saviour—"I am the light of the world" (John viii, 12). Towards the approach of day two priests stationed themselves, with trumpets in their hands, at the upper gate leading from the court of the Israelites to the court of the women, and awaited the announcement of daybreak by the crowing of the cock. As soon as the cock crew, they blew the trumpets three times and marched out the people of the Temple in such a manner that they had to descend the ten steps, where the two priests again blew the trumpets three times, and when they reached the lowest step in the outer court they for the third time blew the trumpets three times. They continued to blow as they were marching across the court till they reached the eastern gate. Here they turned their faces westward towards the Temple and said, "Our fathers once turned their back to the sanctuary in this place, and their faces to the east, and worshipped the sun towards the east (comp. Ezek. viii, 15, 16); but we lift up our eyes to Jehovah." Thereupon they returned to the Temple, while the people who were thus marched out went to their respective booths. Some, however, formed themselves into a procession, and went with the priests to the pool of Siloam to fetch the water; while others returned to the Temple, to be present at the morning sacrifice (Mishna, *Sikkah*, v, 2-4; Maimonides, *Iad Ha-Chezaka*, *Hilchoth Sikkah*, viii, 12-15). The Talmud maintains that the ceremony of the drawing of water is anterior to the Babylonian captivity, and that Isa. xii, 3 refers to it (*Sikkah*, 48 b). Indeed, it is only on this supposition that the imagery in Isa. xii, 3 obtains its full force and significance. As to the import of this ceremony, ancient tradition furnishes two explanations of it. (1.) Since the Feast of Tabernacles was the time of the later rain (Joel ii, 23), the drawing and pouring out of the water was regarded as symbolical of the forthcom-

ing rain which it was ardently desired might be blessed to the people. Hence the remark that he who will not come up to the Feast of Tabernacles shall have no rain (*Sikkah*, 48, 51; *Rosh ha-Shanah*, 16; *Taanith*, 2 a). (2.) The Jews seem to have regarded the rite as symbolical of the water miraculously supplied to their fathers from the rock at Meribah. But they also gave to it a more strictly spiritual signification. It was regarded as typical of the outpouring of the Holy Spirit. Hence the remark: "It is called the house of drawing the water, because from thence the Holy Spirit is drawn in accordance with what is said in Isa. xii, 3, 'With joy shall ye draw water out of the wells of salvation'" (Jerusalem *Sikkah*, v, 1). It is upon this explanation that our Saviour's remark is based (John vii, 37-39) in allusion to this ceremony on this last day of the festival when it was performed for the last time. The two meanings are, of course, perfectly harmonious, as is shown by the use which Paul makes of the historical fact (1 Cor. x, 4)—"they drank of that spiritual rock that followed them: and that rock was Christ."

The mode in which the sacrifices were offered in the middle days of the festival, the use of the palm and the citron, the procession round the altar, etc., were simply a repetition of the first day of the festival, with this exception, however, that the number of animals diminished daily, according to the prescription in Numb. xxix, 12-38, and that the *Lesser Hallel* was chanted by Levites instead of the *Great Hallel* (q. v.). A peculiarity connected with the sacrificial service of this festival must here be noticed. On all other festivals only those of the twenty-four orders of the priests officiated upon whom the lot fell (comp. 1 Chron. xxiv, 7-19), but on the seven days of Tabernacles the whole of the twenty-four orders officiated. On the first day the thirteen bullocks, two rams, and one goat were offered by sixteen orders, while the fourteen sheep were offered by the other eight. As there was one bullock less offered each of the seven days, one order of priests left each day the sixteen orders who offered these bullocks and joined those who offered the fourteen lambs. Hence, "on the first day six of these orders offered two lambs each, and the two other orders one lamb each. On the second day five orders of the priests offered two lambs each, and the four other orders one lamb each. On the third day four orders offered two lambs each, and six orders one lamb each. On the fourth day three orders offered two lambs each, and eight orders one lamb each. On the fifth day two orders offered two lambs each, and ten orders one lamb each. On the sixth day one order offered two lambs each, and twelve orders one lamb each; while on the seventh day, when the orders of priests who sacrificed the bullocks had diminished to eight, fourteen orders offered one lamb each" (Mishna, *Sikkah*, v, 6).

21st of Tishri.—The seventh day, which was denominated the last day of the Feast of Tabernacles (יום טוב האחרון של חג, Mishna, *Sikkah*, iv, 8), was especially distinguished in the following manner from the other six days. After the *Musaph*, or special festival sacrifice of the day, the priests in procession made seven circuits round the altar (*ibid.* iv, 5), whereas on the preceding days of the festival only one circuit was made. The willows (ערבה) which surrounded the altar were then so thoroughly shaken by the people that the leaves lay thickly on the ground. The people also fetched palm-branches and beat them to pieces at the side of the altar (*ibid.* iv, 6). It is from this fact that the last day of the festival obtained the names of the Day of Willows (יום ערבה, *ibid.* iv, 1), the Great Hosanna Day (יום הושענא נא רבה), and the Branch-thrashing Day (יום חבוט חריות, *ibid.* iv, 6). Herzfeld suggests that the thrashing of the willows and palms may have been to symbolize that after the last verdure of the year had served for the adornment of the altar the trees might

now go on to cast off their leaves (*Gesch. des Volkes Israel*, ii, 125). As soon as the thrashing process was over, the children who were present, and who also carried about the festive nosegays, threw away their palms and ate up their *ethrōgs*, or citrons (*Mishna, Sukkah*, iv, 7); while the pilgrims, "in the afternoon of this day, began to remove the furniture from the Tabernacles in honor of the last day of the festival" (*ibid.* iv, 8), as the obligation to live or eat in the booths ceased in the afternoon of the seventh day, inasmuch as the Feast of Tabernacles itself had now terminated. The eighth day, as we shall presently see, was a holy convocation, whereon no manner of work was allowed to be done, and the Hebrews could no more dismantle their huts on this day without desecrating it than on the Sabbath. It must also be remarked that this last day of the festival, this Great Hosanna day, was regarded as one of the four days whereon God judges the world (*Mishna, Rosh ha-Shanah*, i, 2; *Gemara, ibid.*). There can, therefore, be but little doubt that when John records the memorable words uttered by Christ (*ἐν τῇ ἰσχυρῇ ἡμέρᾳ τῇ μεγάλῃ τῆς ἑορτῆς*), in the last great day of the festival (John vii, 37), he meant this distinguished day.

*2d of Tishri.*—The eighth day—which, as we have seen, was a separate festival—was a day of holy convocation whereon no manner of work was allowed to be done. After the daily morning sacrifice and the private offerings of the people, the sacrifices prescribed in Numb. xxix, 36–38 were offered, during which the *Great Hallel* was chanted by the Levites. At the sacrifices, however, the twenty-four orders of priests were no longer present, but lots were cast as on other festivals, and that order upon whom the lot fell offered the sacrifices (*Mishna, Sukkah*, v, 6). The Israelites dwelt no longer in the booths on this day, the joyful procession for the drawing of water was discontinued, the grand illumination in the court of the women ceased, and the palms and willows were not used any more.

It only remains to be added, that when the Feast of Tabernacles fell on a Sabbatical year (q. v.) the reading of portions of the law (Deut. xxxi, 10–13) was afterwards confined to one book of the Pentateuch. This arose from the multiplication of synagogues, in which the law was read every week, thus rendering it less needful to read extensive portions in the Temple during this festival, inasmuch as the people had now ample opportunities of listening in their respective places of worship to the reading of the law and the prophets. Hence also the reading of the law, which in olden days took place in the last hours of the forenoon of every day of this festival, was afterwards restricted to one day. It was at last assigned to the high-priest, and ultimately to the king.

It is said that the altar was adorned throughout the seven days with sprigs of willows, one of which each Israelite who came into the court brought with him. The great number of the sacrifices has already been noticed. The number of public victims offered on the first day exceeded those of any day in the year (*Menach.* xiii, 5). But besides these, the Chagigahs or private peace-offerings were more abundant than at any other time; and there is reason to believe that the whole of the sacrifices nearly outnumbered all those offered at the other festivals put together. It belongs to the character of the feast that on each day the trumpets of the Temple are said to have sounded twenty-one times. Though all the Hebrew annual festivals were seasons of rejoicing, the Feast of Tabernacles was, in this respect, distinguished above them all. The huts and the *lulābs* must have made a gay and striking spectacle over the city by day, and the lamps, the flambeaux, the music, and the joyous gatherings in the court of the Temple must have given a still more festive character to the night. Hence it was called by the rabbins *ליל, the festival, kar' ἑξοχήν*. There is a proverb in *Sukkah* (v, 1), "He who

has never seen the rejoicing at the pouring-out of the water of Siloam has never seen rejoicing in his life." Maimonides says that he who failed at the Feast of Tabernacles in contributing to the public joy according to his means incurred especial guilt (Carpzov, p. 419). The feast is designated by Josephus (*Ant.* viii, 4, 1) *ἑορτὴ ἀγῶνιστῶν καὶ μεγίστη*, and by Philo *ἑορτῶν μεγίστη*. Its thoroughly festive nature is shown in the accounts of its observance in Josephus (*ibid.* viii, 4, 1; xv, 33), as well as in the accounts of its celebration by Solomon, Ezra, and Judas Maccabeus. From this fact, and its connection with the ingathering of the fruits of the year, especially the vintage, it is not wonderful that Plutarch should have likened it to the Dionysiac festivals, calling it *θυρσοφορία* and *κρατηροφορία* (*Sympos.* iv).

3. *From the Dispersion of the Jews to the Present Time.*—Excepting the ordinances which were local and belonged to the Temple and its sacrificial service, and bating the exposition and more rigid explanation of some of the rites so as to adapt them to the altered condition of the nation, the Jews to the present day continue to celebrate the Feast of Tabernacles as in the days of the second Temple. As soon as the Day of Atonement is over, every orthodox Israelite, according to the ancient canons, begins to erect his booth in which he and his family take up their temporary abode during this festival. Each paterfamilias also provides himself with a *lulāb*=palm, and *ethrōg*=citron, as defined by the ancient canons. On the eve of the 14th of Tishri, or of the Preparation Day (*כִּיּוֹר*), the festival commences. All the Jews, attired in their festive garments, resort to the synagogue, where, after the evening prayer (*מנצח*) appointed in the liturgy for this occasion, the hallowed nature of the festival is proclaimed by the cantor (*חזן*) in the blessing pronounced over the cup of wine (*קידוש*). After the evening service, every family resorts to its respective booth, which is illuminated and adorned with foliage and diverse fruit, and in which the first festive meal is taken. Before, however, anything is eaten, the head of the family pronounces the sanctity of the festival over a cup of wine. This sanctification or *Kiddush* (*קִידוּשׁ*) was ordained by the men of the Great Synagogue (q. v.), and as there is no doubt that our Saviour and his apostles recited it, we shall give it in English. It is as follows: "Blessed art thou, O Lord our God, King of the universe, who hast created the fruit of the vine! Blessed art thou, O Lord our God, King of the universe, who hast chosen us from among all nations, hast exalted us above all tongues, and hast sanctified us with thy commandments. In love, O Lord, thou hast given us appointed times for joy, festivals, and seasons for rejoicing; and this Feast of Tabernacles, this time of our gladness, the holy convocation, in memory of the exodus from Egypt; for thou hast chosen us, and hast sanctified us above all nations, and hast caused us to inherit thy holy festivals with joy and rejoicing. Blessed art thou, O Lord, who hast sanctified Israel and the seasons! Blessed art thou, O Lord our God, King of the universe, who hast sanctified us with thy commandments, and hast enjoined us to dwell in booths! Blessed art thou, O Lord our God, King of the universe, who hast preserved us alive, sustained us, and brought us to the beginning of this season!" Thereupon each member of the family washes his hands, pronouncing the prescribed benediction while drying them, and all enjoy the repast. The orthodox Jews sleep in the booths all night. The following morning, which is the first day of the festival, they again resort to the synagogue, holding the palms and citrons in their hands. They lay them down during the former part of the prayer, but take them up after the eighteen benedictions, when they are about to recite the *Hallel*. Holding the palm in the right hand and the citron in the left, they recite

the following prayer: "Blessed art thou, O Lord our God, King of the universe, who hast sanctified us with thy commandments, and hast enjoined us to take the palm-branch!" Thereupon each one turns his citron upside-down and waves his palm-branch three times towards the east, three times towards the west, three times towards the south, and three times towards the north. The legate of the congregation pronounces the following benediction: "Blessed art thou, O Lord our God, King of the universe, who hast sanctified us with thy commandments, and hast enjoined us to recite the *Hallel*!" and the *Hallel* is chanted; when they come to Psa. cxviii, the waving of the palm-branch is repeated at the first, tenth, and twenty-fifth verses, just as it was done in the Temple. Two scrolls of the law are then taken out of the ark (*תיבה*, ארון) and brought on the platform (*בנימז*), when the lessons for the first day of the festival are read out from the law—Lev. xxii, 26-xxiii, 44; and Numb. xxix, 12-16, as *Maphtir*; and from the prophets, Zech. xiv, 1-21. See HAPHTARAH. After this the *Musaph* prayer is recited, which corresponds to the *Musaph* or additional sacrifices in the Temple for this special festival. When the legate of the congregation in reciting the *Musaph* comes to the passage where the expression *priests* (*כהנים*) occurs, the Aaronites and the Levites arise, and, after the latter have washed the hands of the former, the priests, with uplifted hands, pronounce the sacerdotal benediction (Numb. vi, 24-27) upon the congregation, who have their faces veiled with the *Taliit*. See FRINGE. The ark of the Lord is then placed in the centre of the synagogue, when the elders form themselves into a procession headed by the legate, who carries the scroll of the law, and all the rest carry the palm-branches in their hands and walk round the ark once, repeating the *Hosanna*, and waving the palms in commemoration of the procession round the altar in the Temple (Maimonides, *Iad Ha-Chezaka*, *Hilchoth Lulab*, vii, 23). When the morning service is concluded, the people betake themselves to their respective booths to partake of the festive repast with the poor and the stranger. In the afternoon, about five or six o'clock, they again resort to the synagogue to recite the *Minchah* (*מנחה*) prayer, answering to the daily evening sacrifice in the Temple. As soon as darkness sets in or the stars appear, the second day of the festival commences, the Jews having doubled the days of holy convocation. The evening prayer as well as the practices for this evening resemble those of the first evening.

The ritual for the second day in the morning, as well as the rites, with very few variations, is like that of the first day. The lesson, however, from the prophets is different, for on this day 1 Kings viii, 2-21 is read. After the afternoon service of this day the middle days of the festival begin, which last four days, when the ritual is like that of ordinary days, except that a few prayers bearing on this festival are occasionally inserted in the regular formulæ, lessons from the law are read on each day as specified in the article HAPHTARAH, and the above-named procession goes round the ark. The seventh day, which is the *Great Hosanna* (*הושענא רבה*), is celebrated with peculiar solemnity, inasmuch as it is believed that on this day God decrees the weather, or rather the rain, for the future harvest (Mishna, *Rosh ha-Shamah*, i, 2; Gemara, *ibid.*). On the evening preceding this day every Israelite prepares for himself a small bunch of willows tied up with the bark of the palm; some of the pious Jews assemble either in the synagogue or in the booths to read the book of Deuteronomy, the Psalms, the Mishna, etc., all night, and are immersed before the morning prayer. When the time of morning service arrives, numerous candles are lighted in the synagogue, and after the *Shachrith* (*שחרית*) = morning prayer, which is similar to that of the previous

day, seven scrolls of the law are taken out of the ark, and from one of them the lesson is read. The *Musaph* or additional prayer is then recited; thereupon a procession is formed, headed by the rabbi and the legate with the palms in their hands, and followed by those who carry the seven scrolls of the law. This procession goes seven times round the ark, which is placed in the middle of the synagogue, or round the reading-desk, reciting the *Hosannas*, in accordance with the seven circuits around the altar which were performed in the Temple on this day, and waving their palms at certain expressions. The palms are then laid down, and every one takes up his bunch of willows and beats off its leaves at a certain part of the liturgy, in accordance with the beating off the leaves from the willows around the altar in the Temple, which took place on this day. On the evening of the seventh day the festival commences which concludes the whole cycle of festival (*שמיני עצרת*). It is a day of holy convocation, on which no manner of work is done, and is introduced by the *Kiddush* (*קידוש*) = proclamation of its sanctity, given in the former part of this section. On the following morning the Jews resort to the synagogue, recite the morning prayer (*שחרית*), as in the first two days of the Feast of Tabernacles, inserting, however, some prayers appropriate for this occasion. Thereupon the special lesson for the day is read, the *Musaph* or additional prayer is offered, and the priests pronounce the benediction in the manner already described. The people no longer take their meals in the booths on this day. On the evening of this day again another festival commences, called the *Rejoicing of the Law* (*שמחת תורה*). After the reciting of the Eighteen Benedictions, all the scrolls of the law are taken out of the ark, into which a lighted candle is placed. A procession is then formed of the distinguished members, who are headed by the legate; they hold the scrolls in their hands, and go around the reading-desk; the scrolls are then put back into the ark, and only one is placed upon the desk, out of which is read the last chapter of Deuteronomy, and to the reading of which all persons present in the synagogue are called, including children. When the evening service is over the children leave the synagogue in procession, carrying banners with sundry Hebrew inscriptions.

On the following morning the Jews again resort to the synagogue, recite the *Hallel* after the Eighteen Benedictions, empty the ark of all its scrolls, put a lighted candle into it, form themselves into a procession, and with the scrolls in their hands, and amid jubilant songs, go round the reading-desk. This being over, the scrolls of the law are put back into the ark, and from one of the two which are retained is read Deut. xxxiii, whereunto four persons are at first called, then all the little children are called as on the previous evening, and then again several grown-up people are called. The first of these is called the *Bridegroom of the Law* (*חתן הורה*), and after the cantor who calls him up has addressed him in a somewhat lengthy Hebrew formula, the last verses of the Pentateuch are read; and when the reading of the law is thus finished all the people exclaim, *חזק*, *be strong!* which expression is printed at the end of every book in the Hebrew Bible as well as of every non-inspired Hebrew work. After reading the last chapter of the law, the beginning of Genesis (i, 1-ii, 3) is read, to which another one is called who is denominated the *Bridegroom of Genesis* (*חתן בראשית*), and to whom again the cantor delivers a somewhat lengthy Hebrew formula; the *Maphtir*, consisting of Numb. xxix, 35-xxx, 1, is then read from another scroll; and with the recitation of the *Musaph*, or additional special prayer for the festival, the service is concluded. The rest of the day is spent in rejoicing and feasting. The design of this festival is to celebrate the annual completion of the perusal of the Pentateuch, inasmuch as on this day the last sec-

tion of the law is read. Hence the name of the festival, *the Rejoicing of Finishing the Law*.

IV. *Origin and Import of this Festival*.—Like Pentecost, the Feast of Tabernacles owes its origin to the harvest, which terminated at this time, and which the Jews in common with other nations of antiquity celebrated as a season of joy and thankfulness for the kindly fruit of the earth. This is undoubtedly implied in its very name, the *Feast of Ingathering*, and is distinctly declared in Exod. xxiii, 16: "Thou shalt keep . . . the feast of ingathering in the end of the year when thou hast gathered in thy labors out of the field" (comp. also Lev. xxiii, 39; Deut. xvi, 13). With this agricultural origin, however, is associated a great historical event, which the Jews are enjoined to remember during the celebration of this festival, and which imparted a second name to this feast—viz. "Ye shall dwell in booths seven days . . . that your generations may know that I made the children of Israel to dwell in booths, when I brought them out of the land of Egypt" (Lev. xxiii, 42, 43), whence its name, the *Feast of Booths* or *Tabernacles*. The Feast of Tabernacles, therefore, like the Passover, has a twofold significance—viz. it has a reference both to the annual course of nature and to a great national event. As to the reason for connecting this pre-eminently joyous festival of ingathering with the homeless dwelling of the Israelites in booths in the wilderness, we prefer the one given by the ancient Jews to theories advanced by modern commentators. In the midst of their great joy—when their houses are full of corn, new wine, oil, and all good things, and their hearts overflow with rejoicing—the Israelites might forget the Lord their God, and say that it is their power and the strength of their arm which have gotten them this prosperity (Deut. viii, 12, etc.). To guard against this the Hebrews were commanded to quit their permanent and sheltered house and sojourn in booths at the time of harvest and in the midst of general abundance, to be reminded thereby that they were once homeless and wanderers in the wilderness, and that they are now in the enjoyment of blessings through the goodness and faithfulness of their heavenly Father, who fulfilled the promises made to Abraham, Isaac, and Jacob. This idea was still more developed after the Babylonian captivity, when the canons about the building of the booths were enacted. The booths, as we have seen, were to be covered in such a manner as to admit the view of the sky and the stars, in order that the sojourners therein might be reminded of their Creator, and remember that, however great and prosperous the harvest, the things of earth are perishable and vanity of vanities. This is the reason why the scribes also ordained that the book of Ecclesiastes should be read on this joyous festival.

The origin of the Feast of Tabernacles is by some connected with Sukkoth, the first halting-place of the Israelites on their march out of Egypt; and the huts are taken, not to commemorate the tents in the wilderness, but the leafy booths (*sukkoth*) in which they lodged for the last time before they entered the desert. The feast would thus call to mind the transition from settled to nomadic life (Stanley, *Sinai and Palestine*, Appendix, § 89).

Philo saw in this feast a witness for the original equality of all the members of the chosen race. All, during the week, poor and rich, the inhabitant alike of the palace and the hovel, lived in huts which, in strictness, were to be of the plainest and most ordinary materials and construction. From this point of view the Israelite would be reminded with still greater edification of the perilous and toilsome march of his forefathers through the desert, when the nation seemed to be more immediately dependent on God for food, shelter, and protection, while the completed harvest stored up for the coming winter set before him the benefits he had derived from the possession of the land flowing with milk and honey which had been of old promised to his race.

But the culminating-point of this blessing was the

establishment of the central spot of the national worship in the Temple at Jerusalem. Hence it was evidently fitting that the Feast of Tabernacles should be kept with an unwonted degree of observance at the dedication of Solomon's Temple (1 Kings viii, 2, 65; Josephus, *Ant.* viii, 4, 5), again after the rebuilding of the Temple by Ezra (Neh. viii, 13-18), and a third time by Judas Maccabæus, when he had driven out the Syrians and restored the Temple to the worship of Jehovah (2 Macc. x, 5-8).

Frankfurt-on-the-Main, 1859), p. 412 sq.; Carpov, *App. Crit.* p. 414; Buxtorf, *Syn. Jud.* c. xxi; Reland, *Ant.* iv, 5; Lightfoot, *Temple Service*, xvi, and *Exercit.* in Joan. vii, 2, 37; Otho, *Lex. Rab.* 230; the treatise *Sukkah*, in the Mishna, with Surenhuius's *Notes*; Hupfeld, *De Fest. Hebr.* pt. ii; comp. the monographs *De Libatione Aquæ in Fest. Tab.* by Iken (in the *Symbol.* etc. [Bremen, 1744], i, 160), Biel (Vitemb. 1716), and Tresenreuter (Alt. 1743), Groddek, *De Cæmonia Palmarum in Fest. Tab.* (Lips. 1694-95, also in Ugolino, vol. xviii); Dachs, on *Sukkah*, in the *Jerusalem Gemara* (Utrecht, 1726); Tirsch, *De Tabernac. Feriis* (Prag. s. l. et an.).

**Tab'itha** (Ταβιθά; Vulg. *Tabitha*), also called *Dorcas* (Δορκάς), a female disciple of Joppa, "full of good works," among which that of making clothes for the poor is specifically mentioned (Acts ix, 36-42). A.D. 32. While Peter was at the neighboring town of Lydda, Tabitha died, upon which the disciples at Joppa sent an urgent message to the apostle, begging him to come to them without delay. It is not quite evident from the narrative whether they looked for any exercise of miraculous power on his part, or whether they simply wished for Christian consolation under what they regarded as the common calamity of their Church; but the miracle recently performed on *Æneas* (ver. 34), and the expression in ver. 38 (διελευθέρω ἕως ἡμῶν), lead to the former supposition. Upon his arrival Peter found the deceased already prepared for burial, and laid out in an upper chamber, where she was surrounded by the recipients and the tokens of her charity. After the example of our Saviour in the house of Jairus (Matt. ix, 25; Mark v, 40), "Peter put them all forth," prayed for the divine assistance, and then commanded Tabitha to arise (comp. Mark v, 41; Luke viii, 54). She opened her eyes and sat up, and then, assisted by the apostle, rose from her couch. This great miracle, as we are further told, produced an extraordinary effect in Joppa, and was the occasion of many conversions there (Acts ix, 42). See PETER.

The name of "Tabitha" (טַבִּיטָּה) is the Aramaic form answering to the Hebrew תַּבִּיטָּה, *taebiyâh*, a "female gazelle," the gazelle being regarded in the East, among both Jews and Arabs, as a standard of beauty—indeed, the word תַּבִּיטָּה properly means "beauty." Luke gives "Dorcas" as the Greek equivalent of the name. Similarly we find δορκάς as the Sept. rendering of תַּבִּיטָּה in Deut. xii, 15, 22; 2 Sam. ii, 18; Prov. vi, 5. It has been inferred from the occurrence of the two names that Tabitha was a Hellenist (see Whitty, *ad loc.*). This, however, does not follow, even if we suppose that the two names were actually borne by her, as it would seem to have been the practice even of the Hebrew Jews at this period to have a Gentile name in addition to their Jewish name. But it is by no means clear from the language of Luke that Tabitha actually bore the name of Dorcas. All he tells us is that the name of Tabitha means "gazelle" (δορκάς), and for the benefit of his

Gentile readers he afterwards speaks of her by the Greek equivalent. At the same time it is very possible that she may have been known by both names; and we learn from Josephus (*War*, iv, 3, 5) that the name of Dorcas was not unknown in Palestine. Among the Greeks also, as we gather from Lucretius (iv, 1154), it was a term of endearment. Other examples of the use of the name will be found in Wettstein, *ad loc.* See DORCAS.

**Table** is the rendering in the A. V. usually of שֻׁלְחָן, *shulchân* (New Test. *τράπεζα*, likewise invariably so translated, except Luke xix, 23 ["bank"]; Acts xvi, 34 ["meat"]), so called from being *extended* (שָׁחַת, comp. Homer, *Od.* x, 37; and see *Psa.* lxi, 23), and denoting especially a table spread with food (*Judg.* i, 7; 1 Sam. xx, 29, 34; 1 Kings v, 7; x, 5; Job xxxvi, 16; Neh. v, 17); but spoken likewise of the *table of shew-bread* (see below), and likewise of the *lectisternia* prepared before idols (*Isa.* xlv, 11; see Schumann, *De Lectisterniis in Sacro Cod.* [Lips. 1739]). For the "tables" of stone on which the Decalogue was engraved, see below. The word מִסְבָּה, *mesab*, a *divan* (q. v.), is once rendered "at table" (*Cant.* i, 12). See SITTING.

Little is known as to the form of tables among the Hebrews; but, as in other Oriental nations, they were probably not high. In *Exod.* xxv, 23, indeed, the table for the shew-bread is described as a cubit and a half in height; but the table of Herod's temple, as depicted on the arch of Titus at Rome, is only half a cubit high. Probably the table of the ancient Hebrews differed little from that of the modern Arabs, namely, a piece of skin or leather spread upon the ground (hence the figure of entanglement in it, *Psa.* lxi, 23). In Palestine, at the present day, the general custom, even of the better classes, is to bring a polygonal stool (*kursi*), about fourteen inches high, into the common sitting-room for meals. Upon this is placed a tray (*seniyeh*) of basket-work or of metal, generally copper, on which the food is arranged. These two pieces of furniture together compose the table (*sūfrah*). The bread lies upon the mat beneath the tray, and a cruse of water stands near by, from which all drink as they have need. On formal occasions, this is held in the hand by a servant, who waits upon the guests. Around this stool and tray the guests gather, sitting on the floor (Thomson, *Land and Book*, i, 180). See EATING.

Modern Oriental Table and Tray for Eating.

Among the ancient Egyptians, the table was much the same as that of the present day in Egypt, a small stool, supporting a round tray, on which the dishes are placed (see Lane, *Mod. Eg.* i, 190); but it differed from this in having its circular summit fixed on a pillar, or leg, which was often in the form of a man, generally a captive, who supported the slab upon his head, the whole being of stone or some hard wood. On this the

Ancient Egyptian Table brought in with the Dishes upon it.

dishes were placed, together with loaves of bread, some of which were not unlike those of the present day in Egypt, flat and round, as our crumpets. Others had the form of rolls or cakes, sprinkled with seeds. The table was not generally covered with any linen, but, like the Greek table, was washed with a sponge, or napkin, after the dishes were removed, and polished by the servants, when the company had retired; though an instance sometimes occurs of a napkin spread on it, at least on those which bore offerings in honor of the dead. One or two guests generally sat at a table, though, from the mention of persons seated in rows according to rank, it has been supposed the tables were occasionally of a long shape; as may have been the case when the brethren of Joseph "sat before him, the first-born according to his birthright, and the youngest according to his youth," Joseph eating alone at another table where "they set on for him by himself." But even if round, they might still sit according to rank, one place being always the post of honor, even at the present day, at the round table of Egypt (Wilkinson, *Anc. Egypt.* i, 179). See DINE.

The tables of the ancient Assyrians, as delineated upon the monuments, were often of a highly ornamental character (Layard, *Nineveh*, ii, 236; Botta, *Nineveh*, p. 188). See BANQUET.

For the *triclinium* of the Roman period, see ACCUBATION; SUP.

Other Greek words than *τράπεζα* above (which likewise denotes occasionally a broker's counter [see MONEY-CHANGER], not to mention *ἀνακείμεναι*, etc., often rendered "sit at table"), which are translated "table" in the A. V. in a different sense, are:

κλίνη (Mark vii, 4), a *bed* (as elsewhere rendered), or couch used for eating, i. e. the *triclinium* above noticed; and πλάξ (2 Cor. iii, 3; Heb. ix, 4), a *tablet* for inscription; more fully *πινακίδιον*, a *writing-table* (Luke i, 63). See TABLE OF THE LAW.

**TABLE** (לִּיחָ, *luach*, a *tablet*, whether of stone [as below], wood ["board," *Exod.* xxvii, 8, etc.], or for writing on [Isa. xxx, 8; Hab. viii, 9; Prov. iii, 3]) OF THE LAW (only plur. in the phrases "tables of stone" [לִּיחֵי אֲבֹתֵינוּ, *Exod.* xxiv, 12; xxxi, 18; or לִּיחֵי הַבְּרִית, *Exod.* xxxiv, 1, 4], and "tables of the covenant" [Deut. ix, 15] or "of the testimony" [*Exod.* xxxi, 18]), such as those that were given to Moses upon Mount Sinai, being written by the finger of God, and containing the Decalogue, or Ten Commandments of the law, as they are rehearsed in *Exod.* xx. Many idle questions have been started about these tables; about their matter, their form, their number, who wrote them, and what they contained. The words which intimate that the tables were written by the finger of God, some understand simply and literally; others, of the ministry of an angel; and others explain merely to signify an order of God to Moses to write them. The expression, however, in Scripture always signifies the immediate Divine agency. See WAL-

ther, *De Duabus Tabulis Lapideis* (Regiom. 1679); Michaelis, *De Tab. Fed. Prioribus* (Vitemb. 1719).

TABLE, the name given to the supreme ecclesiastical court of the Waldensian Church (q. v.).

TABLE, CREDESCENCE, a small side-table, commonly placed on the south side of the altar, for the altar breads, cruets of wine and water, offertory dish, service-books, lavabo dish, and other things necessary for the solemn or low celebration of the holy eucharist. See CREDESCENCE-TABLE.

TABLE, HOLY. 1. The Lord's table or altar. 2. A frontal to an altar; e. g. one given to Glastonbury in 1071, made of gold, silver, and ivory, and one at St. Alban's in the 12th century. 3. The mensa, the upper stone altar-slab. 4. Pensilis, containing the names of benefactors, registers of miracles, a list of indulgences, and the course of officiants, officiating clergy at the hours, and celebrants of masses.

TABLE OF COMMANDMENTS, a representation of the two tables of stone on which the Commandments were graven, ordered by a post-Reformation canon to be placed on the east wall of the church or chancel.

TABLE OF DEGREES, a formal list of relationships, both by blood and affinity, within which degrees the Church of England authoritatively prohibits marriage. This table, usually printed at the end of the Anglican Prayer-book, is ordered to be hung up in a prominent place in the nave of every church or chapel, by the authority of various visitation articles, especially those of archbishop Parker in 1563. See AFFINITY.

TABLE OF (MOVABLE) FEASTS, a list of movable festivals prefixed to the Book of Common Prayer for the guidance and instruction of both clergy and laity.

TABLE OF LESSONS. A tabular arrangement of Scripture lessons for matins and evensong, daily arranged throughout the year. This table was first drawn up in 1549, altered in the revision of 1661, and again amended by Convocation in 1870.

TABLE OF THE LORD, a phrase taken from Scripture, used to designate the holy table, or altar, of the Christian Church (1 Cor. x, 21). In the Old Test. the words table and altar appear to have been applied indifferently to the same thing (Ezek. xli, 22). Among other terms which have been used to designate the Lord's table, it is obvious to mention the word "altar" as having been so employed: it is a term, however, which, though it may easily be borrowed in a figurative sense from the ancient Scriptures, is neither found in the New Test. in the sense now referred to, nor has it the sanction of the Church. In the first Prayer-book of king Edward VI, published in 1549, which may be considered as a connecting link between the Missal and our present Prayer-book, the word "altar" occurs in the Communion Service at least three times: but in the service of 1552 (the second Prayer-book of Edward VI) it is in every instance struck out; and if another expression is used in place of it, that expression is *The Lord's Table*. This circumstance is the more worthy of remark, because wherever in the older of these books the phrase "God's Board" was adopted as descriptive of "the Lord's Table" it was allowed to remain. See ALTAR.

TABLE OF PROTHESIS. See CREDESCENCE-TABLE.

TABLE OF SECRETS, a piece of paper placed at the foot of the cross on the altar, and containing the part of the service the priest is to say while turned to the altar, so that he need not turn to look on his book. This is placed upon pasteboard or thin wood, and richly framed. —Migne, *Encyclop. Théologique*, s. v.

TABLE OF SHEW-BREAD (שֻׁלְחַן הַפָּנִים, *table of the faces*, Numb. iv, 7; שֻׁלְחַן הַמִּצְבֵּיחַ, *table of the arrangement*, 1 Chron. xxviii, 16; שֻׁלְחַן הַטָּהוֹר, *the pure table*, Lev. xxiv, 6; 2 Chron. xiii, 11; Sept. ἡ ῥάπεζα

τῆς προθήσεως), one of the pieces of furniture in the Mosaic tabernacle (Exod. xxv, 23 sq.; xxxvii, 10 sq.), in Solomon's Temple (1 Kings vii, 48; comp. 2 Chron. xxix, 18), in its restoration by Zerubbabel (1 Macc. i, 22), and in Herod's reconstruction of that edifice (Josephus, *War*, vii, 5, 5). It stood in the outer apartment or holy place, on the right hand or north side, and was made of acacia (shittim) wood, two cubits long, one broad, and one and a half high, and covered with laminae of gold. According to the Mishna (*Menach. xi, 5*), it was ten handbreadths long and five wide; other traditions make it twelve handbreadths long and six wide. The top of the leaf of this table was encircled by a border or rim (רֵיךְ, a crown or wreath) of gold. The frame of the table, immediately below the leaf, was encircled with a piece of wood of about four inches in breadth, around the edge of which was a rim or border (מִסְבָּחָה, a margin) similar to that around the leaf. A little lower down, but at equal distances from the top of the table, there were four rings of gold fastened to the legs, through which staves covered with gold were inserted for the purpose of carrying it (Exod. xxv, 23-28; xxxvii, 10-16). The description of Josephus, which is quite minute, varies in several particulars (*Ant. iii, 6, 6*). These rings were not found in the table which was afterwards made for the Temple, nor indeed in any of the sacred furniture, where they had previously been, except in the ark of the covenant. Twelve unleavened loaves were placed upon this table, which were sprinkled with frankincense (the Sept. adds salt; Lev. xxiv, 7). The number twelve represented the twelve tribes, and was not diminished after the defection of ten of the tribes from the worship of God in his sanctuary, because the covenant with the sons of Abraham was not formally abrogated, and because there were still many true Israelites among the apostatizing tribes. The twelve loaves were also a constant record against them, and served as a standing testimonial that their proper place was before the forsaken altar of Jehovah (see Philo, *Opp. ii, 151*; Clem. Alex. *Strom. vi, 279*).

Wine also was placed upon the table of shew-bread in bowls, some larger, כַּסְיֹת, and some smaller, כַּפְסֹת; also in vessels that were covered, קַשְׂיוֹת, and in cups, מִנְקִיּוֹת, which were probably employed in pouring in and taking out the wine from the other vessels, or in making libations. Gesenius calls them "patere libatoria;" and they appear in the A. V. as "spoons." Some of them were perhaps for incense (בִּזְכִּיכֵי לִבְנִינָה, Mishna, *Yoma, v, 1*). See generally Exod. xxv, 29, 30; xxxvii, 10-16; xl, 4, 24; Lev. xxiv, 5-9; Numb. iv, 7.

The fate of the original table of shew-bread is unknown. It was probably transferred by David (if it then still existed) to his temporary sanctuary on Mt. Zion, and thence by Solomon to his sumptuous Temple. With the other articles of sacred furniture, it was carried away by the Babylonians, and possibly in like manner restored after the Captivity. Antiochus Epiphanes spoiled the second Temple of this as well as of its other treasures (1 Macc. i, 23), and hence on the Macabean restoration a new one was made (iv, 49). According to Josephus, it was reconstructed in a most elaborate and costly manner at the expense of Ptolemy Philadelphus (*Ant. xii, 2, 9*, where the description is very detailed). The same historian again describes more briefly the Herodian shew-bread table, which was carried away by the Romans (*War, vii, 5, 5*), and was deposited by Vespasian in his newly erected Temple of Peace at Rome (*ibid. vii, 5, 7*), where it survived the burning of that building under Commodus (Herodian, i, 14), and in the middle of the 5th century was taken by the Vandals under Genseric to Africa (Cedren. *Compend. i, 346*). It is said to have been rescued by Belisarius (A.D. 520), and sent to Constantinople, whence it was finally remitted to Jerusalem (Procopius, *Vandal. xi, 9*). The only authentic representation of this in-

Various Restorations of the Table of Shew-bread.

1. Traditional form according to Kiepert; 2. According to Paine; 3. According to Soltau; 4. According to Neumann; 5. According to Riggenbach.

interesting article extant is that upon the arch of Titus at Rome [see SHEW-BREAD], which was carefully delineated and described by Reland (*De Spoliis Templi* [Fr. ad Rh. 1716], c. 6-9) when it seems to have been in a better state of preservation than at present. See, generally, Schlichter, *De Mensa Facierum* (Hal. 1738; also in Uggolini, *Thesaur.* x); Witsius, *Miscell. Sacr.* i, 336; Carpov, *Appar. Crit.* p. 278; Bähr, *Symbol. d. mos. Cultus*, i, 435; Friederich, *Symbol. d. mos. Stiftshütte*, p. 170; Keil, *Tempel Sal.* p. 109; Paine, *The Tabernacle and the Temple* (Bost. 1861), p. 11; Neumann, *Die Stiftshütte*, etc. (Leips. 1861), p. 135; Riggenbach, *Die mos. Stiftshütte* (Basel, 1867), p. 37; Soltau, *Vessels of the Tabernacle* (Lond. 1873), p. 17-28. See TABERNACLE; TEMPLE.

**TABLE OF SUCCESSION.** A list of the successors of St. Peter made by Eusebius. He acknowledged that there was great difficulty in procuring information, and his account appears to have been compiled chiefly from reports or traditions. Of his fidelity he has given proof, by leaving vacancies in his conjectural list, when he had no light to guide him. These vacancies were subsequently filled up by Nicephorus, Callistus, and Simon the Metaphrast (see Elliott, *Delineation of Romanism*, p. 498). See SUCCESSION.

**Table-tomb,** a tomb shaped like a table or altar, erected over a grave or place of interment. See TOMB.

**Table-turning.** See SPIRITUALISM.

**Tablet** is the inaccurate rendering in the A. V. of two Heb. words designating some kind of female ornament: 1. כִּמְזָז, *kumáz* (so called, according to Gesen., from the *globular* form; but, according to Furst, a *locket*

or clasp; Sept. ἐμπλόκια καὶ περιδίσια, Vulg. *dextralia*, in Exod. xxxv, 22; ἐμπλόκιον, *myrenula*, in Numb. xxxi, 50), probably *drops* hung like beads in a string around the neck or arm, as described by ancient authors on Arabia (Diod. Sic. iii, 44, 50; Strabo, xvi, 277).

2. בֵּית הַנֶּפֶשׁ, *bottey' han-ne'phesh*, *houses of the soul* (Isa. iii, 20, Sept. δακτύλιοι, Vulg. *olfactoriola*), i. e. *perfume-bottles* of essences or smelling-salts kept in lockets suspended about the person. See ORNAMENT.

**TABLET, MEMORIAL.** A tablet placed on the floor of a church or cloister, inscribed with a legend in memory of some person deceased.

**TABLET, MURAL.** A tablet on which an inscription has been placed, affixed to the wall of a church or cloister.

**Ta'bor** (Heb. *Tabór*, תָּבוֹר, a *mound*), the name of three spots in Palestine, all closely related to each other, if not indeed actually identical. See also AZNOTH-TABOR; CHISLOTH-TABOR.

1. **MOUNT TABOR** (Sept. Γαββώρ [v. r. Ταβώρ], *ḡros* Θαβώρ, *ḡabwár*, but *ṛō* Ἰταβύριον in Jer. and Hosea, and in Josephus [*Ant.* v, 5, 3; *War.* iv, 1, 1, etc.], who has also Ἀραβύριον, as in Polybius, v, 70, 6; Vulg. *Thabor*), a mountain (תָּבוֹר, Judg. iv, 6, 12, 14, elsewhere without this epithet, Josh. xix, 22, Judg. viii, 18; Psa. lxxxix, 12; Jer. xlii, 18; Hos. v, 1), one of the most interesting and remarkable of the single mountains in Palestine. It was a Rabbinic saying (and shows the Jewish estimate of the attractions of the locality) that the Temple ought of right to have been built here, but was required by an express revelation to be erected on Mount Moriah.

Mount Tabor, from the West. (From a photograph.)

1. *Description.*—Mount Tabor rises abruptly from the north-eastern arm of the plain of Esdraelon, and stands entirely insulated, except on the west, where a narrow ridge connects it with the hills of Nazareth. It presents to the eye, as seen from a distance, a beautiful appearance, being so symmetrical in its proportions, and rounded off like a hemisphere or the segment of a circle, yet varying somewhat as viewed from different directions, being more conical when seen from the east or west. The body of the mountain consists of the peculiar limestone of the country. It is studded with a comparatively dense forest of oaks, pistacias, and other trees and bushes, with the exception of an occasional opening on the sides and a small uneven tract on the summit. The coverts afford at present a shelter for wolves, wild boars, lynxes, and various reptiles. Its height is estimated at 1300 feet from the base, and 1865 from the sea-level (Tristram, *Land of Israel*, p. 498). Its ancient name, as already suggested, indicates its elevation, though it does not rise much, if at all, above some of the other summits in the vicinity. It is now called *Jebel et-Tûr*, a name which some have tried to identify with Tabor, as if it were a contraction. But *Jebel et-Tûr* means simply the "fort-hill," and is used to designate the Mount of Olives and Gerizim, as well as Tabor. It lies about six or eight miles almost due east from Nazareth. The ascent is usually made on the west side, near the little village of Debûrieh, probably the ancient Daberath (Josh. xix, 12), though it can be made with entire ease in other places. It requires three quarters of an hour or an hour to reach the top. The path is circuitous and at times steep, but not so much so as to render it difficult to ride the entire way. The trees and bushes are generally so thick as to intercept the prospect; but now and then the traveller as he ascends comes to an open spot which reveals to him a magnificent view of the plain. One of the most pleasing aspects of the landscape, as seen from such points, in the season of the early harvest, is that presented in the diversified appearance of the fields. The different plots of ground exhibit various colors, according to the state of cultivation at the time. Some of them are red, where the land has been newly ploughed up, owing to the natural properties of the soil; others yellow or white,

where the harvest is beginning to ripen or is already ripe; and others green, being covered with grass or springing grain. As they are contiguous to each other, or intermixed, these parti-colored plots present, as looked down upon from above, an appearance of gay checkered work which is singularly beautiful. The top of Tabor consists of an irregular platform, half a mile long by three quarters wide, embracing a circuit of half an hour's walk and commanding wide views of the sub-jacent plain from end to end. A copious dew falls here during the warm months. Travellers who have spent the night there have found their tents as wet in the morning as if they had been drenched with rain.

It is the universal judgment of those who have stood on the spot, that the panorama spread before them as they look from Tabor includes as great a variety of objects of natural beauty and of sacred and historic interest as any one to be seen from any position in the Holy Land. On the east the waters of the Sea of Tiberias, not less than fifteen miles

distant, are seen glittering through the clear atmosphere in the deep bed where they repose so quietly. Though but a small portion of the surface of the lake can be distinguished, the entire outline of its basin can be traced on every side. In the same direction the eye follows the course of the Jordan for many miles, while still farther east it rests upon a boundless perspective of hills and valleys, embracing the modern Haurân, and farther south the mountains of the ancient Gilead and Bashan. The dark line which skirts the horizon on the west is the Mediterranean; the rich plains of Galilee fill up the intermediate space as far as the foot of Tabor. The ridge of Carmel lifts its head in the north-west, though the portion which lies directly on the sea is not distinctly visible. On the north and north-east we behold the last ranges of Lebanon as they rise into the hills about Safed, overtopped in the rear by the snow-capped Hermon, and still nearer to us the Horns of Hattin, the reputed Mount of the Beatitudes. On the south are seen, first the summits of Gilboa, which David's touching elegy on Saul and Jonathan has fixed forever in the memory of mankind, and farther onward a confused view of the mountains and valleys which occupy the central part of Palestine. Over the heads of Dûhy and Gilboa the spectator looks into the valley of the Jordan in the neighborhood of Beisân (itself not within sight), the ancient Bethshean, on whose walls the Philistines hung up the headless trunk of Saul, after their victory over Israel. Looking across a branch of the plain of Esdraelon, we behold Endor, the abode of the sorceress whom the king consulted on the night before his fatal battle. Another little village clings to the hill-side of another ridge, on which we gaze with still deeper interest. It is Nain, the village of that name in the New Test., where the Saviour touched the bier and restored to life the widow's son. The Saviour must have often passed at the foot of this mount in the course of his journeys in different parts of Galilee. It is not surprising that the Hebrews looked up with so much admiration to this glorious work of the Creator's hand. The same beauty rests upon its brow to-day, the same richness of verdure refreshes the eye, in contrast with the bald aspect of so many of the adjacent mountains. The Christian traveller yields spontaneously to the impression of wonder and devo-

tion, and appropriates as his own the language of the psalmist (lxxxix, 11, 12)—

"The heavens are thine, the earth also is thine;  
The world and the fulness thereof, thou hast founded them.  
The north and the south thou hast created them;  
Tabor and Hermon shall rejoice in thy name."

2. *History.*—Tabor is not expressly mentioned in the New Test., but makes a prominent figure in the Old. The book of Joshua (xix, 22) names it as the boundary between Issachar and Zebulun (see ver. 12). Barak, at the command of Deborah, assembled his forces on Tabor, and, on the arrival of the opportune moment, descended thence with "ten thousand men after him" into the plain, and conquered Sisera on the banks of the Kishon (Judg. iv, 6-15). The brothers of Gideon, each of whom "resembled the children of a king," were murdered here by Zebah and Zalmunna (viii, 18, 19). Some writers, after Herder and others, think that Tabor is intended when it is said of Issachar and Zebulun in Deut. xxxiii, 19, that "they shall call the people unto the mountain; there they shall offer sacrifices of righteousness." Stanley, who holds this view (*Sinai and Palestine*, p. 351), remarks that he was struck with the aspect of the open glades on the summit as specially fitted for the convocation of festive assemblies, and could well believe that in some remote age it may have been a sanctuary of the northern tribes, if not of the whole nation. The prophet in Hos. v, 1 reproaches the priests and royal family with having "been a snare on Mizpah and a net spread upon Tabor." The charge against them probably is that they had set up idols and practiced heathenish rites on the high places which were usually selected for such worship. The comparison in Jer. xlv, 18, "As Tabor is among the mountains and Carmel by the sea," imports apparently that those heights were proverbial for their conspicuousness, beauty, and strength.

After the close of Old-Test. history, Tabor continued to be a strong fortress. In the year B.C. 218, Antiochus the Great got possession of it by stratagem and strengthened its fortifications. The town existed on the summit in New-Test. times, but the defences had fallen into decay, and Josephus caused them to be rebuilt (*War*, iv, 1, 8).

3. *Present Condition.*—Dr. Robinson (*Bibl. Res.* ii, 358) has thus described the ruins which are to be seen at present on the summit of Tabor: "All around the top are the foundations of a thick wall built of large stones, some of which are bevelled, showing that the entire wall was perhaps originally of that character. In several parts are the remains of towers and bastions. The chief remains are upon the ledge of rocks on the south of the little basin, and especially towards its eastern end; here are, in indiscriminate confusion, walls and arches and foundations, apparently of dwelling-houses, as well as other buildings, some of hewn, and some of large bevelled stones. The walls and traces of a fortress are seen here, and farther west along the southern brow, of which one tall pointed arch of a Saracenic gateway is still standing, and bears the name of Bâb el-Hawa, 'Gate of the Wind.' Connected with it are loopholes, and others are seen near by. These latter fortifications belong to the era of the Crusades; but the large bevelled stones we refer to a style of architecture not later than the times of the Romans, before which period, indeed, a town and fortress already existed on Mount Tabor. In the days of the Crusaders, too, and earlier, there were here churches and monasteries. The summit has many cisterns, now mostly dry." The same writer found the thermometer here, 10 A.M. (June 18), at 98° Fahr., at sunrise at 64°, and at sunset at 74°. The Latin Christians have now an altar here, at which their priests from Nazareth perform an annual mass. The Greeks also have a chapel, where, on certain festivals, they assemble for the celebration of religious rites. Stanley, in his *Notices of Localities Visited with the*

*Prince of Wales*, remarks, "The fortress, of which the ruins crown the summit, had evidently four gateways, like those by which the great Roman camps of our own country were entered. By one of these gateways my attention was called to an Arabic inscription, said to be the only one on the mountain." It records the building or rebuilding of "this blessed fortress" by the order of the sultan Abu-Bekr on his return from the East A.H. 607. In 1873 the monks began the construction of a convent on the north-east brow of the mountain.

4. *Traditional Importance.*—In the monastic ages, Tabor, in consequence partly of a belief that it was the scene of the Saviour's transfiguration, was crowded with hermits. It was one of the shrines from the earliest period which pilgrims to the Holy Land regarded as a sacred duty to honor with their presence and their prayers. Jerome, in his *Itinerary of Paula*, writes, "Scandebat montem Thabor, in quo transfiguratus est Dominus; aspicebat procul Hermon et Hermonim et campos latissimos Galilæe (Jesreel), in quibus Sisara prostratus est. Torrens Cison qui mediam planitiem dividebat, et oppidum juxta, Naim, monstrabantur." This idea that our Saviour was transfigured on Tabor prevailed extensively among the early Christians (see Robinson, *Bibl. Res.* ii, 358 sq.), who adopted legends of this nature, and often reappears still in popular religious works. If one might choose a place which he would deem peculiarly fitting for so sublime a transaction, there is certainly none which would so entirely satisfy our feelings in this respect as the lofty, majestic, beautiful Tabor. It has been thought difficult, however, to acquiesce in the correctness of this opinion. The summit of Tabor appears to have been occupied by a town as early as the time when the Israelites took possession of the country (Josh. xix, 22). Indeed, such a strong position would scarcely be left unoccupied in those stormy times of Syria's history. Accordingly, as above seen, it is susceptible of proof from the Old Test., and from later history, that a fortress or town existed on Tabor from very early times down to B.C. 60 or 58; and, as Josephus says that he strengthened the fortifications of a city there, about A.D. 60, it is certain that Tabor must have been inhabited during the intervening period, that is, in the days of Christ (comp. Polybius, v, 70, 6; Josephus, *Ant.* xiv, 6, 3; *War*, ii, 20, 1; iv, 1, 8; *Life*, § 37). But as in the account of the transfiguration it is said that Jesus took his disciples "up into a high mountain apart and was transfigured before them" (Matt. xvii, 1, 2), we must understand that he brought them to the summit of the mountain, where they were alone by themselves (*κατ' ἑαυτῶν*). Yet it is not probable that the whole mountain was occupied by edifices, and it is quite possible that a solitary spot might have been found amid its groves, where the scene could have taken place unobserved. The event has, indeed, been referred by many to Mount Hermon, on the ground that our Lord's miracle immediately preceding was at Cæsarea-Philippi; but the interval of a whole week ("six days," Matt. xvii, 1, Mark ix, 2, "eight days," Luke ix, 28) decidedly favors the idea of a considerable journey in the interval. See TRANSFIGURATION.

Some Church traditions have given also to Tabor the honor of being Melchizedek's hill, from which he came forth to greet Abraham, so that here is another king's dale, rivaling that at Gerizim, if tradition is to be followed. The whole legend will be found at full length in Athanasius (*Opp.* ii, 7 [Colon. 1686]). That father tells us that Salem, the mother of Melchizedek, ordered him to go to Tabor. He went, and remained seven years in the wood naked, till his back became like a snail's shell.

The mountain has been visited and described by multitudes of travellers, especially (in addition to those named above) Russegger (*Reis.* iii, 258), Hasselquist (*Voyage*, p. 179), Volney (*Voyage*, ii, 272), Schubert (*Morgenl.* iii, 175), Burckhardt (*Syria*, p. 332), Stephens (*Travels*, ii, 317), Nugent [lord] (*Lands*, etc., ii, 198);

see also Reland, *Palæst.* p. 334; Hackett, *Illustr. of Script.* p. 304; Thomson, *Land and Book*, ii, 136; Porter, *Handb.* p. 401; Bâdeker, *Palæst.* p. 364; Ridgeway, *The Lord's Land*, p. 371.

2. THE PLAIN (or rather OAK) OF TABOR (תְּבוֹר; תְּבוֹרִי; Sept. ἡ δὲ περὶ Θαβώρ; Vulg. *Quercus Thabor*) is mentioned only in 1 Sam. x, 3 as one of the points in the homeward journey of Saul after his anointing by Samuel. It was the next stage in the journey after "Rachel's sepulchre at Zelzah." But, unfortunately, like so many of the other spots named in this interesting passage, the position of the Oak of Tabor has not yet been fixed. See SAUL. Ewald seems to consider it certain (*gewiss*) that Tabor and Deborah are merely different modes of pronouncing the same name, and he accordingly identifies the oak of Tabor with the tree under which Deborah, Rachel's nurse, was buried (Gen. xxxv, 8), and that again with the palm under which Deborah the prophetess delivered her oracles (*Gesch.* i, 390; ii, 489; iii, 29), and this again with the Oak of the old Prophet near Beth-el (*ibid.* iii, 444). But this, though most ingenious, can only be received as a conjecture, and the position on which it would land us—"between Ramah and Bethel" (Judg. iv, 5)—is too far from Rachel's sepulchre to fall in with the conditions of the narrative of Saul's journey, so long as we hold that to be the traditional sepulchre near Bethlehem. We can only determine that it lay somewhere between Bethlehem and Bethel, but why it received the epithet "Tabor" it is impossible to discover. Yet we see from the names Chisloth-Tabor and Aznoth-Tabor that the mountain gave adjunct titles to places at a considerable distance. See ZELZAH.

3. THE CITY OF TABOR (Sept. Θαβώρ v. r. Θαχχία; Vulg. *Thabor*) is mentioned in the lists of 1 Chron. vi as a city of the Merarite Levites, in the tribe of Zebulun (ver. 77). The catalogue of Levitical cities in Josh. xxi does not contain any name answering to this (comp. ver. 34, 35). But the list of the towns of Zebulun (ch. xix) contains the name of CHISLOTH-TABOR (ver. 12). It is therefore possible either that this last name is abbreviated into Tabor by the chronicler, or (which is less likely) that by the time these later lists were compiled the Merarites had established themselves on the sacred mountain, and that the place in question is Mount Tabor.

**Taborites**, a section of the Hussites, the other being known as the Calixtines. The Taborites were so called from the fortified city of Tabor, erected on a mountain, in the circle of Bechin, in Bohemia, which had been consecrated by the field-preaching of Huss. The gentle and pious mind of that martyr never could have anticipated, far less approved, the terrible revenge which his Bohemian adherents took upon the emperor, the empire, and the clergy, in one of the most dreadful and bloody wars ever known. The Hussites commenced their vengeance after the death of king Wenceslaus, Aug. 16, 1419, by the destruction of the convents and churches, on which occasions many of the priests and monks were murdered. John Ziska, a Bohemian knight, formed a numerous, well-mounted, and disciplined army, which built Tabor, as above described, and rendered it an impregnable depot and place of defence. He was called *Ziska of the Cup*, because one great point for which the Hussites contended was the use of the cup by the laity in the sacrament. At his death, in 1424, the immense mass of people whom he had collected fell to pieces; but under Procopius, who succeeded Ziska as general, the Hussites again rallied, and gained decisive victories over the imperial armies in 1427 and 1431. After this, as all parties were desirous of coming to terms of peace, the Council of Basle interposed, and a compromise was made; but hostilities again broke out in 1434, when the Taborites gained a complete victory. Owing, however, to the treachery of Sigismund, whom they had aided in ascending the

throne, they were much weakened; and from this time they abstained from warfare, and maintained their disputes with the Catholics only in the deliberations of the diet and in theological controversial writings, by means of which their creed acquired a purity and completeness that made it similar in many respects to the Protestant confessions of the 16th century. Encroachments were gradually made on their religious freedom, and they continued to suffer until they gradually merged into the BOHEMIAN BRETHREN (q. v.). See Bezezyrna, in Ludwig, *Reliq. MSS.* vi, 142, 186; Æneas Sylvius, *Hist. Bohem.* epist. 130.

**Tabret** (a contraction of *taboret*, for "taboring" [see TABER]) is the rendering in the A. V. of the two kindred words תֶּרֶף, *tôph* (Gen. xxxi, 27; 1 Sam. x, 5; xviii, 6; Isa. v, 12; xxiv, 8; xxx, 32; Jer. xxxi, 4;

Modern Oriental Instruments of the Drum kind.

Ezek. xxviii, 13; elsewhere "timbrel") and תֶּרֶף, *tôpheth* (Job xvii, 6), which both mean a musical instrument of the *drum* kind (from תֶּרֶף, *to beat*). This sort of music has always been in great request, both in classical and sacred scenes, especially on festive occasions. See MUSICAL INSTRUMENTS. Especially has that form of the drum known as the *tambourine* been in vogue, particularly for female performers. See TIMBREL.

Tambourine Players (from Herculaneum).

**Tab'rimon** (Heb. *Tabrinmon'*, תַּבְרִימון, *good is Rimmon*; Sept. Ταβριμόν v. r. Ταβριμανία; Vulg. *Tabrimon*), the father of Benhadad I, king of Syria in the reign of Asa (1 Kings xv, 18). B.C. ante 928. The name is in honor of the Syrian god (comp. the analogous forms Tobiel, Tobiah, and the Phœnician Tabaram [Gesenius, *Mon. Phœn.* p. 456]). See RIMMON.

**Tabŭla Clericōrum**, the catalogue of the clergy so called by Augustine.

**Tabŭla Dei**, a Latin term for the TABLE OF THE LORD (q. v.).

**Tabŭla Eucharistiæ**, the Christian altar.

**Tabŭla Pa-**  
**cis** (*tablet of*  
*peace*), a term ap-  
plied to the OSCU-  
LATORIUM (q. v.),  
an ornament by  
which the kiss of  
peace was given  
to the faithful in  
mediæval times.

Tabula Pacis, or Osculatorium.

**Tachash.** See BADGER.

**Tache** (תָּכֵחַ, *kéres*; Sept. *κρίκος*; Vulg. *circulus*, *fibula*). The word thus rendered occurs only in the description of the structure of the tabernacle and its fittings (Exod. xxvi, 6, 11, 33; xxxv, 11; xxxvi, 13; xxxix, 33), and has usually been thought to indicate the small hooks by which a curtain is suspended to the rings whereon it hangs, or connected vertically, as in the case of the vail of the Holy of Holies, with the loops of another curtain. The history of the English word is philologically interesting, as presenting points of contact with many different languages. The Gaelic and Breton branches of the Celtic family give *tac*, or *tach*, in the sense of a nail or hook. The latter meaning appears in the *attaccare*, *staccare*, of Italian; in the *attacher*, *détacher*, of French. On the other hand, in the *tak* of Dutch, and the *Zacke* of German, we have a word of like sound and kindred meaning. Our Anglo-Saxon *taccan* and English *take* (to seize as with a hook?) are probably connected with it. In later use the word has slightly altered both its form and meaning, and the *tack* is no longer a hook, but a small flat-headed nail (comp. Diez, *Roman. Wörterb.* s. v. "Tacco").

The philological relations of the Hebrew word are likewise interesting. It comes from the obscure root תָּכַח, *karás*, which occurs only in Isa. xli, 1 ("stoop-eth," Sept. *συμπεριβη*; Vulg. *contritus est*) as a synonym of קָרַע ("boweth down") in the parallel hemistich, and is therefore understood by Gesenius and Ffurst to signify to bend, or by Mühlau to be round (like קָרַר). The only derivatives, besides the proper name *Kiros* (קִירוֹס, Neh. vii, 47) or *Keros* (קִירוֹס, Ezra ii, 44), are the term in question and תָּכֵסֶל, *karsól*, the ankle (occurring only in

Natural type (2) of the "tache" or *kéres* (3) in the "ankle" or *karsól* (1).

As the loops are explicitly stated to have been in the selvage of the curtains, the "taches," if meant as hooks to join them edgewise, would present the appearance in the annexed cut, which is substantially the representation of those interpreters who have adopted this idea. Now, to say nothing for the present of the gap thus left in the roof, we find that these "taches," being exactly fifty for each set of "curtains," bear no special numerical relation to the general size of the curtains themselves, the edges so joined being in one case thirty and in the other twenty-eight cubits long; whereas all the other numbers and dimensions about the building have definite proportions to each other. Nor, if the sixth or extra breadth of the goats'-hair cloth was sewed in the ordinary way like the other five, can we divine any good reason for resorting to this singular method of joining the remaining selvages.

There are other and still graver difficulties in the ordinary plan of connecting these sheets, which would immediately be revealed in the actual attempt at reconstruction, and will be anticipated by any one familiar with tent architecture.

(a.) The "vail" hung exactly under the "taches" (Exod. xxvi, 33). But as the colored sheets (which of course must have been innermost) were each twenty cubits wide and twenty-eight cubits long, if they were spread thus combined over the ridge-pole, the suture between them which these "hooks" formed could in no case have well tallied with this position: had they been stretched lengthwise of the building (as their close correspondence in length would indicate), the joint also would have been in the same direction, i. e. at right angles with the line of the vail; if crosswise of the building (as both Riggensbach and Fergusson suppose), then the line of the suture and that of the "vail" could only have coincided on the supposition that the entire extra ten cubits' breadth of the embroidered "curtains" was thrown outside the rear of the edifice, where it would be utterly useless and exposed to the weather. Nor could the requirements of the text cited be met by using these colored sheets singly in this manner: not longitudinally for the same reason as before; not transversely, for then their breadth would not cover both the apartments.

(b.) The goats'-hair sheets, if combined by such a contrivance as an S hook, would be equally impracticable: placed longitudinally on the ridge (as their length would emphatically indicate by this second repetition of the thirty cubits), they would certainly leak intolerably at the joint, unless this were brought exactly at the peak, which the odd number of the "curtains" in this set (11) prevents; placed transversely, even in the most favorable manner (Fergusson's), so as to "break joints" with the suture in the sheets under them, they must (as a corollary from the above combination of the latter) have had their extra width (fourteen cubits) project wholly beyond the rear of the building, leaving nothing for a "porch" (which Fergusson imagines).

(c.) In any case it would have been a bad arrangement to make the suture in either set of roof canvas come exactly over so choice a piece of drapery as the "vail" was; for some drip must have been apprehended, or an embroidered lining (a delicate article with which to stop a leak) would not have been provided—to say nothing of Fergusson's idea that the sheep-skin and furbes may have been for the purpose of covering the joint! In short, the bare fact of leaving such a crack in the roof would have been an irremediable blunder, which it is strange that a professional architect should make. On Riggensbach's theory of a flat roof, all the rain would inevitably have poured through this crevice directly upon the vail. Jehovah planned better than this, we may be sure. See TABERNACLE.

**Tachmas.** See NIGHT-HAWK.

**Tach'monite** (Heb. [without the art.] *Tachke-moni*, תַּחֲמֹנִי; Sept. *ὁ Χανανῆος* v. r. *νὸς Θεμα-νί*; Vulg. *sapientissimus*). "The Tachmonite that sat in the seat," chief among David's captains (2 Sam. xxiii, 8), is in 1 Chron. xi, 11 called "Jashobeam a Hachmonite," or, as the margin gives it, "son of Hachmoni." The Geneva version has in 2 Sam. xxiii, 8, "He that sate in the seate of wisdom, being chiefe of the princes, was Adino of Ezni," regarding "Tachmonite" as an adjective derived from תָּכֵם, *chakám*, "wise," and in this derivation following Kimchi. Kennicott has shown,

The Tabernacle "Curtains" as joined by the "loops" and "taches," according to Riggensbach and Fergusson.

with much appearance of probability, that the words **יֹשֵׁב בַּשֵּׁכֶת**, *yoshéb bashshébeth*, "he that sat in the seat," are a corruption of *Jashobeam*, the true name of the hero, and that the mistake arose from an error of the transcriber, who carelessly inserted **בַּשֵּׁכֶת** from the previous verse where it occurs. He further considers "Tachmoni" a corruption of the appellation in Chronicles, "son of Hachmoni," which was the family or local name of Jashobeam. "The name here in Samuel was at first **דָּוִד־כְּמִנִּי**, the article **דָּ** at the beginning having been corrupted into a **ת**; for the word **בֵּן** in Chronicles is regularly supplied in Samuel by that article" (*Dissert.* p. 82). Therefore he concludes "Jashobeam the Hachmoni" to have been the true reading. Josephus (*Ant.* vii, 12, 4) calls him *Ἰάσσαμος υἱὸς Ἀχαιμίου*, which favors Kennicott's emendation. In these corrections Keil (*Comment.* ad loc.) concurs. See **HACHMONI**; **JASHOBEAM**.

**Tackling** is the rendering in the A. V. of *σκεπή*, which occurs only in Acts xxvii, 19, meaning the spars, ropes, chains, etc., of a vessel's furniture (as in Diod. Sic. xiv, 79; so of household movables, Polyb. ii, 6, 6; equipage, Xenoph. *Anab.* iv, 7, 27; Herodian, vi, 4, 11; warlike apparatus, Diod. Sic. xi, 71). See **SHIP**.

**Tacquet**, ANDREW, a Jesuit of Antwerp, known for his skill in the mathematical sciences, died in 1660. He published, among other things, a good treatise on astronomy, an edition of Euclid, etc. The prejudices of the times seem to have prevented him from more effectually defending the system of Copernicus. His collected works were published at Antwerp (1669, 1707, fol.).

**Tad'mor** (Heb. *Tadmôr*, תַּדְמֹר, prob. city of palms [see below]; Sept. *Θεδμόρ* v. *ρ. Θεοδμόρ*; Vulg. *Palmyra*), a city "in the wilderness" which Solomon is said to have built (1 Chron. viii, 4). In the nearly parallel passage (1 Kings ix, 18), where the phrase "in the land" is added to the description, indicating that this, like the associated cities, was within Solomon's legitimate jurisdiction, the reading "Tadmor" is adopted in the A. V. from the *Keri*, or margin; the *Kethib*, or text, has תַּמָּר, *Tamár* (Sept. *Θεράμα* v. *ρ. Θαμμόρ*; Vulg. *Palmyra*), which should probably be pointed תַּדְמֹר, by contraction for תַּדְמִר, or in imitation of the original תַּקְמִר, the palm-tree (see Keil, *Comment.* ad loc.). See **PALM**. The name would seem to indicate an abundance of date-palms anciently in that vicinity, although they are scarce in its present neglected state.

1. *Classical Identification*.—There is no reasonable doubt that this city is the same as the one known to the Greeks and Romans and to modern Europe by the name, in some form or other, of *Palmyra* (Παλμυρά, Παλμυρά, *Palmyra*). The identity of the two cities results from the following circumstances: (1.) The same city is specially mentioned by Josephus (*Ant.* viii, 6, 1) as bearing in his time the name of Tadmor among the Syrians, and Palmyra among the Greeks; and Jerome, in his Latin translation of the Old Test., translates Tadmor by *Palmyra* (2 Chron. viii, 4). (2.) The modern Arabic name of Palmyra is substantially the same as the Hebrew word, being *Tadmur*, or *Tathmur*. (3.) The word Tadmor has nearly the same meaning as *Palmyra*, signifying probably the "City of Palms," from Tamar, a palm; and this is confirmed by the Arabic word for Palma, a Spanish town on the Guadalquivir, which is said to be called Tadmtr (see Gesenius, in his *Thesaurus*, p. 345). (4.) The name Tadmor, or Tadmôr, actually occurs as the name of the city in Aramaic and Greek inscriptions which have been found there. (5.) In the Chronicles, the city is mentioned as having been built by Solomon after his conquest of Hamath-Zobah, and it is named in conjunction with "all the store-cities which he built in Hamath." This accords fully with the situation of Palmyra [see **HAMATH**]; and there is

no other known city, either in the desert or not in the desert, which can lay claim to the name of Tadmor.

2. *History*.—As above stated, Tadmor was built by Solomon, probably with the view of securing an interest in and command over the great caravan traffic from the East, similar to that which he had established in respect of the trade between Syria and Egypt. See this idea developed in Kitto's *Pictorial Bible* (note on 2 Chron. viii, 4), where it is shown at some length that the presence of water in this small oasis must early have made this a station for caravans coming west through the desert; and this circumstance probably dictated to Solomon the importance of founding here a garrison town, which would entitle him—in return for the protection he could give from the depredations of the Arabs, and for offering an intermediate station where the factors of the West might meet the merchants of the East—to a certain regulating power, and perhaps to some dues, to which they would find it more convenient to submit than to change the line of route. It is even possible that the Phœnicians, who took much interest in this important trade, pointed out to Solomon the advantage which he and his subjects might derive from the regulation and protection of it by building a fortified town in the quarter where it was exposed to the greatest danger. A most important indication in favor of these conjectures is found in the fact that all our information concerning Palmyra from heathen writers describes it as a city of merchants, who sold to the Western nations the products of India and Arabia, and who were so enriched by the traffic that the place became proverbial for luxury and wealth and for the expensive habits of its citizens.

We do not again read of Tadmor in Scripture, nor is it likely that the Hebrews retained possession of it long after the death of Solomon. No other source acquaints us with the subsequent history of the place, till it reappears in the account of Pliny (*Hist. Nat.* v, 24) as a considerable town, which, along with its territory, formed an independent state between the Roman and Parthian empires. Afterwards it was mentioned by Appian (*De Bell. Civ.* v, 9), in reference to a still earlier period of time, in connection with a design of Mark Antony to let his cavalry plunder it. The inhabitants are said to have withdrawn themselves and their effects to a strong position on the Euphrates, and the cavalry entered an empty city. In the 2d century it seems to have been beautified by the emperor Hadrian, as may be inferred from a statement of Stephanus of Byzantium as to the name of the city having been changed to *Hadrianopolis* (s. v. Παλμυρά). In the beginning of the 3d century it became a Roman colony under Caracalla (A.D. 211-217), and received the *jus Italicum*. From this period the influence and wealth of Palmyra rapidly increased. Though nominally subject to Rome, it had a government of its own, and was ruled by its own laws. The public affairs were directed by a senate chosen by the people; and most of its public monuments were built, as the inscriptions show, by "the senate and people." For nearly a century and a half this prosperity continued, and it was only checked at length by the pride it generated.

The story of the unfortunate Valerian is well known. Being captured by the Persians, his unworthy son did not use a single effort to release him from the hands of his conquerors. Odenathus, one of the citizens of Palmyra, revenged the wrongs of the fallen emperor, and vindicated the majesty of Rome. He marched against the Persians, took the province of Mesopotamia, and defied Sapor beneath the walls of Ctesiphon (A.D. 260). The services thus rendered to Rome were so great that Odenathus was associated in the sovereignty with Gallienus (A.D. 264). He enjoyed his dignity but a short period, being murdered by his nephew at a banquet in the city of Emesa only three years afterwards. His reign was brief, but brilliant. Not only was Sapor conquered and Valerian revenged, but Syrian rebels and

were taken (Rankin, *Wars of the Mongols*). Abulfeda, at the beginning of the 14th century (*Descript. Arab.* p. 98), speaks of Tadmor as merely a village, but celebrated for its ruins of old and magnificent edifices. These relics of ancient art and magnificence were scarcely known in Europe till towards the close of the 17th century. In the year 1678 some English merchants at Aleppo resolved to verify by actual inspection the reports concerning these ruins which existed in that place. The expedition was unfortunate, for they were plundered of everything by the Arabs, and returned with their object unaccomplished. A second expedition, in 1691, had better success; but the accounts which were brought back received little credit, as it seemed unlikely that a city which, according to their report, must have been so magnificent, should have been erected in the midst of deserts. When, however, in the year 1753, Robert Wood published the views and plans which had been taken with great accuracy on the spot two years before by Dawkins, the truth of the earlier accounts could no longer be doubted; and it appeared that neither Greece nor Italy could exhibit antiquities which, in point of splendor, could rival those of Palmyra. From that time it has frequently been visited by travellers, and it is now readily accessible by an excursion on camels from Damascus. Its ruins have often been described and delineated.

3. *Present Remains.*—Tadmor was situated between the Euphrates and Hamath, to the south-east of that city, in a fertile tract or oasis of the desert. Palmtrees are still found in the gardens around the town, but not in such numbers as would warrant, as they once did, the imposition of the name. The present Tadmor consists of numbers of peasants' mud-huts, clustered together around the relics of the great Temple of the Sun.

The ruins cover a sandy plain stretching along the bases of a range of mountains called Jebel Belaea, running nearly north and south, dividing the great desert from the desert plains extending westward towards Damascus and the north of Syria. The lower eminences of these mountains, bordering the ruins, are covered with numerous solitary square towers, the tombs of the ancient Palmyrenes, in which are found memorials similar to those of Egypt. They are seen to a great distance, and have a striking effect in this desert solitude. Be-

yond the valley which leads through these hills the ruined city first opens upon the view. The thousands of Corinthian columns of white marble, erect and fallen, and covering an extent of about a mile and a half, present an appearance which travellers compare to that of a forest. The site on which the city stands is slightly elevated above the level of the surrounding desert for a circumference of about ten miles, which the Arabs believe to coincide with the extent of the ancient city, as they find ancient remains whenever they dig within this space. There are, indeed, traces of an old wall, not more than three miles in circumference; but this was probably built by Justinian, at a time when Palmyra had lost its ancient importance and become a desolate place, and when it was consequently desirable to contract its bounds, so as to include only the more valuable portion. Volney well describes the general aspect which these ruins present: "In the space covered by these ruins we sometimes find a palace of which nothing remains but the court and walls; sometimes a temple whose peristyle is half thrown down; and now a portico, a gallery, or triumphal arch. Here stand groups of columns, whose symmetry is destroyed by the fall of many of them; there we see them ranged in rows of such length that, similar to rows of trees, they deceive the sight, and assume the appearance of continued walls. If from this striking scene we cast our eyes upon the ground, another, almost as varied, presents itself—on all sides we behold nothing but subverted shafts; some whole, others shattered to pieces or dislocated in their joints; and on which side soever we look, the earth is strewn with vast stones, half buried; with broken entablatures, mutilated friezes, disfigured reliefs, effaced sculptures, violated tombs, and altars defiled by dust." The colonnade and individual temples are inferior in beauty and majesty to those which may be seen elsewhere—such, for example, as the Parthenon and the remains of the temple of Jupiter at Athens; and there is evidently no one temple equal to the Temple of the Sun at Baalbec, which, as built both at about the same period of time and in the same order of architecture, suggests itself most naturally as an object of comparison. But the long lines of Corinthian columns at Palmyra, as seen at a distance, are peculiarly imposing; and in their general effect and apparent vastness, they

General View of the Ruins of Palmyra.

seem to surpass all other ruins of the same kind. The examinations of travellers show that the ruins are of two kinds. The one class must have originated in very remote times, and consists of rude, unshapen hillocks of ruin and rubbish, covered with soil and herbage, such as now alone mark the site of the most ancient cities of Mesopotamia and Babylonia, and among which it would be reasonable to seek some traces of the more ancient city of Solomon. The other, to which the most gorgeous monuments belong, bears the impress of later ages. It is clear from the style of architecture that the later buildings belong to the three centuries preceding Diocletian, in which the Corinthian order of pillars was preferred to any other. All the buildings to which these columns belonged were probably erected in the 2d and 3d centuries of our era. Many inscriptions are of later date; but no inscription earlier than the 2d century seems yet to have been discovered.

The Temple of the Sun is the most remarkable and magnificent ruin of Palmyra. The court by which it was enclosed was 179 feet square, within which a double row of columns was continued all round. They were 390 in number, of which about sixty still remain standing. In the middle of the court stood the temple, an oblong quadrangular building surrounded with columns, of which about twenty still exist, though without capitals, of which they have been plundered, probably because they were composed of metal. In the interior, at the south end, is now the humble mosque of the village.

A little beyond the temple begins the great colonnade, which runs nearly from east to west; it is of great length, and very beautiful. The columns are in good proportion and excellent preservation; each shaft consisting of three courses of stone admirably jointed, with a bracket for a bust or statue interposed between the second and third. In their present naked condition, these brackets are unsightly; yet when they were surmounted by statues the effect must have been extremely grand.

The necropolis of Palmyra lies half an hour north-west of the Temple of the Sun, in the Wady el-Kebûr, the ravine through which we made our approach to the city. The tombs, which are very numerous and extremely interesting, are almost all of them towers, two, three, four, and in one instance five stories high. The tomb of Jamblichus, mentioned by Wood, is now dreadfully dilapidated, its stairs crumbled away, and the floor of the fourth story entirely gone. It is five stories high, and was built in the third year of the Christian era. That of Manaius is peculiarly interesting, and in some respects, indeed, the most curious building

at Palmyra. It is in wonderful preservation, and its description will afford some idea of the others, as they are almost all built on the same plan, though far less beautiful. It is a lofty square tower, about fifteen feet in the side, lessening by three courses of stonelike steps at about a third of its height. An inscription in honor of the deceased is engraved on a tablet over the doorway. The principal apartment is lined with four Corinthian pilasters on each side, with recesses between them for mummies; each recess divided into five tiers by shelves, only one of which retains its position. The ancient Palmyrenes buried their dead in the Egyptian manner, and Wood found in one of the tombs a mummy in all respects similar to those in the land of the Pharaohs.

4. *Authorities.*—The original sources for the history of Palmyra may be seen in the *Scriptores Historie Auguste, Tripitida Tyranni*, vol. xiv; *Divus Aurelianus*, vol. xxvi; *Eutropius*, ix, 10, 11, 12. In A.D. 1696 Abraham Sellaer published a most instructive work, entitled *The Antiquities of Palmyra, containing the History of the City and its Emperors*, which contains several Greek inscriptions, with translations and explanations. Gesenius published an account of the Palmyrene inscriptions at Rome and Oxford in his *Monumenta Scripturæ Linguae Phœnicæ*, § 53. The best work on the ruins of Palmyra is still Robert Wood's splendid folio, entitled *The Ruins of Palmyra*, etc. (Lond. 1753). Very good accounts of them may also be seen in Irby and Mangles, *Travels*; Richter, *Wallfahrten*; Addison, *Damascus and Palmyra*. The last work contains a good history of the place; for which, see also Rosenmüller's *Bibl. Geog.*, translated by the Rev. N. Morren; and, in particular, Cellarius, *Dissert. de Imp. Palmyreno* (1693). Gibbon, in ch. xi of the *Decline and Fall*, has given an account of Palmyra with his usual vigor and accuracy. For an interesting account of the present state of the ruins, see Porter, *Handbook for Syria and Palestine*, p. 543–549; Beaufort, *Egyptian Sepulchres*, etc., vol. i; and Bäderer, *Syria*, p. 523. Besides Wood's great work, excellent views of the place have been published by Cassas in his *Voyage Pittoresque de la Syrie*; and later by Laborde in his *Voyage en Orient*. Recently photographs have been taken by various artists, and an accurate knowledge of the remains of this renowned and remarkable place is thus made accessible to the whole world.

**Taft, GEORGE, D.D.**, an Episcopal minister, was born at Mendon, Mass., Aug. 27, 1791, and was a graduate of Brown University, in the class of 1815. He pursued his theological studies under the direction of the Rev. Dr. Crocker, rector of St. John's Church, Providence, R. I., and was ordained a deacon by bishop Griswold, March 7, 1818, and a presbyter, Sept. 2, 1819. He became rector of St. Paul's Church in Pawtucket, R. I., in October, 1820, continuing for a time to teach in a school in Providence with which he had been connected for several years. Such double service not being altogether satisfactory to his bishop, he gave a gentle hint to the parish of St. Paul's that "he had not ordained their minister to keep school;" and he thenceforth devoted himself with great zeal and success to his work as a minister of the Gospel until his death, which occurred at Pawtucket, Dec. 11, 1869. His ministry was a little over fifty years in duration. (J. C. S.)

**Taggart, Samuel**, a Presbyterian minister, was born at Londonderry, N. H., March 24, 1754. He graduated at Dartmouth College in 1774, was licensed to preach by the Presbytery of Boston June 1, 1776, and was ordained and installed pastor of the Church at Cole-raine, Hampshire Co., Mass., Feb. 19, 1777. He was a member of Congress from 1803 to 1817. He died April 25, 1825. Mr. Taggart possessed a mind of great strength and vigor. He published several theological treatises, sermons, orations, political speeches, etc. (1800–19). See Sprague, *Annals of the Amer. Pulpit*, iii, 377; Allibone,

Part of a Tomb at Palmyra.

*Dict. of Brit. and Amer. Authors*, s. v.; Packard, *Hist. of the Churches and Ministers in Franklin County*.

**Taggart, William, D.D.**, a Presbyterian divine, was born in 1783, educated privately, graduated at the Theological Seminary of the Associate Reformed Church, New York, in 1813; was licensed to preach by the Monongahela Associate Reformed Presbytery in the same year, and ordained by the same presbytery and installed pastor of the united congregations at Upper Wheeling and Cadiz in 1814, where he continued to labor until old age. He died Sept. 11, 1865. Dr. Taggart was a man of strong thought. "His moral and intellectual attributes were perhaps rarely, if ever, excelled." See Wilson, *Presb. Hist. Almanac*, 1866, p. 279.

**Ta'han** (Heb. *Tach'an*, תַּחֲאֵן, *camp* [Gesenius], or *graciousness* [Fürst]), the name of two descendants of Ephraim.

1. (Sept. *Taváχ* v. r. *Tavai*; Vulg. *Thehen*.) The head of one of the families of the Ephraimites at the end of the Exode (Numb. xxvi, 35). B.C. ante 1618. See TAHANITE.

2. (Sept. *Θαίν* v. r. *Θαάν*; Vulg. *Thaan*.) Son of Telah and father of Laadan in the Palestinian lineage of Ephraim (1 Chron. vii, 25). B.C. post 1618.

**Ta'hanite** (Heb. *Tachani'*, תַּחֲנִי, patronymic from *Tahan*; Sept. *Tavaxi* v. r. *Tavai*; Vulg. *Thehenita*), the family name (Numb. xxvi, 35) of the descendants of TAHAN 1 (q. v.).

**Tahap'anès** (Jer. ii, 16). See TAHPANES.

**Taharoth.** See TALMUD.

**Ta'hath** (Heb. *Táchath*, תַּחַת, in pause *Táchath*, תַּחַת, *station*, i. e. *beneath*, as often), the name of a place and of three men.

1. (Sept. *Karáāš* v. r. *Θαάš*; Vulg. *Thahath*.) One of the stations of the Israelites in the desert between Makheloth and Tarah (Numb. xxxiii, 26); situated apparently not far beyond the western edge of the Arabah nearly opposite Mount Hor. See EXODE.

2. (Sept. *Θαάš* v. r. *Kaáš*; Vulg. *Thahath*.) A Kohathite Levite, son of Assir and father of Uriel, or Zephaniah, in the ancestry of Samuel and Heman (1 Chron. vi, 24, 37 [Heb. 9 and 22]). B.C. cir. 1585.

3. (Sept. *Θαάš* v. r. *Θαάδ*; Vulg. *Thahath*.) Son of Bered and father of Eladah, among the immediate descendants of Ephraim in Palestine (1 Chron. vii, 20). B.C. post 1618. Burrington (*Geneal.* i, 273) regards him as the same with Tahan (q. v.) the son of Ephraim; but against the text.

4. (Sept. *Σαάš* v. r. *Νουέí*; Vulg. *Tahath*.) Grandson of the preceding (with whom some confound him), being son of Eladah and father of Zabad (1 Chron. vii, 20). B.C. post 1618.

**Tahitian Version.** The extensive assemblage of islands in which the Tahitian dialect is spoken includes the Society, or Leeward, and the Georgian, or Windward, Isles, with the Low Islands, and the "Paumotu," or Dangerous Archipelago. The largest of the islands is Otaheite, or, more properly, Tahiti, where the Tahitian language, generally considered as the most perfect type of all the Polynesian dialects, remained in its primitive simplicity. To account for this, it seems as if Tahiti had been peopled before any other island of Polynesia, properly so called; that from thence, as from a centre, emigrants went to settle on the islands of the surrounding archipelago as far as New Zealand, and that while the Polynesian language became more or less modified by the mode of life called for by the nature of the soil or of the climate, it remained, as stated already, in its primitive simplicity at Tahiti. The Tahitian version was made from the English Bible, with constant reference to the sacred originals. The first portion published was the Gospel of Luke, which appeared in 1818, while in 1838 the entire Bible was published in London under the superintendence of the Rev. Henry Nott.

Other editions followed, of which the most important, consisting of a revised edition of the entire Scriptures, was completed in London in 1848. In 1877 the annual report of the British and Foreign Bible Society announced that the committee were bringing out a revised edition with maps, which, according to the report in 1879, had left the press, the edition, consisting of 5000, having been edited by the Rev. A. T. Saville. Up to March 31, 1879, the sum total of Bibles distributed, either as a whole or in parts, was 42,335. See, besides *The Bible of Every Land*, the annual reports of the British and Foreign Bible Society since 1860, which are the only source of information. (B. P.)

**Tah'panhes** (Heb. *Tachpanches*, תַּחְפַּנְחֶס, Jer. ii, 16 [marg.]; xliii, 7, 8, 9; xlv, 1; xlv, 14), **Tah'ap'anès** (Heb. *Tachpanes*, תַּחְפַּנֶּס, ii, 16 [text]), or **Tehaph'nehes** (Heb. *Techaphnehes*, תַּחְפַּנְחֶס, Ezek. xxx, 18; all of Egyptian origin [see below]; Sept. *Táφνας* or *Táφναι*; Vulg. *Taphne* or *Taphnis*), a city of Egypt, of importance in the time of the prophets Jeremiah and Ezekiel. The name is clearly Egyptian, and closely resembles that of the Egyptian queen TAHPENES (q. v.), which, however, throws no light upon it. The Coptic name of this place, *Taphnas* (Quatremère, *Mém. Géog. et Hist.* i, 297, 298), is obviously derived from the Sept. form: the Gr. and Lat. forms, *Δάφναι*, Herod., *Δάφνη*, Steph. Byz., *Dafno*, *Itin. Ant.*, are perhaps nearer to the Egyptian original (see Parthey, *Zur Erdkunde des alten Aegyptens*, p. 528). Can the name be of Greek origin? If the HANES mentioned by Isaiah (xxx, 4) be the same as Tahpanhes, as we have suggested (s. v.), this conjecture must be dismissed. No satisfactory Egyptian etymology of this name has been suggested, Jablonski's *Taphenes*, "the head" or "beginning of the age" (*Opusc.* i, 343), being quite untenable; nor has any Egyptian name resembling it been discovered. Dr. Brugsch (*Geogr. Inschr.* i, 300, 301, Taf. lvi, No. 1728), following Mr. Heath (*Exodus Papyri*, p. 174), identifies the fort *Tebenet* with Tahpanhes; but it is doubtless the present *Tell Defenneh* (described in the 4th Report of Egyptian Expl. Fund, Lond. 1888).

Tahpanhes was evidently a town of Lower Egypt near or on the eastern border. When Johanan and the other captains went into Egypt "they came to Tahpanhes" (Jer. xliii, 7). Here Jeremiah prophesied the conquest of the country by Nebuchadnezzar (ver. 8-13). Ezekiel foretells a battle to be there fought, apparently by the king of Babylon just mentioned (xxx, 18). The Jews in Jeremiah's time remained here (Jer. xlv, 1). It was an important town, being twice mentioned by the latter prophet with Noph or Memphis (ii, 16; xlv, 14), as well as in the passage last cited. Here stood a house of Pharaoh Hophra before which Jeremiah hid great stones, where the throne of Nebuchadnezzar would afterwards be set, and his pavilion spread (xliii, 8-10). It is mentioned with "Ramesse and all the land of Gesen" in Judith i, 9. Herodotus calls this place *Daphnæ* of Pelusium (*Δάφναι* αἱ Ἰηλουσίαι), and relates that Psammetichus I had here a garrison against the Arabians and Syrians, as at Elephantine against the Ethiopians, and at Marea against Libya, adding that in his own time the Persians had garrisons at Daphnæ and Elephantine (ii, 30). Daphnæ was therefore a very important post under the twenty-sixth dynasty. According to Stephanus, it was near Pelusium (s. v.). In the *Itinerary of Antoninus* this town, called *Dafno*, is placed sixteen Roman miles to the south-west of Pelusium (ap. Parthey, Map vi, where observe that the name of Pelusium is omitted). This position seems to agree with that of *Tel-Defenneh*, which Sir Gardner Wilkinson supposes to mark the site of Daphnæ (*Modern Egypt und Thebes*, i, 447, 448). This identification favors the inland position of the site of Pelusium, if we may trust to the distance stated in the *Itinerary*. See *SIN*. Sir Gardner Wilkinson (*loc. cit.*) thinks it was an outpost of Pelusium.

It may be observed that the Camps, τὰ Στρατόπεδα, the fixed garrison of Ionians and Carians established by Psammetichus I, may possibly have been at Daphnæ.

**Tah'penès** (Heb. *Tachpenès*, תַּחְפֶּנֶס, evidently of Egyptian origin, but uncertain in its signification [see TAHPANHES]; Sept. *Θαπένης* v. r. *Θαπένης*; Vulg. *Taphnes*), a proper name of an Egyptian queen. She was wife of the Pharaoh who received Hadad the Edomite, and who gave him her sister in marriage (1 Kings xi, 18-20). B.C. cir. 1000. In the Sept. the latter is called the elder sister of Thekemina, and in the addition to ch. xii Shishak (Susakim) is said to have given Ano, the elder sister of Thekemina his wife, to Jeroboam. It is obvious that this and the earlier statement are irreconcilable, even if the evidence from the probable repetition of an elder sister be set aside, and it is scarcely necessary to add that the name of Shishak's chief or only wife, Karaamat, does not support the Sept. addition. See SHISHAK. There is therefore but one Tahpenes or Thekemina. At the time to which the narrative refers there were probably two, if not three, lines ruling in Egypt—the Tanites of the twenty-first dynasty in the lower country; the high-priest kings at Thebes, but possibly they were of the same line; and perhaps one of the last *fainéants* of the Rameses family. To the Tanitic line, as apparently then the most powerful, and as holding the territory nearest Palestine, the Pharaoh in question, as well as the father-in-law of Solomon, probably belonged. If Manetho's list be correct, he may be conjectured to have been Psusennes. See PHARAOH, 9. No name that has any near resemblance to either Tahpenes or Thekemina has yet been found among those of the period (see Lepsius, *Königsbuch*).

**Tah'reä** (Heb. *Tachre'ä*, תַּחְרֵעַ, *cunning* [Gesenius], or *flight* [Furst]; Sept. *Θαρά* v. r. *Θαράξ*; Vulg. *Thara*), third named of the four sons of Micah, Jonathan's grandson (1 Chron. ix, 41); called in the parallel passage (viii, 35) TAREA (q. v.). B.C. post 1037.

**Tah'tim-Hod'shi** (Heb. *Tachtim' Chodshi*, תַּחְתִּים חֹדְשִׁי, lit. *lowlands my month*; Sept. *Θαβασών η̄ ἔστυς* *Naßasai* v. r. *Ἰσάων ἀδασαί*; Vulg. *inferiora Hodsi*), a region (אֶרֶץ, "land") mentioned as one of the places visited by Joab during his census of the land of Israel, between Gilead and Dan-jaan (2 Sam. xxiv, 6). Furst (*Handwörterb.* i, 380) proposes to separate the "Land of the Tachtim" from "Hodshi," and to read the latter as *Harshi*—the people of Harosheth (comp. Judg. iv, 2). Thenius restores the text of the Sept. to read "the Land of Bashan, which is Edrei." This in itself is feasible, although it is certainly very difficult to connect it with the Hebrew. Ewald (*Gesch.* iii, 207) proposes to read *Hermon* for Hodshi; and Gesenius (*Thesaur.* p. 450 a) dismisses the passage with a *vix pro sano habendum*. There is a district called the *Ard et-Tahta*, to the east-northeast of Damascus, which recalls the old name—but there is nothing to show that any Israelite was living so far from the Holy Land in the time of David. It seems probable from the connection that the whole is a proper name, descriptive, however, of the physical aspect of the region to which it was given. The route taken by the king's messengers was first eastward to Moab; then northward through Gilead; then from Gilead to "the land of Tahtim-Hodshi," to Dan-jaan and Zidon. "The land of Tahtim-Hodshi" was thus manifestly a section of the upper valley of the Jordan, probably that now called *Ard el-Huleh*, lying deep down at the western base of Hermon.

**Taitazak** or **Taytazak**, JOSEPH, a Spanish Jew, belonged to those 300,000 exiles who had to leave their country in 1492. With his father and brothers, he settled at Salonica, where he wrote פִּירַת יוֹסֵף, "the fruitful bough of Joseph" (after Gen. xlix, 22), a com-

mentary on Ecclesiastes, in a homiletico-philosophical style (Venice, 1599):—קצור פירוש תהלים, i. e. excerpts from his commentary on the Psalms, published with Penini's work, לשון הזהב, "the tongues of gold" (ibid. 1599). The MS. of his complete commentary on the Psalms is to be found in the libraries of Paris and Oxford:—לחם סודיים, "the bread of sacredness," in allusion to Prov. ix, 17; a commentary on Daniel and the five Megilloth, viz. the Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther (ibid. 1608). In its present form this work only contains fragments of Taitazak's commentaries on three books, and MSS. of the entire commentaries are still extant:—באר ארוב, a commentary on Job, extant:—פסקים ושו"ת, i. e. questions and decisions (ibid. 1622). See Furst, *Bibl. Jud.* iii, 412; De Rossi, *Dizionario Storico*, p. 314 (Germ. transl.); Steinschneider, *Catalogus Libr. Hebr. in Bibl. Bodl.* col. 1533; Kitto, *Cyclop.* s. v.; Finn, *Sephardim*, p. 413. (B. P.)

**Tajus**, SAMUEL, bishop of Saragossa, lived in the 7th century. In the year 646 he went to Rome at the command of king Chindaswinth, and with the sanction of the seventh Council of Toledo, for the sake of bringing back the long-missed *Expositio in Hiobum s. Moralium*, lib. xxxv, of Gregory I. According to tradition, he was shown in a vision the place where it was hidden. Tajus was also present at the eighth and ninth councils of Toledo. Besides an *Epistola ad Eugenium Toletanum episcopum*, he also wrote *Sententiarum* lib. v (Migne, *Patrol.* vol. lxxx), containing extracts from Gregory's work on (a) God, creation, creature, government of the world; (b) incarnation, Church, Church government; (c) moral life, virtues; (d) sins and vices; (e) sinners, prince of this world, Antichrist, judgment, condemnation. Wherever Gregory failed him, he supplied his work from Augustine's writings. The work is preceded by a *Prefacio ad Quiricum Barcinensem Episcopum*, to whom the work is dedicated, together with the *Responsio Quirici*. See *Regensburger Conversations-Lexikon*, s. v.; *Theologisches Universal-Lexikon*, s. v. (B. P.)

**Talapoins**, priests or friars of the Siamese and other Indian nations. They reside in monasteries under the superintendence of a superior, whom they call a *Sanerat*. Celibacy is obligatory upon them, and a breach of chastity in the case of any one of them is punished with death. They perform penance for such of the people as pay them for it; are very hospitable to strangers, and strict in their rules of chastity. There are also female Talapoins, who live according to rules similar to those of the men. The residences of the Talapoins are much superior to those of the priests in Ceylon and Burmah, having richly carved entrances and ornamental roofs.

**Talbot, Peter**, a Roman Catholic divine, was the son of sir William Talbot, and was born in the county of Dublin in 1620. He entered the society of Jesuits in Portugal in 1635; and after studying philosophy and divinity, went into holy orders at Rome, whence he returned to Portugal, and afterwards to Antwerp, where he read lectures on moral theology. He is supposed to be the person who, in 1656, reconciled Charles II, then at Cologne, to the popish religion; and Charles is reported to have sent him to Madrid to inform the court of Spain of his conversion. Sent to England in the interest of the Romish Church, he paid court to Cromwell, whose funeral he attended as a mourner. In 1669 pope Clement IX dispensed with his vows as Jesuit, and advanced him to the titular archbishopric of Dublin. He immediately began to persecute those of his order who had signified their loyalty to the king, quarrelled with Plunket, the titular primate; and when the popish plot was discovered in England in 1678, he was imprisoned in Dublin Castle on suspicion of being

concerned in it, and died there in 1680. He was a man of ability and learning, but vain, ambitious, and turbulent. Among his publications are, *De Natura Fidei et Heresis, Tractatus de Religione*:—*A Treatise of Religion and Government* (1670, 4to):—*Letters to the Roman Catholics in Ireland* (Paris, 1674, 4to). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Talbot, Robert**, D.D., an English divine and antiquarian, was born at Thorp, Northamptonshire, and was admitted to New College, Oxford, in 1525. He left the university in 1530; in 1541 was made prebendary of Wells; and treasurer of the cathedral church of Norwich, April 9, 1547, which position he retained until his death, Aug. 27, 1558. He was a diligent searcher into the antiquities of his country, and his collections proved of great service to Leland, Bale, Caius, Camden, and others. He also furnished archbishop Parker with many Saxon books. He was the first Englishman who illustrated Antoninus's *Itinerary* with various readings and notes, but his notes reach only to the sixth journey.

**Talbot, Samson**, D.D., a Baptist minister, was born near Urbana, O., June 28, 1828, and was a graduate of Granville College, now Denison University, O., in 1852, and of Newton Theological Institute in 1855. He was ordained in 1856, and was pastor of the Baptist Church in Dayton, O., eight years, 1856-64, and was then appointed president of Denison University, which position he held until his death, which occurred at Newton Centre, Mass., June 29, 1873. President Talbot was an accomplished scholar, a profound thinker, and bade fair to stand in the very front rank of scholars in this country. (J. C. S.)

**Talbot, William**, D.D., an English prelate, was born at Stourton Castle in 1659, and in 1674 entered as a gentleman commoner of Oriel College, Oxford. After graduation he entered holy orders, and in the reign of king James II preached and acted with great zeal against popery. In April, 1691, he was nominated to the deanery of Worcester, and Sept. 24, 1699, was advanced to the bishopric of Oxford. He was translated to the bishopric of Sarum, April 23, 1715; and in September, 1722, was translated to that of Durham, of which county he was made lord-lieutenant and custos rotulorum. He died Oct. 10, 1730. There are in print two speeches of his in the House of Lords, and a volume of *Sermons* (8vo).

**Talent**, representing the Greek *τάλαντον*, Lat. *talentum*, is the rendering of the Heb. and Chald. *kikkār*, כִּיקָר, a circle, the coin being no doubt of that form. It was the largest weight among the Hebrews, being used for metals, whether gold (1 Kings ix, 14; x, 10, etc.), silver (2 Kings v, 22), lead (Zech. v, 7), bronze (Exod. xxxviii, 29), or iron (1 Chron. xxix, 7). A hill sufficient for the site of a city was sold for two talents of silver (1 Kings xvi, 24); and for 1000 talents of silver the friendship of the Assyrian king was purchased (2 Kings xv, 19); another Assyrian king laid the kingdom of Judah under a tribute of 300 talents of silver and 30 of gold (xviii, 14); a similar tribute imposed by an Egyptian king consisted of 100 talents of silver and one talent of gold (xxiii, 33); the crown of an Ammonitish king weighed one talent of gold (2 Sam. xii, 30). The sacred utensils of the Tabernacle and the Temple amounted to many talents of silver and gold (Exod. xxv, 39; xxxviii, 24, 25, 27; 1 Kings ix, 14, etc.). But there must be some error in the numbers at 1 Chron. xxix (see Kitto, *Pict. Bible*, note ad loc.). See NUMBER. In the post-exilic period, likewise, talents were a mode of estimation (1 Macc. xi, 28; xiii, 16, 19; xv, 31; 2 Macc. iii, 4, 8, etc.). In the New Test. the talent only occurs in a parable (Matt. xxv, 15 sq.), and as an estimate of a stone's weight (Rev. xvi, 21). From Exod. xxxviii, 25, 26, it appears that one talent was equivalent

to 3000 shekels of the sanctuary (Schmidt, *Bibl. Mathem.* p. 183; Böckh, *Metrol. Unters.* p. 55). See SHEKEL. As the mina (q. v.) consisted of 50 sacred shekels, it follows that the talent was equal to 60 minæ, just as the Attic talent had 60 minæ. See METROLOGY.

**TALENT** figuratively signifies any gift or opportunity God gives to men for the promotion of his glory. "Everything almost," says Mr. Scott, "that we are, or possess, or meet with, may be considered as a *talent*; for a good or a bad use may be made of every natural endowment, or providential appointment, or they may remain unoccupied through inactivity and selfishness. Time, health, vigor of body, and the power of exertion and enduring fatigue—the natural and acquired abilities of the mind, skill in any lawful art or science, and the capacity for close mental application—the gift of speech, and that of speaking with fluency and propriety, and in a convincing, attractive, or persuasive manner—wealth, influence, or authority—a man's situation in the Church, the community, or relative life—and the various occurrences which make way for him to attempt anything of a beneficial tendency; these, and many others that can scarcely be enumerated, are talents which the consistent Christian will improve to the glory of God and the benefit of mankind. Nay, this improvement procures an increase of talents, and gives a man an accession of influence and an accumulating power of doing good; because it tends to establish his reputation for prudence, piety, integrity, sincerity, and disinterested benevolence: it gradually forms him to an habitual readiness to engage in beneficent designs, and to conduct them in a gentle, unobtrusive, and unassuming manner: it disposes others to regard him with increasing confidence and affection, and to approach him with satisfaction; and it procures for him the countenance of many persons whose assistance he can employ in accomplishing his own salutary purposes."

**Taliōnis, Lex** (*law of retaliation*). This was a Roman law to the effect "That if any one called another man's credit, or fortune, or life, or blood into question in judgment, and could not make out the crime alleged against him, he should suffer the same penalty that he intended to bring upon the other." Although the ecclesiastical law could not inflict the punishment of retaliation for false witness against any man's life, yet such false testimony was early reputed by the Church as the highest species both of calumny and murder, and consequently brought such witnesses under all the ecclesiastical penalties due to those crimes.—Bingham, *Christ. Antiq.* bk. xvi, ch. x, § 9.

**Talith.** See FRINGE.

**Tal'itha Cu'mi** (ταλιθὰ κουμι; Aram. תְּלִיחָא קוּמִי, *telihā kūmī*), two Syriac words (Mark v, 41) signifying "Damsel, arise." The word תְּלִיחָא occurs in the Chald. paraphrase of Prov. ix, 3, where it signifies a *girl*; and Lightfoot (*Horæ Heb.* Mark v, 41) gives an instance of its use in the same sense by a rabbinical writer. Gesenius (*Thesaur.* p. 550) derives it from the Hebrew טַלְחָה, a *lamb*. The word קוּמִי is both Hebrew and Syriac (2 p. fem. imperative, *Kal*, and *Peal*), signifying *stand, arise*. As might be expected, the last clause of this verse, after *Cumi*, is not found in the Syriac version. Jerome (*Ep. lvi ad Pammachium*, *Opp.* i, 308 [ed. Vallars]) records that Mark was blamed for a false translation on account of the insertion of the words "I say unto thee;" but Jerome points to this as an instance of the superiority of a free over a literal translation, inasmuch as the words inserted serve to show the emphasis of our Lord's manner in giving this command on his own personal authority.

**Tallents**, FRANCIS, an eminent Nonconformist divine, was born at Palsley, near Chesterfield, England, November, 1619, and was educated at the public-schools

of Mansfield and Newark. He entered Peterhouse, Cambridge, but being chosen subprior to the sons of the earl of Suffolk, removed to Magdalen College, of which he afterwards became fellow, senior fellow, and president. In 1648 he was ordained at London in the Presbyterian form, and in 1652 became minister of St. Mary's, Shrewsbury. At the Restoration, not wishing to be re-ordained, he was ejected, and in 1673 returned to Shrewsbury, and became pastor of a Dissenting congregation there. He died April 11, 1708, and was buried in St. Mary's, Shrewsbury. He published, *View of Universal History to 1700* (Lond. 1700, fol.):—*Short History of Schism* (1705, 8vo):—*Considerations on S. Garscome's Answer*. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Talleyrand (DE PÉRIGORD), Alexandre Angélique**, a noted French prelate, was born in Paris, Oct. 16, 1736, and after a course of education at the Collège de la Flèche, the Seminary of St. Sulpice, and under the direction of abbé Bourlier, became one of the almoners of the king, later vicar-general of Verdun, and (in 1762) abbot of Gard (diocese of Amiens). Having been chosen coadjutor of the archbishop of Rheims, he was consecrated at Rome, Sept. 26, 1766, under the title of archbishop of Troyanople *in partibus*. He succeeded to the archbishopric of Rheims Oct. 27, 1777, and was very active in improving his diocese, as well as in public and ecclesiastical functions, sharing the varied fortunes of the Church and State during the stormy period of the French Revolution. After having been a refugee at Aix-la-Chapelle, Brussels, and other places, he was recalled in 1803, and on July 28 was made cardinal, and on Aug. 8 following bishop of Paris, where he died, Oct. 20, 1821. See Hofer, *Nouv. Biog. Générale*, s. v.

**Talleyrand (DE PÉRIGORD), Élie**, a French prelate, was born at Périgueux in 1801, and was educated for the priesthood at the school of St. Front in that town. He became successively archdeacon of Périgueux, dean of Richmond (diocese of York), abbot of Chancelas, and (Oct. 10, 1824) bishop of Limoges, although he was not consecrated because of his youth; and in 1828 he was translated to the see of Auxerre, though he continued to reside at Oudan, engaged in literary studies. He was created cardinal May 22, 1831, and thenceforth became active in public affairs, in which he experienced many remarkable adventures. He died at Avignon, Jan. 17, 1864, leaving a vast fortune. See Hofer, *Nouv. Biog. Générale*, s. v.

**Tallis**, THOMAS, a celebrated English musician, flourished about the middle of the 16th century. Under queen Elizabeth he became gentleman of the royal chapel and organist. Although he was a diligent collector of musical antiquities, and a careful peruser of the works of other men, his compositions are so truly original that he may justly be said to be the father of the cathedral style. Notwithstanding his supposed attachment to the Romish religion, it seems that Tallis accommodated himself and his studies to the alterations introduced at the Reformation. With this view, he set to music those parts of the English liturgy which at that time were deemed most proper to be sung, viz. the two morning services—the one comprehending the *Venite Exultemus*, *Te Deum*, and *Benedictus*; and the other, which is part of the communion office, consisting of the *Kyrie Eleison*, *Nicene Creed*, and *Sandus*; as also the evening service, containing the *Magnificat* and *Nunc Dimittis*. He also set musical notes to the preces and responses, and composed that litany which for its excellence is sung on solemn services in all places where the choral service is performed. The services of Tallis contain also chants for the *Venite Exultemus* and the *Creed of St. Athanasius*, two of which are published in Dr. Boyce's *Cathedral Music*, vol. i. Besides the offices above mentioned, constituting what are now termed the morning, communion, and evening services,

in four parts, with the preces, responses, and litany, Tallis composed many anthems. He died Nov. 23, 1585, and was buried in the parish church of Greenwich, in Kent.

**Talmage**, SAMUEL KENNEDY, D.D., a Presbyterian divine, was born at Somerville, N. J., Dec. 11, 1798. He graduated at the College of New Jersey in 1820; taught in an academy for two years; was tutor in the College of New Jersey for three years, employing his leisure hours in studying theology privately; was licensed and ordained an evangelist in 1825 by the Newton Presbytery; labored as a missionary at Hamburg and other points in Edgefield District, S. C., for one year; in 1827 was a colleague with the Rev. S. S. Davis, D.D., in supplying the First Presbyterian Church at Augusta, Ga.; in 1828 became pastor of the Augusta Church; in 1836 was elected professor of languages in Oglethorpe University, which chair he held until 1840, when he was elected president of the institution, where he continued to labor until 1862, when his health failed. He died Sept. 2, 1865. Dr. Talmage was an able minister, a fine scholar, and a successful instructor. See Wilson, *Presb. Hist. Almanac*, 1866, p. 363.

**Tal'mai** (Heb. *Talmay*, תַּלְמַי, *furrowed* [Gesenius] or *bold* [Fürst, who comp. *Θολομαῖος*, Josephus, *Ant.* xiv, 8, 1; *Βαρ-Θολομαῖος*, Matt. x, 3]; Sept. *Θολομαῖ*, *Θολμί*, *Θελαμειν*, *Θολομαῖ*, etc.; Vulg. *Tholmai* or *Tholomai*), the name of two men.

1. Last named of the three gigantic "sons of Anak" in Hebron (Numb. xiii, 22), who were expelled by Caleb (Josh. xv, 14) and slain by the Judahites (Judg. i, 10). B.C. 1618. It has been thought that these people are depicted on the Egyptian monuments as a tall, light-complexioned race. In the hieroglyphic inscription they are named *Tanmahu*, which may be the Egyptian rendering of the Hebrew word *Talmay*, allowing for the interchange of the liquid *l* for *n*, so constant in all languages. The figure is from a picture on a wall of the tomb of Aime-nephthah I, supposed to represent a man of the tribe of Talmay, one of the sons of Anak (Burton, *Excerpta Hieroglyphica*).

Supposed Egyptian Figure and Name of Talmay.

2. Son of Ammihud and king of Geshur (2 Sam. iii, 3; xiii, 37; 1 Chron. iii, 2). B.C. 1045. His daughter Maachah was one of the wives of David and mother of Absalom. He was probably a petty chieftain dependent on David, and his wild retreat in Bashan afforded a shelter to his grandson after the assassination of Amnon. See DAVID.

**Tal'mon** (Heb. *Talmon*, תַּלְמוֹן, *oppressor*; Sept. *Τεχμών* and *Τελαμιν* v. r. *Τεχμών*, *Τολμών*, *Τελαμειν*; Vulg. *Telmon*), the head of a family of door-keepers in the Temple, "the porters for the camps of the sons of Levi" (1 Chron. ix, 17; Neh. xi, 19). B.C. 1013. Some of his descendants returned with Zerubbabel (Ezra ii, 42; Neh. vii, 45), and were employed in their hereditary office in the days of Nehemiah and Ezra (Neh. xii, 25), for the proper names in this passage must be considered as the names of families.

**Talmud** (תַּלְמוּד, *talmúd*, *doctrine*; from תָּלַם, "to teach"). The Talmud, "that wonderful monument of human industry, human wisdom, and human folly" (Milman), is the work which embodies the canonical and civil laws of the Jews. It consists of a Mishna (q. v.) as text, and a voluminous collection of commen-

aries and illustrations, called in the more modern Hebrew *Horaa*, and in Aramaic *Gemara*, "the complement" or "completion," from *קָמַר*, "to make perfect." Hence the men who delivered these decisive commentaries are called Gemarists, sometimes *Horaim*, but more commonly *Amoraim*.

I. *History and Composition*.—The Jews divided their law into the written and unwritten. The former contained the Pentateuch, *פֶּנְתָּאֵטֶיֶחֶס*, חֻמְשֵׁי מֹשֶׁה, חומשי משה, or the *תורה שבכתב*, *verbum Dei scriptum*, *ἔγγραφος*; the latter was handed down orally, the *תורה שבעל פה*, *παράδοσις*, *verbum Dei non scriptum*, *ἀγραφος*. Some Jews have assigned the same antiquity to both, alleging that Moses received them on Mount Sinai, and that Joshua received the oral law from Moses, who transmitted it to the seventy elders; and these again transmitted it to the men of the Great Synagogue, the last of whom was Simon the Just (q. v.). From the men of the Great Synagogue it came into the possession of the rabbins till Judah the Holy (q. v.), who embodied in the celebrated code of traditional law, or Mishna, all the authorized interpretations of the Mosaic law, the traditions and decisions of the learned, and the precedents of the courts or schools; or, as Moses Maimonides (q. v.) states, in his preface to the Mishna (*Seder Zeraim*), "From Moses our teacher to our holy rabbi no one has united in a single body of doctrine what was publicly taught as the oral law; but in every generation the chief of the tribunal, or the prophet of his day, made memoranda of what he had heard from his predecessors and instructors, and communicated it orally to the people. In like manner, each individual committed to writing for his own use, and according to the degree of his ability, the oral laws and the information he had received respecting the interpretation of the Bible, with the various decisions that had been pronounced in every age and sanctified by the authority of the great tribunal. Such was the form of proceeding until our rabbi the holy, who first collected all the traditions, the judgments, the sentences, and the expositions of the law, heard by Moses our master, and taught in each generation." There is, no doubt, some truth in this as to a few elementary principles of Hebrew usage and practice, both civil and religious; but the whole of the unwritten law cannot have this primordial majesty, for, without referring to the trivial and foolish character of many of its appointments, we know that Midrashim, or explanations and amplifications of Biblical topics, were of gradual growth. Their commencement dates prior to the chronicle writer, because he refers to works of that nature (2 Chron. xiii, 22; xxiv, 27). The system of interpretation which they exemplify and embody existed in the age of the so-called *Sopherim*, or scribes, who took the place of the prophets. The men of the Great Synagogue promoted it. It prevailed from the Asmonæan period till that of Hadrian, i. e. about 300 years. The Midrash was naturally simple at first, but it soon grew more comprehensive and complicated under a variety of influences, of which controversy was not the least powerful. When secret meanings, hidden wisdom, deep knowledge, were sought in the letter of Scripture, the Midrashim shaped themselves accordingly, and a distinction in their contents could be made. Thus they have been divided into the *Halakâh*, הלכה, "the rule," and *Hagadâh*, הגדה, "what is said." Legal prescriptions formed the Halakah, free interpretations the Hagadah. The one, as a rule of conduct, must be attended to; the other merely passed for something said. The one was permanent and proceeded from authoritative sources, from schools, the teachers of the law, etc.; the other was the product of individual minds, consisting of ideas which had often no other object than of being expressed at the moment. The oldest collection of Halakoth—that is, the oldest Mishna—proceeded from the school of Hillel. Rabbi

Akiba, who was slain in the Hadrianic war, is said to have composed Mishnic regulations. The school of R. Simon ben-Gamaliel (q. v.), A.D. 166, who was a descendant of Hillel, collected and sifted the existing materials of the oral law. The present Mishna proceeded from the hands of R. Judah the Holy (q. v.), son and successor of R. Simon ben-Gamaliel. The title of Judah's work is simply *Mishnâh*, מִשְׁנָה, *δευτερίων* (from שָׁנָה, "to repeat"), "repetition," like the Arabic *Mathani* (Koran, xv, 87; xxxix, 34), that is, either (considering the divine law as twofold, written and traditional) the second branch of the twofold law, or else the law given in a second form, as an explicative and practical development of it (comp. Grätz, *Gesch. d. Juden*, iv, 419).

The work itself is composed of the following elements:

1. *Pure Mishnâh* (מִשְׁנָה), the elucidation of the fundamental text of the Mosaic laws, and their application to an endless variety of particular cases and circumstances not mentioned in them.
2. *Halakâh* (הִלְכָּה), the usages and customs of Judaism, as sanctioned and confirmed by time and general acquiescence.
3. *Dibréy Chakamim* (דִּבְרֵי חֲכָמִים), law principles of the wise men or sages, i. e. the ancient, and at that time the more recent, teachers, to whose decisions the people's respect for them gave a greater or less weight.
4. *Maaseiyôth* (מַעֲשִׂיּוֹת), practical facts, conclusions arrived at by the course of events.
5. *Gezirôth* (גְּזִירוֹת), extemporaneous decisions demanded by emergencies.
6. *Tekanôth* (תִּקְנוֹת), modifications of usages to meet existing circumstances; and
7. *Kelalim* (כְּלָלִים), universal principles, under which a multitude of particular cases may be provided for.

According to Maimonides, there were five classes into which the traditional law is divided, viz.:

1. *Pirushim* (פִּירוּשִׁים), "interpretations" given to Moses by God, the authority of which has never been disputed (אין מחלוקת בהם בשום פנים).
2. *Halakâh le-Moshêh mi-Sinây* (הִלְכָּה לְמֹשֶׁה מִסִּינַי), "precepts delivered to Moses on Mount Sinai," a distinction which gained the applause of all the classical rabbins, because it belongs to the class of undisputed decisions.
3. Those which have admitted of discussion, and the value and weight of which have been mainly determined by an extensive consent among the authorities.
4. *Gezarôth* (גְּזִירוֹת), "decisions" which have been made by the wise men regarding some of the written laws, and which decisions are designed to insure more fully the observance of such laws (or to make a fence about the law, כְּדֵי לַעֲשׂוֹת סָגֵר לַחֹרֵי).
5. *Tekanôth* (תִּקְנוֹת), "experimental suggestions," referring to things recommended or enjoined by particular masters, which though they may not possess the stringent force of laws, nevertheless exert a great influence in the formation of social and religious habits and usages.

In constructing his work, Jehudah, or Judah, arranged these manifold materials under six general classes, called *Sedarim* (סְדָרִים), or orders. The first is called *Zeraim* (זֵרַעִים), or "seeds," and treats of agricultural laws; the second, *Môed* (מוֹעֵד), or "festivals," or "solemnity," treats of the Sabbath and the annual festivals and holidays, the duties of their observance, and the various enactments and prohibitions thereunto pertaining; the third, *Nashim* (נָשִׁים), or "women," treats of the intercourse between the sexes, of husband and wife, the duties of a brother-in-law towards his widowed and childless sister-in-law, the right of untying the shoe (Deut. xxv, 5), of dowry and marriage settlements, of espousals, divorces, and of all the laws to these subjects respectively appertaining; the fourth, *Nezikin* (נִזְקִין),

or "injuries," treats of the laws of property (movable as well as immovable) and of commerce; the fifth, *Kodasim* (קדשים), or "consecrations," treats of sacrifices and their laws; the sixth, *Taharôth* [or rather *Tohorôth*] (טהרות), or "purifications," treats of the laws of purity, legal cleanness, and that both positively and negatively. The initial letters of these titles combined, for the sake of memory, give the technical word *Zemân nekêl* (זמן נקט), "a time accepted."

The regulations thus generally classified are further arranged under a multitude of subsidiary topics, each *Seder*, or order, being divided into a number of tracts or treatises, called *Massiktôth* (מסכתות), and these were again subdivided into *Perakim* (פרקים), chapters. The latter again are divided or broken up into paragraphs. Altogether there are 63 *Massiktôth*, with 525 chapters and 4187 paragraphs, in the Mishna. The whole is called *Shas* (שס), after the initials of ששה סדריים, i. e. the six orders. Since a general analysis of the contents of the Mishna has already been given under the art. MISHNA (q. v.), we must refer the reader to it, while a more minute analysis will be given farther on.

R. Judah's Mishna, however, did not contain all Midrashim. Many others existed, which are contained in part in the *Siphra* on Leviticus, *Siphre* on Numbers and Deuteronomy, *Mechilla* on Exodus (see the art. MIDRASH), the Mishnas made by individual teachers for the use of their pupils, with the addition to the official Mishna collected by R. Chiya and his contemporaries. All the Halakoth of this sort, which were extra-Mishnaic, were called *Boraithas* (בריתות; Heb. חריציות) or *Tosiphtas* (תוספתות). As has been stated, R. Judah the Holy collected the great mass of traditions in the work called Mishna; but even this copious work could not satisfy, for the length of time, the zeal of the rabbins for the law, for all casuistry is endless in its details. There were a great multitude of all kinds of possibilities which were treated in the Mishna, and yet, again, each single sentence left open divers possibilities, divers doubts, and considerations not yet finished. Thus it was an inner necessity of the matter that the text of the Mishna should again become the point of learned discussion. Partly by means of logic (that is, Rabbinical), partly with the help of the traditional matter, which had not yet been included in the Mishna, all open questions were now discussed. This task was carried out by the Amoraim, or Gemaraal doctors, whose very singular illustrations, opinions, and doctrines were subsequently to form the Gemaras, i. e. the Palestinian and Babylonian: a body of men charged with being the most learned and elaborate triflers that ever brought discredit upon the republic of letters—

"For mystic learning, wondrous able  
In magic, talisman, and cabal—  
Deep-sighted in intelligences,  
Ideas, atoms, influences."

With unexampled assiduity did they seek after or invent obscurities and ambiguities, which continually furnished pretexts for new expositions and illustrations, the art of clouding texts in themselves clear having proved ever less difficult than that of elucidating passages the words or the sense of which might be really involved in obscurity.

"Hence comment after comment, spun as fine  
As bloated spiders draw the flimsy line!"

The two main schools where this casuistic treatment of the Mishnic text was exercised were that at Tiberias, in Palestine, and that at Sora (q. v.), in Babylonia, whither Abba Areka, called "Rab" (q. v.), a pupil of R. Judah, had brought the Mishna. In these and other schools (as Nahardea, Sipporis, Pumbaditha [q. v.], and Jabne or Jamnia), the thread of casuistry was twisted over and over again, and the matter of traditions of the law thus took greater and greater dimensions. Abandoning

the Scripture text, to illustrate and to explain which the doctors and wise men of the schools had hitherto labored, successive generations of *Gemarici* now devoted their whole attention to the exposition of the text of the Mishna; and the industry and cavillation were such that expositions, illustrations, and commentaries multiplied with amazing rapidity and to so portentous a degree that they eventually swelled into a monstrous chaotic mass, which was dignified by the name of *Gemara*, גמרא (*supplement* or *complement*), and this, together with the Mishna, was called "Talmud." Notwithstanding the uncertain paternity of this incongruous body of opinions, there were not wanting those who gave a preference to the Gemara over the Mishna, and even over the "written law." It was said by some that the "written law" was like water, the Mishna like wine, and the Gemara like hippocras, or spiced wine. The "words of the scribes," said those supporters of the Gemara, are lovely above the "words of the law," for the "words of the law" are *weighty and light*, but the "words of the scribes" are all *weighty*.

It was by R. Jochanan, rector of the Academy of Tiberias, that the minor chaos of comments and facetiæ began to be collected; and these, being added to the Mishna, were termed the *Palestinian Talmud*, or *Talmud Jerushalmi*, i. e. Jerusalem Talmud. This Talmud, which was completed at Tiberias about A.D. 350, only contains four orders, viz., *Zeraim*, *Môêd*, *Nashim*, and *Nezikin*, together with the treatise *Niddah* and some other fragmentary portions. From the schools of Babylonia, also, a similar collection was in after-times made; but, as, upon the desolation of Palestine, the study of the law was chiefly prosecuted in Babylon, the colleges there were far more numerous, and far more ingenious and prolific were the imaginations of the Babylonian professors. To collect and methodize all the disputations, interpretations, elucidations, commentaries, and conceits of the Babylonian *Gemarici* was consequently a labor neither of one man nor of a single age. The first attempt was made (A.D. 367) by R. Ashê, elected at the age of fourteen to be rector of the school of Sora (q. v.), a teacher described as eminently pious and learned. R. Ashê labored during sixty years upon the rank, unwieldy work, and, after arranging thirty-five books, died in 427, leaving the completion to his successors. For 100 years longer did rabbi after rabbi, with undiminished zeal, successively continue this unprofitable application, until at length, after the lapse of 123 years (about A.D. 550), rabbi Abina, the sixth in succession to Ashê, gave the finishing stroke to this *second Talmud*. Denominated, from the name of the province in which it was first compiled, the *Babylonian Talmud*, this second Talmud is as unmanageable to the student on account of its style and composition as on account of its prodigious bulk. Composed in a dialect neither Chaldaic nor Hebrew, but a barbarous commixture of both of these and of other dialects, jumbled together in defiance of all the rules of composition or of grammar, it affords a *second* specimen of a Babylonian confusion of languages.

"It was a parti-colored dress  
Of patched and piebald languages,  
Which made some think, when it did gabble,  
They'd heard three laborers of Babel,  
Or Cerberus himself pronounce  
A leash of languages at once."

Abounding, moreover, in fantastic trifles and Rabbinical reveries, it must appear almost incredible that any sane man could exhibit such acumen and such ardor in the invention of those unintelligible comments, in those nice scrupulosities, and those ludicrous chimeras which the rabbins have solemnly published to the world, and of which we will speak further on.

II. *Form and Style*.—In general, the Gemara takes the shape of scholastic discussions, more or less prolonged, on the consecutive portions of the Mishna. On a cursory view, it is true, these discussions have the air of a

desultory and confused wrangle; but, when studied more carefully, they resolve themselves into a system governed by a methodology of its own. "Non vero sterilis in Mishnicam commentarius Gemara est; quæ illius tantum modo verba explicet. Sed prolizas in eam instituit disputationes, quæstiones proponendas et ad eas respondendo dubia movendo, eaque solvendo, excipiendo et replicando" (Wähner, *Antiqq. Hebr.* i, 339).

The language of the Talmud is partly Hebrew and partly Aramaic. The best Hebrew of the work is in the text of the Mishna, that in the Gemara being largely debased with exotic words of various tongues, such as Latin, Greek, Arabic, Coptic, and Persian (comp. A. Brüll, *Fremdsprachliche Redensarten in den Talmuden und Midrashim* [Leips. 1869]), barbarous spelling, and uncouth grammatical, or rather ungrammatical, forms. The same remark will apply to the Aramaic portions, which, in general, are those containing popular narrative, or legendary illustration, while the law principles and the discussions relating to them are embodied in Hebrew. Many forms of the Talmudic dialect are so peculiar as to render a grammar adapted to the work itself greatly to be desired. Ordinary Hebrew grammar will not take a man through a page of it. See RABBINICAL DIALECT.

In style the Mishna is remarkable for its extreme conciseness, and the Gemara is written upon the same model, though not so frequently obscure. The prevailing principle of the composition seems to have been the employment of the fewest words, thus rendering the work a constant brachylogy. A phrase becomes a focus of many thoughts, a solitary word an anagram, a cipher for a whole subject of reflection. To employ an appropriate expression of Delitzsch, "What Jean Paul says of the style of Haman applies exactly to that of the Talmud: 'It is a firmament of telescopic stars, containing many a cluster of light which no unaided eye has ever resolved'" (*Zur Geschichte der jüdischen Poesie* [Leips. 1836], p. 51). But without regard to grammatical and linguistic difficulties and numberless abbreviations which crowd the pages of the Talmud, there are a number of so-called *termini technici*, which were current only in the Rabbinical schools, but have been incorporated in the Gemara, like joints and ligaments in its organization, so as to make the knowledge of them indispensable to the student. Such *termini* were—

1. The *explication*, or פירוש, which is introduced by the formula מאי כך, "What is this?" מאי קאמר, "What does he say?" במאי איקמינן, "How is this to be understood?" במאי עסקינן, "What is the matter here?" מאן דכר שמה, "Who could think of such a thing?" הריכי דמי, "How have we to interpret this?"

2. The *question*, or שאלה. If a question is offered by one school to another, it is introduced by the formula איבעיא להו, "They propose to them;" if from several persons to one, the formula מינייהו, "They ask of him;" or if the demand is made of one person to another, it is מיניה, "I ask of him."

3. The *response*, or תשובה, which may consist either in strong reasons (פשטא) (תירוקן) or in strong objections (פירכא) (קושיא), is introduced by the formula מאי הוי עלה, "Whence have you this?" or עלה, "You wish to know the decision in this case."

4. *Tosifta*, or תוספתא, an appendix to the Mishna. We have seen that R. Chiyā, or, as some have it, R. Nehemya under his direction, composed a work of this description in Palestine, the substance of which is diffused in citations throughout the Talmud. They are indicated by the sign-word Tana, תאנא, "He teaches," or Vetani aley, ויתני עלי, "It is taught hereupon," prefixed to the sentence.

5. *Boraitha*, or ברייתא, another kind of supplement to the Mishna. Such are the books *Siphra*, *Siphre*, and *Mechilta*, mentioned above. When a citation is adduced

from a Boraitha in the Talmud, it is introduced by one of these forms: Tanu rabbanan, תנו רבנן, "Our rabbis have taught;" Tani chada, תני חדא, "A certain (rabbi) has taught," etc.

6. The *suspense*, or תיקון, is used when a case cannot be decided either *pro* or *con*, and thus this formula is used, which according to some contains the initials of רשב"י תיב"י, i. e. "the Tishbite (viz., Elijah, at his coming) will explain all objections and inquiries." Others, however, pretend that it is an abbreviation of תיקנים, "It remains *in statu quo*."

7. The *objection*, or קושיא, a question not of a fixed Halakah, which is irrefragable, but of some position of the Amora'im or perhaps Tana'im, which is lawfully debatable, and is introduced by the formula רא שמע, "Come and hear;" שמע מינה, "Hear of this;" אי הכי, "If so;" אלמא, "Therefore;" מחלוקת בזה, "There is a controversy in this case;" במאי קא מיפלגי, "What is the ground of the controversy?" סלקא דעתך, "Thou couldst suppose."

8. The *refutation*, or תיובתא, is used in order to uphold the authority of the Bible (מן הפסוק) against a Tanaite, and to oppose the authority of a Tanaite against that of one of the Amora'im, and is introduced by the formula תיובתא, תיובתא, "This objection is truly of great weight."

9. The *contradiction*, or רמייה, an objection thrown against a sentiment or opinion by the allegation of a contrary authority, and is introduced by the formula רמינחיה, "But I oppose this."

10. The *argumentation*, or התקפתא, "an assailing or seizing upon," is a kind of objection in use only among the later Amora'im, and is introduced by the formula מתקין לה, "Rabbi N. objects to this." If this objection is not refuted, it takes the value of Halakah.

11. The *solution*, or פירוק, is the explanatory answer to the objection (see *supra* 7).

12. The *infirmation*, or שנוי, "disowning or shifting off," when a sage, sorely pressed in debate, shifts off his thesis upon another, introducing this by the formula דא מני, "But whose is this sentence?"

13. The *appui*, or סיוע, "support," is a corroborative evidence for a doctrine or principle, introduced by the formula לוימא מסייע ליה, "It can be said," "There is support for it."

14. The *necessity*, or הצרכה, This term is used in order to justify a sentence or a word, or even a single letter, which seems superfluous in the Bible or in the Mishna, and is introduced by the formula הא זו למה לי, "What is this for?" To which is answered, צריכא, "It is absolutely necessary."

15. The *accord*, or שיטה, "series," a catena or line of Talmudic teachers, cited against a given proposition.

16. *Sugia*, or סיגיא, means the proper nature of a thing. By this word the Gemara refers to itself with regard to its own properties and characteristics.

17. *Hilkatha*, or הלכתא, is the ultimate conclusion on a matter debated, henceforth constituting a rule of conduct. Much of the Gemara consists of discussions by which they are verified, confirmed, and designated. When the advocates of two opposing theses have brought the debate to an issue, they say, "The Halacta is with such a one," הלכתא כן וכן.

18. *Maasah*, or מעשה, *factum*, the establishment of a Halacta by cases of actual experience or practice.

19. *Shematetha*, or שמעתה, "to hear," describes a judgment or principle which, being founded on Holy Writ, or being of self-evident authority, must be hearkened to as uncontested.

20. *Horaah*, or הוראה, "demonstration," doctrine, legitimate and authoritative.

21. *Hagadah*, or הגדה, "a saying," incident related, anecdote or legend employed in the way of elucidation. Hagadah is not law, but it serves to illustrate law.

### III. Literary and Moral Character of the Book.—

Since the Gemara is in general only a more complete development of the Mishna, it also comprises all the primary elements of the Mishna mentioned above, which are, however, intermixed with an endless variety of *Haggadoth*, i. e. anecdotes and illustrations, historical and legendary, poetical allegories, charming parables, with epithalamiums, etc., and thus making the Talmud contain *all and everything*, or, as Buxtorf (in *Præfat. Lex. Chald. et Talmud.*) says:

"Sunt enim in Talmud adhuc multa quoque Theologica sana, quamvis plurimis inutilibus corticibus, ut Majemon alicubi loquitur, involuta. Sunt in eo multa ad antiquitatis Judaicæ collapsæ veluti rudera et vestigia, ad convincendam posterorum Judæorum perfidiam, ad illustrandum utrinque Testamenti historiam, ad recte explicandum ritus, leges, consuetudines populi Hebræi præsertim, plurimum conducentia. Sunt in eo multa Juridica, Medica, Physica, Ethica, Politica, Astronomica et aliarum scientiarum præciosa documenta, quæ lætus gentis et temporis historiam mirifice commendant. Sunt in eo illustrata ex antiquitate proverbia, insignes sententiæ, acuta apophthegmata, ecite prudeniter dicta innumera, quæ lectorem vel meliorem, vel sapienterem, vel doctorem reddere possunt, et cetera rutilantes gemmæ non minus Hebræam linguam exornant, quam omnes Latii et Græciæ flosculi suas linguas condecorant. Sunt in eo multæ vocum myriades, quæ vel voces in Scripturæ Sacræ usui raras illustrant, et native explicant, vel totius lingue Hebræicæ et Chaldææ usum insigniter complent et perficiunt, qui alioqui in defectu maximo mutilus et mancus jaceret."

In order to illustrate this, we will give a few specimens of such *Haggadoth* for the benefit of the reader:

#### *God is represented as praying.*

R. Jochanan says, in the name of R. Josi, How is it proved that the Holy One, blessed be he, does pray? From Isa. lvi. 7, "I will bring them to my holy mountain, and make them joyful in my house of prayer." Mark, it is not said, their prayer, but my prayer; therefore it is conclusively proved that he prays. And what does he pray? R. Zutra, the son of Tobia, said, in the name of Rav, the following is the divine prayer: "May it please me that my mercies shall prevail over mine anger, that the bowels of my compassion may be extended, that I may mercifully deal with my children and keep justice in abeyance." In corroboration of this, the following story is given. It is told by R. Ismael, the son of Elisha. Once I went into the Holy of Holies for the purpose of burning incense, and I saw Acanthriel Jah, the Lord, sitting upon the high and exalted throne. And he said to me, Ismael, my son, bless me! and I addressed to him the above prayer, and he shook his head (*Berakoth*, p. 7, col. 1).

But if God prays, then he must also put on phylacteries. Even upon this point the rabbins do not leave us in ignorance. Where is it proved that God puts on phylacteries? In Isa. lxii. 8, where we read, "The Lord hath sworn by his right hand, and by the arm of his strength." By the term right hand is meant the law, as it is written, "From his right hand went a fiery law for them" (*Deut.* xxxiii. 2); and by the term arm of his strength is meant phylacteries, as it is written, "The Lord will give strength to his people," etc. (*Berakoth*, p. 6, col. 1). Moreover, God has actually shown his phylacteries to Moses. It is written, "And I will take away mine hands, and thou shalt see my back parts" (*Exod.* xxxiii. 23). R. Chana, the son of Biana, says, in the name of R. Shimeon Chasida, "From this passage we learn that the Holy One, blessed be he, has shown to Moses the tie of the phylacteries, which lies on the back part of his head" (*Berakoth*, p. 7, col. 1).

If God prays, then, in the language of the rabbins, he is conscious of some personal feeling. They are not silent on this point. For example, the school of Ishmael have taught that peace is a very important matter, and that for its sake even God prevaricated. For it is written in Gen. xviii, first that Sarah said, "My Lord is old;" but afterwards it is written she said, "And I am old" (*Yebamoth*, p. 65, col. 2; see also *Baba Metsia*, p. 87, col. 1).

God is represented as needing a sacrifice to atone for himself. R. Shimeon, the son of Pazi, asked, It is written, "And God made two great lights;" and again, the greater light and the lesser light; how does this agree? *Ans.* The moon said to the Holy One, blessed be he—Lord of the universe, is it possible for two kings to use one crown? He said to her, Go and make thyself smaller. She said to him again, Lord of the universe, because I spoke to thee reasonably, should I make myself smaller? He said, in order to comfort her, Go and rule day and night. She said to him, What advantage will this be to me? Of what use is a candle in the middle of the day? He replied, Go and let Israel number the days of the year by thee. She said, It is impossible even for the sun that the calendar should be reckoned after him only, for it is written, "Let them be for signs, and for seasons, and for days and years?" He said to her, Go, and the righteous will be called by thy name; such as Jacob the little, Samuel the little, David

the little, etc. But when God saw that the moon was not quite comforted with these promises, he said, Bring ye a sacrifice to atone for me, because I lessened the size of the moon. And this corresponds with the saying of R. Shimeon, the son of Lakish: Why is the monthly sacrifice distinguished from others, inasmuch as it is written concerning it, "And one kid of the goats for a sin-offering unto the Lord?" (*Numb.* xxviii. 15). Because God said, This kid shall be an atonement for that I have lessened the size of the moon (*Chulin*, p. 60, col. 2). Raba bar bar Chana, in telling a long story, says, I heard a Bath-kol crying, Woe to me that I have sworn! And now since I have sworn, who will absolve me from my oath? (*Baba Bathra*, p. 74, col. 1).

#### *Occupation of God.*

On one occasion Abython found Elijah, and asked him, What does the Holy One, blessed be he, do? He answered, He is studying the case of the concubine of Gibeon. [We do not give this excerpt in full.] And what is his opinion about it? He says that Abython, my son, is right; and Jonathan, my son, is also right. Is there, then, a doubt in heaven about it? No, not in the least, rejoined Elijah; but both opinions are the words of the living God (*Gittin*, p. 6, col. 2).

Rabba, the son of Shila, met Elijah, and asked him, What does the Holy One, blessed be he, do? Elijah replied, He recites the lessons he hears from the lips of all the rabbins, with the exception of rabbi Meir. But why does he not want to learn from rabbi Meir? Elijah answered, Because rabbi Meir learned from one with the name of Acher. Rabba said, But rabbi Meir found a pomegranate, and has eaten the inside, but thrown away the husks of it, i. e. he only learned from Acher, but did not practice his deeds. Elijah answered, Now God says, Meir, my son (*Chagigah*, p. 15, col. 2).

R. Abbu says, If there had not been a passage of Scripture for it, it would be impossible to make such a statement; but it is written, "In the same day shall the Lord shave with a razor that is hired, namely, by them beyond the river, by the king of Assyria, the head, and the hair of the feet: and it shall also consume the beard" (*Isa.* vii. 20). God appeared to Sennacherib in the form of an old man. Sennacherib said to him, If thou shouldst go to the kings of the east and the west, whose children I have taken away and killed, what wouldst thou say to them? He answered, I would say to them that this man, i. e. Sennacherib, sits also in fear. Sennacherib said, What then shall I do? God said, Go and disguise thyself, that they should not recognise thee. How shall I disguise myself? God said, Go and bring me a razor, and I will shave thee. Sennacherib replied, From where shall I bring thee a razor? God said, Go to that house, and bring it me. He went there and found one. Then angels came, and appeared to him in the form of men; and were grinding olive-seeds. He said to them, Give me a razor. They replied, Crush one measure of olive-seeds, and we will give the razor. He did so and they gave it to him. Before he returned to God it became dark. God said to him, Bring a light. And he brought coals of fire to make a light; and while he was blowing them, the flame took hold of his beard; and thus God shaved his head and beard (*Sanhedrin*, p. 96, col. 1).

The schools of Hillel and of Shammai were disputing for three years about a certain point in the law; each side maintained that it was infallibly right. At last a Bath-kol came down from heaven and said, The opinions of both are the words of the living God, but the law is as the school of Hillel (*Erubin*, p. 13, col. 2).

R. Joshua, the son of Levi, says, When Moses came down from the presence of God, Satan appeared before him and said, Lord of the universe, where is the law? God replied, I have given it to the earth. He went to the earth and asked, Where is the law? The earth answered, God understandeth the way thereof (*Job* xxviii. 23). He went to the sea and asked, Where is the law? The sea said, It is not in me. He went to the depth, and asked the same question. The depth said, It is not in me. Destruction and death said, We have heard the fame thereof with our ears (*ibid.*). So he returned to God and said, Lord of the universe, I have searched for it all over the earth, and have not found it. God said to him, Go to the son of Amram. He came to Moses, and said to him, The law which God gave thee, where is it? Moses replied to Satan, Who am I, that God should give me a law! Thereupon God said to Moses, Art thou a liar? Moses answered, Lord of the universe, thou hast a precious treasure, which is thy daily delight, and should I claim it for my own advantage? God said to him, Because thou didst think little of thyself, the law shall be called after thy name. As it is written, "Remember ye the law of Moses my servant" (*Mal.* iv. 4).

Rabbi Joshua continues to narrate: When Moses went up to heaven, he found God occupied in twisting wreaths for the letters (of the law). And he called, Moses: is there no peace in thy city? i. e. that thou didst not salute me with a salām? Moses answered, Is it customary that a servant should salute his master? God said, Thou oughtest to have helped me; i. e. thou shouldst have wished me success in my work. Immediately Moses said to him, "And now, I beseech thee, let the power of my Lord be great, according as thou hast spoken" (*Numb.* xiv. 17) (*Sabbath*, p. 89, col. 1).

These are only a few of the many examples which crowd the pages of the Talmud. That these stories are extravagant, and often, when taken literally, absurd, no one can deny. But they must be merely regarded as to their meaning and intention. Much has been said against the Talmud on account of the preposterous character of some of these legends. But we should give the Hebrew *literati* the benefit of their own explanations. They tell us that in the Talmud the Hagadah has no absolute authority, nor any value except in the way of elucidation. It often—but not always—enwraps a philosophic meaning under the veil of allegory, mythic folk-lore, ethical story, Oriental romance, parable, and aphorism and fable. They deny that the authors of these fancy pieces intended either to add to the law of God or to detract from it by them, but only to explain and enforce it in terms best suited to the popular capacity. They caution us against receiving these things according to the letter, and admonish us to understand them according to their spiritual or moral import. "Beware," says Maimonides, "that you take not the words of the wise men literally, for this would be degrading to the sacred doctrine, and sometimes contradict it. Seek rather the hidden sense; and if you cannot find the kernel, let the shell alone, and confess, 'I cannot understand this.'" But the impartial reader must at once admit that these suggestions are merely the after-thoughts of tender apologists, for some of these stories have no hidden sense at all, but must be taken literally, because meant so, as the following will prove. In the treatise *Gittin*, fol. 69, col. 1, we read the following prescription: "For the bleeding at the nose, let a man be brought who is a priest, and whose name is Levi, and let him write the word Levi backwards. If this cannot be done, get a layman, and let him write the following words backwards: 'Ana pipi Shila bar Sumki;' or let him write these words: 'Taam dli bemi keseph, taam li bemi paggan.' Or let him take a root of grass, and the cord of an old bed, and paper and saffron and the red part of the inside of a palm-tree, and let him burn them together; and let him take some wool and twist two threads, and let him dip them in vinegar, and then roll them in the ashes and put them into his nose. Or let him look out for a small stream of water that flows from east to west, and let him go and stand with one leg on each side of it, and let him take with his right hand some mud from under his left foot, and with his left hand from under his right foot, and let him twist two threads of wool, and dip them in the mud, and put them into his nostrils. Or let him be placed under a spout, and let water be brought and poured upon him, and let them say, 'As this water ceases to flow, so let the blood of M., the son of the woman N., also cease.'" A commentary on this wisdom or folly is superfluous. That this direction to stop a bleeding at the nose is not a rare case in the Talmud, the following mode of treatment for the scratch or bite of a mad dog will prove. In the treatise *Yoma*, fol. 83, col. 1, we read: "The rabbins have handed down the tradition that there are five things to be observed of a mad dog; his mouth is open, his saliva flows, his ears hang down, his tail is between his legs, and he goes by the sides of the ways. Some say, also, that he barks, but his voice is not heard. What is the cause of his madness? Rav says it proceeds from this, that the witches are making their sport with him. Samuel says it is an evil spirit that rests upon him. What is the difference? The difference is this, that in the latter case he is to be killed by some missile weapon. The tradition agrees with Samuel, for it says in killing him no other mode is to be used but the casting of some missile weapon. If a mad dog scratch any one, he is in danger; but if he bite him he will die. In case of scratch there is danger; what, then, is the remedy? Let the man cast off his clothes and run away. Rab Huna, the son of Rab Joshua, was once scratched in the street by one of them; he immediately cast off his

clothes and ran away. He also says, I fulfilled in myself these words: 'Wisdom gives life to them that have it' (Eccles. vi, 12). In case of a bite the man will die; what, then, is the remedy? Abai says he must take the skin of a male adder and write upon it these words: 'I, M., the son of the woman N., upon the skin of a male adder, I write against thee, *Kanti, Kanti, Kirus.*' Some say, '*Kandi, Kandi, Klurus, Jah, Jah, Lord of hosts, Amen, Amen, Selah.*' Let him also cast off his clothes and bury them in the graveyard for twelve months of the year; then let him take them up and burn them in an oven, and let him scatter the ashes at the parting of the roads. But during these twelve months of the year, when he drinks water, let him drink out of nothing but a brass tube, lest he should see the phantom-form of the demon and be endangered. This was tried by Abba the son of Martha, who is the same as Abba the son of Manjumi. His mother made a golden tube for him."

In the face of such extravagancies, we are not surprised at the following statement made by a modern Jewish writer, H. Hurwitz, in an essay preceding his *Hebrew Tales* (Lond. 1826), p. 34 sq.:

"The Talmud contains many things which every enlightened Jew must sincerely wish had either never appeared there, or should, at least, long ago have been expunged from its pages. . . . Some of these sayings are objectionable *per se*; others are, indeed, susceptible of explanations, but without them are calculated to produce false and erroneous impressions. Of the former description are all those extravagancies relating to the extent of Paradise, the dimensions of Gehinnom, the size of Leviathan, and the *shor habar*, the freaks of Ashmodai, etc., idle tales borrowed most probably from the Parthians and Arabians, to whom the Jews were subject before the promulgation of the Talmud. . . . How these objectionable passages came at all to be inserted, can only be accounted for from the great reverence with which the Israelites of those days used to regard their wise men, and which made them look upon every word and expression that dropped from the mouth of their instructors as so many precious sayings well worthy of being preserved. These they wrote down for their own private information, together with more important matters, and when, in after-times, these writings were collected in order to be embodied in one entire work, the collectors, either from want of proper discrimination or from some pious motive, suffered them to remain, and thus they were handed down to posterity. That the wisest portion of the nation never approved of them is well known. Nay, that some of the Talmudists themselves regard them with no favorable eye is plain from the bitter terms in which they spoke against them (for example, Jehoshua ben Levi, who exclaims: "He who writes them down will have no portion in the world to come; he who explains them will be scorched"). . . . I admit, also, that there are many and various contradictions in the Talmud, and, indeed, it would be a miracle if there were none. For the work contains not the opinions of only a few individuals living in the same society, under precisely similar circumstances, but of hundreds, nay, thousands, of learned men of various talents, living in a long series of ages, in different countries, and under the most diversified conditions. . . . To believe that its multifarious contents are all dictates of unerring wisdom is as extravagant as to suppose that all it contains is founded in error. Like all other productions of unaided humanity, it is not free from mistakes and prejudices, to remind us that the writers were fallible men, and that unqualified admiration must be reserved for the works of divine inspiration, which we ought to study, the better to adore and obey the all-perfect Author. But while I should be among the first to protest against any confusion of the Talmudic rills with the ever-flowing stream of Holy Writ, I do not hesitate to avow my doubts whether there exists any uninspired work of equal antiquity that contains more interesting, more various and valuable information than that of the still-existing remains of the ancient Hebrew sages."

But while we admire the candor of this Jewish writer, we must confess that not all of his coreligionists act on the same principle, as the sequel will prove. An article in the *Quarterly Review* for October, 1867, with the heading "What is the Talmud?" has taken the world by surprise. Such a panegyric the Talmud most likely never had. Written so learnedly, and in a style so attractive, about a subject utterly unknown to the world at large, the stir it has created is not to be wondered at, and the more so because this article contained sentences which could not have emanated from a Jew. But the

writer was a Jew, Mr. E. Deutsch (since deceased), and what Isaac said to Jacob, "The voice is Jacob's voice, but the hands are the hands of Esau," must be applied to the author of "What is the Talmud?" We cannot pass over this article by merely alluding to it; it deserves our full attention, on account of the mischief it has already wrought, and must work, in the minds of those who are not able to correct the erroneous statements contained in it.

The writer accuses (p. 4 of the American reprint, contained in the *Literary Remains* [N. Y. 1874]) the investigators of the Talmud of mistaking the grimy stone caricatures over our cathedrals for the gleaming statues of the saints within. But, entering into the cathedrals of the Talmud and beholding these saints, we hear, in the treatise *Aboda Sara*, fol. 17, col. 1, of rabbi Elieser, שלא הניה וזנה אחת בעולם שלא בא עליה (we dare not translate this sentence into English, but we give it in Latin: "Non erat meretrix in terra quacum non fornicatus esset"). When rabbi Nachman (we read *Tr. Yoma*, fol. 12, col. 2) went to Shanuzib, he proclaimed רב כי מקלע לחרשיו מכריזו מאן הוויא ליומא (this also we dare not translate into English, but we give it in Latin: "Rab quum Tarsum intraret proclamabat quam vellet [uxorem] in diem"). Of rabbi Abuhä we read (*Tr. Berakoth*, fol. 44, col. 1) that he was such a strong eater that a fly could not rest upon his forehead; and (*ibid.*) of rabbi Ami and rabbi Assi that they ate so much that the hair fell from their heads; and of rabbi Simeon, the son of Lakesh, that he ate so much that he lost his senses. In *Tr. Baba Metsia*, fol. 84, col. 1, we read that rabbi Ismael, the son of rabbi Jose, and rabbi Eleazar, the son of rabbi Simeon, were so corpulent that when they stood face to face a pair of oxen could pass under them without touching them. Of the honesty of rabbi Samuel and rabbi Cahauna we read a nice story in *Tr. Baba Kamma*, fol. 113, col. 2, which we had better pass over, for enough has been said of some of the Talmudical saints.

The writer in the *Quarterly* is astonished at the fact that the Talmud has so often been burned. But it is an old saying, "Habent sua fata libelli." The followers of the Arabian prophet burned the great library at Alexandria, and they still do the same with every book which they believe is written against their religion. The Jews have burned and excommunicated the books of their own great Maimonides (q. v.), and considered him a heretic. They have burned, and still burn, the Hebrew Old Test. because of the Latin headings and crosses, to say nothing of the New Test. The Roman Catholics burn the Protestant Bible. Why should the Talmud have escaped? Besides, ignorance and fanaticism, in all ages and countries, have burned the books which they supposed were against their system. This was especially the case with the Talmud, A.D. 1240, when a conference was held in Paris between Nicolaus Donin and some Jewish rabbins concerning certain blasphemies contained in the Talmud and written against Jesus and Mary. R. Jehiel, the most prominent of the Jewish rabbins at that conference, would not admit that the Jesus spoken of in the Talmud was Jesus of Nazareth, but another Jesus, a discovery which was copied by later writers. But modern Jews acknowledge the failure of this argument, for, says Dr. Levin, in his prize-essay *Die Religionsdisputation des R. Jehiel von Paris*, etc., published in Grätz's *Monatsschrift* (1869), p. 193, "We must regard the attempt of R. Jehiel to ascertain that there were two by the name of Jesus as unfortunate, original as the idea may be." The result of this conference was that the Talmud in wagon-loads was burned at Paris in 1242. This was the first attack. When, however, the writer in the *Quarterly* states that Justinian in A.D. 553 already honored the Talmud by a special interdictory novella (146 Πέρι Εβραίων), we must regard such a statement as erroneous and superficial, for, as Dr. Grätz, in

his *Gesch. der Juden*, v. 392, shows, this novella has no reference to the Talmud at all (comp. also vol. vii [1873], p. 441 sq.). In our days, such accusations against the Talmud as that preferred by Donin were impossible, because all these offensive passages have been removed—not so much by the hands of the censor, as by the Jews themselves, as the following document or circular letter, addressed by a council of elders, convened in Poland in the Jewish year 5391 (i. e. A.D. 1631), to their coreligionists, which at the same time contains the clue why in later editions of the Talmud certain passages are wanting, will show. The circular runs thus in the translation of Ch. Leslie (in *A Short and Easy Method with the Jews*, p. 2 sq. [Lond. 1812], where the original Hebrew is also found):

"Great peace to our beloved brethren of the house of Israel.

"Having received information that many Christians have applied themselves with great care to acquire the knowledge of the language in which our books are written, we therefore enjoin you, under the penalty of the great ban (to be inflicted upon such of you as shall transgress this our statute), that you do not, in any new edition either of the Mishna or Gemara, publish anything relative to Jesus of Nazareth; and you take special care not to write anything concerning him, either good or bad, so that neither ourselves nor our religion may be exposed to any injury. For we know what those men of Belial, the Mumrims, have done to us, when they became Christians, and how their representations against us have obtained credit. Therefore, let this make you cautious. If you should not pay strict attention to this our letter, but act contrary thereto, and continue to publish our books in the same manner as before, you may occasion, both to us and yourselves, greater afflictions than we have hitherto experienced, and be the means of our being compelled to embrace the Christian religion, as we were formerly; and thus our latter troubles might be worse than the former. For these reasons we command you that, if you publish any new edition of those books, let the places relating to Jesus the Nazarene be left in blank, and fill up the space with a circle like this, O. But the rabbins and teachers of children will know how to instruct the youth by word of mouth. Then Christians will no longer have anything to show against us upon this subject, and we may expect deliverance from the afflictions we have formerly labored under, and reasonably hope to live in peace."

The writer in the *Quarterly*, while loudly praising the humane spirit which, as he tells us, pervades the "system and institutions set forth in the Talmud," endeavors at the same time to apologize for those parts of the Talmud which contain, as he admits (p. 12), "gross offences against modern taste," by telling us that, when compared with other ancient systems of jurisprudence, "the Talmud will then stand out rather favorably than otherwise." It is not necessary to say much on this painful and disgusting part of the subject; but we will say this, that it is one thing to point to the existence of mire, that we may warn the unwary, and another to wallow with delight in it. We heartily wish that some of the rabbins who wrote the Talmud had been content with discharging that which may be considered a duty, and not laid themselves open to the charge justly brought against them, of doing injury to the morals and minds of those who study their writings, by their unnecessary and improper statements and details, of which the treatise *Nidda*, which we have here especially in view, and which treats of the "menstruating woman," is so full. When, in 1843, Messrs. De Sola and Raphael published a translation of a portion of the Mishna, they excused the omission of this treatise by saying, in the preface to their work, "The treatise *Nidda*, not being suited to the refined notions of the English reader, has not been printed." They did well and wisely to omit it in the list of portions selected for translation. It may be said, But this treatise, bad as it is, is only a commentary on some portions of the laws of Moses. To this we may reply, it was manifestly necessary that Infinite Wisdom should solemnly prohibit many atrocities then prevalent among the heathen nations. In order to prohibit them, they must of necessity be mentioned. No doubt, the proper feeling which leads us to turn with disgust from the very thought of the crimes thus forbidden is

very much owing to those very laws which were given that the children of Israel should be distinguished from other nations, and thus, being ceremonially clean, should be fit to enter the tabernacle of God. But is there any proper excuse for writing or printing one hundred and seventy-eight folio pages in order to define all the forms in which imagination can suggest that only one of these crimes could be committed. Let us, as the subject is so important, for a moment consider a parallel case. Murder is forbidden. This law is of inexpressible importance. It is impossible to dwell too largely on the enormity of this crime, or to speak too earnestly of the necessity of watching against anger, hatred, cruelty, and every possible form in which we can in any way participate in the guilt of this dreadful sin. Just so we cannot say too much about the necessity of personal purity and holiness, for God will be "sanctified in them that draw near him." But what would we say of a man who should write a large volume merely to describe all the various modes in which a murder can be carried out, and the symptoms of decay and dissolution which would follow the deed?

On page 26 of the article alluded to we are told: "There are many more vital points of contact between the New Test. and the Talmud than divines yet seem fully to realize, for such terms as 'redemption,' 'baptism,' 'grace,' 'faith,' 'salvation,' 'regeneration,' 'Son of man,' 'Son of God,' 'kingdom of heaven,' were not, as we are apt to think, invented by Christianity, but were household words of Talmudical Judaism, to which Christianity gave a higher and purer meaning." It requires, however, a very slender acquaintance with the Bible to enable any one to reply to this statement that many of these terms were familiar to the Jews long before the Talmud was in existence, for they are found in the Old Test. And not only so, but the New Test. itself is a much older book than the Talmud. Our author tells us that the Mishna was compiled about A.D. 200. The Gemara is of still later date. It seems strange, indeed, that it did not occur to the learned author that it is impossible to suppose that the New Test. had no influence upon the rabbins, who rejected its authority. Unquestionably the reasonings of Paul and the writings of the other apostles greatly affected the whole tone of thought and manner of expression which prevailed among those who, nevertheless, refused to acknowledge their own Messiah. This is a common mistake among even learned Jews. Because *some parts* of the Talmud are unquestionably very ancient, they speak of *the whole* as a work of very great antiquity. They cannot altogether divest themselves of the fabulous notion that God gave the *oral* as well as the written law to Moses himself. Thus they habitually claim for the Talmud, as to antiquity, a degree of respect to which it is by no means entitled.

The most serious error, however, and that against which we must most distinctly protest, is this. We are told that "the Pentateuch remains in all cases the background and latent source of the Mishna" (p. 17). And again, "Either the scriptural verse forms the terminus *a quo*, or the terminus *ad quem*. It is either the starting-point for a discussion which ends in the production of some new enactment, or one never before investigated is traced back to the divine source by an outward 'hint,' however insignificant" (p. 19). Now, although this is literally true as to many of the *civil laws* contained in the Pentateuch, it is by no means a correct representation of the actual state of the case as to the *religious principles* which form the substance and the foundation of the laws of Moses. If those men who wrote the Talmud really understood and followed out the teaching of Moses, why do they almost entirely ignore the teaching of the other prophets? It is astonishing to see how very little mention is made in the Jerusalem Talmud and in the 5894 pages of the Babylonian Talmud of a great part of the Old Test.; and a perusal of the book called ספר חולדת אהרן, com-

plied by R. Aaron Pisaurensis, or Pesaro (q. v.), which contains an index of all the passages of Holy Writ quoted in the Talmud, will make good our assertion. Passing over some minor points, such as on astronomy or mathematics or the science of interpretation of dreams (a filthy specimen of the latter is especially given in Tr. *Berakoth*, fol. 57, col. 1), we will only touch another point, the Talmudical praise of women. Thus, we read on p. 56, among other moral sayings, "Love your wife like yourself, honor her more than yourself." Without arguing the question from what we know of the position of Jewish females in the countries where the Talmud is studied and its precepts obeyed—a position which proves the very contrary to the saying alluded to—it is well known to every student of the Talmud that the doctors of the Talmud in general do not hold in high estimation the female sex. They put them in the category with slaves and children. Again and again we read, "Women, slaves, and children are exempted." "You shall teach the law to your sons, and not to your daughters." "He who teaches his daughter the law is like as if he teaches her to sin." "The mind of woman is weak." "The world cannot exist without males and females, but blessed is he whose children are sons; woe to him whose children are daughters." We also remember the teaching of the Talmudical sages, that a man may consider his wife like a piece of butcher's meat. We also remember that in the morning prayer the husband thanks God "that he hath not made him a woman." As to the precept which the writer in the *Quarterly Review* quotes as one of the moral sayings of the Talmud, we must believe him on his word, or search over the 2947 pages of that stupendous work, since the writer has thought proper to conceal the treatise and the page of the Talmud from which he has translated the above sentence. We are inclined to believe that the reviewer had the following passage (Tr. *Sanhedrin*, fol. 76, col. 2) before him: "Rabbi Judah has said that Rab has said, He who marries his daughter to an old man, and he who gives a wife to his son when too young, and he who returns to the Goi (Gentile) the things the Gentile has lost, concerning him the Scripture says, 'In order to add drunkenness to thirst, the Lord will not forgive him' (Deut. xxix, 18, 19). They replied, He who loves his wife like himself, and he who honors her more than himself, and he who directs his sons and daughters in the right way, and gives them into marriage at the proper ages, concerning him the Scripture says, 'And thou shalt know that thy tabernacle shall be in peace; and thou shalt visit thy habitation, and shalt not sin' (Job v, 24)." This, however, is not a command, but optional according to the Talmud and the following, as given in Tr. *Yebamoth*, fol. 62, col. 2:

"Rabbi Tanchuma said that rabbi Hanilai had said, Every man who is without a wife is without joy, without blessing, without goodness. Without joy because it is written, 'Thou shalt rejoice, thou and thine household' (Deut. xiv, 26); without a blessing, for it is written, 'That he may cause the blessing to rest in thine house' (Ezek. xlv, 30); without goodness, for it is written, 'It is not good that the man should be alone.' In the west they add that the man who is without a wife is also without a law and without a wall. Without a law, for it is written 'Is not my help in me? and is wisdom driven quite from me?' (Job vi, 13); without a wall, because it is written 'A woman shall compass a man' (Jer. xxxi, 22). Rabba, the son of Olah, says, also without peace, as it is written, 'And thou shalt know that thy tabernacle shall be in peace, and shalt visit thy habitation, and shalt not sin.' . . . He who loves his wife like himself, and he who honors her more than himself, and he who directs his sons and his daughters in the right way, and gives them into marriage at the proper ages, concerning him the Scripture says, 'And thou shalt know that thy tabernacle shall be in peace, and thou shalt visit thy habitation, and shalt not sin.'"

We venture to think that these are the passages of the Talmud which the reviewer has picked out. We must, however, be allowed to observe that it is not the imperative, "Love your wife," but the participle with

the article, "He who loves." It will be seen that we have not translated the whole paragraph; *we dare not*. We will leave that to the reviewer and his admirers, for what we have left out, and much of the following, belongs to the defiled and defiling portions of the work, in which the Talmud is so rich. From another such foul page (*Sanhedrin*, fol. 22, col. 1) the reviewer has copied, "He who forsakes the love of his youth, God's altar weeps for him." "He who sees his wife die before him has, as it were, been present at the destruction of the sanctuary itself. Around him the world grows dark." The sentences are badly rendered; and, even if they were not, seeing in what connection they stand and through what a quagmire the reviewer was obliged to wade to fish them out, they are worthless. Another such moral saying runs thus: "When the thief has no opportunity for stealing, he considers himself an honest man." Who of the Talmudical sages has said this? The Talmud relates that when Abishag the Shunammite was brought to king David she said to him, "Marry me;" the king replied, "It is not lawful for me to marry you." As a reproach to the king, the Talmud makes the Shunammite say, חסררה לנגבא נפש לשלמא נקרא (*Sanhedrin*, *ibid.*), which the reviewer translated as above. After all, it would be strange, indeed, if we could not gather from a work of 2947 pages some good sayings and sentences. But, unless the whole work be translated, it will never be known what the Talmud really is. For instance, in one of the treatises of the Talmud called *Challah* we find, almost verbatim, what our Lord says in Matt. v, 28; and yet that portion of the Talmud is written in language so obscene and immoral that it would be difficult to meet its equal among the most licentious publications of ancient or modern times. We challenge any admirer of the Talmud to translate the treatise and publish it, and then every one will be able to give the right reply to the query so often raised by the reviewer, "What is the Talmud?"

The article in question thus concludes:

"When the masters of the law entered and left the academy, they used to offer up a short but fervent prayer; a prayer of thanks that they had been able to carry out their task thus far, and a prayer, further, that no evil might arise at their hands, that they might not have fallen into error, that they might not declare pure that which was impure, and impure that which was pure" (p. 58).

Against this we offset the following:

"The wise men have informed us that when the teacher entered the house of learning, he said, 'May it please thee, O Lord my God, that I may not be the cause of any offence, nor err in anything as regards the *Halakah*, that my companions may rejoice over me, and that I may not say of things unclean they are clean, and things clean that they are unclean, and that my companions may not err in anything as regards the *Halakah*, and that I may rejoice over them.' And when the teacher left the house of learning he said, 'I thank thee, my God, that thou hast given me my portion among those who sit in the house of learning and not among those who sit at the corners of the streets. For I rise up early, and they rise up early; I rise up early to occupy myself in things concerning the law, they rise up early to occupy themselves in things which are useless. I work and they work; I work and receive a reward, they work and receive no reward. I run and they run; I run to everlasting life, and they run to the pit of destruction.'"

Is not this prayer like that of the Pharisee in the gospel? (Luke xviii, 11.)

After having touched upon the most vital points of the Talmud—which, as we believe, has been done *sine ira et studio*, but in accordance with the old saying, *Amicus Plato, amicus Aristoteles, sed magis amica veritas*—we will now subjoin some of the opinions on the Talmud by different authors. D'Israeli, in his *Genius of Judaism* (p. 88), says:

"The Mishna, at first considered as the perfection of human skill and industry, at length was discovered to be a vast, indigested heap of contradictory decisions. It was a supplement of the law of Moses which itself required a supplement. Composed in curt, unconnected sentences, such as would occur in conversation, designed to be got by rote by the students from the lips of their oracles, the

whole was at length declared to be not even intelligible, and served only to perplex or terrify the scrupulous Hebrew. Such is the nature of traditions when they are fairly brought together and submitted to the eye.

"The Mishna now only served as a text (the law of Moses being slightly regarded) to call forth interminable expositions. The very sons of the founder of the Mishna set the example by pretending that they understood what their father meant. The work once begun, it was found difficult to get rid of the workmen. The sons of the 'Holy' were succeeded by a long line of other rulers of their divinity schools, under the title, aptly descriptive, of the *Amoraim*, or *dictators*. These were the founders of the new despotism; afterwards, wanderers in the labyrinth they had themselves constructed, roved the *Seburaim*, or *opinionists*, no longer dictating, but inferring, opinions by keen speculations. As in the decline of empire mere florid titles delight, rose the *Geonim*, or *sublime* doctors, till at length, in the dissolution of this dynasty of theologians, they sank into the familiar, titular honor of *Rabbi*, or master.

"The Jews had incurred the solemn reproach in the days of Jesus of having annihilated the word of God by the load of their traditions. The calamity became more fearful when, two centuries after, they received the fatal gift of their collected traditions, called *Mishna*, and still more fatal when, in the lapse of three subsequent centuries, the epoch of the final compilation, was produced the commentary graced with the title of the *Gemara*, 'completeness,' or 'perfection.' It was imagined that the human intellect had here touched its meridian. The national mind was completely rabbinized. It became uniform, stable, and peculiar.

"The Talmud, or the Doctrinal, as the whole is called, was the work of nearly five hundred years. Here, then, we find a prodigious mass of contradictory opinions, an infinite number of casuistical cases, a logic of scholastic theology, some recondite wisdom, and much rambling dogma; many puerile tales and Oriental fancies; ethics and sophisms, reasonings and unreasonings, subtle solutions, and maxims, and riddles; nothing in human life seems to have happened which these doctors have not perplexed or provided against, for their observations are as minute as Swift exhausted in his *Directions to Servants*. The children of Israel, always children, were delighted as their Talmud increased its volume and their hardships. The Gemara was a kind of a third law to elucidate the Mishna, which was a second law, and which had thrown the first law, the law of Moses, into obscurity."

Dr. Isaac Da Costa, in his *Israel and the Gentiles* (N. Y. 1855, p. 116), says:

"The Talmud is a most curious monument, raised with astonishing labor, yet made up of puerilities. Like the present position of the Jew, away from his country, far from his Messiah, and in disobedience to his God, the Talmud itself is a chaos in which the most opposite elements are found in juxtaposition. It is a book which seems in some parts entirely devoid of common-sense, and in others filled with deep meaning, abounding with absurd subtleties and legal *finesse*, full of foolish tales and wild imaginations; but also containing aphorisms and parables which, except in their lack of the simple and sublime character of the Holy Writ, resemble in a degree the parables and sentences of the New Test. The Talmud is an immense heap of rubbish, at the bottom of which a few bright pearls of Eastern wisdom are to be found. No book has ever expressed more faithfully the spirit of its authors. This we notice the more when comparing the Talmud with the Bible—the Bible, that Book of books, given to, and by means of, the Israel of God; the Talmud, the book composed by Israel *without* their God, in the time of their dispersion, their misery, and their degeneracy."

Dr. Milman, in his *History of the Jews* (iii, 18), says:

"The reader, at each successive extract from this extraordinary compilation (i. e. the Talmud), hesitates whether to admire the vein of profound allegorical truth and the pleasing moral apologue, to smile at the monstrous extravagance, or to shudder at the daring blasphemy. The influence of the Talmud on European superstitions, opinions, and even literature remains to be traced. To the Jew the Talmud became the magic circle within which the national mind patiently labored for ages in performing the bidding of the ancient and mighty enchanters who drew the sacred line beyond which it might not venture to pass."

Mr. Farrar, in his *Life of Christ* (ii, 485), says:

"Anything more utterly unhistorical than the Talmud cannot be conceived. It is probable that no human writings ever confounded names, dates, and facts with a more absolute indifference. The genius of the Jews is the reverse of what, in these days, we should call historical. . . . Some excellent maxims—even some close parallels to the utterances of Christ—may be quoted, of course, from the Talmud, where they lie imbedded like pearls in 'a sea' of obscurity and mud. It seems to me indispensable—and a

matter which every one can now verify for himself—that these are amazingly few, considering the vast bulk of national literature from which they are drawn. And, after all, who shall prove to us that these sayings were always uttered by the rabbins to whom they were attributed? Who will supply us with the faintest approach to a proof that (when not founded on the Old Test.) they were not directly or indirectly due to Christian influence or Christian thought?"

Prof. Delitzsch, in his lectures on *Jüdisches Handwerkerleben zur Zeit Jesu* (3d ed. Erlangen, 1879, p. 35), says:

"Those who have not in some degree accomplished the extremely difficult task of reading this work for themselves will hardly be able to form a clear idea of this poly-nomial colossus. It is a vast debating club, in which there hum confusedly the myriad voices of at least five centuries. As we all know by experience, a law, though very minutely and exactly defined, may yet be susceptible of various interpretations, and question on question is sure to arise when it comes to be applied to the ever-varying circumstances of actual life. Suppose, then, you have about ten thousand legal definitions all relating to Jewish life and classified under different heads, and add to these ten thousand definitions about five hundred doctors and lawyers, belonging mostly to Palestine or Babylonia, who make these definitions, one after the other, the subject of examination and debate, and who, with hair-splitting acuteness, exhaust not only every possible sense the words will bear, but every possible practical occurrence arising out of them. Suppose that these fustian threads of these legal disquisitions frequently lose themselves in digressions, and that, when one has waded through a long tract of this sandy desert, one lights, here and there, on some green oasis consisting of stories and sayings of universal interest. This done, you will have some tolerable idea of this enormous and, in its way, unique code of laws, in comparison with which, in point of comprehensiveness, the law-books of all other nations are but Illiputian, and, when compared with the hum of its kaleidoscopic Babel, they resemble, indeed, calm and studious retreats."

Mr. Alexander, in his book on *The Jews: their Past, Present, and Future* (Lond. 1870), p. 80 sq., says:

"The Talmud, as it now stands, is almost the whole literature of the Jews during a thousand years. Commentator followed upon commentator, till at last the whole became an immense bulk, the original Babylonian Talmud alone consisting of 2947 folio pages. Out of such a literature it is easy to make quotations which may throw an odium over the whole. But fancy, if the productions of a thousand years of English literature, say from the *History* of the Venerable Bede to Milton's *Paradise Lost*, were thrown together into a number of uniform folios, and judged in like manner; if, because some superstitious monk should write silly 'Lives of Saints,' therefore, the works of John Bunyan should also be considered worthless. The absurdity is too obvious to require another word. Such, however, is the continual treatment the Talmud receives, both at the hands of its friends and of its enemies. Both will find it easy to quote in behalf of their preconceived notions; but the earnest student will rather try to weigh the matter impartially, retain the good he can find even in the Talmud, and reject what will not stand the test of God's Word."

In conclusion, while we acknowledge the fact that this great encyclopædia of Hebrew wisdom teems with error, and that in almost every department in science, in natural history, in chronology, genealogy, logic, and morals, falsehood and mistake are mixed up with truth upon its pages, we nevertheless confess that, notwithstanding, with all its imperfections, it is a useful book, an attestation of the past, a criterion of progress already attained, and a prophecy of the future. "It is a witness, too, of the length of folly to which the mind of man may drift when he disdains the wisdom of God as revealed in the Gospel; and in these respects it will always have a claim on the attention of the wise. When Talmudism, as a religious system, shall, in a generation or two, have passed away, the Talmud itself will be still resorted to as a treasury of things amazing and things profitable; a deep cavern of antiquity, where he who carries the necessary torch will not fail to find, amid whole labyrinths of the rubbish of times gone by, those inestimable lessons that will be true for all times to come, and gems of ethical and poetic thought which retain their brightness forever" (*Etheridge, Introduction to Jewish Literature*).

IV. *Contents*.—The six *Sedarim*, or orders, of which the Mishna is composed are also found in the Talmud,

and the following is an analysis of the contents of each tractate of the six orders:

#### I. סדר זרעים, *Seder Zera'im* (Seeds).

This *Seder* contains the following eleven tractates:

1. **ברכות**, *Berakoth*, or the treatise of *blessings*, and speaks in nine chapters of the daily prayers and thanksgivings, etc.: *a. מאימרו* (so called from the first word of the chapter) treats of the time when the Shema is to be said in the morning and evening, of the position of the body at prayers, and the benedictions to be said respectively (5 sections). *b. היה קורא* speaks of the sections and order of the Shema, of how the voice is to be used in saying the prayer, and of the occasions which exempt from prayer (8 sections). *c. מרי שמחו* points out such as are exempted from prayer (6 sections). *d. תפלה השחר* treats of the time during which prayers may be said, whether the Shemoneh Esreh (q. v.) are to be said in an abbreviated manner, of prayer as an *opus operatum*, of praying in dangerous places, and of the additional prayer (7 sections). *e. אין קומדין* refers to the outer and inner position at prayer; of prayer for rain; of the prayer on Sabbath evening; of the minister of the congregation; and mistakes in prayer (5 sections). *f. כיצד מברכין* recites the different blessings to be said for fruits of the tree and the earth, wine and bread; for wine before and after meals; of the sitting and lying at the table; of blessings for the main meals and water (8 sections). *g. שלשה שאכלו* expatiates on blessings pronounced conjointly: with whom a union for such a purpose may be entered upon; the form of prayer to be used in accordance with the number of persons, of different companies (5 sections). *h. אלו דברים שברין* shows the differences between the schools of Hillel and Shammai concerning the washing of hands and the blessing at meals (8 sections). *i. הוראות* names the prayer to be said at beholding signs and wonders, at the building of a new house; and treats of prayers offered in vain, of prayers at the leaving and going into a city; of the praising of God for the good as well as for the evil; how to approach the Temple mountain; of the using of the name of God at salutations (5 sections).

2. **פאה**, *Peah*, or the *corner of the field*, treats, in eight chapters, of the field corners, gleanings, etc., to be left to the poor, etc.: *a. אלו דברים*, of the measure of the Peah, where, of what, and how large it must be given, and how long the fruit is exempted from tithe (6 sections). *b. ואילו מעסיקין*, how fields and trees as to the Peah may be separated from each other (8 sections). *c. מלבנון*, how large a field must be of which Peah must be given (8 sections). *d. הפאה*, how the Peah must be given (11 sections). *e. גרש*, what belongs to the poor, and on the bunch left through forgetfulness (8 sections). *f. ביה*, what may be regarded as a bunch left through forgetfulness, and what not (11 sections). *g. כליות*, the same concerning olive-trees; on the right of the poor in the vineyard (8 sections). *h. מאימרו כל*, how long the right of the poor lasts; what constitutes the poor, and who is not entitled to the right of the poor (9 sections).

3. **דמאי**, *Demai*, or *doubtful*, treats, in seven chapters, of fruits about which some doubts may be raised whether tithes should be paid for them or not, viz. *a. וזקלין*, which fruits are exempted from the rights of Demai; how the Demai tithe differs from other tithes, and as to the rights of Demai fruits (4 sections). *b. ואילו דברים מונעין*, who may be regarded a strict Israelite, and to whom the performance of the Demai law belongs at buying and selling. *c. מאימרו*, who may receive Demai for eating, and that nothing should be given away untithed (6 sections). *d. הלוקח*, how a man may be believed concerning the tithes from Demai (11 sections). *e. המקבל*, what to do at the renting of a field, at the pressing in company, and of the fruits in Syria (12 sections). *f. המזמין*, how to act with such as are not believed concerning the tithes; how to separate the tithes in divers cases; and what must be taken into account when tithed and untithed fruits are mixed up (8 sections).

4. **כלאים**, *Kilayim*, or *mixtures*, treats, in nine chapters, of the prohibited mingling of fruit and grain crops on the same field, etc., viz. *a*. **דחשים**, which kinds of fruits, trees, and animals are *Kilayim*, and how to graft and plant (9 sections). *b*. **כל סאה**, what to do when two kinds of seed are mixed, or in case of sowing another kind on a field already sown, or in case of making beds of different corn in one field (11 sections). *c*. **צריגה**, of beds, their division; of cabbage and its distance (7 sections). *d* and *e*. **כרם**, of vineyards, and their *Kilayim* (9 and 8 sections). *f*. **איזוח**, of the rights of a vine raised on an espalier (9 sections). *g*. **דמבריק**, of the layering of vines, spreading of vines, etc. (8 sections). *h*. **כלאי**, in how far *Kilayim* are forbidden among animals, in yoking together as well as in copulating, and what to do with bastards and some other animals (6 sections). *i*. **אין אסור**, of *Kilayim* in garments, especially of the mixture of wool and flax; of clothing-merchants and tailors; of felt and woven letters, etc. (10 sections).

5. **שביעית**, *Shevi'ith*, or the *Sabbatical year*, in ten chapters: *a*. **צד אימתי חורשין בשדה חאילן**, of fields with trees, and how long they may be cultivated in the sixth year (8 sections). *b*. **לא אה בשדה חלבל**, of open fields, and what may be done in them till the beginning of the seventh year (10 sections). *c*. **מאימתי מוציאין**, of manuring the field; of breaking stones and pulling down walls (10 sections). *d*. **בראשונה**, of cutting and pruning trees; from what time on it is permitted to eat of the fruits of the seventh year which have grown by themselves (10 sections). *e*. **בניה שוח**, concerning the white fig and summer-onions; which farm utensils cannot be sold and lent (9 sections). *f*. **שלוש ארצות**, of the difference of countries concerning the seventh year, and what fruits cannot be taken outside of the country (6 sections). *g*. **כלל גדול**, what things are subject to the right of the seventh year (7 sections). *h*. **כלל גדול**, what use may be made of fruits which have grown by themselves; what must be observed at their sale and the proceeds thereof; how they are to be gathered (11 sections). *i*. **הפנים**, of the fruits which may be bought, and of storing away the preserved fruits (9 sections). *j*. **שביעית**, of the remittance of debts (9 sections).

6. **תרומות**, *Terumoth*, or *oblations*, relates, in eleven chapters, to the heave-offering: what persons can give the *Terumoth*, and of which fruits; and of giving the *Terumoth* not according to number, measure, and weight (10 sections). *b*. **אין תרומין**, the *Terumoth* cannot be given from the pure for the impure; of distinguishing whether something was done purposely or by mistake; and that one kind of fruit can supply the *Terumoth* of another (6 sections). *c*. **התורם**, in which cases the *Terumoth* must be given a second time; how to determine the *Terumah*; of the *Terumah* of a Gentile (9 sections). *d* and *e*. **סאה**, of the quantity of the large *Terumah*; in which cases common fruit becomes not *medumma* (i. e. is to be given entirely as *Terumah*), in spite of having been mixed with *Terumah* (13 and 9 sections). *f*. **האכיל**, of the restitution of the *Terumah*, when a person has eaten thereof by mistake (5 sections). *g*. **האכיל**, when a person eats thereof with intention (7 sections). *h*. **האישה**, of the care that a *Terumah* get neither unclean nor poisoned (12 sections). *i*. **חזויר**, what is to be done in case *Terumah* has been sown (7 sections). *j*. **בצל**, how common fruits by the mere taste can become *Terumah* fruit (12 sections). *k*. **אין נותנין**, how the oil of a *Terumah* cannot be burned, when the priest cannot enjoy its light (10 sections).

7. **מעשרות**, *Maaseroth*, or *tithes*, due to the Levites, in five chapters: *a*. **אמר**, of the kinds of fruits subject to tithes, and from what time on they are due (8 sections). *b*. **המעשר**, of exceptions (8 sections). *c*. **הזכר**, where fruits become tithable (10 sections). *d*. **הזכר**, of preserving, picking out, and other cases exempted from tithes (6 sections). *e*. **הזכר**, of removing of plants; of buying and selling; of wine and seed that cannot be tithed (8 sections).

8. **מעשר שני**, *Maaser sheni*, or *second tithe*, which the Levites had to pay out of their tenth to the priests, in five chapters: *a*. **מעשר שני**, that this tenth cannot be disposed of in any way (7 sections). *b*. **מעשר שני ניתן**, only things necessary for eating, drinking, and anointing can be bought for the money of the tenth; what to do when tenth-money and common money are mixed together, or when tenth-money must be exchanged (10 sections). *c*. **לא יאמר**, fruits of the second tenth, when once in Jerusalem, cannot be taken out again (13 sections). *d*. **המוליך**, what must be observed at the price of the tenth, and how money and that which is found must be regarded (12 sections). *e*. **כרם רבני**, of a vineyard in its fourth year, the fruits of which are equally regarded as the fruits of the second tenth; and how the *biur*, or taking-away of the tenth, is performed in a solemn manner according to Deut. xxvi, 13 sq. (16 sections).

9. **חלה**, *Challah*, or *dough*, refers to the cake which the women were required to bring of kneaded dough to the priest, in four chapters: *a*. **דמשה דברים**, which fruits are subject to *Challah* (9 sections). *b* and *c*. **פירות** and **איכלין**, of special cases which need a more precise definition concerning *Challah*, and of the quantity of meal and its *Challah* (8 and 10 sections). *d*. **שתי נשים**, of counting together of different fruits, and the different rights of countries concerning *Challah* (11 sections).

10. **כרלה**, *Orlah*, lit. *foreskin*, of the forbidden fruits of the trees in Palestine during the first three years of their growth, in three chapters: *a*. **הניטל**, which trees are subject to the law of *Orlah* and which not (9 sections). *b*. **התרומה**, what to do in case of fruits of *Orlah* or *Kilayim* being mixed with other fruits; of the law concerning leaven, spices, and meat; what to do in case of holy and unholy, or Chollin, having been mixed up (17 sections). *c*. **בבד**, how the same law also concerns colors for dyeing purposes, and the fire used for cooking; and what is to be observed concerning the difference of countries (9 sections).

11. **בכורים**, *Bikkurim*, or *first-fruits*, in four chapters: *a*. **יש מביאין**, who is not entitled to offer the first-fruits, or who can offer them without observing the formula prescribed (Deut. xxvi, 3); of what and when they are to be offered or repaid (11 sections). *b*. **התרומה והבכורים**, of the difference of the first-fruits of the *Terumah* and the second tenth, especially of the pomegranate at the Feast of Tabernacles; of blood of men and of the animal *Coi* (probably a bastard of buck and roe), which must be distinguished from all animals (11 sections). *c*. **כיצד**, of the ceremonies to be observed at bringing the first-fruits to Jerusalem, and their rights (12 sections). *d*. **האדרוניס**, of the hermaphrodite (5 sections). (This chapter is *Boraitha*, or addition to the second chapter, and is wanting where only the *Mishna* is printed.)

## II. סדר מועד, *Seder Mō'ed* (Festive Solemnity).

This *Seder*, one of the most interesting, consists of twelve tractates:

12. **שבת**, *Shabbath*, containing twenty-four chapters, treats of the laws relating to the Sabbath, with respect to lights and oil used on that day, ovens in which articles of food were warmed on the Sabbath, and the dress of men and women used on the same day. It also enumerates thirty-nine kinds of work, by each of which, separately, the guilt of Sabbath-breaking may be incurred, viz.: 1, to sow; 2, to plough; 3, to mow; 4, to gather into sheaves; 5, to thresh; 6, to winnow; 7, to sort corn; 8, to grind; 9, to sieve; 10, to knead; 11, to bake; 12, to shear wool; 13, to wash wool; 14, to card; 15, to dye; 16, to spin; 17, to warp; 18, to shoot two threads; 19, to weave two threads; 20, to cut and tie two threads; 21, to tie; 22, to unite; 23, to sew two stitches; 24, to tear two threads with intent to sew; 25, to catch game; 26, to slaughter; 27, to skin; 28, to salt a hide; 29, to singe; 30, to tan; 31, to cut up a skin; 32, to write two letters; 33, to erase two letters with intent to write; 34, to build; 35, to demolish; 36, to extinguish fire; 37, to kindle fire; 38, to strike with a hammer; 39, to carry out of one property into another. It treats of the differences between the schools of Hillel and Shammai, etc., viz. *a*. **יצאות השבת**, of removals

on the Sabbath day; work to be avoided; discussion between the schools of Hillel and Shammai as to what constitutes work; work allowed (11 sections). *b. במה* (7 sections). *c. כירה*, of different ovens, and preparing and warming the meat on Sabbath; of pails for retention of the dripping oil or sparks of the lamps (6 sections). *d. במה נומנין*, of things to cover up pots to retain the heat, and of things not to cover up the pots (2 sections). *e. במה בהמה*, with what a beast is led forth or covered, especially a camel (4 sections). *f. במה אשה*, with what women and men may go out or not go out on the Sabbath; of various styles; of pinning the veil; of ribbons, etc. (10 sections). *g. בכל גרול*, of how many sin-offerings a man may be responsible for under certain circumstances for ignorantly trespassing against the Sabbath; the thirty-nine kinds of forbidden work; rule and measure for things the carrying of which makes liable to a sin-offering (4 sections). *h. המוציא יין*, of the measure of fluids; of cords, bulrushes, paper, and all possible portable things (7 sections). *i. ארע*, of things the carrying of which makes unclean, and of the measure of the portable things on the Sabbath day (7 sections). *j. המצניע*, of different kinds of portable things; of carrying living or dead men, and of many other things (6 sections). *k. דוורוק*, of throwing over the street, ditch, and rock, river and land; of the distance how far it can be thrown, and the presumable error (6 sections). *l. הוינה*, of building, hammering, planing, boring, ploughing, gathering wood, pruning, picking up, writing (6 sections). *m. רבי אליעזר*, of weaving, sewing, cutting, washing, beating, catching game, etc. (7 sections). *n. שמינה*, of catching game; of making salt-water; of forbidden medicines, toothache and pains in the loins. *o. קשרים*, of tying and untying of knots; of folding garments, and making the beds (8 sections). *p. כל כחבי*, of saving things out of a conflagration; of extinguishing and covering, etc. (8 sections). *q. הכלים*, of vessels which may be moved on the Sabbath (8 sections). *r. מפנין*, what things may be moved for making room; of hens, calves, asses; of leading the child; of an animal that calves; a woman that is to be delivered, and of a child (3 sections). *s. רבי אליעזר*, of circumcision on the Sabbath, and what belongs to it (6 sections). *t. אליעזר אומר*, of straining the wine; of fodder; of cleansing the crib; of straw on the beds and clothes-press (5 sections). *u. נרגל*, of things permitted to be carried; of cleaning a pillow; the table, of picking up the crumbs; and of sponges (3 sections). *v. חבירה*, of casks, cisterns, bathing-clothes, calves, etc.; of emetics; of setting a limb or a rupture (6 sections). *w. שואל אדם*, of borrowing; of counting from a book, drawing lots, hiring laborers; of waiting at the end of a Sabbath-way; of mourning-pipes, coffin, and grave which a heathen has dug; what may be done to the dead (5 sections). *x. מי שחושך*, of one who is overtaken by the dusk on the road; of feeding the animals; of pumpkins and carrion; of several things permitted on the Sabbath (5 sections).

13. *ערוברין*, *Erubin*, or *mingling*, in ten chapters, deals with those ceremonies by which the Sabbath boundary was extended; "mingling" a whole town into one fictitious yard, so that carrying within it should not be unlawful: *a. מבירי*, concerning the entry to an alley (10 sections). *b. עושין פסין*, concerning enclosures (6 sections). *c. בכל*, concerning a holyday or a Friday (9 sections). *d. שהוציאנו*, *מי*, concerning the stepping beyond the Sabbath limit (11 sections). *e. מצרבי*, concerning the enlarging the bounds of a city (9 sections). *f. and g. חלוק*, etc., concerning the neighborhood (10 and 11 sections). *h. כיצד משהתפין*, concerning what may be done in a yard (11 sections). *i. כל גנות*, concerning roofs, etc. (4 sections). *j. המוצא תפילין*, concerning some different Sabbath laws (15 sections).

14. *פסחים*, *Pesachim*, in ten chapters, treats of the paschal festival and things connected with its celebration: *a.*

*אור לארבעה כל שעה*, of searching for leaven; how to put it away; of the Easter-cake, and the herbs for the bitter herbs (7 and 8 sections). *c. אלו יוברין*, of the care to avoid leaven (8 sections). *d. מקום שנהגו*, of the works on the day before Easter, and what kinds of work are permitted (9 sections). *e. חמיר נשחט*, when and how to kill the paschal lamb; of cleaning and skinning the same, and how it becomes disallowed (10 sections). *f. אלו דברים בפסח*, how the Passover abrogates the command against work on the Sabbath; of the offering of festival sacrifices; of a sacrifice having been changed with another (6 sections). *g. כיצד צולין*, of roasting the lamb; how it becomes unclean; what to do with the remaining parts (18 sections). *h. האשה בזמן*, what persons are allowed to eat it and what are not; of companions (8 sections). *i. מי שהיא*, of the second Easter; of the Easter in Egypt, and of divers cases when paschal lambs have been exchanged (11 sections). *j. ערבי*, of the order at the Easter-meal after the four cups of wine which are necessary for it (9 sections).

15. *שקלים*, *Shekalim*, or *shekels*, in eight chapters, contains laws relating to the half-shekel which was paid for the support of public worship: *a. באחר באר*, how the money-changers take their seat at the money-tables, on the 15th of Adar, where the people exchange their money (7 sections). *b. מצרפין*, of changing, and of coins used in former times; of the remaining money (5 sections). *c. בשלשה פריקים*, how the paid shekels may be taken again from the treasury (4 sections). *d. החרומה*, how they are to be spent, and what to do with the balance (9 sections). *e. אלו הן הממנין*, of the offices in the sanctuary, and of the seals (6 sections). *f. שלשה עשר*, how often the number thirteen occurred in the sanctuary (6 sections). *g. מנחת שנמצאו*, of money and other things which are found, when it is doubtful to whom they belong (7 sections). *h. כל הרוקין*, of other dubious things; resolution that the shekel and firstlings have ceased with the Temple (8 sections).

16. *יומא*, *Yoma*, or the *Day of Atonement*, in eight chapters: *a. שבעת ימים*, of the preparations of the high-priest (8 sections). *b. בראשונה*, of casting lots, and of the offerings (7 sections). *c. אמר להם*, of the beginning of the Day of Atonement; of bathing, washing, and dressing the high-priest, and of presenting the bullocks and goats (11 sections). *d. טרף בקלפי*, of casting the lots upon the goats, and the confession (6 sections). *e. הוציאו לו*, what was to be done in the Holy of Holies (7 sections). *f. שני שצירי*, of sending forth the goat (3 sections). *g. בא לו*, what the high-priest was meanwhile to do, and until the end of his service at night (5 sections). *h. יום הכשורים*, of the privileges of fasting; how man is forgiven, and how he is not forgiven (9 sections).

17. *סוכה*, *Sukkah*, or the *Feast of Tabernacles*, in five chapters: *a. סוכה שהיא*, of the size and covering of the Sukkah (11 sections). *b. דושין*, how often meals should be eaten in it; exemptions (9 sections). *c. לולב*, of the palm-branches, myrtle-boughs, willows, citrons; what constitutes their fitness, and what not; how to tie and stake them (15 sections). *d. לילב וצריבה*, how many days these ceremonies last; of the pouring-out of the water (10 sections). *e. דחליל*, of the rejoicings; how to divide the offerings and shew-bread on this festival among the orders of the priests (8 sections).

18. *יום טוב*, *Yom Tob*, i. e. *good day*, or, as it is generally called, *ביצה*, *Betzah*, i. e. *the egg*, from the word with which it commences, containing five chapters: *a. ביצה*, whether an egg laid on the festival may be eaten thereon. On this question the schools of Shammai and Hillel are divided; the former decide in the affirmative, the latter in the negative (10 sections). *b. יום טוב*, or *עירוב תבשילין*, i. e. of connecting the meals on the Sabbath and other subsequent holidays. Maimonides gives the following account, which will enable the reader to understand this expression: "The rabbins, in order to pre-

vent cooking or preparation of food on the festival for the following working-days, have prohibited it even for the Sabbath immediately following. They have ordered, however, that some article of food should be prepared on the day before the festival, to which more may be cooked, in addition, on the festival; which has been ordered with the intention of reminding the general mass that it is not lawful to prepare any food on the festival which is not eaten thereon. It is called **צ'ריב**, or mixture, because it mixes or combines the preparation of food necessary for the festival with that required for the family's use on the Sabbath" (*Hilehoth Yom Tob*, ch. vi). **אין צ'ריב**, of catching and killing animals; how to buy the necessary things, without mentioning the money (8 sections). **חמביא**, of carrying, especially wood not required for burning (7 sections). **בשילין**, enumeration and precise definition of classes of things which cannot be done on a feast-day, still less on a Sabbath day (7 sections).

19. **ראש השנה**, *Rosh Hash-shanah*, or *New-year*, in four chapters: **א. ארבעה ראשי שנים**, of the four New-years (9 sections). **ב. אם אינן**, of examining witnesses who witnessed the new moon, and of announcing it on the top of the mountains by fire (9 sections). **ג. ראוהו**, of announcing the new moon and new year with cornets (8 sections). **ד. ליום טוב של**, what to do in case the New-year falls on the Sabbath, and of the order of service on the New-year (9 sections).

20. **תענית**, *Taanith*, or *fasting*, in four chapters: **א. בארמי**, of prayer for rain, and proclamations of fasting in case the rain does not come in due season (7 sections). **ב. סדר תענית**, of the ceremonies and prayers on the great fast-days (10 sections). **ג. סדר תעניות אלו**, of other occasions of fasting; of not blowing alarms; when to cease fasting, in case it rains (9 sections). **ד. בגלשה**, of the twenty-four stations or delegates; their fastings, lessons; of bringing wood for the altar; of the 17th of Tammuz and of the 9th and 15th of Ab (3 sections). The Mishna tells us the following concerning these dates: "On the 17th of Tammuz the stone tables were broken and the daily offering ceased, and the city was broken up, and Apostemus (i. e. Antiochus Epiphanes) burned the law, and he set up an image in the Temple. On the 9th of Ab it was proclaimed to our fathers that they should not enter the land, and the house was ruined for the first and second time, and Bithur was taken, and the city was ploughed up." Rabban Simon, the son of Gamaliel, said, "There were no holidays in Israel like the 15th of Ab, or like the Day of Atonement, because in them the daughters of Jerusalem promenaded in white garments, borrowed, that no one might be ashamed of her poverty. All these garments must be baptized. And the daughters of Jerusalem promenaded and danced in the vineyards. And what did they say? 'Look here, young man, and see whom you choose; look out for beauty, look for family.' 'Favor is deceitful, and beauty is vain; but a woman that feareth the Lord, she shall be praised;' and it is said, 'Give her of the fruit of her hands, and let her own works praise her in the gates' (Prov. xxxi, 30, 31). And it is also said: 'Go forth, O ye daughters of Zion, and behold king Solomon with the crown wherewith his mother crowned him in the day of his espousals, and in the day of the gladness of his heart'" (Song of Solomon, iii, 11).

21. **מגילה**, *Megillah*, or the *roll* of the book of Esther, in four chapters: **א. מגילה**, of the days on which the Megillah is read (11 sections). The Gemara, on the fourth section of this Mishna (fol. 7, col. 2), tells us that the Jews are directed to get so drunk on the Feast of Purim that they cannot discern the difference between "Blessed be Mordecai and cursed be Haman" and "Cursed be Mordecai and blessed be Haman." On the same page we read, "Rabba and rabbi Zira made their Purim entertainment together. When Rabba got drunk, he arose and killed rabbi Zira. On the following day he prayed for mercy, and restored him to life. The following year Rabba proposed to him again to make their Purim entertainment together; but he answered, 'Miracles don't happen every day.'" **ב. הקורא**, how to read the Megillah; what can only be

done by day, and what can be done by night (6 sections). **ג. בני חצר**, of the sale of holy things; of the lessons for the Sabbath during the month of Adar, and for other festivals (6 sections). **ד. חקורא את המגילה צומד**, of the persons required for the lessons; how many verses each person may read; who must be silenced in public prayer; of the passages which at the public reading are to be omitted, or at least not to be interpreted (10 sections). For these passages, see the following article, **TALMUD, THE, IN THE TIME OF THE OLD TESTAMENT**.

22. **מועד קטן**, *Môed Katon*, or *small holyday*, in three chapters, treats of the half-holidays between the first and the last day of the Passover, and of the Feast of Tabernacles: **א. משקין**, of working in the field; of graves, and of making coffins; and what pertains to a building (10 sections). **ב. מי שהפך**, of the work done on fruits; what may be carried and bought (5 sections). **ג. ואלו מגלחין**, of shaving, washing, writing, and mourning (9 sections).

23. **חגיגה**, *Chagigah*, or *feasting*, in three chapters, speaks of the voluntary sacrifices—other than the paschal lamb—offered by individual Jews on the great feasts: **א. דוכל חייבין**, of the persons who are obliged to appear at the feasts (8 sections). **ב. אין דורשין**, of sundry ordinances having no direct connection with the subject indicated by the title of the treatise: thus the first section of this second chapter opens with "Men must not lecture on matters of incest (or adultery) before three persons, nor on matters of the creation before two, nor on the chariot before one, unless he be wise and intelligent by his own knowledge," etc.; of laying-on of hands (7 sections). **ג. חומר בקדש**, in how far the rules for holy things are more weighty than for the heave-offering; in how far certain persons may be credited; how the vessels of the sanctuary were cleaned again after the feast (8 sections).

### III. סדר נשים, *Seder Nashim* (Women).

This *Seder* is composed of seven treatises, viz.:

24. **יבמות**, *Yebamoth*, enters into the minutest details as to the peculiar Jewish precept of *yibbûm*, or the obligation of marrying the childless widow of a brother, with the alternative disgrace of the performance of the *chalit'ah*, or removal of the shoe of the recalcitrant, referred to in the book of Ruth. It contains sixteen chapters, in 123 sections. **א.** The opening section of this treatise will give a good idea of the subject treated there. "Fifteen women free their rival wives and their rival's rivals from the *chalit'ah* and *yibbûm ad infinitum*, viz. his daughter (the dead brother's wife being the daughter of a surviving brother), son's daughter, or daughter's daughter; his wife's daughter, wife's son's daughter, or wife's daughter's daughter; his mother-in-law, mother of his mother-in-law, the mother of his father-in-law; his maternal sister, his mother's sister, or his wife's sister; the widow of his maternal brother, or the widow of a brother who was not alive at the same time with him, and his daughter-in-law. All these free their rival wives and their rival's rivals from the *chalit'ah* and *yibbûm*. If, however, any of these had died, or refused her consent, or had been divorced, or is unfit for procreation, their rivals may be married by *yibbûm*; yet refusal of consent or unfitness [to procreate] cannot be applied in respect to his mother-in-law, or the mother of his father-in-law." This Mishna is called **חמש נשים** (4 sections). **ב. כצד אשה**, of cases where a brother was born after the married brother's death; of cases where a brother is to be freed either according to the command or for the sacredness of the person; of the equal right of brothers and sons; of betrothing to persons who cannot be distinguished from each other; of wives who cannot be married (10 sections). **ג. ארבעה אחין**, of hypothetical cases, e. g. when brothers married sisters, etc. (10 sections). **ד. הוולד**, of the sister-in-law who was found to be pregnant; when she gets the heritage; of her marriage contract; of her relatives; how long she must wait; what constitutes a *mamzer*, i. e. an illegitimate child; that the sister of the deceased wife may be married (13 sections). **ה. רבן גמליא**, of the rights of a marriage contract and divorce (6 sections). **ו. הבא על**, whom the high-priest cannot marry; what constitutes a barren

woman, or a prostitute; of the duty of begetting children (6 sections). *g. אלמנה*, who is entitled, under these circumstances, to eat of the heave-offering or not (6 sections). *הזכר א*, of one that is wounded in the stones, and of one that has his privy member cut off; of the Ammonites and Moabites; of the hermaphrodite, etc. (6 sections). *ז. ישי מוריון*, of women, or brothers-in-law, who, on account of their relationship, can neither marry nor be married, and of the prohibited degrees (6 sections). *י. האשה שחלק*, of false news that one or the other died; of the carnal intercourse of one who is not yet marriageable (9 sections). *א. נזשיאין*, of violated women, proselytes, and interchanged children (7 sections). *ז. המצות*, of the ceremonies of the chalitsh (6 sections). *מ. בוש אומרים*, and *נ. חרש*, of the refusal of one who is not of age to marry a man; of the right of deaf persons (13 and 4 sections). *ו. האשה שה לכה*, and *פ. האשה שהלך*, how the evidence that one is dead receives credence, and its validity as to the right of the wife marrying again; and the Levirate (q. v.) (10 and 7 sections). Several portions of this treatise are so offensive to all feelings of delicacy that they have been left untranslated by the English translators, and are either printed in Hebrew or represented by asterisks alone.

25. *כתובות*, *Kethuboth*, in thirteen chapters, contains the laws relating to marriage contracts: *א. בהולא*, of such as are regarded as virgins, and of the sum promised by the bridegroom to the bride (10 sections). *ב. האשה*, whether a person may testify of himself, and of the credibility of the witnesses (10 sections). *א. נכרה*, of the penalty for violating a virgin (9 sections). *ד. נכרה*, to whom the fine belongs; of the rights of a father over his daughter; of a husband over his wife; what the husband owes the wife; of the heritage of sons and daughters (12 sections). *א. אה עכפא*, of the addition to the kethubah (or the sum stipulated in the marriage contract); of the duties belonging to the wife; of conjugal duties; to how much a wife is entitled for her living (9 sections). *ז. מציאת*, what the wife owes to her husband, and what belongs to him; of assigning against the sum which the wife has brought in, and of the dowry of a daughter (7 sections). *ג. המדיר*, of the vows of a woman, and of the defects which cause a divorce (10 sections). *ז. האשה שנפלו*, of the rights of the husband to the property which fell to his wife during her marriage, and *vice versa* (8 sections). *ז. הכורב*, of the privileges at the meeting of creditors, and before whom the wife has to swear that she has received nothing of her kethubah (9 sections). *י. מה שהיה נשוי*, of cases where a man has more than one wife (6 sections). *א. אלמנה ניוונה*, of the rights of widows, and of the sale of the kethubah which is invested in immovable property (6 sections). *ז. הונשא את האשה*, of the right of a daughter of a former husband, and of the right of a widow to remain in her husband's house (4 sections). *מ. שני דייני*, different opinions of two judges of Jerusalem; how a wife may not be taken from one place to another; of the privileges in living in the land of Israel and at Jerusalem; as to the money in which the kethubah must be paid (11 sections).

26. *נדרים*, *Nedarim*, or *vows*, in eleven chapters: *א. כל כנוי*, of the expressions for vows, since a person is obliged to keep them, even if the words were wrongly and not correctly pronounced (4 sections). *ב. יאגל מותרין*, what words do not constitute a vow; how they are to be distinguished from an oath; what restrictions and ambiguities may occur (5 sections). *א. ארבעה נדרים*, of four kinds of vows which are regarded as void; of the vows made to robbers, publicans, etc. (11 sections). *ד. אין בין המדיר*, and *ה. השותפין שנדרי*, of the case where a person has consented to derive no advantage from another or to be to him of no use, and how one can make something prohibited to the other (8 and 6 sections). *ז. הנודר מן המבשול*, and *ה. הנודר מן הירק*, of different kinds of eatables, in case they have been renounced, etc. (10 and 9 sections). *א. קונס יין*, concerning the time

over which the vow extends (7 sections). *ז. אליעזר*, of divers causes for which a vow may be made (9 sections). *י. נכרה*, who has the right of making the vow of a wife or daughter void (8 sections). *א. ואגל נדרים*, what vows can be made void by the husband or father, and what in case of ignorance or error (12 sections).

27. *נזיר*, *Nazir*, in nine chapters, relating to vows of abstinence: *א. כל כנוי נזירות*, of the form in which such a vow can be made; of the difference of Samson's vow of abstinence from others (7 sections). *ב. הריני נזיר*, what vows are binding and what not (10 sections). *א. מי שאמר*, of the remission and removing the same (7 sections). *א. בית שמאי*, what is to be done in cases of error and other dubious cases (7 sections). *ז. שלשה אסורין*, of things prohibited to a Nazarite (11 sections). *ג. כהן גדול*, for what uncleanness he must shave himself (4 sections). *א. שני נזירים*, of some doubtful cases (2 sections). *ז. העכום*, of the power which, in divers cases, leads to the supposition that he is unclean; whether Samuel was a Nazarite (5 sections).

28. *סוטה*, *Sotah*, or the *erring woman*, in nine chapters: *א. המכנא*, what constitutes an erring woman; who must drink the bitter water; how she is to be presented in public, etc. (9 sections). *ב. דיה מביא*, of writing the curses, and the ceremonies connected with it (6 sections). *א. דיה*, of the offering of the sotah, and the fate of the woman found guilty (8 sections). *ד. ארוסה*, where the bitter water is not to be used (5 sections). *א. כשם שהמים*, that the bitter water should also be taken by the adulterer (5 sections). *א. מי שקינא*, of the required testimony (4 sections). *ג. אלן נאמרין*, of formulas to be spoken in the holy tongue, and of such not to be spoken in that tongue (8 sections). *א. משה*, of the address of the priest anointed as king (7 sections). *ז. נבלה*, of killing the helper for expiation of an uncertain murder; of different things which have been abolished, and what will be at the time of the Messiah (11 sections). The last sections of this Mishna are very interesting because they foretell the signs of the approaching Messiah, and wind up with the following remarkable words: "In the time of the Messiah the people will be impudent and be given to drinking; public-houses will flourish and the vine will be dear; none will care for punishment, and the learned will be driven from one place to the other, and no one will have compassion on them; the wisdom of the scribes will be stupefying; fear of God will be despised; truth will be oppressed, and the wise will become less. The young men will shame the old, the old will rise against the young; the son will despise the father; the daughter will rise against the mother, the daughter-in-law against the mother-in-law, and a man's foes shall be they of his own household. The face of that generation is as the face of a dog; the son shall not reverence the father!"

29. *גטין*, *Gittin*, or *divorce bills*, in nine chapters, treats of divorce, and the writing given to the wife on that occasion; how it must be written, etc.: *א. המביא גט*, of sending a divorce, and what must be observed in case the husband sends one to his wife (6 sections). *ב. המביא גט*, when, how, and on what it must be written (7 sections). *א. כל גט*, that it must be written in the name of the wife (8 sections). *ד. השולח גט*, sundry enactments, made for the better existence of the world (9 sections). *א. הנזירין*, enactments for the sake of peace (9 sections). *א. דאמר*, sundry cases of the bill of divorce (7 sections). *ג. מי שאחור*, of additional conditions (9 sections). *א. הזורק גט*, of throwing the divorce bill, its different effects; what constitutes a bald bill of divorce (i. e. one which according to the Mishna has more folds than subscribing witnesses) (10 sections). *ז. המגרש*, of the signature of witnesses, and of the case that constitutes a divorce, of which the school of Shammai says, "No man may divorce his wife, unless he find

in her scandalous behavior, for it is said (Deut. xxiv, 1), 'Because he found in her some uncleanness;' but the school of Hillel says, 'Even if she spoiled his food, because it is said some uncleanness.' R. Akiba says, 'Even if he found one handsomer than she, for it is said, if it happen that she found no favor in his eyes.'"

30. *Kiddushin*, *Kiddushin*, or *betrothals*, in four chapters: *a*.

*האשה נקנית*, of the different ways in which a wife is acquired, and how she regains her liberty; of the difference of prayers which are incumbent upon the man and wife, in and outside of the land of Israel (10 sections). *b*. *האיש*, of valid and invalid betrothals (10 sections). *c*.

*האומר לחברו*, of betrothals made under certain conditions; of children of different marriages (13 sections). *d*. *עשרה ירושין*, of the different kinds of families which may intermarry and which cannot; of the evidence of a known or unknown lineage; rules according to which a man ought not to be in a secluded place alone with women; counsels as to the trade or profession in which an Israelite should bring up his son; occupations which an unmarried man should not follow, on account of the great facilities they offer for unchaste practices. It also states that all ass-drivers are wicked, camel-drivers are honest, sailors are pious, physicians are destined for hell, and butchers are company for Amalek (14 sections).

#### IV. *סדר נזיקין*, *Seder Nesikin* (Damages).

This *Seder* contains ten tractates:

31. *Baba Kamma*, or the *first gate*, so called because in the East law is often administered in the gateway of a city. It treats, in ten chapters, of damages: *a*. *ארבעה אבות*, of four kinds of damages, restitution and its amount (4 sections). *b*. *כיצד הרגל*, how an animal can cause damage, and of the owner who is obliged to make restitution (6 sections). *c*. *הזכירה*, of damage caused by men; of goring oxen (11 sections). *d* and *e*. *שור*, continuation, and of damage caused by an open pit (9 and 7 sections). *f*. *הכנים*, of damage caused by negligent feeding of cattle and by fire (6 sections). *g*. *מריבה*, of restitution, when it is double, twofold or fivefold (7 sections). *h*. *החובל*, of restitution for hurting or wounding (7 sections). *i*. *הגדול*, what to do, in case some change happens with something robbed; of the fifth part above the usual restitution, in case of perjury (12 sections). *j*. *הגדול ומאכל*, of sundry cases, applicable to the restitution of stolen goods (10 sections).

32. *Baba Metiah*, or the *middle gate*, in ten chapters, treats of claims resulting from trusts: *a*. *שנים*, *אלי מציאות*, what to do with goods which were found (8 and 11 sections). *c*. *המפקיד*, of deposits (12 sections). *d*. *הזוכה*, of buying, and different kinds of cheating (12 sections). *e*. *האזור*, of different kinds of usury and overtaxing (11 sections). *f*. *השוכר*, of the rights of hiring (8 sections). *g*. *השוכר את חפצו*, of the rights of laborers concerning their eating, and what they may eat of the eatables they work on; of the four kinds of keeping, and what is meant by *ones*, i. e. *casus fortuitus* (11 sections). *h*. *השואל*, continuation, and again of hiring (9 sections). *i*. *המקבל*, of the rights among farmers; of wages, and taking a pledge (18 sections). *j*. *חביר*, of divers cases when something belonging to two has fallen in; of the rights of public places (6 sections).

33. *Baba Bathra*, or the *last gate*, in ten chapters, treats of the partition of immovables, laws of tenantry, joint occupation, and rights of common: *a*. *השוחרפין*, of the partition of such things as are in common; what each has to contribute, and how one can be obliged to make a partition (6 sections). *b*. *לא יחפור*, of divers kinds of servitude; what and how far something must be removed from the neighbor's premises for different causes (14 sections). *c*. *הזקת*, of superannuation of things, and its rights (12 sections). *d*. *המוכר את חביתו*, what is sold along with the sale (9 sections). *e*. *המוכר*, continuation, and how a sale may be made

void (11 sections). *f*. *המוכר פירות*, for what a person must be good; of the required size of different places and the right of passing through (8 sections). *g*. *הואמר*, of becoming security for a sold acre and of other things pertaining to it (4 sections). *h*. *יש נוחלין*, of inheritances (8 sections). *i*. *מיר שמיר*, of the division of property (10 sections). *j*. *גט פשוט*, what is required in order to make a contract legal (8 sections).

34. *Sanhedrin*, or *courts of justice*, in eleven chapters: *a*. *דירני במנוחה*, of the difference of the three tribunals of *a*, at least three persons; *b*, the small Sanhedrim of twenty-three persons; and *g*, the great Sanhedrim of seventy-one persons (6 sections). *b*. *כהן גדול*, of the privileges of the high-priest and king (5 sections). *ידיני*, of appointing judges; unfitness for being judge and witness; of hearing the witnesses and publishing the sentence (8 sections). *d*. *אחד*, of judgments in money and judgments in souls; a description how they sat in judgment (5 sections). *e*. *חיי בדיקין*, again of examining witnesses, and what must be observed in capital punishments (5 sections). *f*. *לגמר*, of stoning in special (6 sections). *g*. *ארבע מיתות*, of the other capital punishments; those that were to be stoned (11 sections). *h*. *בן סורר*, of stubborn sons and their punishments, with so many restrictions, however, that this case hardly could ever have occurred (7 sections). *i*. *ואלו הן*, of criminals who were burned or beheaded (6 sections). *j*. *כל ישראל*, of those who have part in the world to come, viz. "all Israel" (6 sections). But the following have no share: he who says that the resurrection of the dead is not found in the law, or that there is no revealed law from heaven, and the Epicurean. Besides, there are excluded from the world to come, Jeroboam, Ahab, Manasseh, Balaam, Doeg, Ahitophel, and Gehazi. So, likewise, the generation of the Deluge; that of the Dispersion (Gen. xi, 8); the men of Sodom, the spies, the generation of the wilderness, the congregation of Korah, and the men of a city given to idolatry. In the Gemara a good deal is spoken of the Messiah. *k*. *אלו הן הזנבין*, of those that are strangled, especially rebellious elders and their punishment (6 sections).

35. *Makkoth*, or *stripes*, in three chapters, treats of corporal punishments: *a*. *כיצד ידעו*, in what cases false witnesses are inflicted with the stripes, and of the mode of procedure against false witnesses in general (10 sections). *b*. *ואלו הן*, of unintentional murders, and the cities of refuge (8 sections). *c*. *ואלו הן*, of criminals deserving the stripes; how they should be inflicted; why forty save one (?); of stopping in case the delinquent is regarded as too weak; that such as have suffered this penalty are free from the punishment of extermination; of the reward of those who keep the law; why so many laws were given to Israel (16 sections).

36. *Shevuoth*, or *oaths*, in eight chapters: *a*. *שבועות שתיים*, of different kinds wherein a person is conscious or unconscious of having touched anything unclean (because it is treated under the head of oaths, Lev. v, 2); of the atonement through sacrifices; what sins were atoned by the different kinds of sacrifices (7 sections). *b*. *ירידות*, how far the sanctity of the court of the Temple reaches (5 sections). *c*. *שבועות*, of forswearing, its kinds and degrees (11 sections). *d*. *שבועת זכרה*, of the oath of witnesses; of blasphemy and cursing (13 sections). *e*. *שבועת הפקדון*, of the oath mentioned in Lev. vi, 3, and of the perjurer (5 sections). *f*. *שבועת הדיינין*, of the oath demanded by the court, when it must be taken or not, and what ought to be testified (7 sections). *g*. *כל השבעין*, of such oaths as are for the benefit of him that swears (8 sections). *h*. *ארבעה שומרין*, of the different watchmen who must be security for goods; how far it goes; in what cases they must replace it or swear; what in case they lied (6 sections).

37. *Edayoth*, or *testimonies*, in eight chapters. It is so called because it consists of laws which tried and trustworthy teachers attested to have been adopted by the elder teachers, in Sanhedrim assembled: *a*. *שמאי*, enact-

ments in which the other sages deviate from the schools of Shammai and Hillel, or wherein the school of Hillel is followed, or wherein the school of Hillel has given way to that of Shammai (14 sections). *b. רבי חנינא*, enactments of different rabbins, especially of R. Ishmael and R. Akiba on mostly unimportant things (10 sections). *c. כל המצות*, enactments of R. Dosa on divers defilements (12 sections). *d. אלי דברים*, laws in which the school of Shammai is more lenient than that of Hillel (12 sections). *e. רבי יהודה*, laws which R. Akiba would not take back (7 sections). *f. רבי יהודה בן*, of different kinds of defilement on which disputes have taken place with R. Eliezer (3 sections). *g* and *h. ירושלמי*, of some minor points which cannot be brought under one common nomenclature; at the end we read that Elijah the Prophet will finally determine all disputed points of the sages and will bring peace (9 and 7 sections).

38. *צבורה זרה*, *Abodah Zarah*, or idolatry, in five chapters. This treatise is wanting in the Basle edition of 1578, because severe reflections upon Jesus Christ and his followers were found therein by the censor: *a. לפני ארדיהן*, what must be observed concerning idolatrous feasts, and of things not to be sold to idolaters (9 sections). *b. אין*, of divers forbidden occasions which tend towards a near relation with idolaters; of the use that can be made of their goods, especially eatables (7 sections). *c. כל הצלמים*, of idols, temples, altars, and groves (10 sections). *d. רבי ישמעאל*, of what belongs to an idol, and of desecrating an idol; prohibition of wine of libation, and of every wine which was only touched by a heathen, because even the slightest libation could have made it sacrificial wine (12 sections). *e. השוכר*, continuation of things with which wine could have been mixed up; how to cleanse utensils bought of a heathen for eating purposes (12 sections).

39. *אבות*, *Aboth*, or *פרקי אבות*, *Pirkey Aboth*, contains the ethical maxims of the fathers of the Mishna. It is impossible to give an analysis of the six chapters, because they all contain maxims without any chronological order. This treatise speaks of the oral law, its transmission, names of the "receivers," and contains maxims, apothegms, and the wisdom of the wise. The first chapter has 18, the second 16, the third 18, the fourth 22, the fifth 23, and the sixth 10 sections. A more detailed account of it has been given in the art. *פירא אבות* (q. v.).

40. *הוריות*, *Horayoth*, or *decisions*, in three chapters, treats of the manner of pronouncing sentences and other matters relating to judges and their functions, but which, though erroneous, still were observed, and for which a sin-offering was to be brought according to Lev. iv, 18: *a. הורו*, in what cases and under what circumstances such offerings were to be brought by the congregation or not (5 sections). *b. הורה כהן*, of the sin-offering of an anointed priest and prince (7 sections). *c. כהן משיח*, who is meant by an anointed priest and prince; of the difference between an anointed priest and one only invested with the priesthood; of the prerogatives of a high-priest before a common priest; of the male sex before the female; finally, of the order of precedence among those who profess the Jewish religion, that a learned precedes an unlearned (8 sections).

#### V. סדר קדשים, *Seder Kodaschim* (Consecrations).

This *Seder* contains eleven tractsates:

41. *זבחים*, *Zebachim*, or *sacrifices*, in nineteen chapters: *a. כל הזבחים*, in how far every sacrifice must be regarded with the intention that it shall be such a sacrifice (4 sections). *b. כל הזבחים שקבל*, and *c. כל המסולין*, how it becomes unfit or an abomination (5 and 6 sections). *d. בית שמאי*, of sprinkling the blood (6 sections). *e. מוקד*, of the difference between the most holy sacrifices and those of less holiness (8 sections). *f. קדשי*, of the place of the altar where every sacrifice has to be offered (7 sections). *g. חטאת הבהמה*, of the sacrifice of birds (6 sections). *h. כל הזבחים שנתערבו*, of cases where something of the sanctified has been changed with the other parts (12 sections). *i. המזבח*,

how the altar sanctifies the offered part (7 sections). *j. חזיר*, of the order in which sacrifices must be brought; which precedes the other (8 sections). *k. דם*, of washing the dress, etc., on which the blood of a sin-offering has come (8 sections). *l. טביל יום*, to whom the skins belong and where they go (6 sections). *m. השוחט*, of divers trespasses, when trespass has been committed unconsciously during the sacrificial service (8 sections). *n. פרת חטאת*, of the different places of sacrificial service during different periods (Gilgal, Shiloh, Nobh, Gibeon, Jerusalem), and of the difference between the altar and the heights (10 sections).

42. *מנחות*, *Menachoth*, or *meat-offerings*, in eighteen chapters: *a. כל המנחות*, of taking a handful; what corresponds in sacrifices to the act of sacrificing, when it becomes unfit or an abomination (4 sections). *b* and *c. חוקימן*, and *d. התכנה*, according to the different kinds of meat-offerings (5, 7, and 5 sections). *e. כל המנחות*, of these different kinds and their treatment (9 and 7 sections). *f. חזיר*, of the thank-offering and of the Nazarite's offering (6 sections). *h. קרבנו*, whence the necessary good things were taken (7 sections). *i. שתי מדות*, of the measures in the sanctuary; of the drink-offerings and the laying-on of hands (9 sections). *j. רבי ישמעאל*, of the wave-loaf (9 sections). *k. שתי הלחם*, of the Pentecostal and shew-breads (9 sections). *l. מנחות*, of changes in the offering (5 sections). *m. ער*, of indefinite vows; of the Onias temple in Egypt; a correct exposition of the words "a sweet savor" (11 sections).

43. *חולין*, *Cholin*, or *unconsecrated things*, in seventeen chapters: *a. חכל שוחטין*, who may slaughter; where-with and where it can be slaughtered (7 sections). *b. השוחט אחר*, of cutting through the windpipe and œsophagus, in front or at the side, and how the slaughtering becomes unfit (10 sections). *c. טרופות*, what animals are no more *kashár*, i. e. lawful, but *trepháh*, i. e. unlawful: the signs of clean fowls, grasshoppers, and fishes (7 sections). *d. בהמה המקשה*, enactments concerning an animal fetus (7 sections). *e. אוחו ואת בנו*, of the prohibition against slaughtering an animal and the young on the same day (5 sections). *f. כיסור הדם*, the precept of covering the blood of wild animals and fowl (7 sections). *g. גירי הנשה*, the precept concerning the prohibition of eating the sinew which shrank (6 sections). *h. כל הבשר*, the prohibition to boil any kind of flesh in milk (6 sections). *i. תנור והירטב*, pollution communicated by a carcass or *trepháh* (8 sections). *j. חזיר*, of the oblations due to the priest from the slaughtered animal (4 sections). *k. ראשית הנו*, of the firstlings of the fleece (2 sections). *l. שלוח חקן*, the precept of letting the parent bird, found in the nest, fly away (5 sections).

44. *בכורות*, *Bekoroth*, or *first-born*, in nine chapters: *a. חלוקת עובר*, of the redemption of the first-born of an ass; how to redeem it (7 sections). *b. חלוקת עובר*, when the first-born of an animal is not to be given; of some defects of a sanctified animal; of sundry dubious cases as to what constitutes the first-born (9 sections). *c. חלוקת בהמה*, of the sign of the birth of the first-born; of the wool of a first-born (4 sections). *d. עד כמה*, how long the first-born must be raised up before it is given to the priest; what must be paid for the inspection (10 sections). *e. כל מסולי*, and *f. כל מימין*, of the defects which make a first-born unfit for sacrifice or service in the sanctuary (6, 12, and 7 sections). *h. רש בכור*, of the rights of the first-born concerning a heritage; in what cases he forfeits such a right or the priest forfeits the right on the first-born, and of what property he has to receive his heritage (10 sections). *i. מכשר בהמה*, concerning the tithe of the herd; of what, when, and how the tithe has to be given; what to do in dubious cases (8 sections).

45. *ערכין*, *Erakin*, or *estimates*, in nine chapters: *a.*

49. תמיד, *Tamid*, or daily sacrifices, in seven chapters, treats of the morning and evening offerings: *a.* בשלשה בוקמות, of the night-watch and of the arrival of the captain, when the gate was opened and the priests went in (4 sections). *b.* ראווה אחיו, of the first work, how the altar was cleared from the ashes, the fagots were brought and the great and the small fire were arranged; the former for the members and the cauls of the sacrifices, the latter for the coals of the incense (5 sections). *c.* אמר להם הממונה, allotting services for the offering of the lamb; of finding out whether "it brightens;" of fetching the lamb and the vessels; of the lamb-chamber, offering the Temple and cleansing the inner altar and candlestick (9 sections). *d.* כוסדן לא הרי, of slaughtering and sprinkling the blood; of skinning, cutting, and dividing the parts (3 sections). *e.* אמר להם הממונה, of the morning prayer of

53. **אֹהֶלוֹת, Ohaloth, or tents** (Numb. xix, 14), in twenty-two chapters, treats of tents and houses retaining uncleanness, etc.: *a.* **שְׁנֵי שְׂמָאִים**, of the different modes and degrees of uncleanness over a dead body; of the difference of uncleanness in men and vessels; of the measure of the limbs of a dead body, or carcass, and of the number of the members of man (8 sections). *b.* **אֵלֵי מִטְאָן**, what be-

comes unclean in a tent through a corpse, and what only by touching and carrying (7 sections). *c.* **כל המטמאין**, of adding together divers kinds of uncleanness; what is not unclean in a dead body (teeth, hair, and nails, provided they are no more on the corpse); of the size of openings whereby uncleanness can be propagated (7 sections); *d.* **מגדל**, of vessels into which uncleanness does not penetrate (3 sections). *e.* **תנור**, when the upper story may be regarded as separated from the lower part (7 sections). *f.* **אדם וכלים**, how men and vessels form a cover over a carcass; of the uncleanness in the wall of a house (7 sections). *g.* **השומאה**, of a woman giving birth to a dead child (6 sections). *h.* **יש מביאין**, of things conveying and separating uncleanness, and of others which do not (6 sections). *i.* **כורית**, how far a large basket separates (16 sections). *j.* **ארוכה**, and *k.* **הבית**, of openings in a house and cracks on a roof (7 and 9 sections). *l.* **כסר**, of uncleanness in parts of the house and roof (8 sections). *m.* **העושה מאור**, of the measure of a hole or window which may propagate uncleanness (6 sections). *n.* **חורו**, **מביא**, and *o.* **סגנו**, of cornices and partitions in a house; of graves (7 and 10 sections). *p.* **כל המטלטלין**, continuation of graveyards (5 sections). *q.* **החורש את**, and *r.* **כיצר**, of the *beth hap-pras* (field in which a grave has been detected, or must be presumed, etc.); how far the houses of the heathen must be regarded as unclean (5 and 10 sections).

54. **נגעים**, *Negaim*, or *plagues of leprosy*, in seventeen chapters, treats of leprosy of men, garments, or dwellings: *a.* **מראות נגעים**, of the four indications of leprosy and their kinds (6 sections). *b.* **בהרת**, of the inspection of leprosy (5 sections). *c.* **הכל מטמאין**, of the time and signs when uncleanness is pronounced (8 sections). *d.* **יש בשער**, of the difference between the different signs of leprosy (11 sections). *e.* **כל ספק**, of dubious cases when uncleanness is pronounced (5 sections). *f.* **נימוח**, of the size of the white spot, and the places where no leprosy occurs (8 sections). *g.* **אלו בהרות**, of the changes of the spots of leprosy, and when they were rooted out (5 sections). *h.* **הפורה**, of the growing of the spots (10 sections). *i.* **השחין**, of the difference between a boil and a burning (3 sections). *j.* **הזנקים**, of scalds (10 sections). *k.* **כל הבגדים**, *l.* **כל הבתים**, and *m.* **בתי בתי**, of the leprosy in houses and garments (12, 7, and 12 sections). *n.* **מטהרין**, of cleansing a leper (18 sections).

55. **פרה**, *Parah*, or the *red heifer*, in sixteen chapters, directs how she is to be burned, etc.: *a.* **רא אומר**, of the heifer's age, and ages of other offerings (4 sections). *b.* **רא אומר פרה**, blemishes which make her unfit (4 sections). *c.* **שבעת ימים**, separation of the priest for burning the red heifer; procession of heifer and attendants; pile for burning; gathering the ashes (11 sections). *d.* **פיה השארה**, how the sacrifices may become unfit under these rites (4 sections). *e.* **המביא**, of the vessels for the sprinkling-water (9 sections). *f.* **המקדש**, of cases where the ashes or the water becomes unfit (5 sections). *g.* **חמשה שמלאר**, how this rite cannot be interrupted by any kind of labor (12 sections). *h.* **שנים שויו**, of keeping the water; of the sea and other waters with regard to the sprinkling-water (11 sections). *i.* **צלוהיה**, continuation (9 sections). *j.* **הראוי**, **כל**, how clean persons and vessels may become unclean (6 sections). *k.* **צלוהיה**, of the hyssop for sprinkling (9 sections). *l.* **האזיב**, of the persons fit for sprinkling (11 sections).

56. **טהרות**, *Taharoth* (prop. *Tuhoroth*), or *purifications*, in fifteen chapters, teaches how purifications are to be effected: *a.* **עשר**, of the carrion of a clean and unclean fowl (9 sections). *b.* **האשה שהיה**, of the uncleanness of the person who has eaten something unclean; of the effect of the different degrees of uncleanness (8 sections). *c.* **הריגט**, of beverages; of the estimation of an uncleanness after the time of its detection (8 sections). *d.* **הזורק**,

*e.* **השרין**, and *f.* **מקום שהיה**, of doubtful cases of uncleanness (13, 9, and 10 sections). *g.* **הקדר**, how a layman makes something unclean; of the care to be taken in preserving the cleanness of dresses and vessels (9 sections). *h.* **הדר**, how to keep victuals clean (9 sections). *i.* **זיתים**, of the cleanness in pressing the olives (9 sections). *j.* **הנוכל**, of the same in the treatment of wine (8 sections).

57. **מקואות**, *Mikva'oth*, or *pools of water* (Numb. xxxi, 23), in fifteen chapters, treats of their construction, and the quantity of water necessary for cleansing: *a.* **שש מצלות**, of the six different grades of pools of water, where one is purer than the preceding, from the water in the pit to the living water (8 sections). *b.* **הטמא**, of doubtful cases concerning bathing; how much and how far drawn water makes a *mikvah*, or bathing-place, unfit for bathing (10 sections). *c.* **רבי יוסר**, how a *mikvah* becomes clean again (4 sections). *d.* **המניח**, how rain-water is to be led into a *mikvah*, so as not to become drawn water (5 sections). *e.* **מזין**, of different kinds of water—spring water, river and sea water (6 sections). *f.* **כל המעורב**, what is regarded as connected with a *mikvah*, and how *mikva'oth* may become united (11 sections). *g.* **יש מצלין**, what makes a *mikvah* complete and fit, and where the change of the color has to be considered (7 sections). *h.* **ארץ ישראל**, of some uncleanness of the *mikvah* (5 sections). *i.* **אלו**, of the difference between bathing the body and a vessel (7 sections). *j.* **כל ידות**, of vomiting when eating and drinking, whether it be clean or unclean (3 sections).

58. **נדה**, *Niddah*, or *separation of women during their menses*, after childbirth, etc., in fifteen chapters: *a.* **שמאי**, of computing the time of the *niddah*, and where it is to be supposed (7 sections). *b.* **כל הירד**, of the *niddah* itself (7 sections). *c.* **המפלת**, and *d.* **בנות כוחים**, of women in childbed (7 and 7 sections). *e.* **יוצא דופן**, of the different ages of children according to their sex (9 sections). *f.* **בא סימן**, of the blood-spots (14 sections). *g.* **דם הנדה**, what makes unclean if it be damp or dry (5 sections). *h.* **הרואה**, and *i.* **האשה שחוא**, of recognising the blood-spots; their origin; of changes in the menses (4 and 11 sections). *j.* **תנוקת**, of all kinds of suppositions concerning cleanness and uncleanness (3 sections). This treatise should be read only by persons studying medicine, it being devoted to certain rules not ordinarily discussed, although they appear to have occupied a disproportionate part of the attention of the rabbins. The objections that our modern sense of propriety raises to the practice of the confessional apply with no less force to the subject of this tract, considered as a matter to be regulated by the priesthood.

59. **מכשירין**, *Makshirin*, or *liquors that dispose seeds and fruits to receive pollution*, in six chapters: *a.* **כל משקה**, of the precaution by the fault of which something has become wet (6 sections). *b.* **זיעה**, of sweating and steaming; of different rights of cities in which Jews and heathen reside (11 sections). *c.* **שק**, of cases where fruits are moistened unintentionally (8 sections). *d.* **השוהה**, of the regulations of rain-water in similar cases (10 sections). *e.* **מי שטבל**, of cases where eatables, although they have become wet, do not change (11 sections). *f.* **חמשת**, of the seven liquors, their variety; and of such liquors as at the same time make clean and unclean, or not (8 sections).

60. **זבים**, *Zabim*, or *bodily fluxes that cause pollution*, in five chapters: *a.* **הרואה**, of computing this uncleanness (6 sections). *b.* **הכל מיטמאין**, of examining whether such an issue is not enforced (4 sections). *c.* **הזב**, and *d.* **רבי ירישע**, of the power and different motions towards pollution (3 and 7 sections). *e.* **הבוגע**, comparison of divers pollutions and what makes the heave-offering unclean (12 sections).

61. **טבול יום**, *Tibbul Yom*, or *baptism on the day of uncleanness* (Lev. xxii, 6), in four chapters: *a.* **דמכנס**, when cakes of bread, grain, and seeds become unclean, or remain

clean through the touch of a *tibbāl yôm* (5 sections). *b. משקה*, how far the dampness of a *tibbāl yôm* is not to be treated as strictly as that of other unclean things; how the union of unwashed hands with those of a *tibbāl yôm* are to be discerned; how the uncleanness through a *tibbāl yôm* differs from another uncleanness in all kinds of boiled things and vessels of wine (8 sections). *c. כל יררו*, of the *chibbâr*, or connection of the parts and the whole concerning the uncleanness through a *tibbāl yôm* in fruits, eggs, herbs, boiled things, and eatables of all kinds (6 sections). *d. אוכל מעשר*, the same in separating the heave-offering, cakes, etc., according to older more lenient and recent more strict laws (7 sections).

62. *ידים*, *Yadain*, or *hands*, in four chapters, treats of the washing of hands before eating bread, though dry fruits are allowed to be eaten without such washing: *a. מי רביעית*, how much water is required for ablution of the hands; what kind of water; of the vessels for the same; who may pour it out (5 sections). *b. נכל ירד*, of the two ablutions whereby the unclean first water is washed away; how the ablution must take place (4 sections). *c. המכניס*, whether and how the hands become unclean in the first degree, and how in the second; whether and how far the touching of straps of phylacteries and of holy writings defiles (5 sections). *d. בו ביום*, of some special discussions; of the defilement by the Chaldee in the Bible, and of the Assyrian; disputes between the Pharisees and Sadducees (7 sections).

63. *ניקצין*, *Ukatsin*, or stalks of fruit which convey uncleanness, in three chapters: *a. כלשהוא*, of the difference between the stalks and husks of fruits (6 sections). *b. זרע שכבשן*, what is added to the whole from stones, husks, leaves, etc. (10 sections). *c. יש צריכין*, of different classes of things, how and when they are apt to absorb an uncleanness (12 sections).

In addition to the treatises which compose the Gemara, there are certain minor ones which are connected with it as a kind of Apocrypha or appendix, under the title of *Mesikoth Ketanoth* (מסכתות קטנות), or *smaller treatises*. These are:

1. *סופרים*, *Sopherim*, concerning the scribe and reader of the law (21 chapters). This treatise is important for the Masorah. A separate edition, with notes, was published by J. Müller (Leips. 1878). See also the art. *SOPHERIM*.
2. *כלה*, *Kallah*, relates to marriages (1 chapter).
3. *אבל רבתי הנקרא שמחות*, *Ebel Rabbathi*, or *Se-machoth*, concerning the ordinances for funeral solemnities (14 chapters).
4. *דרך ארץ*, *Derek Erets*, on social duties (11 chapters).
5. *דרך ארץ זוטא*, *Derek Erets Suta*, rules for the learned (10 chapters).
6. *פרק השלום*, *Perek ha-Shalom*, on the love of peace (1 chapter).
7. *גרים*, *Gerim*, concerning proselytes (4 chapters).
8. *כורתי*, *Kuthim*, concerning Samaritans (2 chapters).
9. *עבדים*, *Abdim*, concerning slaves (3 chapters).
10. *ציצית*, *Tsitith*, concerning fringes (1 chapter).
11. *תפילין*, *Tephillin*, concerning phylacteries (1 chapter).
12. *מזוזות*, *Mezuzah*, concerning the writing on the doorpost (2 chapters). See art. *MEZUZAH*.
13. *ספרי תורה*, *Sepher Torah*, concerning the writing of the law (5 chapters).

No. 7-13 were published together by R. Kirchheim, under the title *Septem Libri Talmudici Parvi* (Frankf.-on-the-Main, 1851).

To these treatises are sometimes added:

14. *הלכות ארץ ישראל*, *Hilkoth Erets Israel*, relating to the ways of slaughtering animals for food after the Jewish ideas, a treatise which is much later than the Talmud.

15. *אבות דרבי נתן*, *Aboth di-Rabbi Nathan*, a commentary on or amplification of the treatise *Aboth* (21 chapters). For the author of this treatise, see the art. *NATHAN HA-BABLI*.

#### ALPHABETICAL LIST OF THE DIFFERENT TREATISES AS FOUND IN THE BABYLONIAN TALMUD.

The first column gives the names of the treatises; the second indicates the volume of the Talmud where the treatises may be found; the third shows the *Seder* or division under which they are given; and the fourth the numerical order in which they stand in the Mishna.

Having given an analysis of the contents of the Talmud, we will now give a specimen of its text, which will present to the reader a faint idea of the mode of procedure as we find it in that wonderful work.

We open the very first page of the Talmud, the treatise *Berakoth*, on blessings, commencing *מאימתי*.

*Mishna*.—"At what time in the evening should one say the Shema? From the time that the priests go in to eat of their oblation till the end of the first night-watch. These are the words of the rabbi Eliezer; but the wise men say until midnight. Rabban Gamaliel says till the morning dawn ariseth. It came to pass that his sons were returning from a feast; they said unto him, 'We have not yet recited the Shema.' He answered and said unto them, 'If the morning dawn has not yet arisen, ye are under obligation to recite it.' And not this alone have they said, but everywhere where the wise have said 'until midnight,' the command is binding till the morning dawn ariseth; and the steaming of the fat and of the joints is

lawful until the morning dawn ariseth, and so everything which may be eaten on the same day it is allowed to eat until the morning dawn ariseth. If this is so, why do the wise say 'till midnight?' In order that men may be held far away from sin."

*Gemara*.—"The Thanna (i. e. rabbi Judah the Holy), what is his authority that he teaches, from what time onward? And, besides that, why does he teach on the evening first, and might he teach on the morning first? The Thanna rests on the Scripture, for it is written, 'When thou liest down and when thou risest up,' and so he teaches, the time of reciting the Sheema, when thou liest down, when is it? From the time when the priests go in to eat of their oblation. But if thou wilt, say I, he hath taken it out of the creation of the world, for it is said it was evening and it was morning one day. If this is so, it might be the last Mishna which teaches. In the morning are said two blessings before and one after, and in the evening two before and two after, and yet they teach in the evening first. The Thanna begins in the evening, then he teaches in the morning; as he treats of the morning, so he explains the things of the morning, and then he explains the things of the evening."

This is less than one fourth part of the comment in the *Gemara* on that passage in the *Mishna*, and the remainder is equally lucid and interesting.

Subsidiaries to the Talmud, printed either in the margin of the pages or at the end of the treatises, are (1) the *Tosaphoth*, exegetical additions by later authors; (2) *Masorah ha-shesh Sedarim*, being marginal Masoretic indices to the six orders of the *Mishna*; (3) *Ain* or *En-Mishpat*, i. e. index of places on the rites and institutions; (4) *Ner Mitsvoth*, a general index of decisions according to the digest of Maimonides; and (5) *Perushim*, or commentaries by different authors.

IV. *Literary Uses*.—The Talmud has been applied to the criticism and interpretation of the Old Test. Most of its citations, however, agree with the present Masoretic text. It has probably been conformed to the Masoretic standard by the rabbins, at least in the later editions. For variations, see the art. QUOTATIONS OF THE OLD TEST. IN THE TALMUD; for the interpretation, see the art. SCRIPTURE INTERPRETATION AMONG THE JEWS.

The Talmud has also been used in the illustration of the New Test. by Lightfoot, Schöttgen, Meuschen, Wettstein, Gröser, Robertson, Nork, Delitzsch, Wünsche. But in this department, also, its utility has been overestimated, and by none more than by Lightfoot himself, who says, in the dedication prefixed to his Talmudical exertions, "Christians, by their skill and industry, may render them (the Talmudic writings) most usefully serviceable to their students, and most eminently tending to the interpretations of the New Test." But not so Isaac Vossius, who said Lightfoot would have sinned less by illustrating the evangelists from the *Koran* than these *nebulae rabbinicae*, and exclaimed, "Sit modus ineptiendi et cessant tandem, aliquando miseri Christiani Judaicis istiusmodi fidere fabellis!" ("Let Christians at length cease from playing the fool and trusting to such wretched Jewish fables as those contained in the Talmud!") The mistake of Lightfoot is repeated by Wünsche, in his *Neue Beiträge zur Erläuterung der Evangelien aus Talmud und Midrash* (Gött. 1878), whose *modus illustrandi et interpretandi* is like a Jew writing an apology for Judaism; hence great caution must be exhibited in the perusal of the latter's work. There is only one way of using the Talmud for the New Test., for which see our art. SERMON ON THE MOUNT AND THE TALMUD.

For the Old Test. as it was in the time of the Talmud, see the next article.

V. *Apparatus for Study of the Talmud*.—1. *Manuscripts*.—Like the text of the Old Test., the Talmud was copied with the greatest care during the Middle Ages; but, like a good many other works, these MSS. have become the prey of time, and only a few of them are extant. All that is known is (1) the first division of the Jerusalem Talmud in possession of the Jewish congregation at Constantinople; (2) a complete copy of the Babylonian Talmud from the year 1843 in the Royal Li-

brary at Munich; (3) a fragment of the same, evidently older than No. 2, in the same place; (4) a fragment of the same from the year 1134 in the Hamburg City Library; (5) the treatise *Sanhedrin* according to the Babylonian redaction, and belonging to the 12th century, in the Ducal Library at Carlsruhe; (6) some fragments with valuable variations, preserved at the University Library of Breslau. There is no doubt that in some libraries fragments may yet be found, if the covers of old books should be properly examined, for which they have been used by ignorant binders. That such was the case we not only know from the fragments at the Breslau University, but from a more recent discovery of W. H. Lowe, who published the *Fragment of the Talmud Babli Pesachim of the 9th or 10th Century, in the University Library at Cambridge, with Notes and a Fac-simile* (Lond. 1879).

2. *Editions*.—Like the Old Test., at first only parts of the Talmud were published, on which see De Rossi, *Annales Hebræo-typographici* Sec. XV (Parmæ, 1795). The first part of the Talmud, the treatise *Berakoth*, was published at Soncino in 1484; but the first complete edition (the basis of later ones) was published by Bomberg (Venice, 1520-23, 12 vols. fol.) (a complete copy of which is in the libraries of Cassel and Leipsic). Since that time editions have been published at different places, which are enumerated by R. N. Rabinowicz, in his *מאמר על הדפסת התלמוד*, or *Kritische Uebersicht der Gesamt- und Einzelausgaben des babylonischen Talmuds seit 1484* (Munich, 1877) (with the exception of the German title-page, the rest is in Hebrew). The Jerusalem Talmud was first published by D. Bomberg (Venice, 1523); then with brief glosses (Cracov. 1609; Dessau, 1743; Berlin, 1757; Schitomir, 1860-67, 4 vols. fol.; Krotoschin, 1866, fol.). A new edition of Bomberg's, with commentaries, was commenced by the late Dr. Z. Frankel, of which, however, only the first division was published (Vienna, 1875-76).

3. *Translations*.—There exists as yet no complete translation of either of the Talmuds in any language. The Arabic translation, said to have been prepared in A. D. 1000, at the will of king Hashem of Spain, is no longer extant. A large portion of the Jerusalem Talmud is found in a Latin translation in Ugolino, *Thesaur. Antiq. Sacr.*, viz. *Pesachim* (vol. xvii), *Shekalim*, *Yoma*, *Sukkah*, *Rosh Hash-shanah*, *Taanith*, *Megillah*, *Chagigah*, *Bezah*, *Môed Katon* (vol. xviii), *Maasereth*, *Challah*, *Orlah*, *Bikkurim* (vol. xx), *Sanhedrin*, *Makkoth* (vol. xxv), *Kiddushin*, *Sotah*, *Kethuboth* (vol. xxx). In the same work we also find three treatises of the Babylonian Talmud, viz., *Zebachim*, *Menachoth* (vol. xix), and *Sanhedrin* (vol. xxv). Into French, the treatises *Berakoth*, *Peah*, *Demai*, *Kilayim*, *Shebith*, *Terumoth*, *Maaseroth*, *Maaser Sheni*, *Challah*, *Orlah*, *Bikkurim* of the Jerusalem Talmud were translated by M. Schwab (Paris, 1872-79). The treatise *Berakoth* according to the Jerusalem and Babylonian Talmuds was also translated into French by L. Chiarini (Leips. 1831) and into German by Rabe (Halle, 1777). Of the Babylonian Talmud we have German translations of *Berakoth* by Pinner (Berlin, 1842); of *Baba Metsia* by A. Sammt (ibid. 1876-79); of *Aboda Zarah* by F. Chr. Ewald (Nuremb. 1868). These are all the translations which are known to us.

4. *Monographs*.—Since the Talmud is the great storehouse of all and everything, different branches of science and religion have been treated in monographs. Thus, on—

a. Botany: by Duschak, *Zur Botanik des Talmud* (Leips. 1870).

b. Civil and criminal law: by Frankel, *Der gerichtliche Beweis nach mos.-talmudischem Rechte, Ein Beitrag zur Kenntniss des mos.-talmudischen Criminal- u. Civilrechts* (Berlin, 1846); Duschak, *Das mosaisch-talmudische Eherecht*, etc. (Vienna, 1864); Thonisson, *La Peine de Mort dans le Talmud* (Bruxelles, 1866); Bloch, *Das mosaisch-talmudische Polizeirecht* (Leips. 1879);

Lichtschein, *Die Ehe nach mosaisch-talmudischer Auffassung und das mosaisch-talmudische Eherecht* (ibid. 1879); Fassel, *Das mosaisch-rabbinische Gerichts-Verfahren in civilrechtlichen Sachen*, etc. (Vienna, 1858); Frankel, *Gründlinien des mosaisch-talmudischen Eherechts* (Breslau, 1860); Mielziner, *Die Verhältnisse der Sklaven bei den alten Hebräern nach bibl. u. talmud. Quellen dargestellt* (Leips. 1859).

c. Coins and weights: by B. Zuckermann, *Ueber talmudische Münzen und Gewichte* (Breslau, 1862).

d. Education: S. Marcus, *Zur Schul-Pädagogik des Talmud* (Berlin, 1866); Simon, *L'Education et l'Instruction des Enfants chez les Anciens Juifs d'après la Bible et le Talmud* (Leips. 1879); Sulzbach, *Die Pädagogik des Talmud* (Frankf.-on-the-Main, 1863). See also the art. *Schools* in this *Cyclopædia*.

e. Ethics, maxims, proverbs, etc.: Lazarus, *Zur Charakteristik der talmudischen Ethik* (Breslau, 1877); maxims and proverbs are given by Dukes, *Rabbinische Blumenlese* (Leips. 1844), in *ספר מלין דרבנן* (Warsaw, 1874), and by A. Franck, *Les Sentences et Proverbes du Talmud et du Midrash*, in the (Paris) *Journal des Savants*, Nov. 1878, p. 659-676; Dec. p. 709-721.

f. Geography: by A. Neubauer, *La Géographie du Talmud, Mémoire couronné par l'Académie des Inscriptions et Belles-lettres* (Paris, 1868).

g. Mathematics: by Zuckermann, *Das mathematische im Talmud* (Breslau, 1878); id. *Das jüdische Maass-System* (ibid. 1867).

h. Medicine: Wunderbar, *Biblich-talmudische Medicin* (Riga, 1852-59); Halpern, *Beiträge zur Geschichte der talmudischen Chirurgie* (Breslau, 1869).

i. Magic: Brecher, *Das Transcendentale, Magie u. magische Heilarten im Talmud* (Vienna, 1850).

j. Psychology: Jacobson, *Versuch einer Psychologie des Talmud* (Hamburg, 1878).

k. Religious philosophy: Nager, *Die Religionsphilosophie des Talmud* (Leips. 1864).

l. Zoology: Lewysohn, *Zur Zoologie des Talmud* (Frankf.-on-the-Main, 1858).

m. Labor and handicraft: S. Meyer, *Arbeit und Handwerk im Talmud* (Berlin, 1878); Delitzsch, *Jüdisches Handwerkerleben zur Zeit Jesu* (3d ed. Erlangen, 1879). The latter wrote also on the *colors* in the Talmud in *Nord und Süd*, May, 1878.

n. Biblical Antiquities: Hamburger, *Biblich-Talmudisch. Wörterbuch* (Neu-Strelitz, 1861).

5. Textual Criticism.—Lebrecht, *Kritische Lese verbesserter Lesarten zum Talmud* (Berlin, 1864); Rabinowicz, *Variae Lectiones in Mischnam et in Talmud Babylonicum quum ex aliis Libris Antiquissimis et Scriptis et Impressis tum e Codice Monacensi Præstantissimo collectæ, Annotationibus instructæ* (pt. i-viii, Munich, 1868-77).

6. Bibliography.—Pinner, in his preface to *Berakoth*, p. 9 sq.; Beer, in Frankel's *Monatsschrift*, 1857, p. 456-458; Lebrecht, *Handschriften und erste Gesamtausgaben des babyl. Talmud*, in den wissenschaftlichen Blättern des Berliner Beth ha-Midrash (Berlin, 1862); Steinschneider, *Hebräische Bibliographie* (1863), vi, 39 sq.; De Rossi, *Annales Hebræo-typographici Sec. XV* (Parma, 1795); id. *De Hebraicæ Typographiæ Origine ac Primitiis*, etc. (ibid. 1776).

7. Linguistic Helps.—Buxtorf, *Lexicon Chaldaicum, Talmudicum et Rabbinicum* (Basil. 1640, fol.; new ed. by B. Fischer, Leipsic, 1869-75); Löwy, *Neuhebräisches und chaldäisches Wörterbuch*, etc. (ibid. 1875; in the course of publication); Aruch, by Nathan ben-Jechiel; new critical edition by A. Kohut, *Plenum Aruch Targum-Talmudico-Midrash Verbalis et Reale Lexicon* (Vienna, 1878 sq.); Brüll, *Fremdsprachliche Redensarten*, etc. (Leipsic, 1869); Geiger, *Zur Geschichte der talmudischen Linguistic*, in *Zeitschrift d. D. M. G.* 1858, xii, 142; Stein, *Talmudische Terminologie* (Prague, 1869); Zuckerman, in Grätz's *Monatsschrift*, 1873, p. 421-430, 475-477; 1874, p. 30-44, 130-138, 183-189, 213-222; Rülff, *Zur Lautlehre der aramäischen-talmudischen*

*Dialecte*, i, *Die Kehllaute* (Leipsic, 1879); Berliner, *Beiträge zur hebräischen Grammatik im Talmud und Midrash* (Berlin, 1879); Kalisch [I.], *Sketch of the Talmud, including the Sepher Jezirah, with Translation, Notes, and Glossary* (N.Y. 1877).

8. Literature in General.—Treatises on the Talmud have been written in different languages, and their number is legion. To enumerate them would be not only tedious, but useless, because, written from a certain standpoint, they only give one side of the question. Such are the treatises of Deutsch, written for the glorification of modern Judaism, and repeated by Schwab in his introduction to his treatise *Berakoth* (Paris, 1871), and of Rohling and Martin, written in a hostile spirit against Judaism, because more or less dependent on Eisenmenger's *Entdecktes Judenthum* (Königsberg, 1711, 2 vols.). Quite different is the work of A. M'Caul, *The Old Paths* (Lond. 1854), and the *Pentateuch according to the Talmud* (vol. i, Genesis, ibid. 1874) by P. J. Hershon, because tending to show how Pharisaism has made the law of God void by a multitude of traditions. We therefore confine ourselves to such works as will give the reader the necessary information on the Talmud, viz. Wähner, *Antiquitates Ebræorum* (1743), i, 231-584; Wolf, *Bibliotheca Hebræa*, ii, 657-993; iv, 320-456; Brüll, *Die Entstehungsgeschichte des babyl. Talmuds*, in his *Jahrbücher* (Frankfort-on-the-Main, 1876), ii, 1-123; Auerbach, *Das jüdische Obligationsrecht*, i, 62-114; Frankel, *Introductio in Talmud Hierosolymitanum* (Breslau, 1870 [Heb.]); Wiesner, *Gibeth Jeruschalaïm*, ed. Smolensky (Vienna, 1872 [Heb.]); Fürst, *Literaturblatt des Orients*, 1843, No. 48-51; 1850, No. 1 sq.; id. *Kultur- u. Literaturgeschichte der Juden in Asien* (1849), vol. i; Zunz, *Die gottesdienstlichen Vorträge der Juden*, p. 51-55, 94; Jost, *Gesch. d. Israeliten*, iv, 222 sq., 323-328; id. *Gesch. d. Judenthums u. s. Secten*, ii, 202-212; Grätz, *Gesch. d. Juden*, iv, 384, 408-412 sq.; Frankel, *Monatsschrift*, 1851-52, p. 36-40, 70-80, 203-220, 403-421, 509-521; 1861, p. 186-194, 205-212, 256-272; 1871, p. 120-137; Geiger, *Jüdische Zeitschrift*, 1870, p. 278-306; Pinner, *Compendium des hierosolym. und babylon. Talmud* (Berlin, 1832); id. *Einleitung in den Talmud*, in his translation of *Berakoth*, fol. 1-12; Schürer, *Handbuch der neutestam. Zeitgeschichte* (Leipsic, 1874), p. 37-49; Pressel, art. *Talmud*, in Herzog's *Real-Encyclop.*; Davidson, in Kitto's *Cyclop.* s. v.; Mauseaux, *Le Juif, le Judaïsme, et la Judaisation* (Paris, 1869), p. 76 sq.; Bernstein, *אורי הכתבים*, an apology for the Talmud (Odessa. 1868); Waldberg, *דרכי דתשני*, or explanation of the logic of the Talmud (Lemberg, 1876). The expurgated passages are collected by Meklenburg in *קבוץ ההשגות*; the difficult passages of the Talmud, which are explained by Raschi, are found in *שפיר דים* (Schitomir, 1874); Jacob Brüll, *דורש לציון*, or *Mnemonotechnik des Talmuds* (Vienna, 1864 [Heb.]); Bacher, *Die Agada der babylonischen Amoraer, Ein Beitrag zur Geschichte der Agada und zur Einleitung in den babylonischen Talmud* (Strasburg, 1878); Friedländer, *Geschichtsbilder aus der Zeit der Tanaïten und Amoraer, Ein Beitrag zur Geschichte des Talmuds* (Brünn, 1879). The Hagadoth contained in both Talmuds are collected in Jacob ibn-Chabib's *צין יצק* (latest edition Wilna, 1877). See Fürst, *Bibl. Jud.* i, 151; Wolf, *Bibl. Heb.* i, 590 sq.; iii, 456 sq.; iv, 866 sq.; and in Jaffe's *מראה יסוד* (comp. Wolf, *ibid.* i, 1204; iii, 1109; Fürst, ii, 9, 96); the *Tosephta* is now in course of being edited by Dr. M. S. Zuckerman (Berlin, 1876 sq.); Schwarz, *Die Tosefta der Ordnung Mo'ed in ihrem Verhältnisse zur Mischna kritisch untersucht*, Pt. i, *Der Tractat Sabbath* (Carlsruhe, 1879); Jellinek, *Hagadische Hermeneutik mit Midrasch-Commentar* (Vienna, 1878); Placzek, *Die Agada und der Darwinismus*, in the *Jüd. Literaturblatt*, vol. vii, No. 1, 6, 8, 11, 13, 16, 17, 23-31; Mühlfelder, *Ein Lebens-*

fol. 105, col. 2), but also gives different combinations of the alphabet, as

אח, בש, גר, דק, חץ, וף, זע, חם, טנ, ים, כל  
אחם, בטע, גיה, רכץ, חלק, ומד, יז, שח  
אל, בם, גן, דם, חז, וף, זץ, חק, טר, יש, כח.

The first of these combinations is remarkable on account of Jerome having so confidently applied it to the word *Sheshak*, ששך, in Jer. xxv, 26, it being the same as בבבב.

3. *The Vowel-points*.—See that article.

4. *Division of Words*.—Hebrew was originally written, like most ancient languages, without any divisions between the words, in a *scriptio continua*, which fact accounts for the various readings in the Sept., as Gen. vii, 11, עשר יום for עשרים; xx, 16, כלו נכחה, etc.; ונכחה; xl, 17, מכל מאכל for מכלם אכל, etc.; 1 Sam. i, 1, ציוה, בן, Alex. *iv Naoib*, בנציר, Psal. ix, 1, על מיה for עלמיה, etc. But there is no doubt that a division of words already existed in the time of the Talmud; at least the final letters, which are already mentioned, may have served such a purpose; and in *Menachoth*, fol. 30, col. 1, the space between the words in the sacred MSS. is fixed with precision. Whether or not this division of words by points—as used in the Samaritan Pentateuch—was applied, must be left undetermined.

5. *Divisions according to the Meaning of Verses*.—There is no doubt that at a very early period a division according to verses (פסוקים) existed. "Every verse divided by Moses may not be otherwise divided," we read in *Megillah*, fol. 22, col. 1. The reason for such divisions was probably twofold: a. The reading of the Scriptures, especially in the synagogue, led to such. The Mishna (*Megillah*, ch. iv, § 4) mentions the פסוקים in relation to this, for we read that "not less than three verses of the holy law may be read in the synagogue to each person (called to read). One verse only of the law may at one time be read to the *methurgeman*, or interpreter; but it is lawful to read three consecutive verses to him from the prophets; but if each verse should form a separate section, one verse only may be read to him at a time." The Gemara forbids the leaving of the synagogue before the ending of such a section (*Berakoth*, fol. 8, col. 1), introduces the injunction of Ezra (Neh. viii, 8; *Megillah*, fol. 3, col. 1; *Nedarim*, fol. 37, col. 2), and prescribes, in reference to the prophets, how many sections are to be read on week-days (*Baba Kamma*, fol. 82, col. 1). b. The study of the law, the instruction and school-teaching of the same produced such sense-divisions. These were distinguished from the former, which were merely called פסוקים, by the names פסוקים, *clauses*, *sententiae*, or also פסוקי פסוקים, *clause sections*. To instruct in the dividing of clauses (פסוקי פסוקים) was a special part of the rabbinical teaching (*Nedarim*, fol. 37, col. 1); in *Berakoth*, fol. 62, col. 1, the teacher is said to point it out to his scholars with his right hand; and according to it disputed points of the law were settled (*Chagigah*, fol. 6, col. 2). As to the sign of this division which is now found in the Hebrew Bible (:), it is not seen on the synagogue-roll, nor is it mentioned in the Talmud, but is of later origin; and we must conclude it as highly probable that these divisions into verses and periods were not first externally designated, but were merely transmitted by oral tradition, as may be seen from the following quotation. In *Kiddushin*, fol. 30, col. 1, we read: "Therefore are the ancients called Sopherim because they counted all letters in Holy Writ. Thus they said that the *Vav* נחין (Lev. xi, 42) is the half of all the letters in the Pentateuch; דרש דרש (x, 16) is the middle word; וההגלה (xiii, 33), the middle verse;

that *Ayin* in כר (Psa. lxxx, 14) is the middle letter in the Psalms, and lxxvii, 38 the middle verse." In the same passage we also read that "the Pentateuch contains 5888 verses, the Psalms eight more, and Chronicles eight less." Now if we compare this number with that given by the Masorites, we shall find that the Talmud counts forty-three verses more than the Masorites in the Pentateuch, and this difference can only be explained from the statement made by the Talmud (*Baba Bathra*, fol. 14, col. 2), that Joshua wrote his book and eight verses of the law (Deut. xxxiv, 5-12); and the Occidentals, as we read in *Kiddushin*, loc. cit., divided Exod. xix, 9 into three verses. Thus much is certain, that in the time of the Talmud there was a division according to verses; but what this mark of division was, if there were any at all—at least Tr. *Sopherim*, ch. iii, § 5, is against it—is difficult to point out.

6. *Stichoi* (στίχοι).—The poetical passages in Exod. xv; Deut. xxxii; Judg. v; 2 Sam. xxii, were in the time of the Talmud already written στίχων (comp. *Shabbath*, fol. 103, col. 2, in *fine*; *Sopherim*, ch. xii). The same may be said of the poetical books, *נביא*, i. e. Job, Proverbs, Psalms. The Decalogue was also originally written in ten series (שנים, στίχοι), as is intimated in the Targum on the Song of Songs, v, 13: "The two tables of stone which he gave to his people were written in ten rows (*shittin*), resembling the rows or beds (*shittin*) in the garden of balsam." See also SHITTA.

7. *The Smaller Sections of the Pentateuch*.—In our Hebrew Bibles, which follow the Masoretic text, the Pentateuch is divided into 669 *parashas*, or sections (פרשיות), of which 290 are open (פתוחות), and distinguished in our Bibles by the initial letter פ and 379 are closed (סגורות), marked by the initial letter ס. Of these *parashas* mention is made in the Talmud, viz.

1. *Taanith*, ch. iv, § 8, the history of creation is divided into seven sections, viz. Gen. i, 1-5, 6-8, 9-18, 14-19, 20-23, 24-31; ii, 1-3.

2. *Berakoth*, ch. ii, § 2; *Tamid*, ch. v, § 1; *Menachoth*, ch. iii, § 7, the sections of the prayer and phylacteries (Exod. xiii, 1-13; Deut. vi, 4-9; xl, 13-21; Numb. xv, 37-41) are mentioned.

3. *Megillah*, ch. iii, § 4-6 (comp. also *Yoma*, ch. vii, § 1; *Sotah*, ch. vii, § 7), the following sections for the Sabbath and festivals are given, viz.: Exod. xxx, 11-16; Deut. xxv, 17-19; Numb. xii, 1-22; Exod. xii, 1-12; Lev. xii, 28-33 (for the first day of the Passover); Deut. xvi, 9-12 (for Pentecost); Lev. xxiii, 23-25 (for New Year); xvi, 1-34; xxii, 28-32 (for the Day of Atonement); Numb. vi, 22-vii, 18 (for the Day of Dedication); Exod. xvii, 8-13 (for Purim); Numb. xxviii, 11-15 (for the new moon); Lev. xxvi, 3 sq.; Deut. xxviii sq. (for the fast-days).

4. *Tamid*, ch. v, § 1; *Sotah*, ch. vii, § 2, 6; Numb. vi, 22-27.

5. *Yadai*, ch. iii, § 4; Numb. x, 85, 36.

6. *Sotah*, ch. vii, § 7, Deut. xvii, 14-20; Numb. v, 11-31; xix, 1-22; Deut. xxi, 1-9; xxvi, 1-11; xiv, 22-27; xxvi, 12-15; xxv, 6-10, and many others.

In the Gemara the following *parashas* are mentioned:

7. *Shabbath*, fol. 115, col. 2; fol. 116, col. 1, Numb. x, 85, 36.

8. *Berakoth*, fol. 12, col. 2, states that "every *parasha* which Moses divided we also divide; and any one which he did not divide, neither do we," in reply to the question why the verse כרע קימנו (Numb. xxiv, 9) was not taken out from the long section (ch. xxii-xxiv) and used for the prayer *Shema Israel*, i. e. "Hear, O Israel."

9. *Ibid.* fol. 63, col. 1, Numb. vi, 1-6; v, 11-31, are mentioned.

10. *Gittin*, fol. 60, col. 1, Lev. xxi, 1-24; Numb. viii, 5-22; ix, 6 sq.; v, 1-4; Lev. xvi; x, 8-11; Numb. viii, 1-4; xix sq., are mentioned.

That some of these were open, some closed, we read in *Shabbath*, fol. 103, col. 2; *Menachoth*, fol. 30, 31; Jerusalem *Megillah*, fol. 71, col. 2; and in *Sopherim*, i, 14, we also read that the open section is an empty space, the width of three letters, at the beginning of a line, and the closed is as much in the middle of a line.

8. The larger sections, marked in our Bibles by פ פ פ and ס ס ס, are not mentioned in the Talmud.

9. *Haphtaraks*.—After the reading of the law in the synagogue, it was also customary from an early period

to read a passage from the prophets (comp. Acts xiii, 15, 27; Luke iv, 66 sq.), and with that to dissolve the meeting (לשון פירוק *synagōgē*, Acts xiii, 43; Heb. הפתירה); hence the reader who made this conclusion was called **בַּפְתִּירָא**, and the prophetic passage read **הַפְתִּירָא**. The Mishna repeatedly speaks of the Haphtarahs (*Megillah*, ch. iv, § 1-3, 5, 10), and as early as in the Gemara (*Megillah*, fol. 29, col. 2; fol. 31, col. 1), several Haphtarahs are named. Yet in general they cannot then have been fixed determinately, and even now different usages prevail among the Jews of different countries, as may be seen from the table given in the art. **HAPHTARAH**, for, as Zunz says, "our present order is the work of later centuries."

10. *Various Readings.*—The various readings so frequently found in the margins and foot-notes of the Hebrew Bibles, known as *Keri* and *Kethib* (קרי וכתוב), are very ancient. The Talmud traces the source of these variations to Moses himself, for we are distinctly told in *Nedarim*, fol. 37, col. 2, that "the pronunciation of certain words according to the scribes (בְּקֶרֶא סוֹפְרִים), the emendations of the scribes (עֲשֵׂי סוֹפְרִים), the not reading of words which are in the text (כְּתִיב וְלֹא קֵרִי), and the reading of words which are not in the text (קֵרִי וְלֹא כְּתִיב), etc., are a law of Moses from Sinai (חֻלְכָּה לְמֹשֶׁה), etc., are a law of Moses from Sinai (חֻלְכָּה לְמֹשֶׁה)." We here mention some of the Talmudic passages which have reference to these readings:

Gen. viii, 17, Kethib **חִוָּצָא**, but Keri **חִיצָא** (*Bereshith Rabba*, ad loc. sect. xxxiv, fol. 37, col. 3).

Lev. xxi, 5, Kethib **יִקְרְהָהּ**, but Keri **יִקְרְחוּ** (*Makkoth*, fol. 20, col. 1).

Lev. xxiii, 13, Kethib **וַיִּסְכְּהָ**, but Keri **וַיִּסְכְּוּ** (*Menachoth*, fol. 59, col. 2).

1 Sam. xvii, 23, Kethib **מַמְעֵרוֹת**, but Keri **מַמְעֵרֹת** (*Sotah*, fol. 42, col. 2).

Hag. i, 8, Kethib **וְאִכְכְּרָהּ**, but Keri **אִכְכְּרָהּ** (*Yoma*, fol. 21, col. 2).<sup>\*</sup>

Esth. ix, 27, Kethib **וּקְבַל**, but Keri **וּקְבִילוּ** (*Jerusalem Berakoth*, fol. 14, col. 3).

Eccles. ix, 4, Kethib **יִבְחֶר**, but Keri **יִבְחֶר** (*Jerusalem Berakoth*, fol. 13, col. 2).

Job xlii, 15, Kethib **לֹא**, but Keri **לֹו** (*Sotah*, ch. v, § 5).

Prov. xxxi, 18, Kethib **בְּלִיל**, but Keri **בְּלִילָה** (*Peikta*, ed. Buber [Lyck, 1868], fol. 65, col. 1).

Isa. lxiii, 9, Kethib **לֹא**, but Keri **לֹו** (*Sotah*, fol. 31, col. 1; while *Taanith*, fol. 16, col. 1, reads **לֹו**).

To these variations belongs also the substitution of euphonisms for cacophonisms. See the art. **KERI AND KETHIB**, § 8.

For the most part the rabbins follow the reading of the קרי, often that of **כְּתִיב**, especially when they can elicit a new interpretation from the reading of the כְּתִיב; thus, e. g., Ruth iii, 3, they interpret the reading of **וַיִּרְדְּהָ**, while the קרי reads **וַיִּרְדֶּה** (*Midr. Ruth Rabba*, sect. v, fol. 43, col. 3 [Cracov. 1588, fol. 1]). The reading according to the כְּתִיב is cited in *Chullin*, fol. 68, col. 1, from Lev. ii, 2 and 2 Sam. xxiii,

<sup>\*</sup> As this passage is very interesting, we give it in full: "R. Samuel bar-Enia saith, Why has the Kethib **וְאִכְכְּרָהּ** and the Keri **אִכְכְּרָהּ**? What is meant by the absence of the ו? It is because of the five things which made the difference between the first and second Temple, viz., the ark with the lid and the cherubim upon it; the fire (from heaven, comp. 2 Chron. vii, 1), the *Shechinah*, the Holy Ghost, and the Urim and Thummim." In the *Midrash Rabba* on the Song of Songs, viii, 8, where the same thing is recorded, the *holy oil* (שֶׁמֶן הַמְּשֻׁחַת) is substituted for the *Shechinah*, as one of the five things, fol. 26, col. 1 (ed. Stettin, 1863).

20, in *Berakoth*, fol. 18, col. 1, in *fine*. In the Mishna we find the marginal reading קרי six times, that of the כְּתִיב twice, viz.:

Lev. ix, 22, it is written יָרָד; but in *Sotah*, ch. vii, § 6, and *Tamid*, ch. vii, § 2, it reads יָרְדָּה.

Deut. xx, 7, it is written שָׁפַח; but in *Sotah*, ch. ix, § 6, שָׁפַח, according to the Keri.

1 Kings vi, 6, it is written חִיצוֹת; but in *Middoth*, ch. iv, § 4, חִיצוֹת.

Isa. x, 13, it is written כְּאִבִּיר; but in *Yadaim*, ch. iv, § 4, כְּבִיר.

Ezek. xliii, 16, it is written וְהִיאֲרִיל; but in *Middoth*, ch. iii, § 1, וְהִיאֲרִיל.

Job xlii, 15, it is written לָא; but in *Sotah*, ch. v, § 5, לֹו.

The reading according to the Kethib we find in two passages, Exod. xxi, 8, **לֹא** (*Berakoth*, ch. i, § 7; *Kiddushin*, fol. 17, col. 1), and Isa. x, 13, in *Yadaim*, ch. iv, § 4.

Words written but not read, קרי ולא כְּתִיב, are mentioned in *Nedarim*, fol. 27, col. 2, viz. **נָא**, 2 Kings v, 8; **וְאִתָּא**, Jer. xxxii, 11; **יִרְדָּה**, li, 3; **חֻמֶּשׁ**, Ezek. xlvi, 16; **אֵם**, Ruth iii, 12.

Words read but not written, כְּתִיב ולא קרי, are mentioned in *Nedarim*, fol. 37, col. 2, viz. **פֶּרֶת**, 2 Sam. viii, 3; **אֵישׁ**, xvi, 23; **בָּאִים**, Jer. xxxi, 38; **לָהּ**, i, 29; **אֵת**, Ruth ii, 11; **אֵלֵי**, iii, 5, 17.

In connection with this we may remark that in the treatise *Megillah*, fol. 25, col. 2, we are told of certain passages of Scripture which are read in the synagogue and interpreted, read and not interpreted, and such as are neither read nor interpreted. Thus, "The intercourse of Reuben with Billah is to be read without being interpreted; that of Tamar (and Amnon) is to be read and interpreted. The (first part of the) occurrence with the golden calf is to be read and interpreted; but the second part (commencing Exod. xxxiv, 21) is to be read without any interpretation. The blessing of the priests, and the occurrence of David and Amnon, are neither to be read nor interpreted. The description of the divine chariot (Ezek. i) is not to be read as a Haphtarah, but R. Jehudah permits it; R. Eleazar says neither (Ezek. xvi), 'Cause Jerusalem to know her abomination,'" etc.

11. *Ablatio Scribarum*, עֲשֵׂי סוֹפְרִים, *Nedarim*, fol. 37, col. 2. See the art. **MASORAH**, § 6.

12. *Correctio Scribarum*, תְּקִינָה סוֹפְרִים, is not mentioned in the Talmud, but reference is made to it in the *Mechilla*, *Siphri*, *Tanchuma*, *Bereshith Rabba*, *Shemoth Rabba* (Midrashic works, enumerated under **MIDRASH**); the passages belonging to the *correctio scribarum* are given s. v. **MASORAH**, 5. See also **TIKKUN SOPHERIM**.

13. *Puncta Extraordinaria*.—Over single letters, over entire words, we find dots or points, generally called "puncta extraordinaria." The first instance is mentioned in the Mishna, *Pesachim*, ix, 2, over the ו of the word **וַיִּחַקֵּה**, Numb. ix, 10. Ten such words which have these extraordinary points are enumerated in *Midrash Ba-midbar Rabba* on Numb. iii, 39, sect. iii, fol. 215, col. 4; comp. *Pirke de-Rabbi Nathan*, ch. xxxiii; *Siphri* on Numb. ix, 10; *Sopherim*, vi, 3; *Massora Magna* on Numb. iii, 39; *Oklah ve-Oklah*, § 96.

The following words are mentioned in the Talmud:

Gen. xviii, 9, **אֵלֵי**. On this passage the *Midrash Bereshith Rabba* remarks: "אֵי are pointed, but not the ל. R. Simeon ben-Eliezer saith, wherever you find more letters than points, you must explain the letters, i. e. what is written; but where you find more points than letters, you must explain the points. In this case, where there are more points than the written text, you must explain

the points, viz. אִי, 'where is Abraham.' The meaning is that the points over these three letters intend to indicate that the three angels did not ask 'where is Sarai, אִי־הָאֵלֹהִים,' but 'where is Abraham, אִי־אֲבֹרָהם' (comp. *Baba Metsiah*, fol. 87, col. 1).

Gen. xix, 38, וּבְקוֹמָהּ. In the Talmud, *Nazir*, fol. 23, col. 1, we read: "Why is there a point over the *Vav*, ו, of the word וּבְקוֹמָהּ? To indicate that when she lay down he did not perceive it, but when she arose he perceived it" (comp. also *Horayoth*, fol. 10, col. 1; and Jerome, *Quæst. in Genes.*: "Appungunt de super quasi incredibile et quod rerum natura non capiat coire quemquam nescientem").

Numb. iii, 19, וְאֶחָדָם. *Ba-midbar Rabbah*, loc. cit., says that the points over Aaron indicate that he was not one of that number (comp. also *Berakoth*, fol. 4, col. 1).

ix, 10, רַחֲקָה. In Mishna, *Pesachim*, ix, 2, we read: "What is a distant journey? R. Akiba says from Modaim and beyond, and from all places around Jerusalem situated at the same distance. R. Eleazar says 'any distance beyond the outside of the threshold of the court of the Temple.' R. Jose says the reason for the point over הַזֶּה (in our word) is to denote that it is not necessary to be actually on a distant road, but only beyond the threshold of the court of the Temple."

Deut. xxix, 28, לֹא־נִרְאָה. *Ba-midbar Rabbah*, loc. cit., "You have made manifest, hence I will also manifest unto you hidden things" (comp. *Sanhedrin*, fol. 43, col. 2, *in fine*).

Psa. xxvii, 13, לֹא־אֵלֵךְ. *Berakoth*, fol. 4, col. 1, says, "Lord of the universe, I am aware that thou greatly rewardest the just in future ages, but I know not whether I shall partake of it with them on account of my sin." Buxtorf remarks on this passage, נִשְׁמַע בְּלֹא טַעַם, i. e. a sense without any sense. The meaning probably is that לֹא־אֵלֵךְ, without the points, means *if not*, like the Latin *nisi*, but with the points it signifies "a doubt."

As to the origin and signification of these points, nothing certain can be said. According to the rabbins, Ezra is said to have been the author of them (comp. *Ba-midbar Rabbah* on Numb. iii, 39, sect. iii, fol. 215, col. 4; *Aboth de-Rabbi Nathan*, ch. xxxiii). This much may be taken for granted, that these points were known long before the Talmud.

14. *Inverted Nun*, ך.—Before Numb. x, 35, and after ver. 36, we find in our Hebrew text the letter *Nun*, ך, inverted (ך). In the Talmud, *Shabbath*, fol. 115, col. 2; fol. 116, col. 1, we are told that "the section commencing וַיִּהְיֶה בְּנֹסֶם הָאָרֶץ (Numb. x, 35) was made by God with signs below and above, to indicate that it is not in its proper place. But Rabbi said this is not so, but that this book was counted by itself. How do you know it? R. Samuel bar-Nachman said, R. Jonathan saith (it is written) 'She hath hewn out her seven pillars' (Prov. ix, 1); this means the seven books of the law." On the inverted *Nun*s found in Psa. cvii, mention is made in *Rosh Hash-shanah*, fol. 17, col. 2.

15. The *Vav Ketid* in Numb. xxv, 12.—Of this וִי־קָטִיעַ, or *Vav cut-off*, which is found in our Hebrew Bible וִי, we read in the Talmud, *Kiddushin*, fol. 66, col. 2: "Whence do we have it that a person having some defect is unfit for the sacred ministry? R. Jehudah said that R. Samuel taught that this is because the Scripture says, 'Wherefore say, Behold I give unto him my covenant of peace—a perfect peace, and not an imperfect

one. But, said one, it is written שָׁלוֹם, i. e. peace; but answered R. Nachman, the *Vav* in שָׁלוֹם is cut off" (ירי' דרש' ל' קטיעה היא).

16. *The Closed or Final Mem* (ם) in the middle of the word Isa. ix, 6, לְסֹרֶכָה.—In the Talmud, *Sanhedrin*, fol. 94, col. 2, we find the following:

"Why is it that all the *Mems* in the middle of a word are open (i. e. ם) and this one closed (i. e. ם)? The Holy One (blessed be he) wanted to make Hezekiah the Messiah, and Sennacherib Gog and Magog; whereupon Justice pleaded before the presence of the Holy One, Lord of the world, 'What! David, the king of Israel, who sang so many hymns and praises before thee, wilt thou not make him the Messiah? But Hezekiah, for whom thou hast performed all the miracles, and who has not uttered one song before thee, wilt thou make him the Messiah?' Therefore has the *Mem* been closed."

17. *Suspended Letters*.—The suspended *Nun* we find in מִשְׁנָה, Judg. xviii, 30. The Talmud, *Baba Bathra*, fol. 109, col. 2, states the following:

"Was he (i. e. Gershom) the son of Manasseh? while the Scripture says the sons of Moses were Eleazar and Gershom. But because he did the deeds of Manasseh (2 Kings xxi), did the Scripture append him to the (family) of Manasseh." The meaning is that the prophet did not like to call Gershom the son of Moses, because it would be ignominious that Moses should have had an impious son; hence he called him the son of Manasseh, with the suspended letter, which may mean the son of Manasseh or Moses.

The suspended *Ayin* is found in יִשְׂרָאֵל, Job xxxviii, 15. In the Talmud, *Sanhedrin*, fol. 103, col. 2, we read the following: "Why is the ם in יִשְׂרָאֵל suspended? It is to teach that when a man is יָשָׁר, poor, in this world, he will also be יָשָׁר in the world to come; or, literally, poor below, he will also be poor above."

Of the suspended *Ayin* in מִי־יָרֵךְ, Psa. lxxx, 14, we read, *Kiddushin*, fol. 30, col. 2, that this letter is the middle letter in the Psalms.

18. *Majuscular and Minuscular Letters*.—Of words written with large and small letters in our Hebrew Bible we find nothing in the Talmud, but some of these instances are mentioned in the *Sopherim*, ch. ix. That this mode of writing must have been very ancient cannot be doubted, for there is a dispute in the Talmud, *Megillah*, fol. 16, col. 2, whether the ו in וַיִּזְרַח (Esth. ix, 9) should be written as a majuscular or minuscular letter; and the word וַיִּחַלְלֵה (Lev. xiii, 33), which is now written with a majuscular ו, is mentioned in *Kiddushin*, fol. 30, col. 2, as being the middle of the verses of the Pentateuch.

19. *Mode of Quotations*. See QUOTATIONS OF THE OLD TESTAMENT IN THE TALMUD. (B. P.)

**Talmudists.** Under this head we include all those rabbins whose opinions are regarded as authoritative in the Talmud. The period of these men comprises the time from about B.C. 180 to A.D. 500, i. e. from Simon the Just to the completion of the Talmud. This period is again subdivided into that of the Tana'im and that of the Amora'im—the former representing the time from about B.C. 180 to A.D. 219, the latter from A.D. 219 to A.D. 500.

I. *Tana'im*.—The first recognised, after Simon's death, as the head of the Sanhedrim was Antigonus of Soho, about B.C. 180. His contemporary was Eliezer ben-Charsum, celebrated for his opulence, learning, and zeal in the promotion of religious knowledge. After Antigonus, always two (or *zugôth*) stand at the head of the community—the first being the president, the second the vice-president. As the first of these *zugôth*, or pairs, are mentioned Jose ben-Joezer and Joseph

ben-Jochanan, about B.C. 70. They were followed by Joshua ben-Perachja and Nithai of Arbela (q. v.). Their successors were Jehuda ben-Tabai and Simon ben-She-tach (q. v.). The fourth pair is represented in She-maja and Abtalion, about B.C. 47. The fifth and last pair are Hillel (q. v.) and Shammai (q. v.). Under their presidency lived Baba ben-Buta, Chanina ben-Dose, Jochanan ben-Zachai (q. v.), and Nechunjah ben-ha-Kana (q. v.). Hillel was followed by his son Simon (ben-Hillel) (q. v.). His successor was Gamaliel I (q. v.), who was followed by his son Simon (ben-Gamaliel) (q. v.). With Simon closes the period of the so-called *earlier* Tanaim. The *later* Tanaim first figure in history when the Temple was in ashes and Jerusalem a heap of ruins. At this period, verging upon decay, when Judaism was without any centre and support, appeared Jochanan ben-Zachai, the last among Hillel's eighty disciples. Jochanan established a school at Jamniah, or Jabneh, whose president he became. His successor was Gamaliel bar-Simon (q. v.), and his fellow-laborers were Akiba ben-Joseph (q. v.), Eliezer ben-Asarja, Eliezer ben-Arak, Eliezer ben-Hyrkanos (q. v.), Ismaël ben-Elisa (q. v.), Joshua ben-Hananja (q. v.), Nechunjah ben-ha-Kana (q. v.), and Tarphon (q. v.). Gamaliel was succeeded by his son Simon (ben-Gamaliel II) (q. v.), who transferred the Rabbinical apparatus to Tiberias. To his college belonged Nathan ha-Babli (q. v.), Jose ben-Halephta, Jehudah ben-Ilai, rabbi Meir (q. v.), and Simon ben-Jochai (q. v.). Simon ben-Gamaliel was succeeded by his son Judah the Holy (q. v.).

II. *Amoraïm*.—With the life and labors of rabbi Judah ended the succession of the Tanaim, who were now followed by a new order, the *Amoraïm* (אמוראים), i. e. the expositors of the law, at length no longer oral, but reduced to a written text. Some of the most distinguished of their number were rabbi Chija, Chanina bar-Chana, Abba Areka, or Rab (q. v.), Bar-Kappara, Jochanan bar-Napacha (q. v.), and Simon ben-Lakish (q. v.). Of the scholastic labors of these men we have the monumental result in the Palestine Gemara, commonly called *Talmud Jerushalmi* (תלמוד ירושלמי).

After the death of Judah, not only learning, but also the patriarchal dignity, was more and more in the decline; for with Judah's death the star of Judaea's learning had set, never to rise again in Palestine. Rabban Gamaliel III, Judah's son, and Judah II, son of Gamaliel III, his successor, were weak in character, mediocre in learning, and deficient in theological acumen. The latter transferred his residence to Tiberias, and Galilee, once so despised, now became "the Holy Land," and Tiberias its Jerusalem. Of Gamaliel IV, the successor of Judah II, and Judah III, son and successor of Gamaliel IV, history has nothing to record, except that they close the line of Palestinian teachers. Meanwhile numerous migrations of rabbins to Babylon had taken place, especially in the reign of Constantius, who persecuted the Jews. We leave Palestine and turn to Babylon, where the schools at Sora (q. v.), Pumbeditha (q. v.), Nahardea, and Machusa were in a flourishing condition.

At Babylon the greater and more noble part of the Jewish families settled at the Captivity, to return no more to their ancestral soil, and there the literary culture of the people took a development which exerted no small influence on the studies of after-generations. There the Jews lived under their *resh galutha*, or prince of the exiles, whose office was of an ecclesiastical and secular kind. So long as the Temple was standing the Babylonian Jews acknowledged the presidency of the high-priest, and paid the didrachm contribution to the Temple, which, however, they did not after the destruction of that edifice. Finally, the Babylonians succeeded in establishing their own independence, in civil and ecclesiastical matters, of the Western patriarchate, and established schools of learning all over the country without material aid from those of the fatherland, though the schools took the same undeveloped form as

those of the Holy Land. The names given to these schools were Aramean forms for the Hebrew ones of the Palestinian schools. The "house of learning" was called *Beth Ulphana* (בית אולפנא); *Beth Midrash* (בית מדרש), "the house of doctrine;" *Beth ha-Vaad* (בית הוועד); Heb. בית הכנסת, "the house of assemblage;" *Beth Metibtha* (בית מתיבתא); Heb. בית מתיבה, "the house of sitting;" *Beth Rabbanan* (בית רבנן), "the house of the masters;" *Beth Sidra* (בית סדרא), "the house of order." The principal or rector of the school was entitled *Rab Beth Ulphana* (רב בית אולפנא), *Resh Metibtha* (רש מתיבתא), *Resh Sidra* (רש סדרא), etc. So, too, the academical degree of *Mar* (מר) was equivalent to the Palestinian title of *rabbi* (רבי), and was conferred after the same course of study by the *semikah* (סמיכה), or "imposition of hands."

III. *Schools*.—The earliest school of which we have any specific information is that which was situated at

1. *Nahardea*.—With this school we first become acquainted towards the close of the 2d century. Nahardea was situated on the Euphrates, and for a time she was the Babylonian Jerusalem. While the Temple was yet in existence, this place had the treasury of the Babylonian congregations for the Temple-offerings which were brought to Jerusalem (Josephus, *Ant.* xviii, 12). The first rector at Nahardea was R. Shila, who was succeeded by Mar-Samuel, the astronomer (also called Arioch and Jarchinai), in A.D. 190–247. His disciples were Nachman ben-Jacob, Sheshet, Rabba ben-Abbulah, and Joseph ben-Chama. When Nahardea was sacked in 259 and the academy broken up, they migrated to

2. *Machusa*, a town on the Tigris, about four hours from Ctesiphon, where a new academy was founded. Rabba ben-Abbulah promoted this school of learning by his lectures, and Machusa attained some celebrity. Ten years (A.D. 363) after Rabba's death, the city was demolished by the Romans in the war under Julian. The most famous schools, however, were those at

3. *Pumbeditha* and *Sora*, where the *Amoraïm* attained great renown. The teachers of these schools having already been mentioned in the arts. PUMBADITHA and SORA, we need only to refer to them. Of the names mentioned, we have only given the most prominent, which, in part, are already given under the respective letter, or will be treated, so far as omitted, in the supplement volume.

IV. *Literature*.—Luzzatto, ואמראים, סדר תנאים (Prague, 1839); *Liber Juchasin*, ed. Filipowski (Lond. 1857); Frankel, *Hodegetica in Mishnam* (Lips. 1859 [Heb.]); Weiss, *Zur Geschichte der jüdischen Tradition* (Vienna, 1872–77, 2 vols. [Heb.]); Chiarini, *Le Talmud de Babylone* (Leips. 1831), i, 105 sq.; Bacher, *Die Agada der babylonischen Amoräer* (Strasburg, 1878). The Talmudists whose names are mentioned in the treatise *Baba Metsia* are given by Sammt in the appendix to his German translation of *Baba Metsiu* (Berlin, 1879), p. 160 sq. See SCRIBE. (B. P.)

**Talochon**, MARIE VINCENT, better known by his clerical name, *Père Élysée*, was a French surgeon, born in January, 1753, at Thorigny, and reared among the Brothers of Charity at Paris, whose order he entered Jan. 30, 1774. He was engaged in various public and benevolent enterprises, and died in Paris Nov. 27, 1817. See Hoefer, *Novv. Biog. Générale*, s. v.

**Tal'sas** (Σαλας v. r. Σαλαός, Vulg. *Thalsas*), a corrupt Græcism (1 Esdr. ix, 22) for the name ELASAH (q. v.) of the Hebrew list (Ezra x, 22).

**Tam**, JACOB BEN-MEIR, better known in Jewish literature under the name of *Rabenu Tam*, was born at Remers, France, about 1100, and died in 1171. He was a grandson of Rashi (q. v.), and youngest brother of Rashbam (q. v.), and was famous not only as a Talmud-

ist, grammarian, and commentator, but also for his piety, for which he obtained the appellation *Tam* (תָּם), in allusion to Gen. xxv, 27, where his namesake Jacob is denominated *Tam*=pious (תָּם אִישׁ חָם). Under the title of ספר דִּישָׁר, "the book of the righteous," he wrote additions on thirty treatises of the Talmud, published at Vienna in 1811. Supplements are given by Luzzatto from an old MS. in the *Kerem Chemed* (Prague, 1848), vii, 19 sq.; נֶשֶׁר טַאָלוֹת וְחִשְׁבוֹת; i. e. ten Talmudic decisions, also given by Luzzatto (*loc. cit.*); מַחְבֵּרָה עַל מִשְׁפָּטֵי הַנֶּזְעִמִּים, i. e. a poem on the Hebrew accents, consisting of forty-five stanzas, five of which were first published by Luzzatto (*loc. cit.*), and the whole forty-five of which appeared in the following work: סִתְחָכְרֵוֹת, or grammatical and lexical animadversions, designed to reconcile the differences of Dunash ibn-Labral and Menachen ben-Saruk on points of grammar and exegesis (first published by Filipowski, Lond. 1855); וְחִקּוֹן סֵפֶר תּוֹרָה, or הלכות ס"ח, or הלכות ספרים, a guide for transcribing MSS. of the Bible, in MS. extant; פֶּרֶשׁי הַנֶּךְ, or a grammatical commentary on the Bible, which has not yet come to light, but is quoted by commentators, lexicographers, and grammarians. R. Tam also enriched the Jewish ritual with some pieces, as the פְּסוּקֵי הַיָּמִים (i. e. "these words are true," etc.), in the *Machser Ashkenazim*, and used after the *haphtharah* for the second day of Pentecost. See Fürst, *Bibl. Jud.* iii, 406 sq.; De Rossi, *Dizionario Storico* (Germ. transl.), p. 306; Kitto, *Cyclop.* s. v.; Grätz, *Gesch. d. Juden*, vi, 196 sq.; Braunschweiger, *Gesch. d. Juden in den romanischen Staaten* (Würzburg, 1865), p. 85; Geiger, *Parshandatha* (Leips. 1855), p. 24 sq.; Kalish, *Hebrew Grammar* (Lond. 1863), ii, 27; Zunz, *Synagogale Poesie* (Berlin, 1855), p. 248; id. *Literaturgeschichte zur synagogalen Poesie* (ibid. 1865), p. 265-267; id. *Zur Literatur und Geschichte*, p. 32, 109; Rapaport, in *Kerem Chemed* (Prague, 1843), vii, 1-3; Luzzatto, *ibid.* p. 19-34, 35-53; Landshuth [L.], *Amude Haabodah* (עֲמֻדֵי הַבְּבֻדָּה) (Berlin, 1857), i, 106 sq. (B. P.)

**Tama** (*Kethib* in 1 Kings ix, 8). See TADMOR.

**Ta'mah** (Heb. תָּמָח, *Te'mach*; in pause, תָּמָח, *Ta'mach*, laughter [Gesens.], or combat [Fürst]; Sept. ἡμά, ἡμέα; Vulg. Thema), the name of a man whose descendants (or rather a place whose inhabitants) returned among the Nethinim from the captivity with Zerubabel (Ezra ii, 53, "Thamah;" Neh. vii, 55).

**Ta'mar** (Heb. תָּמָר, *Tamar*, a palm-tree, as often; Sept. ῥαμάρ [v. r. ῥαμάρ], but ῥαμάρ in Ezek.; Josephus, ῥαμάρ, *Ant.* vii, 3, 8; 10, 3; Vulg. Thamar), the name of one place and of three remarkable women in Old-Test. history. See also PALM.

1. A spot on the southeastern frontier of Judah, named in Ezek. xlvii, 19; xlviii, 28 only, evidently called from a palm-tree. We naturally think of *Hazezon-tamar*, the old name of *Engedi*; but this is not quite appropriate for location. Eusebius and Jerome mention a *Thamara*, a place lying between Hebron and Ailah (*Onomast.* s. v. "Hazezon-tamar"); and Ptolemy (v, 16, 8) mentions a ῥαμάρ, as do also the Peutinger Tables (Reland, *Palest.* p. 462). Robinson identifies it with Kurnûb, a place containing the ruins of an old fortress about an ordinary day's journey from el-Milh towards the pass es-Sufâh (*Bibl. Res.* ii, 198, 201). This, however, depends on a conjectural emendation of the *Onomasticon*, where, in the clause κώμη δις ὡς Μαΐς (v. r. μόλις, Μάλις), ἡμέρας ὁδόν, Robinson would read Μαλᾶνης for Μάψις, whereby he makes Thamara a day's journey from Malatha, which he identifies with el-Milh. Besides, as Van de Velde observes, the distance of Kurnûb from el-Milh is not a day's journey, but only four hours; nor is Kurnûb to the south-west

of the Dead Sea, where the Peutinger Tables place Thamar; nor are the ruins ancient (Van de Velde, *Syria*, ii, 130). Fürst (*Heb. Lex.* s. v.) regards it as identical with the *Tamar* of the *Kethib*, or text, in 1 Kings ix, 8; but that is generally thought to mean Tadmor (q. v.). Schwarz (*Palest.* p. 21, note) thinks that *Zoar* is meant, on the strength of certain Talmudical notices. De Saulcy (*Narr.* i, 7) endeavors to establish a connection between Tamar and the *Kalaat Um-Baghik*, at the mouth of the ravine of that name on the south-west side of the Dead Sea, on the ground (among others) that the names are similar. But this, to say the least, is more than doubtful. It is rather to be sought at the extreme south end of the Dead Sea, where the line as run by Ezekiel evidently begins (see Keil, *ad loc.*); perhaps at some clump of palms anciently existing at *Ain el-Arus*, near the mouth of Wady Fikreh.

2. The wife successively of Er and Onan, the two sons of Judah (Gen. xxxviii, 6-30). Her importance in the sacred narrative depends on the great anxiety to keep up the lineage of Judah. It seemed as if the family were on the point of extinction. Er and Onan (q. v. respectively) had each in turn perished suddenly. Judah's wife, Bathshuah, died; and there only remained a child, Shelah, whom Judah was unwilling to trust to the dangerous union, as it appeared, with Tamar, lest he should meet with the same fate as his brothers. That he should, however, marry her seems to have been regarded as part of the fixed law of the tribe, whence its incorporation into the Mosaic law in after-times (Deut. xxv, 5; Matt. xxii, 24); and, as such, Tamar was determined not to let the opportunity escape through Judah's parental anxiety. Accordingly, she resorted to the desperate expedient of entrapping the father himself into the union which he feared for his son. He, on the first emergence from his mourning for his wife, went to one of the festivals often mentioned in Jewish history as attendant on sheep-shearing. He wore on his finger the ring of his chieftainship; he carried his staff in his hand; he wore a collar or necklace round his neck. He was encountered by a veiled woman on the road leading to Timnath, the future birthplace of Samson, among the hills of Dan. He took her for one of the unfortunate women who were consecrated to the impure rites of the Canaanitish worship. See HARLOT. He promised her, as the price of his intercourse, a kid from the flocks to which he was going, and left as his pledge his ornaments and his staff. The kid he sent back by his shepherd (Sept.), Hirah of Adullam. The woman could nowhere be found. Months afterwards it was discovered to be his own daughter-in-law, Tamar, who had thus concealed herself under the veil or mantle, which she cast off on her return home, where she resumed the seclusion and dress of a widow. She was sentenced to be burned alive, and was only saved by the discovery, through the pledges which Judah had left, that her seducer was no less than the chieftain of the tribe. He had the magnanimity to recognise that she had been driven into this crime by his own neglect of his promise to give her in marriage to his youngest son. "She hath been more righteous than I . . . and he knew her again no more" (Gen. xxxviii, 26). The fruit of this intercourse was twins, Pharez and Zarah, and through Pharez the sacred line was continued. B.C. 1885. Hence the prominence given to Tamar in the nuptial benediction of the tribe of Judah (Ruth iv, 12) and in the genealogy of our Lord (Matt. i, 3). See JUDAH.

3. Daughter of David and Maachah the Geshurite princess, and thus sister of Absalom (2 Sam. xiii, 1-32; 1 Chron. iii, 9; Josephus, *Ant.* vii, 8, 1). She and her brother were alike remarkable for their extraordinary beauty. Her name ("palm-tree") may have been given her on this account (comp. Cant. vii, 7). This fatal beauty inspired a frantic passion in her half-brother Amnon, the eldest son of David by Ahinoam. He

wasted away, from the feeling that it was impossible to gratify his desire, "for she was a virgin"—the narrative leaves it uncertain whether from a scruple on his part, or from the seclusion in which, in her unmarried state, she was kept. Morning by morning, as he received the visits of his friend Jonadab, he is paler and thinner (Josephus, *Ant.* vii, 8, 1). Jonadab discovers the cause, and suggests to him the means of accomplishing his wicked purpose. He was to feign sickness. The king, who appears to have entertained a considerable affection, almost awe, for him as the eldest son (2 Sam. xiii, 5, 21; Sept.), came to visit him; and Amnon entreated the presence of Tamar on the pretext that she alone could give him the food that he would eat. What follows is curious, as showing the simplicity of the royal life. It would almost seem that Tamar was supposed to have a peculiar art of baking palatable cakes. She came to his house (for each prince appears to have had a separate establishment), took the dough and kneaded it, and then in his presence (for this was to be a part of his fancy, as if there were something exquisite in the manner of her performing the work) kneaded it a second time into the form of cakes. The name given to these cakes (*lebibāh*), "heart-cakes," has been variously explained: "hollow cakes," "cakes with some stimulating spices" (like our word *cordial*), cakes in the shape of a heart (like the Moravian *gerührte Herzen*, Thenius, *ad loc.*), cakes "the delight of the heart." Whatever it be, it implies something special and peculiar. She then took the pan in which they had been baked and poured them all out in a heap before the prince. This operation seems to have gone on in an outer room, on which Amnon's bedchamber opened. He caused his attendants to retire, called her to the inner room, and there accomplished his design. In her touching remonstrance two points are remarkable. First, the expression of the infamy of such a crime "in Israel," implying the loftier standard of morals that prevailed as compared with other countries at that time; and, secondly, the belief that even this standard might be overborne lawfully by royal authority—"Speak to the king, for he will not withhold me from thee." This expression has led to much needless explanation from its contradiction to Lev. xviii, 9; xx, 17; Deut. xxvii, 22; as, e. g., that her mother, Maachah, not being a Jewess, there was no proper legal relationship between her and Amnon; or that she was ignorant of the law; or that the Mosaic laws were not then in existence (Thenius, *ad loc.*). It is enough to suppose, what evidently her whole speech implies, that the king had a dispensing power which was conceived to cover even extreme cases. The brutal hatred of Amnon succeeding to his brutal passion, and the indignation of Tamar at his barbarous insult, even surpassing her indignation at his shameful outrage, are pathetically and graphically told, and in the narrative another glimpse is given us of the manners of the royal household. The unmarried princesses, it seems, were distinguished by robes or gowns with sleeves (so the Sept., Josephus, etc., take the word translated in the A. V. "divers colors"). Such was the dress worn by Tamar on the present occasion, and when the guard at Amnon's door had thrust her out and closed the door after her to prevent her return, she, in her agony, snatched handfuls of ashes from the ground and threw them on her hair, then tore off her royal sleeves, and clasped her bare hands upon her head, and rushed to and fro through the streets screaming aloud. In this state she encountered her brother Absalom, who took her to his house, where she remained as if in a state of widowhood. The king was afraid or unwilling to interfere with the heir to the throne, but she was avenged by Absalom, as Dinah had been by Simeon and Levi, and out of that vengeance grew the series of calamities which darkened the close of David's reign (see Stanley, *Jewish Church*, ii, 128). B.C. 1033. See DAVID.

4. Daughter of Absalom, called, probably, after her X.—N

beautiful aunt, and inheriting the beauty of both aunt and father (2 Sam. xiv, 7). She was the sole survivor of the house of Absalom; and ultimately, by her marriage with Uriah of Gibeah, became the mother of Maachah, the future queen of Judah, or wife of Abijah (1 Kings xv, 2), Maachah being called after her great-grandmother, as Tamar after her aunt. B.C. 1023. See ABSALOM.

**Tambourine.** See TIMBREL.

**Tamburini**, a name common to several Roman ecclesiastics, of whom we mention the following:

1. MICHAEL ANGELUS, of Modena, was made general of the Jesuits Jan. 31, 1706, and died Feb. 28, 1730.

2. PIETRO, born in 1737 at Brescia, received his theological and philosophical training at the seminary of his native place, where he afterwards acted as the head of the lyceum founded by him. He was also head of the *Collegium Germanicum* at Rome, and was promoted by Maria Theresa to a professorship of theology, and in 1779 to the chair of natural law and moral philosophy at Pavia. He resigned his professorship in 1795, but was compelled by the French authorities in Lombardy to fill the chair of ethics and international law in 1797. For three years, 1798-1801, this chair was suppressed, but, being restored in the latter year, was filled by Tamburini till 1818, when he was appointed dean of the faculty of law. He died at Pavia, March 14, 1827. He was made a chevalier of the Iron Crown by the emperor of Austria, and received other distinctions. He wrote, *Idea della Santa Sede* (Pavia, 1784):—*Introduzione allo Studio della Filosofia* (Milan, 1797):—*Lezioni di Filosofia Morale*, etc. (Pavia, 1806-12, 4 vols.):—*Elementa Juris Naturæ* (Milan, 1815):—*Cenni sulla Perfettibilità dell' Umana Famiglia* (ibid. 1823):—*Prælectiones de Ecclesia Christi et Universa Jurisprudentia Ecclesiastica, quæ habuit in Academia Ficinensi* (Lipsiæ, 1845, 4 pts.):—*Prælectiones de Justitia Christi, et de Sacramentis, de Ultimo Hominis Fine deque Virtutibus Theol. et Cardinalibus* (Ficino, 1783-85, 3 vols.):—*Analisi delle Apologie di S. Justino Mart., con alcune Riflessioni* (Pavia, 1792):—*Ragionamenti sul 1º Libro di Orig. contra Celso* (ibid. 1786):—on Tertullian, *Analisi del Libro delle Prescrizioni, con alcune Osservazioni* (ibid. 1782).

3. TOMMASO, a Jesuit, was born in 1591 at Caltanissetta, in Sicily, was professor of theology, afterwards censor and counsellor of the Holy Office, and died at Palermo in 1675. His moral and theological writings were published at Lyons in 1659, and Venice in 1755.

**Tamid.** See TALMUD.

**Tamil Version.** Tamil, or Tamul, the language of the ancient kingdom of Dravira, is spoken in the extensive country now called the Carnatic, and is the vernacular language from the town of Pulicat in the north to Cape Comorin in the south, and from the shores of the Indian Ocean on the east to the Ghauts on the west. It also obtains along the whole northern coast of Ceylon, including the populous district of Jaffna, where it is spoken by a race of people sometimes called the Malabars. Tamil is likewise the vernacular language of the Moormen of Ceylon.

A Tamil version of the New Test. was executed by Ziegenbalg, the first Protestant missionary to India, with the help of other missionaries associated with him, at Tranquebar. He commenced the translation in 1708, and completed it in 1711. The printing of this version was delayed in order that it might receive the benefit of a thorough revision; and this important task was committed to John Ernest Grundler, a German missionary, who had arrived in India soon after the commencement of the translation. Under his care the work was printed, bearing the title *Novum Testamentum D. N. Jesu*

*Christi, ex Originali Textu in Linguam Damulicam Versum, in Usum Gentis Malabaricae, opera et studio Bartholomæi Ziegenbalg et Joan. Ernesti Grundleri Serenissimi Daniæ Regis Friderici IV ad Indos Orientales Missionariorum (Tranquebaræ, 1714).* In 1717 Ziegenbalg commenced the translation of the Old Test., and in 1719, having carried it as far as the book of Ruth, he died, at the age of thirty-six. After his decease, and that of his fellow-laborer Grundler, which occurred during the following year, the revision of his manuscripts and the prosecution of the version of the Old Test. devolved on Benjamin Schultze, a missionary who had arrived from Halle a short time previously under the patronage of the Society for Promoting Christian Knowledge. Schultze published the portion of the Old Test. translated by Ziegenbalg in 1723, and completed the version in 1727, which was published in three parts, viz. *Biblia Damulica, seu quod Deus Omnipotentissimus semet ipsum ex sua Æternitate clarius Manifestaturus de Cælo est Locutus. Veteris Testamenti Pars Prima, in qua Mosès Libri quinque, Josuæ Liber unus, atque Liber unus Judicum, studio et opera Bartholomæi Ziegenbalgii Missionarii ad Indos Orientales in linguam Damulicam versi continentur (Tranquebariæ in littore Coromandelino, typis et sumptibus Missionis Daniæ, 1723).* *Biblia Damulica, seu quod Deus Sapientissimus in sua Divina Economia cum Populo Israëlito et Egit et Locutus est. Veteris Testamenti Pars Secunda, in qua Libellus Ruth, Samuelis Liber Prior et Posterior, Liber Nehemias, Liber Esther, Liber Jobi, Liber Psalmorum Davidis, Liber Proverborum, Liber Ecclesiastæ, et Liber Cantici Canticorum, studio et opera, etc. (ibid. 1726).* *Biblia Damulica, seu quod Deus Omnisecundus de gratia in Jesu Christo tempore Novi Testamenti Revelanda per Sanctos suos Prophetas est Vaticinatus. Veteris Testamenti Pars Tertia, in qua Prophetæ Majores, Esaias, Jeremias, ejusdemque Lamentationes, Ezechiel, Daniel; Prophetæ Minores, Hoseas, Joel, Amos, Obadias, Jona, Micha, Nahum, Habacuc, Zephania, Haggai, Zacharias, et Malachias, studio et opera, etc. (ibid. 1727).* To these parts were added, in the year 1728, the Apocryphal books, or *Libri Apocryphi, seu Libri a quibusdam Piis Viris Ecclesiæ Antiquæ Judaicæ post Prophetas Veteris Testamenti Scripti, continentes partim Varias Regulas Vitæ Utiles, partim Supplementum Historiæ Ecclesiasticæ Veteris Testamenti, scilicet Liber Sapientiæ, Ecclesiasticus sive Sirach, Liber Esdræ, Liber Tobie, Liber Judith, Adjectiones ad Librum Esther, Liber Baruch, Epistola Jeremias, Adjectiones ad Danielelem seu Trimum Virorum Hymnologia, Historia Sosannæ, item Belis et Draconis, Maccabeorum Liber Primus, Secundus, et Tertius, denique Oratio Manassæ, studio et opera, etc. (ibid. 1728).*

Schultze likewise addressed himself to a diligent revision of the New Test., a second edition of which he put to press in 1722, and completed in 1724, at Tranquebar. It has the same title as the first, with the addition *Editio secunda correctior et accessione summariorum cujusvis capituli auctior*. In 1758 a third edition of the New Test. was printed at the same place; it had previously been subjected to another revision, in which several missionaries took a part. The second Tranquebar edition was reprinted at Colombo in 1741-43, after having undergone some alterations adapting it to the Tamil spoken in Ceylon. This edition was designed for the native Tamilian Christians in that island, and was published under the auspices of L. B. von Imhoff, the governor.

In 1777 an important version of the New Test. was published by the Rev. J. P. Fabricius, one of Schultze's successors in the Danish mission at Madras. This version is far more elegant and classical in diction than that of the Tranquebar translators. Fabricius likewise undertook the revision of Schultze's version of the Old Test., preparatory to a second edition; but the work, as revised by him, has every claim to be considered a new and independent version. He sent the translation, sheet by sheet, for examination and correction to the missionaries at Cuddalore; from them it passed to the Danish

missionaries, and from these to the native translator to the Danish government. The notes and corrections thus obtained were carefully collated by Fabricius, and the whole translation was again subjected by him to a searching revision. It was printed at the mission press at Tranquebar between the years 1777 and 1782, under the special care of two missionaries, one of whom was Dr. Rottler. Fabricius was esteemed an "unparalleled Tamil scholar," and his translation long held the rank of the standard Tamil version of the Scriptures in the missions of the Society for the Propagation of the Gospel in Tanjore and Madras, and partly in those in Tinnevely, and also in the missions of the Leipzig Lutheran Missionary Society.

The editions of the two versions of the New Test. above mentioned, printed by the Danish missionaries prior to the commencement of the present century, amount in all to fourteen, besides two versions of the Old Test. But the number of copies issued being very far from adequate to the wants of the native Christians, the deplorable scarcity of the Scriptures in the Tamil country was first pressed upon the notice of the British and Foreign Bible Society in a letter from the Rev. Dr. Buchanan, dated Madras, 1806; and in 1813 an edition consisting of 5000 copies was completed by the Serampore missionaries, the text being that of Fabricius.

As a great demand for the Scriptures still continued throughout the Tamil country, even after the circulation of this large edition, it seemed necessary to take immediate measures for issuing further supplies. The want of copies of the Scriptures appeared to be particularly felt at Ceylon, where the number of native Christians speaking the Tamil language was estimated at 45,000. Besides the edition of the New Test. published at Colombo in 1743, as above mentioned, a version of the Pentateuch, translated by Mr. De Milho, had also been printed in Ceylon, under the patronage of the Dutch government, in 1790. These editions, however, had been long exhausted, and the people in general were almost destitute of the Scriptures. It was therefore deemed advisable not only to issue another edition, but also to obtain such a revision of the existing version as might render it intelligible to the Tamil population of Ceylon and of the adjacent continent. This important version was committed to the Rev. C. T. E. Rhenius, of the Church Mission, subject to the superintendence of the Rev. Dr. Rottler (who had formerly assisted in carrying the version of Fabricius through the press) and to the inspection of the missionaries at Trichinopoly, Tanjore, and Tranquebar. To secure the greater accuracy of the work, a committee of translation was appointed at Madras in 1821. In 1829 Rhenius's version seemed to have been completed, and from the time of its appearance it has been used in the missions of the Church Missionary Society, and in those of the London Missionary Society, the Wesleyan Missionary Society, and the American Board of Missions.

But neither Fabricius's version nor Rhenius's being in universal use among Tamil Christians, neither version had acquired among them that prescriptive reverence and authority which are conceded to the authorized English version (except by Roman Catholics) wherever the English language is spoken. Fabricius's version, though admitted by all to be very faithful to the original, was regarded by Tamil scholars in general as too frequently unidiomatical and obscure; while Rhenius's version, though generally written in clear, idiomatic Tamil, was regarded by some of those by whom it was used, and by all who were accustomed to Fabricius, as too paraphrastic, as departing too frequently, without sufficient warrant, from the renderings adopted in the principal European versions, and as needlessly differing from Fabricius's forms of expression, even when they happened to be perfectly correct.

For the sake of having a version which should be generally acceptable to Tamil Christians and Tamil scholars, the Rev. P. Percival, assisted by missionaries

in Jaffna, Ceylon, undertook in 1849 a new version, known as the "Tentative Version," which has proved to be a very valuable contribution to the work of Tamil Biblical revision.

The Romanists, who had managed to evade the necessity of publishing any portion of the Holy Scriptures in Tamil during the 300 years in which they had been laboring in the Tamil country, were induced in 1857 to publish at Pondicherry a translation of their own of the Gospels and the Acts of the Apostles. This translation has been made from the Latin Vulgate, not from the original Greek, and, where it is a good translation, may be regarded as a reproduction of Fabricius, with a still more excessive zeal for literality. Where it differs from Fabricius, though occasionally it succeeds in giving a happy turn to the expression, it more often presents so curious a mixture of high and low Tamil, and the general character of the composition is so rugged and uncouth, that even the heads of the Roman community themselves need have very little fear that this long-delayed, reluctantly published translation of a portion of the Scriptures should be too generally read by their people.

Taking all these circumstances into account, and considering the evils arising from the existence and use among Tamil Christians of a variety of versions of the Tamil New Test., it was felt that another effort was in the highest degree desirable to secure to the Tamil people a version which should be worthy of being accepted by all religious communities in the Tamil country, however they might differ in various other particulars. Accordingly delegates were selected from the various missionary bodies in the Tamil-speaking district. The first meeting was held at Palamcottah. It commenced on April 29, 1861, and closed on June 18, during which period the delegates worked nine hours a day. In 1863 the revision of the Tamil New Test., under the editorial supervision of the Rev. H. Bower, was completed.

In the report for 1865 we read, "The attention of the Madras Auxiliary is now directed to a version of the Tamil Old Test., on the same principles as have led to the successful completion of the New Test. under the editorial superintendence of the Rev. H. Bower." The completion of this version was announced in 1869. In 1873 we read that Mr. Bower has been appointed to prepare the marginal references and alternative renderings for the Tamil Bible. Up to March 31, 1879, the British and Foreign Bible Society had disposed of 1,876,950 copies of the Tamil Bible, while of the Tamil with English 32,000 were distributed. See Masch, *Bibliotheca Sacra*, ii, 197 sq.; the *Bible of Every Land*; and the *Annual Reports* of the British and Foreign Bible Society. (B. P.)

**Tam'muz** (Heb. with the article *hat-Tammuz'*, תַּמְּזִיז, the *Tammuz*, as if originally an appellative; Sept. ὁ Ταμμούζ), a name of great obscurity, which occurs but once in the Scriptures. In the sixth year of the captivity of Jehoiachin, in the sixth month and on the fifth day of the month, the prophet Ezekiel, as he sat in his house surrounded by the elders of Judah, was transported in spirit to the far-distant Temple at Jerusalem. The hand of the Lord God was upon him, and led him "to the door of the gate of the house of Jehovah, which was towards the north; and behold there the women sitting, weeping for the Tammuz" (Ezek. viii, 14). Some translate the last clause (מְבַכְּתִים אֶת-תַּמְּזִיז) "causing the Tammuz to weep," and the influence which this rendering has upon the interpretation will be seen hereafter.

1. *Etymological Signification of the Word.*—If תַּמְּזִיז be a regularly formed Hebrew word, it must be derived either from a root *תָּמַז* or *תָּמַזַּ* (comp. the forms *תָּמַזְתִּי*, *תָּמַזְתִּיךָ*), which is not known to exist. To remedy this defect, Fürst (*Handb.* s. v.) invents a root, to which he gives the signification "to be strong, mighty, victori-

ous," and, transitively, "to overpower, annihilate." It is to be regretted that this lexicographer cannot be contented to confess his ignorance of what is unknown. Rödiger (in Gesenius, *Thesaur.* s. v.) suggests the derivation from the root *תָּמַזַּ*; according to which תַּמְּזִיז is a contraction of תָּמַזְתִּי, and signifies a melting-away, dissolution, departure, and so the ἀφανισμός Ἀδώνιδος, or disappearance of Adonis, which was mourned by the Phœnician women, and, after them, by the Greeks. But the etymology is unsound, and is evidently contrived so as to connect the name Tammuz with the general tradition regarding it. Mühlau (new ed. of Gesenius's *Lex.*) refers to Delitzsch's elucidation (*Stud. z. semit. Religionsgesch.* i, 35, 300 sq.) from the Babylonico-Assyrian form *Dūzu* (for *Dumuzu*), signifying "sprouting of life."

2. *Old Interpretations.*—The ancient versions supply us with no help. The Sept., the Targum of Jonathan ben-Uzziel, the Peshito-Syriac, and the Arabic in Walton's Polyglot merely reproduce the Hebrew word. In the Targum of Jonathan on Gen. viii, 5, "the tenth month" is translated "the month Tammuz." According to Castell (*Lex. Hept.*), *tamūz* is used in Arabic to denote "the heat of summer;" and *Tamūzi* is the name given to the Pharaoh who cruelly treated the Israelites.

The Vulg. alone gives *Adonis* as a modern equivalent, and this rendering has been eagerly adopted by subsequent commentators with but few exceptions. It is at least as old, therefore, as Jerome, and the fact of his having adopted it shows that it must have embodied the most credible tradition. In his note upon the passage he adds that since, according to the Gentile fable, Adonis had been slain in the month of June, the Syrians give the name of Tammuz to this month, when they celebrate to him an anniversary solemnity, in which he is lamented by the women as dead, and, afterwards coming to life again, is celebrated with songs and praises. In another passage (*ad Paulinum*, in *Opp.* i, 102, ed. Basil. 1565) he laments that Bethlehem was overshadowed by a grove of Tammuz, that is, of Adonis, and that "in the cave where the infant Christ once cried, the lover of Venus was bewailed." Cyril of Alexandria (*in Oseam*, in *Opp.* iii, 79, ed. Paris, 1638) and Theodoret (*in Ezech.*) give the same explanation, and are followed by the author of the *Chronicon Paschale*. The only exception to this uniformity is in the Syriac translation of Melito's Apology, edited by Dr. Cureton in his *Spicilegium Syriacum*. The date of the translation is unknown; the original, if genuine, must belong to the 2d century. The following is a literal rendering of the Syriac: "The sons of Phœnicia worshipped Balthi, the queen of Cyprus. For she loved Tamuzo, the son of Cuthar, the king of the Phœnicians, and forsook her kingdom and came and dwelt in Gebal, a fortress of the Phœnicians. And at that time she made all the villages (not *Cyprians*, as Dr. Cureton translates) subject to Cuthar the king. For, before Tamuzo, she had loved Ares and committed adultery with him, and Hephæstus, her husband, caught her and was jealous of her. And he (i. e. Ares) came and slew Tamuzo on Lebanon while he made a hunting among the wild boars. And from that time Balthi remained in Gebal, and died in the city of Aphaca, where Tamuzo was buried" (p. 25 of the Syriac text). We have here very clearly the Greek legend of Adonis reproduced with a single change of name. Whether this change is due to the translator, as is not improbable, or whether he found "Tammuz" in the original of Melito, it is impossible to say. Be this as it may, the tradition embodied in the passage quoted is probably as valuable as that in the same author which regards Serapis as the deification of Joseph. The Syriac lexicographer Bar-Bahlul (10th century) gives the legend as it had come down to his time. "Tomuzo was, as they say, a hunter, shepherd, and chaser of wild beasts; who, when Belathi loved him, took her away from her husband. And when her hus-

band went forth to seek her, Tomuzo slew him. And with regard to Tomuzo also, there met him in the desert a wild boar and slew him. And his father made for him a great lamentation and weeping in the month Tomuz: and Delathi, his wife, she, too, made a lamentation and mourning over him. And this tradition was handed down among the heathen people during her lifetime and after her death, which same tradition the Jews received with the rest of the evil festivals of the people, and in that month Tomuz used to make for him a great feast. Tomuz also is the name of one of the months of the Syrians."

In the next century the legend assumes, for the first time, a different form in the hands of a Rabbinical commentator. Rabbi Solomon Isaaki (Rashi) has the following note on the passage in Ezekiel: "An image which the women made hot in the inside, and its eyes were of lead, and they melted by reason of the heat of the burning, and it seemed as if it wept; and they (the women) said, He asketh for offerings. Tammuz is a word signifying burning, as *לְמִזְרָה* (Dan. iii, 19), and *אֶחָדָא אֲזִיזָא בְּחִירָה* (ver. 22)." Instead of rendering "weeping for the Tammuz," he gives what appears to be the equivalent in French, "faisantes pleurer l'échauffé." It is clear, therefore, that Rashi regards Tammuz as an appellative derived from the Chaldean root *אֲזָז*, *azā*, "to make hot." It is equally clear that his etymology cannot be defended for an instant. In the 12th century (1161) Solomon ben-Abraham Parohon, in his *Lexicon*, compiled at Salerno from the works of Jehuda Chayug and Abulwalid Merwan ben-Gannach, has the following observations upon Tammuz: "It is the likeness of a reptile which they make upon the water, and the water is collected in it and flows through its holes, and it seems as if it wept. But the month called Tammuz is Persian, and so are all our months; none of them is from the sacred tongue. Though they are written in the Scripture, they are Persian; but in the sacred tongue the first month, the second month," etc. At the close of this century we meet for the first time with an entirely new tradition repeated by R. David Kimchi, both in his *Lexicon* and in his *Commentary*, from the *Moreh Nebuchim* of Maimonides: "In the month Tammuz they made a feast of an idol, and the women came to gladden him; and some say that by crafty means they caused the water to come into the eyes of the idol which is called Tammuz, and it wept, as if it asked them to worship it. And some interpret Tammuz 'the burned one,' as if from Dan. iii, 19 (see above), i. e. they wept over him because he was burned; for they used to burn their sons and their daughters in the fire, and the women used to weep over them. . . . But the Rab, the wise, the great, our Rabbi Moshe bar-Maimon, of blessed memory, has written that it is found written in one of the ancient idolatrous books that there was a man of the idolatrous prophets, and his name was Tammuz. And he called to a certain king and commanded him to serve the seven planets and the twelve signs. And that king put him to a violent death; and on the night of his death there were gathered together all the images from the ends of the earth to the Temple of Babel, to the golden image which was the image of the sun. Now this image was suspended between heaven and earth, and it fell down in the midst of the temple, and the images likewise (fell down) round about it, and it told them what had befallen Tammuz the prophet. And the images all of them wept and lamented all the night; and, as it came to pass, in the morning all the images flew away to their own temples in the ends of the earth. And this was to them for an everlasting statute; at the beginning of the first day of the month Tammuz each year they lamented and wept over Tammuz. And some interpret Tammuz as the name of an animal, for they used to worship an image which they had, and the Targum of

(the passage) *וַיִּנְשְׁוּ צִירִים אֶת אֲרִיָּם* (Isa. xxxiv, 14) *וַיַּעֲרִצְרוּ תַּמּוּזִין בַּחֲתוּלִין*. But in most copies *תַּמּוּזִין* is written with two Vavs." The book of the ancient idolaters from which Maimonides quotes is the now celebrated work on the agriculture of the Nabathæans, to which reference will be made hereafter. Ben-Melech gives no help, and Abendana merely quotes the explanations given by Rashi and Kimchi.

3. *Modern Opinions*.—The tradition recorded by Jerome, which identifies Tammuz with Adonis, has been followed by most subsequent commentators; among others, by Vatablus, Castellio, Cornelius a Lapide, Oslander, Caspar Sanctius, Lavater, Villalpandus, Selden, Simonis, Calmet, and, in later times, by J. D. Michaelis, Gesenius, Ben-Zeb, Rosenmüller, Maurer, Ewald, Hävernich, Hitzig, and Movers. Luther and others regarded Tammuz as a name of Bacchus. That Tammuz was the Egyptian Osiris, and that his worship was introduced into Jerusalem from Egypt, was held by Calvin, Piscator, Junius, Leusden, and Pfeiffer. This view depends chiefly upon a false etymology proposed by Kircher, which connects the word Tammuz with the Coptic *tamut*, to hide, and so makes it signify the hidden or concealed one; and therefore Osiris, the Egyptian king slain by Typho, whose loss was commanded by Isis to be yearly lamented in Egypt. The women weeping for Tammuz are in this case, according to Junius, the priestesses of Isis. The Egyptian origin of the name Tammuz has also been defended by a reference to the god Amuz, mentioned by Plutarch and Herodotus, who is identical with Osiris. There is good reason, however, to believe that Amuz is a mistake for Amun. That something corresponding to Tammuz is found in Egyptian proper names as they appear in Greek cannot be denied. *Ταμύς*, an Egyptian, appears in Thucydides (viii, 31) as a Persian officer, in Xenophon (*Anab.* i, 4, 2) as an admiral. The Egyptian pilot who heard the mysterious voice bidding him proclaim "Great Pan is dead" was called *Θαμοῖς* (Plutarch, *De Defect. Orat.* 17). The names of the Egyptian kings, *Θούμμωσις*, *Τέδμωσις*, and *Θούσις*, mentioned by Manetho (Josephus, *Cont. Ap.* i, 14, 15), have in turn been compared with Tammuz; but, unless some more certain evidence be brought forward than is found in these apparent resemblances, there is little reason to conclude that the worship of Tammuz was of Egyptian origin.

The identification of Tammuz with an idolatrous prophet, which has already been given in a quotation from Maimonides, who himself quotes from the *Agriculture of the Nabathæans*, has been recently revived by Prof. Chwolson, of St. Petersburg (*Ueber Tammuz, etc.* [St. Petersburg, 1860]). An Arab writer of the 10th century, En-Nedim, in his book called *Fihrist el-'Ulüm*, says (quoting from Abū Sa'īd Wahb ben-Ibrahīm) that in the middle of the month Tammuz a feast is held in honor of the god Tā'ūz. The women bewailed him because his lord slew him and ground his bones in a mill, and scattered them to the winds. In consequence of this the women ate nothing, during the feast, that had been ground in a mill (Chwolson, *Die Ssabier, etc.*, ii, 27). Prof. Chwolson regards Tā'ūz as a corruption of Tammuz; but the most important passage, in his eyes, is from the old Babylonian book called the *Agriculture of the Nabathæans*, to which he attributes a fabulous antiquity. It was written, he maintains, by one Qūt-'āml, towards the end of the 14th century B.C., and was translated into Arabic by a descendant of the ancient Chaldeans, whose name was Ibn-Washīyyah. As Prof. Chwolson's theory has been strongly attacked, and as the chief materials upon which it is founded are not yet before the public, it would be equally premature to take him as an authority, or to pronounce positively against his hypothesis, though, judging from present evidence, we are inclined to be more than sceptical as to its truth. Qūt-'āml then, in that dim antiquity from which he speaks to us, tells the same story of the

prophet Tammuz as has already been given in the quotation from Kimchi. It was read in the temples after prayers to an audience who wept and wailed; and so great was the magic influence of the tale that Qû'tâmî himself, though incredulous of its truth, was unable to restrain his tears. A part, he thought, might be true, but it referred to an event so far removed by time from the age in which he lived that he was compelled to be sceptical on many points. His translator, Ibn-Washiyah, adds that Tammuz belonged neither to the Chaldeans nor to the Canaanites, nor to the Hebrews nor to the Assyrians, but to the ancient people of Janbân. This last, Chwolson conjectures, may be the Shemitic name given to the gigantic Cushite aborigines of Chaldea, whom the Shemitic Nabathæans found when they first came into the country, and from whom they adopted certain elements of their worship. Thus Tammuz, or Tammûzi, belongs to a religious epoch in Babylonia which preceded the Shemitic (id. *Ueberreste d. albabyl. Lit.* p. 19). Ibn-Washiyah says, moreover, that all the Sabians of his time, both those of Babylonia and of Harran, wept and wailed for Tammuz in the month which was named after him, but that none of them preserved any tradition of the origin of the worship. This fact alone appears to militate strongly against the truth of Ibn-Washiyah's story as to the manner in which he discovered the works he professed to translate. It has been due to Prof. Chwolson's reputation to give in brief the substance of his explanation of Tammuz; but it must be confessed that he throws little light upon the obscurity of the subject.

It seems perfectly clear from what has been said that the name Tammuz affords no clue to the identification of the deity whom it designated. The slight hint given by the prophet of the nature of the worship and worshippers of Tammuz has been sufficient to connect them with the yearly mourning for Adonis by the Syrian damsels. Beyond this we can attach no special weight to the explanation of Jerome. It is a conjecture, and nothing more, and does not appear to represent any tradition. All that can be said, therefore, is that it is not impossible that Tammuz may be a name of Adonis, the sun-god, but that there is nothing to prove it. It is true, however, that the name of Adonis does occur in Phœnician inscriptions (𐤀𐤏𐤍𐤏𐤍, see Gesenius, *Monum. Phœn.* ii, 400), and the coincidences of the ancient notices above and the mode of worship detailed below with the language of Ezekiel afford the most plausible interpretation hitherto offered.

4. *Ceremonies of the Cultus.*—There was a temple at Amathus, in Cyprus, shared by Adonis and Aphrodite (Pausan. ix, 41, 2); and the worship of Adonis is said to have come from Cyprus to Athens in the time of the Persian war (Apollodor. iii, 14, 4; Pausan. ii, 20, 5; Ovid, *Metam.* x, 725; Philostr. *Apoll.* vii, 32; Plutarch, *Alcib.* c. 18; Athen. xv, 672; Aristoph. *Pax*, 420). But the town of Byblos, in Phœnicia, was the headquarters of the Adonis-worship (Hamaker, *Miscell. Phœnic.* p. 125). The feast in his honor was celebrated each year in the temple of Aphrodite (said to have been founded by Kinyras, the reputed father of Adonis) on the Lebanon (Lucian, *De Dea Syria*, § 6) with rites partly sorrowful, partly joyful. The emperor Julian was present at Antioch when the same festival was held (Amm. Marc. xxii, 9, 13). It lasted seven days (xx, 1), the period of mourning among the Jews (Ecclus. xxii, 12; Gen. i, 10; 1 Sam. xxxi, 13; Judith xvi, 24), the Egyptians (Heliodor. *Eth.* vii, 11), and the Syrians (Lucian, *De Dea Syria*, § 52), and began with the disappearance (ἀφανισμός) of Adonis. Then followed the search (ζητησις) made by the women after him. His body was represented by a wooden image placed in the so-called "gardens of Adonis" (Ἀδωνίδος κήποι), which were earthenware vessels filled with mould, and planted with wheat, barley, lettuce, and fennel. They were exposed by the women to the heat of the sun at the house-doors

or in the "Porches of Adonis," and the withering of the plants was regarded as symbolical of the slaughter of the youth by the fire-god Mars. In one of these gardens Adonis was found again, whence the fable says he was slain by the boar in the lettuce (ἀφάκη = Aphaca?), and was there found by Aphrodite. The finding again (εὕρεσις) was the commencement of a wake, accompanied by all the usages which in the East attend such a ceremony—prostitution, cutting off the hair (comp. Lev. xix, 28, 29; xxi, 5; Deut. xiv, 1), cutting the breast with knives (Jer. xvi, 6), and playing on pipes (comp. Matt. ix, 28). The image of Adonis was then washed and anointed with spices, placed in a coffin on a bier, and the wound made by the boar was shown on the figure. The people sat on the ground round the bier, with their clothes rent (comp. *Ep. of Jer.* 81, 32), and the women howled and cried aloud. The whole terminated with a sacrifice for the dead, and the burial of the figure of Adonis (see Movers, *Phönizier*, i, vii). According to Lucian, some of the inhabitants of Byblos maintained that the Egyptian Osiris was buried among them, and that the mourning and orgies were in honor of him, and not of Adonis (*De Dea Syria*, § 7). This is in accordance with the legend of Osiris as told by Plutarch (*De Is. et Os.*). Lucian further relates that on the same day on which the women of Byblos every year mourned for Adonis, the inhabitants of Alexandria sent them a letter, enclosed in a vessel which was wrapped in rushes or papyrus, announcing that Adonis was found. The vessel was cast into the sea, and carried by the current to Byblos (Procopius on Isa. xviii). It is called by Lucian *βυβλίνην κεφαλὴν*, and is said to have traversed the distance between Alexandria and Byblos in seven days. Another marvel related by the same narrator is that of the River Adonis (Nahr Ibrahim), which flows down from the Lebanon, and once a year was tinged with blood, which, according to the legend, came from the wounds of Adonis (comp. Milton, *Par. Lost*, i, 460); but a rationalist of Byblos gave him a different explanation, how that the soil of the Lebanon was naturally very red-colored, and was carried down into the river by violent winds, and so gave a bloody tinge to the water; and to this day, says Porter (*Handbook*, p. 187), "after every storm that breaks upon the brow of Lebanon the Adonis still 'runs purple to the sea.' The rushing waters tear from the banks red soil enough to give them a ruddy tinge, which poetical fancy, aided by popular credulity, converted into the blood of Tammuz."

The time at which these rites of Adonis were celebrated is a subject of much dispute. It is not so important with regard to the passage in Ezekiel, for there does not appear to be any reason for supposing that the time of the prophet's vision was coincident with the time at which Tammuz was worshipped. Movers, who maintained the contrary, endeavored to prove that the celebration was in the late autumn, the end of the Syrian year, and corresponded with the time of the autumnal equinox. He relies chiefly for his conclusion on the account given by Ammianus Marcellinus (xxii, 9, 13) of the Feast of Adonis, which was held at Antioch when the emperor Julian entered the city. It is clear, from a letter of the emperor's (*Ep. Jul.* 52), that he was in Antioch before Aug. 1, and his entry may therefore have taken place in July, the Tammuz of the Syrian year. This time agrees, moreover, with the explanation of the symbolical meaning of the rites given by Ammianus Marcellinus (xxii, 9, 15) that they were a token of the fruits cut down in their prime. Now at Aleppo (Russell, *Aleppo*, i, 72) the harvest is all over before the end of June, and we may fairly conclude that the same was the case at Antioch. Add to this that in Hebrew astronomical works תְּקִיפַת חֲמֻז, *tekûphath Tammûz*, is the "summer solstice;" and it seems more reasonable to conclude that the Adonis feast of the Phœnicians and Syrians was celebrated rather as the summer solstice than as the autumnal equinox. At

this time the sun begins to descend among the wintry signs (Kenrick, *Phœnicia*, p. 310).

**Ta'nach** (Josh. xxi, 25). See TAANACH.

**Tanaim.** See SCRIBES, JEWISH.

**Tanchelm** (TANCHELIN, TANQUELIN), a fanatic who lived in the 11th century, and was identified with the opposition current in that age against the ecclesiasticism then prevailing. We are told that he despised the Church and the clergy, from the pope downward, and claimed that the true Church inhered in him and his followers; that the priestly *station* has no influence upon the sacrament of the eucharist, worth and sanctity being the only efficient qualifications of the minister. He declared himself to be possessed of the Holy Ghost, and even to be God, as Christ is God; and he affianced himself with the Virgin Mary, whose image he presented to the vision of the assembled multitude, demanding sponsalia, which were readily contributed. Water in which he had bathed was distributed for drinking purposes, with the assurance that its use formed a sacred and powerful sacrament to the good of the body as well as the soul. Tanchelm's followers were chiefly drawn from the lower classes of society, and were mostly women. His operations were carried on along the coast of the Netherlands, and particularly in Utrecht, where disturbances were occasioned which called forth the successful interference of archbishop Frederick of Cologne. Tanchelm then removed to Bruges and Antwerp, where he caused still greater tumults than at Utrecht, and was killed on shipboard by a priest in A.D. 1124 or 1125. His sect continued to exist somewhat longer, but was ultimately scattered or reclaimed to the Church. See Hahn, *Gesch. d. Ketzer im Mittelalter* (Stuttg. 1845), i, 459 sq.; Okken, *Diss. de Privæ Rel. Christ. Med. Ævo inter Nederlandos*, etc. (Groning. 1846), p. 43 sq.; *Ep. Tray. Jud. de Novis Erroribus*, etc. (Paris, 1728), i, 11 sq.—Herzog, *Real-Encyclop.* s. v.

**Tanchelmians.** See TANCHELM.

**Tanchum** (OF JERUSALEM) BEN-JOSEF, also called "*R. Tanchum Jerushalmi*" of Haleb, flourished about A.D. 1265-80. The first who made Tanchum's name known to the learned world was the famous scholar Schnurrer, who in 1791 published ch. i-xii of Tanchum's Arabic commentary on Judges; *R. Tanchumi Hierosolymitani ad Libros V. T. Commentarii Arabici Specimen una cum Annotationibus ad aliquot Loca Libri Judicum* (Tubingen, 1791). Since that time his exegetical works have been brought to light, though nothing of his life is known except that he must have lived shortly after the devastation of Palestine by the Mongolians, A.D. 1260. He wrote a commentary in Arabic on the whole Old Test., entitled *כְּתָב אֲלֵבְרָא*, i. e. *The Book of Exposition*, of which the following are still extant in MS. at the Bodleian Library: *a.* the commentary on the earlier prophets, i. e. Joshua, Judges, Samuel, and Kings (Cod. Pocock 314); *b.* commentaries on Jeremiah, Ezekiel and the minor prophets (Cod. Pocock 344); *c.* commentaries on the five Megilloth (i. e. Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther) and Daniel (Cod. Pocock 320); *d.* *כְּתָב אֲשֶׁרָה אֶלְפִּנְרוֹת*, i. e. *The Haphtaroth, or Lessons from the Prophets*, translated into Arabic (Cod. Hunt. 607). These commentaries are preceded by elaborate introductions treating on the general import of Holy Writ. Besides the commentary on Lamentations, *כְּתָב אֲשֶׁרָה מִן כְּתָב אֲלֵבְרָא*, which

has been edited by W. Cureton, *Tanchumi Hierosolymitani Comm. Arabicus in Lamentationes e Codice unico Bodleiano Literis Hebraicis exarato. Descriptis Characteribus Arabico et editis* (Lond. 1843), the following portions have been published: i. Commentary on Joshua, edited by Haarbrücker, in the *Wissenschaftliche Blätter aus der Veit-Heine-Ephraim'schen Lehranstalt* (Berlin, 1862); ii. on Judges, in part by Schnurrer, ch. i-xii, and ch. xiii-xxi by Haarbrücker (Halle, 1847); iii. on Samuel and Kings, by Haarbrücker (Leipsic, 1844); iv. on Habakkuk, with a French translation by Dr. Munk (Paris, 1843, in Cahen's Bible, vol. xiii). "*R. Tanchum's contributions to Biblical exegesis*," says Dr. Ginsburg, "are very important to its history. His commentaries are based upon the literal and grammatical meaning of the text. He frequently avails himself of the labors of Hai Gaon, Danash ibn-Librat, Ibn-Chajuz, Ibn-Ganach, Ibn-Ezra, Maimonides, etc.; rejects the traditional interpretations (comp. comm. on Judg. xii, 7; xx, 28); transposes sundry portions of the sacred narratives, so as to point out their chronological order (comp. Judg. xviii, 1; xx, 28), and, like Maimonides, distinguishes different degrees and kinds of prophecy (comp. vi, 34; xiii, 1; xx, 28).<sup>1</sup> He also wrote an *Arabic Lexicon* to the Mishna, entitled *אֲלֵבְרָא אֲלֵבְרָא*, i. e. *A Sufficient Guide*, treating on the relation of the language of the Mishna and of Maimonides' *Jad ha-Chazaka*. There are four different MSS. of this work in the Bodleian Library, viz. Cod. Pocock 297, written by Saadia ben-Jacob in 1388; Cod. Hunt. 129, by Saadia ben-David in 1451; Cod. Hunt. 621, by Solomo ben-David ben-Benjamin in 1393; and Cod. Pocock 215, 216, 229, written in 1449. He also wrote a Grammar of the Old-Test. Hebrew, quoted by Tanchum himself, but which has not yet come to light. See De Rossi, *Dizionario Storico* (Germ. transl.), p. 145 sq.; Kitto, *Cyclop.* s. v.; Fürst, *Bibl. Jud.* ii, 56 sq.; Steinschneider, *Catalogus Libr. Hebr. in Bibl. Bodl.* col. 2666-2669; Ewald, *Beiträge zur Gesch. d. ältesten Auslegung u. Spracherklärung des A. Test.* (Stuttgart, 1844), i, 151 sq.; Grätz, *Gesch. d. Juden* (Leipsic, 1873), vii, 144 sq.; Etheridge, *Introduct. to Heb. Literature*, p. 44; Keil, *Introduct. to the Old Test.* ii, 384 sq.; Bleek, *Einleitung in das Alte Test.* p. 106; Goldziher, *Studien über Tanchum Jerushalmi* (Leipsic, 1870); Geiger, *Jüdische Zeitschrift*, 1862, p. 193; 1871, p. 199; Grätz, *Monatsschrift*, 1870, p. 239, 285; Zuchold, *Bibliotheca Theologica*, ii, 1306. (B. P.)

**Tanchuma** BEN-ABBA, who flourished A.D. 880, is the reputed author of the celebrated commentary on the Pentateuch called *מְדִינַת תַּנְחֻמֵּי*, for which see the art. MIDRASH. The latest edition is that published by E. Perlmutter (Stettin, 1864). See Fürst, *Bibl. Jud.* iii, 409; Steinschneider, *Catalogus Libr. Hebr. in Bibl. Bodl.* col. 2669; Grätz, *Gesch. der Juden*, iv, 458, 558; Wolf, *Bibl. Hebr.* i, 1159 sq.; iii, 1166 sq.; iv, 1035; Zunz, *Gottesd. Vorträge* (Berlin, 1832), p. 226-238; De Rossi, *Dizionario Storico* (Germ. transl.), p. 307; id. *Annuaire Hebraeo-typographici*, p. 24. (B. P.)

**Tancred**, CHRISTOPHER, an English benefactor, was the son of Sir Richard Tancred, and died unmarried in 1754, leaving his house and estate at Whitley for the maintenance of twelve decayed gentlemen who had borne arms in the service of their country. He also founded four medical exhibitions at Caius College; four in divinity at Christ's College, Cambridge; and four law studentships at Lincoln's Inn.

**Tancred** of BOLOGNA was a most celebrated canonist of the 13th century (who must not be confounded with another Tancred of Corneto; comp. De Savigny, *Gesch. d. röm. Rechts im Mittelalter* [2d ed.], v, 135, and p. 115, 116). His preceptors were Azo in Roman and Laurentius in canon law. In 1210 he was himself a teacher (*decretorum magister*) at Bologna, and intrusted with the management of important affairs by both

the pope and the city. He belonged to the Chapter of Bologna, and in 1226 was made archdeacon by Honorius III, which position then included among its duties the supervision of promotions in the university. The year of his decease is not known, but it must have been prior to 1236, as the archdeaconate is then found to be in other hands (see Sarti, *De Claris Archigymnasii Bononiensis Professoribus*, pars ii, fol. 28, 29, 36, 37, 181). His literary remains include a *Summa de Matrimonio*, written between 1210 and 1213; first published, with numerous interpolations, by Simon Schard (Cologne, 1563), and again, in revised form, by Wunderlich (Göttingen, 1841):—an *Ordo Judiciarum* (*Ordinarius Tancredi*), written about 1214, and afterwards revised in 1225, 1234, and often by unknown scholars. It was formerly believed that this work originated in about 1227, but the earlier date is now accepted. An edition of the work in its original form was issued by Bergmann (ibid. 1842). Tancred's lectures at Bologna were, among other matters, upon the collections of decretals received into the curriculum of Bologna after the close of Gratian's collection, and resulted in *Apparatus*, or commentaries, on the first three compilations. He had no part, however, in the preparation of the fifth ancient compilation. In addition to the above, there is extant of Tancred's works a manuscript list of bishoprics throughout the Church, arranged in the order of provinces (De Savigny, *ut sup.* p. 117, 118). See Herzog, *Real-Encyklop.* s. v.

**Tancred** of SICILY, the son of Eudes, a Norman baron, and of Emma, the sister of Robert Guiscard, was one of the celebrated heroes of the first Crusade, and was born after the middle of the 11th century. Some chroniclers profess to detail the events of his early life, describing him as the most accomplished youth of his time in athletic and military exercises, and of a wisdom far surpassing that of men of mature years, and as a partisan of his cousin Bohemond in the quarrel with their uncle Roger of Sicily. But the first authentic information respecting him is that he raised a large body of men in Apulia and Calabria, and joined Bohemond, then on his way to the first Crusade. The two cousins landed in Epirus, and first one and then the other made his submission to the Greek emperor Alexias. Tancred's exploits on the way to Syria; his quarrel with Baldwin for the possession of Tarsus, and his subsequent chivalrous forbearance to and rescue of his rival; his wondrous valor before Antioch, where he killed no fewer than 700 infidels, transmitting the heads of seventy to the pope, and receiving a corresponding number of marks of silver in return; his vigorous repulse of the first sortie by the infidels from Jerusalem; his sad and lonely vigil on the Mount of Olives; and his gallantry at the storming of the sacred city, are all detailed by the numerous chroniclers of this epoch in their usual style of extravagant laudation, but with a harmony which speaks favorably for their correct appreciation of his character. He was one of the claimants of the throne of Jerusalem, and was pacified by Godfrey (q. v.), the successful competitor, with the gift of some towns in Palestine, and the principality of Galilee or Tiberias. A brief quarrel with Baldwin, after Godfrey's death, petty combats with the infidels, and occasional wars with the other Christian princes who had settled in Syria and Palestine occupied the remainder of his life, which was brought to a close at Antioch in 1112. Besides his own principality, he governed that of Antioch, belonging to his cousin Bohemond, from 1100. The fiery and energetic, but at the same time pious, sagacious, and forbearing, chief whom the chroniclers present to us has been considerably toned down by Tasso in his *Gerusalemme Liberata*.

**Tan'humeth** [some *Tanhu'meth*] (Heb. *Tanchu'meth*, תַּנְחֻמֶּת, consolation; Sept. *Θαναμάς* or *Θαναμέθ* v. r. *Θαναμάς*, etc.; Vulg. *Thanehumeth*), the father (Fürst says *mother*, as the name is fem.) of Seraiah,

in the time of Gedaliah (2 Kings xxv, 23, where he appears as a Netophathite by the clerical omission of another name, as is evident from the parallel passage, Jer. xl, 8). B. C. ante 582.

**Ta'nis** (Τάνις, the Greek form (Judith i, 10) of the Egyptian city *Zoan* (q. v.).

**Tankerfield**, GEORGE, an English martyr, was a native of York, and followed the occupation of a cook. Seeing the great cruelty shown by the papists under queen Mary, he began to doubt their doctrines and to abhor them. After study, reflection, and prayer, he abjured popery, whereupon he was arrested and taken to Newgate in February, 1555. Being summoned before bishop Bonner, he declared his convictions concerning auricular confession, the mass, etc. He was sentenced to death, and was burned at the stake Aug. 26. See Milner's *Fox*, *Hist. of Christ. Martyrdom*, ii, 770.

**Tanner** (βυρσεύς, Hebraized in the Talmud as בורסי, also בורסי), the occupation of Simon of Joppa (Acts ix, 43; x, 6, 32). This trade, on account of the bad smell connected with it (comp. Schol. on Aristoph. *Eq.* 44; Petron. *Sat.* 11), was despised among the Jews (*Kethuboth*, vii, 10; *Megillah*, iii, 2; see Schöttgen, *Hor. Heb.* i, 447; Wettstein, *N. T.* ii, 516). Those who followed it were called by the Greeks βυρσοδέψαι, in Latin *corarii*, *subortarii* (Guter, *Inscript.* p. 1548, No. 8). They usually had their work-place outside the cities (Artemid. i, 51; Mishna, *Baba Bathra*, ii, 9), or on streams or the sea (Acts x, 6). See Walch, *Dissert. in Act. Apost.* ii, 101 sq.—Winer. See MECHANIC. The ancient Egyptians used the bark of various trees for tanning (Wilkinson, ii, 106). See LEATHER. The tanneries of Joppa are now on the shore south of the city (Thomson, *Land and Book*, ii, 281). Several circumstances, however, confirm the tradition of the present "house of Simon" there (Stanley, *Palest.* p. 269). See SIMON.

**Tanner**, the name of several theological scholars and writers.

1. ADAM, born at Innsbruck in 1572, a Jesuit, lectured on theology at Ingolstadt and Vienna, was made chancellor of the University of Prague, and died March 25, 1632, at Unken. He wrote, *Bericht über die Disputation zu Regensburg*, 1601 (Munich, 1602):—*Theologia Scholastica* (4 vols.):—*Anatomia Confessionis Augustanæ*:—*Apologia pro Societate Jesu* (Vienna, 1618):—*Disputationes Theologice in Summam Thomæ*:—*Astrologia Sacra* (Ingolstadt, 1621).

2. CONRAD, born at Schwyz Dec. 28, 1752, was made abbot of Einsiedeln in 1808, and died April 7, 1825. He wrote, *Die Bildung des Geistlichen durch Geistesübungen* (Augsburg, 1807, 2 vols.; 6th ed. 1847):—*Betrachtungen zur sittlichen Aufklärung im 19ten Jahrhundert* (ibid. 1804):—*Betrachtungen auf die Feste des Herrn und der Heiligen* (ibid. 1829 sq.).

3. MATTHIAS, born at Pilsen in 1630, a Jesuit, was professor of philosophy and theology, and was sent to Rome in 1675 as procurator of his order. He died about 1705. He wrote, *Cruentum Christi Sacrificium Incruento Missæ Sacrificio explicatum* (Prague, 1669):—*Contra Omnes impie Agentes in Locis Sacris* [Latin and Bohemian]:—*Societas Jesu usque ad Sanguinis et Vitæ Profusionem Militans* [a glorification of the Jesuitic mission] (ibid. 1675; in German, 1683); similar is *Societas Jesu Apostolorum Imitatrix sive Gesta Præclara et Virtutes*, etc. [Latin and German] (ibid. 1694 and 1701):—*Historia Montis Oliveti in Moravia ad Strambergam Sitæ* [Bohemian] (ibid. 1666). (B. P.)

4. THOMAS, an English divine and antiquary, was born at Market Lavington, Wiltshire, in 1674. He entered Queens College, Oxford, in 1689; was admitted clerk in 1690; graduated in 1693; entered holy orders at Christmas, 1694; became chaplain of All-Souls' College in January following; fellow of the same in 1697; and chancellor of Norfolk and rector of Thorpe, near Nor-

wich, in 1706. He was installed prebendary of Ely Sept. 10, 1713; archdeacon of Norfolk Dec. 7, 1721; canon of Christ Church Feb. 3, 1723; prolocutor of the House of Convocation in 1727; and was consecrated bishop of St. Asaph Jan. 23, 1732. He died at Christ Church, Oxford, Dec. 14, 1735. After his death appeared, *Notitia Monastica, or an Account of all the Abbeyes, Priories, etc., formerly in England and Wales, etc.*, with additions by the Rev. John Tanner (Lond. 1744, fol.; Camb. 1787, fol.):—*Bibliotheca Britannico-Hibernica, sive de Scriptoribus, qui in Anglia, etc.* (Lond. 1748, fol.; 250 copies).

See *Theologisches Universal-Lexikon*, s. v.; Wetzler u. Welte, *Kirchen-Lexikon*, s. v.; *Regensburger Conversations-Lexikon*, s. v.; Winer, *Handbuch der theolog. Literatur*, i, 124; ii, 46, 797; Chalmers, *Biog. Dict.* s. v.; Hook, *Eccles. Biog.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v. On Adam Tanner, see also Werner, *Gesch. der kathol. Theol. seit dem trident. Concil.* (Munich, 1866), p. 7, 17, 25.

**Tanquelmians.** See TANCHELMIAN.

**Taoists, Taoism.** See LAO-TZU.

**Tapers, EARLY USE OF.** It became customary at an early period to burn tapers in churches on various occasions. This was done during the reading of the gospel, and is partly excused by Jerome. He says to Vigilantius, "We do not light candles in open day, therefore you slander us without reason." He confesses, however, that some untaught laymen and simple religious women, "of whom we may certainly say that they have a zeal of God without knowledge," do such a thing in honor of martyrs; but he asks, What is the harm? And then he refers to a custom prevalent in the East: "In all churches of the East they light tapers, without any respect to the relics of martyrs, when the gospel is to be read, even when the sun shines brightly; which is done, not for the sake of giving light, but as an expression of joy. Hence the virgins in the Gospel had their lamps lighted; and the apostles were warned to 'let their loins be girded about, and their lights burning.' Hence it is said of John also, 'He was a burning and a shining light.' Also under the figure of a material light is represented that light of which we read in the Psalter, 'Thy word is a lamp unto my feet, and a light unto my path.'" But the superstition spread, and during the ceremony of baptism tapers were placed in the hands of the baptized, if adults; if they were infants, in the hands of the sponsors. These tapers were said to be emblematical of the illuminating power of the sacrament. Also at the eucharist we find the same custom. Tapers were also used at marriages; and in funeral processions carried before and behind the coffin.—Farrar, *Eccles. Dict.* s. v.

The altar tapers were used in those candlesticks which are placed on or about the altar; ordinarily those which were lighted during the office of the Christian sacrifice. Custom in

the West expects that at least two be lighted, even at low celebrations; at high celebrations, in the Latin Church, as also in some English churches, six tapers are ordinarily lighted. They symbolize (1) the fact that our Saviour, "God of God, Light of Light, very God of very God," is the true Light of the world. They are also (2) symbols of joy and gladness on the part of the faithful that Christ is born into the world (a) naturally, (b) sacramentally, i. e. in the eucharistic mystery. A seventh taper is added if the bishop of the diocese celebrates a solemn pontifical mass; even twelve or twenty-one are sometimes used.

**Ta'phath** (Heb. *Taphath*, תַּפַּת, ornament; Sept. Τεφᾶθ v. r. Ταφάρ; Vulg. *Tapheth*), Solomon's daughter, and wife of Abinadab, his commissar in the district of Dor (1 Kings iv, 11). B.C. cir. 1000.

**Taph'nes** (Ταφνᾶς), a Græcized form (Judith i, 9) of the Egyptian city ΤΑΦΝΑΝΗΣ (q. v.).

**Taphon** (ἡ Τεφών; Josephus, Τόχα or Τόχων; Vulg. *Thopo*; Syr. *Tefos*), one of the cities in Judæa fortified by Bacchides (1 Macc. ix, 50). It is probably the BETH-TAPPUAH (q. v.) of the Old Test., which lay near Hebron. The form given by Josephus suggests *Tekoa*, but Grimm (*Ezeg. Handbuch*) has pointed out that his equivalent for that name is Θεκωῆ; and there is, besides, too much unanimity among the versions to allow of its being accepted.

**Tappan, Benjamin, D.D.**, a Congregational minister, the son of the Rev. David Tappan, professor of divinity in Harvard College, and grandson of Benjamin Tappan, pastor in Manchester, Mass., was born at West Newbury, Mass., Nov. 7, 1788. He graduated at Harvard College in 1805, spent some time teaching at Woburn and Salem, and in 1809 became tutor at Bowdoin College, Me., which position he held for two years. In 1811 he was ordained over the Church in Augusta, Me., and continued pastor until he assumed the secretaryship of the Maine Missionary Society in 1849. His death took place Dec. 22, 1863. His ministry was eminently useful, and few men occupy a more prominent place in the history of Congregationalism in Maine. He was vice-president of the board of Bowdoin College until his death, secretary of the Maine Missionary Society from 1849 to 1863, and trustee of Bangor Theological Seminary from 1825, of which he was a most liberal and steadfast friend, and a professorship in which he declined in 1829. Dr. Tappan was an immense worker, was noted for his hospitality and generosity, and his Christian character was one of beauty and strength. He was an effective preacher, and had a remarkable gift in prayer. Dr. Tappan was one of the pioneers in the temperance reform, preaching a sermon on the subject in 1813. Waterville College (now Colby University) conferred upon him the degree of D.D. in 1836, and Bowdoin in 1845. See *Cong. Quarterly* (art. by his son Benjamin), 1865, p. 131-159.

**Tappan, David, D.D.**, a Congregational minister, was born at Manchester, Mass., in 1753, graduated at Harvard College in 1771, and was ordained in April, 1774, pastor at Newbury, Mass., where he remained until inaugurated professor of divinity at Harvard College, Dec. 26, 1792, which position he retained until his death, Aug. 27, 1803. He published, *Two Friendly Letters to Philalethes* (1785):—*An Address to the Students of Andover Academy* (1791):—*An Address to Andover Students* (1794):—and a large number of occasional Sermons. After his death were published *Lectures on Jewish Antiquities* (1807):—*Sermons on Important Subjects* (1807). See Sprague, *Annals of the Amer. Pulpit*, ii, 97.

**Tappan, William Bingham**, an American divine, was born at Beverly, Mass., in 1794, entered the service of the American Sunday-school Union in 1826, and continued this connection until his death, at West Needham, Mass., in 1849. He published, among other poetical works, *Poetry of the Heart* (Worcester, 1845,

Altar Taper.

12mo):—*Sacred and Miscellaneous Poems* (Boston, 1846, 16mo):—*Poetry of Life* (ibid. 1847, 16mo):—*The Sunday-school and other Poems* (ibid. 1848, 16mo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Tappuah** [some *Tappu'ah*] (Heb. *Tappu'ach*, תַּפּוּחַ [in 1 Chron. ii, 43, תַּפּוּחַ], an apple, as often; Sept. *Táphon*, *Tafóon*, *Θαφίς*, *Θαφφού*, etc., and twice [Josh. xv, 34; xvii, 8] omits; Vulg. *Taphua*), the name of a man and also of two places in Palestine. See APPLE.

1. Second named of the four sons of Hebron of the lineage of Caleb (1 Chron. ii, 43); not to be confounded with either of the following (see Keil, *ad loc.*). B.C. ante 1618.

2. A town in the lowland district of Judah, mentioned between En-gannim and Enam (Josh. xv, 34), in the group situated in the N.W. corner (see Keil, *ad loc.*); differs from the Beth-tappuah (q. v.) of ver. 53, but probably the same with the royal city of the Canaanites (Josh. xii, 17), conquered by the Israelites (see Keil, *ad loc.*). It is perhaps the present *Beit-'Atáb*, an important place on a conspicuous hill, about half-way from Jerusalem to Beit-Jebrein. It contains about 600 or 700 inhabitants, is built of stone, and has a ruined tower or castle (Robinson, *Bibl. Res.* ii, 13). This is apparently the place meant by Schwarz (*Palest.* p. 102) by "the village *Beth-Tapa*, five English miles N.W. [ten N.E.] of Beit-Jibrin."

3. A town in the tribe of Ephraim, near the border of Manasseh, in which latter the adjacent territory ("land of Tappuah") lay (Josh. xvi, 8; xvii, 8); probably containing a fine spring, and hence called (ver. 7) EN-TAPPUAH (q. v.). It is no doubt, as suggested by Van de Velde (*Memoir*, p. 351), although this is disputed by Keil (*Comment. ad loc.*), the same as the present *'Atúf*, a deserted village about four hours N.E. by E. of Nablús, with traces of antiquity and ancient wells of excellent water. Schwarz also states that "at the present day the Arabs call the country between Nablús and the Jordan *Balad-tapach*, as probably the town of this name was formerly in it" (*Palest.* p. 89). See TRIBE.

**Tarah** (Heb. *Te'rach*, תֵּרַח [in pause *Tárach*, תֵּרַח], wandering or delay; Sept. *Tapáz* v. r. *Θαράς*; Vulg. *Thare*), a station of the Israelites in the desert, situated between Tahath and Mithcah (Numb. xxxiii, 27); perhaps in the great Wady el-Jerafeh, opposite Mount Hor. See EXODE.

**Taralah** [some *Tara'lah*] (Heb. *Taralah'*, תֵּרָאֵלָה, reeling; Sept. *Θαράλ* v. r. *Θαρενλά*; Vulg. *Tharela*), a town in the western section of the tribe of Benjamin, mentioned between Irpeel and Zelah (Josh. xviii, 27). Schwarz suggests (*Palest.* p. 128) that it "is perhaps the village *Thaniel* = *Thariel*, in the neighborhood of Lod," probably meaning *Neby Daniyal*, two miles south of Lud; but the name has little resemblance, and the territory of Benjamin did not reach so far west. It is possibly represented by the modern village *Beit-Tirza*, in Wady Ahmed, just north of Beit-Jala, with a well adjacent and several ruined sites in the vicinity.

**Tarasius**, patriarch of Constantinople, was a zealous and active supporter of image-worship in the time of the empress Irene. See ICONOCLASM. He first held the secular position of secretary of state, but was chosen, though a layman, to fill the patriarchal office by both the court and the people (A.D. 784). His election gave great offence to Rome, but he was eventually recognised by Hadrian I on the ground of his avowed intention to restore the worship of images in the Greek Church. A synod to promote the unifying of the Church of Constantinople with other churches, which he had suggested as a condition of his acceptance of the patriarchate, met in 785, but was compelled by a mob to adjourn to Nicea, where it reconvened in 787. In this body the papal legates were accorded the first place and

the patriarch of Constantinople the second, and the latter heartily endorsed the new creed, which determined that worship, in the exercises of kissing, bowing the knee, illuminations, and burning of incense, should be rendered to the images of the human person of Christ and of Mary, the angels, apostles, prophets, and all saints; but not such worship as is due to the Divine Being only (*τὴν τιμητικὴν προσκύνησιν—οὐ μὴν τὴν ἀληθινὴν λατρείαν, ἣ πρέπει μόνῳ τῷ Θεῷ φύσει*). All laws directed against the worship of images were anathematized. In his own person, Tarasius was also especially active in the work of converting the opponents of image-worship. In the matrimonial affairs of Constantine, the son of Irene, Tarasius played an unworthy part. He protested at first against the rejection of queen Maria and the substitution for her of Theodota, but soon gave way to the wishes of the court, and thereby came into collision with the monks, who regarded the emperor as excommunicated. Tarasius died in 806, and ranks among the saints of both the Greek and the Romish Church. His literary remains consist of letters and homilies (see Walch, *Entwurf einer vollst. Hist. d. Ketzereien, Spaltungen u. Religionsstreitigkeiten* [Leips. 1782], x, 419–511).—Herzog, *Real-Encyklop.* s. v.

**Tareá** [some *Tare'a*] (Heb. *Tare'á*, תָּרְעָא, by interchange of gutturals for *Tahrea*; Sept. *Θαρέ* v. r. *Θαράχ*; Vulg. *Tharaa*), son of Micah in the lineage of king Saul (1 Chron. xviii, 35); elsewhere (ix, 41) called TAHEEA (q. v.).

**Tares** (*ζιζάνια*; Vulg. *zizania*). There can be little doubt that the *ζιζάνια* of the parable (Matt. xiii, 25) denote the weed called "darnel" (*Lolium temulentum*), a widely distributed grass, and the only species of the order that has deleterious properties. The word used by the evangelist is an Oriental, and not a Greek, term (the native Greek word seems to be *aiipa*, Dioscor. ii, 91). It is the Arabic *zawán*, the Syriac *zizána*, and the *zonin* (זִנִּין) of the Talmud (Mishna, i, 109; see Buxtorf, *Lex. Talm.* s. v.). The derivation of the Arabic word from *zán*, "nausea," is well suited to the character of the plant, the grains of which produce vomiting and

Bearded Darnel (*Lolium temulentum*).

purging, convulsions, and even death. Volney (*Trav.* ii, 306) experienced the ill effects of eating its seeds; and "the whole of the inmates of the Sheffield work-house were attacked some years ago with symptoms supposed to be produced by their oatmeal having been accidentally adulterated with lolium" (*Engl. Cyclop.* s. v. "Lolium"). The darnel before it comes into ear is very similar in appearance to wheat; hence the command that the *zizania* should be left to the harvest, lest while men plucked up the tares "they should root up also the wheat with them." Prof. Stanley, however (*Sinai and Palest.* p. 426), speaks of women and children picking out from the wheat in the cornfields of Samaria the tall green stalks, still called by the Arabs *zuwân*. "These stalks," he continues, "if sown designedly throughout the fields, would be inseparable from the wheat, from which, even when growing naturally and by chance, they are at first sight hardly distinguishable." See also Thomson (*Land and Book*, ii, 111): "The grain is just in the proper stage to illustrate the parable. In those parts where the grain has headed out, the tares have done the same, and then a child cannot mistake them for wheat or barley; but where both are less developed, the closest scrutiny will often fail to detect them. Even the farmers, who in this country generally weed their fields, do not attempt to separate the one from the other." The grain-growers in Palestine believe that the *zuwân* is merely a degenerate wheat; that in wet seasons the wheat turns to tares. Dr. Thomson asserts that this is their fixed opinion. It is curious to observe the retention of the fallacy through many ages. "Wheat and *zunin*," says Lightfoot (*Hor. Heb.* on Matt. xiii, 25), quoting from the Talmud, "are not seeds of different kinds." See also Buxtorf (*Lex. Talm.* s. v. זורנין): "Zizania, species tritici degeneris, sic dicti, quod scortando cum bono tritico, in pejorem naturam degenerat." The Roman writers (comp. "Infelix lolium," Virgil, *Georg.* i, 154) appear to have entertained a similar opinion with respect to some of the cereals. Thus Pliny (*Hist. Nat.* xviii, 17), borrowing probably from Theophrastus, asserts that "barley will degenerate into the oat." The notion that the *zizania* of the parable are merely diseased or degenerate wheat has been defended by Brederod (see his letter to Schultetus in *Exercit. Erang.* ii, 65), and strangely adopted by Trench, who (*Notes on the Parables*, p. 91, 4th ed.) regards the distinction of these two plants to be "a falsely assumed fact." If the *zizania* of the parable denote the darnel, and there cannot be any reasonable doubt about it, the plants are certainly distinct, and the *L. temulentum* has as much right to specific distinction as any other kind of grass. On the route from Beirût to Akka (1852), Dr. Robinson describes fields of wheat "of the most luxuriant growth, finer than which I had not before seen in this or any other country. Among these splendid fields of grain are still found the tares spoken of in the New Test. As described to me, they are not to be distinguished from the wheat until the ear appears. The seed resembles wheat in form, but is smaller and black. In Beirût, poultry are fed upon this seed, and it is kept for sale for that purpose. When not separated from the wheat, bread made from the flour often causes dizziness to those who eat of it" (*Bibl. Res.* iii, 55). The bearded darnel has the bad reputation of yielding the only deleterious grain among all the countless grasses. We are not aware that any injurious quality has been detected in the seeds of its own congeners, *Lolium arvense*, *L. perenne*, the rye-grasses so familiar to British husbandry; but if mixed with bread, *L. temulentum* occasions giddiness, nausea, difficulty of articulation, and other symptoms ranging from intoxication to paralysis, and instances are on record where mortification of the extremities, or even death, has ensued (see Burnett, *Plante Utiliores*, vol. iii). Hence the French have named it *avraie*, or "tipsy-grass," a word from which the English

have dropped the first syllable, and bestowed it on those unoffending "ray" or "rye grasses," by which the darnel is represented in our hay-fields. Thus understood, "how well do these 'tares' represent those who make a false profession; who appear among God's people; who draw near with their mouth, and honor God with their lips, but their heart is far from him (Isa. xxix, 13; Matt. xv, 8; Mark vii, 6)! Both grow together, and at first may seem alike. Man cannot accurately distinguish between the true and the false; but at the great harvest-day the Lord will separate them. He will gather the wheat into his garner, while the tares shall be consumed" (Balfour, *Bot. and Relig.* p. 251). See Kitto, *Pict. Bible*, ad loc.; Hackett, *Illustr. of Script.* p. 130; Calcott [Lady], *Script. Herbal*, p. 475 sq.; Tristram, *Nat. Hist. of the Bible*, p. 486; Bocheilus, *De Zizaniis in Eccl. Dei Disseminatis* (Arg. 1661).

**Target** (קִידוֹן, *kidôn*, 1 Sam. xvii, 6, a spear, as usually rendered; צֶנֶדֶק, *tsinâh*, 1 Kings x, 16; 2 Chron. ix, 15; xiv, 8, a large shield, as usually rendered). See SHIELD.

**Targum** (תַּרְגוּם, i. e. translation, interpretation) is the name given to a Chaldee version or paraphrase of the Old Test., of which there are several extant.

I. *Origin of the Targums.*—The origin of the Chaldee paraphrase may be traced back to the time of Ezra. After the exile it became the practice to read the law in public to the people, with the addition of an oral paraphrase in the Chaldee dialect. Thus we read in Neh. viii, 8, מִשְׁנֵי בְּרוּרֵי הָאֱלֹהִים מִשְׁנֵי שֶׁכֶל וְיִשְׁרָם שֶׁכֶל, which expression the Talmud, *Bab. Megillah*, fol. 3, col. 1, explains תַּרְגוּם מִשְׁנֵי, i. e. "to explain means Targum." This ecclesiastical usage, rendered necessary by the change of language consequent on the Captivity, was undoubtedly continued in after-times. It rose in importance, especially when the synagogues and public schools began to flourish, the chief subject of occupation in which was the exposition of the Thorah. The office of the interpreter (מְתוּרְגֵּמַן, *meturgēman*, less frequently דִּרְשָׁן, comp. Zunz, *Die gottesd. Vorträge*, p. 332) thus became one of the most important, and the canon of the Talmud, that as the law was given by a mediator, so it can be read and expounded only by a mediator, became paramount (*Jerus. Megillah*, fol. 74). The Talmud contains, even in its oldest portions, precise injunctions concerning the manner of conducting these expository prelections. Thus, "Neither the reader nor the interpreter is to raise his voice one above the other;" "They have to wait for each other until each have finished his verse;" "The methurgeman is not to lean against a pillar or a beam, but to stand with fear and with reverence;" "He is not to use a written Targum, but he is to deliver his translation *riva voce*;" "No more than one verse in the Pentateuch and three in the prophets shall be read or translated at a time;" "That there should be not more than one reader and one interpreter for the law; while for the prophets one reader and one interpreter, or two interpreters, are allowed" (*Mishna, Megillah*, iv, 5, 10; *Sopherim*, xi, 1). Again (*Megillah*, *ibid.*, and *Tosiphta*, c. iii), certain passages liable to give offence to the multitude are specified, which may be read in the synagogue and translated; others which may be read but not translated; others, again, which may neither be read nor translated. To the first class belong the account of the creation—a subject not to be discussed publicly on account of its most vital bearing upon the relation between the Creator and the Cosmos, and the nature of both; the deed of Lot and his two daughters (*Gen.* xix, 31); of Judah and Tamar (*ch.* xxxviii); the first account of the making of the golden calf (*Exod.* xxxii); all the curses in the law; the deed of Amnon and Tamar (2 Sam. xiii); of Absalom with his father's concubines (xvi, 22); the story of the woman of Gibeah

(Judg. xix). These are to be read and translated, or נקראין ומתרגמין. To be read but not translated, נקראין ולא מתרגמין, are the deed of Reuben with his father's concubine (Gen. xxv, 22); the latter portion of the story of the golden calf (Exod. xxxii); and the deed of David and Bathsheba (2 Sam. xi, xii).

At what time these paraphrases were written down we cannot state; but it must certainly have been at an early period. Bearing in mind that the Hellenistic Jews had for a long time been in possession of the law translated into their language, and that in the 2d century not only had the Jews themselves issued Greek versions in opposition to the Alexandrian version, which were received with decided approbation even by the Talmudists, as the repeated and honorable mention of Aquila in the Talmud proves, but that also the Syrians had been prompted to translate the Holy Scriptures, it would indeed be strange had not the Jews familiar with the Aramean dialect also followed the practice at that time universally prevalent, and sought to profit by it. We have, in point of fact, certain traces of written Targums extant at least in the time of Christ. For even the Mishna seems to imply this in *Yadaim*, iv, 5, where the subject treated is the language and style of character to be used in writing the Targums. Further, the Talmud, *Shabbath*, fol. 115, col. 1, mentions a written Targum on Job of the middle of the 1st century (in the time of Gamaliel I), which incurred the disapprobation of Gamaliel. Zunz here justly remarks, "Since it is not likely that a beginning should have been made with Job, a still higher antiquity as very probably belonging to the first renderings of the law may be assumed" (*loc. cit.* p. 62). Grätz, in his *Monatsschrift*, 1877, p. 84, believes that this Targum of Job, mentioned four times in the Talmud, can only refer to a Greek translation of that book; and Dérenbourg, in his *Essai sur l'Histoire et la Géographie de la Palestine*, p. 242, accounts for the action of Gamaliel, because it was written *avec des caractères non-hébraïques*. But as Delitzsch, in *Horæ Hebr. et Talmud.* (*Zeitschrift für die luth. Theologie u. Kirche* [Leips. 1878], p. 211), remarks, "כְּתָב תַּרְגּוּם means 'in Targum,' i. e. written in the Aramean, and refers not to the characters with which, but to the language in which, it was written. Gamaliel acted according to old principle, דבריו שבכל מה אי אחא רשאי לכותבן, i. e., 'all that belongs to oral tradition was not to appear in written form.'" This principle included also the Targum, but it was not strictly observed, and, like the Mishna, so, also, Targums were clandestinely circulated in single copies. That this was the case we see from the fact that Gamaliel of Jabneh, the grandson of Gamaliel I or elder, having been found reading the Targum on Job, was reminded of the procedure of his grandfather, who had the copy of the Job Targum, which was brought to him while standing on the mountain of the Temple, immured in order to prevent its further use. Dr. Frankl, in *Die Zusätze in der Sept. zu Hiob* (in Grätz, *Monatsschrift*, 1872, p. 313), says, "There is no doubt that the additions in the Sept. were made according to an old Aramean Targum," and in corroboration of his statement he quotes *Tosiphta Shabbath*, c. 14; *Shabbath*, fol. 115, col. 1; *Jerus. Shabbath*, 16, 1; *Sopherim*, v, 15. We are thus obliged to assume an early origin for the Targums, a fact which will be corroborated further on, in spite of the many objections raised, the chief of which, adduced by Eichhorn, being the silence of the Christian fathers, of whom none, not even Epiphanius or Jerome, mention the subject. But this silence is of little weight, because the fathers generally were ignorant of Hebrew and of Hebrew literature. Nor was any importance attached to them in comparison with Greek translations. Besides, in truth, the assertion in question is not even supported by the facts of the case; for Ephraem Syrus, e. g., made use

of the Targums (comp. Lengerke, *De Ephraemi S. Arts Hermeneut.* p. 14 sq.; Assemani, *Bibl. Orient.* i, 66).

II. *The Targum of Onkelos*.—There is a Targum of Onkelos on the Pentateuch which has always been highly valued by the Jews.

1. *Authorship*.—In regard to the author, the notices of him are meagre and uncertain. We now approach one of the most mooted questions as to the identity of Onkelos with Akilas or Aquila; but before solving it we must hear the different witnesses. The first mention of Onkelos is found in the *Tosiphta*, a work drawn up shortly after the Mishna. From this we learn: *a*. That Onkelos the Proselyte (אֲנָקְלוֹס הַגֵּר) was so serious in his adherence to the newly adopted (Jewish) faith that he threw his share of his paternal inheritance into the Dead Sea, חֲלוּקֵי לִים הַמֵּלֶךְ (Tos. *Demaï*, vi, 9). *b*. At the funeral of Gamaliel the elder he burned more than seventy minæ worth of spices in his honor (Tos. *Shabbath*, c. 8; the same story is repeated with variations *Sebachoth*, c. 8, and Talm. *Aboda Zarah*, fol. 11, col. 1). *c*. He is finally mentioned, by way of corroboration to different Halachas, in connection with Onkelos in three more places, viz. *Chagigah*, iii, 1; *Mikva'oth*, vi, 1; *Kelim*, iii, 2, 2. In the Babylonian Talmud, Onkelos is mentioned in the following passages:

1. *Gittin*, fol. 56, col. 2; fol. 57, col. 1, where we read, "Onkelos the Proselyte, the son of Kalonikos (Callinicus or Cleonikus?), the son of Titus's sister, who, intending to become a convert, conjured up the ghosts of Titus, Balaam, and Jesus [the latter name is omitted in later editions, for which, as in the copy before us, is substituted מִישָׁע יִשְׂרָאֵל, but not in Bomberg's and the Cracow editions], in order to ask them what nation was considered the first in the other world. Their answer that Israel was the favored one decided him."

2. *Aboda Zarah*, fol. 11, col. 1, here called the son of Kalonymos (Cleonymos?); and we also read in this place that the emperor sent three Roman cohorts to capture him, and that he converted them all.

3. *Baba Bathra*, fol. 99, col. 1, where Onkelos the Proselyte is quoted as an authority on the question of the form of the cherubim (comp. 2 Chron. iii, 10).

4. *Megillah*, fol. 3, col. 1, where we read, "R. Jeremiah, or, according to others, R. Chia bar-Abba, said the Targum on the Pentateuch was made by the proselyte Onkelos, from the mouth of R. Eliezer and R. Jehoshua; the Targum on the prophets was made by Jonathan ben-Uzziel from the mouth of Haggai, Zechariah, and Malachi. . . . But have we not been taught that the Targum existed from the time of Ezra? . . . Only it was forgotten and Onkelos restored it."

In the *Midrash Tanchuma*, section נֶלֶךְ (Gen. xxviii, 20), we read, "Onkelos the Proselyte asked an old man whether that was all the love God bore towards a proselyte, that he promised to give him bread and a garment? The old man replied that this was all for which the patriarch Jacob prayed." In the book of *Zohar*, section אַחֲרֵי מֵוָה (Lev. xviii, 4), Onkelos is represented as a disciple of Hillel and Shammai. Finally a MS. in the library of the Leipzig Senate (B. H. 17) relates that Onkelos, the nephew of the wicked Titus (נֶכְדוֹר שֶׁל תִּיטוֹס הָרָשָׁע), asked the emperor's advice as to what merchandise he thought it was profitable to trade in. Titus told him that that should be bought 'which was cheap in the market, since it was sure to rise in price. Onkelos went to Jerusalem and studied the law under R. Eliezer and R. Jehoshua, and his face became wan (וְהָיָה פָנָיו כְּהוֹרֵבִית). When he returned to Titus, one of the courtiers observed the pallor of his countenance, and said to Titus, "Onkelos appears to have studied the law." Interrogated by Titus, he admitted the fact, adding that he had done it by his advice. No nation had ever been so exalted, and none was now held cheaper among the nations than Israel; "therefore," he said, "I concluded that in the end none would be of higher price" (comp. Anger, *De Onkelo*, pt. ii [Lips. 1846], p. 12, where the whole passage in the original is copied). In all these passages the name of Onkelos is given. But there are many passages in

which the version of Akilas (תרגום אקילס) is mentioned, and the notices concerning Akilas bear considerable likeness to those of Onkelos. Akilas is mentioned in *Siphra* (Lev. xxv, 7), and in *Jerus. Talmud, Demai*, 27 d, as having been born in Pontus; that, after having embraced the Jewish faith, he threw his paternal inheritance into an asphalt lake (*Jerus. Demai*, 25 d); that he translated the *Torah* before R. Eliezer and R. Jehoshua, who praised him (ירושלמי אורחין) and said to him, "Thou art fairer than the sons of men" (יפיפיה מבני אדם); or, according to the other accounts, before R. Akiba (comp. *Jerus. Kiddushin*, i, 1, 1, etc.; *Jerus. Megillah*, i, 9; *Babyl. Megillah*, fol. 3, col. 1). We learn, further, that he lived in the time of Hadrian (*Chag.* ii, 1), that he was the son of the emperor's sister (*Tanchum*, ed. Prague, fol. 34, col. 2), that he became a convert against the emperor's will (*ibid.* and *Shemoth Rabbah*, fol. 146 c), and that he consulted Eliezer and Jehoshua about his conversion (*Beresheit Rabbah*, fol. 78 d; comp. *Midrash Cohemoth*, fol. 102 b).

That Akilas is no other than Aquila (Ἀκύλας), the well-known Greek translator of the Old Test., we need hardly add. He was a native of Pontus (*Iren. Adv. Hær.* 3, 24; *Jerome, De Vir. Ill. c.* 54; *Philostr. De Hær.* § 90). He lived under Hadrian (*Epiph. De Pond. et Mens.* § 12). He is called the *πεντηκίδης* (*Chron. Alex. πεντηκίδης*) of the emperor (*ibid.* § 14), becomes a convert to Judaism (§ 15), whence he is called the Proselyte (*Iren. loc. cit.*; *Jerome to Jer. viii, 14, etc.*), and receives instructions from Akiba (*Jerome, loc. cit.*). He translated the Old Test., and his version was considered of the highest import and authority among the Jews, especially those unacquainted with the Hebrew language (*Euseb. Præp. Evang.* loc. cit.; *Augustine, De Civ. Dei*, xv, 23; *Philostr. De Hær.* § 90; *Justin, Novell.* 146). Thirteen distinct quotations from this version are preserved in the Talmud and Midrash; and we may classify the whole as follows:

**Greek Quotations.**—*Gen.* xvii, 1, in *Beresch. Rab.* 51 b; *Lev.* xxiii, 40, *Jerus. Sukkah*, 3, 5, fol. 53 d (comp. *Vaj. Rab.* 200 d); *Isa.* iii, 20, *Jerus. Shabb.* 6, 4, fol. 8 b; *Ezek.* xvi, 10, *Midr. Thren.* 68 c; *Ezek.* xxiii, 48, *Vaj. Rab.* 263 d; *Psa.* xlviii, 15 (Masor. text xlvii, according to the Sept.), *Jerus. Meg.* 2, 3, fol. 73 b; *Prov.* xviii, 21, *Vaj. Rab.* fol. 203 b; *Esth.* i, 6, *Midr. Esth.* 120 d; *Dan.* v, 5, *Jerus. Yoma*, 3, 8, fol. 41 a.

**Hebrew Quotations** (retranslated from the Greek).—*Lev.* xix, 20, *Jerus. Kid.* i, 1, fol. 59 a; *Dan.* viii, 13, *Beresch. Rab.* 24 c.

**Chaldee Quotations.**—*Prov.* xxv, 11, *Beresch. Rab.* 104 b; *Isa.* v, 6, *Midr. Coh.* 113 c, d.

All these quotations are treated at length by Anger, *De Onkelo*, i, 13 sq., and the variations adduced there show how carefully they have to be perused, and the more so since we have as yet no critical edition of the Talmud.

The identity of Akilas and Aquila having been ascertained, it was also argued that, according to the parallel accounts of Onkelos and Aquila, Onkelos and Aquila must be one and the same person, since it was unlikely that the circumstances and facts narrated could have belonged to two different individuals. But who will warrant that the statements are correct? There are chronological differences which cannot be reconciled, unless we have recourse to such means as the Jewish historian Dr. Grätz, who renders חזקוני (i. e. R. Gamaliel I, or elder) "Gamaliel II." Is it not surprising that on one and the same page Onkelos is once spoken of as "Onkelos the Proselyte," and "Onkelos the son of Kalonymos became a convert" (*Aboda Zarah*, fol. 11, col. 1)? It has also been stated that Onkelos was neither the author of the Targum nor a historical person, but that *Targum Onkelos* means simply a version made after the manner of Akilas, the Greek translator. Aquila's translation was, a special favorite with the Jews, because it was both literal and accurate. Being highly valued, it was considered a model or type after which the new Chaldee one was

named, in commendation, perhaps, of its like excellences. This view is very ingenious, but it is hardly probable. Now the question arises, how is it that there is only a version of Onkelos on the Pentateuch, while Aquila translated the whole Old Test.? If Onkelos's Targum was really made after the manner of Aquila, how is it that the latter is so slavishly literal, translating even the תא, sign of the accusative, or, as Jerome states (*De Opt. Gen. Interpret.*), "Non solum verba sed et etymologias verborum transferre conatus est. . . . Quod Hebræi non solum habent ἀρρα sed et πρῶταρρα, ille κακοζήλως et syllabas interpretetur et literas, dictaque σὺν τὸν οὐρανὸν καὶ σὺν τὴν γῆν quod Græca et Latina lingua non recipit," while Onkelos is freer, adding sometimes here and there a word or phrase for the better understanding?

That the Targum Onkelos cannot mean a Targum after the manner of Aquila is also evident from the fact that while Aquila made a recension of the then existing Sept., nothing of the kind can be said of Onkelos. The latter wrote for the people in a language which it understood better than the original Hebrew; the former wrote for polemical purposes, to counterbalance the arguments of the Christians, who made use of the Alexandrian version against the Jews. That the author of the Chaldee paraphrase was not a proselyte, but a native Jew, is sufficiently proved from the excellence and accuracy of his work; for without having been bred up from his birth in the Jewish religion and learning, and long exercised in all the rites and doctrines thereof, and being also thoroughly skilled in both the Hebrew and Chaldee languages, as far as a native Jew could be, he could scarcely be thought thoroughly adequate to that work which he performed. The representing of Onkelos as having been a proselyte seems to have proceeded from the error of taking him to have been the same with Aquila of Pontus, who was indeed a Jewish proselyte. A comparison of both versions must show the superiority of Onkelos's over that of Aquila. The latter, on account of his literal adherence to the original, makes his version often nonsensical and unintelligible, and less useful than the former, as the following will show:

#### Genesis.

- ii, 6. ואיר—Aq. ἐπιφλυμός; Onk. יעננא.
7. נשמת—Aq. ἀναπνοή; Onk. נשמחא.
- vi, 4. חנפילים—Aq. ἐπιπίπτοντες; Onk. גבדריא.
16. צורה—Aq. μεσημβρινόν; Onk. ניהורי.
- viii, 1. וישכו—Aq. καὶ ἐστάλησαν; Onk. ונחו.
- xii, 8. ויעתק—Aq. μετῆρε; Onk. ואסתלק.
- xv, 2. וכן משק—Aq. οὗτος τοῦ ποτίσαντος; Onk. וזכר פנסא.
- xviii, 12. בקרח—Aq. κατ' αὐτῆς; Onk. במעהא.
- בלותי—Aq. κατατριβῖναι; Onk. דסיבית.
- xxii, 2. ארץ המוריה—Aq. τὴν γῆν τὴν καταφανή; Onk. לארעה פולחנא.
13. בסכך—Aq. ἐν συκῶ; Onk. באילנא.
- xxvi, 33. באר שבע—Aq. φρέαρ πλημμονῆς; Onk. באר שבע.
- xxx, 8. נשחלי אלהים—Aq. συνεστρεφέν με ὁ θεός; Onk. קבלו בעותי.
11. בגד (Keri גר) בא—Aq. ἔλαβεν ἡ ζῶσις; Onk. אהא גר.
- xxxii, 25. ויאבק—Aq. ἐκύλιστο; Onk. ואשחדל.
- xxxiv, 21. שלמים—Aq. ἡπικρισμένοι; Onk. שלמין.
- xxxv, 16. ארץ כנרת—Aq. καὶ ἔδον τῆς γῆς; Onk. כרוב ארעא.
- xxxvi, 24. את הימים—Aq. τοὺς ἡμεῖν; Onk. ית גבריא.

- xxxvii, 27. מה בצע—Aq. *τι πλεονέκτημα*; Onk. מה ממין נתחני לנא.
- xxxviii, 18. וספחילך—Aq. *στρεπτόν*; Onk. שושיפא.

- Exodus.*
- i, 9. ועצום—Aq. *ὕψιστος* (id. Deut. ix, 1); Onk. חקיפין.
11. ערי מסכנות—Aq. *πόλεις σκηνωμάτων*; Onk. קריי בית אוצרא.
13. בפרך—Aq. *ἐν τρυφήματι*; Onk. בקשוי.
- iv, 12. והורוהך—Aq. *φωτίσω σε* (id. ver. 15; xxiv, 12 always *φωτίζειν*, taken from אור); Onk. אלפינד.
- viii, 12. הערוב—Aq. *παμμύτιαν*; Onk. עירובין.
- xiv, 27. לאיתני—Aq. *εἰς ἀρχαίον αὐτοῦ*; Onk. לתוקפיה.
- xv, 8. נערמו—Aq. *ἐσωρεύθη*; Onk. חכימא.
- xxiv, 6. באגנוה—Aq. *ἐν προθύμασιν*; Onk. במזרקיא.
- xxxviii, 8. שני—Aq. *διάφορον* (id. xxxv, 22, 25); Onk. זהורי.
- xcix, 6. נזר—Aq. *τὸ πέταλον*; Onk. כלילא.
36. על כפורים וחסאח—Aq. *ἐξίλασμοῦ περὶ ἁμαρτίας*; Onk. על כפוריא וחדכי.
- xxx, 12. כופר—Aq. *ἐξίλασμα*; Onk. מדרקן.
35. פריע הוא כי פרעה—Aq. *ἀποπετασμένους αὐτὸς ὅτι*; Onk. חוא חוא.
- Aq. *ἀπεπέτασεν αὐτόν*; Onk. אריי אבטלייניה.
- xxxiv, 24. שלוש פעמים—Aq. *τρεῖς καθόδους*; Onk. חלת זמנין.
- Leviticus.*
- iii, 1. שלמים—Aq. *εἰρηνικῶς*; Onk. נכסת קידשא.
- xlii, 6. פשה חפשה—Aq. *ἐπιδῶση ἐπιδομα*; Onk. אוססא חוסיקא.
- xvii, 7. לשעיריים—Aq. *τοῖς τριχούσις* (id. Isa. xlii, 21); Onk. לשידיין.
- xxv, 83. ואשר יגאל—Aq. *ὅς ἂν ἐγγίξων ἄστυ*; Onk. ודי יפרוק.
- xxxvii, 2. יפליא—Aq. *θανμαστώση*; Onk. יפרש.
- Numbers.*
- i, 47. למשה—Aq. *εἰς ῥάβδον*; Onk. לשבטא.
- xi, 8. לשד חשמן—Aq. *τοῦ μαστοῦ ἐλαίου*; Onk. רליש במשהא.
- xxlii, 12. הפסנה—Aq. *λαφευτήν*; Onk. רמהא.
- Deuteronomy.*
- i, 40. פני לכם—Aq. *νεύσατε αὐτοῖς*; Onk. אחפני לכוין.
- xxii, 9. כלאים—Aq. *ἀνομιούμενος*; Onk. עיריבין.
- שעטנו—Aq. *ἀντιδιακείμενος*; Onk. שעטנוא.
- xxiii, 15. ולחה אויביך לפניך—Aq. *τοῦ δοῦναι τοὺς ἐχθρούς σου εἰς πρόσωπόν σου*; Onk. ולמסר.
- בעלי רבבך קרמך.
- xxviii, 20. המהומה ואת המארה ואת—Aq. *σπανή και φαγέδαινα*; Onk. מאירתא וית.
- שנושיא.

It has been urged that while Akilas's version is always cited in the Talmud by the name of its author, the Targum of Onkelos is never quoted with his name, but introduced with the name, "as we translate," or "our Targum," or "as the Targum has it;" but this only shows

the high esteem in which Onkelos's Targum stood. And as to the quotations of Aquila, almost all which are cited are on the prophets and Hagiographa, while Onkelos's Targum is only on the law; and a close examination of the sources themselves shows that what is said there has reference only to the Greek version, which is fully expressed in the praise of R. Eliezer and R. Jehoshua when saying *רפיפתי מבני אדם*, "Thou art fairer than the sons of men," thereby alluding to Gen. ix, 27, where it is said that Japheth (i. e. the Greek language) should one day dwell in the tents of Shem (i. e. Israel) (*Megillah*, i, 11, 71 b and c; *Bereshith Rabba*, 40 b).

There is another very important point, which has been overlooked by all favoring the identity of Akilas with Onkelos, and thus putting the origin of the Targum of Onkelos at a late date, viz. the use of the *memra*=*λόγος* by Onkelos; and this peculiarity of the Targum shows that its origin belongs to the time of Philo and the New-Test. period. It is not unlikely that, in this respect, Onkelos was followed by the other Targumists, and that his intention was to reconcile Alexandrian with Palestinian theology. John's doctrine of the Logos would be without any foundation or point of departure if we could not suppose that at the time of Jesus a similar doctrine concerning the Word of God, as it can be deduced from the Targum, was known among the Palestinian Jews. That later Judaism has put aside this important moment of older theology must be explained from its opposition to Christianity.

In the Targum of Onkelos we find not the least indication that it was made after the destruction of Jerusalem; we find neither the least trace of hostility to the Romans nor of opposition to Christianity. The Temple is regarded as still standing, the festive days are still celebrated, the Jews are still a nation which never ceases to resist its enemies. This may be seen from the prophetic passages, as Gen. xlix, Numb. xxiv, Deut. xxxiii, the explanation of which, as given by Onkelos, could have hardly originated after A.D. 70. Onkelos uses for Argob (Deut. iii, 4, 14; so also Jonathan, 1 Kings iv, 13) the name Trachona (טרכוֹנָא)=Trachonitis (Luke iii, 1); Josephus writes *Τραχωνίτις*, sometimes *ὁ Τράρχων* (*Ant.* xv, 10, 1 and 3; xviii, 4, 6; xx, 7, 1). The Peshito of the Pentateuch did not follow this explanation (Luke iii, 1, אחריא דטרכוֹנָא), probably because the division of Palestine at the time of Jesus did not exist in the Syrian translator's days, or it was unintelligible to him (among the rabbins טרכוֹנָא is used in the sense of "palace," פלטיין [Buxtorf, *Lex.* p. 913 sq.]). All this indicates, or rather confirms, the supposition that this Targum belongs to the time of Jesus. There is a similar indication in Onkelos's rendering of Bashan by מתנין (Syr. מתינין, Batanaea (see Gesenius, *Comm. zu Jes.* ii, 13); ים כנרת, by Gennesaret, *גניסר*. This reminds one of the language of the New Test.; so also ממוֹנָא (Mammon), "the injustice with the Mammon" (בִּישׁוֹן בממוֹנָא ון); it is said, in Gen. xiii, 13, of the Sodomites). When Paul speaks of that "spiritual rock" that followed the children of Israel in the wilderness (1 Cor. x, 3), he undoubtedly refers to the tradition preserved by Onkelos (also by Pseudo-Jonathan), "The well which the princes digged, the chiefs of the people cut it, the scribes with their staves; it was given to them in the wilderness. And from [the time] that it was given to them it descended with them to the rivers, and from the rivers it went up with them to the height, and from the height to the vale which is in the field of Moab" (Numb. xxi, 18 sq.). Hence the expression of the apostle, "spiritual, following rock." The Syriac retains the proper names of the Hebrew text. After what has been said, we believe the Targum of Onkelos originated about the time of Philo—an opinion

in ver. 22, is translated by אדם הוה יחיד בעלמא מניה, "behold Adam is the only one in the world of himself."

Onkelos shows an apparent desire to present the great men of his nation in as favorable a light as possible (comp. Gen. xvi, 12; xxv, 27; xlv, 27). Difficult words are not unfrequently retained, as in Gen. ii, 12; Exod. xii, 7; Lev. xiii, 30; and Deut. xxii, 12. Names of peoples, cities, and mountains are given as they were common in his time. Thus, in Gen. viii, 4, instead of חרר אררט, he has שורי קרר, as in Syr. and Arab.; כפחוריים, ארעא בבל, in x, 10, becomes ארעא בבל, in ver. 14, becomes קפסוקאלי; ירשעאלים, in xxxvii, 25, becomes ירשעאל, etc. (see Winer, *op. cit.* p. 39). In perusing Onkelos as a source of emending the Hebrew text, great caution is necessary, and the more so because we have not as yet a critical edition of this Targum. The only safe rule in emending the Hebrew text is when the same variety of readings which the Chaldee presents is found in several Hebrew MSS. Thus, e. g., in Exod. ix, 7, we read in the Hebrew ישראל במקנה, but in the Chaldee מבעריא רבני ישראל. The original reading was probably ישראל בני ישראל, which is found in several MSS. of Kennicott and De Rossi, and in most of the ancient versions. The Targum of Onkelos has always been held in high regard among the Jews, who also composed a Masorah upon it. Such a Masorah has lately been published, from a very ancient codex, by Dr. Berliner, *Die Masorah zum Targum Onkelos, enthaltend Massorah Magna und Massorah Parva* (Leips. 1877).

3. *Manuscripts of Onkelos* are extant in great numbers. Oxford has five, London (British Museum) two, Vienna six, Augsburg one, Nuremberg two, Altdorf one, Carlsruhe three, Stuttgart one, Erfurt three, Dresden one, Leipsic one, Jena one, Dessau one, Helmstädt two, Berlin four, Breslau one, Brieg one, Ratibson one, Hamburg seven, Copenhagen two, Upsala one, Amsterdam one, Paris eight, Molsheim one, Venice six, Turin two, Milan four, Leghorn one, Sienna one, Geneva one, Florence five, Bologna two, Padua one, Trieste two, Parma about forty, Rome eighteen, more or less complete, etc., containing Onkelos. For a full description of these MSS., see Winer, *De Onkeloso*, p. 13 sq.

4. *Editions.*—The Targum of Onkelos was first published with Rashi's commentary on the Pentateuch (Bologna, 1482, fol.). It was subsequently reprinted quite frequently, and may be found in the Rabbinic and Polyglot Bibles. Buxtorf was the first to add the vowel-points to the Targum. As yet, we have no critical edition of this Targum. Dr. Berliner purposes to publish a new and critical edition according to that of Sabioneta (1557). This Targum has been translated into Latin by Alphonso de Zamora in the Complutensian Polyglot, by Paul Fagius, and by John Mercier (1568). That of Fagius is the best. It was rendered into English by Etheridge (Lond. 1862-65).

5. *Literature.*—Jes. Berlin (Pik), מיני חריגים, or glosses and comments upon the Targum of Onkelos (Breslau, 1827); Luzzatto, איהב נר, *Philoxenus, sive de Onkelosi Chaldaica Pentateuchi Versione Dissertatio*, etc. (Vienna, 1830), distributes the deviations from the Hebrew into thirty-two classes, and endeavors to emend the text from MSS., although the genius of the version is not well described in it (the writer of the art. "Targum" in Smith's *Dict. of the Bible*, besides a great deal of useless ballast, thought it necessary to copy Luzzatto); Berkowitz, אר, עיטא, on the hermeneutics of Onkelos (Wilna, 1848); id. חליפות שמלות (ibid. 1874); Levy, in Geiger's *Zeitschrift*, 1844, v, 175-198; Fürst, *Literaturblatt*, 1845, p. 337 sq.; 354; Smith, *Diatrise de Chald. Paraphrastis eorumque Versionum* (Oxf. 1662); Winer, *De Onkeloso ejusque Paraphrasi Chal-*

*daica* (Lips. 1820); Maybaum, *Die Anthropomorphismen und Anthropopathien bei Onkelos*, etc. (Breslau, 1870); Geiger, *Jüdische Zeitschrift*, 1871, p. 85-104; נחמיה בלגר, or a commentary on Onkelos by Dr. Adler in the edition of the Pentateuch with ten commentaries (Wilna, 1874); and the literature given in the art. ONKELOS in this *Cyclopaedia*.

III. *Jonathan ben-Uzziel on the Prophets*, i. e. Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel, and the twelve minor prophets, stands next in time and importance to Onkelos.

1. *Authorship and Sources.*—As to Jonathan himself, we read in the Talmud—(1.) "Eighty disciples had Hillel the elder, thirty of whom were worthy that the Shechinah [Divine Majesty] should rest upon them, as it did upon Moses our Lord; peace be upon him. Thirty of them were worthy that the sun should stand still at their bidding, as it did at that of Joshua ben-Nun. Twenty were of intermediate worth. The greatest of them all was Jonathan ben-Uzziel, the least R. Jochanan ben-Zachai; and it was said of R. Jochanan ben-Zachai that he left not [uninvestigated] the Bible, the Mishna, the Gemara, the Halachahs, the Haggadahs, the subtleties of the law, and the subtleties of the Sopherim . . . ; the easy things and the difficult things [from the most awful divine mysteries to the common popular proverbs]. . . . If this is said of the least of them, what is to be said of the greatest, i. e. Jonathan ben-Uzziel?" (*Baba Bathra*, 134 a; comp. *Sukkah*, 28 a). (2.) A second passage, referring more especially to our present subject, reads as follows: "The Targum of Onkelos was made by Onkelos the Proselyte from the mouth of R. Eliezer and R. Jehoshua, and that of the prophets by Jonathan ben-Uzziel from the mouth of Haggai, Zechariah, and Malachi. And in that hour was the land of Israel shaken three hundred parasangs. . . . And a voice was heard, saying, 'Who is this who has revealed my secrets unto the sons of man?' Up rose Jonathan ben-Uzziel and said, 'It is I who have revealed thy secrets to the sons of man. . . . But it is known and revealed before thee that not for my honor have I done it, nor for the honor of my father's house, but for thine honor, that the disputes may cease in Israel.' . . . And he further desired to reveal the Targum to the Hagiographa, when a voice was heard, 'Enough.' And why? Because the day of the Messiah is revealed therein" (*Megillah*, 3 a).

There is some exaggeration in this description of Jonathan's paraphrase, but it only shows the high esteem in which it stood. Fabulous as the whole may appear, yet there is no doubt as to the high antiquity of this paraphrase. Many doubts were raised as to the authorship of this Targum. Some, who would not deny the existence of Jonathan, hesitate to believe that he had any share in the Targum commonly ascribed to him. It has also been suggested by Luzzatto and Geiger that "Jonathan is the same with the Greek *Theodotion*, and that the Babylonians gave this name to the paraphrase—especially as they were acquainted with that of Jonathan ben-Uzziel—to indicate that the Targum was after the manner of *Theodotion*, like the reputed origin of the name *Onkelos* in connection with the Greek *Aquila* or *Aquila*." But this more ingenious than true suggestion has no support, and needs no refutation. It has also been suggested by most of the modern critics that because this Targum is never once quoted as the Targum of Jonathan, but is invariably introduced with the formula ר' יוסף, "as R. Joseph interprets," that not Jonathan, but R. Joseph, is the author of this Targum; and this supposition is based upon the fact that the Talmud relates that this R. Joseph, in his latter years, occupied himself chiefly with the Targum when he had become blind. This relation of the Talmud, and perhaps the fact that Jonathan's Targum, which was called, by way of abbrevia-

tion, תרגום, i. e. תרגום יונתן, made Joseph the author of this Targum, since תרגום may also mean תוספת, or something else, and the real Targum is now quoted under Joseph's name. That Jonathan's Targum was really extant before the time of R. Joseph we see from *Megillah*, 3 a, where on Zech. xii, 12 R. Joseph remarks, "Without the Targum to this passage, we could not understand it;" but when the writer of the art. "Targum" in Smith's *Dict. of the Bible* remarks, "Twice even it is quoted in Joseph's name, and with the addition, 'Without the Targum to this verse (due to him), we could not understand it,'" he only betrays his carelessness as to the Talmudic sentence. After all, we do not see why we should not rely upon the Talmudic notice concerning Jonathan equally as much as upon that concerning R. Joseph. The language concerning the former, we admit, is a little hyperbolic, but this does not exclude the truth of the matter. Besides, there is nothing to militate against Jonathan having written a Targum on the prophets; and even the expression that this Targum was made "from the mouth of Haggai, Zechariah, and Malachi" is not so absurd as the writer of the art. "Targum" in Kitto's *Cyclopædia* would suppose, for if it means anything, it means this, that the explanation of Jonathan contains the transmitted exposition in the spirit of Hillel, and, as Zunz remarks (*Gottesd. Vorträge*, p. 332), "Jonathan's Targum on the prophets, as a result of studies which were instrumental in forming fixed national opinions, proves that a considerable time before it was customary to explain the contents of the prophetic books, by means of Targumical prelections or otherwise, to the public. Nay, he commends the teachers for—even in evil times—teaching the law in the synagogues at the head of the congregations" (Targ. on Judg. v, 2, 9). From the New Test. we know that Moses and the prophets were read in the synagogues, and, deducting all hyperbolic language, there is no reason for doubting the high antiquity of this Targum. The text is rendered, in the same manner as by Onkelos, free from all one-sided and polemical considerations, which the Jews since the 2d century followed. Many passages are referred to the Messiah, even such as do not rightly belong to him, so that no polemical tendency against Christians appears in the version. The following is a list of them: 1 Sam. ii, 10; 2 Sam. xxiii, 3; 1 Kings iv, 33; Isa. iv, 2; ix, 6; x, 27; xi, 1, 6; xv, 2; xvi, 1-5; xxviii, 5; xlii, 1; xliii, 10; xlv, 1; lii, 13; liii, 10; Jer. xxiii, 5; xxx, 21; xxxiii, 13, 15; Hos. iii, 5; xiv, 8; Mic. iv, 8; v, 2, 18; Zech. iii, 8; iv, 7; vi, 12; x, 4.

2. *Character, etc.*—In the historical books the exegesis is simple and tolerably literal. A few words are added occasionally, which have no representatives in the original, but they are not many. The interpretation is good, giving the sense fully and fairly; but in the prophetic books the text is more freely handled, for, as Zunz justly remarks (*op. cit.* p. 63), "The prophetic writings, not containing anything of the nature of legal enactment, admitted of a greater latitude in handling the text. This became even unavoidable because of the more obscure language and the predictions concerning Israel's future by which they are characterized. Even in the case of the historical books, Jonathan often acts the part of an expositor. In the case of the prophets themselves, this course of exposition—in reality becoming a Haggadah—is pursued almost uninterruptedly." "This pervading, often misunderstood, characteristic," says Hävernick, "constitutes the chief proof, confirmed also by external evidence, of the *oneness* of the authorship of this Targum; for not only do parallel passages (such as Isa. xxxvi-xxxix; comp. 2 Kings xviii, 13 sq.; Isa. ii, 24; Mic. v, 1-3) literally harmonize, but he is also in the habit of furnishing, particularly the poetical portions of the historical books (Judg. v; 1 Sam. ii; 2 Sam. xxiii), with profuse additions. These ad-

ditions often very much resemble each other (comp. Judg. v, 8 with Isa. x, 4; 2 Sam. xxiii, 4 with Isa. xxx, 26)."

Another peculiarity of this Targum are the Jewish dogmatical opinions of that day with which the work is interwoven, and the theological representations, in introducing which a special preference was given to the book of Daniel. Examples of this are the interpreting of the phrase "stars of God" by "people of God" (Isa. xiv, 13; comp. Dan. viii, 10; 2 Macc. ix, 10); the application of the passage in Dan. xii, 1 to that in Isa. iv, 2. In Isa. x, 32 the author introduces a legend framed in imitation of the narrative in Dan. iii, which is repeated by later Targumists (comp. Targ. Jerus.; Gen. xi, 28; xvi, 5; 2 Chron. xxviii, 3); in Isa. xxii, 14 and lxxv, 35 he has interwoven the doctrine concerning the *second death* (comp. Rev. ii, 11), which the wicked should die in the next world or kingdom of the Messiah; and in Isa. xxx, 33 he mentions *Gehenna*. In various places the notices respecting the Messiah's offices, character, and conduct, the effects of his advent and personal influence, harmonize with those of the New-Test. writers (comp. Isa. xlii, 1 sq.; Matt. xii, 17 sq.); but from this the Sept. differs, and at other times the N. T. writers differ from this Targum. Isa. liii it recognises as referring to the Messiah, and assumes a suffering and expiatory Messiah. Its author nevertheless here, as well as elsewhere (Mic. v, 1), indulges in many perversions. He seems to have entertained—in germ, at least—the idea, which became further developed in the Talmud, of a Messiah submitting to obscurity for the sake of the sins of the people, and then appearing in glory (comp. Mic. iv, 8 with Zech. iii, 8; iv, 7).

There is little doubt that the text has received several interpolations. To this head Zunz (*op. cit.* p. 63, 282) refers all that is hostile to Rome, e. g. Exod. xxxix, 16; 1 Sam. ii, 5; Isa. xxxiv, 9. So, too, *Armillus*, in Isa. xi, 14. To these may be added perhaps *Germania*, from Gomer, in Ezek. xxxviii, 6; the superstitious legend inserted in Isa. x, 32 relative to the army and camp of Sennacherib; and the peculiar story about Siserā (Judg. v, 8). Even Rashi speaks of interpolations in the text of Jonathan (Ezek. xlvii, 19); and Wolf says (*Bibl. Heb.* ii, 1165), "Quæ vero, vel quod ad voces et barbaras, vel ad res ætate ejus inferiores, aut futilia nonnulla, quamvis pauca triplicis hujus generis exsint, ibi occurrunt, ea merito falsarii cujusdam ingenio adscribuntur." The printed text of the Antwerp Polyglot confirms this supposition of interpolations, since several of them are wanting there. So long as we have no critical edition of this Targum, we must be careful to draw the inference, as did Morinus and Voss, in favor of a very late origin of the Targum; for a perusal of the recently published edition of this Targum by Lagarde, from the Codex Reuchlin, and its comparison with our present editions, will only show the corrupt state in which the text at present is.

The style of Jonathan is, upon the whole, the same as that of Onkelos. Eichhorn and Berthold asserted that this Targum teems with "exotic words." Yet, notwithstanding their assertion, we believe that Carpov (*Crit. Sacra*, p. 461) is correct when he says, "Cujus nitor sermonis Chaldæi et dictionis laudatur puritas, ad Onkelosum proxime accedens et purum defleens a puro tersoque Chaldaismo Biblico." The text lying at the basis of the Targum is the Masoretic one; yet it differs from the Masoretic text in various places, where it appears to follow preferable readings. But the freedom which the translator took makes it difficult to tell in every case what particular form of the text lay before him. Hence great caution must be used in applying the Targum to critical purposes, and the more so as we have not as yet a critical edition.

We subjoin from the art. "Targum" in Smith's *Dict. of the Bible* the following specimens of this Targum from different books:

*schrift d. deutsch. morgenl. Gesellschaft*, 1874, xxviii, 1 sq.; 187b, xxix, 157 sq., 319 sq. See JONATHAN BEN- UZZIEL.

IV. *The Targum of Pseudo-Jonathan and Jerushalmi on the Pentateuch.*—The greater simplicity which characterized the older Targums soon ceased to satisfy the progressively degenerating taste of the Jews, especially after the Talmud began to assume a written form. Hence Targums marked by greater laxity soon began to be written which embraced more the opinions peculiar to the age, and furnished the text with richer traditional addenda. Of these latitudinarian Targums we possess two on the Pentateuch—the one known by the name of Pseudo-Jonathan, inasmuch as writers of a later period ascribe it to the author of the Targum on the Prophets; and the commonly so-called Targum Hierosolymitanum, or Jerushalmi.

1. *Pseudo-Jonathan.*—This paraphrase is falsely ascribed to Jonathan ben-Uzziel. It extends from the first verse of Genesis to the last of Deuteronomy. The way in which it came to be regarded as his is supposed to have been the mistake of a copyist, who made out of יר, i. e. *Targum Jerushalmi*—ירינתן, *Targum Jonathan*. Proof is not needed at the present day to show that the Jonathan of the prophets is not the Jonathan of the Pentateuch, for he could have little to do with a Targum which speaks of Constantinople (Numb. xxiv, 19, 24), describes very plainly the breaking-up of the West-Roman empire (ver. 19-24), mentions the Turks (Gen. x, 2), and even Mohammed's two wives, Chadija and Fatima (xxi, 21), and which not only exhibits the fullest acquaintance with the edited body of the Babylonian Talmud, by quoting entire passages from it, but adopts its peculiar phraseology: not to mention the complete disparity between the style, language, and general manner of the Jonathanic Targum on the Prophets, and those of this one on the Pentateuch, strikingly palpable at first sight. This was recognised by early investigators (Morinus, Pfeiffer, Walton, etc.), who soon overthrew the old belief in Jonathan ben-Uzziel's authorship, as upheld by Menahem Rekanati, Asariah de Rossi, Gedaljah, Galatin, Fagius, etc. The work of the Pseudo-Jonathan is not a version. It is rather a paraphrase, though by no means exclusively so. Neither is it a Haggadic commentary. Version and paraphrase are interwoven throughout, the author seldom confining himself to simple explanation, but proceeding to large Midrashim. Halachah and Haggadah are richly imbedded in the work, the latter especially. His legends are rich and copious. His Haggadah is not historical; it is ethical, religious, metaphysical, lyrical, and parabolic. It has been well observed that he is only the interpreter of the ideas prevailing in his time—the narrator of traditions, religious and national, not their inventor, because most of them are found in preceding literature, or, as Zunz states it, "almost all his explanations and embellishments coinciding with the Haggadah we find occurring in the other Haggadic writings; the few which are peculiar to him he has not devised, any more than Jonathan has devised his interpretation of the prophets. In both the culture of the age and the potency of traditional ideas are manifest" (*Gottesd. Vorträge*, p. 72). To these embellishments belongs the manner in which events and characters are dressed out hyperbolically in Jonathan's Midrashim; not only the Biblical heroes, as was natural, but even the enemies of the Jewish nation. Thus Og carries on his head a piece of rock sufficient to bury all the camp of Israel beneath its weight (Numb. xxi, 35). A mountain possessed of divine virtues is suspended in the air over the children of Israel (Exod. xix, 17), etc. Many examples are given by Zunz (*op. cit.* p. 72, note b) to show, against Winer and Petermann, that all these stories were not invented by Pseudo-Jonathan, but borrowed from traditional usage. The ethical Haggadah

is perhaps the best part of the work, for here the exegete becomes didactic. Thus we are told in Gen. x. that Joseph suffered two additional years of imprisonment because he built on man's rather than God's help, a view also espoused by Rashi. The region of the supernatural is treated very freely by Jonathan. His angelology is marvellous. He has the names of many angels outside the circle of the Bible, as Samael, Gabriel, Uriel, Sagnugael, etc. We find rhetorical or poetical digressions in Gen. xxii, 14 (the prayer of Abraham on Mount Moriah), Deut. xxxiv, 6 (the hymn on Moses' death); Gen. xlix, 4; Numb. xxi, 34; Deut. xxxii, 50 (parables). Like Onkelos and others, he avoids anthropomorphic ideas, and is averse to ascribe superhuman attributes to heathen gods. The Halachah is also brought within the circle of his paraphrase, and its results employed in the exposition. This part of Jonathan's version has of late been treated by Dr. S. Gronemann, in his *Die jonianische Pentateuch-Uebersetzung in ihrem Verhältnis zur Halacha* (Leipsic, 1879). The language of this Targum shows it to be of Palestinian origin, as it is in what is called the Jerusalem dialect, like that of the Jerusalem Talmud, but with many peculiarities. It is far from being pure, because the Syriac had deeply affected it. Foreign elements enter into it largely, such as Gen. i, 7, אַרְבָּעִינִים = *ἀρκεῖνός* (ii, 6; Numb. xxxiv, 6); ver. 9, יְרֻחָא = *δοχεῖον*, or *δοχή*; ver. 20, אֵייר = *ἀήρ*; ii, 12, בִּיבְרִין = *βήρυλλος*, Syr. ברילא; iii, 4, דִּלְטֹר = *delator*; iv, 6, אֵיכֹנִין = *εἰκόνες*; vi, 2, פֶּסֶס, from *πέικω*, or *πέϊζω*, or *πέικω*; ver. 9, גִּנְיָסָא = *γένεσις*, *γέννησις*, *γένος*; Syr. גִּנְסָא, etc.; comp. Petermann, *De Duabus Pentateuchi Paraphrasibus Chaldaicis*, particula i, p. 66 sq., where a collection of these foreign words is given. The names of Constantinople and Lombardy, and even of two of Mohammed's wives, which occur in this paraphrase, besides the many foreign words, prove the Targum to have originated in the second half of the 7th century. That Jonathan had Onkelos before him, a very slight comparison of both will show. Many places attach themselves almost verbally to Onkelos, as Gen. xx, 1-15. Indeed, one object which the Pseudo-Jonathan had in view was to give a criticism upon Onkelos. He corrects and alters him more or less. Where Onkelos paraphrases, Jonathan enlarges the paraphrase. The same attention to the work of his predecessor is shown in his Halachic as in his Haggadic interpretation; as also in the avoidance of anthropomorphisms and anthropopathisms. Sometimes the divergences from Onkelos are slight, sometimes important; and they are often superior to Onkelos, but sometimes the reverse. As his object was different, his production presents a great contrast on the whole, because he intended to interpret, not to translate. Besides, this divergence from Onkelos must be accounted for in another way: he did not base his work primarily on the latter, but upon another paraphrase; or, in other words, he worked upon Onkelos indirectly in the first instance because his whole production rests on the basis of the Jerushalmi, or Jerusalem, Targum. But, before proceeding with our observation on the Pseudo-Jonathan, let us speak of

2. *The Jerushalmi, or Jerusalem, Targum.*—The Jerusalem Targum, written in the same dialect substantially as that of the Pseudo-Jonathan, and interpreting single verses, often single words only, is extant in the following proportions: a third on Genesis, a fourth on Deuteronomy, a fifth on Numbers, three twentieths on Exodus, and about one fourteenth on Leviticus. Judging from the rounded and complete form in which the different parts are given, we may infer that it is now in its primitive state. If so, it cannot be a fragmentary recension of Jonathan. Yet their similarity is striking. The Haggadah of the one regularly appears in the other, and has usually a more concise form in the Jerusalem

Targum. Indeed, there is often a verbal agreement, or nearly so, between them, so that one might at first be inclined to assume their original identity, if not that they are fundamentally the same work—the Jerusalem Targum containing variations from the other, or being a fragmentary recension of it. The latter opinion is held by Zunz. But against this there are many arguments, especially the fact that the work is complete and rounded off in many parts. And though the similarity of the Jonathan and Jerusalem Targums is considerable, there is so much divergence as to prove diversity of authorship. Thus Jerushalmi knows very little of angels: Michael is the only one ever occurring. In Jonathan, on the other hand, angelology flourishes with great vigor: to the Biblical Michael, Gabriel, Uriel, are added the Angel of Death, Samael, Sagnuael, Shachassai, Uziel; seventy angels descend with God to see the building of the Babylonian tower; nine hundred millions of punishing angels go through Egypt during the night of the Exode, etc. Jerushalmi makes use but rarely of Halachah and Haggadah, while Jonathan sees the text as it were only through the medium of Haggadah: to him the chief end. Hence Jonathan has many Midrashim not found in Jerushalmi, while he does not omit a single one contained in the latter. There are no direct historical dates in Jerushalmi, but many are found in Jonathan; and since all other signs indicate that but a short space of time intervenes between the two, the late origin of either is to a great extent made manifest by these dates. The most striking difference between them, however, and the one which is most characteristic of either, is this, that while Jerushalmi adheres more closely to the language of the Mishna, Jonathan has greater affinity to that of the Gemara. It is also perceptible that the reverence of Onkelos for the name of God, shown in substituting the *Memra*, or something intermediate, is not so excessive in Jonathan as in the Jerusalem Targum. If such be the diversity of Jonathan and the Jerusalem Targum, they are not one work fundamentally; nor is the one a recension, now in fragments, of the other. But how is their resemblance to be explained? Only by the fact that both have relation to Onkelos. The author of the Jerusalem Targum worked upon that of Onkelos, his object being to correct it according to certain principles, and to insert in it a selection of Haggadahs current among the people. Pseudo-Jonathan afterwards resumed the same office, and completed what his predecessor had begun. The Jerusalem Targum formed the basis of Jonathan, and its own basis was that of Onkelos. Jonathan used both his predecessors' paraphrases, the author of the Jerusalem Targum that of Onkelos alone. There is no doubt that the small glossarial passages of the Jerusalem Targum are intended as a critical commentary upon Onkelos, and from his standpoint the author proceeds freely in using his predecessor. Thus he rejects his acceptations of words, and gives closer acceptations for his freer ones. In many places where Onkelos's scrupulosity about removing anthropomorphisms from the text had obscured the sense, the Jerusalem Targum restores the original meaning by some addition or change. Thus in Gen. vi, 6, where Onkelos omits the name Jehovah and paraphrases, the Jerusalem Targum comes near the original text. Sometimes, where Onkelos Aramaizes a Hebrew word, the Jerusalem Targum substitutes a genuine Aramaean one, as in viii, 22, where the מְרִיטָא of Onkelos is displaced for מְרִיטָא. So in xxxiv, 12, where Onkelos has מוֹהֲרִין וְיִמְחֹקִין, the Jerusalem Targum puts מוֹהֲרִין וְיִמְחֹקִין. *Vice versa*, the Jerusalem Targum often prefers a Hebrew word to Onkelos's Aramaean one, perhaps because the latter was better known in Palestine, as in xxii, 24. There is, indeed, no uniformity between Onkelos and Jerusalem in the use of Aramaean words, while consistent divergences may be

readily traced. After all that has been said there can be no doubt that the general object of the author of the Jerusalem Targum was to correct and explain Onkelos, adapting it to a later time and different country by enriching it with the Haggadic lore which had accumulated, so that its deficiencies might be removed. From being a version, he wished to supplement it in various parts, so that it should be a paraphrase there. That he has made many mistakes, and departed in not a few cases from Onkelos for the worse, we need not remark, nor enumerate his errors, since Petermann has collated them (*op. cit.* p. 60 sq.). It is this fragmentary Jerusalem Targum to which Jonathan had regard in the first instance. He uses the larger paraphrases and Haggadic parts of it, as well as the smaller variations from Onkelos, but always with discretion. More commonly the Haggadah of the Jerusalem Targum is simplified and abridged. Nor does Jonathan follow Onkelos implicitly, but often diverges. If he does not adhere consistently to the Jerusalem Targum, we need not expect to see him copying Onkelos. Thus in Gen. vii, 11; xxii, 24, he leaves Onkelos for the Jerusalem Targum. It should also be observed that Jonathan relies upon Onkelos much more than the Jerusalem Targum, which is freer and more independent. Thus the former follows Onkelos, and the latter departs from him in Gen. xi, 30; xii, 6, 15; xiii, 6; xiv, 5, 21; xvi, 7, 15; xix, 31; xx, 18, etc. The interval of time between the Jerusalem Targum and Jonathan cannot be determined exactly, but it must have been a century. From these observations it will no longer be uncertain "whether the Targum of Jerusalem hath been a continued Targum, or only the notes of some learned Jew upon the margins of the Pentateuch, or an abridgment of Onkelos" (Allix, *Judgment of the Ancient Jewish Church*, etc., p. 88). All the guesses are incorrect. The only objection to this hypothesis is the statement of Zunz that because many citations made by older authors from the two Targums in question are now missing, an older and complete Jerusalem Targum must have existed, which is now lost. But when we consider the probable chances of passages being lost in the course of transcription, and of others being interpolated, as also the fact of variations in the editions, it need not be assumed, in the face of internal evidence, that they are very different now from what they were at first. Many of the passages cited by authors and now wanting, which Zunz has brought together, need a great deal of sifting and correction, as has been ably shown by Seligsohn in Frankel's *Monatschrift*, 1857, p. 113. The view of the relation now given between Onkelos, the Jerusalem Targum, and Pseudo-Jonathan was briefly advocated by Frankel (*op. cit.* 1846, p. 111 sq.) with ability and success. His view has again been taken up by Seligsohn and Traub, and satisfactorily established by them in a prize-essay, published in Frankel's *Monatschrift*, 1857.

3. *Editions and Commentaries.*—The Pseudo-Jonathan Targum was first published at Venice in 1591; then at Hanau, 1618; Amsterdam, 1640; Prague, 1646; Amsterdam, 1671 and 1703; Berlin, 1705; Wilna, 1852; Vienna, 1859, etc.—all these, as well as the *editio princeps*, having Onkelos and the Jerusalem Targum. It is also in the London Polyglot, vol. iv, together with a Latin translation made by Antony Chevalier. It was translated into English by Etheridge (Lond. 1862-65). The Jerusalem Targum was first printed by Bomberg (Venice, 1518) in his Rabbinical Bible, and reprinted in the subsequent Rabbinical Bibles issued by him, and in the great Polyglots. Since its publication by Walton in 1657, it has also appeared at Wilna (1852), Vienna (1859), and Warsaw (1875). Francis Taylor made a Latin version of this Targum (Lond. 1649); but the more correct one is that of Antony Chevalier above noticed.

A commentary was written upon the Pseudo-Jonathan and Jerusalem Targums by David ben-Jacob Ze-

brecyn (Prague, 1609), entitled *פירוש על חרגום יונתן*; by Mordecai ben-Naphtali Hirsch (Amsterdam, 1671), entitled *קטרת הסמים*, but *פירוש על חרגום יונתן* is given in the Pentateuch edition published at Wilna in 1859. R. Pheibel ben-David (Hanau, 1614), author of *באור המלות*, did not compose, as the writer of the art. "Targum" in Kitto states, a commentary on Pseudo-Jonathan and Jerushalmi, but an elucidation of difficult words found in Jonathan's Targum.

We subjoin the following specimens from Genesis and Deuteronomy, selected at random :

GEN. III, 17, 18.

Targum Jerushalmi.

Onkelos.

17. And to Adam he said, For that thou hast accepted the word of thy wife, and hast eaten from the tree of which I have commanded unto thee, and said, Thou shalt not eat from it: cursed shall the earth be for thy sake; with trouble shalt thou eat of it all the days of thy life;

18. And thorns and thistles it shall grow for thee; and thou shalt eat the grass of the field.

18. And thorns and thistles shall it multiply for thee; and thou shalt eat the grass that is on the face of the earth. Then began Adam and said, I pray, through the Mercy that is before thee, Jehovah, let us not be accounted before thee as the beasts that eat the grass on the face of the field: may we be permitted to arise and toil with the toil of our hands, and eat food from the fruits of the earth; and thus may there be a difference before thee between the sons of man and the offspring of cattle.

DEUT. XXXIV, 1-3.

1. And Moses ascended from the encampment of Moab to the mountain of Nebo: the head of the height that is opposite Jericho. And Jehovah showed him all the land of Gilead unto Dan.

2. And all Naphtali and the land of Ephraim and Manasseh, and all the land of Judah to the hindmost sea.

3. And the west and the plain of the valley of Jericho the city of the palms, unto Zoar.

1. And Moses ascended from the plain of Moab to the mountain of Nebo, the summit of the hill which is opposite Jericho. And God showed him the whole land: Gilead unto Dan of Caesarea.

2. And all the land of Naphtali, and the land of Ephraim and Manasseh, and the whole land of Judah, to the hindmost sea.

3. And west, and the plain of the valley of Jericho the city which produces the palms, that is Zoar.

Israel, and the exile of the disciples of Elijah who would be driven out from the plain of Jericho, and the exile of the disciples of Elijah who would be driven out from the city of palms by their brethren, the house of Israel: two hundred thousand men. And the woes of each generation and the punishment of Armilus [Armilus] the evil one and the battle-array of Gog. And in this great misery Michael will arise with the sword: to save, etc.

4. Literature. — Winer, *De Jonathanis in Pentateuchum Paraphrasi Chaldaica* (Erlangen, 1823); Petermann, *De Duabus Pentateuchi Paraphrasibus Chaldaicis*, pt. i; *De Indole Paraphraseos quae Jonathanis esse dicitur* (Berlin, 1829); Bär, *Geist des Jerushalmi* (Pseudo-Jonathan), in Frankel's *Monatsschrift*, 1851-52, p. 235-242; Seligsohn and Traub, *Ueber den Geist der Uebersetzung des Jonathan ben-Usiel zum Pentateuch und die Abfassung des in den Editionen dieser Uebersetzung beige-druckten Targum Jerushalmi*, in Frankel's *Monatsschrift*, 1857, p. 96-114, 138-149; Geiger, *Das Jerusalemische Targum zum Pentateuch*, in the *Urschrift u. Uebersetzung der Bibel* (Breslau, 1857), p. 457-480; Seligsohn, *De Duabus Hierosolymitanis Pentateuchi Paraphrasibus* (ibid. 1858); Gronemann, *Die Jonathan'sche Pentateuch-Uebersetzung*, etc. (Leips. 1879).

V. Targums on the Hagiographa. — These Targums are generally divided into three groups, viz.: a. Job, Psalms, Proverbs; b. The five Megilloth; c. Daniel, Chronicles, and Ezra. Tradition ascribes to R. Joseph the Blind the authorship of this Targum, but this is contradicted by writers even of the 13th century (see Zanz, *op. cit.* p. 65).

1. The Targum on the Book of Job. — A feature of this Targum is its Haggadical character. As early as the middle of the 1st century a paraphrase on the book of Job is mentioned. Its difficulty, but more especially its adaptation to allegorizing fancies, presented a peculiar temptation to Chaldee expositors. In many places we find a double Targum. After one interpretation, which is always free in character, another still more paraphrastic is annexed with the introductory, *הא, i. e. חרגום אחר, another Targum* (comp. xviii, 7,

8, 18). The extraneous insertions are very numerous, uncertain, fabulous, and incorrect. Thus at ii, 1 we read, "And the three friends of Job heard of all the evil that had come upon him when they had seen the trees of his garden burned up, and the bread of his food changed into living flesh, and the wine of his drink into blood; and they came each one from his place, and for this service they were delivered from the place appointed them in Gehenna." In i, 15 the words of the original *ונמלת בחיבה ותפל על שבא* are rendered *לילית ממלכת זמרנד*, "and the queen of Samarcand (?) suddenly rushed in." If Samarcand be really

Targum Pseudo-Jonathan.

17. And to Adam he said, Because thou hast received the word of thy wife, and hast eaten from the fruit of the tree, of which I commanded thee, Thou shalt not eat from it: cursed be the earth, because it has not shown unto thee thy fault; in sorrow shalt thou eat of it all the days of thy life;

18. And thorns and thistles shall grow and multiply for thy sake; and thou shalt eat the grass that is on the face of the field. Adam answered and said, I pray, by the mercy that is before thee, Jehovah, that we may not be deemed like unto the beasts, that we should eat grass that is on the face of the field; may we be allowed to arise and toil with the toiling of our hands, and eat food from the food of the earth, and thus may there be a distinction now before thee between the sons of man and the offspring of cattle.

1. And Moses ascended from the plains of Moab to the mountain of Nebo, the summit of the height which is over against Jericho; and the word of Jehovah showed him all the mighty ones of the land: the powerful deeds which Jephthah from Gilead would do, and the victories of Samson the son of Manoah, from the tribe of Dan.

2. And the thousand princes from the house of Naphtali who joined issue with Balak, and the kings whom Joshua the son of Nun, from the tribe of Ephraim, would kill, and the power of Gideon the son of Josiah from the tribe of Manasseh, and all the kings of Israel, and the kingdom of the house of Judah who would rule in the land until the second Sanctuary would be laid low.

3. And the king of the south who would join the king of the north to destroy the inhabitants of the land, and the Ammonites and Moabites, the inhabitants of the valleys who would oppress Jericho, and the exile of the disciples of Elijah who would be driven out from the city of palms. And the woes of each generation and the punishment of Armilus [Armilus] the evil one and the battle-array of Gog. And in this great misery Michael will arise with

mentioned, the date is late. The language is intermixed with Greek and Latin words in the same degree as the Palestinian Targumim and Midrashim. Thus the word *אנגלי, ἄγγελος* (angel), is used in xv, 15; xx, 27; xxxv, 10. Bacher also finds in this Targum the Latin word *delator*, and comes to the conclusion that the author lived in Palestine, under Roman dominion, in the 4th or 5th century, while the writer of the art. "Targum" in Kitto states that "the work is a growth belonging to various times and writers, of which the beginning and end cannot be precisely determined."

With regard to the Masoretic text, the Targum of Job agrees sometimes with the Sept. (as xix, 29: *בי, Targ. תבואה*, Sept. *ἐν αὐτῷ*; xxii, 21: *תבואה*, Targ. *לא ירחיק*, Sept. *καρπός σου*; xxxi, 32: *לא ירחיק*, Targ. *לא ירחיק*, Sept. *ἐξέως*, both *אורח*), or with the Peshito (comp. iii, 8; vi, 16; vii, 4; ix, 7; xvi, 10; xxxvi, 10; xxxviii, 28). Often the reading of the Targum has to be explained from an interchange of letters, thus:

ר and ד —	xxiv, 24; רמו,	Targ. דמו (אוריכו).
א " ח —	v, 5; אל,	" (פולמיסין) חל.
	xxx, 3; שואה,	" (שואה) שוחה.
	xxviii, 7; איה,	" (חיות) חיה.
א " מ —	vii, 4; ומדד,	" (ונדריה) אדר.
ח " מ —	xxx, 12; פרחח,	" (בנייהון) פרחם.
ח " ת —	xvii, 2; ובהמרות,	" (ובתמורות) ובהפירוניהון.
ר " י —	xix, 28; בי,	" (בירה) בו.

י and י	xxviii, 7; איה; Tar. חיה (חיה).
xxii, 29; עינים	“ (סורחנא) עינים.
xxvii, 10; און	“ (דרימין למא) און.
נ	היכמא דפסקן עשן “
vii, 9; ענן	“ (חגרי) חנאן “
xxxvi, 20; חשאף	“

In two cases the variation is to be accounted for by hearing amiss, viz. xxix, 22, where, instead of חשנא, (חשנא), and xxxix, 23, where, for חרנה, חרנה (חשנא) is read. The number is greater where the vowel-points differ from those of the Masorah. Variations of this kind may amount to about thirty.

The Targum on Job was published by John Terentius (Frank. 1663) [the text being that of Buxtorf, and the Latin translation that of Arias Montanus], with notes, consisting of various readings and explanations of Chaldean words. The Latin version of Alphonso de Zamora was published with notes by John Mercier (ibid. 1663), and Victorius Scialai translated it into Latin (Rome, 1618). This Targum has been treated by Bacher, in Grätz's *Monatsschrift*, 1871, p. 208-223, and by Weiss, *De Libri Jobi Paraphrasi Chaldaica* (Vratisl. 1873).

2. *The Targum on the Psalms*.—This Targum is not so Haggadic or diffuse as that of Job. Sometimes it follows the original with a tolerable degree of closeness, as in i, iii, v, vi, etc. In more cases, however, it indulges in prolix digressions, absurd fables, and commonplace remarks. Two or three different versions of the same text occasionally follow one another without remark, though the introductory notice חנא, i. e. חירגון, sometimes precedes (comp. cx, 1). The additions to the text are often inappropriate, the sense distorted, the titles wrongly paraphrased, and fables are abundant. Thus in cx, 1 the paraphrase has, “The Lord said in his word that he would appoint me lord of all Israel; but he said to me again, Wait for Saul, who is of the tribe of Benjamin, till he die, because he does not agree in the kingdom with an associate; and afterwards I will make thine enemies thy footstool,” to which is subjoined חנא, thus, “The Lord said in his word that he would give me the dominion because I was intent upon the doctrine of the law of his right hand: wait till I make thine enemy the footstool of thy feet.” Deviations from the Masoretic text are numerous. On the whole, the linguistic character of this Targum corresponds with that on Job, and resembles that of the Jerusalem Targum. It abounds in Greek words; thus, besides the ἀγγελοι, occurring also in Job, we meet with δῶρον, xx, 4; πέλαιος, xlii, 3; κύριος, liii, 1, and xcvi, 10; νῆσος, lxxii, 10; παρῆτα, lviii, 12; κύριος, lxxiii, 13; ὄχλος, lxxxix, 7; συνείριον, lvii, 32; χαλκωμα, xviii, 34, etc. According to Bacher, *Das Targum zu den Psalmen*, in Grätz's *Monatsschrift*, 1872, p. 408-416; 463-473, the author of this Targum is the same as that on Job. Davidson, in Kitto's *Cyclop.* s.v. “Targum,” thinks that, “like the Targum on Job, this one is an accumulation of expositions extending over centuries.” The Targum on the Psalms was printed in Justiniani's Polyglot Psalter (Genoa, 1516), and in the Hexaglot edition of the Psalter, published at Rostock, 1643. It is also printed in the latest Rabbinical Bible (Warsaw, 1875). The Antwerp and following Polyglots (1572, 1645, 1657) contain the Latin version of Arias Montanus. From the Codex Reuchlini it was published by Lagarde in his *Hagiographa Chaldaica* (Leips. 1873), and republished by Nestle in his *Psalterium Tetraglotum* (Tub. 1877-79).

3. *The Targum on Proverbs*.—This Targum is not Haggadic, and adheres more closely to the original text. Its remarkable agreement with the Syriac version has often been noticed—an agreement which

extends even to the choice and position of words, comp. i, 1-6, 8, 10, 12, 13; ii, 9, 10, 13-15; iii, 2-9; iv, 1-3, 26; v, 1, 2, 4, 5; viii, 27; x, 8-5; xxvi, 1; xxvii, 2, 5, 6, 8; xxix, 5, 6; xxxi, 31. Dathe, in his *De Ratione Consensus Versionis Chaldaicae et Syriacae Proverborum Solomonis* (Lips. 1764), was the first who gave special attention to this fact, and came to the conclusion that the Chaldean interpreter was dependent on the Syriac. He endeavors to prove his position by many pertinent arguments, such as that the Syriac explains Aramaean departures from the Hebrew most naturally, and that many Syriacisms in words, forms, and orthography appear in the version which are otherwise unknown to Chaldean, or at least are very rare. Eichhorn and Volck take the same view. Hävernick denies the use of the one by the other, endeavoring to account for their similarity by the cognate dialects in which both are written, the identity of country in which they had their origin, and their literality. Davidson, in Kitto's *Cyclopædia*, is inclined to believe that, the Targum having been made in Syria, the Syriac as well as the Hebrew was consulted, or rather the Greek through the medium of the Syriac. While the Hebrew was the basis, the Syriac was freely used. Different entirely is the opinion of Maybaum, who takes the opposite ground to that of Dathe, Eichhorn, and others. He believes that the Syriac interpreter was dependent on the Chaldean. The statements in the art. SYRIAC VERSION, ITS RELATION TO THE SEPTUAGINT AND CHALDEE, in this *Cyclopædia*, confirm this view. The greatest obstacle in all these disquisitions is the want of a critical text, and Maybaum, who compared the different readings together with an ancient codex preserved at Breslau, has come to the conclusion that Dathe's evidence is based upon corrupt readings. As to the original language of this Targum, Dathe (*op. cit.* p. 125) expresses it as his opinion that it was originally written in Syriac, the Chaldaisms which we find at present having been interpolated by Jews: “Nempe Judei utebantur versionibus Syriacis, quas legere atque intelligere ob summam utriusque linguae consensionem poterant. Sed mutabant eas passim, partim ad suae dialecti proprietatem, partim ad lectionem textus Hebraei inter eos receptam.” His hypothesis is based upon the fact that the Chaldean in xviii, 22 agrees with the Hebrew מִצָּה אִשָּׁה מִצָּה טוֹב, and while the other versions read אִשָּׁה טוֹבָה after אִשָּׁה, the Chaldean agrees with the Hebrew. But it is evident that because the word is wanting in one MS., this inference cannot be drawn concerning all others. The fact in the matter is, that only in Walton's edition does the Chaldean agree with the Hebrew text; while others, as Dathe himself admits, have the word טוֹבָה. And, after all, how is it that the Chaldean so often deviates from the Masoretic text? Whence is it that so many Chaldaisms are found even in those codices which, in the passage quoted above, do not agree with the Masoretic text? The answer is that, as the Chaldaisms in our Targum are as original as the Syriacisms, we have here evidently to do with a mixed dialect; and from the analysis given on the linguistic peculiarities, Maybaum comes to the conclusion that *the language of the Targum on Proverbs is Syro-Chaldaic, and the original language of the author*. The relation of the Chaldean to the Syriac version having already been treated at some length in the art. SYRIAC VERSION, ITS RELATION TO THE SEPTUAGINT AND CHALDEE, we can only refer to it. If the hypothesis of Maybaum, which we have adopted, be true, viz. that the Syriac depended upon the Chaldean, not *vice versa*—for even Davidson admits that “a uniform dependence of the Aramaean upon the Syriac cannot be sustained”—the Targum on Proverbs must have existed at a very early period; at any rate, Davidson acknowledges that the Targum on Proverbs is older than those on Job and Psalms, in this respect following Zunz. This being so, we do not err in assuming that the Targum on Proverbs

belongs to the 2d or 3d century. It is generally found in the Polyglot and Rabbinical Bibles. It was translated into Latin by Alphonso de Zamora and John Mercier. See, besides Dathe's treatise, already mentioned, Maybaum, *Ueber die Sprache des Targum zu den Sprüchen und dessen Verhältnis zum Syrer*, in Merx's *Archiv für wissenschaftliche Forschung des Alten Testaments*, ii, 66 sq.

4. The *Targum on the Five Megilloth*, i. e. on Ruth, Esther, Ecclesiastes, Canticles, and the Lamentations, is, according to Zunz, a Midrashic paraphrase, exceedingly loose and free in character, containing legends, fables, allusions to Jewish history, and many fanciful additions. The whole bears the impress of a date considerably posterior to the Talmudic time, and is written in an intermediate dialect between the West Aramæan of Job, Psalms, and Proverbs, and the East Aramæan of the Babylonian Talmud. The least Haggadic is Ruth, the most rhapsodical that of Canticles. Delitzsch (*Gesch. d. jüd. Poesie*, p. 135) thinks that "the Targums on the five Megilloth are the most beautiful national works of art, through which there runs the golden thread of Scripture, and which are held together only by the unity of the idea." Whether these Targums are the work of one or different persons cannot be well decided. The former is the opinion of Zunz, Volck, and Deutsch, the latter that of Davidson.

(1.) The *Targum on Ruth* was published separately with a Latin translation and scholia by John Mercier (Paris, 1564), and the following specimen will give a fair idea of the same: Ruth ii, 10, 11, "Why have I found pity in thine eyes to know me, and I of a strange people, of the daughters of Moab, and of a people who are not clean to enter into the Church of the Lord? And Boaz answered and said to her, In telling it has been told me by the saying of the wise men, that when the Lord decreed, he did not decree respecting women, but men; and it was said to me in prophecy that kings and prophets are about to spring from thee on account of the good thou hast done," etc.

(2.) The *paraphrase on Lamentations* is more Midrashic than that on Ruth, but of the same type, being copiously interwoven with pieces of history, allegory, fables, reflections, etc.

(3.) The *paraphrase on Ecclesiastes* is more Midrashic than the former, the author having given a free rein to his imagination and made copious insertions. The following verses will best illustrate the character of this paraphrase. In i, 2, we read:

"When Solomon the king of Israel foresaw, by the spirit of prophecy, that the kingdom of Rehoboam his son would be divided with Jeroboam the son of Nebat, and that Jerusalem and the holy temple would be destroyed, and that the people of Israel would be led into captivity, he said, by the Divine Word, Vanity of vanities is this world: vanity of vanities is all which I and my father, David, have labored for, all of it is vanity . . . (ver. 12, 13). When king Solomon was sitting upon the throne of his kingdom, his heart became very proud of his riches, and he transgressed the Word of God, and he gathered many horses and chariots and riders, and he amassed much gold and silver, and he married for foreign nations, whereupon the anger of the Lord was kindled against him; and he sent to him Ashmoda, the king of the demons, who drove him from the throne of his kingdom, and took away the ring from his hand, in order that he should roam and wander about in the world to reprove it; and he went about in the provincial towns and the cities of the land of Israel, weeping and lamenting, and saying, I am Coheleth, whose name was formerly called Solomon, who was king over Israel in Jerusalem: and I gave my heart to ask instruction of God at the time when he appeared unto me in Gibeon, to try me, and to ask me what I desire of him; and I asked nothing of him except wisdom, to know the difference between good and evil, and knowledge of whatsoever was done under the sun in this world, and I saw all the works of the wicked children of men—a sad business which God gave to the children of men to be afflicted by it."

As this Targum has been translated into English by Ginsburg, in his *Commentary on Ecclesiastes* (London, 1861), the reader, by perusing the same, will be enabled to judge for himself better than by any extracts.

(4.) The *Targum on Canticles* is the most Haggadic of all, and hardly deserves the name of a paraphrase, because the words of the original are completely covered by extravagant and inflated expressions ("nugæ atque frivolitates") which refer to another subject. "The paraphrast has indulged in the greatest license, and allowed his imagination to run riot in a multiplicity of ways." He has composed a panegyric on his people, describing prophetically the history of the Jewish nation, beginning with their exode from Egypt, and detailing their doings and sufferings down to the coming of the Messiah and the building of the third Temple. Thus, according to this allegory, i, 3 relates Jehovah's fame which went abroad in consequence of the wonders he wrought when bringing the Israelites out of Egypt; ver. 12 describes the departure of Moses to receive the two tables of stone, and how the Israelites in the meantime made the golden calf; ver. 14 particularizes the pardon of that sin and the erection of the tabernacle; iii, 6-11 refers to the passage of the Israelites, under the leadership of Joshua, over the Jordan, their attacking and conquering the Canaanites, and the building of Solomon's Temple; v, 2 describes the Babylonian captivity; vi, 2 represents the deliverance of Israel through Cyrus, and the building of the second Temple; ver. 7, etc., names the battles of the Maccabees; vii, 11, 12 represents the present dispersion of the Jews, and their future anxiety to learn the time of their restoration; viii, 5, etc., describes the resurrection of the dead, the final ingathering of Israel, the building of the third Temple, etc.

The very first verse of this Targum reads thus:

"The songs and praises which Solomon the prophet, king of Israel, sang by the spirit of prophecy, before God, the Lord of the whole world. Ten songs were sung in this world, but this song is the most celebrated of them all. The first song Adam sang when his sins were forgiven him, and when the Sabbath-day came and protected him he opened his mouth and said, 'A song for the Sabbath-day,' etc. (Psa. xcii). The second song Moses and the children of Israel sang when the Lord of the world divided the Red Sea for them. They all opened their mouths and sang as one man the song as it is written, 'Then sang Moses and the children of Israel' (Exod. xv, 1). The third song the children of Israel sang when the well of water was given to them, as it is written, 'Then sang Israel' (Numb. xxi, 17). The fourth song Moses the prophet sang when his time came to depart from this world, in which he reproved the people of the house of Israel, as it is written, 'Give ear, O heavens, and I will speak' (Deut. xxxii, 1). The fifth song Joshua the son of Nun sang when he waged war in Gibeon, and the sun and moon stood still for him thirty-six hours; and when they left off singing their song, he himself opened his mouth and sang this song, as it is written, 'Then sang Joshua before the Lord' (Josh. x, 12). The sixth song Barak and Deborah sang in the day when the Lord delivered Sisera and his army into the hands of the children of Israel, as it is written, 'Then sang Deborah,' etc. (Judg. v, 11). The seventh song Hannah sang when a son was given her by the Lord, as it is written, 'And Hannah prayed prophetically and said' (1 Sam. ii, 1, and the Targum, *ad loc.*). The eighth song David the son of Israel sang for all the wonders which the Lord did for him. He opened his mouth and sang a hymn, as it is written, 'And David sang in prophecy before the Lord' (2 Sam. xxii, 1, and the Targum, *ad loc.*). The ninth song Solomon the king of Israel sang by the Holy Spirit before God, the Lord of the whole world. And the tenth song the children of the captivity shall sing when they shall be delivered from their captivity, as it is written and declared by Isaiah the prophet, 'This song shall be unto you for joy, as in the night in which the feast of the Passover is celebrated; and gladness of heart as when the people go to appear before the Lord three times in the year, with all kinds of music, and with the sound of the timbrel, to go up to the mountain of the Lord, and to worship before the Lord the mighty one of Israel' (Isa. xxx, 29)."

From this specimen it will be seen how far the learned Broughton was correct in saying that the paraphrase "is worth our study, both for delight and profit." This Targum is found in the Rabbinical Bibles; it has been translated into Latin, and is also accessible to English readers in the translation of Gill, at the end of his *Commentary on the Song of Solomon* (Lond. 1751), p. 535 sq.

(5.) The *Targum*, or rather *Targums*, on *Esther*.—The book of Esther, enjoying, both through its story-like form and the early injunction of its being read or

heard by every one on the Feast of Purim, a great circulation and popularity, has been targumized many times. One translation of concise form, and adhering closely to the text, occurs in the Antwerp Polyglot (vol. iii); it was issued enlarged with glosses by Tailer in *Targum Prius et Posterius in Esther*, studiis F. Taileri (Lond. 1655), and forms the *Targum Prius* which is contained in the London Polyglot. Much more prolix, and amplifying still more the legends of this Targum (comp. i, 2, 11; ii, 5, 7; iii, 1; v, 14, etc.) is the *Targum Posterius* in Tailer, it being "a collection of Eastern romances, broken up and arranged to the single verses; of gorgeous hues and extravagant imagination, such as are to be met with in the *Adsharib* or *Chamis*, or any Eastern collection of legends and tales." Its final redaction probably belongs to the 11th century. This is the view of Dr. Munk, the latest editor of this second Targum, one of the tales of which runs as follows:

"One day when the king (Solomon) was again full of wine, he commanded that all wild animals, the fowls of the air, and the creeping animals of the earth, as well as the devils, dæmons, and spirits, be brought to him, that they might dance before him, and behold, with all the kings who were with him, his glory. The royal scribe called them by their name, and they all congregated before the king, with the exception of the wild cock. At this the king angrily commanded that he should be sought for, and when found, should be brought in, intending to kill him. Then said the wild cock to the king, My lord king, give heed and bear my words! For three months I weighed in my mind, and flew about in the whole world in search of a town which does not obey thee. I saw then a city in the East, of the name of *Kitor*, in which are many people, and a woman governs them all; she is called queen of Sheba. If it please thee, my lord king, I shall go to that city, bind their kings in chains, and their rulers with iron fetters, and bring them hither. As it pleased the king, writers were called who wrote letters and bound them to the wings of the wild cock. He came to the queen, who, observing the letter tied to the wing, loosened it and read the following contents: From me, King Solomon, greeting to thee and to thy princes! Thou knowest well that God has made me king over the beasts of the field, over the birds of heaven, over dæmons, spirits, and goblins. The kings from all regions of the earth approach me with homage: wilt thou do this, thou shalt have great honor; if not, I will send upon thee kings, legions, and horsemen. The kings are the beasts of the field; the horsemen the birds of heaven, the hosts, dæmons and spirits; the goblins are the legions who shall strangle you in your beds. When the queen had read this, she rent her garments and called for the elders and lords, saying, Know ye what king Solomon has sent to me? They answered, We neither know nor esteem him. The queen, however, trusting them not, called for sailors and sent presents to the king, and after three years she came herself. The king, on hearing of her arrival, sat in a crystal hall to receive her, which made her fancy that he was sitting in water; she therefore uncovered her feet to pass through. On seeing his glory, she said, May the Lord thy God be praised who has found pleasure in thee and made thee sit on the throne to exercise mercy and justice."

We have purposely selected this piece from the first chapter, because it is also found in an abridged form in the Koran (sura xxvii). With a commentary, the second Targum is found in the Warsaw Rabbinical Bible. A separate edition, with various readings, notes, etc., was published by Munk, *Targum Scheni zum Buche Esther* (Berlin, 1876). It has lately been translated by Cassel, in an appendix to his *Das Buch Esther. Ein Beitrag zur Geschichte des Morgenlandes* (ibid. 1878). It has been treated in an essay by Reiss, *Das Targum Scheni zu dem Buche Esther*, in the *Monatschrift* edited by Grätz, 1876, p. 161 sq., 276 sq., 398 sq.

5. *The Targum on the Books of Chronicles*.—This is preserved in three codices. The oldest, bearing the date of 1294, is in the Vatican, known as *Cod. Urb. I.*, and is still awaiting a critical edition or perusal. A second codex, of the year 1343, belonging to the Erfurt Library, was published by Beck (Augsburg, 1680-83, 2 vols.), and edited with a Latin translation and learned annotations. The Erfurt MS. has many chasms, especially in the first fourteen chapters. The third codex, of the year 1347, and belonging to the University of Cambridge, was published by David Wilkins (Amster-

1715). Here the text is complete, so that the *lacunæ* in Beck's edition are filled. Like its predecessor, it has also a Latin version, but there are no notes. Great as was Wilkins's ability for editing this Targum, yet it speaks badly for his knowledge that he has put on the title-page R. Joseph as the author (though Beck was of the same opinion), and that he has made him rector of the academy in *Syria*, instead of *Sora* in *Babylonia*. Wilkins's edition was lately republished from a copy found at Prague by Dr. Rahmer, under the title *תרגום של דברי הימים* (Thorn, 1866), and the deviations from Beck's edition are given in notes. We cannot enter here upon a comparison of the Erfurt codex with that of Cambridge. As to the authorship of this Targum, its ascription to R. Joseph the Blind must be regarded as exploded. Whether it is the work of one author or of more cannot now be decided. Language, style, manner, and Haggadic paraphrase show its Palestinian origin. Zunz remarks that it sometimes transcribes the Jerusalem Targum on the Pentateuch verbally, as in the genealogical table of the first chapter (comp. ver. 51 with the Jerusalem Targum on Gen. xxxvi, 39). So, also, in the psalm passages in 1 Chron. xvi, its words often coincide with the Targum on Psa. cv and xcvi. The origin of this Targum cannot be put earlier than the 8th century; or, as the most recent writer on this Targum thinks, the older text, as preserved in the Erfurt codex, belongs to the middle of the 8th century, and the later, as preserved in the Cambridge codex, to the beginning of the 9th. Owing to the late origin of this Targum, we must not be surprised at finding the name of Hungary occurring in it, as well as some other foreign words, besides many fables, especially in the explanation of proper names. For critical purposes both editions must be used—the first, *Paraphrasis Chaldaica Libr. Chronicorum, cura M. F. Beckii*, for the learned notes; the second, *Paraphrasis . . . auctore R. Josepho*, etc., for the more correct and complete text. The writer of the art, "Targum" in Smith's *Dict. of the Bible* states that "the science of exegesis will profit little by it" (this Targum). What we know of the subject induces us to hold an opposite opinion (see Frankel, *Monatsschrift*, 1867, p. 349 sq.; but, more especially, Rosenberg, *Das Targum zur Chronik*, in Geiger's *Jüdische Zeitschrift*, 1870, p. 72 sq., 135 sq., 268 sq.).

6. *The Targum on Daniel*.—The existence of this work was first noticed by Munk, who thinks that he found it in a MS. in the Imperial Library at Paris (No. 45 du Fonds de St.-Germain-des-Prés). The MS., however, contains only a Persian Targum, giving an apocryphal account of Daniel. According to the learned writer, this *תרגום דניאל*, or *History of Daniel*, was taken from a Targum on Daniel in Chaldee. The first words are written in Chaldee, they are then repeated in Persian, and the history continues in the latter language. After several legends known from other Targums, follows a long prophecy of Daniel, from which the book is shown to have been written after the first Crusade. Mohammed and his successors are mentioned, also a king who, coming from Europe (*מלך רומיאה*), will go to Damascus, and kill the Ishmaelitic (Mohammedan) kings and princes; he will break down the minarets (*מנארה*), destroy the mosques (*מסגדה*), and no one will after that dare to pronounce the name of the Profane (*פסול*=Mohammed). The Jews will also have to suffer great misfortunes (as, indeed, the knightly Crusaders won their spurs by dastardly murdering the helpless masses—men, women, and children—in the Ghettos along the Rhine and elsewhere, before they started to deliver the holy tomb). By a sudden transition, the prophet then passes on to the "Messiah, son of Joseph," to Gog and Magog, and to the "true Messiah, the son of David." Munk rightly concludes that the book must have been composed in the 12th century, when Christian kings reigned for a brief period

over Jerusalem (*Notice sur Saadia* [Par. 1838], p. 82). According to the description here given, there can be no doubt that it is the same which Zotenberg published some years ago, in Persian, with a German translation, in Merx's *Archiv*, i, 385 sq., and beginning thus: "History of Daniel (peace be upon him). I am Daniel, of the children of Jeconiah, king of the house of Judah." Davidson says, "We must express our doubts about such a Chaldee paraphrase on Daniel, in the absence of all proof that the Persian was made from the Chaldee; for a few Chaldee words at the beginning are no argument in favor of it. All that Munk communicates—i. e. part of a page—is insufficient to warrant us in accepting the fact. Yet Steinschneider has referred to 'a Targum on Daniel,' simply on the authority of Munk's notice (*Catalogus Librorum Hebræorum in Bibliotheca Bodleiana*). No Targum upon Daniel is extant, so far as we yet know, and it is very doubtful whether one was ever made. The reason assigned in the Talmud for not rendering the book into Chaldee is that it reveals the precise time of the Messiah's advent. A good part of the book is already in Chaldee." To this it may be answered that, at the time when Davidson wrote, this Targum was not yet published, otherwise he would have thought differently. Its contents show that the original Chaldee was the basis of it. A number of Hebrew words occur in it, and it closes with quoting Psa. cxlvii, 2.

7. There is not any Targum, so far as is known, upon Ezra and Nehemiah. Part of Ezra is already Chaldee, and Nehemiah was counted with it as one book.

8. To the Roman edition of the Sept. of Daniel, published in 1772, a Chaldee version is added of the Apocryphal pieces in Esther. This has been printed by De Rossi, accompanied by a Latin version, remarks, and dissertations (*Specimen Variarum Lectioum Sacri Textus et Chaldaica Estheris Aditamenta*, etc. [Tib. 1783, 8vo]).

An edition of the Chaldee Hagiographa was published by Lagarde (Leips. 1873).

VI. *Fragmentary Targums on the Other Books.*—According to Zunz, the Jerusalem Targum—or rather, as it should be called, the Palestinian one—extended to the prophetic books also, and he justifies his opinion by the following particulars, which we give in his order: Abudraham cites a Jerusalem Targum on 1 Sam. ix, 13, and Kimchi has preserved several passages from it on Judges (xi, 1, consisting of 47 words), on Samuel (i, 17, 18: 106 words), and Kings (i, 22, 21: 68 words; ii, 4, 1: 174 words; iv, 6: 55 words; ver. 7: 72 words; xiii, 21: 9 words), under the simple name of *Tosephthah*, i. e. Addition, or Additional Targum. Luzzato has also lately found fragments of the same, under the names "Targum of Palestine," "Targum of Jerushalmi," "Another Reading," etc., in an African codex written A.M. 5247=A.D. 1487, viz., on 1 Sam. xviii, 19; 2 Sam. xii, 12; 1 Kings v, 9, 11, 13; x, 18, 26; xiv, 13; on Hos. i, 1; Obad. i, 1. On Isaiah (ch. lxvi), Rashi, Abudraham (liv, 11), and Farissol (lxvi) quote it, agreeing in part with a fragment of the Targum on this prophet extant in Cod. Urbin. Vatican. No. 1, containing about 190 words, and beginning, "Prophecy of Isaiah, which he prophesied at the end of his prophecy in the days of Manasseh the son of Hezekiah, the king of the tribe of the house of Judah, on the 17th of Tamuz, in the hour when Manasseh set up an idol in the Temple," etc. Isaiah predicts in this his own violent death. Parts of this Targum are also found in Hebrew, in *Pesikthah Rabbathi*, 6 a, and *Yalkut Isa.* 58 d. A Jerusalem Targum on Jeremiah is mentioned by Kimchi; on Ezekiel by R. Simon, Nathan (Aruch), and likewise by Kimchi, who also speaks of a further additional Targum on Jonathan for this book. A Targum Jerushalmi on Micah is known to Rashi, and of Zechariah a fragment has been published by Bruns (*Repert.* pt. xv, p. 174) from a Reuchlinian MS. (Cod. Kennic. 154), written in 1106. The passage, found as a marginal gloss to Zech. xii, 10, reads as follows:

"*Targum Jerushalmi.*—And I shall pour out upon the house of David and the inhabitants of Jerusalem the spirit of prophecy and of prayer for truth. And after this shall go forth Messiah the Son of Ephraim to wage war against Gog. And Gog will kill him before the city of Jerusalem. They will look up to me and they will ask me wherefore the heathens have killed Messiah the Son of Ephraim. They will then mourn over him as mourn father and mother over an only son, and they will wail over him as one wails over a first-born."

A Targum Jerushalmi on the third chapter of Habakkuk, quoted by Rashi, is mentioned by De Rossi (Cod. 265 and 405, both of the 13th century).

To these quotations, which led Zupz to draw the inference that the Jerusalem Targum extended to the prophetic books also, a large number of fragments and variations must now be added since the publication of the Reuchlinian codex by Lagarde. These fragments and variations deviate from the common translation, and are introduced by five different designations, as יאיה דמחורמי, לישנא אחרינא, ספראחר, חרי, פליג, ירוש. These additions, as found in the Reuchlinian codex, have been analyzed in a very scholarly manner by Dr. Bacher, in the *Zeitschrift der deutschen morgenl. Gesellschaft*, 1874, xxviii, 1 sq., and they extend to the following books, viz.: Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel, Hosea, Joel, Amos, Jonah, Micah, Habakkuk, Zephaniah, and Zechariah. Obadiah, Nahum, Haggai, and Malachi are not included. Zunz, after referring to the conjecture that the Jerusalem Targum on the prophets embraced nothing more than the Haphtaroth, or lessons, remarks that the idea is untenable, because the expressions of the authors who allude to it go to show that they had seen Targums upon entire books (*Gottesd. Vorträge*, p. 78). This may be so; but the existence of an entire Targum of Palestine on all the prophets is problematical. We have seen above, if the Reuchlinian MS. may be taken as a standard, that on four prophets, viz. Obadiah, Nahum, Haggai, and Malachi, such fragments are not given. Some books may have received such a paraphrase; on others, and those the great majority of the prophetic books, there is reason to doubt its existence. It is more probable that *portions* were treated paraphrastically in the spirit of the later Haggadah—portions selected on no definite principle, but adopted by the fancy or liking of paraphrasts; and we are the more justified in this conclusion when comparing Dr. Bacher's parallels from the Talmud and Midrash with these fragmentary additions. Deutsch, the writer of the art. "Targum" in Smith's *Dict. of the Bible*, thinks "the Babylonian version = the Jonathan Targum—though paraphrastic, did not satisfy the apparently more imaginative Palestinian public. Thus from heaped-up additions and marginal glosses, the step to a total rewriting of the entire codex in the manner and taste of the later times and the different locality was easy enough." Be it as it may, this question will always remain, as Dr. Bacher says, "one of the darkest points in the disquisition of the Targum on the prophets."

VII. *Character and Value of the Targums in General.*—There is nothing to indicate that the Targums were written at first with vowels. Buxtorf endeavored to correct the punctuation and bring it as near as possible to the standard of that in Daniel and Ezra, for which some censured him, though, we believe, unjustly. It is no reproach to his memory to say that he did not perfect their vocalization. As there is at present no critical text of the Targums, they can only be carefully employed in the criticism of the Hebrew original, although they show the substantial integrity of the Masoretic text. They may be advantageously used in suggesting readings of some importance and value. Perhaps they are more useful in interpretation than the lower criticism. On the whole, Richard Simon's view of the Targums deserves to be noted here. In his *Hist. Crit. Vet. Test.* lib. ii, c. 18, he says, "Omnes istæ paraphrases, præter illam Onkelosi et Jonathanis, non magnæ mihi utilitatæ."

esse videntur, nec forsant multum e re fecit, illas curiose quæsiisse. Non quanta tamen multis existimatur, illarum utilitas: ex adverso Judæi ex illis arma adversus Christianos deprimunt, sibi fingentes, nobis ipsorum superstitiones aniles et absurdas probari, quasi veteribus versionibus quibus conjunguntur a nobis æquiparentur. Præterea videntur Judaici ritus et cerimonie iis magis quam fides Christiana confirmari: incerta itaque et anceps ex illis ducta contra Judæos victoria. Quid quod quæ nostræ fidei faventia credimus, pleraque veræ sunt allegoriæ, quas non operum verbis alio convertere; neque enim religio allegoriis probatur."

VIII. *Literature*.—Since we have already mentioned under the different heads the special literature, we will here name the works on the Targumim in general. Here belong—besides the general introductions to the Old Test. of Eichhorn, Hävernicks, De Wette, Bleek, Kaulen, and Kleinert—Prideaux, *Connection* (ed. Wheeler, Lond. 1865), ii, 443 sq.; Walton, *Prolegomena* (ed. Dathe), p. 61–83; Smith, *Diatriba de Chaldaicis Paraphrasibus*; Wolf, *Bibl. Hebræa*, ii, 1135–1191; iv, 730–734; Zunz, *Die gottesd. Vorträge der Juden* (Berlin, 1832), p. 61–83; Gröner, *Das Jahrhundert des Heils*, i, 36–59; Fürst, *Literaturblatt des Orients*, 1840, Nos. 44–47; id. *Bibl. Jud.* ii, 105–107; iii, 48; Frankel, *Einiges zu den Targumim*, in the *Zeitschrift für die religiösen Interessen des Judenth.* 1846, p. 110–120; Herzfeld, *Gesch. d. Volkes Israel*, iii, 61 sq.; 551 sq.; Geiger, *Urschrift und Übersetzungen der Bibel*, p. 162–167; Volck, s. v. "Targumim," in Herzog's *Real-Encyclop.* xv, 672–683; Deutsch, s. v. "Targum," in Smith's *Dict. of the Bible*; Davidson, id. in *Kitto's Cyclopædia*; id. *Biblical Criticism*, i, 224 sq.; Langen, *Das Judenth. in Palästina*, p. 70–72, 209–218, 268 sq., 418 sq.; Nöldeke, *Die alttestamentliche Literatur*, p. 255–262; Schürer, *Lehrbuch der neutestamentlichen Zeitgeschichte* (Leips. 1874), p. 476 sq. The best lexicon on the Targumim is that of Levy, *Chaldaisches Wörterbuch über die Targumim* (ibid. 1867); the latest Aramean grammar is that of Lerner, *ספר דקדוק לשון ארמית* (Warsaw, 1876). See CHALDEE LANGUAGE. (B. P.)

**Tarnoczy, Maximilian von**, a Roman Catholic ecclesiastic, was born Oct. 24, 1806, at Schwaz, in Tyrol. Having graduated at the gymnasium at Innsbruck, he entered, in 1824, the clerical seminary at Salzburg, and received the first orders in 1829. He completed his studies at Vienna, and, after having been honored in 1832 with the theological doctorate, he was appointed professor of dogmatics at Salzburg. In 1844 he became a member of the Salzburg chapter, and from that time, being the trusty adviser of the cardinal and prince-archbishop Schwarzenberg, he took an active part in ecclesiastical affairs. When Schwarzenberg received the archbishopric of Prague in 1850, Tarnoczy was appointed his successor at Salzburg, and was consecrated June 1, 1851, for that office. In his new position he labored for twenty-five years, and his labors were acknowledged by Pius IX, who made him a member of the college of cardinals, Dec. 22, 1873. After a long illness, Tarnoczy died at Salzburg, April 4, 1876. See the *Literarischer Handweiser*, 1876, p. 285. (B. P.)

**Tarnov, Johann**, a German doctor and professor of theology, was born April 19, 1586, at Grevismühlen, in Mecklenburg, and died Jan. 22, 1629, at Rostock, where he had lectured since 1614. He wrote: *Declaratio eorum quæ ad Dicti Esai. c. 45 v. 8 Sensu Literali Investig. in Ezercht. Biblic. allata sunt* (Rostock, 1621):—*Ezercht. Biblic. Libri IV in quibus Verus et Genuinus Sensus Locorum Sacrorum Multorum Inquiruntur ac Defenduntur* (2d ed. ibid. 1621, and often):—*In Threnos Jeremiæ Comment.* (Hamburg, 1707):—*In Prophetas Minores Comm.* (Leipsic, 1688, 1706):—*In Prophetam Haggeum Comm.* (Rostock, 1624):—*In Prophetam Malachiam Comm.* (ibid. 1624):—*Comment. in Epistol. Pauli ad Ephes., Philipp., Coloss., et Thessal.* (ibid. 1636). See Winer, *Handbuch der theol. Literatur*, i, 188, 220, 222,

253; Fürst, *Bibl. Jud.* iii, 411; Diestel, *Geschichte des Alten Testaments*, p. 399, 456. (B. P.)

**Tarnov, Paul**, a German doctor and professor of theology, uncle of Johann, was born April 29, 1562, at Grevismühlen, and died at Rostock, March 6, 1633. He is the author of, *In Joann. Evang. Commentarius* (Rostock, 1629):—*Libri III de Conjugio* (ibid. 1614):—*De Sacros. Ministerio Libri III* (ibid. 1623). See Winer, *Handbuch der theol. Literatur*, i, 248, 460, 464; ii, 797. (B. P.)

**Tar'pelite** (Chald. only in the plur. emphat. *Tar-pelayé*, ܛܪܦܠܝܬܐ; Sept. *Tαρφαλαῖοι* v. r. *Tαρφαλλῆαιοι*; Vulg. *Tharphalei*), the Aramean designation of a race of colonists who were planted in the cities of Samaria after the captivity of the northern kingdom of Israel (Ezra iv, 9). Junius and others have found a kind of resemblance in name to the Tarpelites in the *Tapyri* (Ταπυριοι, Ptolemy, vi, 2, 6; Arrian, *Alex.* iii, 8, 7; *Τάπυροι*, Strabo, xi, 511, 515, 520, 523), a tribe of Media who dwelt eastward of Elymais, but the resemblance is scarcely more than apparent. Others, with as little probability, have sought to recognise the Tarpelites in the *Tarpeles* (Ταρπηρες, Strabo, xi, 495), a Mæotic race. In the Peshito-Syriac the resemblance is greater, for they are there called *Tarpoyé*. Fürst (*Handb.* s. v.) says in no case can *Tarpel*, the country of the Tarpelites, be the Phœnician *Tripolis*; although Schwarz (*Palest.* p. 62) assumes this.

**Tarphon**, or **Tryphon**, a Jewish rabbi of the 2d century A.D., belonged to a sacerdotal family. He was a friend and contemporary of rabbi Akiba, and for some time rector of the school at Lydda. He was noted as a bitter enemy of Christianity, and declared that, although the gospels and the other writings of the "Minim," or Christians, contained the sacred name of the Deity, they ought to be burned; that heathenism was less dangerous than Christianity; that heathens offended from ignorance, while Christians did so with full knowledge; and that he would prefer seeking shelter in a heathen temple rather than in a meeting-place of the Minim (Talm. *Shabbath*, fol. 116, col. 1). This, his animosity against Christianity, induced some, as Lightfoot, Carpov, and others, to maintain that rabbi Tarphon is the same Trypho who is the interlocutor in Justin Martyr's Dialogue, an opinion which probably owes its origin to Eusebius (*Ecc. Hist.* iv, 18), but which has little or no probability in its defence. In the *Pirke Aboth*, ii, 20 sq., we have the recorded maxim of this sage: "The day is short, the labor vast; but the laborers are slothful, though the reward is great, and the Master presseth for despatch. It is not incumbent upon thee to complete the work, and yet thou art not at liberty to be idle about it. If thou hast studied the law much, great reward will be given thee; for faithful is thy employer, who will award to thee the hire of thy labor, and be aware that the award of the righteous will be in the future which is to come." See Basnage, *Histoire des Juifs* (Taylor's Eng. transl.), p. 524; De Rossi, *Dizionario Storico degli Autori Ebrei* (Hamburger's Germ. transl.), p. 321, s. v. "Tryfon;" Etheridge, *Introduction to Hebrew Literature*, p. 65; Friedländer, *Patristische und talmudische Studien* (Vienna, 1878), p. 136 sq., 147; Fürst, *Bibl. Jud.* iii, 449. (B. P.)

**Tarquini, Camillo**, an Italian Jesuit, was born Sept. 27, 1810, at Marta, near Montefiascone. He belonged to a noble family and studied at Rome. In 1837 he joined the Society of Jesus. From 1850 he was professor of canon law at the Collegium Romanum, and was one of the editors of the *Civiltà Cattolica*. Besides a number of monographs, he published *Juris Ecclesiastici Publici Institutiones* (Rome, 1862; 3d ed. 1873). He also wrote a grammar and lexicon on the ancient Etruscan language, which he left in manuscript. In 1873 he was made cardinal-deacon, and died Feb. 15, 1874. Tarquini was the first cardinal who, since 1713, was ap-

pointed from the members of the Society of Jesus. See the *Literarischer Handweiser*, 1863, p. 182; 1874, p. 176. (B. P.)

**Tarragona, Councils of.** These two councils were so called because they were held in the city of that name in Spain. This city (anciently *Tarraco*), capital of the province of the same name, is situated at the mouth of the Francoli, has a population of about 18,000, is the seat of an archbishop, and, besides other schools of learning, has an ecclesiastical seminary.

I. The first council of Tarragona was held in 516, during the reign of Theodoric, king of Italy, and guardian of Amalric, king of Spain. Ten bishops were present, and thirteen canons published.

3. Forbids usury among clerks.

4. Forbids bishops, priests, and clerks to judge any cause on Sundays; allows them to do so on other days, provided they do not interfere in criminal cases.

7. Directs that the priest or deacon appointed to any country parish shall remain there during his week (i. e. that the priest shall remain there one week, and then the deacon shall succeed him and keep his week) in order to celebrate divine service with the clerks; and that on *Saturday* all the clergy shall attend in order to begin the Sunday office. It also orders that matins and vespers shall be said daily.

11. Forbids monks to leave their convent in order to perform any clerical function without leave from their superior. See Mansi, *Conc.* iv, 1562.

II. The second council was held in 1242, by Peter the archbishop, against the Waldenses in Aragon. Part only of the acts remain. See Mansi, *Conc.* xi, 592.

**Tar'shish** (Heb. תַּרְשִׁישׁ, *Tarshish'*, subdved [Gesen.] or established [Fürst]; Sept. Ἰθάρις [but Καρχηδών in Isa. xxiii; Καρχηδόνιοι in Ezek.; Σάλασσα in Isa. ii, 16]; Vulg. usually *Tharsia*; A. V. "Tarshish," 1 Kings x, 22; xxii, 48; 1 Chron. vii, 10; once Heb. תַּרְשִׁישָׁה, *Tarshishah'*, 1 Chron. i, 7), the name of three men, of a country, and of a gem.

1. Second-named of the four sons of Javan, the son of Japheth (Gen. x, 4; 1 Chron. i, 7). B. C. post 2514. He may have been the founder of the city noticed below. See ETHNOLOGY.

2. Sixth-named of the seven sons of Bilhar, the grandson of Benjamin (1 Chron. vii, 10). B. C. post 1875.

3. Fourth-named of the seven "princes" of Persia in the time of Artaxerxes (Esth. i, 14). B. C. 483. As a Persian name the word stands in relation with *Teresh* (ii, 21; vi, 2), and with *Tirshatha*; all probably from the root *torsh*, *severe* (Gesenius, *Thesaur.* s. v.).

4. A famous port or region the location of which has been much disputed. Josephus (*Ant.* i, 6, 1) confounds it with *Tarsus* in Cilicia; and in the Sept. version of Isa. xxiii, 1, 10-14, it is rendered Καρχηδών, *Carthage*. A similar rendering is found in Ezek. xxvii, 12; xxxviii, 13, Καρχηδόνιοι, *Carthaginians*, an identification urged by Davis (*Carthage*, ch. i). As the Vulg. translates it by "sea" in the passage quoted above, so the Sept. in Isa. ii, 16 renders it Σαλάσσης, a translation followed by Saadias and Luther. The Targums adopt the same translation in some places, and Jerome apologizes for the blunder by saying that "the Hebrews thought Tharsis was their original term for sea; the noun in common use among them, *um*, being a Syriac one." In other places, as 1 Kings xxii, 48, and Jer. x, 9, the Targum gives the peculiar rendering אֲפִרְיָא, *Africa*. Most interpreters, however, are agreed that (with the possible exception of the passage in Chronicles) the allusion is to *Tartessus* in Spain. It seems to have been the source of the precious stone called by the same name.

In the great genealogical table (Gen. x, 4, 5) it is placed among the sons of Javan; "Elishah and Tarshish, Kittim and Dodanim. By these were the islands of the Gentiles divided." This refers the mind at once to the north-western parts of the Mediterranean.

To a similar conclusion does other scriptural language lead. In Psa. lxxii, 10 it is said, "The kings of Tarshish and of the isles shall bring presents;" and in 2 Chron. ix, 21 we read, "The king's (Solomon's) ships went to Tarshish with the servants of Hiram; every three years once came the ships of Tarshish bringing gold and silver, ivory, and apes and peacocks." Now Hiram's city, Tyre, lay on the Mediterranean coast, and it is easy to see how Solomon's vessels might be associated with his in a voyage towards the west to fetch merchandise. In Isa. lxvi, 19 we find Tarshish mentioned in a way which confirms this view: "And I will set a sign among them, and I will send those that escape of them unto the nations (or Gentiles); to Tarshish, Pul, and Lud that draw the bow, to Tubal and Javan, to the isles afar off." These passages make it clear that Tarshish lay at a distance from Judæa, and that that distance was in a north-westerly direction; and the mention of such names as Lud, Javan, and the isles carries the mind to the extreme north-west, and suggests Spain as the place for Tarshish. But Tarshish must have been on the sea-coast, for it was famous for its ships. "The ships of Tarshish" were celebrated under that designation, which may have been used in that wide sense in which we speak of an East-Indiaman, reference being made rather to the place whither the vessel traded than to that where it was built; or the phrase may have come to denote a particular kind of vessel, i. e. trading or merchant ships, from the celebrity of Tarshish as a commercial port (1 Kings x, 22; Psa. xlviii, 7; Isa. ii, 16; xxxiii, 1-14; lx, 9; Ezek. xxvii, 25). These six times do we meet with the phrase, ships or navy of Tarshish; which of itself shows how noted a seaport we have under consideration, if it does not prove also that in process of time the terms had come to describe vessels according to their occupation rather than their country, as we say "a slaver," denoting a ship engaged in the slave-trade (comp. Horat. "sævus Liburnis," *Carm.* i, 27; "Bithyna carina," i, 35; "trabe Cypria," i, 1). In Ezek. xxvii, 12-25 the place is described by its pursuits and its merchandise—"Tarshish (here again in connection with a western country, Javan, ver. 13) was thy (Tyre's) merchant, in all riches, with silver, iron, tin, and lead, they traded in thy fairs. The ships of Tarshish did sing of thee in thy market, and thou wast replenished and made very glorious in the midst of the seas." The last words are admirably descriptive of the south-western coast of Spain. How could a Hebrew poet better describe the locality where the songs of the sailors of Tarshish made the name of Tyre glorious? Let the reader turn to the map and cast his eye on the embouchure of the Guadalquivir, and say if this spot is not pre-eminently, when viewed from Palestine, "in the midst of the seas." There is a propriety, too, in the words found in Psa. xlviii, 7 (comp. Ezek. xxviii, 26), "Thou breakest the ships of Tarshish with an east wind," if we suppose merchant vessels working eastwardly up the Mediterranean towards Tyre, encountering an east, or rather north-east, gale, which is a very violent and destructive wind to this day. Jeremiah (x, 9) tells us that "silver spread into plates" was brought from Tarshish; and from the connection the silver appears to have been elaborately wrought; whence we infer that at one period there was in Tarshish the never-failing connection found between commerce, wealth, and art. An important testimony occurs in Ezek. xxxviii, 13, "Sheba and Dedan, and the merchants of Tarshish, with all the young lions thereof, shall say unto thee, Art thou come to take a spoil? to carry away silver and gold? to take away cattle and goods, to take a great spoil?" whence it is clear that Tarshish was an opulent place, abounding in cattle and goods, in silver and gold. We are not sure that the words "the young lions thereof" are intended to be taken literally. They may refer to the lion-hearted chiefs of the nation; but if they are understood as implying that lions were literally found in Tarshish, they

only concur with other parts of Scripture in showing that the name is to be taken in a wide acceptation, as denoting, besides modern Andalusia, those parts of Africa which lie near and opposite to Spain. Nor is it impossible that a part of the trade of Tarshish lay in these and in other animals; for we certainly know that Solomon's ships brought that prince apes and peacocks: the lions may have been caught in Africa and conveyed in ships of Tarshish to Tyre. Sheba and Dedan, however, are mentioned here in connection with Tarshish, and they were certainly Eastern countries, lying probably on the western side of the Persian Gulf in Arabia. But the object of the writer may have been to mention the countries placed at the extremities of the then known world—Tarshish on the west, Sheba and Dedan on the east. In Isa. xxiii, 1-14 we read, as a part of the burden of Tyre, that the ships of Tarshish are called on to howl at her destruction, because Tyre afforded them no longer a commercial port and a haven: words which entirely agree with the hypothesis that makes Tarshish a city on the seaboard of Spain, trading up the Mediterranean to Tyre. Nor are the words found in ver. 6 discordant—"Pass ye over to Tarshish; howl, ye inhabitants of the isles." Let us now turn to the book of Jonah (i, 1-3; iv, 2). The prophet was commanded to go and prophesy against Nineveh on the Tigris. For this he should, on quitting Jerusalem, have gone in an easterly direction; but he shunned the duty and fled. Of course he naturally fled in a direction the opposite of that in which the avoided object lay; he proceeded, in fact, to Tarshish. Tarshish, then, must have been to the west, and not to the east, of Jerusalem. In order to reach Tarshish, he went to Joppa and took ship for the place of his destination, thus still keeping in a westerly course and showing that Tarshish lay to the west. In Tarshish, indeed, placed in the extreme north-west, he might well expect to be distant enough from Nineveh. It is also worthy of notice that, when he arrived at Joppa, on the coast of Palestine, "he found a ship going to Tarshish;" which fact we can well understand if Tarshish lay to the west, but by no means if it lay on the Red Sea. See OPHIR.

Thus far all the passages cited agree, with more or less evidence, in fixing Tarshish somewhere in or near Spain. But in 2 Chron. xx, 36 it is recorded that Jehoshaphat, king of Judah, joined himself with Ahaziah, king of Israel, "to make ships to go to Tarshish, and they made the ships in Ezion-geber," that is, on the Elanitic gulf on the eastern arm of the Red Sea. If, then, these vessels built at Ezion-geber were to go to Tarshish, that place must lie on the eastern side of Palestine, instead of the western; for we cannot suppose they circumnavigated Africa; not because such a voyage was impossible, but because it was long and tedious and not likely to be taken when a nearer and safer way to Tarshish lay from the ports of the Palestinian coast. But in the parallel passage, found in 1 Kings xxii, 49, these vessels are described as "ships of Tarshish" (merchant vessels), which were intended to go to Ophir, not to Tarshish. This removes the difficulty at once, for Ophir was in the East, and accounts for the fact that the fleet was built on the Red Sea, since it was an eastern, not a western, voyage which was intended. The reference appears to be to the same eastern trade of which mention is made in x, 22, where we find Hiram and Solomon importing from the East in ships of Tarshish, or merchantmen, gold and silver, ivory, apes and peacocks. We have not space to enter into the critical questions which this contrariety between the books of Kings and Chronicles suggests for consideration; but we may remark that, in a case in which a diversity appears in the statements of these two authorities, no competently informed theologian could hesitate to give the preference to the former. The alternative of two places by the name of Tarshish, one in Spain and the other in India, was adopted by

Bochart, *Phaleg*, iii, 7, and has probably been the ordinary view of those who have perceived a difficulty in the passages of the Chronicles; but the above reconciliation, which was first suggested by Vitringa, has been adopted by the acutest Biblical critics of our own time, such as De Wette, *Introduction to the Old Testament* (Parker's translation, Boston, 1843), ii, 267; Winer, *Biblisches Realwörterbuch*, s. v.; Gesenius, *Thesaurus Linguae Heb. et Chald.* s. v.; and Ewald, *Geschichte des Volkes Israel* (1st ed.), iii, 76; and is acknowledged by Movers, *Ueber die Chronikeln* (1884), p. 254, and Hävernick, *Spezielle Einleitung in das Alte Testament* (1839), ii, 237.

It appears, then, clear, from this minute review of the scriptural accounts and allusions, that Tarshish was an old, celebrated, opulent, cultivated, commercial city, which carried on trade in the Mediterranean and with the seaports of Syria, especially Tyre and Joppa, and that it most probably lay on the extreme west of that sea. Was there, then, in ancient times any city in these parts which corresponded with these clearly ascertained facts? There was. Such was *Tartessus* in Spain, said to have been a Phœnician colony (Arrian, *Alex.* iii, 86), a fact which of itself would account for its intimate connection with Palestine and the Biblical narratives. As to the exact spot where Tartessus (so written originally) lay, authorities are not agreed, as the city had ceased to exist when geography began to receive attention; but it was not far from the Straits of Gibraltar, and near the mouth of the Guadalquivir, consequently at no great distance from the famous Granada of later days. The reader, however, must enlarge his notion beyond that of a mere city, which, how great soever, would scarcely correspond with the ideas of magnitude, affluence, and power that the Scriptures suggest. The name, which is of Phœnician origin, seems to denote the district of South-western Spain, comprising the several colonies which Tyre planted in that country, and so being equivalent to what we might designate Phœnician Spain. We are not, however, convinced that the opposite coast of Africa was not included, so that the word would denote to an inhabitant of Palestine the extreme western parts of the world. We seem, however, authorized, by considerations besides those which have already been elicited, in identifying the Hebrew Tarshish with the Spanish Tartessus, whatever may have been the extent of the neighboring country over which the latter held dominion or possessed immediate influence. Among these considerations we mention: 1. That the two names are similar, if they are not the same; the Greek *Ταρτησσός* with the Aramaic pronunciation would be *ṭarṭiṣṣā*, a fact which would of itself seem to settle the question in the absence of conflicting evidence and claims. 2. Spain was one of the chief seats of Phœnician colonization; and if we unite therewith the north-west of Africa, we shall have some idea of the greatness of the power of Tyre in these parts, for Tyre is reported to have founded not fewer than three hundred cities on the western coast of Africa, and two hundred in South-western Spain (Strabo, ii, 82). Here, then, was found the chief object of the Phœnician sea-trade. These countries were to Tyre what Peru was to Spain. Confining our remarks to Spain, we learn from Heeren that the Phœnician colonies on the European side of the sea were situated in the south of the present Andalusia. Here, with other important places, lay Tartessus, a name which is borne by a river, an island, a town, and a region. Heeren distinctly says that to Orientalists the word indicated the farthest west generally, comprising, of course, many places. In the commercial geography of the Phœnicians, he adds, the word obviously meant the whole of their colonial dependencies in Southern Spain. In the same general way, we use the term West Indies; and thus arose the river, the town, the district of Tartessus, since the country included them all (Heeren, *Ideen*, ii,

44 sq.). 3. It does much to confirm our view that all the articles reported in Jeremiah and Ezekiel to have been brought from Tarshish might have come from South-western Spain. Here there were mines of gold and silver, and Tartessus is expressly named as affording the latter mineral (Strabo, iii, 157; Diod. Sic. v, 35). Tin was brought by the Phœnicians from Britain into Spain, and thence carried to the Oriental markets. According to Diodorus Siculus (v, 38), tin was procured in Spain also, as well as lead, according to Pliny (*Hist. Nat.* iii, 4). Pliny's words are forcible: "Nearly all Spain abounds in the metals—lead, iron, copper, silver, gold." We add one or two corroborations of the above identification. Heeren (*Ideen*, ii, 64) translates Ezek. xxvii, 25, "The ships of Tarshish," etc., by "Spanish ships were the chief object of thy merchandise; thou (Tyre) wast a full city, and wast honored on the seas." The Phœnicians were as eager in their quest of gold and gold countries as were the alchemists and the Europeans of the 16th century. The lust for gold urged them over the deserts of Arabia and the cliffs of the Red Sea as far as Yemen and Ethiopia; and the same passion carried them westwardly to the coasts of Spain and the Pillars of Hercules. "Spain," says Heeren, "was once the richest land in the world for silver; gold was found there in great abundance, and the baser metals as well. The silver mountains were in those parts which the Phœnicians comprised under the general name of Tartessus, or Tarshish. The immeasurable affluence of precious metals which, on their first arrival, they found here so astounded them, and the sight thereof so wrought on the imagination of the people, that fact called fable to its aid, and the story gained currency that the first Phœnician colonists not only filled their ships with gold, but made thereof their various implements, anchors not excepted." See COMMERCE.

In the absence of positive proof, we may acquiesce in the statement of Strabo (iii, 148) that the river Bætis (now the Guadalquivir) was formerly called Tartessus, that the city Tartessus was situated between the two arms by which the river flowed into the sea, and that the adjoining country was called Tartessia. But there were two other cities which some deem to have been Tartessus; one, Gadir, or Gadir (Cadiz) (Sallust, *Fragm.* lib. ii; Pliny, *Hist. Nat.* iv, 36; and Avienus, *Descript. Orb. Terr.* p. 614; and the other, Carteia, in the Bay of Gibraltar (Strabo, iii, 151; Ptolemy, ii, 4; Pliny, iii, 3; Mela, ii, 6). Of the three, Carteia, which has found a learned supporter at the present day (Ersch and Gruber, *Encyclop.* s. v.), seems to have the weakest claims, for, in the earliest Greek prose work extant, Tartessus is placed beyond the Columns of Hercules (Herodotus, iv, 152); and in a still earlier fragment of Stesichorus (Strabo, iii, 148) mention is made of the river Tartessus, whereas there is no stream near Carteia (= El Rocadillo) which deserves to be called more than a rivulet. Strictly speaking, the same objection would apply to Gadir; but, for poetical uses, the Guadalquivir, which is only twenty miles distant, would be sufficiently near. It was, perhaps, in reference to the claim of Gadir that Cicero, in a letter to Atticus (vii, 3), jocosely calls Balbus a native of that town, "Tartessus istum tuum." But Tartessus was likewise used by poets to express the extreme west where the sun set (Ovid, *Metam.* xiv, 416; Silius Italicus, x, 358; comp. id. iii, 399). See Smith, *Dict. of Class. Geog.* s. v. "Tartessus." See, in addition to the works cited by Bochart and Winer, *ut sup.*, the *Journ. of Sac. Lit.* Oct. 1851, p. 226 sq.

5. (A. V. "beryl.") A precious

stone, so called as brought from Tarshish, as Ophir is also put for the gold brought thence (Exod. xxviii, 20; xxxix, 13; Ezek. i, 16; x, 9; xxviii, 13; Cant. v, 14; Dan. x, 6). The Sept., followed by Josephus, makes it the "chrysolite," i. e. the topaz of the moderns, which is still found in Spain: so Braun, *De Vestitu Sacerd.* ii, 17. Others suppose it to be "amber;" but this does not agree with the passages in Exodus, which make the Tarshish to have been one of the engraved stones of the high-priest's breastplate. See BERYL.

**Tarsus** (*Taprócs*), the chief town of Cilicia, "no-mean city" in other respects, but illustrious to all time as the birthplace and early residence of the apostle Paul (Acts ix, 11; xxi, 39; xxii, 3). The only other passages in which the name occurs are Acts ix, 30 and xi, 25, which give the limits of that residence in his native town which succeeded the first visit to Jerusalem after his conversion, and preceded his active ministerial work at Antioch and elsewhere (comp. xxii, 21 and Gal. i, 21). It was during this period, no doubt, that he planted the Gospel there, and it has never since entirely died out. There is little doubt that Paul was there also at the beginning of his second and third missionary journeys (xv, 41; xviii, 23). See PAUL.

Tarsus was situated in a wide and fertile plain on the banks of the Cydnus, the waters of which are famous for the dangerous fever caught by Alexander when bathing, and for the meeting of Antony and Cleopatra. The river flowed through it and divided it into two parts. Hence it is sometimes by Greek writers called *Taprói* in the plural, perhaps not without some reference to a fancied resemblance in the form of the two divisions of the city to the wings of a bird. This part of Cilicia was intersected in Roman times by good roads, especially one crossing the Taurus northward by the "Cilician Gates" to the neighborhood of Lystra and Iconium, the other joining Tarsus with Antioch and passing eastward by the "Amanian" and "Syrian Gates."

Tarsus was founded by Sardanapalus, king of Assyria. The Greeks, however, claimed a share in its colonization; and Strabo (xiv, 673) has preserved an ancient legend of certain Argives having arrived there with Triptolemus in search of Io. It appears first in authentic history in Xenophon's time, when it was a city of some considerable consequence (*Anab.* i, 2, 23). It was occupied by Cyrus and his troops for twenty days and given up to plunder. After Alexander's conquests had swept this way (Q. Curt. iii, 5) and the Seleucid kingdom was established at Antioch, Tarsus usually belonged to that kingdom, though for a time it was under the Ptolemies. In the civil wars of Rome it took Caesar's side, and on the occasion of a visit from him had its name changed to *Julio-polis* (Cæsar, *Bell. Alex.* 66; Dion

Map of the Coast of Tarsus.

Tarsus.

Cass. xlvii, 26). Augustus made Tarsus free (Appian, *Bell. Civ.* v, 7). This seems to have implied the privilege of being governed by its own laws and magistrates, with freedom from tribute; but did not confer the *jus coloniarum* nor the *jus civitatis*; and it was not, therefore, as usually supposed, on this account that Paul enjoyed the privilege of Roman citizenship. Tarsus, indeed, eventually did become a Roman colony, which gave to the inhabitants this privilege; but this was not till long after the time of Paul (Deyling, *Observat. Sacr.* iii, 391 sq.). See CITIZENSHIP; COLONY. We thus find that the Roman tribune at Jerusalem ordered Paul to be scourged, though he knew that he was a native of Tarsus, but desisted on learning that he was a Roman citizen (Acts ix, 11; xxi, 89; xxii, 24, 27). We ought to note, on the other hand, the circumstances in the social state of Tarsus, which had, or may be conceived to have had, an influence on the apostle's training and character. It was renowned as a place of education under the early Roman emperors. Strabo compares it in this respect to Athens and Alexandria, giving, as regards the zeal for learning shown by the residents, the preference to Tarsus (xiv, 673). Some distinguished names adorn its annals; among others, Athenodorus, the tutor of Augustus, and Nestor, the tutor of Marcellus, the nephew of Augustus; Artemidorus and Diodorus, celebrated grammarians, and Dionysides, a tragic writer. Tarsus, also, was a place of much commerce, and Basil describes it as a point of union for Syrians, Cilicians, Isaurians, and Cappadocians (*Ep. Euseb. Samos. Episc.*). Owing to its commercial advan-

tages, Tarsus continued to flourish under the Roman emperors, until it fell into the hands of the Saracens. It was taken from them after a memorable siege by the emperor Nicephorus, but soon afterwards restored to them. In the time of Abulfeda, that is, towards the end of the 13th and beginning of the 14th century, Tarsus was still large and surrounded by a double wall, and in the occupation of Armenian Christians (*Tab. Syrie*, p. 183). It still survives, though greatly reduced, under the modern name *Tersüs*. Kinneir, who spent a week in Tarsus, states (*Travels*, p. 121) that hardly a vestige of the former magnificence of Tarsus remains; nor does, perhaps, the modern town occupy one fourth part of the area of the ancient city. He observed a few ancient ruins, but not a single inscription or any monument of beauty or art. The houses are intersected by gardens and orchards; they seldom exceed one story in height, are flat-roofed, and the greater part of them are constructed of hewn stone, to furnish which the more ancient edifices have been levelled with the ground. The inhabitants amount to about thirty thousand souls, mostly Turks and Turcomans. The adjoining villages are chiefly inhabited by Greeks, who prefer agricultural pursuits to a town life. The sea is not visible from the town. The Cydnus is there about forty yards wide, and small canals are cut from it for irrigation.

**Tar'tak** (Heb. *Tartak'*, תַּרְתַּק; Sept. *Θαρτάκ*; Vulg. *Tharthac*), one of the gods of the Avite, or Avvite, colonists who were planted in the cities of Samaria after the removal of the tribes by Shalmaneser (2 Kings xvii, 31). According to Rabbinical tradition, Tartak is said to have been worshipped under the form of an ass (Talm. *Babyl. Sanhedrin*, fol. 63 b). From this it has been conjectured that this idol was the Egyptian *Typho*; but, though in the hieroglyphics the ass is the symbol of Typho, it was so far from being regarded as an object of worship that it was considered absolutely unclean (Plutarch, *Is. et Os.* c. 14). A Persian or Pehlvi origin has been suggested for Tartak, according to which it signifies either "intense darkness," or "hero of darkness," or the underworld, and so, perhaps, some planet of ill-luck, as Saturn or Mars (Gesenius, *Thesaur.* s. v.; Fürst, *Handwb.* s. v.). The Carmanians, a warlike race on the Persian Gulf, worshipped Mars alone of all the gods, and sacrificed an ass in his honor (Strabo, xv, 727). Perhaps some trace of this worship may have given rise to the Jewish tradition.

**Tar'tan** (Heb. *Tartan'*, תַּרְתָּן; Sept. *Θαρτάν* v. r. *Taváδαν* or *Tapaδάν*; Vulg. *Tharthan*), which occurs only in 2 Kings xviii, 17 and Isa. xx, 1, has been generally regarded as a proper name (Gesenius, *Lex. Heb.* s. v.). Winer assumes, on account of the identity of name, that the same person is intended in the two places (*Realw.* s. v.). Recent discoveries make it probable that in Tartan, as in Rabsaris and Rabshakeh, we have not a proper name at all, but a title or official designation, like Pharaoh among the Egyptians, or Surena among the Parthians (Tacit. *Ann.* vi, 42). The Assyrian Tartan is a general, or commander-in-chief. It seems as if the Greek translator of 2 Kings had an inkling of the truth, and therefore prefixed the article to all three names, which he very rarely prefixes to the names of persons where they are first mentioned. If this be the true account of the term Tartan, we must understand in 2 Kings xviii, 17 that Sennacherib sent "a general," together with his "chief eunuch" and "chief cup-bearer," on an embassy to Hezekiah, and in Isa. xx, 1 that "a general"—probably a different person—was employed by Sargon against Ashdod, and succeeded in taking the city. See **TRIBUTE**.

**Tascodeugites** (Τασκοδρούγῃται, Τασκοδρούγῃται, from τασκός, a wooden nail or stake, and δρούγγος, nose, in Epiphanius, *Hæret.* 48, n. 14), a heretical sect of Galatia (Hieron. *Comm. in Ep. ad Gal.*) belonging probably to the 4th century, are by some included among the Gnostics of the school of Mark [see **MARCUS THE HERESIARCH**], e. g. by Theodoret, *Hæret. Fab.* i, 9, 10, and by others among the Montanists, e. g. by Epiphanius, *ut sup.* The term is unquestionably a nickname, applied to these heretics because they were accustomed during prayer to place a finger to the nose or mouth like a pole, at the same time observing the profoundest silence. See Augustine, *De Hæres.* 63; Philastr. *Hæres.* 76; and Epiphanius. Theodoret says that they ridiculed the sacraments, rejected the creeds, repudiated all revelation; and others charge on them a denial of the incarnation. Their assemblies were legally prohibited after the 4th century, but traces of them are seen in Theodore Studita in the 9th. They are by some supposed to be identical with the Passalorynchites.—Herzog, *Real-Encyklop.* s. v.

**Tasmania**, formerly **VAN DIEMEN'S LAND**, is a considerable island in the South Pacific Ocean, lying between 40° 40' and 43° 40' south lat. and 144° 30' and 148° 30' east long., at the south of, and separated from

Australia by Bass's Strait. Its greatest length from Cape Grim on the north-west to Cape Pillar on the south-east is 240 miles, and its greatest breadth from east to west 200 miles. Its area, including the adjacent islands, is about 26,000 square miles. Its capital is Hobart-Town, with a population of 19,000. In 1870 the total population of Tasmania was 99,328.

I. *History*.—Tasmania was first discovered by Tasman, Dec. 1, 1642, and named by him Van Diemen's Land in honor of his patron, the then governor of the Dutch West Indies. In 1803 Lieut. Bowen was despatched from Sydney with a few soldiers and convicts to form a settlement in the south of the island, which was finally fixed upon the spot where Hobart-Town now stands. From 1817 commenced a rapid increase in the number of free settlers; and in 1825 Tasmania was declared independent of New South Wales. The transportation of convicts ceased in 1853, and on Jan. 4, 1856, on petition of the Legislative Council to the home government, the name of the colony was officially changed to Tasmania. Of the 3000 aborigines found in the country the number rapidly decreased, until now not one remains.

II. *Climate, Soil, etc.*—The climate of Tasmania is fine and salubrious; the mean temperature of the hottest month (January) is 63° 57', of the coldest (July) 45° 82', and of the whole year 54° 92'. The agricultural lands may be divided into three classes—alluvial deposits, Tertiary clays, and loamy soils. In their virgin state some of the lands are marvellously productive; but in many cases, through improvident management, the soil has deteriorated.

III. *Administration*.—Since the passing of the Constitutional Act in 1854, the governing authority has been vested in a Parliament, consisting of the governor, as the queen's representative, and two elective Houses—the Legislative Council of fifteen, and the Assembly of thirty, members. The qualification of voters is, for the former, a freehold of the annual value of fifty pounds, and, for the latter, a freehold valued at one hundred pounds or a ten pounds rental.

IV. *Religion and Education*.—By the Constitutional Act, fifteen thousand pounds are annually reserved for the support of religion, and is at present divided among the various religious denominations according to their respective numbers at the census. They were, in 1870: Church of England, 53,047; Roman Catholic, 22,091; Presbyterians, 9064; Wesleyans, 7187; Independents, 3931; Baptists, 931; Jews, 232. For the support of elementary education twelve thousand pounds a year is appropriated by Parliament, the disbursement of which is intrusted to a Central Board holding its sittings at Hobart-Town. The teachers are appointed by the board, and are under the supervision of the inspector of the schools. There were, in 1873, 141 public schools; 10,803 pupils, with an average attendance of 7047; 105 male teachers, 108 female teachers, and 32 pupil teachers. There are four superior schools—Horton College, High-school, Hutchins's School, and the Church Grammar-school.

The efforts of the Wesleyan missionaries in Tasmania have been directed mainly to the English population. The mission was begun in 1820 by the Rev. Mr. Horton, who was on his way to New South Wales. The mission was approved by the governor of the colony, and another missionary was soon sent out, who was followed by two more in 1827, and by a fifth in 1832. The following is the report of the mission for 1876: Chapels and other preaching places, 95; missionaries and assistants, 16; local preachers, 70; full members, 1286; persons on trial, 202; Sunday-schools, 47; teachers, 401; scholars, 3076; attendants on worship, 9176.

The Primitive Methodist mission reported in 1873: Principal stations, 4; ministers, 4; members, 223.

The United Methodist Free Churches had, in the same year, 3 lay agents and 38 members.

**Tasschemacher** (Dutch, **Tesschenmaeker**),

PETRUS, one of the earliest ministers of the Reformed (Dutch) Church in the United States, was born in Holland, and educated at the University of Utrecht. He was settled in the United States first at Kingston, N. Y., in 1676-77, then went to Dutch Guiana, S. A., 1677-78, and in 1679-80 we find him at New Amstel, now New Castle, Del. Here difficulties arose which induced him to leave that people. He supplied the Church on Staten Island occasionally, 1682-83. In 1684 he took charge of the Church at Schenectady, N. Y., which he retained until his death. Meantime, in 1684, as the records show, he organized the Church at Hackensack, N. J., with thirty-three communicants. He was never their pastor, but seems to have made them occasional visits, to preach and receive members and dispense the Lord's supper, until 1789. This service must have cost him then much time and labor; but in this apostolic method of journeyings and visitations many of the old churches were planted and sustained in their primitive worship. At Schenectady Mr. Tasschemacher was the first pastor, although the Church was probably organized before he went to them. He was the most prominent victim of the Indian massacre and burning of that city, Feb. 8, 1690. "The French, in order to control the Indian trade, had planned the capture of Albany and New York the year before. The plan was not wholly carried out; but a party of French and Indians left Montreal, and, proceeding by way of Lake Champlain, intended attacking Albany. But, the Indian chiefs not consenting, they turned off towards Schenectady. They gave orders that Tasschemacher's life should be saved on account of the information they could obtain from him; but his house was not known, and before he could be personally recognised he was slain and his house and papers burned. His head was cloven open and his body burned to the shoulder-blades." Sixty persons lost their lives on that fatal Saturday midnight before they could escape or defend themselves from their stealthy and cruel foes. The remnant that escaped kept the Church of Schenectady alive. Without a pastor to instruct them, they met for worship amid the ruins of the city, chose their elders and deacons from year to year, who were ordained by the Rev. Godfriedus Dellius, of Albany, and his successor, Rev. Petrus Van Dresen, until, in 1702, the little flock thus kept alive, and having gained in numbers and strength, called the Rev. Bernardus Freeman and received him as their pastor. Little more is known of Mr. Tasschemacher's history. He died a martyr among his flock, and his ministry and death illustrate the perils amid which the Gospel was preached and churches were established in their early days upon the frontier. See Corwin, *Manual of the Ref. Church*, p. 486. (W. J. R. T.)

**Tassel.** In mediæval times the sacred vestments of the ministers of the Church were adorned with tassels, to which, in the case of dalmatics and tunics, balls of crystal were attached. The word also denotes a thin plate of gold or silver worn on the back of the cope and episcopal gloves.

**Tate,** NAHUM, a well-known psalmodist, was born in Dublin, Ireland, in 1652, and at the age of sixteen was admitted to Dublin College, but does not appear to have followed any profession. He succeeded Shadwell as poet-laureate, and continued in that office till his death, which happened Aug. 12, 1715, in the Mint, where he resided as a place of refuge from his creditors. He was the author of nine dramatic performances and a large number of poems; but is at present better known for his version of the Psalms, in which he was joined by Dr. Brady. For a complete list of his works, see Alibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v. See PSALMODY.

**Tatian,** a notable Christian writer of the 2d century, was a native of Assyria, though Clemens Alexandrinus and later fathers term him a Syrian. He had

mastered the Græco-Roman culture of his day, largely through extended travels; and his reading was very wide, no fewer than ninety-three classic authors being referred to in his works. In the course of his wanderings as a strolling rhetorician he came to Rome, at that time the great centre for all intellectual interests and tendencies, and there turned his attention to Christianity. To justify this action he wrote his *Λόγος πρὸς Ἕλληνας*, a work in which he confesses himself a convert to the barbarian philosophy of the despised sect, and invites his contemporaries to examine it, that they too might observe the astonishing contrasts it presents, with its simplicity and its clearness, to the darkness of the heathenism of that and every other age. At Rome Tatian was associated with Justin, perhaps as a pupil; but he soon became himself a teacher of Christianity. His attitude was apologetic, and necessarily involved the most marked antagonism to paganism. Stern and even harsh in his morality, he could recognise no truth in heathen philosophy, and feel no sympathy, even though but of a scientific or æsthetic nature, with heathen life and culture. To him, as to his contemporary Christians, the belief in one God was of the highest moral significance. The loss of this faith, he taught, had exposed the soul of man to the rule of the dark powers of material nature, the demons with whom polytheistic views originate. Its recovery delivers from servitude to the wandering demons (the planets) upon which astrological fate is based. In opposition to the materialistic pantheism of the Stoics, Tatian defended the supermundane spirituality of the one God, the Creator and First Cause of all things, in whom, as the Great Source of being, all things, including matter, potentially existed at the first. At the beginning the Logos sprang into being as the first-born work of the Father, that he might produce the world, himself creating the material. The created universe is everywhere pervaded by the spirit of material life, which is inferior to the Divine Spirit—being in man the soul, which is indissolubly connected with the body, and in the world the world-soul (*πνεῦμα ὁλκόν*). Human nature in its pure state is, however, privileged to a substantial and intimate union (*συνυγία*) with the perfect nature, the Spirit of God himself. This throws a significant light upon Tatian's conception of the Trinity. He teaches that as the Father is (in his essence) Spirit, so the Logos proceeding from the Father is Spirit; and the latter, that he might imitate the Father, has made man in the image of immortality, to the end that man might have part in God and attain to immortality. The Spirit thus became the life-companion of the soul. In this way God himself lives in man by his ministering Spirit, by which is to be understood simply the hypostatized efficiency of the Logos. The fall involved the removal of the Divine Spirit from the soul, and plunged the latter deeper into the condition of the merely hylic, so that but faint sparks of the Spirit and dim longings after God remain. It is possible, however, for the soul to turn away from evil and towards God in the exercise of its freedom—how, Tatian does not clearly state. The fame which Tatian acquired through his apology, from which the foregoing sketch is principally taken, was lost in consequence of his perversion to Gnosticism. He went to Syria, it would seem, after the death of Justin (in 166?). He is charged with holding to the existence of æons after the fashion of Valentinus (q. v.), and similar speculations; with an ascetical course of life, carried even to the extent of using water instead of wine; with rejecting marriage as a state of practical fornication; with promulgating Docetic ideas respecting the person of Christ, etc.—all of which must be regarded as substantially a truthful indictment. He would seem, however, to be more nearly related to Saturninus (q. v.) than to Valentinus in his views. The time of Tatian's death is not exactly known, but it seems to have been prior to the date of the work by Irenæus, *Adv. Hær.* (c. 175). His most famous work was a harmony of the Gospels, the *Diatess-*

*saron*, of which the Jacobite bishop Bar-Salibi (12th century) reports that Ephraem Syrus (q. v.) wrote a commentary on it, and Theodoret the genealogical tables and all the passages by which the Lord's descent from David is made apparent. The *Oratio ad Græc.* was first published at Tigur. 1540, fol., and afterwards often. See Daniel, *Tatianus, der Apologet.* (Halle, 1837); Möhler, *Patrologie*; Ritter, *Gesch. d. christl. Philosophie*, vol. i.; Dorner, *Person Christi*, i, 438; Möller, *Kosmologie d. griech. Kirche*, p. 168 sq.; Stöckl, *Gesch. d. Philos. in d. patr. Zeit*, p. 148 sq.; Huber, *Philos. d. Kirchenväter*, p. 20 sq.; Duncker, *Apologet. Secund. Sæc. de Essential. Naturæ Hum. Partibus Placita* (Gött. 1850), pt. ii; and Herzog, *Real-Encyklop.* s. v. For monographs, see Volbeding, *Index Programmatum*, p. 104.

**Tatiani Evangelium.** Epiphanius (*Hæres.* xlvii, 1; xlviii, 4) mentions a Gospel of Tatian as being used by the Encratites, and even among the Catholic Christians of Syria. Being compiled from the four gospels, it is also called *εὐαγγέλιον διὰ τεσσάρων* (Theodoret. *Hæret. Fabul.* i, 20; *Coll. Ambros. Proœm. in Luc*; Euseb. *Hist. Eccl.* iv, 20). Epiphanius erroneously identified it with the *Evangelium sec. Hebræos* (see Fabric. i, 377). See Semisch, *Tatiani Diatessaron, Antiquissimum N. T. Evangeliorum in unum Digestorum Specimen* (Breslau, 1856). Tatian is otherwise also censured as being a dangerous compiler and falsifier of Holy Writ (Fabric. ii, 538). The still extant gospel harmony (reprinted in *Orthodoxographis* and *Bibl. Patrum*, s. v. Tatian), ascribed to Tatian by Victor Capuanus in *Præfat. ad Anonymi Harmoniam Evangelicam*, does not belong to him. See Fabricius, *Codex Apocryphus N. T.* i, 378; ii, 510. (B. P.)

**Tatianists**, followers of Tatian (q. v.). See also ENCRATITES.

**Tat'nai** (Heb. *Tatnay*, תַּתְנַי; Pers., perhaps gift; Sept. *Θαυζαυαί* v. r. *Θαυαυαί*, *Θαυζαυαί*, etc.; Vulg. *Thathanai*), a Persian governor (תַּתְנַי, i. e. *pasha*) who succeeded Rehum in the rule of Samaria, and probably of other provinces north of Judæa, in the time of Darius Hystaspis and Zerubbabel (Ezra v, 3, 6; vi, 6, 13), B.C. 520. He appears to have been a more just person, and more friendly to the Jews, than his predecessor. An adverse report of their proceedings at Jerusalem reached him; but he resolved to suspend his judgment till he had examined into the matter on the spot. He accordingly repaired thither, accompanied by another great officer, named Shethar-boznai (q. v.), and their colleagues, and, finding that the Jews alleged the authority of a royal decree for their proceedings, he sent to the supreme government a temperate and fair report, founded on the information he had obtained, suggesting that the statement made by the Jews as to the decree of Cyrus and other matters should be verified by reference to the archives at Babylon. Then, without one word to influence the decision or to prejudice the claim advanced, Tatnai concludes with intimating that he awaits the royal orders. This official letter of the Persian governor is quite a model of exactness, moderation, and truth, and gives a very favorable idea of the administrative part of the Persian government. The rescript being favorable to the claim of the Jews, whose statement had been verified by the discovery of the original decree of Cyrus, Tatnai and his colleagues applied themselves with vigor to the execution of the royal commands. See EZRA.

**Tattam**, HENRY, a learned English divine, was born in Ireland, Dec. 28, 1788; and was educated at Trinity College, Dublin, and at the universities of Göttingen and Leyden, where he received his doctorate in laws, theology, and philosophy. He took orders in the Church of England; was rector of St. Cuthbert's, Bedford, 1818-45; and for a portion of that time was rector also of Great Woolstone, Bucks. In 1845 he became archdeacon of Bedford, and in 1849 rector of Stamford

Rivers, Essex. He was afterwards chaplain in ordinary to the queen. He died at Stamford Rivers, Jan. 8, 1868. Travelling in the East, he laid the foundation of an intimate knowledge of Oriental languages, and became the chief modern authority concerning the Coptic. He discovered at the Convent of Nitria, in the N.W. desert of Egypt, a splendid collection of ancient Syriac MSS., which he secured for the British Museum. He is the author of *Helps to Devotion* (2d ed. Lond. 1862, 12mo):—*Compendious Grammar of the Egyptian Language* (1828, 8vo):—*Lexicon Ægyptiaco-Latinum ex Veteribus Lingue Ægyptiæ Monumentis*, etc. (Oxon. 1835, 8vo):—*Duodecim Prophetarum Minorum Libros, in Lingua Ægyptiaca, vulgo Coptica seu Memphisica*, etc. (Latine edidit; Lat. et Copt. 1836, 8vo):—*Defence of the Church of England against the Attacks of a Roman Catholic* (Lond. 1843, 12mo):—*The Ancient Coptic Version of the Book of Job the Just* (transl. into English and edited, 1847, 8vo):—*Apostolical Constitutions in Coptic* (Engl. transl. 1849, 8vo):—*Prophete Majores in Dialecto Lingue Ægyptiæ* (Oxon. 1852, 2 vols. 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Tau Cross** is a cross formed like the Greek letter T (Tau), and one of the most ancient forms. See STAFF, PASTORAL.

**Tauler** (original form *Tauweler*), JOHANNES, the famous Dominican preacher and mystic, was born at Strasburg in A.D. 1290—though authorities differ with respect to both time and place. He was of honorable family and early devoted to the priestly office. In (about) 1308 he became a monk and went to Paris, to the College of St. James, to study theology. He found greater pleasure in the study of the writings of the Areopagite St. Bernard, and the two Victor, and especially of Augustine, than in the popular philosophy; his attention was also given to the Neo-Platonists, and, among schoolmen, to Aquinas with respect to ethics. On his return to Strasburg, Tauler came under the influence of Master Eckart, and also of a more simple and practical company of mystical thinkers among the monks, including Nicholas of Strasburg and others. He became a preacher, and associated himself with the Friends of God—a society formed to teach and comfort the people upon whom rested the ban of the Church imposed by pope John XXII; and in this society he labored all his life. His sermons were clear and adapted to the popular needs, but not, it would seem, at this time pervaded by the power of a personal union of the preacher with Christ. In 1340 occurred an event of decisive importance to Tauler. He was then visited by Nicholas of Basle (q. v.), and by him led to realize his need of a personal conversion to God. During two years, in which he refrained from preaching and became an object of ridicule to his fellow-monks, who were unable to understand the reason for such struggles as he was passing through, did he wrestle with his sense of sin and his need of pardon. Finding peace at length, he passed through further discipline by reason of a disgraceful failure in an attempt to preach; but from that time he preached persistently, and with a power not previously possessed. Wicked clergymen were unable to endure the faithful rebukes with which he visited their sins, and they prohibited him from preaching; but the magistracy prevented the enforcement of their order. Under the preaching of the first sermon after his conversion a number of persons fell down as dead, and he was besought to discontinue the sermon. He was one of the few who refused to cease from preaching to the people in obedience to the papal interdict, and braved the anger of his immediate superiors in the execution of that duty. In 1348 the "black death" swept over Strasburg, carrying off sixteen thousand victims, and adding to the horrors of the situation. Only Tauler and two other monks had pity upon the people, and they appealed in writings (whose circulation was at once prohibited) to the other clergy to do what they

could that the "poor ignorant populace should not thus die under the ban." Charles IV soon afterwards came to Strasburg and caused the three monks to be brought before him, and, after inquiring into their principles, dismissed them with the admonition not to "offend against the Church and its interdict again." Tauler retired to Cologne, and became preacher in the nunnery of St. Gertrude, but after a few years returned to Strasburg, where he had a last interview with Nicholas of Basle. He committed to the care of that friend the writings he wished to have given to the world, and died June 16, 1361. He was buried in his convent, and the stone which covered his grave is preserved in the "New Church" of Strasburg.

Tauler's works consist of sermons, homilies, and an *Imitation of the Life of Christ in its Poverty*. The sermons are extant in manuscript in several libraries, the oldest MS. being a parchment at Strasburg. In printed form the first ed. appeared at Leipsic, 1498, in 4to, and others at Augsburg (1508, fol.) and Basle (1521 and 1522, fol.), the latter being superior to the former. Of modernized editions that of Frankfort (1826, 3 pts. 8vo) is best. The *Imitation of Christ* also exists in different MSS. and editions, the best ed. being that of Schlosser (Frankf. 1833, 8vo). A number of other writings are attributed to Tauler, but without authority.

The teachings of Tauler are not presented in his works in systematic form. His aim was practical, and the edifying element predominates over the speculative in his theology. As with Eckart, the speculative ideas may be traced back to the concept *Being*—the absolute, simple, uncreated entity, which involves neither distinctions nor relations, and which no name is adequate to express. It is the hidden Deity, whose nature requires, however, revelation and operation. Revelation is the process of the Trinity; operation, with the Deity, is begetting. Hence the Deity in operation becomes Father, as he knows himself, and in that act of knowledge expresses himself, the word which he speaks being the Son. Between them exist reciprocal approval and love, and this love is the Holy Spirit, proceeding from both the Father and the Son. This conception of the Trinity evidently involves a distinction of relations rather than of *hypostases* in the Godhead. The Son is eternal. With reference to the creation, Tauler comes very near to the teachings of pantheism at times, but nevertheless preserves the distinction between the Creator and the creature, and was constantly opposed to the teachings of the Beghards and Brethren of the Free Spirit. The human soul came forth from God, and contains a divine *spark*, in which the Trinity is reflected, and which strives to return to God, while the sensual part of man yearns for the creature world. Sin consists in giving way to the latter impulse. It cannot wholly deprive the soul, which is at bottom noble and in harmony with the good, of its yearning for reunion with God; but man possesses in himself no power to return to God. Righteousness can be recovered only through faith in the merits of Christ. Meditation on the work and imitation of the life, especially the sufferings, of Christ form the way by which to return to God. This imitation should be outward, but also inward, transforming the entire man. By this way the soul rises superior to all creature control; God enters in with all his blessing, and supplies the place of grace with his immediate operation. As the soul becomes, in this way, "free from grace," so it also becomes "free from virtue," i. e. it no longer practices an isolated virtue, but, with a being transformed into love, he permits God to work in him all virtues as the outflow of that love. No idle contemplation or passive asceticism finds the approval of Tauler, but a life of active love and pity, of patience and meekness—a life in the imitation of Christ. Tauler did not contradict the doctrines of his Church, but he was animated by an exalted reformatory spirit; his mysticism displayed a free, practical, evangelical tendency which has given it historical importance; and we

X.—P

may appropriately retain for him the title, early bestowed, of *Doctor Illuminatus*.

**Tausan** (or **Tagesen**), JOHAN, a Danish Reformer, was born at Birkinde, island of Fünen, 1494; and was educated at Aarhus and Odense. Becoming a monk, he entered the convent of the Order of St. John of Jerusalem at Antworskow, where he became acquainted with the writings of Luther. He visited Wittenberg, and formed the acquaintance of Melancthon. Returning to his native country, he delivered lectures on theology in the University of Copenhagen, and in 1524 avowed himself a disciple of Luther. After being expelled from one convent and imprisoned in another, he was, in 1526, appointed chaplain to Frederick I, king of Denmark; and in 1529 was appointed to the Church of St. Nicholas at Copenhagen, where he remained till 1537. He was then appointed professor at Roeskilde, and in 1542 was made bishop of Ripen, and died in 1561. He published several theological treatises, some Danish hymns, and a Danish translation of the Psalms. See Hook, *Eccles. Biog.* s. v.; Jöcher, *Gelehrten-Lex.* iv, 1030.

**Tav.** See ALPHABET.

**Tavern.** See THREE TAVERNS.

**Taverner**, RICHARD, a learned and pious layman, was born at Brisley, England, in 1505. He is said to have studied at Corpus Christi College, Cambridge, and afterwards at Oxford, and then law in the Inner Temple. Having been appointed one of the clerks of the signet in 1537, he held that office until the reign of queen Mary. He was a friend of the Reformation, and, in order to promote it, undertook a new translation or edition of the English Bible (Lond. 1539, fol.). It was dedicated to the king and allowed to be read in the churches; but in 1545 the Romish bishops committed him to the Tower. He was, however, soon released, restored to the king's favor, and elected a member of Parliament in 1545. Taverner's edition of the Bible is a correction of what is called Matthewe's Bible, many of whose marginal notes are adopted, many omitted, and others inserted by the editor. On the accession of king Edward, Taverner, although a layman, received a special license in 1552 to preach throughout the king's dominions, from which he was obliged to desist upon the accession of queen Mary. He resumed his preaching when Elizabeth came to the throne, and, besides receiving other commissions, was made high sheriff of Oxford County in 1569. He died July 14, 1575. Besides his Bible, we have the following list of his publications: *The Sum and Pith of CL Psalms of David*, etc. (Lond. 1539, 8vo);—*The Epistles and Gospels, with a Brief Postill*, etc. (ibid. 1540, 2 pts. 4to);—*Fruit of Faith*, etc. (ibid. 1582, 12mo);—*The Garden of Wisdom*, etc. (ibid. 1539, 2 bks.);—*Flores aliquot Sententiarum ex Variis Scripturis* (translated from Erasmus);—*Catonis Disticha Moralia* (ibid. 1553, 8vo; 1555, 4to);—*In Minum Publicanum Lib. I* (ibid. 1562);—*Catechismus Fidei*;—*Proverbs, or Adages* (ibid. 1545, etc.). See Masters, *History of Corpus Christi College*; Ward, *Gresham Professors*; Newcombe, *English Biblical Translations*; Chalmers, *Biog. Dict.* s. v. See AUTHORIZED VERSION.

**Tavthe**, the Babylonian name for "the mother of the gods," thought to be the same as *Tihantu* or *Tihamat*, "the sea."

**Tawals**, in Slavonic mythology, was a god of the fields, bestower of blessings, worshipped by the Polanders.

**Tawbutte**, a talbot (i. e. a hunting dog), frequently used in mediæval heraldic devices. In an inventory of church goods at Easington, Oxford, is the follow-

ing: "Item, a vestment powdered with stars and tawbuttes."

**Tawdry**, a name given to the necklace worn of old by English peasant girls, in memory and honor of St. Etheldreda, or Awdry, patroness of the diocese of Ely, who, after she had become religious, mourned for the vanity in which she had indulged by wearing gold necklaces.

**Tax**, HEBREW (some form of  $\text{תָּבַע}$ , *to arrange*). Taxes of some kind must have been coeval with the origin of civilized society. The idea of the one is involved in that of the other, since society, as every organization, implies expense, which must be raised by the abstraction of property from the individuals of which it consists, either by occasional or periodical, by self-imposed or compulsory, exactions. In the history of Israel, as of other nations, the student who desires to form a just estimate of the social condition of the people must take into account the taxes which they had to pay. According as these are light or heavy may vary the happiness and prosperity of a nation. To them, though lying in the background of history, may often be traced, as to the true motive power, many political revolutions. We find a provision of income made at the very commencement of the Mosaic polity. Taxes, like all other things in that polity, had a religious origin and import. While the people were in the migratory stage during their marches through the desert, only such incidental taxes were levied, or rather such voluntary contributions were received, as the exigencies of the time demanded. It was not till their establishment in Canaan that taxation assumed a regular and organized form. We propose, therefore, in the following article (which treats only of public and stated imposts) to consider the subject chronologically from that point. See **ASSESSMENT**.

I. *Under the judges*, according to the theocratic government contemplated by the law, the only payments obligatory upon the people as of permanent obligation were the tithes (q. v.), the first-fruits (q. v.), the redemption-money of the first-born (q. v.), and other offerings as belonging to special occasions. See **PRIEST**. The payment by each Israelite of the half-shekel as "atone-ment-money" for the service of the tabernacle, on taking the census of the people (Exod. xxx, 13), does not appear to have had the character of a recurring tax, but to have been supplementary to the free-will offerings of Exod. xxv, 1-7, levied for the one purpose of the construction of the sacred tent. In later times, indeed, after the return from Babylon, there was an annual payment for maintaining the fabric and services of the Temple; but the fact that this begins by the voluntary compact to pay one third of a shekel (Neh. x, 32) shows that till then there was no such payment recognised as necessary. A little later the third became a half, and under the name of the *didrachma* (Matt. xvii, 24) was paid by every Jew, in whatever part of the world he might be living (Josephus, *Ant.* xviii, 9, 1). From the Talmudical tract *Shekalim* (Mishna, ii, 4), the time of payment appears to have been between the 15th and the 25th of the month Adar, that is, in March. After the destruction of the Temple, this didrachm was ordered by Vespasian to be paid into the Capitol, "as," says Josephus, "they used to pay the same to the Temple at Jerusalem" (*War*, vii, 6, 6). During the prosperity of Palestine, large sums were thus collected in Babylon and other Eastern cities, and were sent to Jerusalem under a special escort (Josephus, *Ant.* loc. cit.; Cicero, *Pro Flacc.* c. 28). We have no trace of any further taxation than this during the period of the judges. It was not in itself heavy: it was lightened by the feeling that it was paid as a religious act. In return for it the people secured the celebration of their worship, and the presence among them of a body of men acting more or less efficiently as priests, judges, teachers, perhaps also as physicians. We cannot wonder that the people

should afterwards look back to the good old days when they had been so lightly burdened.

II. *Under the monarchy*, its centralized government and greater magnificence involved, of course, a larger expenditure, and therefore a heavier taxation. This may have come, during the long history of the kingdom, in many different forms, according to the financial necessities of the times. The chief burdens appear to have been (1) a tithe of the produce both of the soil and of live-stock, making, together with the ecclesiastical tithe, twenty per cent. on incomes of this nature (1 Sam. viii, 15, 17); (2) forced military service for a month every year (ver. 12; 1 Kings ix, 22; 1 Chron. xxvii, 1); (3) gifts to the king, theoretically free, like the old benevolences of English taxation, but expected as a thing of course at the commencement of a reign (1 Sam. x, 27) or in time of war (comp. the gifts of Jesse, xvi, 20; xvii, 18). In the case of subject princes the gifts, still made in kind—armor, horses, gold, silver, etc.—appear to have been regularly assessed (1 Kings x, 25; 2 Chron. ix, 24). Whether this was ever the case with the presents from Israelite subjects must remain uncertain. Besides the foregoing, there were (4) import duties, chiefly on the produce of the spice districts of Arabia (1 Kings x, 15); (5) the monopoly of certain branches of commerce, as, for example, that of gold (ix, 28; xxii, 48), fine linen or byssus from Egypt (x, 28), and horses (ver. 29); (6) the appropriation to the king's use of the early crop of hay (Amos vii, 1). This may, however, have been peculiar to the northern kingdom, or occasioned by a special emergency (Ewald, *Proph.* ad loc.).

It is obvious that burdens such as these, coming upon a people previously unaccustomed to them, must have been almost intolerable. Even under Saul exemption from taxes is looked on as a sufficient reward for great military services (1 Sam. xvii, 25). Under the outward splendor and prosperity of the reign of Solomon there lay the deep discontent of an overtaxed people, and it contributed largely to the revolution that followed. The people complain, not of Solomon's idolatry, but of their taxes (1 Kings xii, 4). Of all the king's officers he whom they hate most is Adoram, or Adoniram (q. v.), who was "over the tribute" (ver. 18). At times, too, in the history of both the kingdoms, there were special burdens. A tribute of fifty shekels a head had to be paid by Menahem to the Assyrian king (2 Kings xv, 20), and under his successor, Hoshea, this assumed the form of an annual tribute (xvii, 4; amount not stated). After the defeat of Josiah by Pharaoh-Necho, in like manner, a heavy income-tax had to be imposed on the kingdom of Judah to pay the tribute demanded by Egypt (xxiii, 35), and the change of masters consequent on the battle of Carchemish brought in this respect no improvement (Josephus, *Ant.* x, 9, 1-3).

III. *Under the Persian empire*, the taxes paid by the Jews were, in their broad outlines, the same in kind as those of other subject races. The financial system which gained for Darius Hystaspis the name of the "shop-keeper king" ( $\kappa\alpha\tau\eta\lambda\omicron\varsigma$ , Herod. iii, 89) involved the payment by each satrap of a fixed sum as the tribute due from his province (ibid.), and placed him accordingly in the position of a *publicanus*, or farmer of the revenue, exposed to all the temptation to extortion and tyranny inseparable from such a system. Here, accordingly, we get glimpses of taxes of many kinds. In Judaea, as in other provinces, the inhabitants had to provide in kind for the maintenance of the governor's household (comp. the case of Themistocles, Thucyd. i, 138, and Herod. i, 192; ii, 98), besides a money-payment of forty shekels a day (Neh. v, 14, 15). In Ezra iv, 13, 20; vii, 24, we get a formal enumeration of the three great branches of the revenue. 1. The  $\text{בְּרִית}$ , fixed, measured payment, probably direct taxation (Grotius). 2.  $\text{בְּלִי}$ , the excise, or *octroi*, on articles of consumption (Gesenius, s. v.). 3.  $\text{תְּרִיבָה}$ , probably the toll payable at

bridges, fords, or certain stations on the high-road. The influence of Ezra secured for the whole ecclesiastical order, from the priests down to the Nethinim, an immunity from all three (Ezra vii, 24); but the burden pressed heavily on the great body of the people, and they complained bitterly both of this and of the ἀγγαφίον, or forced service, to which they and their cattle were liable (Neh. ix, 37). They were compelled to mortgage their vineyards and fields, borrowing money at twelve per cent., the interest being payable apparently either in money or in kind (v, 1-11). Failing payment, the creditors exercised the power (with or without the mitigation of the year of jubilee) of seizing the persons of the debtors and treating them as slaves (ver. 5; comp. 2 Kings iv, 1). Taxation was leading at Jerusalem to precisely the same evils as those which appeared from like causes in the early history of Rome. To this cause may probably be ascribed the incomplete payment of tithes or offerings at this period (Neh. xiii, 10, 12; Mal. iii, 8), and the consequent necessity of a special poll-tax of the third part of a shekel for the services of the Temple (Neh. x, 32). What could be done to mitigate the evil was done by Nehemiah, but the taxes continued, and oppression and injustice no doubt marked the government of the province in a large degree. The miseries of an Oriental system of taxation have in modern times received their most revolting illustration in the history of Turkey over these same regions, the settled policy of whose government has ever been to grind the people by the utmost extent of extortion, peculation, and espionage, in all the grades of official administration.

IV. *Under the Egyptian and Syrian kings* the taxes paid by the Jews became yet heavier. The "farming" system of finance was adopted in its worst form. The Persian governors had been obliged to pay a fixed sum into the treasury. Now the taxes were put up to auction. The contract sum for those of Phœnicia, Judea, and Samaria had been estimated at about 8000 talents. An unscrupulous adventurer (e. g. Joseph, under Ptolemy Euergetes) would bid double that sum, and would then go down to the province, and by violence and cruelty, like that of Turkish or Hindû collectors, squeeze out a large margin of profit for himself (Josephus, *Ant.* xii, 4, 1-5).

Under the Syrian kings we meet with an ingenious variety of taxation. Direct tribute (φόρος), an excise duty on salt, crown-taxes (στέφανοι, golden crowns, or their value, sent yearly to the king), one half the produce of fruit-trees, one third that of corn land, a tax of some kind on cattle: these, as the heaviest burdens, are ostentatiously enumerated in the decrees of the two Demetriuses remitting them (1 Macc. x, 29, 30; xi, 35). Even after this, however, the golden crown and scarlet robe continue to be sent (xiii, 39). The proposal of the apostate Jason to farm the revenues at a rate above the average (460 talents, while Jonathan [xi, 28] pays 300 only), and to pay 150 talents more for a license to open a circus (2 Macc. iv, 9), gives us a glimpse of another source of revenue. The exemption given by Antiochus to the priests and other ministers, with the deduction of one third for all the residents in Jerusalem, was apparently only temporary (Josephus, *Ant.* xii, 3, 3).

V. *Roman taxation*, in its pressure, if not absolutely heavier, was probably more galling, as being more thorough and systematic, more distinctively a mark of bondage. The capture of Jerusalem by Pompey was followed immediately by the imposition of a tribute, and within a short time the sum thus taken from the resources of the country amounted to 10,000 talents (Josephus, *Ant.* xiv, 4, 4, 5). The decrees of Julius Cæsar showed a characteristic desire to lighten the burdens that pressed upon the subjects of the republic. The tribute was not to be farmed. It was not to be levied at all in the sabbatic year. One fourth only was demanded in the year that followed (*ibid.* xiv, 10, 5, 6). The people, still under the government of Hyrcanus, were thus protected

against their own rulers. The struggle of the republican party after the death of the dictator brought fresh burdens upon the whole of Syria, and Cassius levied not less than 700 talents from Judea alone. Under Herod, as might be expected from his lavish expenditure in public buildings, the taxation became heavier. Even in years of famine a portion of the produce of the soil was seized for the royal revenue (*ibid.* xv, 9, 1), and it was not till the discontent of the people became formidable that he ostentatiously diminished this by one third (*ibid.* xv, 10, 4). It was no wonder that when Herod wished to found a new city in Trachonitis, and to attract a population of residents, he found that the most effective bait was to promise immunity from taxes (*ibid.* xvii, 2, 1), or that on his death the people should be loud in their demands that Archelaus should release them from their burdens, complaining specially of the duty levied on all sales (*ibid.* xvii, 8, 4).

When Judea became formally a Roman province, the whole financial system of the empire came as a natural consequence. The taxes were systematically farmed, and the publicans appeared as a new curse to the country. See PUBLICAN. The *portoria* were levied at harbors, piers, and the gates of cities. These were the τέλη of Matt. xvii, 24; Rom. xiii, 7. In addition to this, there was the κῆνσος, or poll-tax (*Cod. D* gives ἐπικεφάλαιον in Mark xii, 15), paid by every Jew, and looked upon, for that reason, as the special badge of servitude. It was about the lawfulness of this payment that the rabbins disputed, while they were content to acquiesce in the payment of the customs (Matt. xxii, 17; Mark xii, 13; Luke xx, 20). It was against this apparently that the struggles of Judas of Galilee and his followers were chiefly directed (Josephus, *Ant.* xviii, 1, 6; *War.* ii, 8, 1). United with this, as part of the same system, there was also, in all probability, a property-tax of some kind. Quirinus, after the deposition of Archelaus, was sent to Syria to complete the work—begun, probably, at the time of our Lord's birth—of valuing and registering property, and this would hardly have been necessary for a mere poll-tax. See CYRENIUS. The influence of Joazar, the high-priest, led the people generally (the followers of Judas and the Pharisee Sadduc were the only marked exceptions) to acquiesce in this measure and to make the required returns (*Ant.* xviii, 1, 1); but their discontent still continued, and, under Tiberius, they applied for some alleviation (Tacitus, *Ann.* ii, 42). In addition to these general taxes, the inhabitants of Jerusalem were subject to a special house-duty about this period; Agrippa, in his desire to reward the good-will of the people, remitted it (Josephus, *Ant.* xix, 6, 3).

It can hardly be doubted that in this, as in most other cases, an oppressive taxation tended greatly to demoralize the people. Many of the most glaring faults of the Jewish character are distinctly traceable to it. The fierce, vindictive cruelty of the Galilæans, the Zealots, the Sicarii, was its natural fruit. It was not the least striking proof that the teaching of our Lord and his disciples was more than the natural outgrowth of popular feeling—that it sought to raise men to the higher region in which all such matters were regarded as things indifferent—and, instead of expressing the popular impatience of taxation, gave, as the true counsel, the precept "Render unto Cæsar the things that are Cæsar's," "Tribute to whom tribute is due, custom to whom custom." See TRIBUTE.

TAX, CLERICAL. See TAXES.

**TAXATIO ECCLESIASTICA.** Anciently the first-fruits of all ecclesiastical benefices were paid to the pope. Innocent IV, in 1253, gave the same for three years to Henry III, which occasioned a taxation made by Walter, bishop of Norwich, who was delegated to the task by the pope in the following year. It was sometimes called the *Norwich Taxation*, and sometimes *Pope Innocent's Valor*. In 1288 Nicholas IV granted the tenths

to Edward I for six years towards defraying the expense of an expedition to the Holy Land; and in order to their collection a taxation by the king's precept was begun in that year, and finished, as to the province of Canterbury, in 1291, and as to York in the following year; the whole being superintended by John, bishop of Winchester, and Oliver, bishop of Lincoln. A third taxation, entitled *nova taxatio*, as to some part of the province of York was made in 1318 by virtue of a mandate directed by Edward II to the bishop of Carlisle, principally because the Scottish invasion had rendered the border clergy unable to pay the tax. Pope Nicholas's taxation is an important record, because all taxes were regulated by it until the *valor beneficiorum* of Henry VIII was completed; and because the statutes of colleges founded antecedently to the Reformation were interpreted by this criterion, according to which their benefices under a certain value were exempted from the restriction respecting pluralities in the 21st Henry, c. 13. It was published in 1802 by the Record Commission, and the original rolls for many dioceses are still preserved in the Exchequer. In pursuance of an act of Parliament of Henry VIII, commissioners were appointed to inquire "of and for the true and just whole and yearly values of all the manors, lands, tenements, hereditaments, rents, tithes, offerings, emoluments, and other profits, etc., appertaining to any archbishopric, bishopric," etc. The result of their inquiries was the *Valor Ecclesiasticus*, sometimes called the *King's Books*. It has been published by the Record Commission. In 1647 Parliament issued commissions for surveying all the Crown and Church lands in England, and copies of the surveys returned were deposited in most of the cathedrals, but the originals were destroyed in the great fire of London. In 1835 a report of the ecclesiastical commissioners for England and Wales was laid on the table of both houses of Parliament, which contained the results of their inquiry into the revenues of the Church of England. See FIRST-FRUIT.

**Taxes, CLERGY EXEMPTED FROM.** By the favor of Christian emperors, the clergy were exempt from some of the taxes which were laid upon the rest of the Roman empire. They did not, however, claim this exemption as a divine right, but freely acknowledged it to be owing to the pious munificence and favor of the Christian princes. Baronius does the clergy great injustice in pretending that they claimed a freedom from tribute by the law of Christ; and that no emperor ever imposed any tax upon them except only Julian the Apostate, Valens the Arian, and the younger Valentinian, who was wholly under the influence of his mother, Justina, an Arian empress (An. 378, iv, 538). Bellarmine asserts (*De Clericis*, i, 28) that the exemption of the clergy in political matters, whether relating to their persons or their goods, was introduced by human right only, and not by divine. The following is a table of the taxes levied in the empire showing the exemptions of the clergy:

1. Census Caputum (or personal tribute). Clergy exempted.
2. Jugatio, Jнга, Capitato, etc. (tax on lands, etc.). Clergy exempted in special cases.
3. Aurum Tironicum, etc. (soldiers and horses furnished to the emperors). Clergy (probably) exempted in special cases.
4. Chrysargyrum (or Lustral Tax). Clergy exempted.
5. Metatum (entertaining emperor or retinue). Clergy exempted.
6. Superindicta et Extraordinaria (or special taxes). Clergy exempted.
7. Road and Bridge Tax. Clergy sometimes exempted.
8. Angarie et Parangarie (conveying corn for the army). Clergy sometimes exempted.
9. Denarius, or Uncia, and Descriptio Lucratorum (tax paid to the curia of every city). Clergy exempt under Justinian.

The clergy were also exempt from all civil personal offices; from all sordid offices (e.g. building and repairing roads, etc.), both predial and personal; and from all curial or municipal offices. In order to check the prac-

tice of rich men seeking to avoid taxes by taking orders, Constantine made a law that no rich plebeian who was qualified by his estate to serve in *curia* and bear civil offices in any city should become an ecclesiastic. The laws respecting exemption of the clergy were frequently changed, but the above is their general tenor. See Bingham, *Christ. Antiq.* bk. v, ch. iiii.

**Taxing** is the rendering, in the A. V., of a Greek word, which occurs in two passages, *ἡ ἀπογραφὴ* (Vulg. *descriptio*, Luke ii, 2; *professio*, Acts v, 37). The cognate verb *ἀπογράφειν* in like manner is rendered by "to be taxed" in the A. V., while the Vulg. employs "ut describeretur universus orbis" in Luke ii, 1, and "ut profiterentur singuli" in ver. 3. In Heb. xiii, 23 (*πρωτοτόκων ἀπογεγραμμένων ἐν οὐρανοῖς*), where the idea is that of the registration of the first-born as citizens of the heavenly Jerusalem, the A. V. has simply "written," the Vulg. "qui conscripti sunt." Both the Latin words used in the two passages first cited above are found in classical writers with the meaning of a registration or formal return of population or property (Cicero, *Verr.* ii, 3, 47; *De Off.* i, 7; Sueton. *Tiber.* 30). The English word conveys to us more distinctly the notion of a tax or tribute actually levied, but it appears to have been used in the 16th century for the simple assessment of a subsidy upon the property of a given county (Bacon, *Henry VII.* p. 67), or the registration of the people for the purpose of a poll-tax (Camden, *Hist. of Elizabeth*). This may account for the choice of the word by Tyndale in lieu of "description" and "profession," which Wycliffe, following the Vulg., had given. Since then "taxing" has kept its ground in most English versions with the exception of "tribute" in the Geneva, and "enrolment" in the Rhemish of Acts v, 37. The word *ἀπογραφὴ* by itself leaves the question undetermined whether the returns made were of population or property. Josephus, using the words *ἡ ἀπογραφὴ τῶν οὐσῶν* (*Ant.* xviii, 1, 1) as an equivalent, shows that "the taxing" of which Gamaliel speaks included both. That connected with the Nativity, the first step towards the complete statistical returns, was probably limited to the former (Greswell, *Harmony*, i, 542). In either case "census" would have seemed the most natural Latin equivalent; but in the Greek of the New Test., and therefore probably in the familiar Latin of the period, as afterwards in the Vulg., that word slides off into the sense of the tribute actually paid (Matt. xxii, 17; xvii, 24). See CENSUS.

Two distinct registrations, or taxings, are mentioned in the New Test., both of them by Luke. The first is said to have been the result of an edict of the emperor Augustus that "all the world (i. e. the Roman empire) should be taxed" (*ἀπογράφειν πᾶσαν τὴν οἰκουμένην*) (Luke ii, 1), and is connected by the evangelist with the name of Cyrenius, or Quirinus. The second, and more important (*ἡ ἀπογραφὴ*, Acts v, 37), is referred to in the report of Gamaliel's speech, and is there distinctly associated, in point of time, with the revolt of Judas of Galilee. The account of Josephus (*Ant.* xviii, 1, 1; *War.* ii, 8, 1) brings together the two names which Luke keeps distinct, with an interval of several years between them. Cyrenius comes as governor of Syria after the deposition of Archelaus, accompanied by Coponius as procurator of Judæa. He is sent to make an assessment of the value of property in Syria (no intimation being given of its extension to the *οἰκουμένη*), and it is this which rouses Judas and his followers to their rebellion. The chronological questions presented by these apparent discrepancies have been discussed, so far as they are connected with the name of the governor of Syria, under CYRENIUS. An account of the tumults caused by the taxing will be found under JUDAS OF GALILEE.

There are, however, some other questions connected with the statement of Luke ii, 1-3, which call for some notice. The truth of the statement has been ques-

tioned by Strauss (*Leben Jesu*, i, 28) and De Wette (*Comment.* ad loc.), and others, who conclude, from various objections, that this statement belongs to legend, not to history; that it was a contrivance, more or less ingenious, to account for the birth at Bethlehem (that being assumed in popular tradition as a preconceived necessity for the Messiah) of one whose kindred lived, and who himself had grown up at Nazareth; that the whole narrative of the infancy of our Lord, in Luke's Gospel, is to be looked upon as mythical. We summarize these objections, and under each we present, within brief limits, what appears to us a sufficient answer.

1. The foremost ground of objection is that neither Josephus nor any other contemporary writer mentions a census extending over the whole empire at this period (A.U.C. 750). An edict like this, causing a general movement from the cities where men resided to those in which, for some reason or other, they were to be registered, must, it is said, have been a conspicuous fact, such as no historian would pass over.

On the other hand, it must be remembered that our history of this portion of the reign of Augustus is defective. Tacitus begins his *Annals* with the emperor's death. Suetonius is gossiping, inaccurate, and ill-arranged. Dion Cassius leaves a gap from A.U.C. 748 to 756, with hardly any incidents. Josephus does not profess to give a history of the empire. It might easily be that a general census, cir. A.U.C. 749-750, should remain unrecorded by them. If the measure was one of frequent occurrence, it would be all the more likely to be passed over. The testimony of a writer like Luke, obviously educated and well informed, giving many casual indications of a study of chronological data (Luke i, 5; iii; Acts xxiv, 27), and of acquaintance with the Herodian family (Luke viii, 3; xxiii, 8; Acts xii, 20; xiii, 1) and other official people (ch. xxiii-xxvi), recognising distinctly the later and more conspicuous *ἀπογραφὴ*, must be admitted as fair presumptive evidence, hardly to be set aside in the absence of any evidence to the contrary. How hazardous such an inference from the silence of historians would be, we may judge from the fact that there was undoubtedly a geometrical survey of the empire at some period in the reign of Augustus, of which none of the above writers take any notice (comp. the extracts from the *Rei Agrariæ Scriptores* in Greswell, *Harmony*, i, 537). It has been argued further that the whole policy of Augustus rested on a perpetual communication to the central government of the statistics of all parts of the empire. The inscription on the monument of Ancyra (Gruter, *Corpus Inscript.* i, 230) names three general censuses in A.U.C. 726, 746, 767 (comp. Sueton. *Octav.* c. 28; Greswell, *Harm.* i, 535). Dion Cass. (lv, 13) mentions another in Italy in A.U.C. 757. Others in Gaul are assigned to A.U.C. 727, 741, 767. Strabo (vi, 4, 2), writing early in the reign of Tiberius, speaks of *μία τῶν καθ' ἡμᾶς τιμῶσεων*, as if they were common things. In A.U.C. 726, when Augustus offered to resign his power, he laid before the senate a "rationarium imperii" (Sueton. *Octav.* c. 28). After his death, in like manner, a "breviarium totius imperii" was produced, containing full returns of the population, wealth, resources of all parts of the empire, a careful digest apparently of facts collected during the labors of many years (*ibid.* c. 101; Dion Cass. lv; Tacitus, *Ann.* i, 11). It will hardly seem strange that one of the routine official steps in this process should only be mentioned by a writer who, like Luke, had a special reason for noticing it. A census, involving property-returns, and the direct taxation consequent on them, might excite attention. A mere *ἀπογραφὴ* would have little in it to disturb men's minds, or force itself upon a writer of history.

There is, however, some evidence, more or less circumstantial, in confirmation of Luke's statement. (1.) The inference drawn from the silence of historians may be legitimately met by an inference drawn from the

silence of objectors. It never occurred to Celsus or Lucian or Porphyry, each questioning all that he could in the Gospel history, to question this. (2.) A remarkable passage in Suidas (s. v. *Ἀπογραφὴ*) mentions a census, obviously differing from the three of the Ancyran monument, and agreeing, in some respects, with that of Luke. It was made by Augustus, not as censor, but by his own imperial authority (*δόξαν αὐτῷ*; comp. *ἐξῆλθε δόγμα*, Luke ii, 1). The returns were collected by twenty commissioners of high rank. They included property as well as population, and extended over the whole empire. (3.) Tertullian, incidentally, writing controversially, not against a heathen, but against Marcion, appeals to the returns of the census for Syria under Sentius Saturninus as accessible to all who cared to search them, and proving the birth of Jesus in the city of David (Tertull. *Adv. Marc.* iv, 19). Whatever difficulty the difference of names may present [see CYRENIUS], here is, at any rate, a strong indication of the fact of a census of population, cir. A.U.C. 749, and therefore in harmony with Luke's narrative. (4.) Greswell (*Harm.* i, 476; iv, 6) has pointed to some circumstances mentioned by Josephus in the last year of Herod's life, and therefore coinciding with the time of the Nativity, which imply some special action of the Roman government in Syria, the nature of which the historian carelessly or deliberately suppresses. When Herod attends the council at Berytus there are mentioned as present, besides Saturninus and the procurator, *οἱ περὶ Πεδάνιον πρίσβεις*, as if the officer thus named had come, accompanied by other commissioners, for some purpose which gave him for the time almost co-ordinate influence with the governor of Syria himself (*War.* i, 27, 2). Just after this again, Herod, for some unexplained reason, found it necessary to administer to the whole people an oath, not of allegiance to himself, but of good-will to the emperor; and this oath six thousand of the Pharisees refused to take (Josephus, *Ant.* xvii, 2, 4; *War.* i, 29, 2). This statement implies, it is urged, some disturbing cause affecting the public tranquillity, a formal appearance of all citizens before the king's officers, and lastly, some measure specially distasteful to the Pharisees. The narrative of Luke offers an undesigned explanation of these phenomena.

2. As a further objection, it is urged that Palestine was, at this time, an independent kingdom under Herod, and therefore would not have come under the operation of an imperial edict.

This objection admits of as satisfactory an answer as the foregoing. The statistical document already referred to included subject kingdoms and allies, no less than the provinces (Sueton. *loc. cit.*). If Augustus had any desire to know the resources of Judæa, the position of Herod made him neither willing nor able to resist. From first to last we meet with repeated instances of subservience. He does not dare to try or punish his sons, but refers their cause to the emperor's cognizance (Josephus, *Ant.* xvi, 4, 1; xvii, 5, 8). He holds his kingdom on condition of paying a fixed tribute. Permission is ostentatiously given him to dispose of the succession to his throne as he likes best (*ibid.* xvi, 4, 5). He binds his people, as we have seen, by an oath of allegiance to the emperor (*ibid.* xvii, 2, 4). The threat of Augustus that he would treat Herod no longer as an ally, but as a subject (*ibid.* xvi, 9, 3), would be followed naturally enough by some such step as this, and the desire of Herod to regain his favor would lead him to acquiesce in it.

3. Another objection alleged is that if such a measure, involving the recognition of Roman sovereignty, had been attempted under Herod, it would have roused the same resistance as the undisputed census under Quirinus did at a later period.

In reply to this, we may say that we need not wonder that the measure should have been carried into effect without any popular outbreak. It was a return of the population only, not a valuation of property; there

was no immediate taxation as the consequence. It might offend a party like the Pharisees; it was not likely to excite the multitude. Even if it seemed to some the prognostication of a coming change, and of direct government by the Roman emperor, we know that there was a large and influential party ready to welcome that change as the best thing that could happen for its country (Josephus, *Ant.* xvii, 11, 2).

4. The statement of Luke that "all went to be taxed, every one into his own city," is said to be inconsistent with the rules of the Roman census, which took cognizance of the place of residence only, not of the place of birth.

On the other hand, this apparent inconsistency of what Luke narrates is precisely what might be expected under the known circumstances of the case. The census, though Roman in origin, was effected by Jewish instrumentality, and was in harmony, therefore, with Jewish customs. The alleged practice is, however, doubtful; and it has been maintained (Huschke, *Ueber den Census*, etc., in Winer, s. v. "Schatzung") that the inhabitants of the provinces were, as far as possible, registered in their *forum originis*—not in the place in which they were only residents. It may be noticed incidentally that the journey from Nazareth to Bethlehem belongs to a time when Galilee and Judæa were under the same ruler, and would therefore have been out of the question (as the subject of one prince would certainly not be registered as belonging to another) after the death of Herod the Great. The circumstances of the Nativity indicate, if they do not prove, that Joseph went there only for personal enrolment, not because he was the possessor of house or land.

5. It is asserted that neither in the Jewish nor the Roman census would it have been necessary for the wife to travel with her husband in order to appear personally before the registrar (*censitor*).

This objection is, perhaps, the most frivolous and vexatious of all. If Mary were herself of the house and lineage of David, there may have been special reasons for her appearance at Bethlehem. In any case, the Scripture narrative is consistent with itself. Nothing could be more natural, looking to the unsettled state of Palestine at this period, than that Joseph should keep his wife under his own protection instead of leaving her by herself, in an obscure village, exposed to danger and reproach. In proportion to the hopes he had been taught to cherish of the birth of a Son of David; in proportion, also, to his acceptance of the popular belief that the Christ was to be born in the city of David (Matt. ii, 5; John vii, 42), would be his desire to guard against the accident of birth in the despised Nazareth out of which "no good thing" could come (i, 46).

The literature connected with this subject is, as might be expected, very extensive. Every commentary contains something on it. Meyer, Wordsworth, and Alford may be consulted as giving the latest summaries. A very full and exhaustive discussion of all points connected with the subject is given by Spanheim, *Dubia Evang.* ii, 3-9; and Richardus, *Diss. de Censu Augusti*, in Menthen, *Theaurus*, ii, 428; comp. also Ellicott, *Hulsean Lectures*, p. 57.

**Taygētē**, in Greek mythology, was a daughter of Atlas and Pleione, mother of Lacedæmon and Eurotas by Jupiter. She became one of the Pleiades after death. Others affirm that she was transformed into a cow by Diana, in order to escape the embraces of Jupiter. The mountain Taygetus was named after her. See Smith, *Dict. of Class. Biog. and Mythol.* s. v.

**Taylor, Charles C.**, a clergyman of the Protestant Episcopal Church, died Feb. 2, 1855, at Kalamazoo, Mich. In 1844 he went to Michigan and took charge of St. Andrew's Church, Ann Arbor; and in July, 1853, became rector of St. Luke's Church, Kalamazoo, where he labored until the last. He had frequently represented his diocese in the General Convention, and had for a long

time been a member of the standing committee. He was a faithful and eloquent preacher. See *Amer. Quar. Church Review*, 1855, p. 161.

**Taylor, Chauncey**, a Congregational minister, was born in Williamstown, Vt., Feb. 17, 1805. After preliminary study at Hinesburgh, he entered the University of Vermont, from which he graduated in 1831, and then studied theology with Rev. Ira Ingraham, of Brandon. Jan. 21, 1835, was the date of his ordination, when he was installed pastor at Chittenden, and remained until 1837. One year, from 1838, he preached at James's Island, near Charleston, S. C.; from 1839 to 1841 he was acting pastor at Chittenden, Vt. The two years following he was without charge, living at one time in Winoski and at another in Milton. From 1843 to 1846 he was acting pastor at Alburgh. In the latter year he was reinstalled at Chittenden, where he remained until August, 1854, when he went to Langdon, N. H., and served there as acting pastor for two years. Then he became a home missionary at Algona, Kossuth Co., Ia., beginning his ministry there in 1856, gathering a Church in 1858, and being installed in 1867. After serving this congregation until July, 1873, he was dismissed, and never resumed the care of a parish. He died there Feb. 29, 1876. See *Cong. Quar. Rev.* 1877, p. 426.

**Taylor, Cornelius H., D.D.**, a Presbyterian minister, was born in 1821. Soon after the completion of his theological studies he became pastor of the Church of Huron, O. From thence he removed to Illinois, and was installed pastor of the Church at Alton, where he labored ten years. In 1868 he received a call from the Third Presbyterian Church at Cincinnati, O. He was a leading man in the Church in all places where he labored. He died at Cincinnati, Feb. 25, 1875. See *Presbyterian*, March 13, 1875. (W. P. S.)

**Taylor, David**, one of Wesley's early helpers, began to preach the Gospel in Cheshire and Derbyshire about the time that Wesley began his public labors. Many were saved through his instrumentality, among whom was John Bennett. He lived for a time in the family of lady Huntingdon (q. v.). On one occasion he was waylaid, with Charles Wesley, and severely wounded. He eventually erred with respect to marriage, not submitting to the mode prescribed by law, and his usefulness became neutralized thereby. He united with the Moravians, but soon left them and attended the meetings of the Quakers. He afterwards returned to his old friends the Methodists, and attempted to preach once more; "but, alas!" says Atmore, "his gifts were gone." He died, in obscurity, about 1780. See Atmore, *Meth. Memorial*, s. v.; Smith, *Hist. West. Methodism*, i, 182, 191-196, 201.

**Taylor, Edward**, a Congregational minister, was born (according to president Stiles) at Coventry, England, in 1642, and received an excellent education in his native country. Upon the restoration of Charles, he resolved not to conform, and sailed for the United States April 22, 1668, arriving at Boston July 5. On July 23 he entered Cambridge University, from which he graduated in 1671. Invited to preach at Westfield, he consented, and arrived there Dec. 3, 1671. The paucity of population and the insecurity of person and property delayed for a long time the formation of a Church; but this was done Aug. 27, 1679, O. S., and Mr. Taylor was ordained as its pastor. He continued to labor here until his death, June 29, 1729. He left in manuscript, *A Commentary on the Four Gospels*, theological treatises, sermons, and poems, none of which have been published. See Sprague, *Annals of the Amer. Pulpit*, i, 177.

**Taylor, Ellison**, a Methodist Episcopal minister, was born in South Carolina, Feb. 19, 1788. He first received license to exhort, and afterwards, April 13, 1816, to preach. Soon after this he joined the travelling con-

nection, and in due time was made deacon and elder. He died in 1826. Mr. Taylor possessed excellent talents, was uniformly acceptable, and greatly beloved by the friends of true religion. See *Minutes of Annual Conferences*, i, 541.

**Taylor, Ezekiel Dunton**, a Congregational minister, was born in Bristol, Vt., June 2, 1817—the youngest of five brothers, all ministers. His early education was received at St. Lawrence Academy, Potsdam, N. Y., and Western Reserve Teacher's Seminary. After leaving the latter institution he became principal of Shaw Academy, Euclid, O., and remained in that position until he began the study of theology, which he prosecuted under the direction of the Grand River Presbytery and with his brother Chauncey. From Jan. 1, 1845, to 1847, he was acting pastor at De Ruyter, N. Y.; and after one year's labor was ordained at West Stockholm, Dec. 29, 1847, where he remained three years, until 1850, at which time he was dismissed. His next field was at Heuvelton and De Peyster as acting pastor, at which places he preached one year (from 1850 to 1851); then at Chagrin Falls, O., four years, until 1855. At Clarendon he preached eighteen years, until 1873, from which time successively, until his death, he served at South Newbury, Parkman, and Troy. He died at his home in Troy, Dec. 19, 1878. (W. P. S.)

**Taylor, Fitch W.**, a clergyman of the Protestant Episcopal Church, died in Brooklyn, N. Y., July 24, 1865, aged sixty-two years. He was the oldest chaplain in the United States Navy, and served under commodore Reed in his expedition against the Malays; was in the Mexican War; and was chaplain of the flag-ship "Hartford," in command of admiral Farragut, during the Rebellion. See *Amer. Quar. Church Review*, Oct. 1865, p. 499.

**Taylor, Henry**, an English Baptist and Methodist minister, was born at Rossendale, Lancashire, and began to preach, in a local capacity, in the Methodist connection at an early period of his life. He soon after united with the Close-communication Baptists, and was for several years a respectable minister in that Church, and a pastor of a congregation in Birmingham. In 1788 he offered himself to the Methodist Conference, was accepted, and appointed to Liverpool. He was a popular preacher, especially in Sheffield, in 1796, where several persons were converted. Some circumstances coming to light, in 1797, which reflected upon his moral conduct, he was suspended by the district meeting until the next Conference. He retired to Liverpool, and was sent, before the Conference met, by an owner of possessions in the West Indies to teach school on his plantations. Taylor died on the passage across, in 1798. See *Atmore, Meth. Memorial*, s. v.; *Smith, Hist. of Wesl. Meth.* ii, 294.

**Taylor, Isaac** (1), a Dissenting minister, known as "Taylor of Ongar," was born in London in 1759, and was for a time a successful engraver in that city. He removed to Lavenham, Suffolk, in 1786. He was minister of an Independent Church at Colchester, Essex, 1796–1810, and of another at Ongar, Essex, from 1811 until his death, Dec. 11, 1829. Besides other works, he published, *Book of Martyrs for the Young* (12mo):—*Bunyan Explained to a Child* (2 vols. 12mo):—*Child's Life of Christ* (12mo):—*Self-cultivation Recommended* (12mo: Boston, 1820, 12mo):—*The Glory of Zion*:—and other single *Sermons*. For a fuller list of publications, see Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Taylor, Isaac** (2), LL.D., a Christian philosopher, was born at Lavenham, Suffolk, Aug. 17, 1787. He was designed by his father for an artist, began to study for a Dissenting minister, but became a member of the Established Church and settled down at Stanford Rivers as a literary recluse. In 1862 he received a civil-service pension of one hundred pounds for his services to literature in the departments of history and philosophy. He died at his home, Stanford Rivers, June 28,

1865. He published, among other works, *Elements of Thought* (Lond. 1823, 8vo; N. Y. 1851, 12mo; 11th ed. 1867, 8vo):—*The Process of Historical Proof Exemplified and Explained* (ibid. 1828, 8vo; 1859, 8vo):—*Balance of Criminality, or Mental Error Compared with Immoral Conduct* (ibid. 1828, 12mo):—*Natural History of Enthusiasm* (ibid. 1829, 8vo; Boston, 1830, 12mo; 10th ed. Lond. 1845, 8vo):—*New Model of Christian Missions* (ibid. 1829, 8vo; new ed. 1866, 8vo):—*Fanaticism* (ibid. 1833, 8vo; N. Y. 1834, 12mo; 1866, fp. 8vo):—*Spiritual Despotism* (ibid. 1835, 8vo; 2d ed. 1835, 8vo; N. Y. 1835, 12mo):—*Physical Theory of Another Life* (Lond. 1836, 12mo; N. Y. 1836, 1852, 1853, 1866, 12mo):—*Home Education* (ibid. 1838, fp. 8vo; 7th ed. 1867, 8vo; 2d Am. ed. N. Y. 1838, 16mo):—*Ancient Christianity, and the Doctrines of the Oxford Tracts for the Times* (ibid. 1839–40, in eight 8vo parts; 4th ed. with supp. and indexes, 1844, 2 vols. 8vo):—*Man Responsible for his Dispositions*, etc., a lecture (ibid. 1840, 8vo):—*Loyola and Jesuitism in its Rudiments* (Lond. 1849, 1850, 1863, 8vo; N. Y. 1849, 1851, 12mo):—*Wesley and Methodism* (Lond. 1851, 1863, 1865, 8vo; N. Y. 1852, 12mo):—*The Restoration of Belief* (Lond. 1855, 8vo; Phila. 1855, 12mo; Camb. 1864, 8vo):—*Logic in Theology*, and other essays (Lond. 1859, fp. 8vo; with a sketch of author's life and catalogue of his writings, N. Y. 1860, 12mo):—*The Liturgy and the Dissenters* (Lond. 1860, 8vo):—*The Spirit of the Hebrew Poetry* (ibid. 1861; N. Y. 1861, 8vo; 1862, 8vo):—*Considerations on the Pentateuch*, etc. (ibid. 1863, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; *Chambers's Encyclop.* s. v.

**Taylor, James A.**, a Methodist Episcopal minister, was received on trial in the Ohio Conference in 1847, and appointed to Goshen Circuit; in 1848, to Madisonville; in 1850, to Gallipolis Circuit; and in 1851, to Jackson, which was his last appointment. He died Aug. 10, 1851. He was a young man of undoubted piety, good mind, and remarkable zeal. See *Minutes of Annual Conferences*, iv, 665.

**Taylor, James Brainerd**, a young Congregational minister of ardent piety and great promise, was born at Middle Haddam, Conn., April 15, 1801. His parents being members of the Protestant Episcopal Church, he was trained up in religious associations, and while clerk in a store in New York city was converted, and joined the Church of Dr. Romeyn. He early became useful in all Christian activities. The departure of Dr. Scudder for India turned his attention to the ministry, and after a preparatory course of two years at Lawrenceville Academy, N. J., he went to Princeton College as a sophomore in 1823. On his graduation in 1826, he entered the Yale Theological Seminary, but he soon had symptoms of lung-disease, which compelled him to seek relief in a tour through the South. He was licensed to preach by the Middlesex Convocation at East Haddam, Oct. 8, 1828, but the state of his health was such that he resolved to spend the winter at the Theological Seminary in Richmond, Va. He died there March 29, 1829, leaving a bright example of the power of divine grace and the triumph of Christian hope. See his *Memoir* by Dr. Rice (N. Y. 1833).

**Taylor, Jane**, daughter of the Rev. Isaac Taylor of Ongar, and as a writer for youth the worthy rival of Mrs. Barbauld, was born Sept. 23, 1783, in London, where her father then resided in the practice of his profession as an artist. Even from her third and fourth year, in connection with her sister Anne, who was two years older, she is said to have composed little tales and songs, which they would sing together; and Jane especially seemed to live in a fairy-land of her own imagination. Her father removed to Colchester in 1796. There Jane, in her fifteenth year, gave decided indications of personal piety. She was also one of a select society of young friends for the reading of original essays and the promotion of intellectual improvement. A visit to London in 1802 first brought her before the public. Her first contribution, *The Beggar's Boy*, appeared in the

*Minor's Pocket-book* for 1804. It was followed not long after by the two volumes of *Original Poems for Infant Minds, Rhymes for the Nursery*, etc., the joint production of Jane and her sisters, which quickly gained the favor of the public, were reprinted in America, and translated into German. Few books have been found more agreeable to children, or more useful in the business of early education. In 1809 she contributed to *The Associate Minstrels*, and soon after engaged with her sisters in the more difficult task of composing *Hymns for Children*. This volume must be pronounced equal, if not superior, both in merit and popularity, to Dr. Watts's *Divine Songs*. Its success called forth a second volume adapted for Sunday-schools, the contents of which have been incorporated with almost every subsequent collection for that purpose, and are now continually sung by millions of infant voices in different parts of the world. In 1814 she published *Display*, and in 1816 her *Essays in Rhyme on Morals and Manners*, which gained her a large increase of well-merited reputation. Her *Contributions of Q. Q. to the Youth's Magazine* were among her last and best literary efforts. They have since been republished in two vols. 12mo. She died at Ongar, April 13, 1824, confiding, calm, and happy in the Lord. See *Memoirs and Remains*, by her brother.

**Taylor, Jeremy, D.D.**, a distinguished Anglican divine, was born at Cambridge in 1613. He entered as a sizar in Caius College, Cambridge, in 1626, and became chaplain to archbishop Laud and to Charles I; was made fellow of All-Souls' College, Oxford, in 1632; and was rector of Uppingham, Rutlandshire, 1638; sequestered by Parliament in 1642; and after the defeat of the Royalists suffered frequent but short imprisonments. During the first year of the Protectorate, he kept a school in Wales in conjunction with William Nicholson, and officiated as chaplain to the earl of Carberry at Golden Grove, Carmarthenshire. In 1658 he settled in Ireland and preached alternately at Lisburn and Portmore. He returned to London in the spring of 1660, and signed the loyal *Declaration of the Nobility and Gentry* April 24, thirty-five days before the Restoration. He was consecrated bishop of Down and Connor in January, 1661, made a member of the Irish Privy Council in February, intrusted with the diocese of Dromore in March, and in the same year was elected vice-chancellor of the University of Dublin. He died at Lisburn, Aug. 13, 1667, and was interred in the choir of the cathedral at Dromore. His funeral sermon was preached by his chaplain, Dr. George Rust, who said of him: "His endowments were so many and so great as really made him a miracle. He was a rare humanist and deeply versed in all the polite arts of learning, and thoroughly concocted all the ancient moralists, Greek and Roman poets and orators. He had the good-humor of a gentleman, the eloquence of an orator, the fancy of a poet, the acuteness of a schoolman, the profoundness of a philosopher, the wisdom of a chancellor, the sagacity of a prophet, the reason of an angel, and the piety of a saint. He had devotion enough for a cloister, learning enough for a university, and wit enough for a college of virtuosi." To sum up all his attainments, Thompson calls him, in his *Biog. Hist.*, the "Homer of divines;" Hannah More, the "Shakspeare of the Church;" earl Shaftesbury, the "Spenser of English theological literature." An account of his writings and the various editions would fill a volume. We give an outline of his works, and simply the first editions: *The Sacred Order and Offices of Episcopacy* (Oxford, 1642, 4to):—*A Discourse concerning Prayer* (Lond. 1646, 4to):—*New and Easy Institution of Grammar*:—*Discourse of the Liberty of Propheying* (1647, 4to):—*The Great Exemplar of Sanctity and Holy Life* (1649, 4to):—*The Rule and Exercise of Holy Living* (1650, 12mo):—*The Rule and Exercise of Holy Dying* (1651, 12mo):—*A Discourse of the Office Ministerial* (Lond. 1651, 8vo):—*Sermons for all Sundays in the Year* (ibid. 1653, 2 vols. fol.):—*Manual of Daily Prayers* (1655,

8vo):—*Doctrine and Practice of Repentance* (Lond. 1655, 8vo):—*Polemical and Moral Discourses* (1657, fol.):—*Discourses of the Nature, Offices, and Measures of Friendship* (1662, 12mo):—*Offices or Forms of Prayer* (1658, 8vo):—*The Rule of Conscience* (1660, 2 vols. fol.):—*The Worthy Communicant* (1660, 8vo):—*Rules and Advice to the Clergy of the Diocese of Down and Connor* (Dublin, 1661, 8vo):—*Discourse of Confirmation* (1664, 8vo):—*Dissuasives from Popery; addressed to the People of Ireland* (ibid. pt. i, 1664, 4to; pt. ii, 1667, 4to, some 8vo):—*Contemplations of the State of Man* (1684, 4to and 8vo). There have also been published separately, *Christian Consolations Taught from Religion* (24mo):—*Guide to Eternal Happiness* (12mo):—*Baptists Justified, with Notes by Dr. Anderson* (12mo):—*Reverence Due to the Altar; Preparation for the Sacrament* (12mo):—*Comforts of Piety* (12mo):—*Marriage Ring* (Lond. 1888, 32mo):—*Warning Vain* (1848, 18mo):—*Godly Fear* (1867, 32mo):—*Selections from his Prayers* (1811, 8vo):—*Beauties of Jeremy Taylor* (Lond. 1845):—*Selections from his Writings* (in Sparks, *Essays and Tracts in Theology*, vol. vi, No. 11). There have been numerous editions of Dr. Taylor's works: *Select Works* (1819, 6 vols. 8vo, Longman); *Select Works*, by Bradley (2 vols.); *Select Works*, by T. S. Hughes, D.D. (5 vols. 8vo); *Practical Works*, by George Croly, D.D. (2 vols. 8vo); *Whole Works, with Essay Biographical and Critical*, by Henry Rogers (1835, 3 vols. imp. 8vo); *Whole Works*, by Rev. J. R. Pitman, with life of the author and a critical examination of his writings; *Life of Bishop Taylor*, by bishop Heber; and also *Life* by Rev. J. Wheeldon, in which the pure spirit of his writings is extracted and exhibited for the general benefit. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v. (W. P. S.)

**Taylor, John (1)**, "the Water Poet," was born at Gloucester, England, in 1580, and was educated at a free school in that town. He went to London, where he was apprenticed to a waterman, and followed this occupation for the most of his life; hence his appellation of "the Water Poet." He was also collector of the wine fees for the lieutenant of the Tower, and keeper of a public-house at Oxford and Westminster. He died in 1654. His productions, in prose and verse, number about 140, among which we notice, *Urania*, etc., with a *Narration of the Thirteen Sieges and Six Sackings of Jerusalem*, etc. (1615, 8vo):—*Superbia Flagellum, or the Whip of Pride* (1621, 8vo):—*Against Cursing and Swearing*, in prose and verse (*Works*, i, 39–55):—*The Life and Death of the Most Blessed among Women, the Virgin Mary*, etc. (1622, 8vo):—*Verbum Sempiternum*, an epitome of the Old Test. in verse (*Works*, pt. iii):—*Salvator Mundi*, an epitome of the New Test. in verse (with preceding, in 1693, 64mo, called *The Thumb Bible*):—*Book of Martyrs* (1639, 18mo) (*Works*, iii, 136–141):—*The Church's Deliverances*, from the year 1565 to 1630, in verse (*Works*, iii, 142–146):—*A Swarm of Sectaries and Schismatics* (1641, 4to). For full list and description of works, see Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Taylor, John (2)**, D.D., a learned English Dissenter and educator, was born near Lancaster in 1694, and was educated at Whitehaven. He settled first at Kirkcaldy, Lincolnshire, where he preached to a small congregation and taught a grammar-school for nearly twenty years. In 1733 he was settled over a Presbyterian Church at Norwich, but in 1757 went to Warrington, in Lancashire, to superintend an academy, and died there, March 5, 1761. Among his publications are, *The Scripture Doctrine of Original Sin* (Lond. 1738 and later):—*A Paraphrase on Romans* (ibid. 1745):—*A Scripture Catechism with Proofs* (ibid. 1745):—*A Collection of Tunes*, etc., with a *Scheme for Supporting the Spirit and Practice of Psalmody* (ibid. 1750):—*The Scripture Doctrine of Atonement* (1753):—*A Hebrew-English Concordance* (ibid. 1754, 2 vols. fol.):—*The Lord's Supper Ex-*

*plained upon Scripture Principles* (1754):—*The Covenant of Grace in Defence of Infant Baptism* (1755):—*A Sketch of Moral Philosophy* (1760). His greatest work is his *Hebrew Concordance*, adapted to the English Bible, in which every word in the Hebrew Bible, with all its forms and significations, is to be found. His *Scripture Doctrine of Original Sin* carried forth the celebrated answer of Edwards, in his treatise on *Original Sin*, which, whatever else may be said, it was not in the power of Taylor of Norwich to answer. In his *Paraphrase on the Romans*, with notes, he also found opportunity to broach freely his Arian sentiments, although the work also contains many valuable illustrations and comments on the Epistle.

**Taylor, John** (3), an English divine, was born at Shrewsbury, and baptized at St. Alkmund's Church, June 22, 1704, and was educated at the expense of Mr. Owen, of Condover, at St. John's College, Cambridge, where he took his A.B. in 1727. He afterwards became both fellow and tutor of this college, and in March, 1732, was appointed librarian, which office he held but a short time, being, in 1734, appointed registrar of the university. In 1744 he was made chancellor of the diocese of Lincoln, and in April, 1751, was preferred to the rectory of Lawford, in Essex; while in January, 1753, he became archdeacon of Buckingham. He was made canon residentiary of St. Paul's in July, 1757, and removed to London, where he resided until his death, April 14, 1766.

**Taylor, John** (4), a Revolutionary patriot and professor of natural philosophy and mathematics in Queen's College. He was elected by the trustees at their first meeting in 1771, and Rev. Dr. Jacobus Rutsen Hardenbergh was chosen as president. The college went into operation at once, and before the war several students were graduated. When the war broke out, these two illustrious men threw themselves ardently into the cause of independence. Professor Taylor drilled the students as a military company, and they were quite expert in the use of arms. The irruption of the British troops who occupied New Brunswick broke up the college. An advertisement is still extant that the exercises of the college would be continued at a private house at the head of the Raritan during one of these years. Subsequently professor Taylor became colonel of the New Jersey State regiment; but he continued to discharge his professional duties for a time. In a letter to governor Livingston, Sept. 25, 1779, he speaks of "the necessity of attending the examination of the students; and as the trustees insist upon my fulfilling my engagements, I hope I shall be discharged from the regiment as soon as possible." Of his subsequent life there is no public record accessible to the writer; but his name and relationship to the college are important and interesting as showing the patriotism of both officers and students of the infant college, and the close connection between enlightened academic education and the spirit of independence in that period of New Jersey history. Among those whom Prof. Taylor drilled in the company of students the most eminent was the first graduate of the college, Simeon De Witt, who was Washington's chief "geographer to the army," or topographical engineer, as the office is now termed. See *Revolutionary Correspondence of N. J.* p. 177; *Hist. of Rutgers College*. (W. J. R. T.)

**Taylor, John S.**, a Methodist Episcopal minister, was born in Delaware County, Pa., Aug. 29, 1795; converted March 10, 1827; admitted on trial in the Philadelphia Conference in 1833, and appointed to Milford Circuit; in 1835, to Cambridge Circuit; in 1836-37, to Accomac Circuit; in 1838, to Northampton Circuit; in 1839-40, to Snow Hill Circuit; in 1841-42, to Dorchester Circuit; in 1843-48, to Mariners' Bethel, Philadelphia; in 1849, superannuated. He died Aug. 21, 1849. See *Minutes of Annual Conferences*, iv, 423.

**Taylor, Jonathan**, a minister of the Society of

Friends, was a resident of Mount Pleasant, in the State of Ohio. He was much esteemed by the society of which he was a member. He was sent as a delegate to the societies in England and Ireland in the year 1831. During his journey he was attacked with inflammation of the lungs, and died at Kilnock, near Carlow, Ireland, June 11, 1831. See *Annual Monitor*, 1833, p. 57.

**Taylor, Joseph**, a Congregational missionary to India, was born in 1786; commenced his labors in India in 1812, laboring some time in the Bellary Mission, and removing thence to Belgaum, where he continued until 1852, when he retired to Bombay. Here he died, Nov. 19, 1859. See (Lond.) *Cong. Year-book*, 1861, p. 242.

**Taylor, Joshua**, a minister of the Methodist Episcopal Church, was born at Princeton, N. J., Feb. 5, 1768. At the age of seventeen he was apprenticed to a cabinet-maker, and continued in his employ three years, when the death of his mother awakened his mind to his spiritual condition. After a severe struggle against scepticism, he entered fully into communion with the Church in 1791; became an itinerant preacher, and was appointed to Flanders Circuit, N. J. The next year he went to New England, and labored in the circuits of Fairfield, Middletown, Granville, and Trenton, in Connecticut. In 1797 he was transferred to Maine, and appointed presiding elder of the newly formed district in that State. In 1798 he united with his duties as presiding elder the care of Readfield Circuit. In 1801 Mr. Taylor was appointed to the Boston District; in 1803 he was returned to the "District of Maine," and in 1804 was stationed at Portland, Me. He located in 1806, continuing to preach in Portland and vicinity, and teaching a private school. In 1824 he was chosen one of the presidential electors of Maine, and cast his vote for John Q. Adams. From 1826 to 1848 he confined his labors principally to Cumberland. In the latter year he re-entered the Conference, was entered as superannuated, and was appointed chaplain to the almshouse, where he attended to the duties of his office till June, 1852, when he was disabled by paralysis. He died at his home in Portland, March 20, 1861. About 1802 he was engaged in a pamphlet controversy with a Rev. Mr. Ward, a Congregational minister who attacked Methodist doctrines. "The Methodist party was entirely satisfied with the result of the controversy." See *Zion's Herald*, April 3, 1861.

**Taylor, Michael S.**, a Methodist Episcopal minister, was born in Scott County, Ky., Oct. 28, 1798; licensed to preach September, 1824, and some time afterwards received on trial in the Kentucky Conference. He travelled about four years in the Kentucky Conference; was then transferred to the Illinois Conference, and thence to the Indiana; was subsequently retransferred to the Illinois Conference, and appointed presiding elder in the Wabash District, where he continued his labors for four years. In 1836 he was appointed presiding elder of the Quincy District. He died July 20, 1838. In all the relations of life he was irreproachable. See *Minutes of Annual Conferences*, 1839, p. 661.

**Taylor, Nathaniel** (1), an English clergyman, was assistant minister in Westminster in 1683, and appointed pastor of a congregation at Salter's Hall in 1695. He died in 1702, at the age of about forty. He published, *Sermons* (Lond. 1688, 4to):—*Funeral Sermon* (1691, 4to):—*Preservative against Deism* (1698, 4to):—*Funeral Sermon* (1699, 4to):—*Discourse of Faith in Jesus Christ*, etc. (1700, 4to):—*Dr. William Sherlock's Cases and Letter of Church Communion*, etc., Considered (1702, 8vo):—*Practical Discourses* (1703, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Taylor, Nathaniel** (2), a Congregational minister, was born at Danbury, Conn., Aug. 27, 1722 (O. S.). He graduated at Yale College in 1745, and was ordained pastor, June 29, 1748, at New Milford, Conn., where he remained until his death, Dec. 9, 1800. For twenty-six

years he was one of the Yale College board of trustees. His only publications were two occasional *Sermons*. In 1759 he was chaplain, under Col. N. Whiting, at and around Crown Point and Ticonderoga. See Sprague, *Annals of the Amer. Pulpit*, i, 467.

**Taylor, Nathaniel William, D.D.**, an eminent Congregational preacher and divine, and the grandson of the preceding, was born at New Milford, Conn., June 23, 1786. He spent his early years on a farm, was prepared for college by Rev. Dr. Azel Backus, and graduated at Yale College in 1807, having had twice to relinquish his studies on account of disease of the eyes. He was private tutor for a year in Albany and Montreal, studied theology four years with Dr. Dwight, and in 1812 succeeded Moses Stuart in the pastorate of the First Church, New Haven, where he labored with great success for ten years. Of his preaching, Dr. Dutton thus speaks: "The intellectual qualities of his preaching were thorough and profound, yet lucid and scriptural: exposition and discussion of weighty themes; a marshalling of comprehensive forces of luminous and enkindled logic, to bear, with compacted and converging unity and climacteric power, on the one question in hand; a full and frank meeting of difficulties; bold, defiant, and powerful grappling with objections; fearless reference, in defence of scriptural doctrine and precept, to reason and common-sense; close and pungent applications to conscience, and earnest and tender appeals to the heart." Dr. Taylor was considered one of the ablest preachers of his time, and in certain aspects was thought to have had no equal. After he became theological instructor, especially in times of revival, his labors were widely sought by the Church and freely given. In 1822, upon the formation of the theological department in Yale College, he was chosen Dwight professor of didactic theology, which position he held until March 10, 1858, when he quietly and peacefully passed away from earth. It was as a teacher of theology that his influence has been most widely felt. In this field, he was an original investigator, and few men have left a deeper impress upon American divinity. In several important respects he diverged from the traditional theology of New England. He held that the mind, however affected by sin in intellect, sensibility, or will, is yet a free agent, capable by intellect to perceive and understand the objects and motives of choice, capable by sensibility to feel their influence, and capable by will to choose or refuse any one of them; and that the power of will, by which it makes a given choice, is a power that could in the time and circumstances have chosen differently and oppositely. He repudiated the predicating of the words "predestinated" and "decreed" to God, and substituted the word "purposed." While depravity is universal to the race, it is not to be ascribed to any property, propensity, or disposition of the soul, prior to actual transgression, as sinful in itself, or as the necessary cause of sin, nor to a sinful nature corrupted in or derived from Adam, sin being traced to the constitutional propensity of man for natural good, as perverted by his own moral agency. "Sin comes in as an unavoidable result, so far as divine prevention is concerned, of such materials as God uses, and must use, in a moral universe—to wit, free agents." God, having created man moral and responsible, cannot prevent the entrance of sin without contradicting himself. He admitted and taught that sin is among the things which are according to the counsel of God's will, yet only in an indirect and remote sense, God preferring a moral system in which sin is necessarily incidental to the non-existence of a moral system. As to the originality and soundness of Dr. Taylor's views concerning sin, much difference of opinion has prevailed. Some of his followers have claimed that they are original with him; others quote Whately, Woodward, and Dr. John Young as having enounced views in consonance with his. Dr. Pond charges him with reviving "the old Arminian deistical hypothesis," while Dr. Dutton claims,

on the contrary, that "time has fully proved that his mode was altogether best for the refutation of Arminianism." Dr. Whedon says that while Dr. Taylor "vindicated the divine government by introducing into his system the Arminian view of sin, he overthrows his own work by admitting the principle of preordination." At all events, the enunciation of Dr. Taylor's views gave rise to a prolonged and exciting controversy, which was carried on with unusual persistency and ability between himself and his colleagues, on the one hand, and Drs. Tyler, Woods, and other prominent Congregational divines, on the other. Dr. Taylor never admitted that his opinions were heretical, judged by the standard theologians of New England, but labored hard to prove their substantial conformity to the latter. Defended and enforced by his intense earnestness and eloquence, and by his powerful logic, his theology has won many adherents, and—so it has been claimed—has silently modified, and in a true sense rationalized, the Calvinistic theology. Dr. Taylor attached much importance to the truths of natural religion, and he also laid much stress upon true theories of mind. A correct mental philosophy he deemed fundamental, and elaborated with much care a system of his own. With Dwight and Edwards, he held that all motives find their ultimate ground of appeal in the desire of personal happiness, and that the idea of right in its last analysis is resolved into a tendency to the highest happiness. As a teacher, Dr. Taylor won the admiration and affection of his pupils, nearly seven hundred being under his training, and inspired them with enthusiasm and pleasure in the pursuit of their studies. In his social and domestic relations, he was peculiarly attractive and lovely, and peculiarly beloved. As an author, Dr. Taylor is known principally by posthumous works. His controversial articles were contributed principally to the *Monthly and Quarterly Christian Spectator* and to the *Spirit of the Pilgrims*. Since his death there have appeared the following, edited by Noah Porter, D.D.: *Practical Sermons* (N. Y. 1858, 8vo):—*Lectures on the Moral Government of God* (ibid. 1859, 2 vols. 8vo), his greatest and most celebrated performance:—*Essays, Lectures, etc., upon Select Topics in Revealed Theology* (ibid. 1859, 8vo). See the *Congregational Quarterly*, 1860, p. 245 sq. (by Dr. Dutton); Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Appleton's *Cyclopædia*, s. v.; also the *Christ. Quar. Spec.* vols. ii, iv, v; *Spirit of the Pilgrims*, vols. v, vi; *New-Englander*, Nov. 1859 (by Prof. Martin); *Amer. Theol. Rev.* 1859, p. 391 sq. (by Dr. Pond); *Meth. Quar. Rev.* 1859, p. 317, 667; 1860, p. 146, 666-669 (by Dr. Whedon); *Memorial of Nathaniel W. Taylor, D.D.* (New Haven, 1858, 8vo), comprising sermons by Drs. Bacon, Dutton, and Fisher. See THEOLOGY; TYLER, BENNET.

**Taylor, Oliver Alden**, a Congregational minister, was born at Yarmouth, Mass., Aug. 18, 1801. He graduated at Union College, 1825; entered the ministry November, 1828; and, spending the next eleven years in study and teaching, he became pastor at Manchester Sept. 18, 1839, and died Dec. 18, 1851. He published, *Catalogue of the Andover Theological Seminary* (1838):—*Piety in Humble Life* (1844, by the Mass. S. S. Society):—and numerous articles, original and translated, and some poems, in various periodicals. A memoir of his life by Rev. T. A. Taylor, his brother, was published in 1853, a second edition of which appeared in 1856. See Sprague, *Annals of the Amer. Pulpit*, ii, 725.

**Taylor, Richard Cowling**, an eminent English antiquary, was born at Hinton, Suffolk, Jan. 18, 1789, and emigrated to the United States in July, 1830, settling in Philadelphia. He was a surveyor and geologist, and was greatly useful in developing the mineral resources of various parts of the country. He died Oct. 26, 1851. In addition to scientific works, he published *Index Monasticus, or the Abbeys and other Monasteries, Alien Priories, Friaries, Colleges, Collegiate Churches, Hospitals,*

*etc., in the City of Norwich* (Lond. 1821, fol.). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Taylor, Rowland**, LL.D., an English clergyman and martyr, is supposed to have been a Yorkshireman; and after being educated at Cambridge, became the head of Border Hostle, near Caius College. He was presented by archbishop Cranmer to the rectory of Hadleigh, where he attended faithfully to the spiritual needs of his parishioners. In 1553 he was summoned before Gardiner for resisting the popish mass at Hadleigh. He defended his cause with firmness, but was committed to the King's Bench Prison, where he remained till Jan. 22, 1555, when he was sentenced to be burned. The execution took place Feb. 8, 1555, on Aldham Common, near Hadleigh. See Fox, *Book of Martyrs*; Hook, *Ecc. Biog.* s. v.

Martyr's Stone at Hadleigh.

**Taylor, Samuel**, a Presbyterian minister, was born in Nova Scotia, Sept. 14, 1795; graduated at the Princeton Theological Seminary in 1825; was licensed to preach the same year, and shortly after was ordained and installed pastor of the Millersburg and Stoner Mouth churches of Bourbon County, Ky. In 1831 became pastor of the Nicholasville and Cedar Creek churches, Ky.; in 1836, at Frankfort, Ind.; in 1845, Waveland, Ind.; in 1852, Washington, Ind.; in 1854, Waco, Texas. He died June 9, 1855. Mr. Taylor was a close student and a man of literary tastes. As a theologian he was acute, prolific, and systematic. He was for a number of years an active member of the Board of Trustees of Hanover College, Ind., and of the New Albany Theological Seminary, Ind. See Wilson, *Presb. Hist. Almanac*, 1867, p. 206.

**Taylor, Stephen**, D.D., a Presbyterian minister, was born at Tyringham, Berkshire Co., Mass., Feb. 26, 1796. He pursued his preparatory studies at Lenox Academy; graduated at Williams College, with the highest honor, in 1816; was preceptor of the academy at Westfield, Mass., for one year, and tutor in Williams College 1817-19; studied theology in Andover Theological Seminary, and afterwards privately; was licensed to preach in 1824, and shortly after was ordained pastor of a church in Halifax Co., Va. In 1826 he became pastor of the Shockoe Hill Church, Richmond, Va.; in 1835 was appointed professor of ecclesiastical history in the Union Theological Seminary in Prince Edward Co.; in 1838 resigned, and shortly after became pastor of a church in Abingdon, Va.; in 1843, of the High Street Church in Petersburg, Va.; in 1847 returned to Richmond, and engaged in teaching; in 1850 became pastor of the Duval Street Church, Richmond, and continued in charge of it until his death, March 4, 1853. Mr. Taylor was an instructive preacher, an excellent pastor, and a learned tutor. See Sprague, *Annals of the Amer. Pulpit*, iv, 673.

**Taylor, Thomas** (1), a learned Puritan divine, was born at Richmond, Yorkshire, in 1576; and was educated at Christ's College, Cambridge, of which he became fellow, and afterwards Hebrew lecturer. On leaving the university, he settled first at Watford, Hertfordshire; then at Reading, Berkshire; and in 1625 he obtained the living of St. Mary Aldermanbury, London, which he retained during the remainder of his life. He died early in 1632. His contemporaries unite in giving

him a high character for learning, piety, and usefulness. Among his works are, *Commentary on the Epistle of St. Paul written to Titus* (Camb. 1612, 4to; 1616, 1619, best ed. 1658, fol.):—*Treatise of Christian Religion* (1616, 4to):—*Exposition upon Parable of the Sower*, etc. (Lond. 1621, 4to; 1631, 1634):—*Christ's Victory over the Dragon* (1633, 4to):—*Christ Revealed, or the Old Testament Explained*, etc. (1635, sm. 4to). Other works, with *Life*, appeared (Lond. 1658, fol.). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Taylor, Thomas** (2), "the Platonist," was born in London, May 15, 1758. He studied for three years at St. Paul's school, with the design of becoming a Dissenting minister, but afterwards entered Lubbock's banking-house. Later he received the appointment of assistant secretary to the Society for the Encouragement of Arts, Manufactures, and Commerce, which post he held several years. During the last forty years of his life he resided at Walworth (partially supported by an income of £100 from his friend W. Meredith). He died Nov. 1, 1835. His works comprise sixty-three volumes, of which twenty-three are large quartos. Besides treatises on arithmetic and geometry, and a few minor essays, etc., his principal work was the translation of Plato, Aristotle, and other Greek and Latin authors. *The Works of Plato, viz. his Fifty-five Dialogues and Twelve Epistles; Nine of the Dialogues by the late Floyer Sydenham, and the Remainder by Thomas Taylor*, etc. (1804, 5 vols. 4to), was printed at the expense of the duke of Norfolk, who locked up nearly the whole edition in his house, where it remained till 1848, when it was sold. Of his translation of Aristotle (1806-12, 10 vols. 4to) only fifty complete copies were struck off, the expense being defrayed by W. Meredith. His latest works were translations of Proclus, *On Providence and Evil* (1833, 8vo; 1841, 8vo); and Plotinus, *On Suicide* (1834, 8vo). His translations have been commended by some, but by others very severely criticised. For full catalogue of Taylor's works, see Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Taylor, Thomas House**, D.D., a clergyman of the Protestant Episcopal Church, was born of English parents in Georgetown, S. C., Oct. 18, 1799. His early education was acquired at Guilford, Conn.; he graduated from South Carolina College, Columbia, as valedictorian of his class; studied theology under bishop White; was ordained deacon in 1821, and priest in 1826. For nine years he was rector of St. John's Church, Colleton, John's Island, S. C. In April, 1834, he became rector of Grace Church, New York city, where he remained until the close of his life. He died at West Park, on the Hudson, Sept. 9, 1867. Dr. Taylor was a fine scholar, a man of marked character, and retained the respect and affection of his people. He held several positions of honor and trust. See *American Quar. Church Rev.* Jan. 1868, p. 665.

**Taylor, Timothy**, an English clergyman, was born at Hempstead, Hertfordshire, in 1609, and entered Queen's College, Oxford, in 1626. He became vicar of Almeley, Hertfordshire; subsequently a Presbyterian, and then an Independent. In 1668 he removed to Dublin, and became assistant to Samuel Mather, and afterwards to Nathaniel Mather, and died there in 1681. He wrote *Defence of Sundry Positions and Scriptures alleged to Justify the Congregational Way* (Lond. 2 pts. 4to: pt. i, 1645; pt. ii, 1646). They were answered by Richard Hollingworth in his *Certain Queries* (1646, 4to). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Taylor, Timothy Alden**, a Congregational minister and author, was born at Hawley, Mass., Sept. 7, 1809. He graduated at Amherst College in 1835, and at the Andover Theological Seminary in 1838. He was ordained at Slatersville, R. I., 1839, where he preached until his death—cut off suddenly in the midst of his

usefulness, March 2, 1858. Mr. Taylor was honest and unflinching in his attachment to his principles, earnest and faithful. He was a diligent student, and wrote much for the periodical press. He also published a *Memoir* of his brother, Rev. Oliver Alden Taylor (Boston, 12mo, 1853; 2d ed. 1856):—*The Solace* (32mo):—*The Two Mothers* (32mo):—*Zion* (82mo):—*Zion's Pathway* (12mo):—*Bible View of the Death Penalty* (8vo). See *Cong. Quarterly*, 1859, p. 96; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Taylor, Veron D.**, a Presbyterian minister, was born at Hinesburg, Vt., in 1798; received an academical education; studied theology privately; was licensed by the Addison Congregational Association, Vt., and ordained by a Congregational council in 1826. His fields of labor were as follows: Elizabethtown, N. Y.; Litchfield, South Farms, Conn.; Amenias, N. Y.; Galesburg, Mich.; Huntsburg and Dover, Ohio; and was Seaman's chaplain at Buffalo, N. Y., and Cleveland, Ohio. He died Sept. 6, 1864. See Wilson, *Presb. Hist. Almanac*, 1866, p. 228.

**Taylor, William Cooke, LL.D.**, an Irish author, was born at Youghal in 1800, and was educated at Trinity College, Dublin. He went to London in 1829, where he remained until 1847, when he returned to Ireland, to serve the viceregal household in the capacity of statistician. He died in Dublin, Sept. 12, 1849. In addition to many works on secular subjects, he wrote, *Catechism of the Christian Religion* (Lond. 1828, 12mo):—*History of Mohammedanism and its Sects* (1834, 12mo):—*History of Popery* (new ed. 1837, 8vo):—*Illustrations of the Bible and Confirmations of Sacred History from the Monuments of Egypt* (1838, 12mo):—*History of Christianity from its Promulgation to its Legal Establishment in the Roman Empire* (1844, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Tchu-chor**, the prayer-mill used by the Buddhist priests in Chinese Tartary. It is constructed in two forms. (1.) One is a small wheel with flies, which move either by wind or water. On these flies are written prayers, and it is supposed that all the merit of their recitation is conferred upon him that sets the wheel in motion. (2.) The other is a huge egg-shaped barrel, as large as a hog'shead, upon an upright spindle, composed of endless sheets of paper pasted one over the other, and on each sheet is written a different prayer. At the bottom of this pasteboard barrel is a cord, which gives to it a rotary motion. The lamas make this spin rapidly, and thus acquire the merit of the repetition of all the prayers written on all the papers at every rotation of the barrel. The lamas spend much of their time in plying the tchu-chor by way of interceding for the people. In return they receive from each person a small compensation for their trouble.

**Teach** (Heb. prop.  $\text{נָתַן}$ , but also many other words; Gr. prop.  $\delta\delta\acute{\alpha}\sigma\kappa\omega$ , but often other terms). Teaching is an important branch of the commission which Christ gave to his apostles before he left the earth. "Go," said he, "teach all nations," or, as we have it recorded by another of the evangelists, "Preach the Gospel to every creature." In this way they were to make disciples, as the word  $\mu\alpha\tau\eta\tau\epsilon\upsilon\sigma\alpha\tau\epsilon$  imports. It is one of the precious promises of the new covenant that all its subjects shall be "taught of the Lord" (Isa. liv, 13). The Lord Jesus quoted these words in the days of his public ministry (John vi, 45), and describes the effect of this teaching thus: "Every man, therefore, that hath heard, and hath learned of the Father, cometh unto me," which he afterwards explains to mean neither more nor less than believing on him. See **PREACHING**.

**Teachers**, or "doctors" (v. r.), are mentioned among divine gifts in Ephes. iv, 11, and it is possible that the apostle does not mean such ordinary teachers (or pastors) as the Church now enjoys; but as he seems to

reckon them among the *extraordinary* donations of God, and uses no mark of distinction or separation between apostles, with which he begins, and doctors, with which he ends, it may be that he refers to the nature of the office of the Jewish doctors; meaning well-informed persons, to whom inquiring Christian converts might have recourse for removing their doubts and difficulties concerning Christian observances, the sacraments, and other rituals, and for receiving from Scripture the demonstration that "this is the very Christ;" and that the things relating to the Messiah were accomplished in Jesus. Such a gift could not but be very serviceable in that infant state of the Church, which, indeed, without it, would have seemed, in this particular, inferior to the Jewish institutions. With this agrees the distinction (Rom. xii, 7) between doctors (*teaching, διδάσκων*) and exhorters, q. d. "he who gives advice privately, and resolves doubts, etc., let him attend to that duty; he who exhorts with a loud voice (*παρκαλῶν*), let him exhort" with proper piety. The same appears in 1 Cor. xii, 28, where the apostle ranges, 1st, apostles, public instructors; 2d, prophets, occasional instructors; 3d (*διδάσκαλοι*), doctors or teachers, private instructors. See **GIFTS**.

For monographs on our Lord as the Great Teacher, see Hase, *Leben Jesu*, p. 130 sq. See **JESUS CHRIST**.

**Tears** ( $\text{נָּזַף}$ ,  $\delta\acute{\alpha}\kappa\rho\nu\alpha$ ) are the well-known emblem and usual accompaniment of grief; and as grief is generally most violent when it is indulged for the dead, so in the two following passages the wiping-away of tears is connected with the abolition of death: Isa. xxv, 8, "And the Lord Jehovah shall wipe away the tear from off all faces;" Rev. vii, 17, "And God shall wipe away all tears from their eyes." Tears are wont to be poured out on occasions of mortality: thus in Jer. xxxi, 15, "A voice was heard in Ramah, lamentation and bitter weeping, Rachel weeping for her children refused to be comforted for her children, because they were not;" again in xxii, 10, "Weep ye not for the dead, neither bemoan him, but weep sore for him that goeth away, for he shall return no more, nor see his native country." Tears are sometimes shed for national calamities: thus in Lam. i, 2, "She weepeth sore in the night, and her tears are on her cheeks;" again in Numb. xiv, 1, "And all the congregation lifted up their voice and cried, and the people wept that night." In Gen. xxi, 15, 16, Hagar's pitiable case is thus described, "And the water was spent in the bottle, and she cast the child under one of the shrubs. And she went and sat her down over against him a good way off, as it were a bow-shot; for she said, Let me not see the death of the child. And she sat over against him, and lifted up her voice and wept." Tears are often the symbol of divine judgments, as they are sometimes also of human oppressions. (See Eccles. iv, 1; Acts xx, 19; Jer. xiv, 17.) They are sometimes the fruit of repentance and contrition. (See Heb. xii, 7; Matt. xxvi, 15.) But commonly they are the result of natural affection deploring a beloved object, of which the examples are too obvious and numerous to cite. But whatever the causes of tears to the righteous, all these shall be abolished, which is what is meant by "God's wiping away all tears from their eyes." For death, oppression, calamity, repentance, shall have no place in the heavenly region. Weeping may endure for a night, but joy cometh in the morning. Those who sow in tears shall reap in joy. See **GRIEF**.

For the *valley of tears* (Psa. lxxiv, 6), see **BACA**.

For monographs on the tears of Christ over Jerusalem (Luke xix, 41), see Volboding, *Index Programmatum*, p. 53. Comp. Kiesling, *De Lacrimis Vatum* (Lips. 1747). See **JESUS CHRIST**.

The so-called *lachrymatories*, or "tear-bottles," supposed by some to have been used for collecting the tears of the mourners at the graves of the ancients (Thomson, *Land and Book*, i, 147), were rather ves-

sels for perfumery or flowers (see the *Penny Cyclop.* a. v.).

**Teāshur.** See BOX-TREE.

**Te'bah** (Heb. *Te'bach*, תֵּבַח, *slaughter*, as often; Sept. Ταβήκ; Josephus, Ταβαιος, *Ant.* i, 6, 5; Vulg. *Tabeē*), the oldest of the four sons of Nahor by his concubine Reumah (Gen. xxii, 24). B.C. cir. 2050.

**Tebal'ah** (Heb. only in the prolonged form *Tebalya'hu*, תֵּבֵלְיָהוּ, *purified* [Furst, *protected*] by *Jehovah*; Sept. Ταβελιας v. r. Ταβλαί; Vulg. *Tabelias*), third of the four sons of Hoshah "of the children of Merari" (1 Chron. xxvi, 11). B.C. 1014.

**Te'beth** (Heb. *Tebeth'*, תֵּבֵת, apparently of Assyrian origin, *Tibituo*), the tenth month (Esth. ii, 16) of the sacred year of the Hebrews, corresponding in the main to *January*. Jerome has the following comment upon Ezek. xxix, 1: "Decimus mensis, qui Hebræis appellatur *Tebeth*, et apud Ægyptios [with whom it was the fifth month] Τύβη [or Τωβη, Coptic *Tobi*], apud Romanos *Januarius*." In Arabic it is called *Tubah*, in Greek *Tybi* or *Týβ*, and in Sanscrit *Tapas*. See CALENDAR, JEWISH.

**Tebul Yom.** See TALMUD.

**Te Deum** LAUDĀMUS (i. e. "We praise thee, O God"). This hymn, which is written in *honorem Sanctissimæ Trinitatis*, commonly called *Hymnus SS. Ambrosii et Augustini*, and known as the *Ambrosian Hymn*, is erroneously ascribed to Ambrose. In a manuscript chronicle preserved at Milan, and erroneously ascribed to Decius (d. 553), bishop of Milan, we are told that at the baptism of Augustine, which Ambrose performed in the year 387, both the baptist and the candidate spontaneously, as if inspired by the Holy Ghost, intoned this hymn. This tradition would seem to have been corroborated by a passage of a spurious (the 92d) sermon of Ambrose which treats of the baptism of Augustine. But, in truth, the tradition owes its origin to this passage. Augustine himself, who speaks, in his *Confessions*, of his conversion and baptism, does not mention anything of the kind. Some have ascribed this hymn to Athanasius, bishop of Alexandria; others to Nicetius, about the year 535; and a third class to Hilary of Poitiers. The whole tenor of this hymn proves its Eastern origin, and at a very early time. Indeed, the *Codex Alexandrinus* contains a morning hymn commencing Καὶ ἑκάστην ἡμέραν εὐλογῆσω καὶ αἰνῶσω τὸ ὄνομα σου εἰς τὸν αἰῶνα; and this circumstance, together with the fact of its great resemblance with the *Te Deum*, induced Daniel (*Thesaur. Hymnol.* ii, 289 sq.) to say, "The *Te Deum* is based upon an ancient Greek hymn which, extensively known in the East, has found many translators, which fact not only accounts for the variety of readings, but also for the various authors to whom it is ascribed. Of these versions, the one which Ambrose made for the service of the Milan Church met with the most approval and was finally adopted, and this explains why it was commonly called the *Ambrosian Hymn*."

Even before the time of Charlemagne, this hymn was sung on special occasions in both churches of the East. The Roman Breviary uses it as one of the morning hymns to be sung throughout the year, with the exception of the Sundays in Advent, Lent, and the Feast of the Holy Innocents. Long before the Reformation, it was known in a German translation. In 1533 it was translated by Luther, "Herr Gott, dich loben wir," and since that time it has been translated into German and English by different authors. We subjoin a few lines of the original:

"Te Deum laudamus, te Dominum confitemur.  
Te æternum Patrem omnis terra veneratur.  
Tibi omnes angeli, tibi cæli et universe potestates,  
Tibi Cherubim et Seraphim incessabili voce proclamant:  
Sanctus, Sanctus, Sanctus Dominus Deus Sabaoth.  
Pleni sunt cæli et terra majestatis gloriæ tuæ."

This beautiful and inspiring composition is read or chanted at the morning service of the Church of England after the reading of the first lesson. The rubric enjoins that it shall be said or sung daily throughout the year in the vernacular language. The ancient offices of the English Church gave this hymn the title of the "Psalm *Te Deum*" or the "Song of Ambrose and Augustine" indifferently. As used it may be considered as a responsory psalm, since it follows a lesson; and here the practice of the Church of England resembles that directed by the Council of Laodicea, which decreed that the psalms and lessons should be read alternately. The hymn consists of three equal parts—praise, confession of belief, and supplication. See Rambach, *Anthologie christlicher Gesänge*, i, 87 sq.; Bässler, *Auswahl altchristlicher Lieder*, p. 44 sq.; Herzog, *Real-Encyklop.* i, 275 sq. (2d ed. p. 328 sq.); Tenzel, *Exercitationes X de Hymno Te Deum Laudamus* (Lips. 1692); Bingham, *Christ. Antiq.* bk. xiv, ch. xi, § 9; and the monographs cited by Volbeding, *Index Programmatum*, p. 134. (B. P.)

**Te Ig'tur** (i. e. "Thee therefore"), the first two words of the canon of the Latin mass. This part of the eucharistic service is said to have been drawn up under the direction of Gregory the Great, though portions of it are doubtless of much earlier date. It was also called *Obsecratio*. This service, as distinct from the missal, was used, and is still used, by bishops, prelates, and other dignitaries; and as the canon is the most sacred part of the service, oaths upon the *Te Ig'tur* were regarded as especially solemn. The *Te Ig'tur* appears to have been used in the ordeal of compurgation.

**Teen** (Chinese, *heaven*), a word generally used by the early Roman Catholic missionaries to denote the Supreme Being; but, to render it more evidently descriptive of a person, the Inquisition ordered the addition to it of the word *Choo*, "Lord." Thus Teen-Choo meant "Lord of heaven," and came to be the recognised appellative of God by Romish converts. The Protestant missionaries rejected Teen, and substituted *Shin* or *Shang-te*.

**Teenah.** See FIG.

**Tehaph'nehes** (Ezek. xxx, 18). See TAHPHANES.

**Tehin'nah** (Heb. *Tehinnah'*, תִּינָה, *supplication*, as often; Sept. Θανά v. r. Θαιμάν; Vulg. *Tehinna*), a name occurring in the obscure list of the descendants of Judah (1 Chron. iv, 12) as the last-named of the three sons of Eshton (q. v.), and grandson of Chelub (q. v.); with the added epithet "the father of the city of Nahash" (*Abi-Ir-Nachash*), and the statement "These are the men of Rechah" (q. v.). From all this, we can only gather that Tehinnah was probably related to the family of David. B.C. cir. 1083. See NAHASH.

**Tehoroth.** See TALMUD.

**Teil-tree** is properly the linden-tree, or *Tilia Europæus* of botanists. It is mentioned in the A. V., in Isa. vi, 13, "as a teil-tree, and as an oak;" but as in the Hebrew the word is תֵּלָה, *eláh*, usually rendered "oak," by many supposed to be the *terebinth*, or "turpentine-tree," there is no reason for giving it a different signification in this from what it has in other passages. See OAK.

**Teind**, the name given in the law of Scotland to TITHES (q. v.).

**Te'kel** (Chald. *Tekel'*, תֵּקֵל, *weighed*, as immediately explained in the context; Sept. Σεκέλ; Vulg. *thecel*), the second of the ominous words in the sentence of the Babylonian king (Dan. v, 25, 27). See MENE.

**Tekeleth.** See BLUE.

**Teko'a** (Heb. *tek'ah*, תִּקְוָה, [once with *h* directive, תִּקְוָה, 2 Sam. xiv, 2], *a stockade*; Sept. Θευκώ and Θευκού; Josephus *Θεκωά* and *Θεκωί*; Vulg. *Thecue*; A. V.

"Tekoah" in 2 Sam. xiv), a town in the tribe of Judah (2 Chron. xi, 6, as the associated places show; and inserted in its place in Josh. xv, 59, 60 in the Sept. [see Keil, *ad loc.*]), on the range of hills which rise near Hebron, and stretch eastward towards the Dead Sea. These hills bound the view of the spectator as he looks to the south from the summit of the Mount of Olives. Jerome (*in Amos, Proem.*) says that Tekoa was six Roman miles from Bethlehem, and that as he wrote (*in Jer.* vi, 1) he had that village daily before his eyes ("Thekoam quotidie oculis cernimus"). In his *Onomasticon* (s. v. *Εκθει*, 'Εκθει) he represents Tekoa as nine miles only from Jerusalem; but elsewhere he agrees with Eusebius in making the distance twelve miles. In the latter case he reckons by the way of Bethlehem, the usual course in going from the one place to the other; but there may have been also another and shorter way, to which he has reference in the other computation. Some suggest (Bachiene, *Palästina*, ii, 60) that an error may have crept into Jerome's text, and that we should read *twelve* there instead of *nine*. In 2 Chron. xx, 20 (see also 1 Macc. ix, 33) mention is made of "the wilderness of Tekoa," which must be understood of the adjacent region on the east of the town (see *infra*), which in its physical character answers so entirely to that designation. It is evident from the name (derived from עָקַה, "to strike," said of driving the stakes or pins into the ground for securing the tent), as well as from the manifest adaptation of the region to pastoral pursuits, that the people who lived here must have been occupied mainly as shepherds, and that Tekoa in its best days could have been little more than a cluster of tents, to which the men returned at intervals from the neighboring pastures, and in which their families dwelt during their absence.

The Biblical interest of Tekoa arises, not so much from any events which are related as having occurred there as from its connection with various persons who are mentioned in Scripture. It is not enumerated in the Hebrew catalogue of towns in Judah (Josh. xv, 49), but is inserted in that passage by the Sept. The "wise woman" whom Joab employed to effect a reconciliation between David and Absalom was obtained from this place (2 Sam. xiv, 2). Here, also, Ira, the son of Ikesh, one of David's thirty "mighty men" (יְמִינֵי דָוִד), was born, and was called on that account "the Tekoite" (2 Sam. xxiii, 26). It was one of the places which Rehoboam fortified, at the beginning of his reign, as a defence against invasion from the south (2 Chron. xi, 6). Some of the people from Tekoa took part in building the walls of Jerusalem after the return from the Captivity (Neh. iii, 5, 27). In Jer. vi, 1, the prophet exclaims, "Blow the trumpet in Tekoa and set up a sign of fire in Beth-haccerem"—the latter probably the "Frank Mountain," the cone-shaped hill so conspicuous from Bethlehem. It is the sound of the trumpet as a warning of the approach of enemies, and a signal-fire kindled at night for the same purpose, which are described here as so appropriately heard and seen, in the hour of danger, among the mountains of Judah. But Tekoa is chiefly memorable as the birthplace of the prophet Amos, who was here called by a special voice from heaven to leave his occupation as "a herdsman" and "a puncturer of wild figs," and was sent forth thence to testify against the sins of the kingdom of Israel (Amos vii, 14). Accustomed to such pursuits, he must have been familiar with the solitude of the desert, and with the dangers there incident to a shepherd's life. Some effect of his peculiar training amid such scenes may be traced, as critics think (De Wette, *Einl. ins Alte Test.* p. 356), in the contents and style of his prophecy. Jerome (*ad Amos* i, 2) says, "... etiam Amos prophetam qui pastor de pastoribus fuit et pastor non in locis cultis et arboribus ac vineis consitis, aut certe inter sylvas et prata virentia, sed in lata eremi vastitate, in qua versatur leonum feritas et interfectio pecorum, artis

*sua usum esse sermonibus.*" Comp. Amos ii, 13; iii, 4, 12; iv, 1; vi, 12; vii, 1; and see the striking remarks of Dr. Pusey, *Introd. to Amos*.

In the genealogies of Judah (1 Chron. ii, 24, and iv, 5), Ashur, a posthumous son of Hezron and a brother of Caleb, is mentioned as the father of Tekoa, which appears to mean that he was the founder of Tekoa, or at least the owner of that village. See Rödiger in Gesen. *Thesaur.* iii, 1518.

The common people among the Tekoites displayed great activity in the repairs of the wall of Jerusalem under Nehemiah. They undertook two lengths of the rebuilding (Neh. iii, 5, 27). It is, however, specially mentioned that their "lords" (אֲדֹנָיִם) took no part in the work.

Tekoa is known still as *Tekū'a*, and, though it lies somewhat aside from the ordinary route, has been visited and described by several recent travellers. Its distance from Beit-Lahm agrees precisely with that assigned by the early writers as the distance between Tekoa and Bethlehem. It is within sight also of the "Frank Mountain," beyond question the famous Herodium, or site of Herod's Castle, which Josephus (*War.* iv, 9, 5) represents as near the ancient Tekoa. It lies on an elevated hill, which spreads itself out into an irregular plain of moderate extent. Its "high position" (Robinson, *Bibl. Res.* i, 486) "gives it a wide prospect. Towards the north-east the land slopes down towards Wady Khureitūn; on the other sides the hill is surrounded by a belt of level table-land; beyond which are valleys, and then other higher hills. On the south, at some distance, another deep valley runs off south-east towards the Dead Sea. The view in this direction is bounded only by the level mountains of Moab, with frequent bursts of the Dead Sea, seen through openings among the rugged and desolate intervening mountains." In the spring there are often encampments of shepherds there, consisting of tents covered with the black goat-skins so commonly used for that purpose; they are supported on poles and turned up in part on one side, so as to enable a person without to look into the interior. Flocks pasture near the tents and on the remoter hillsides in every direction. There are horses and cattle and camels also, though these are not so numerous as the sheep and goats. A well of living water, on the outskirts of the village, is a centre of great interest and activity, the women coming and going with their pitchers, and men filling the troughs to water the animals which they have driven thither for that purpose. The general aspect of the region is sterile and unattractive; though here and there are patches of verdure, and some of the fields, which have yielded an early crop, may be seen recently ploughed up, as if for some new species of cultivation. Fleecy clouds, white as the driven snow, float towards the Dead Sea, and their shadows, as they chase each other over the landscape, seem to be fit emblems of the changes in the destiny of men and nations, of which there is so much to remind one at such a time and in such a place. Various ruins exist at Tekoa, such as the walls of houses, cisterns, broken columns, and heaps of building-stones. Some of these stones have the so-called "bevelled" edges which are supposed to show a Hebrew origin. There was a convent here at the beginning of the 6th century, established by St. Tabus, and a Christian settlement in the time of the Crusaders; and undoubtedly most of these remains belong to modern times rather than ancient. Among these should be mentioned a baptismal font, sculptured out of a limestone block, three feet nine inches deep, with an internal diameter at the top of four feet, and designed evidently for baptism as administered in the Greek Church. It stands in the open air, like a similar one at Jufna, near Beitin, the ancient Bethel. See more fully in the *Christian Review* (N. Y.), 1853, p. 519. Near Tekū'a, among the same mountains, on the brink of a frightful precipice, are the ruins of Khureitūn, pos-

sibly a corruption of Keriōth (Josh. xv, 25), and in that case perhaps the birthplace of Judas the traitor, who was thence called Iscariot, i. e. "man of Keriōth." It is impossible to survey the scenery of the place and not to feel that a dark spirit would find itself in its own element amid the seclusion and wildness of such a spot. High up from the bottom of the ravine is an opening in the face of the rocks which leads into an immense subterranean labyrinth, which many suppose may have been the Cave of Adullam, in which David and his followers sought refuge from the pursuit of Saul. It is large enough to contain hundreds of men, and is capable of defence against almost any attack that could be made upon it from without. When a party of the Turks fell upon Tekō'a and sacked it, A.D. 1138, most of the inhabitants, anticipating the danger, fled to this cavern, and thus saved their lives. It may be questioned (Robinson, i, 481) whether this was the actual place of David's retreat; but it illustrates, at all events, that peculiar geological formation of the country which accounts for such frequent allusions to "dens and caves" in the narrations of the Bible. It is a common opinion of the natives that some of the passages of this particular excavation extend as far as to Hebron, several miles distant, and that all the cord at Jerusalem would not be sufficient to serve as clue for traversing its windings. See ODOLAM.

One of the gates of Jerusalem in Christian times seems to have borne the name of Tekoa. Arculf, at any rate, mentions the "gate called Tecutitis" in his enumeration of the gates of the city (A.D. 700). It appears to have led down into the valley of the Kedron, probably near the southern end of the east wall. But his description is not very clear. Possibly to this Jerome alludes in the singular expression in the *Epit. Paulæ* (§ 12), "... revertar Jerosolymam et per Thecuam atque Amos, rutilantem montis Oliveti crucem aspiciam." The Church of the Ascension on the summit of Olivet would be just opposite a gate in the east wall, and the "glittering cross" would be particularly conspicuous if seen from beneath its shadow. There is no more *prima facie* improbability in a Tekoa gate than in a Bethlehem, Jaffa, or Damascus gate, all which still exist at Jerusalem. But it is strange that the allusions to it should be so rare, and that the circumstances which made Tekoa prominent enough at that period to cause a gate to be named after it should have escaped preservation. See, in addition to the above authorities, Reland, *Palest.* p. 1028; Schubert, *Reisen*, p. 24; Raumer, *Palästina*, p. 219; Turner, *Tour*, ii, 240; Irby and Mangles, p. 344; Tristram, *Land of Israel*, p. 402; Schwarz, *Palest.* p. 114; Thomson, *Land and Book*, ii, 424; Porter in *Murray's Handbook*, p. 251; Büdcker, *Palestine*, p. 252.

**Teko'ite** (Heb. with the art. *hat-Teko'i*, תִּקְוִי, [in 2 Sam. xxiii, 26; Neh. iii, 27, תִּקְוִיָּה], patril from *Tekoa*; Sept. ὁ Θεκωίτης and ὁ Θεωί, v. r. Θεκωνίτης and Θεκά; Vulg. *Thecutites*, *Thecuenus*, and *de Thecua*), an inhabitant of Tekoa (q. v.), an epithet of Ira the son of Ikkesh, one of David's warriors (2 Sam. xxiii, 26; 1 Chron. xi, 28; xxvii, 9). The name survived the Captivity (Neh. iii, 5, 27).

**Tela Stragūla**, a term used to designate the upper covering for the holy table when not being used for the sacrifice. It is commonly called the *altar protector*.

**Tel-a'bīb** [many *Tel'-abīb*] (Chald. *Tel-Abīb*, תֵּל-אַבִּיב, *corn-hill*; Sept. Μερῖπος; Vulg. *Ad acervum novarum frugum*), was probably a city of Chaldaea or Babylonia (Ezra iii, 15), not of Upper Mesopotamia, as generally imagined (Calmet, *ad loc.*; Winer, *ad loc.*). The whole scene of Ezekiel's preaching and visions seems to have been Chaldaea proper; and the river Chebar, as already observed [see CHEBAR], was not the Khabbār, but a branch of the Euphrates. Ptolemy has

in this region a *Thel-bencane* and a *Thal-atha* (Geog. v, 20); but neither name can be identified with Tel-abib, unless we suppose a serious corruption. *Thiluta* and *Thelsaphata* of Ammian. Marc. (xxiv, 2; xxv, 8) have likewise been compared; but they are equally uncertain. The element "Tel," in Tel-abib, is undoubtedly "hill." It is applied in modern times by the Arabs especially to the mounds or heaps which mark the site of ruined cities all over the Mesopotamian plain, an application not very remote from the Hebrew use, according to which "Tel" is "especially a heap of stones" (Gesenius, *ad loc.*). It thus forms the first syllable in many modern as in many ancient names throughout Babylonia, Assyria, and Syria (see Assemani, *Bibl. Orient.* III, ii, 784).

**Te'lah** (Heb. *Te'lach*, תֵּלַח, *breach* [Gesenius] or *vigor* [Furst]; Sept. Θαλέ v. r. Θαλείς; Vulg. *Thale*), son of Resheph and father of Tahar, in the lineage between Ephraim and Joshua (1 Chron. vii, 25). B.C. ante 1658.

**Tel'a'im** [some *Tela'im*] (Heb. with the art. *hat-Telaim*, תֵּלַיִם, the young *lumps* [in Isa. xl, 11]; Sept. ἐν Γαλαγλοῖς; Vulg. *quasi agnos*), a place where Saul collected and numbered his forces before his campaign against the Amalekites (1 Sam. xv, 4). It is strange that both the Sept. version and Josephus (*Ant.* vi, 7, 2) read *Gilgal*, which was in the valley of the Jordan, near Jericho, and certainly not a fitting place to marshal an army to war with the Amalekites, seeing it would have to march through the wild passes of the wilderness of Judah (Ewald, *Gesch.* iii, 50). The Targum renders it "lamps of the Passover," according to a curious fancy, mentioned elsewhere in the Jewish books (*Yalkut* on 1 Sam. xv, 4, etc.), that the army met at the Passover, and that the census was taken by counting the lamps. This is partly endorsed by Jerome in the Vulg. A similar fancy is found in the Midrash in reference to the name Bezek (1 Sam. xi, 8), which is taken literally as meaning "broken pieces of pottery," whereby, as by counters, the numbering was effected. Bezek and Telaim are considered by the Talmudists as two of the ten numberings of Israel, past and future. It is probably identical with TELEM (q. v.), the southern position of which (Josh. xv, 24) would be suitable for an expedition against Amalek; and a certain support is given to this by the mention of the name (Thailam or Thelam) in the Sept. of 2 Sam. iii, 12.

**Telas'sar** (Heb. *Telassar'*, תֵּלְסָר, [in Isa.], fully תֵּלְסָרָה [in Kings], *Assyrian hill*; Sept. Θεασσέν, Θεεμάς v. r. Θαλασσά, Θαυμάς; Vulg. *Thelassar*, *Thalassar*) is mentioned in 2 Kings xix, 12 (A. V. "Thelassar") and in Isa. xxxvii, 12 as a city inhabited by "the children of Eden," which had been conquered and was held in the time of Sennacherib by the Assyrians. In both passages it is connected with Gozan (Gauzanitis), Haran (Carrhæ, now Harran), and Rezep (the Razappa of the Assyrian inscriptions), all of which belong to the hill country above the Upper Mesopotamian plain, the district from which rise the Khabbār and Belik rivers. See GOZAN; HARAN; MESOPOTAMIA. It is quite in accordance with the indications of locality which arise from this connection to find Eden joined in another passage (Ezek. xxvii, 23) with Haran and Asshur. Telassar, the chief city of a tribe known as the Beni-Eden, must have been in Western Mesopotamia, in the neighborhood of Harran and Orfa. The name is one which might have been given by the Assyrians to any place where they had built a temple to Asshur, and hence perhaps its application by the Targums to the Resen of Gen. x, 12, which must have been on the Tigris, near Nineveh and Calah. See RESEN. Ewald (*Gesch.* iii, 301, Note 3) identifies it with a heap of ruins called *Teleda*, south-west from Racca, the *Theleda* of the *Peut. Tab.* (xi, c), not far from Palmyra. It is in favor of this that in that

case the places mentioned along with it in the passages cited stand in the order in which they would naturally be attacked by a force invading the territory from the east, as would the Assyrians (Thenius, *Ezraet. Handbuch*, ad loc.). Hävernick's identification (*Ezek.* p. 476) with the *Thalatha* (Θαλαθά) of Ptolemy (v, 20, 4) would place it too far south. The Jerusalem Targum (on Gen. xiv, 1) and the Syriac take it from *Ellassar* (q. v.), in the territory of Artemitia (Ptolemy, vi, 176; Strabo, xvi, p. 744). Layard thinks (*Nineveh*, i, 257) that it may be the present *Tel Afer*, or perhaps *Arban* (*Nin. and Bab.* p. 283), although no name like it is found there now.

**Teleioi** (τελειοι or τελειούμενοι, *the perfect*), a name of early Christians, which had relation to the sacred mysteries, and denoted such as had been initiated. Baptism was denominated *τελετή*; to join the Church was styled *ἐλθεῖν ἐπὶ τὸ τέλειον*, to attain to perfection; the participation of the eucharist, which followed immediately on baptism, was called *τελετὴ τελειῶν*, *perfection of perfections*; and the absolution granted in the eucharist was called *τὸ τέλειον*, *the perfection of a Christian*. The word is, however, used frequently in the New Test., not indeed in this sense, but in relation to Christian perfection.

**Teleion.** See TELEIOI.

**Teleiōtēroi** (τελειώτεροι, *more perfect*), one of the different classes of catechumens among the ancients; the perfect ones, or the proficient, who were the immediate candidates for baptism.

**Te'lem** (Heb. *id.* טֵלֶם, *oppression* [Gesenius; but Fürst, *place of lambs*]), the name of a town and also of a man.

1. (Sept. Τελέμ v. r. Μαϊνάμ; Vulg. *Telem.*) One of the cities which are described as "the uttermost of the tribe of Judah towards the coast of Edom southward" (Josh. xv, 24, where it is mentioned between the southern Ziph and Bealoth). It is not again mentioned except we regard it as identical with TELAIM (q. v.)—a theory which seems highly probable (Reland, *Palæst.* p. 1029). Telem is mentioned by Eusebius and Jerome as a city of Judah, but they appear to have been ignorant of its site (*Onomast.* s. v. "Talem"). The Sept. (Vat.) in Josh. xix, 7 adds the name Θαλχά, between Remmon and Ether, to the towns of Simeon. This is said by Eusebius (*Onomast.*) and Jerome to have been then existing as a very large village called *Thella*, sixteen miles south of Eleutheropolis. The Sept. of 2 Sam. iii, 12, in both MSS., exhibits a singular variation from the Hebrew text. Instead of "on the spot" (תַּחֲתָיו); A. V. incorrectly "on his behalf"), they read "to Thailam (or Thelam) where he was." If this variation should be substantiated, there is some probability that Telem or Telaim is intended. David was at the time king, and quartered in Hebron, but there is no reason to suppose that he had relinquished his marauding habits; and the south country, where Telem lay, had formerly been a favorite field for his expeditions (1 Sam. xxvii, 8-11). The opinion of Wilton that a trace of the ancient Telem is found in the Arab tribe *Dhullām*, which gives its name to a district lying south-east of Beersheba, is not altogether improbable, especially as the Arabic and Hebrew words are cognate (*The Negeb*, p. 87; comp. Robinson, *Bibl. Res.* ii, 102). Rabbi Schwarz (*Palest.* p. 100) thinks Telem was different from Telaim, and he states that there is still "a district south of Madura called *Tulam*," doubtless referring to the above Dhullām. He also cites a reference from the Midrash (*Kohleth*, v, 10) to a certain Menahem Talmia, as if a resident of Telem. If a more precise location of the town be sought, it may perhaps be found in the "small site with foundations, called *Sudeid*," mentioned by Dr. Robinson as lying in the above region (*Bibl. Res.* i, 102), six miles south-east of Tel Arad. See TOCHEN.

2. (Sept. Τελλήμ v. r. Τελήμ and Τελήμν; Vulg. *Telem*). One of the Temple porters who renounced his Gentile wife after the Captivity (Ezra x, 24). B.C. 458.

**Telemachus**, an Asiatic monk and martyr who is justly renowned for the act of daring self-devotion by which he caused the gladiatorial combats at Rome to be abolished. In the year 404, in the midst of the spectacles of the amphitheatre, Telemachus rushed into the arena and tried to separate the gladiators. The spectators stoned him to death, but the emperor Honorius proclaimed him a martyr, and soon after abolished the gladiatorial combats. Some doubt has been thrown upon the story on account of the absence from the Theodosian Code of any edict by Constantine in existence, and no evidence can be produced to show that there were any gladiatorial fights after this period, although we know that the combats of wild beasts continued till the fall of the Western Empire. See Smith, *Dict. of Biog. and Mythol.* s. v.

**Teleology** (τέλος, *an end*, and λόγος, *discourse*) is the doctrine or general philosophical discussion of the subject of causes. It may be ultimate, reaching to God, or proximate, contemplating the more immediate purpose. The word *teleology* is applied to the argument from design in proof of the Deity. Also, when a natural philosopher assigns the purpose or end of any natural arrangement, as the offensive or defensive weapons of an animal, he is said to give a teleological explanation. "Existences must be considered as standing in relation, not merely to *causæ efficientes* (to their immediate causes), but also to *causæ finales*; indeed, the *causæ efficientes* themselves must be conceived as moved by the *causæ finales*, or, in other words, by the eternal rational ends meant to be subserved by created objects, which ends, although in one respect yet awaiting realization in the future, must in another respect be supposed to be already *operative*. We cannot fully understand realities unless we look forward to the results intended finally to be attained. Present actualities thus acquire a double significance and receive a double explanation. The whole of modern speculation has a teleological character" (Martensen, *Christ. Dogmat.* p. 78 sq.).

**Teleta** (or Tella), COUNCIL OF, properly ZELLA (q. v.).

**Telesphorus**, pope, is said to have been of Grecian family, and to have occupied the see of Rome from A.D. 128 to 139. Our knowledge of him is altogether legendary. An interpolated passage in the *Chronicon* of Eusebius and a discourse smuggled into the works of Ambrose make the statement that Telesphorus had made the regulations of fasting more strict, that he had extended the fast before Easter to cover seven weeks, and that he directed three masses to be said and the *Gloria in Excelsis* to be sung in the night before Christmas. He is reputed to have energetically contended against the heretical teachings of Marcion and Valentine, and to have died a martyr's death. See Herzog, *Real-Encyclop.* s. v.; comp. Hoefer, *Nouv. Biog. Générale*, s. v.

**Teletarches** (τελετάρχης), a Greek term for a consecrator.

**Teletarchikos** (τελεταρχικός), a Greek term signifying consecrating.

**Telete**, a term in the Latin Church for the holy eucharist. See TELEIOI.

**Tel-har'sha** (Neh. vii, 61). See TEL-HARSA.

**Tel-har'sa** (Heb. [for Chald.] *Tel-charsha'*, תֵּל חַרְשָׁא, *hill of the artificer* [Gesenius, *of the wood*; Fürst, *of the Magus*]; Sept. Θελαρσά v. r. Θελαρσά; Vulg. *Thelharsa*), one of the Babylonian towns, or villages, from which some Jews, who "could not show their father's house, nor their seed, whether they were of Israel," returned to Judæa with Zerubbabel (Ezra ii,

59; Neh. vii, 61 [A. V. "Tel-haresha"]. It probably was in the low country near the sea, in the neighborhood of Tel-melah and Cherub, places which are associated with it. Herzfeld's conjecture (*Gesch. Isr.* i, 452) that the name is connected with the river *Haran*, in Susiana (Ammian. Marc. xxiii, p. 325, Bip.) is very precarious.

**Telinga (or TELOOGOO) Version.** The Telinga language is spoken within twenty-three miles of Madras, and prevails for about five hundred miles along the coast, from the vicinity of Pulicat to the borders of Orissa. The superficial extent of the entire region in which this language is predominant has been estimated at 118,610 square miles. The natives are Hindûs and number about 10,000,000. The Telinga language is also diffused to a greater or less extent through various countries of Southern India, in which the Tamul and Canarese are the proper vernacular languages. This diffusion in part arises from the early conquests, dating from the 14th century, achieved by the people of Telinga in the South. Like the Romans, they endeavored to secure their conquests and to keep the natives in subjection by the establishment of military colonies; and the Telinga language is still spoken by the descendants of the Telinga families who were deputed by the kings of Vidyanagara to found these colonies. The roaming tendencies of the Telinga people also serve to account, in part, for the diffusion of the language. On this subject the missionaries have remarked that "in intelligence, migratory habits, secular prosperity, and infrequency of return to their native land this people are in relation to other parts of India what the Scotch are in relation to England and the world." Benjamin Schultze, the laborious Danish missionary, was the first who engaged in a Telinga version of the Bible. He commenced his translation in 1726, immediately after his completion of the Tamul version (q. v.). He translated from the Greek and Hebrew texts, and finished the Telinga version of the New Test. in 1727, and of the Old Test. in 1732, the whole bearing the title *Biblia Telingica ex Hebraico et Græco Textu, adhibitis multis aliis Versionibus, in Linguam Telingicam Translata a Benjamine Schultze Missionario ad Indos Orientales A. 1732*. From some cause hitherto unexplained, this work was never printed; and Marsch, in the *Bibliotheca Sacra*, ii, 202, says: "Quo vero tempore in publicum prodituri sint Biblia Telingice impressa, divinæ providentiæ reservatum manebit." Schultze died in 1760 at Halle, and it has been thought that his Telinga MSS. may still be preserved in that city. In 1805 the Serampore missionaries commenced another version of the Scriptures in this language, and in 1809 they had translated the whole of the New Test. and part of the Old. Owing to various causes of delay, the New Test. was not printed till 1818, and in 1820 the Pentateuch was published.

While the Serampore version was in progress, the Rev. Augustus Desgranges, of the London Missionary Society, had commenced another version and carried it on to the close of the First Epistle to the Corinthians. Mr. Desgranges, who had been stationed at Vizagapatam since 1805, had the assistance of the Rev. George Cran, also stationed there, and of Anunderayer, a Telinga Brahmin of high caste who had been converted to Christianity. In 1808 Mr. Cran died, and, two years later, Mr. Desgranges. On examination it was found that the first three gospels were the only portions of the translation that were in a state of readiness for the press. Of these one thousand copies were printed at Serampore in 1812, under the care of Anunderayer.

In the meantime another version of the Telinga New Test. had been commenced. Rev. Messrs. Pritchett and Lee, agents of the London Missionary Society, arrived at Vizagapatam a short time prior to the decease of Mr. Desgranges. Mr. Lee undertook a translation of the book of Genesis, but the preparation of the version afterwards devolved almost exclusively on Mr. Prit-

chett, who betook himself, in the first place, to the translation of the New Test. In 1819 Mr. Pritchett's New Test. was issued by the Madras Bible Society. He now commenced the translation of the Old Test., but in 1820 he was stopped, in the midst of his work, by death.

In 1823 another version of the Scriptures was offered to the Calcutta Bible Society by the Rev. J. Gordon, also of the London Missionary Society. It was very difficult to decide upon the relative merits of Mr. Pritchett's and Mr. Gordon's translation; but finally Mr. Gordon's prevailed, and the committee of the Madras Society resolved upon adopting his version, requesting him, before he sent it to the press, to compare it carefully with Mr. Pritchett's translation. Mr. Gordon's important labors were closed by death in 1827. After his decease, it was found that Mr. Pritchett's version was, after all, more correct than had been expected, and, after introducing certain emendations, an edition of two thousand copies of the New Test. was printed in 1828, accompanied by two thousand copies of Mr. Gordon's version of Luke. An edition of three thousand copies of the Old Test., based upon the versions of Pritchett and Gordon, was issued from the Madras press in 1855, together with large editions of particular portions of the Telogoo Scriptures both of the Old and of the New Testament. From the different reports we learn the following facts. The report for 1856 states that "an entirely new translation of the whole Bible, executed by C. P. Brown, Esq., has been deposited by that gentleman with this auxiliary with a view to future publication; and extracts from Genesis, Proverbs, Psalms, Malachi, Mark, and Ephesians are in press, and will be circulated for the opinions and criticism of the Telogoo scholars." That for the year 1858 states that the Telogoo revision committee appointed in 1857 had completed a new translation of Paul's epistles to the Romans, Colossians, and Philemon, and of the general epistles of James, John, and Jude, together with the four gospels and Acts, all of which were ready for the press. In 1863 we read: "The Old Test. has been published for the first time, the New Test. newly translated and a revised edition recently published." In 1866 the report states that the "Madras auxiliary has taken up the question of a revision of the Telogoo Old Test., and has appointed a committee for that purpose, on the same plan as that of the Tamil revision committee. The version of the Telogoo New Test. now in use was adopted in 1858, and, after revision by a committee appointed for the purpose of bringing the Rev. Messrs. Hay and Wardlaw's translation into accordance with the *textus receptus* and the rules of the society, was published in 1860." As to the revision of the Old Test., we learn from the report for 1867 that "a committee has been formed by the Rev. John Hay, who has already revised the books of Genesis, Exodus, Leviticus, Numbers, Deuteronomy, and Joshua. The remainder of the work is in progress." At present, according to the last report for 1879, the following parts are printed and circulated: the entire Bible according to the Vizagapatam version, the book of Genesis according to the revised version, and the Pentateuch and New Test. published in 1858. See *The Bible in Every Land*, and the *Annual Reports of the British and Foreign Bible Society*. (B. P.)

**Teller, Romanus**, a Lutheran divine, was born Feb. 21, 1703, at Leipzig, where he also died, April 5, 1750, as doctor and professor of theology and pastor of St. Thomas's. He wrote, *Dissertation. Sacrar. ad Causas Hermeneut. Spectantium Decas* (Lips. 1740):—*D. Hollaz: Examen Theol. Acroam. denuo edidit et Animadverss. auxi; Demonstrat. Homilet.-theologicæ* (ibid. 1728); new edition, *Institut. Theologicæ Homilet. Methodo Scientiis Sacris Digna Adornata* (ibid. 1741). In connection with Baumgarten, Brucker, and Dietelmaier, he published, *Bibel, d. i. vollständige Erklärung der heiligen Schrift aus dem Englischen* (ibid. 1748, 19 vols). See Winer, *Handbuch der theol. Literatur*, i, 107, 186, 297; ii, 59, 798; Fürst, *Bibl. Jud.* iii, 413. (B. P.)

**Teller, Wilhelm Abraham**, a leading theologian of the "enlightenment" party of Germany in the last century, was born in 1734 at Leipsic, where his father was then professor and pastor. In 1755 he was made catechist and bachelor of theology, and began with his earliest literary production to display his sympathy with the liberal school of theologians. He turned his attention more immediately to the criticism of the text of the Old Test. after the manner of Michaelis. In 1756 he published a Latin translation of Kennicott's dissertation on Hebrew text-criticism. In 1761 he was made general superintendent and professor at Helmstedt. In 1764 he issued his *Lehrbuch des christlichen Glaubens*, which revealed the advanced theological views to which he had attained, and alarmed the faculties and consistories. Its position was that of the first stage of rationalistic "enlightenment," and its most noticeable trait a revulsion against the authority of traditional beliefs. The excitement occasioned by its appearance was such that the whole edition was confiscated in Electoral Saxony, and that he retained his position at Helmstedt with serious difficulty. From this unpleasant situation he was extricated by an appointment to Cologne on the Spree as provost and member of the high consistory, where was the very heart of the party of progress, and where he felt free to publish to the world his views without reserve. He did this in a *Wörterbuch d. Neuen Testaments* (1772, and afterwards in six editions), whose preface contained an appeal to preachers that they should expound not only the words, but also, and much more, the ideas, of Scripture, because the latter contains not only Hebrew and Greek forms of expression, but also Hebrew and Greek forms of thought. A further opportunity of showing his independence occurred in 1792 in connection with the trial of a preacher named Schulz, of Gieisdorf, for departure from the standards of the Lutheran Church. The opinion of the high consistory having been required, Teller voted for acquittal on the grounds that under the Lutheran form of Church government every person is constituted his own judge in matters pertaining to the faith, and that all such matters must be determined by Scripture. Schulz was acquitted, but the members of the chamber were afterwards fined and provost Teller was suspended for three months because of this action. The latter nevertheless proceeded, in the same year, to publish a more complete statement of his views in the work *Die Religion der Vollkommenen*, whose theme was the *perfectibility of Christianity*. In 1798 he received an address from Jews resident in Berlin demanding admission into the Christian Church without the imposition on them of a Christian creed; but the high consistory negatived the request, though with regret, and with a promise to impose on the petitioners no new disabilities. Teller died Dec. 9, 1804. His more important works have been mentioned above. He was not popular as a preacher, but his sermons were printed in a third edition as early as 1792. He published the *Neues Magazin für Prediger*, whose tenth volume appeared in 1801, which was also well received, even among Roman Catholic clergymen. In addition to original work, he edited Turretin's *Tract. de Script. Sacr. Interpretatione*; and he was an important contributor to the *Allgem. deutsche Bibliothek*. See Nicolai, *Gedächtnisschrift auf Teller* (1807); *Summarische Lebensnachr.*, appended to Troschel's memorial discourse; Herzog, *Real-Encyklop.* s. v.; Hagenbach, *Hist. of Church in 18th and 19th Cent.* i, 347, 366, 371, 499.

**Tellier, MICHAEL LE**, a Jesuit and father confessor to Louis XIV, was born at Vire, in Normandy, in 1648. He entered the Order of Jesuits in his eighteenth year, and at first devoted himself to historical studies, whose fruit was an edition of Quintus Curtius in 1678; but he eventually engaged in theology, becoming one of the most violent opponents of the Jansenists. In 1672, 1675, and 1684 he published fulminations against the Mons (properly Amsterdam) version of the Bible by

De Sacy and other Port-Royalists. He co-operated with father Bouhours in his translation of the Scriptures, however, and zealously defended the Jesuit missionaries to China against the well-founded complaints raised against them. In 1699 he issued a *Histoire des Cinq Propositions de Jansenius* under the name of Dumas, and in 1705 he assailed Quesnel (q. v.) as a rebel and heretic. He now became provincial of his order, and in 1709 confessor to the king. In the latter capacity he succeeded in inducing the king to procure from pope Clement XI the condemnation of the New Test. with Quesnel's notes. The bull *Unigenitus*, which occasioned so much controversy in France, and was forcibly executed by the king, is to be charged primarily upon Tellier. His dominion ended, however, in 1715, on the death of Louis, and he was removed first to Amiens and afterwards to La Flèche. He died at the latter place in 1719.—Herzog, *Real-Encyklop.* s. v.

**Tel-me'lah** (Heb. *Tel-me'lah*, תֵּל־מֵלַח, *salt hill*; Sept. Θελμελήχ and Θελμελήθ, v. r. Θελμεχλή and Θερμελεθά; Vulg. *Thelmala*) is joined with Tel-harsa and Cherub as the name of a place where the Jews returned who had lost their pedigree after the Captivity (Ezra ii, 59; Neh. iii, 61). It is perhaps the *Thelme* of Ptolemy (v, 20), which some wrongly read as *Theame* (ΘΕΑΜΗ for ΘΕΑΜΗ), a city of the low salt tract near the Persian Gulf, whence probably the name (Ges. *Lex. Heb.* s. v.). Cherub, which may be pretty surely identified with Ptolemy's *Chiripha* (Χιριφά), was in the same region. Herzfeld (*Gesch. Isr.* i, 452) insists that it designates the province of *Melitene* according to Ptolemy (vi, 3), adjoining Susiana west of the Tigris; but Ptolemy (v, 7, 5) and Pliny (vi, 3) know only a *Melitene* on the border of Cappadocia and Armenia Major.

**Te'ma** (Heb. *Teyma*, תֵּימָא [in Job vi, 19 more concisely *Tema*, תֵּמָא] = the Arab. *teyma*, "a desert" [but Ges. = *Teman*, i. e. the *South*]; Sept. Θαμάν, Vulg. *Thema* [but in Isa. *Auster*]), the name of a person and of a tribe or district.

1. The ninth son of Ishmael (Gen. xxv, 15; 1 Chron. i, 30). B.C. post 2020.

2. The tribe descended from him mentioned in Job vi, 19, "The troops of Tema looked, the companies of Sheba waited for them," and by Jeremiah (xxv, 23), "Dedan, Tema, and Buz;" and also the land occupied by this tribe: "The burden upon Arabia. In the forest in Arabia shall ye lodge, O ye travelling companies of Dedanim. The inhabitants of the land of Tema brought water to him that was thirsty, they prevented with their bread him that fled" (Isa. xxi, 13, 14).

The name and the tribe appear to have been known to classic writers. Ptolemy mentions the city of *Themme* (Θέμμα) among those of Arabia Deserta, and apparently in the centre of the country (*Geogr.* v, 19). Pliny states that "to the Nabatæi the ancients joined the *Thimaneî*" (*Hist. Nat.* vi, 32). It may be questioned, however, whether he refers to the Biblical *Teman* or *Tema*.

There can be little doubt that the *Themme* of Ptolemy is identical with the modern *Teima*, an Arab town of some five hundred inhabitants, situated on the western border of the province of Nejd. Wallin, who visited it in 1848, thus describes it: "Teima stands on a mass of crystalline limestone, very slightly raised above the surrounding level. Patches of sand, which have encroached upon the rock, are the only spots which can be cultivated. The inhabitants, however, have considerable date plantations, which yield a great variety of the fruit, of which one kind is esteemed the best flavored in all Arabia. Grain is also cultivated, especially oats of a remarkably good quality, but the produce is never sufficient for the wants of the inhabitants. The greater portion of the gardens are watered from a copious well in the middle of the village. The hydraulic contrivance by which water is raised for distribution through channels among the plantations is the same as is used

through Mesopotamia as well as in Nejd, viz. a bucket of camel-skin hung to the end of a long lever moving upon an upright pole fixed in the ground" (*Journal R. G. S.* xx, 332). Arab writers state of Teima that "it is a town in the Syrian desert, and that it is commanded by the castle called El-Ablak [or El-Ablak el-Fard], of Es-Semawal [Samuel] Ibn-'Adiyā the Jew, a contemporary of Imrā-el-Keys" (A.D. cir. 550); but according to a tradition it was built by Solomon, which points at any rate to its antiquity (comp. El-Bekri, in *Marāsid*, iv, 23). Wallin says no remains of the castle now exist, nor does even the name "live in the memory of the present inhabitants. A small ruined building, constructed of hewn stone, and half buried in sand and rubbish, appeared to me to be too inconsiderable to admit of its being identified with the celebrated old castle" (*ut sup.* p. 333). This fortress seems, like that of Dumat-el-Jendel, to be one of the strongholds that must have protected the caravan route along the northern frontier of Arabia; and they recall the passage following the enumeration of the sons of Ishmael: "These [are] the sons of Ishmael, and these [are] their names, by their towns, and by their castles; twelve princes according to their nations" (Gen. xxv, 16).

It seems probable that the ancient Arab tribe of *Beni-Teim*, of whom Abulfeda speaks (*Hist. Anteislam.* ed. Fleischer, p. 198), were connected with this place, and were the more recent representatives of the children of Tema. Forster would further identify the tribe of Tema with the *Beni-Teim*, who had their chief stations on the shores of the Persian Gulf; but his proof does not seem satisfactory (*Geog. of Arabia*, i, 289 sq.).

It is interesting to find memorials of the nation founded by this son of Ishmael, not merely referred to by classic and Arab geographers, but existing to the present day, in the very region where we naturally look for them (see D'Anville, *Geog. Ancienne*, ii, 250; Abulfeda, *Descript. Arab.* p. 6 sq.; Seetzen, in Zach, *Monat. Correspondenz*, xviii, 374). Like other Arab tribes, the children of Tema had probably a nucleus at the town of Teima, while their pasture-grounds extended westward to the borders of Edom, and eastward to the Euphrates, just as those of the Beni Shummar do at the present time.

**Te'man** (Heb. *Teyman*, תֵּימָן, the right, also the south, as often; Sept. *Θαιμάν* v. r. *Θεμάν* and *Θαμάν*; Vulg. *Theman* v. r. *Meridies*, *Auster*), the name of a man, and also of a people and country.

1. The oldest son of Eliphaz the son of Esau (Gen. xxxvi, 11). B.C. cir. 1960. It would appear that Teman was the first duke or prince (מֶלֶךְ) of the Edomites (v, 15); and that, having founded a tribe, he gave his name to the region in which it settled (v, 34).

2. The country of the Temanites, which formed in after-ages the chief stronghold of Idumæan power. Hence, when the Lord by the mouth of Ezekiel pronounced the doom of Edom, he said, "I will make it desolate from Teman" (xxv, 13). The Temanites were celebrated for their courage; hence the force and point of Obadiah's judgment: "Thy mighty men, O Teman, shall be dismayed" (ver. 9). They were also famous for wisdom; in allusion to which characteristic, and perhaps with special reference to Job's friend Eliphaz the Temanite, Jeremiah mournfully asks, "Is wisdom no more in Teman? is counsel perished from the prudent? is their wisdom vanished?" (Jer. xlix, 7; Job ii, 11; comp. Baruch iii, 22. See Pusey, *On Obadiah*, ver. 8).

The geographical position of "the land of Teman," or, more literally, the "land of the Temanite," as it is called in Gen. xxxvi, 34 (מִן הַיַּרְדֵּן וְהַיַּרְדֵּן), Sept. *ἐκ τῆς γῆς Θαυμαίων*, A. V. "Temanite"), is nowhere defined in Scripture; but there are several incidental notices which tend to fix it with considerable certainty. 1. It is intimately connected with Edom, and manifestly either formed a province of it, or lay upon its border (Jer. xlix, 7, 20). In one passage it is included in the same curse

with Bozrah, the capital of Edom: "I will send a fire upon Teman, which shall devour the palaces of Bozrah" (Amos i, 12). 2. Habakkuk joins Teman in parallelism with Mount Paran (iii, 3); and this might probably indicate that the portion of Edom lying over against Kadesh, beside which rose Mount Paran (q. v.), was called Teman. Perhaps, as the northern section of Edom was called Gebal, the southern section may have got the name Teman. 3. Ezekiel groups Teman in such a way with Edom and Dedan as would lead to the conclusion that it lay between them, and therefore on the south and south-east of the former (Ezek. xxv, 13). See *DEDAN*. On the whole, it would appear that Teman was the name given by Esau's distinguished grandson to his possessions in the southern part of the mountains of Edom. As the tribe increased in strength and wealth, they spread out over the region extending southward along the shore of the Gulf of Akabah, and eastward into Arabia. This view is confirmed by a passage in the book of Joshua, hitherto considered obscure and difficult, but which the advances recently made in Biblical geography tend to elucidate. The sacred writer commences his description of the territory of Judah in these words: "This, then, was the lot of the children of Judah; even to the border of Edom the wilderness of Zin southward was the uttermost part of the south coast" (xv, 1). Besides being unintelligible, this is not a literal translation of the Hebrew; and the renderings of the Sept. and Vulg. are still worse. The Hebrew may be translated as follows: Towards (or along, אֲלֹ) the border of Edom, the wilderness of Zin to the Negeb (נֶגֶב) from the extremity of Teman" (מִקְצֵה תֵּימָן). The writer is describing the south-eastern section of the territory. It extended along the border of Edom, including the wilderness of Zin from the extreme (north-western) corner of Teman to the Negeb. Teman is unquestionably a proper name, as is shown by the word מִקְצֵה being placed before it. So also is Negeb. The wilderness of Zin extended up as far as Kadesh, and a part of it was thus allotted to Judah. Teman included the mountains of Edom as far north as Mount Hor, opposite Kadesh; and thus the territory of Judah reached to its extreme north-western corner. The Negeb included the downs along the southern base of the Judæan hills, and lay between them and the wilderness of Zin. The above translation is found in part in the Arabic version, and is adopted by Houbigant.

The accounts given by Eusebius and Jerome of Teman are not consistent. They describe it as a region of the rulers of Edom in the land of *Gabalitis*; and they further state that there is a village of that name fifteen (Jerome has five) miles from Petra. But in another notice they appear to distinguish this Teman from one in Arabia (*Onomast.* s. v. "Theman"). On the map in Burckhardt's *Travels in Syria*, Theman is identified with the modern village of *Maan*, east of Petra; but for this there seems to be no authority (Winer, *Biblisches Realwörterb.* s. v. "Theman." See Porter, *Handbook for Syr. and Pal.* p. 58). The occupation of the country by the Nabathæans seems to have obliterated almost all of the traces (always obscure) of the migratory tribes of the desert. See *EDOM*.

**Te'mani** (Gen. xxxvi, 34) or **Te'manite** (Heb. *Teymani*, תֵּימָנִי; Sept. *Θαυμανι* or *Θαυμανιτης*) is the title (1 Chron. i, 45; Job ii, 11 sq.) of a descendant of Teman or an inhabitant of that land. See *TEMAN*.

**Tem'enl** [some *Te'meni* or *Teme'nī*] (Heb. *Teymeni*, תֵּימָנִי, *Temanite* [Gesen.] or *fortunate* [Fürst]; Sept. *Θαυμάν*, Vulg. *Themani*), second-named of the four sons of Ashur (q. v.), the "father" of Tekoa by his wife Naarah (1 Chron. iv, 6). B.C. cir. 1618.

**Temneh (or Timneh) Version.** Temneh is the language spoken in the Ruiah country, near Sierra Leone, in West Africa. At present there exists a transla-

tion of the New Test., Genesis, and Psalms. The Gospel of St. Matthew, translated by the Rev. C. F. Schlenker, was printed only in 1866, the other parts now published having been added since that time. *Comp. Reports of the British and Foreign Bible Society.* (B. P.)

**Temper**, the disposition of the mind, the sum of our inclinations and tendencies, whether natural or acquired. The word is seldom used by good writers without an epithet, as a *good* or a *bad* temper. Temper must be distinguished from passion. The passions are quick and strong emotions, which by degrees subside. *Temper* is the disposition which remains after these emotions are past, and which forms the habitual propensity of the soul. See Evans, *Practical Discourses on the Christian Temper*; and the various articles FORTITUDE, HUMILITY, LOVE, PATIENCE, etc.

**Temperance** (ἐγκράτεια, *self-restraint*), that virtue which a man is said to possess who moderates and restrains his sensual appetite. It is often, however, used in a much more general sense, as synonymous with *moderation*, and is then applied indiscriminately to all the passions. "Temperance," says Addison, "has those particular advantages above all other means of health, that it may be practiced by all ranks and conditions at any season or in any place. It is a kind of regimen into which every man may put himself without interruption to business, expense of money, or loss of time. Physic, for the most part, is nothing else but the substitute of exercise or temperance." In order to obtain and practice this virtue, we should consider it, 1. As a divine command (Phil. iv, 5; Luke xxi, 34; Prov. xxiii, 1-3); 2. As conducive to health; 3. As advantageous to the powers of the mind; 4. As a defence against injustice, lust, imprudence, detraction, poverty, etc.; 5. The example of Christ should be a most powerful stimulus to it.

**Temperance Reform.** As an organized movement, the temperance reformation is of very modern origin. For ages, indeed, wise men have deplored the miseries of the habit at whose extinction it aims; yet it is but recently that the enormous magnitude of those evils seems to have been fully apprehended, the true basis of reform recognised, and united and persistent effort made for the suppression of the gigantic mischief.

**I. The Habit of Drunkenness.**—An interesting fact lies at the foundation of the habit of indulgence in intoxicants. Man discovered, long ago, that his mental state is affected by the action of certain drugs, and that they have power, not only to lend increased enjoyment to social hours, but to lessen pain, cheer the desponding, and, for a brief period, lift even the despairing out of the depths. Thus Homer describes the effects of *ne-penthe* (*Odyssey*, bk. iv):

"Meantime, with genial joy to warm the soul,  
Bright Helen mixed a mirth-inspiring bowl,  
Tempered with drugs of sovereign use, to assuage  
The boiling bosom of tumultuous rage;  
To clear the cloudy front of wrinkled Care,  
And dry the tearful sluices of Despair.  
Charmed with that potent draught, the exalted mind  
All sense of woe delivers to the wind.  
Though on the blazing pile his father lay,  
Or a loved brother groaned his life away;  
Or darling son, oppressed by ruffian force,  
Fell breathless at his feet, a mangled corse;  
From morn to eve, impassive and serene,  
The man, entranced, would view the deathful scene."

This is a true portrait, and fits our own times as accurately as it did those of Homer. This state, which we have been accustomed to characterize by the term intoxication, or drunkenness, is in reality a combination of two effects, narcosis and exhilaration. Not only when the victim has become visibly drunk, but from the moment when the dose begins its impression, the circulation loses force, the blood cools, physical strength declines, the nerves are less sensitive, mental acumen is dulled, and every power of mind and body is lessened.

But at the very time when the drug is working this result, there is a mental exhilaration, a delusive lifting-up of the spirits, which cheats the victim with a false consciousness of augmented powers. He never before felt so strong, or realized that he was so intellectual, so wise, so witty; he never before had so much confidence in his own powers, or contemplated himself generally with so much satisfaction. This delusion continues, and even increases, while he is sinking rapidly into utter imbecility, mental and physical.

There are various substances which have less or more of this strange potency. Those chiefly used for the deliberate purpose of producing these effects are alcohol, opium, the hemp poison (*Cannabis Indica*), tobacco, the coca-leaf, the betel-nut, and the thorn-apple. While the general effect of these substances is the same, there is some variety in their action. Alcohol benumbs the body more rapidly than opium and Indian hemp, and tends more to noise and violence at first, and a paralytic stagger afterwards. The thorn-apple produces temporary delirium as the final symptom. The coca-leaf, tobacco, and the betel-nut are milder forms of the intoxicating principle, and seem to be used chiefly to allay mental and physical disquiet, and superinduce a feeling of ease and comfort.

But continued indulgence tends to the formation of a tyrannical habit, whose force grows out of the fact that repeated druggings produce an abnormal condition of the brain and of the whole nervous system. The novice experiences his dreamy joys for a brief space, and then comes out of them in a condition more or less morbid, according to the power of the dose. He generally recovers his usual condition in a day or two, and perhaps has no desire to repeat his experience; but if he repeats it again and again, it will not be long before he finds himself in the clutches of a new appetite, and burdened by a new and pressing want. Now, when the force of the last dose of the drug has been spent, he is in a condition of unrest, mental and physical, which may be only a slight degree of uneasiness, or amount to direst agony, according to the stage which he has reached in his downward road. From this disquiet, or distress, he knows of only one method of quick relief, and that is another dose of the same drug. And so the drug becomes the tyrant and he the slave. As the coils of the serpent tighten about him, he sinks, mentally, morally, socially. At last he cares only for his drug, or rather is driven to it by the lash of remorse and horror, which come upon him whenever he is not under the spell. He cares not for poverty, rags, and dirt, for cold and hunger. He cares less for his wife and children than a tiger does for his mate or a wolf for his cubs. The pity of the good, the scorn of the brutal, the prayers and tears of those who love him, the wrath of the living God, have no power to move him, and in passive and hopeless shame and despair, alternating with brief seasons of attempted reform, he goes down to his doom.

**II. Extent and Evils of Intoxication.**—Thus the Asiatic peoples bear the burden of evil caused by indulgence in opium and the hemp intoxicant. Thus Europe and America groan under the woes inflicted by alcohol. During the fiscal year ending June 30, 1879, there were 156,122 retail dealers in ardent spirits in the various states and territories of the Union, and the total receipts from the taxes levied on distilled liquors were over \$52,000,000. This is an increase over the previous year of 1082 in the number of dealers, and \$2,000,000 in the receipts. The same year, 327,000,000 gallons of malt liquors paid into the Treasury over \$10,000,000, making the total receipts from taxes on alcoholic liquors \$63,000,000. The increased consumption of malt liquors the same year was 25,000,000 gallons. The total annual outlay in the United States for distilled and malt liquors cannot be less than \$700,000,000. In England, during the year ending Sept. 30, 1878, there were 156,589 licensed venders of intoxicating liquors, and, as the report of the committee of the House of

Lords shows, the drinking habits of the people cost them the sum of \$718,000,000.

But this enormous waste, which swallows up so large a part of the earnings of the people, is only the beginning of woes. Vice, crime, pauperism, public evils, and public burdens of every kind multiply in direct proportion to the prevalence of the alcoholic habit. What are usually called the dangerous classes in our cities are its creation. It is a prolific source of political corruption. Powerful in votes and money, and with an instinctive dread of integrity in public men, the liquor interest gravitates to the wrong side of every public question. By its aid bad men are exalted to office, the laws are imperfectly administered, life and property are rendered insecure, and taxes increase. In all Christian lands, the liquor habit and the liquor interest are recognised more and more clearly as the direct antagonists of morals, religion, and every element of the welfare of men and nations. On these grounds the temperance reform bases its argument.

**III. History of the Temperance Movement.**—The first efforts to stay this tide of death date back many years. In all nations—even in ancient times—there were persons who abstained, generally through religious motives, from the intoxicating drinks of their day. Such were the Nazirites among the Jews, and the Vestals among the Romans. All through the ages, excess has been condemned by the thoughtful, while the moderate use of intoxicants was long deemed allowable, if not necessary. Thus the colonies of Massachusetts and Connecticut, as long ago as 1639, passed laws designed to lessen the excessive use of distilled liquors.

John Wesley was the pioneer of the modern reform. In the year 1743 he prepared the "General Rules" for the guidance of his societies, and in warning his people against the sins of the times he names *drunkenness, buying or selling spirituous liquors, or drinking them, unless in cases of extreme necessity*. This is one of the rules which, as he declares, "we are taught of God to observe, even in his written Word;" and the rule stands to-day, in the exact words of Wesley, in the *Discipline of the Methodist Episcopal Church*. Wesley was equally outspoken in the pulpit. In his sermon *On the Use of Money* is the following passage:

"Neither may we hurt our neighbor in his body; therefore we may not sell anything which tends to impair health. Such is, eminently, all that liquid fire commonly called drams, or spirituous liquors. It is true these may have a place in medicine . . . although there would rarely be occasion for them; were it not for the unskillfulness of the practitioner; therefore such as prepare and sell them only for this end may keep their conscience clear. . . . But all who sell them in the common way to any that will buy are poisoners general. They murder his majesty's subjects by wholesale, neither does their eye pity or spare. They drive them to hell like sheep; and what is their gain? Is it not the blood of these men? Who, then, would envy their large estates and sumptuous palaces? A curse is in the midst of them; the curse of God cleaves to the stones, the timber, the furniture of them. The curse of God is in their gardens, their walk, their groves; a fire that burns to the nethermost hell. Blood, blood is there; the foundation, the floor, the walls, the roof, are stained with blood. And canst thou hope, O thou man of blood! though thou art clothed in scarlet and fine linen, and farest sumptuously every day—canst thou hope to deliver down thy fields of blood to the third generation? Not so, for there is a God in heaven; therefore thy name shall soon be rooted out."

These bold words were uttered at a time when the use of intoxicating liquors was universal, both in England and America. Thus John Wesley leaped at once to a position which other reformers did not reach in almost a hundred years. Indeed, in regard to another matter, somewhat akin to alcoholic indulgences, he at once advanced to a position towards which his followers in our own day are feebly struggling, but which no Church, as such, has yet reached. He strongly counselled his people not to use snuff or tobacco, and, in regard to his preachers, made it a positive rule that none of them was "to use tobacco for smoking, chewing, or snuff, unless it be prescribed by a physician."

In 1651 the people of East Hampton, on Long Island, resolved, at a town meeting, that no one should retail liquor but such as were regularly authorized to engage in the business, and even then not to furnish "above half a pint at a time among four men." Something like a prohibitory law is said to have been passed by the Virginia colony in 1676, but what the novel experiment amounted to cannot now be ascertained. The practice of providing liquor on funeral occasions generally prevailed; and it was not until about the year 1760 that an earnest combined effort was made by the various churches to abolish it, and even this small reform was not accomplished till many years afterwards.

On Feb. 23, 1777, the Continental Congress, then in session in Philadelphia, passed unanimously the following resolution:

"*Resolved*, That it be recommended to the several legislatures of the United States immediately to pass laws the most effective for putting an immediate stop to the pernicious practice of distilling grain, by which the most extensive evils are likely to be derived if not quickly prevented."

This, however, seems to have been a war measure rather than an attempt at reform. It makes no mention of present effects, but is prompted by the fear of some future evil, probably a scarcity of grain, caused by the gathering of farm laborers into the army, and the consequent lessened production.

In 1789 two hundred farmers of Litchfield, Conn., united in a pledge not to use distilled liquors in their farm-work the ensuing season. In 1790 a volume of sermons, the authorship of which has been attributed to Dr. Benjamin Rush, an eminent patriot and philanthropist of Philadelphia, and a signer of the Declaration of Independence, made a powerful impression in regard to the evils of the alcoholic vice, and the physicians of the city united in a memorial to Congress, in which they compare "the ravages of distilled spirits upon life" to those of "plague or pestilence," only "more certain and extensive," and pray the Congress to "impose such heavy duties upon all distilled spirits as shall be effectual to restrain their intemperate use."

In 1794 Dr. Rush published an essay entitled *A Medical Inquiry into the Effects of Ardent Spirits upon the Body and Mind*, in which he argues that the habitual use of distilled liquors is useless, pernicious, and universally dangerous, and that their use as a beverage ought to be wholly abandoned. Still the blow was aimed at distilled spirits only, and the true ground of reform was not yet reached.

In 1808 a society was formed in Saratoga County, N. Y., which seems to have been the first permanent organization founded for the purpose of promoting temperance. It was called "The Union Temperate Society of Moreau and Northumberland." The members pledged themselves not to drink any distilled spirits or wine, nor offer them to others, under a penalty of *twenty-five cents*. The penalty for being intoxicated was fifty cents. All this looks ridiculous now; but it was a bold movement for those days, and the projectors of it were, no doubt, duly abused as madmen and fanatics.

Still, the day was dawning. Religious bodies began to awake. In 1812 the General Assembly of the Presbyterian Church adopted a report which urged all the ministers of that denomination to preach on the subject, and warn their hearers "not only against actual intemperance, but against all those habits and indulgences which may have a tendency to produce it." The General Association of Connecticut, the same year, adopted a report prepared by Rev. Lyman Beecher, which recommended entire abstinence from all distilled liquors. Thus they reached, in 1812, the position which John Wesley occupied and inculcated in his "General Rules" in 1743. The same year (1812), the Consociation of Fairfield County, Conn., published an appeal which goes one step further. It says, "The remedy we would suggest, particularly to those whose appetite for drink is strong and increasing, is a total abstinence from the

use of all intoxicating liquors." This, they admit, "may be deemed a harsh remedy," but they apologize for it on the ground that "the nature of the disease absolutely requires it." The convocation, at the same time, made a practical beginning of reform by excluding all spirituous liquors from their meetings.

In 1813 the Massachusetts Society for the Suppression of Intemperance was formed in Boston. The society, however, aimed only to suppress "the too free use of ardent spirits and its kindred vices," and therefore accomplished little. Still, all these movements called public attention to the evil, and kept men thinking. The spell of indifference was broken, the discussion became more earnest and thorough, and appeals, sermons, and pamphlets began to issue from the press. Foremost among these writers was Rev. Justin Edwards, pastor of the Church at Andover, Mass., who afterwards occupied a still more prominent place in the reform movement. In 1823 Dr. Eliphalet Nott, president of Union College, published a volume of *Sermons on the Evils of Intemperance*, which greatly aided the reform. In January, 1826, Rev. Calvin Chapin published in the *Connecticut Observer* a series of articles in which he took the ground that the only real antidote for the evils deprecated is total abstinence, not only from distilled spirits, but from all intoxicating beverages. His position, however, was generally regarded as extreme, and he had few immediate converts to his opinions.

In February, 1826, chiefly through the instrumentality of Dr. Edwards, a few friends of the reform met in the city of Boston, and organized the American Temperance Society. The pledge was still the old one—abstinence from ardent spirits—but the movement was nevertheless an advance, inasmuch as the object of the society was to inaugurate a vigorous campaign throughout the country. In April, Rev. William Collier established in Boston the first newspaper devoted to the cause. It was called *The National Philanthropist*, and was published weekly. This same year (1826), Lyman Beecher published his famous *Six Sermons on Temperance*, which in burning eloquence and powerful condensations of truth have not been surpassed by anything since written on the subject. The reform was now fairly begun. In 1827 there were state societies in New Hampshire, Vermont, Pennsylvania, Virginia, and Illinois, while two hundred and twenty local societies, scattered through these and other states, enrolled an aggregate of thirty thousand members. Men of the highest character and position were identified with the reform, such as Dr. Justin Edwards, Dr. Day (president of Yale College), Gen. Lewis Cass, Edward C. Delavan, and eminent physicians, such as Drs. Massey, Hosack, and Sewell. About this time L. M. Sargent published his *Temperance Tales*, thus bringing into the battle a new and powerful weapon.

The reform made rapid progress. In 1831 there were state societies in all but five states, while the local organizations numbered 2200. In 1832 Gen. Cass, the secretary of war, abolished the spirit ration in the army, and issued an order prohibiting the sale of distilled liquors by sutlers. This action, however, seems to have been repealed by some one of his successors in office, as we find Gen. McClellan, thirty years afterwards, issuing an equivalent order in reference to the Army of the Potomac. The secretary of the navy also issued, in 1832, an order offering the men extra pay and rations of coffee and sugar instead of the spirit ration. In 1833 there were 5000 local societies, with more than a million of members, of whom it was estimated that 10,000 had been intemperate, 4000 distilleries had been closed, and 1000 American vessels sailed without liquor.

This year (1833) is notable for another advanced step. Experience was daily demonstrating the insufficiency of a reform which interdicted distilled liquors only. Not a few drunkards signed the pledge against such beverages and kept it, and were drunkards still. Public opinion was steadily moving towards the true ground

—total abstinence from all intoxicating drinks. Mr. Luther Jackson, of the city of New York, prepared a pledge of this character, and secured a thousand signatures. To him belongs the honor of inaugurating a new era in the history of the reform.

In May, 1833, the first National Temperance Convention was held in the city of Philadelphia. Four hundred and forty delegates, representing nineteen states and one territory, counselled together three days. Two important conclusions were embodied in their resolutions—first, that the traffic in distilled liquors as a beverage is morally wrong; second, that it is expedient that the local societies should accept, as soon as practicable, the total-abstinence pledge. A permanent society was formed, which, under the name of the American Temperance Union, accomplished much for the cause.

The contest from this time assumed a twofold direction—one line of argument and effort aiming to dissuade the people from all use of intoxicants, and the other taking the shape of an attack upon the traffic and the laws which sanction it. Public sentiment was fast approaching the conclusion that instead of being protected by law, under the pretence of regulating it, the traffic should be prohibited by law. The Grand Jury of the city and county of New York put on record their deliberate judgment that three fourths of the crime and pauperism are caused by the drinking habits of the people, and added, "It is our solemn impression that the time has now arrived when our public authorities should no longer sanction the evil complained of by granting licenses." Several state conventions the same year adopted resolutions of the same tenor as those of the National Convention.

In 1834 Rev. Albert Barnes, of Philadelphia, published two sermons on the iniquities of the traffic; and Samuel Chipman made a personal inspection of the almshouses and jails in the state of New York, and published a report, showing how largely the alcoholic vice was responsible for crowding them with inmates. In 1835 Rev. George B. Cheever, then the youthful pastor of a church in Salem, Mass., published, under the title of *Deacon Giles's Distillery*, what purported to be a dream. Demons were represented as working in the deacon's distillery, and manufacturing "liquid damnation," "murder," "suicide," etc., for the human employer. The stinging satire took effect. Mr. Cheever was assaulted in the streets of Salem, and was also prosecuted for slander by a certain rum-distilling deacon, who thought he recognised his own portrait in the deacon Giles of the dream. Mr. Cheever was convicted and imprisoned for a few days, but on his release returned at once to the attack in another dream concerning *Deacon Jones's Brewery*, in which devils are described as making beer, and, as they dance about the caldron, chanting the spell of the witches in Shakespeare's *Macbeth*—

"Round about the caldron go;  
In the poisoned entrails throw;  
Drugs that in the coldest veins  
Shoot incessant pains;  
Herbs that, brought from hell's black door,  
Do their business slow and sure—  
Double, double toil and trouble:  
Fire, burn; and caldron, bubble."

The assault and the prosecution called universal attention to the affair; the dreams were published everywhere, and produced great effect. About the same time another local excitement aided the general cause. Mr. Delavan exposed the methods of the Albany brewers, whom he charged with procuring water for their business from a foul pond covered with green scum and defiled with the putrid remains of dead cats and dogs. Eight brewers brought suits against him, claiming damages to the amount of three hundred thousand dollars, but did not succeed in recovering a dime.

In 1836 a second National Temperance Convention, attended by four hundred delegates, and presided over by Chancellor Walworth, was held at Saratoga, N. Y. The most important business done was the passing of a

resolution that henceforth the pledge should be *total abstinence from all that intoxicates*. This resolution, though offered by Dr. Edwards, supported by Lyman Beecher, and adopted unanimously by the convention, was not approved by all who claimed to be friends of the cause. Not a few, whose temperance zeal consisted in an ardent desire to reform other people from rum and brandy, while they themselves drank wine without scruple, fell out of the ranks of the reform, and were seen no more. Societies disbanded in every direction, prominent workers under the old pledge became silent when the new one was adopted, and once more the cry of "fanaticism" filled the air, this time with some new voices in the chorus. Still, not until this hour had the reform *planted* itself on the right ground and grasped the true weapons of its warfare. The people rallied around the new banner, and the work went on with more efficiency than ever before. In January, 1837, the *Journal of the American Temperance Union*, edited by Rev. John Marsh, was established, and did valiant service till 1865, when it was superseded by the *National Temperance Advocate*.

In 1838 began the legislative war against the traffic—a contest which has seen many victories and defeats, and will probably see many more before the final victory. In response to growing public sentiment, the license laws of several states were made more stringent. Massachusetts passed a law prohibiting the sale of alcoholic liquors in less quantity than fifteen gallons. In 1839 Mississippi followed with a "one gallon law," and Illinois adopted what would now be termed "local option." The universal agitation on the subject created general alarm among those interested in the manufacture and sale of alcoholic drinks, and they, too, began to organize and collect funds to be used at the polls and in legislative halls to arrest the reform. Still the good cause advanced. Temperance organizations, temperance journals, lectures, and labors of every kind were multiplying. Good news of progress came from England, and from father Mathew, a Catholic priest in Ireland, who had given himself to reform work and had achieved marvellous successes.

In 1840 the "Washingtonian" movement began in Baltimore. Six hard drinkers, who had met for a night's carousal, suddenly resolved to reform, signed a total-abstinence pledge, and formed a society for active labor. They held meetings, recited the simple story of their former errors, and how they were rescued, and invited the most hopeless victims of the vice to join them. Wonderful results followed, the work spread, and in the space of two or three years it is estimated that one hundred and fifty thousand inebriates had signed the pledge. Immense good was done, and yet the movement soon began to wane. The demand for reformed drunkards as lecturers became so great as to bring into the field a crowd of irresponsible men; some without sufficient intelligence for their position, others lacking in principle. These made a trade of the business; they sneered at all workers who had no drunken experiences to relate, abused the churches, and sought to outdo each other in extravagant descriptions of their past lives. Soon that which began as an agonizing struggle for life became a merry popular amusement; the funniest lecturer got the most invitations and the best pay; and the movement, powerful as it was at one time, broke down under the load of the ignorant, unprincipled, and foolish operators who, for their own profit, piled their weight upon it. Still, bitterly as the friends of temperance were disappointed by the collapse of the Washingtonian episode, the general cause continued to advance. In the ten years ending in 1840, while the population of the United States had grown from 12,000,000 to 17,000,000, the consumption of distilled liquors had fallen from 70,000,000 to 43,000,000 gallons. In thirty years the number of distilleries had fallen from 40,000 to 10,306.

In 1842 the order of the Sons of Temperance was founded in the city of New York. This order is the

oldest of the compact organizations which not only pledge their members to total abstinence, but unite them on a plan of mutual systematic relief in times of sickness. During the thirty-eight years of its existence the order has varied greatly in numerical strength. In 1850 it numbered 232,233 members. Suffering severely during the late war, the "Sons" in 1866 numbered only 54,763. Since that date they are again making progress, and now number about 100,000 members. The Independent Order of Rechabites, a society of similar character, established in England in 1835, was introduced into the United States in 1842, and spread with considerable rapidity. In 1845 another order, the Templars of Honor and Temperance, was established in New York city. This fraternity was originally designed to be a branch of the Sons of Temperance, whose members should pass through various degrees, and be known to each other everywhere by signs and passwords; but it was organized as an independent society. They numbered about 17,000 members.

The discussion in regard to the morality of the license system went on with vigor. In 1845 the matter was by law submitted to the people of Connecticut and Michigan, and the vote was strongly against license. In 1846 the question was submitted to the people of the state of New York (the city of New York being excepted); several whole counties voted "no license," and five sixths of the towns and cities gave large majorities in the same direction. In 1846 Maine passed a prohibitory law, which, with many changes, made from time to time to render it more stringent and effective, has remained for thirty-four years the will of the people and the policy of the state, and it is to-day in full and successful operation, the glory of the commonwealth and the strong defence of its citizens.

For the next ten years (1846 to 1856) the question of license or no license was agitated in almost every part of the Union, but to give the history of the struggle in the several states would require a volume. Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Delaware, Michigan, Indiana, Iowa, Minnesota, Kansas, and Nebraska passed prohibitory laws—some of them more than once. In most of these states, if not all, the question was submitted in some form to the popular vote, and the prohibitory principle received emphatic endorsement. In New Jersey, also, the popular voice was strongly in its favor, but the liquor interest succeeded in thwarting the will of the people. In two states, Pennsylvania and Illinois, a small majority appeared against prohibition.

The legislative reform was resisted at every step, fiercely, desperately, and by the use of the most unscrupulous means. After the prohibitory law had been strongly approved by a direct popular vote, and passed by both Houses of the Legislature of New York, in 1854 governor Horatio Seymour vetoed it on trivial grounds. Gov. Seymour of Connecticut in 1853 did the same thing under similar circumstances. In both cases the people at the next election carried their point by defeating those who had temporarily defeated them. In several states the law was declared unconstitutional by the courts. In New York it was set aside in 1856 on the ground that it destroyed the value of property, to wit, of the liquors already in the hands of the dealers. In several of the states the law was passed, submitted to the people for their approval, approved by large majorities, and then declared unconstitutional by the courts, because thus submitted to the people. An attempt was made in 1846 by the liquor interest to settle the question once for all for the whole country. With Daniel Webster and Rufus Choate as their counsel, the dealers in alcohol carried their case into the Supreme Court of the United States; but the unanimous decision of the court was that each state has a constitutional right to regulate or even totally suppress the liquor traffic.

In 1849 the first Civil Damage Law, as it has been called, was passed in Wisconsin, prohibiting the retail

trade in intoxicating liquors, unless the vender first gave bonds "to support all paupers, widows, and orphans, and pay the expenses of all civil and criminal prosecutions, growing out of or justly attributable to such traffic." Several other states followed the example of Wisconsin, and these laws have been found to be of considerable practical value.

This same year, 1849, the cause received a new impulse from the presence and labors of father Mathew, the Irish apostle of temperance, who came to America in June, and spent sixteen months of hard work, chiefly among the Irish Catholics. Crowds greeted him everywhere, and large numbers took the pledge at his hands. It is not surprising that a reaction followed this swift success. Many pledged themselves by a sudden impulse, moved thereto by the enthusiasm of assembled multitudes, with little, clear, intelligent, fixed conviction of the evils inseparable from the habits which they were renouncing. The pope, their infallible teacher both in regard to faith and morals, had never pronounced moderate drinking a sin, either mortal or venial; and even occasional drunkenness had been treated in the confessional as a trivial offence. The retail traffic, especially in the cities, was more largely in the hands of Irish Catholics than any other class of people. Moreover, the Catholic Church wanted donations of land from city authorities, and subsidies from the public treasury for the support of its sectarian institutions, and it could obtain what it wanted only by a political alliance with the liquor interest. For these reasons the Catholic clergy, as a body, seem to have made no vigorous effort to hold the ground which the venerable father Mathew won; and the laity, of course, have felt no obligation to be wiser than their teachers.

During the period named, while the battle was raging in reference to the legalizing of the traffic, and year after year went on as fiercely as ever, the liquor interest received powerful reinforcements from an unexpected quarter. During the twenty years previous to 1840 the immigration from Germany numbered 155,000 persons. During the twenty years between 1840 and 1860 the German immigration numbered 1,330,000. This vast multitude brought with them their predilection for beer and Sunday holidays. Under their auspices the manufacture of beer became a great business interest, and, especially in the towns and cities, saloons sprang up without number, until, in some places, there was a saloon for every score of legal voters. The distillers, brewers, and dealers of all sorts, uniting their forces, became a power in the political arena which no party dared to leave out of its calculations, and before which every mean and mercenary demagogue hastened to fall on his knees.

The temperance cause is so pure, its logic so complete, so utterly unanswerable, that it might have routed all its enemies had the contest gone on without interruption. But while the line of battle, notwithstanding local repulses and temporary defeats, was steadily advancing, its progress was stayed by another overmastering appeal to the patriotism of the people. The series of events which preceded the late civil war were culminating in an agitation which swept all the streams of popular enthusiasm into its mighty current. The same principles and convictions which made men the foes of the alcoholic curse made them feel keenly the national peril; while those who were coining their ill-gotten gains out of the blood of their neighbors could be expected to care little for the life of the nation. Thus, while the true patriot laid aside all else to save his country from the awful peril of the hour, the selfish and traitorous liquor interest had the better chance to plot for the accomplishment of its own sordid ends.

Still, while the popular demand for better laws in regard to the traffic in alcohol almost ceased for a time to be felt in current politics, the moral reform made some progress. In 1856 the American Juvenile Temperance Society was founded in the city of New York, and the

next year a monthly paper for children, called the *Juvenile Temperance Banner*, was established. In January, 1859, four young men, who had met one Sunday evening in a liquor saloon in San Francisco, suddenly resolved to change their evil course, formed a society which they called the "Dashaways," and inaugurated an extensive movement on the Pacific coast much like the Washingtonian campaign of 1840. The next year a similar reform organization, originating in Chicago, spread through the state under the name of the Temperance Flying Artillery. In 1862 the spirit ration in the United States navy, which was made optional in 1832, totally ceased by order of Congress; and coffee was substituted for whiskey in the army of the Potomac. The friends of the cause were everywhere active in their benevolent labors among the soldiers and sailors during the war.

The fifth National Convention, held at Saratoga in August, 1865, organized the National Temperance Society and Publication House, whose headquarters are at 58 Reade Street, New York, and which, by its two periodicals, the *National Temperance Advocate* and the *Youth's Temperance Banner*, and its numerous volumes and tracts, has been an efficient instrument in enlightening and stirring the public mind. In April, 1866, Congress voted to banish the liquor traffic from the Capitol and the public grounds at Washington, and the next winter a Congressional Temperance Society, Hon. Henry Wilson president, was organized. In 1868 the "Friends of Temperance" and the "Vanguard of Freedom," the one a society of white people and the other of the freedmen, were organized in the South. In July, 1868, the sixth National Convention met in Cleveland, Ohio. Its most important resolution declares that the temperance cause "demands the persistent use of the ballot for its promotion." In 1869 women began to form associations for the suppression of the traffic. The first were organized in Rutland, Vt.; Clyde, O.; and Jonesville and Adrian, Mich. This was the beginning of a tidal-wave of enthusiasm which culminated in the Ohio crusades, and crystallized in the establishment of the Woman's National Christian Temperance Union. The churches were actively at work. "Bands of Hope" were formed among the children. The iniquities of the license system, and the wisdom of separate political action on the part of temperance men, were everywhere discussed; and the liquor-dealers, in alarm, were busy organizing leagues and collecting funds, because, as they confessed, "of the damage being done to the liquor business."

In January, 1873, the Hon. Henry Wilson introduced in the United States Senate a bill providing for a Commission of Inquiry, whose aim was to secure a thorough investigation of the evils of the alcoholic habit, and ascertain what measures are most efficient in removing or lessening those evils. This bill has been repeatedly brought forward in Congress, backed by memorials from all parts of the country, but has been defeated every time by the influence of the liquor interest. The guilty alone fear the light. In August, 1873, the seventh National Convention was held at Saratoga. It declared again that the legal suppression of the traffic is the only effective policy, and that the time had arrived "fully to introduce the temperance issue into state and national politics," but counselled the friends of the cause to co-operate with existing political parties "where such will endorse the policy of prohibition."

In the winter of 1873-74 a novel movement began, which, under the name of the Woman's Crusade, attracted universal attention. In the town of Hillsborough, Highland Co., O., the liquor trade was doing its deadly work, and at the same time the enemies of that traffic were earnest in their labors to lessen its ravages. At a public meeting, Dr. Dio Lewis, of Boston, told how a drunkard's wife, forty years ago, after long and fervent prayer, gathered a band of Christian women and waited upon the liquor-dealer, imploring him to give up his

dreadful business, and how their prayers were answered. The next day seventy-five Christian women, led by Mrs. E. J. Thompson, a daughter of ex-governor Trimble, began a systematic visitation of the drug-stores, hotels, and saloons of Hillsborough, and continued it till victory crowned their efforts. In eight days all the saloons were closed. The work spread from town to town and from city to city, in not a few encountering fierce opposition, but moving on in triumph, and accomplishing great and permanent good. This wonderful movement spread into other states, reclaiming thousands of inebriates, closing thousands of saloons, and giving a mighty impulse to all forms of temperance work.

At this present time (January, 1880) the reform seems to be even more prominently before the public mind than it was before the war. The iniquities of the traffic have been urged upon the attention of the legislatures of the states, and the laws are constantly changing, generally for the better, occasionally for the worse, as Israel or Amalek prevails, so that it is almost impossible to classify them. Maine, Vermont, New Hampshire, Ohio, and North Carolina prohibit the traffic in all intoxicating liquors. Iowa prohibits the traffic in distilled liquors, but not in wine and beer. Rhode Island, Connecticut, Illinois, Kentucky, Minnesota, Missouri, Arkansas, Texas, and the District of Columbia are under Local Option laws. The people of Kansas are to vote this fall (1880) on a proposed amendment to the State Constitution, which, if adopted, will prohibit both the manufacture and the sale of alcoholic intoxicants. Some of the states, as New York, Ohio, and Illinois, have Civil Damage laws, which make the dealers responsible before the courts for mischief done by means of their wares. Nevada has no law on the subject. In many of the states special laws give particular counties or towns the power to prohibit, by popular vote, the trade in alcohol. Experience has given ample demonstration that where prohibitory legislation is fully sustained by public sentiment the liquor traffic can be stamped out as thoroughly as any other form of crime. All through the land the active friends of temperance, with scarcely an exception, are fixed in the conviction that the common traffic in alcoholic drinks is a crime against society, and that to license it is to commit another crime against the public welfare. This conviction grows more intense from year to year, and from this position it may be safely predicted that there will be no retreat.

During the last decade the field of battle has become as broad as the national domain, and new and powerful forces have come into the contest. Previous to 1860, there were only about half a score of local temperance societies among our Catholic population. Now there are probably a thousand, with an aggregate of 200,000 members. The Woman's National Christian Temperance Union, which grew out of the Ohio crusade movement, and was organized in 1874, has spread its network of societies over more than half the United States, and, by its conventions, publications, and earnest labors, is wielding a powerful influence. The Independent Order of Good Templars, which originated in Central New York in 1851, leads all the other compact temperance organizations in numbers and continued success. It now has about 400,000 members in the United States, and perhaps 300,000 more chiefly in England and her colonies. The friends of temperance are organized, more or less thoroughly, in every state of the Union. Forty-one newspapers, the organs of the various temperance bodies, are disseminating information on all sides.

All the great religious denominations among us have given emphatic utterance to their sentiments, not only endorsing fully the principle of total abstinence, but some of them declaring, as did the General Conference of the Methodist Episcopal Church in 1872, that they "regard the manufacture, sale, or the using of intoxicating drinks morally wrong;" recommend the use of

unfermented wine on sacramental occasions; and record their conviction that the traffic in alcoholic beverages should be suppressed by the strong arm of the law. There probably is not in Christendom any other body of people so large, and so free from the use of intoxicants, as the evangelical Protestants of the United States. The agitation among us cannot cease till the right is victorious.

IV. *The Temperance Cause in Foreign Countries.*—The first temperance society in the British isles was formed in New Ross, Ireland, in August, 1829. A society was formed at Greenock, Scotland, in October of the same year. Early in 1830 a society was organized at Bradford, England. The reform began, as in America, in opposition to the use of distilled spirits only; but in 1833 a society was formed at Preston, England, on the principle of total abstinence from all intoxicating drinks. The British Association for the Promotion of Temperance was formed at Manchester in September, 1835, on this basis; and the new pledge in a few years wholly superseded the old. This organization afterwards changed its name to that of "The British Temperance League." It is still laboring, with accumulating power. The United Kingdom Alliance was formed in 1853, and is still in vigorous operation and doing excellent service. Its specific aim is the "total legislative suppression of the traffic in intoxicating beverages." The form of law which the Alliance is laboring to secure is one giving "the rate-payers of each parish and township a power of local veto over the issue of licenses." A bill, drawn up by Sir Wilfred Lawson, in accordance with this aim, has been offered in Parliament every year since 1863 without success, but not without encouraging gains. The Alliance, meanwhile, is spending a hundred thousand dollars annually in advocating the measure. The Scottish Temperance League, formed in 1844, combines both branches of the work—the reform of the victim and the legal suppression of the traffic. The temperance sentiment of the Scottish people found expression, in 1854, in what is called the "Forbes McKenzie Act," a law which closes all public-houses in Scotland during the whole of the Sabbath, and on other days of the week from 11 P.M. to 8 A.M. The League has an income of about \$35,000, maintains a vigorous Publication House, and keeps eight or ten lecturers constantly in the field. The Irish Temperance League was organized in Belfast in 1859, for "the suppression of drunkenness by moral suasion, legislative prohibition, and all other lawful means." It has an income of about \$10,000, publishes a journal, and employs agents to labor throughout the island. The women of Great Britain have also organized a Christian Temperance Association, meeting for that purpose at Newcastle-on-Tyne in April, 1876, and they are engaging heartily in the good work.

In Sweden a temperance society was formed in Stockholm in 1831, and some five hundred more in various parts of the kingdom during the next ten years. King Oscar himself became a member, and also caused tracts and papers to be regularly distributed in the army and the navy. Great benefits have followed among the people, and the reform is still progressing.

In Australia, Madagascar, India, and China the reform has begun its work, which, we trust, will never cease, in all its broad field, till the enormous vice and crime at whose extinction it aims shall be found no more among men.

V. *Literature.*—Many valuable works have been published which treat of the matters that form the basis of the temperance movement, among them the following: Beecher [Lyman], *Six Sermons on Temperance* (1823); Nott, *Lectures on Temperance* (1857); *Permanent Temperance Documents* (1837-42); *Bacchus* (Lond.); *Anti-Bacchus* (ibid.); Carpenter, *Physiology of Intemperance*; Wilson, *Pathology of Drunkenness*; Pitman, *Alcohol and the State*; Richardson, *Alcohol, and Temperance Lesson Book*; Farrar, *Talks on Temperance*;

Lee, *Text-book of Temperance*; Crane, *Arts of Intoxication*; Hargreaves, *Our Wasted Resources*; Lizars, *Alcohol and Tobacco*; *The Prohibitionist's Text-book*; *Bacchus Dethroned*; Hunt, *Alcohol as a Food and Medicine*; Patton, *Bible Wines, or Laws of Fermentation*; Richardson, *Action of Alcohol on the Body and on the Mind*; Edmunds, *Medical Use of Alcohol*; Richardson, *Medical Profession and Alcohol, and Moderate Drinking*; Storey, *Alcohol, its Nature and Effects*; *The Centennial Temperance Volume*. (J. T. C.)

**Temple**, a word used to designate a building dedicated to the worship of a deity. In this article we treat only of the series of edifices erected for that purpose at Jerusalem, and in doing so we present the reconstructions hitherto the latest and most approved, with strictures, however, upon their defects. See PALACE.

**I. Names.**—The usual and appropriate Heb. term for this structure is *הֵיכָל*, *heykál*, which properly denotes a royal residence, and hence the sacred name *הַיְיָוָה*, *Jehovah*, is frequently added; occasionally it is also qualified by the epithet *קֹדֶשׁ*, *kódesh*, *sanctuary*, to designate its sacredness. Sometimes the simpler phrase *בֵּית*, *beith*, *house*, is used; and in lieu of the latter other names of the Deity, especially *אֱלֹהִים*, *elohim*, *God*, are employed. The usual Greek word is *ναός*, which, however, strictly denotes the central building or *fane* itself; while the more general term *ἱερόν* included all the associated structures, i. e. the surrounding courts, etc.

The above leading word *הֵיכָל* is a participial noun from the root *הָקַל*, *to hold or receive*, and reminds us strongly of the Roman *templum*, from *tempeus*, *tempeus*, *locus liberatus et effatus*. When an augur had defined a space in which he intended to make his observations, he fixed his tent in it (*tabernaculum capere*), with planks and curtains. In the *arx* this was not necessary, because there was a permanent *auguraculum*. The Sept. usually renders *הֵיכָל*, "temple," by *οἶκος* or *ναός*, but in the Apocrypha and the New Test. it is generally called *ἱερόν*. Rabbinical appellations are *בֵּית הַמִּקְדָּשׁ*, *beith ham-Mikdâsh*, *the house of the sanctuary*, *בֵּית הַחֵלֶם*, *beith ham-Chelam*, *the house of ages*, because the ark was not transferred from it, as it was from Gilgal after 24, from Shiloh after 369, from Nob after 13, and from Gibeon after 50 years. It is also called *בֵּית הַדְּוָל*, *a dwelling*, i. e. of God.

In imitation of this nomenclature, the word *temple* elsewhere in Scripture, in a figurative sense, denotes sometimes the Church of Christ (Rev. iii, 12): "Him that overcometh will I make a pillar in the temple of my God." Paul says (2 Thess. ii, 4) that Antichrist "as God sitteth in the temple of God, showing himself that he is God." Sometimes it imports heaven (Psa. xi, 4): "The Lord is in his holy temple; the Lord's throne is in heaven." The martyrs in heaven are said to be "before the throne of God, and to serve him day and night in his temple" (Rev. vii, 15). The soul of a righteous man is the temple of God, because it is inhabited by the Holy Spirit (1 Cor. iii, 16, 17; vi, 19; 2 Cor. vi, 16).

**II. History of the Temple and its Several Successors.**—1. *The First Temple.*—After the Israelites had exchanged their nomadic life for a life in permanent habitations, it was becoming that they should exchange also their movable sanctuary or tabernacle for a temple. There elapsed, however, after the conquest of Palestine, several centuries during which the sanctuary continued movable, although the nation became more and more stationary. It appears that the first who planned the erection of a stone-built sanctuary was David, who, when he was inhabiting his house of cedar, and God had given him rest from all his enemies, meditated the design of building a temple in which the ark of God

might be placed, instead of being deposited "within curtains," or in a tent, as hitherto. This design was at first encouraged by the prophet Nathan; but he was afterwards instructed to tell David that such a work was less appropriate for him, who had been a warrior from his youth, and had shed much blood, than for his son, who should enjoy in prosperity and peace the rewards of his father's victories. Nevertheless, the design itself was highly approved as a token of proper feelings towards the Divine King (2 Sam. vii, 1-12; 1 Chron. xvii, 1-14; xxviii). See DAVID. We learn, moreover, from 1 Kings v and 1 Chron. xxii that David had collected materials which were afterwards employed in the erection of the Temple, which was commenced four years after his death, in the second month (comp. 1 Kings vi, 1; 2 Chron. iii, 2). This corresponds to May, B.C. 1010. We thus learn that the Israelitish sanctuary had remained movable more than four centuries subsequent to the conquest of Canaan. "In the fourth year of Solomon's reign was the foundation of the house of the Lord laid, in the month Siv; and in the eleventh year, in the month Bul, which is the eighth month, was the house finished throughout all the parts thereof, and according to all the fashion of it. So was he seven years in building it." See SOLOMON.

The workmen and the materials employed in the erection of the Temple were chiefly procured by Solomon from Hiram, king of Tyre, who was rewarded by a liberal importation of wheat. Josephus states (*Ant.* viii, 2) that duplicates of the letters which passed between Solomon and king Hiram were still extant in his time, both at Jerusalem and among the Tyrian records. He informs us that the persons employed in collecting and arranging the materials for the Temple were ordered to search out the largest stones for the foundation, and to prepare them for use on the mountains where they were procured, and then convey them to Jerusalem. In this part of the business Hiram's men were ordered to assist. Josephus adds that the foundation was sunk to an astonishing depth, and composed of stones of singular magnitude, and very durable. Being closely mortised into the rock with great ingenuity, they formed a basis adequate to the support of the intended structure. Josephus gives to the Temple the same length and breadth as are given in 1 Kings, but mentions sixty cubits as the height. He says that the walls were composed entirely of white stone; that the walls and ceilings were wainscoted with cedar, which was covered with the purest gold; that the stones were put together with such ingenuity that the smallest interstices were not perceptible, and that the timbers were joined with iron cramps. It is remarkable that after the Temple was finished, it was not consecrated by the high-priest, but by a layman, by the king in person, by means of extemporaneous prayers and sacrifices. See SHECHINAH.

The Temple remained the centre of public worship for all the Israelites only till the death of Solomon, after which ten tribes forsook this sanctuary. But even in the kingdom of Judah it was from time to time desecrated by altars erected to idols. For instance, "Manasseh built altars for all the host of heaven in the two courts of the house of the Lord. And he caused his son to pass through the fire, and observed times, and used enchantments, and dealt with familiar spirits and wizards: he wrought much wickedness in the sight of the Lord to provoke him to anger. And he set a graven image of the grove that he had made in the house," etc. Thus we find also that king Josiah commanded Hilkiah, the high-priest, and the priests of the second order to remove the idols of Baal and Asherah from the house of the Lord (2 Kings xxiii, 4, 13): "And the altars that were on the top of the upper chamber of Ahaz which the kings of Judah had made, and the altars which Manasseh had made in the two courts of the house of the Lord, did the king beat down, and brake them down from thence, and cast the dust of them into the brook Kidron." In fact, we are informed that, in

spite of the better means of public devotion which the sanctuary undoubtedly afforded, the national morals declined so much that the chosen nation became worse than the idolaters whom the Lord destroyed before the children of Israel (xxi, 9)—a clear proof that the possession of external means is not a guarantee for their right use. It appears also that during the times when it was fashionable at court to worship Baal the Temple stood desolate, and that its repairs were neglected (xii, 6, 7). We further learn that the cost of the repairs was defrayed chiefly by voluntary contribution, by offerings, and by redemption money (ver. 4, 5). The original cost of the Temple seems to have been defrayed by royal bounty, and in great measure by treasures collected by David for that purpose. There was a treasury in the Temple in which much precious metal was collected for the maintenance of public worship. The gold and silver of the Temple were, however, frequently applied to political purposes (1 Kings xv, 18 sq.; 2 Kings xii, 18; xvi, 8; xviii, 15). The treasury of the Temple was repeatedly plundered by foreign invaders: for instance, by Shishak (1 Kings xiv, 26); by Jehoshaphat, king of Israel (2 Kings xiv, 14); by Nebuchadnezzar (xxiv, 13); and, lastly, again by Nebuchadnezzar, who, having removed the valuable contents, caused the Temple to be burned down (xxv, 9 sq.), summer, B.C. 588. The building had stood since its completion 415 years (Josephus has 470, and Rufinus 370, years). Thus terminated what the later Jews called *בית הראשון*, the first house. See JERUSALEM.

2. *The Second Temple.*—In the year B.C. 536 the Jews obtained permission from Cyrus to colonize their native land. Cyrus commanded also that the sacred utensils which had been pillaged in the first Temple should be restored, and that for the restoration of the Temple assistance should be granted (Ezra i and vi; 2 Chron. xxxvi, 22 sq.). The first colony which returned under Zerubbabel and Joshua having collected the necessary means, and having also obtained the assistance of Phœnician workmen, commenced in the second year after their return the rebuilding of the Temple, spring, B.C. 535. The Sidonians brought rafts of cedar-trees from Lebanon to Joppa. The Jews refused the co-operation of the Samaritans, who, being thereby offended, induced the king Artachshashta (probably Smerdis) to prohibit the building. It was only in the second year of Darius Hystaspis (summer, B.C. 520) that the building was resumed. It was completed in the sixth year of this king, winter, B.C. 516 (comp. Ezra v and vi; Hagg. i, 15). According to Josephus (*Ant.* xi, 4, 7), the Temple was completed in the ninth year of the reign of Darius. The old men who had seen the first Temple were moved to tears on beholding the second, which appeared like nothing in comparison with the first (Ezra iii, 12; Hagg. ii, 3 sq.). It seems, however, that it was not so much in dimensions that the second Temple was inferior to the first as in splendor, and in being deprived of the ark of the covenant, which had been burned with the Temple of Solomon. See CAPTIVITY.

After the establishment of the Seleucidæ in the kingdom of Syria, Antiochus Epiphanes invaded Egypt several times. During his first expedition, B.C. 171, the renegade Menelaus (q. v.) procured the death of the regular high-priest Onias III (q. v.) (2 Macc. iv, 27 sq.); during his second campaign, on retiring for winter-quarters to Palestine, Antiochus slew certain other persons, B.C. 170; and, finally, he pillaged and desecrated the Temple, and subdued and plundered Jerusalem, June, B.C. 168. He also ordered the discontinuance of the daily sacrifice. In December of the same year he caused an altar for sacrifice to Jupiter Olympius to be placed on the altar of Jehovah in the Temple (vii, 2, 5). This was "the abomination that maketh desolate." At the same time, he devoted the temple on Mount Gerizim, in allusion to the foreign origin of its worshippers, to Ju-

piter *Ζευς*. The Temple at Jerusalem became so desolate that it was overgrown with vegetation (1 Macc. iv, 38; 2 Macc. vi, 4). Three years after this profanation (Dec. 25, B.C. 165) Judas Maccabeus, having defeated the Syrian armies in Palestine, cleansed the Temple, and again commenced sacrificing to Jehovah upon the altar there. He repaired the building, furnished new utensils, and erected fortifications against future attacks (1 Macc. iv, 43–60; vi, 7; xiii, 53; 2 Macc. i, 18; x, 3). Forty-five days after cleansing the sanctuary, Antiochus died. Thus were fulfilled the predictions of Daniel: from "the casting down some of the host and stars," i. e. slaying some of the pious and influential Jews by Antiochus, especially from the death of Onias, B.C. 171, to the cleansing of the sanctuary, B.C. 165, was six years (of 360 days each) and 140 days, or 2300 days (Dan. viii, 8–14); from the reduction of Jerusalem, B.C. 168, to the cleansing of the sanctuary, B.C. 165, was three years and a half, i. e. "a time, times, and a half," or 1290 days (vii, 25; xii, 7, 11); and from the reduction of Jerusalem, B.C. 168, to the death of Antiochus, which occurred early in B.C. 164, forty-five days after the purification of the Temple, 1335 days. As to the 140 days, we have no certain date in history to reckon them; but if the years are correct, we may well suppose the days to be so (ver. 12; Josephus, *Ant.* xii, 7, 6; *War*, pref. 7; i, 1, 1; 1 Macc. i, 46, 47; iv, 38–61; 2 Macc. v, 11–27; vi, 1–9). See ANTIOCHUS. Alexander Jannæus, about B.C. 106, separated the court of the priests from the external court by a wooden railing (Josephus, *Ant.* xiii, 13, 5). During the contentions among the later Maccabees, Pompey attacked the Temple from the north side, caused a great massacre in its courts, but abstained from plundering the treasury, although he even entered the holy of holies, B.C. 63 (*ibid.* 14, 4). Herod the Great, with the assistance of Roman troops, stormed the Temple, B.C. 37; on which occasion some of the surrounding halls were destroyed or damaged. See PALESTINE.

3. *The Third Temple.*—Herod, wishing to ingratiate himself with the Church-and-State party, and being fond of architectural display, undertook not merely to repair the second Temple, but to raise a perfectly new structure. As, however, the Temple of Zerubbabel was not actually destroyed, but only removed after the preparations for the new Temple were completed, there has arisen some debate whether the Temple of Herod could properly be called the third Temple. The reason why the Temple of Zerubbabel was not at once taken down in order to make room for the more splendid structure of Herod is explained by Josephus as follows (*Ant.* xv, 11, 2): "The Jews were afraid that Herod would pull down the whole edifice and not be able to carry his intentions as to its rebuilding into effect; and this danger appeared to them to be very great, and the vastness of the undertaking to be such as could hardly be accomplished. But while they were in this disposition the king encouraged them, and told them he would not pull down their Temple till all things were gotten ready for building it up entirely. As Herod promised them this beforehand, so he did not break his word with them, but got ready a thousand wagons that were to bring stones for this building, and chose out ten thousand of the most skilful workmen, and bought a thousand sacerdotal garments for as many of the priests, and had some of them taught the arts of stone-cutters, and others of carpenters, and then began to build; but this not till everything was well prepared for the work." The work was actually commenced in the nineteenth year of the reign of Herod—that is, the beginning of B.C. 21. Priests and Levites finished the Temple itself in one year and a half. The out-buildings and courts required eight years. However, some building operations were constantly in progress under the successors of Herod, and it is in reference to this we are informed that the Temple was finished only under Albinus, the last procurator but one, not long before the commencement of the Jew-

ish war in which the Temple was again destroyed. It is in reference also to these protracted building operations that the Jews said to Jesus, "Forty and six years was this Temple in building" (John ii, 20). See HEROD.

Under the sons of Herod the Temple remained apparently in good order, and Herod Agrippa, who was appointed by the emperor Claudius its guardian, even planned the repair of the eastern part, which had probably been destroyed during one of the conflicts between the Jews and Romans of which the Temple was repeatedly the scene (Josephus, *Ant.* xvii, 10). During the final struggle of the Jews against the Romans, A.D. 70, the Temple was the last scene of the tug of war. The Romans rushed from the Tower of Antonia into the sacred precincts, the halls of which were set on fire by the Jews themselves. It was against the will of Titus that a Roman soldier threw a firebrand into the northern out-buildings of the Temple, which caused the conflagration of the whole structure, although Titus himself endeavored to extinguish the fire (*War*, vi, 4). Josephus remarks, "One cannot but wonder at the accuracy of this period thereto relating; for the same month and day were now observed, as I said before, wherein the holy house was burned formerly by the Babylonians. Now the number of years that passed from its first foundation, which was laid by king Solomon, till this its destruction, which happened in the second year of the reign of Vespasian, are collected to be one thousand one hundred and thirty, besides seven months and fifteen days; and from the second building of it, which was done by Haggai in the second year of Cyrus the king, till its destruction under Vespasian there were six hundred and thirty-nine years and forty-five days."

The sacred utensils, the golden table of the shewbread, the book of the law, and the golden candlestick were displayed in the triumph at Rome. Representations of them are still to be seen sculptured in relief on the triumphal arch of Titus (see Fleck, *Wissenschaftliche Reise*, i, 1, plate i-iv; and Reland, *De Spoliis Templi Hierosolymitani in Arcu Titiano*, ed. E. A. Schulze [Traj. ad Rh. 1775]). The place where the Temple had stood seemed to be a dangerous centre for the rebellious population, until, in A.D. 136, the emperor Hadrian founded a Roman colony under the name *Ælia Capitolina* on the ruins of Jerusalem, and dedicated a temple to Jupiter Capitolinus on the ruins of the Temple of Jehovah. Henceforth no Jew was permitted to approach the site of the ancient Temple, although the worshippers of Jehovah were, in derision, compelled to pay a tax for the maintenance of the Temple of Jupiter (see Dion Cassius [Xiphil.], lxi, 12; Jerome, *Ad Jes.* ii, 9; ii, 11 sq.; Eusebius, *Hist. Eccles.* iv, 6; *Demonstratio Evangelica*, viii, 18). Under the reign of Constantine the Great some Jews were severely punished for having attempted to restore the Temple (see Fabricii *Luz Evangelii*, p. 124).

The emperor Julian undertook, in 363, to rebuild the Temple; but, after considerable preparation and much expense, he was compelled to desist by flames which burst forth from the foundations (see Ammianus Marcellinus, xxiii, 1; Socrates, *Hist. Eccles.* iii, 20; Sozomen, v, 22; Theodoret, iii, 15; Schröckh, *Kirchengeschichte*, vi, 385 sq.). Repeated attempts have been made to account for these igneous explosions by natural causes; for instance, by the ignition of gases which had long been pent up in subterranean vaults (see Michaelis, *Zerst. kl. Schrift.* iii, 453 sq.). A similar event is mentioned by Josephus (*Ant.* xvi, 7, 1), where we are informed that Herod, while plundering the tombs of David and Solomon, was suddenly frightened by flames which burst out and killed two of his soldiers. Bishop Warburton contends for the miraculousness of the event in his discourse *Concerning the Earthquake and Fiery Eruption which Defeated Julian's Attempt to Rebuild the Temple of Jerusalem*. See also Lotter, *Historia Instaurationis Templi Hierosolymitani sub Juliano* (Lips.

1728, 4to); Michaelis (F. Holzfluss), *Diss. de Templi Hierosolymitani Juliani Mandato per Judæos frustra Tentata Restitutio* (Hal. 1751, 4to); Lardner, *Collection of Ancient Jewish and Heathen Testimonies*, iv, 57 sq.; Ernesti, *Theol. Bibl.* ix, 604 sq. R. Tourlet's French translation of the works of Julian (Paris, 1821), ii, 435 sq., contains an examination of the evidence concerning this remarkable event. See also Jost, *Geschichte der Israeliten*, iv, 211, 254 sq.; and id., *Allgemeine Geschichte des jüdischen Volkes*, ii, 158. See JULIAN.

A splendid mosque now stands on the site of the Temple. This mosque was erected by the caliph Omar after the conquest of Jerusalem by the Saracens in 636. Some think that Omar changed a Christian church which stood on the ground of the Temple into the mosque which is now called El Aksa, the outer, or northern, because it is the third of the most celebrated mosques, two of which, namely, those of Mecca and Medina, are in a more southern latitude. See MOSQUE.

III. *Situation and Accessories of the Temple.*—1. The site of the Temple is clearly stated in 2 Chron. iii, 1: "Then Solomon began to build the house of the Lord at Jerusalem in Mount Moriah, where the Lord appeared unto David, his father, in the place that David had prepared in the threshing-floor of Ornan (or Araunah) the Jebusite." In south-eastern countries the site of the threshing-floors is selected according to the same principles which might guide us in the selection of the site of windmills. We find them usually on the tops of hills which are on all sides exposed to the winds, the current of which is required in order to separate the grain from the chaff. It seems that the summit of Moriah, although large enough for the agricultural purposes of Araunah, had no level sufficient for the plans of Solomon. According to Josephus (*War*, v, 5), the foundations of the Temple were laid on a steep eminence, the summit of which was at first insufficient for the Temple and altar. As it was surrounded by precipices, it became necessary to build up walls and buttresses in order to gain more ground by filling up the interval with earth. The hill was also fortified by a threefold wall, the lowest tier of which was in some places more than three hundred cubits high; and the depth of the foundation was not visible, because it had been necessary in some parts to dig deep into the ground in order to obtain sufficient support. The dimensions of the stones of which the walls were composed were enormous; Josephus mentions a length of forty cubits. It is, however, likely that some parts of the fortifications of Moriah were added at a later period.

As we shall eventually see, the position and dimensions of the present area of the Haran reasonably correspond to the requirements of the several ancient accounts of the Temple. There can be little doubt, looking at the natural conformation of the rocky hill itself, that the central building always occupied the summit where the Mosque of Omar now stands. The theory of Fergusson (in Smith's *Dict. of the Bible*, and elsewhere) that it was situated in the extreme south-west corner of the present platform has not met with acceptance among archaeologists. See MORIAH.

The Temple was in ancient warfare almost impregnable, from the ravines at the precipitous edge of which it stood; but it required more artificial fortifications on its western and northern sides, which were surrounded by the city of Jerusalem; for this reason there was erected at its north-western corner the Tower of Antonia, which, although standing on a lower level than the Temple itself, was so high as to overlook the sacred buildings, with which it was connected partly by a large staircase, partly by a subterranean communication. This tower protected the Temple from sudden incursions from the city of Jerusalem, and from dangerous commotions among the thousands who were frequently assembled within the precincts of the courts; which also were sometimes used for popular meetings. See ANTONIA.

2. Many savants have adopted a style as if they possessed much information about the archives of the Temple; there are a few indications from which we learn that important documents were deposited in the Tabernacle and Temple. Even in Deut. xxxi, 26, we find that the book of the law was deposited in the ark of the covenant; and according to 2 Kings xxii, 8, Hilkiah rediscovered the book of the law in the house of Jehovah. In 2 Macc. ii, 13 we find a βιβλιοθήκη mentioned, apparently consisting chiefly of the canonical books, and probably deposited in the Temple. In Josephus (*War*, v, 5) it is mentioned that a book of the law was found in the Temple. It appears that the sacred writings were kept in the Temple (*Ant.* v, 1, 17). Copies of political documents seem to have been deposited in the treasury of the Temple (1 Macc. xiv, 49). This treasury, ὁ ἱερός θησαυρός, was managed by an inspector, γαζοφύλαξ, נֹכַר, and it contained the great sums which were annually paid in by the Israelites, each of whom paid a half-shekel, and many of whom sent donations in money and precious vessels, ἀναθήματα. Such costly presents were especially transmitted by rich proselytes, and even sometimes by pagan princes (2 Macc. iii, 3; Josephus, *Ant.* xiv, 16, 4; xviii, 3, 5; xix, 6, 1; *War*, ii, 17, 3; v, 13, 6; *Cont. Apion.* ii, 5; Philo, *Opp.* ii, 59 sq., 569). It is said especially that Ptolemy Philadelphus was very liberal to the Temple, in order to prove his gratitude for having been permitted to procure the Sept. translation (Aristeas; *De Translat. LXX.*, p. 109 sq.). The gifts exhibited in the Temple are mentioned in Luke xxi, 5; we find even that the rents of the whole town of Ptolemais were given to the Temple (1 Macc. x, 39). There were also preserved historical curiosities (2 Kings xi, 10), especially the arms of celebrated heroes (Josephus, *Ant.* xix, 6, 1): this was also the case in the Tabernacle.

The Temple was of so much political importance that it had its own guards (φύλακες τοῦ ἱεροῦ), which were commanded by a στρατηγός. Twenty men were required for opening and shutting the eastern gate (Josephus, *War*, vi, 5, 3; *Cont. Apion.* ii, 9; *Ant.* vi, 5, 3; xvii, 2, 2). The στρατηγός had his own secretary (*Ant.* xx, 6, 2; 9, 3), and had to maintain the police in the courts (comp. Acts iv, 1 and v, 24). He appears to have been of sufficient dignity to be mentioned together with the chief priests. It seems that his Hebrew title was אֲרִיֵּז הַרִּירָה, *the man of the mountain of the house* (*Middoth*, i, 2). The priests themselves kept watch on three different posts, and the Levites on twenty-one posts.

It was the duty of the police of the Temple to prevent women from entering the inner court, and to take care that no person who was Levitically unclean should enter within the sacred precincts. Gentiles were permitted to pass the first enclosure, which was therefore called the Court of the Gentiles; but persons who were on any account Levitically unclean were not permitted to advance even thus far. Some sorts of uncleanness, for instance that arising from the touch of a corpse, excluded only from the court of the men. If an unclean person had entered by mistake, he was required to offer sacrifices of purification. The high-priest himself was forbidden to enter the holy of holies under penalty of death on any other day than the Day of Atonement (Philo, *Opp.* ii, 591). Nobody was admitted within the precincts of the Temple who carried a stick or a basket, and who wanted to pass merely to shorten his way, or who had dusty shoes (*Middoth*, ii, 2).

IV. *General Types of the Temple.*—There is perhaps no building of the ancient world which has excited so much attention since the time of its destruction as the Temple which Solomon built at Jerusalem, and its successor as rebuilt by Herod. Its spoils were considered worthy of forming the principal illustration of one of the most beautiful of Roman triumphal arches, and Justinian's highest architectural ambition was that he might surpass it. Throughout the Middle Ages it in-

fluenced to a considerable degree the forms of Christian churches, and its peculiarities were the watchwords and rallying-points of all associations of builders. Since the revival of learning in the 16th century its arrangements have employed the pens of numberless learned antiquarians, and architects of every country have wasted their science in trying to reproduce its forms.

But it is not only to Christians that the Temple of Solomon is so interesting; the whole Mohammedan world look to it as the foundation of all architectural knowledge, and the Jews still recall its glories and sigh over their loss with a constant tenacity, unmatched by that of any other people to any other building of the ancient world.

With all this interest and attention, it might fairly be assumed that there was nothing more to be said on such a subject—that every source of information had been ransacked, and every form of restoration long ago exhausted, and some settlement of the disputed points arrived at which had been generally accepted. This is, however, far from being the case, and few things would be more curious than a collection of the various restorations that have been proposed, as showing what different meanings may be applied to the same set of simple architectural terms.

When the French expedition to Egypt, in the first years of this century, had made the world familiar with the wonderful architectural remains of that country, every one jumped to the conclusion that Solomon's Temple must have been designed after an Egyptian model, forgetting entirely how hateful that land of bondage was to the Israelites, and how completely all the ordinances of their religion were opposed to the idolatries they had escaped from—forgetting, too, the centuries which had elapsed since the Exode before the Temple was erected, and how little communication of any sort there had been between the two countries in the interval. Nevertheless, as we shall presently see, the Egyptian monuments remarkably confirm, in many respects, the ancient accounts of the Temple at Jerusalem.

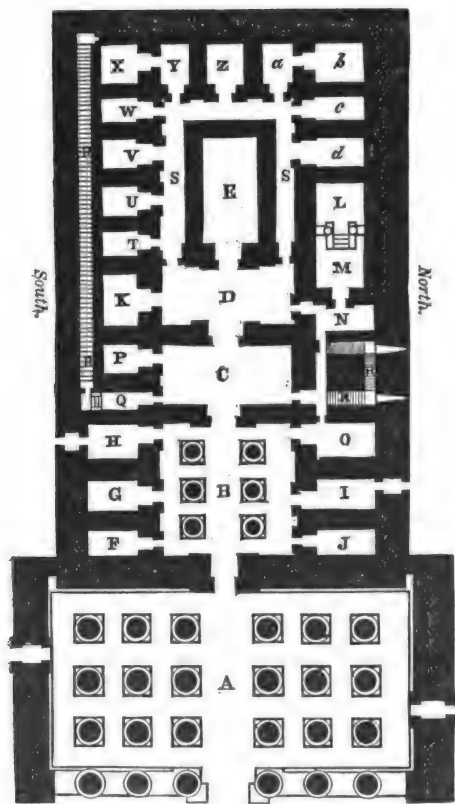

The Assyrian discoveries of Botta and Layard have within the last twenty years given an entirely new direction to the researches of the restorers, and this time with a very considerable prospect of success, for the analogies are now true, and whatever can be brought to bear on the subject is in the right direction. The original seats of the progenitors of the Jewish races were in Mesopotamia. Their language was practically the same as that spoken on the banks of the Tigris. Their historical traditions were contemporaneous, and, so far as we can judge, almost all the outward symbolism of their religion was the same, or nearly so. Unfortunately, however, no Assyrian temple has yet been exhumed of a nature to throw much light on this subject, and we are still forced to have recourse to the later buildings at Persepolis, or to general deductions from the style of the nearly contemporary secular buildings at Nineveh, and elsewhere, for such illustrations as are available. These, although in a general way illustrative, yet by no means, in our opinion, suffice for all that is required for Solomon's Temple. For some architectural features of that erected by Herod we must doubtless look to Rome. Of the intermediate Temple erected by Zerubbabel we know very little, but, from the circumstance of its having been erected under Persian influences contemporaneously with the buildings at Persepolis, it is perhaps the one of which it would be most easy to restore the details with anything like certainty. Yet we must remember that both these later temples were essentially Jewish, i. e. Phœnician, in their style; and we may therefore presume that the original type, which we know was copied in plan, was likewise imitated in details to a very great degree. There are, however, two sources of illustration with which the Temple was historically connected in a very direct manner, and to these we therefore devote a brief attention before considering the several edifices in detail.

1. The *Tabernacle* erected by Moses in the desert was unquestionably the pattern, in all its essential features, of its Solomonic successor. In the gradually increasing sanctity of the several divisions, as well as in their strikingly proportionate dimensions, we find the Temple little more than the Tabernacle on an enlarged scale, and of more substantial materials. This is so obvious that we need not dwell upon it. See TABERNACLE.

2. *The Egyptian Temples*, in their conventional style, evince, notwithstanding their idolatrous uses, a wonderful relation to both the Tabernacle and the Temple. As will be seen from the accompanying plan of the Temple of Denderah, which is one of the simplest and most symmetrical as well as the best preserved of its class, there is a striking agreement in the points of the compass, in the extra width of the porch, in the anterior holy place, in the interior shrine, in the side-rooms, in the columnar halls; and in the grander Egyptian temples, such as the earlier portions of those at Luxor and

that the height of the whole structure was 120 cubits." It is difficult to reconcile this statement with that given in 1 Kings, unless we suppose that the words *ισος τοις μέτροις*, equal in measures, do not signify an equality in all dimensions, but only as much as equal in the number of cubits; so that the porch formed a kind of steeple, which projected as much above the roof of the Temple as the roof itself was elevated above its foundations. As the Chronicles agree with Josephus in asserting that the summit of the porch was 120 cubits high, there remains still another apparent contradiction to be solved, namely, how Josephus could assert that the Temple itself was 60 cubits high, while we read in 1 Kings that its height was only 30 cubits. We suppose that in the book of Kings the internal elevation of the sanctuary is stated, and that Josephus describes its external elevation, which, including the basement and an upper story (which may have existed, consisting of rooms for the accommodation of priests, containing also vestries and treasuries), might be double the internal height of the sanctuary. The internal dimension of the "holy," which was called in preference *הַקֹּדֶשׁ*, was 40 cubits long, 20 cubits wide, and 30 cubits high. The holy was separated from the "holy of holies" (*הַקֹּדֶשׁ הַקִּדְשִׁים*) by a partition, a large opening in which was closed by a suspended curtain. The holy of holies was on the western extremity of the entire building, and its internal dimensions formed a cube of 20 cubits. On the eastern extremity of the building stood the porch, *אולם, πρόναος*. At the entrance of this pronaos stood the two columns called Jachin and Boaz, which were 35 cubits high.

The Temple was also surrounded by a triple *יצריע*, story of chambers, each of which stories was five cubits high, so that there remained above ample space for introducing the windows, somewhat in the manner of a clear-story to the sanctuary. Now the statement of Josephus, who says that each of these stories of chambers (*קַלְעִיר*) was 20 cubits high, cannot be reconciled with the Biblical statements, and may prove that he was no very close reader of his authorities. Perhaps he had a vague kind of information that the chambers reached half-way up the height of the building, and, taking the maximum height of 120 cubits instead of the internal height of the holy, he made each story four times too high. The windows which are mentioned in 1 Kings vi, 4 consisted probably of lattice-work. The lowest story of the chambers was five cubits, the middle six, and the third seven cubits wide. This difference of the width arose from the circumstance that the external walls of the Temple were so thick that they were made to recede one cubit after an elevation of five feet, so that the scarcement in the wall of the Temple gave a firm support to the beams which supported the second story, without being inserted into the wall of the sanctuary; this insertion being perhaps avoided not merely for architectural reasons, but also because it appeared to be irrelevant. The third story was supported likewise by a similar scarcement, which afforded a still wider space for the chamber of the third story. These observations will render intelligible the following Biblical statements: "And against the wall of the house he built stories round about, both of the Temple and of the oracle; and he made chambers round about. The nethermost story was five cubits broad, and the middle was six cubits broad, and the third was seven cubits broad; for without in the wall of the house he made narrowed nests (*מִנְיָעִיר*) narrowings or rebatements) round about, so that the beams should not be fastened in the walls of the house. The house, when it was in building, was built of stone made ready before it was brought thither; so that there was neither hammer, nor axe, nor any tool of iron heard in the house while it was building. The door of the middle story was in the right side of the house; and they went up with winding stairs into the middle story, and out of

Karnak, we have the two obelisks at the portal like the pillars Jachin and Boaz. These coincidences cannot have been accidental. Nor is this general adoption of a plan already familiar to the Hebrews inconsistent with the divine prescription of the details of architecture (Exod. xxv, 9; 1 Chron. xxviii, 12). See EGYPT.

V. *Detailed Description of Solomon's Temple*.—1. *Antient Accounts*.—The Temple itself and its utensils are described in 1 Kings vi and vii, and 2 Chron. iii and iv. According to these passages, the Temple was 60 cubits long, 20 wide, and 30 high. Josephus, however (*Ant.* viii, 3, 2), says, "The Temple was 60 cubits high and 60 cubits in length, and the breadth was 20 cubits; above this was another story of equal dimensions, so

the middle into the third. So he built the house, and finished it; and covered the house with beams and boards of cedar. And then he built chambers against all the house, five cubits high; and they rested on the house with timber of cedar" (1 Kings vi, 7). From this description it may be inferred that the entrance to these stories was from without; but some architects have supposed that it was from within; which arrangement seems to be against the general aim of impressing the Israelitish worshippers with sacred awe by the seclusion of their sanctuary.

In reference to the windows, it should be observed that they served chiefly for ventilation, since the light within the Temple was obtained from the sacred candlesticks. It seems, from the descriptions of the Temple, to be certain that the *הֵיכָל*, *oracle*, or holy of holies, was an *adytum* without windows. To this fact Solomon appears to refer when he spake, "The Lord said that he would dwell in the thick darkness" (1 Kings viii, 12).

The *הֵיכָל*, *oracle*, had perhaps no other opening than the entrance, which was, as we may infer from the prophetic visions of Ezekiel (which probably correspond with the historic Temple of Solomon), six cubits wide.

From 1 Kings vii, 10, we learn that the private dwellings of Solomon were built of massive stone. We hence infer that the framework of the Temple also consisted of the same material. The Temple was, however, wainscoted with cedar wood, which was covered with gold. The boards within the Temple were ornamented by beautiful carvings representing cherubim, palms, and flowers. The ceiling of the Temple was supported by beams of cedar wood (comp. Pliny, *Hist. Nat.* xvi, 69). The wall which separated the holy from the holy of holies probably consisted not of stone, but of beams of cedar. It seems, further, that the partition partly consisted of an *opus reticulatum*, so that the incense could spread from the holy to the most holy. This we infer from 1 Kings vi, 21: "So Solomon overlaid the house within with pure gold; and he made a partition by the chains of gold before the oracle, and he overlaid it with gold."

The floor of the Temple was throughout of cedar, but boarded over with planks of fir (1 Kings vi, 15). The doors of the oracle were composed of olive-tree; but the doors of the outer temple had posts of olive-tree and leaves of fir (ver. 31 sq.). Both doors, as well that which led into the Temple as that which led from the holy to the holy of holies, had folding-leaves, which, however, seem to have been usually kept open, the aperture being closed by a suspended curtain—a contrivance still seen at the church-doors in Italy, where the church-doors usually stand open; but the doorways can be passed only by moving aside a heavy curtain. From 2 Chron. iii, 5, it appears that the greater house was also ceiled with fir. It is stated in ver. 9 "that the weight of the nails employed in the Temple was fifty shekels of gold;" and also that Solomon "overlaid the upper chambers with gold."

The lintel and side posts of the oracle seem to have circumscribed a space which contained one fifth of the whole area of the partition; and the posts of the door of the Temple one fourth of the area of the wall in which they were placed. Thus we understand the passage 1 Kings vi, 31-35, which also states that the door was covered with carved work overlaid with gold.

Within the holy of holies stood only the ark of the covenant; but within the holy were ten golden candlesticks and the altar of incense. See ALTAR; CANDLESTICK.

The Temple was surrounded by an inner court, which in Chronicles is called the court of the priests, and in Jeremiah the higher court. This, again, was surrounded by a wall consisting of cedar beams placed on a stone foundation (1 Kings vi, 36): "And he built the inner court with three rows of hewed stone, and a row of ce-

dar beams." This enclosure, according to Josephus (*Ant.* viii, 3, 9), was three cubits high. Besides this inner court, there is mentioned a great court (2 Chron. iv, 9): "Furthermore, he made the court of the priests, and the great court, and doors for the court, and overlaid the doors of them with brass." It seems that this was also called the outward court (comp. Ezek. xl, 17). This court was also more especially called the court of the Lord's house (Jer. xix, 14; xxvi, 2). These courts were surrounded by spacious buildings, which, however, according to Josephus (*War*, v, 5, 1), seem to have been partly added at a period later than that of Solomon. For instance (2 Kings xv, 35), Jotham is said to have built the higher gate of the house of the Lord. In Jer. xxvi, 10 and xxxvi, 10 there is mentioned a new gate (comp. also Ezek. xl, 5-47; xlii, 1-14). But this prophetic vision is not strictly historical, although it may serve to illustrate history (comp. also Josephus, *Ant.* viii, 3, 9). The third entry into the house of the Lord mentioned in Jer. xxxviii, 14 does not seem to indicate that there were three courts, but appears to mean that the entry into the outer court was called the first, that into the inner court the second, and the door of the sanctuary the third. It is likely that these courts were quadrilateral. In the visions of Ezekiel they form a square of four hundred cubits. The inner court contained towards the east the altar of burnt-offering, the brazen sea, and ten brazen lavers; and it seems that the sanctuary did not stand in the centre of the inner court, but more towards the west. From these descriptions we learn that the Temple of Solomon was not distinguished by magnitude, but by good architectural proportions, beauty of workmanship, and costliness of materials. Many of our churches have an external form not unlike that of the Temple of Solomon. In fact, this Temple seems to have been the pattern of our church buildings, to which the chief addition has been the Gothic arch. Among others, the Roman Catholic church at Dresden is supposed to bear much resemblance to the Temple of Solomon.

2. *Modern Reconstructions.*—It thus appears that as regards the building itself we have little more than a few fragmentary notices, which are quite insufficient to enable us to make out a correct architectural representation of it, or even to arrive at a very definite idea of many things belonging to its complicated structure and arrangements. All attempts that have been made in this direction have utterly failed, and, for the most part, have proceeded on entirely wrong principles. Such was remarkably the case with the first great work upon the subject by professedly Christian writers; namely, the portion of the commentary on Ezekiel by the Spanish Jesuits Pradus and Villalpandus (1596-1604) which treats of the Temple. It was accompanied by elaborate calculations and magnificent drawings; but the whole proceeded on a series of mistakes—first, that the Temple of Ezekiel was a delineation of that which had been erected by Solomon; secondly, that this was again exactly reproduced in Herod's; and, thirdly, that the style of architecture from the first was of the Græco-Roman character—all quite groundless suppositions. Their idea of Solomon's Temple was that both in dimensions and arrangement it was very like the Escorial in Spain. But it is by no means clear whether the Escorial was in process of building while their book was in the press in order to look like the Temple, or whether its authors took their idea of the Temple from the palace. At all events, their design is so much the more beautiful and commodious of the two that we cannot but regret that Herrera was not employed on the book and the Jesuits set to build the palace. Various other writers, chiefly on the Continent, followed in the same line—Haffener, Capellus (*Τραάγιον*, printed in the *Crit. Sacra*), Lightfoot, Sturm (in Ugolino), Lamy, Semmler, Mel—a notice of whose treatises, some of them large and ponderous, may be seen in Bähr, *Salomonische Tempel* (§ 3). They are now of comparatively little use:

Lightfoot's, as Bähr admits, is the best of the whole, being more clear, learned, and solidly grounded in its representations. But it has chiefly to do, as its title indicates (*The Temple, especially as it stood in the*

of the times, made little account of anything but the outward material structure, this being regarded as a sort of copy—though usually in a very inferior style of art—of some of the temples of heathen antiquity. It is only during the present century that any serious efforts have been made to construct an idea of Solomon's Temple on right principles; that is, on the ground simply of the representations made concerning it in Scripture, and with a due regard to the purposes for which it was erected, and the differences as well as the resemblances between it and heathen temples of the same æra. A succession of works or treatises with this view has appeared, almost exclusively in Germany, several of them by architects and antiquarians, with special reference to the history of the building art. They differ very much in merit; and in one of the latest, as perhaps also the ablest, of the whole, the treatise of Bähr

Ground-plan of Solomon's Temple according to Fergusson (showing the disposition of the chambers in the two stories).

already referred to (published in 1848), a review is given of the aim and characteristics of preceding investigations. As a general result, it has been conclusively established on the negative side, and is now generally acquiesced in, that the means entirely fail us for presenting a full and detailed representation, in an architectural respect, of the Temple and its related buildings. Its being cast in the rectilinear and chest form plainly distinguished it from erections in the Greek and Roman style; and, if the employment of Phœnician artists might naturally suggest some approach in certain parts to Phœnician models, it is, on the other hand, admitted by the most careful investigators in this particular department of antiquarian study that little or nothing is known of the Phœnician style of building (Bähr, p. 46).

We here present the delineations of several later antiquaries, which show how variously the historical descriptions are interpreted and applied.

Perspective of Solomon's Temple, with its Accompanying Structures (according to Paine), as seen from the East.

Entirely different from the foregoing is Prof. Paine's idea of the Temple, arising from his interpretation of the "enlarging and winding about still upward" of Ezek. xli, 7 to mean an overjutting of the upper chambers by galleries (*Temple of Solomon*, p. 38). A serious objection to such an arrangement is the insecurity of a building thus widening at the top.

VI. *Zerubbabel's Temple*.—We have very few particulars regarding the Temple which the Jews erected after their return from the Captivity, and no description that would enable us to realize its appearance. But there are some dimensions given in the Bible and elsewhere which are extremely interesting as affording points of comparison between it and the temples which preceded it or were erected after it.

The first and most authentic are those given in the book of Ezra (vi, 3) when quoting the decree of Cyrus, wherein it is said, "Let the house be builded, the place where they offered sacrifices, and let the foundations

thereof be strongly laid; the height thereof threescore cubits, and the breadth thereof threescore cubits; with three rows of great stones, and a row of new timber." Josephus quotes this passage almost literally (*Ant.* xi, 4, 6), but in doing so enables us to translate "row" (Chald. *לִּיָּבֵן*, *layer*) as *story* (*δῶμος*, so also the Sept.)—as, indeed, the sense would lead us to infer—for it could only apply to the three stories of chambers that surrounded Solomon's, and afterwards Herod's, Temple; and with this again we come to the wooden structure which surmounted the Temple and formed a fourth story. It may be remarked, in passing, that this dimension of sixty cubits in height accords perfectly with the words which Josephus puts into the mouth of Herod (*ibid.* xv, 11, 1) when he makes him say that the Temple built after the Captivity wanted sixty cubits of the height of that of Solomon. For, as he had adopted, as we have seen above, the height of one hundred and twenty cubits, as written in the Chronicles, for that Temple,

this one remained only sixty. The other dimension of sixty cubits in breadth is twenty cubits in excess of that of Solomon's Temple; but there is no reason to doubt its correctness, for we find, both from Josephus and the Talmud, that it was the dimension adopted for the Temple when rebuilt, or rather repaired, by Herod. At the same time, we have no authority for assuming that any increase was made in the dimensions of either the holy place or the holy of holies, since we find that these were retained in Ezekiel's description of an ideal Temple, and were afterwards those of Herod's. As this Temple of Zerubbabel was still standing in Herod's time, and was, more strictly speaking, repaired rather than rebuilt by him, we cannot conceive that any of its dimensions were then diminished. We are left, therefore, with the alternative of assuming that the porch and the chambers all round were twenty cubits in width, including the thickness of the walls, instead of ten cubits, as in the earlier building. This may, perhaps, to some extent, be accounted for by the introduction of a passage between the Temple and the rooms of the priest's lodgings, instead of each being a thoroughfare, as must certainly have been the case in Solomon's Temple. This alteration in the width of the Pteromata made the Temple one hundred cubits in length by sixty in breadth, with a height, it is said, of sixty cubits, including the upper room, or Talar, though we cannot help

Solomon's Temple according to Paine: 1. Front View; 2. West End; 3. Interior.

X.—R

suspecting that this last dimension is somewhat in excess of the truth.

The only other description of this Temple is found in Hecateus the Abderite, who wrote shortly after the death of Alexander the Great. As quoted by Josephus (*Cont. Ap.* i, 22), he says that "in Jerusalem, towards the middle of the city, is a stone-walled enclosure about five hundred feet in length (ὡς πεντάπλεστος) and one hundred cubits in width, with double gates," in which he describes the Temple as being situated. It may be that at this age it was found necessary to add a court for the women or the Gentiles, a sort of Narthex or Galilee for those who could not enter the Temple. If this, or these together, were one hundred cubits square, it would make up the "nearly five plethra" of our author. Hecateus also mentions that the altar was twenty cubits square and ten high. Although he mentions the Temple itself, he unfortunately does not supply us with any dimensions.

The Temple of Zerubbabel had several courts (αὐλαί) and cloisters or cells (πρόσθυνα). Josephus distinguishes an internal and external ἱερόν, and mentions cloisters in the courts. This Temple was connected with the town by means of a bridge (*Ant.* xiv, 4).

VII. *Ezekiel's Temple.*—The vision of a temple which the prophet Ezekiel saw while residing on the banks of the Chebar in Babylonia, in the twenty-fifth year of the Captivity, does not add much to our knowledge of the subject. It is not a description of a temple that ever was built or ever could be erected at Jerusalem, and can consequently only be considered as the beau ideal of what a Shemitic temple ought to be. As such it would certainly be interesting if it could be correctly restored; but, unfortunately, the difficulties of making out a complicated plan from a mere verbal description are very great indeed, and are enhanced in this instance by our imperfect knowledge of the exact meaning of the Hebrew architectural terms, and it may also be from the prophet describing not what he actually knew, but only what he saw in a vision.

Be this as it may, we find that the Temple itself was of the exact dimensions of that built by Solomon, viz. an adytum (*Ezek.* xl, 1-4) twenty cubits square, a naos twenty by forty, and surrounded by cells of ten cubits' width, including the thickness of the walls; the whole, with the porch, making up forty cubits by eighty. The height, unfortunately, is not given. Beyond this were various courts and residences for the priests, and places for sacrifice and other ceremonies of the Temple, till he comes to the outer court, which measured five hundred reeds on each of its sides; each reed (ver. 5) was six Babylonian cubits long, viz. of cubits each of one ordinary cubit and a handbreadth, or, at the lowest estimate, twenty-one inches. The reed was therefore at least ten feet six inches, and the side consequently five thousand two hundred and fifty Greek feet, or within a few feet of an English mile, considerably more than the whole area of the city of Jerusalem, Temple included.

It has been attempted to get over this difficulty by saying that the prophet meant cubits, not reeds; but this is quite untenable. Nothing can be more clear than the specification of the length of the reed, and nothing more careful than the mode in which reeds are distinguished from cubits throughout; as, for instance, in the next two verses (6 and 7), where a chamber and a gateway are mentioned, each of one reed. If "cubit" were substituted, it would be nonsense. Nevertheless, Prof. Paine has given a reconstruction of this as well as the actual Temple, for the description and dimensions in the vision are consistent with themselves and capable of being plotted down.

Notwithstanding its ideal character, the whole is extremely curious, as showing what were the aspirations of the Jews in this direction, and how different they were from those of other nations; and it is interesting here, inasmuch as there can be little doubt but that the arrangements of Herod's Temple were in some measure influenced by the description here given. The outer court, for instance, with its porticos measuring five hundred cubits each way, is an exact counterpart, on a smaller scale, of the outer court of Ezekiel's Temple, and is not found in either Solomon's or Zerubbabel's; and so too, evidently, are several of the internal arrangements. See *EZEKIEL*.

VIII. *Herod's Temple.*—The most full, explicit, and trustworthy information on this subject is contained in that tract of the Jewish Talmud entitled *Middoth* (i. e. "measures"), which is almost as minute in its descriptions and dimensions (no doubt by parties who had seen, and as priests been familiar with, the edifice) as a modern architect's specifications. Besides this, the two descriptions of the Temple incidentally given by Josephus (*ut sup.*) are the only consecutive accounts of the ancient structure. Our principal attempt will therefore be to follow these where they agree, and to reconcile their seeming discrepancies, noting at the same time all important allusions in the Bible and uninspired historians of antiquity, and constantly comparing the whole with the indications on the modern site. Occasional use, for verification, may be made of the measures in the spiritual temple of *Ezek.* xl-xlii, but with great caution, as but few of them seem to have been borrowed from the actual type, which, moreover, was Solomon's Temple, and not Herod's.

#### (I.) THE OUTER CIRCUIT OF THE TEMPLE.

We assume that the present enclosure of the Haram corresponds to the areas of the Temple and of the Tower Antonia taken together; and the most convenient mode of considering the general contour of the outer wall will be after presenting the following arguments:

i. Remains of cyclopean masonry are still found at intervals on all the sides of the present enclosure of the peculiar bevelled character which marks their antiquity. The English engineers engaged in the late Ordnance survey traced these all along the southern end, and found them resting on the native rock, some of them still retaining the marks of the original Tyrian workmen (see *Recovery of Jerusalem*, p. 108). Now Josephus informs us (*Ant.* xv. 11, 3; *War*, v, 5, 1) that the area of Moriah was enlarged by building up enormous walls from the valleys

Perspective of Herod's Temple, with all its Courts (according to Paine), as seen from the East.

Stone C of the Second Course from the Bottom of the Eastern Wall of the Haram at Jerusalem. (The marks are in red paint, and in some instances they are now upside-down, showing that the stones were drafted and marked in the quarry.)

and filling them in with earth. The lower courses of these seem to have been buried under the rubbish that fell upon them from the demolition of the upper part of the walls, and have thus escaped. It is difficult to suppose that such masonry could have been the work of later times, or that the area would have been altered after such prodigious bounds had been set to it. Particular coincidences of ruins on the eastern, southern, and western sides will be noted in giving the circuit of the wall in detail. The "Jews' Walling-place" along the western wall is agreed upon all hands to be a veritable mark of antiquity, going back at least as far as the time of Herod.

ii. The enormous vaulted substructions found under the southern end of the Haram are evidently the same which would be left between these embankments and the native rock; and it was apparently among these that the tyrant Simon subsisted till after the destruction of the city (Josephus, *War*, vii, 2, 4). But especially does Maimonides speak expressly of the arches supporting the ground on this part in order to prevent graves and other pollution beneath (Lightfoot, *Prospects of the Temple*, ch. i).

iii. That the platform (not the mere *building*) of the Tower Antonia occupied the whole northern end of this enclosure we think is nearly certain from the following facts:

a. The scarped rock and wall on this side can be no other than the precipice, rendered more inaccessible by art, above which Josephus states that this tower, as well as those at the other corners of its courts, was reared (*War*, v, 5, 8). No such ridge can be found to the north of this.

b. The presence of the fosse (found in the modern "Pool of Bethesda") on this part seems to limit its site. This ditch is not only referred to in the several notices of Antonia by Josephus above cited, but in *Ant.* xiv, 4, 1, 2 he speaks of it as being "broad and deep," "of immense depth," so that it could hardly have failed to remain as a landmark in all ages.

c. The projecting bastions at the north-west and north-east angles appear to be the relics of the towers at these corners, and the projection at the Golden Gate may have been connected with the tower at the south-east corner.

d. The present barracks of the Turkish troops are on the traditional site of the Tower of Antonia at the north-west corner of the Haram.

iv. The actual size of the present enclosure agrees remarkably with the dimensions of the Temple's and Antonia's areas. According to the Talmud (*Middoth*, ii, 1), the outer court of the Temple was 500 cubits square, which, taking the most approved estimate of the Jewish or Egyptian cubit at 1.824 feet [see (unr)], would give 912 feet as the length of each side. Now the total length of the southern wall of the Haram is 922 feet, which will allow 5 feet for the thickness (at the surface) of each wall, a coincidence that cannot be accidental. Again, Josephus gives the distance around the whole enclosure of the Temple and Antonia together as being six stadia (*War*, v, 5, 2); and if we subtract from this his estimate of four stadia for the circuit of the Temple (*Ant.* xv, 11, 3), we have one stadium, or about 606 feet, for the additional length of the court of Antonia northward on each side. Now this added to the square whose base has just been found will give about 1521 feet for the sides of the entire enclosure on the east and west; and it is a remarkable fact that the length of the Haram in this direction, according to the Ord-

nance Survey, averages 1540 feet, leaving again 5 feet for the thickness of each of the three walls. We are not sure, however, but that a somewhat greater thickness should be allowed the outer wall, which (on the west side, at least) Josephus says was "broad" (*War*, vi, 3, 1), and on all sides "very strong" (*Ant.* xiv, 4, 1).

On this point, however, there are some considerations that at first seem to be powerful objections:

(a) Josephus, in the passage last referred to, makes the Temple area only a stadium square. But this is evidently nothing more than a round number from mere recollection, measured only by the eye; whereas the Talmud is so minute in its interior specification that there can be little doubt which to follow. The 500 *reebs* in the measurement of the spiritual temple by Ezekiel (xlii, 16-20) seem to have been taken from these 500 *cubits*.

(b) The modern area is not rectangular, nor are its opposite sides parallel or of equal length; the south-west corner is the only one that has been positively settled as being a right angle, and the north side is certainly longer than that on the south. We do not conceive, therefore, that the term "square" in the Mishna and Josephus need be so strictly taken, but only to mean that the area

was a quadrilateral, apparently rectangular to the eye, and of equal dimensions on the east, south, and west sides, which are exposed to view. This mode of reconciliation, we think, is better than to suppose the line on either of these sides to have been shifted, in the face of every possible evidence of identity. By running the dividing line between the Temple and the court of Antonia immediately south of the Golden Gate (so as to make this latter, which is evidently ancient, the entrance to Antonia, and not to the Temple, which had but one eastern gate), we obtain another right angle, and make the four sides of the Temple area nearly equal.

Having thus settled the general line of the outer wall of the Temple, it remains to trace the objects of interest lying along it, both on the inner and outer sides, in which endeavor we will begin—

1. On the south-west corner. Here was the famous bridge of which Josephus so often speaks (*Ant.* xiv, 4, 2, twice; *War*, i, 7, 2; ii, 16, 3; vi, 6, 2; S, 1). Accordingly, in the foundation-stones on the western side of the present wall, 39 feet from the south corner, may still be seen

South-west Angle of the Temple Wall. (From a photograph.)

the three lower courses (50 feet long) of the first arch, evidently, of this bridge, which spanned the Tyropæon. A measurement of the curve indicates that the span of the entire arch was about 45 feet (see these details in the *Ordinance Survey*, p. 27), so that seven such arches would conveniently extend across the valley (350 feet, the remaining 125 feet to the wall being embankment) and allow suitable piers between them. This was evidently the "passage over the intermediate valley," through which

2. The first gate (from the south) on the western side of the Temple "led to the king's palace" on Zion (Josephus, *Ant.* xv, 11, 5). This passage seems to have been originally built by Solomon (1 Kings x, 5; 2 Chron. ix, 4). The arches, however, may belong to the time of the reconstruction of the bridge, perhaps by Herod. Here, we think, must be located "the gate *Shallecheth* (literally, a "casting down," perhaps with reference to the steepness of the valley), by the caseway of the going up" to Zion (1 Chron. xxvi, 16; comp. ver. 18); although Lightfoot places them both at the northern end of the Temple wall,

reading Josephus's four gates in a southward order (*Works*, ix, 226). There exists still, in fact, a sort of embankment not far north of this spot, across which the "upper level" aqueduct from Bethlehem is probably carried to Moriah. This is apparently the same with the gate anciently named *Sur* (2 Kings xi, 6), otherwise called the *Gate of the Foundation* (3 Chron. xxiii, 6). The reason of the name "*Sur*" (literally, "removed") is quite uncertain. The "*foundation*" may refer to the high base of the wall supporting the bridge adjoining. It seems to have been this passage between the abode of the usurping Athaliah on Zion and the refuge of the young king in the Temple proper that was specially guarded; the guards were three and the same in each, but differently named: one section was at the Horse Gate (at "the king's house"), another at the other end of the bridge (at this "gate of *Sur*," or "of the foundation"), and the third at the gates of the inner enclosure ("the doors" generally, "the gate behind the [former] guard"); so that if any enemy passed the first two among "the people in the [outer] courts," he should still be intercepted by the last before reaching the prince. Lightfoot interprets differently (*Works*, ix, 326). In the Talmud it is explicitly said that there was (apparently) but one gate in the western Temple wall, and in the same connection the gates are repeatedly referred to as being five in number, of which four are assigned to the other sides (*Middoth*, i, 1, 3). This single western one is there called *Kipinus* (*ibid.*, i, 3). That this was the same with the gate in question, we think to be probable, from the consideration that this being the principal entrance on this side—as is evident not only from its position and the points connected, but also from the slighting manner in which the rest are referred to and their destination mentioned—will account for the silence in the Talmud respecting the others. From the name itself little can be safely argued; see Lightfoot's attempts to define it (*Works*, ix, 226). Each of the gates in the outer wall of the Temple (as well as those in the inner wall) was 20 cubits high and 10 wide (*Middoth*, ii, 3), which Josephus, apparently including side and cap ornaments, extends (in the case of the inner, and therefore probably also the outer, wall) to 30 cubits high and 15 wide (*War*, v, 5, 3).

3. The second gate northward seems to have been that anciently called *Parbar*, from a comparison of the following facts:

a. In 1 Chron. xxvi, 18, it is mentioned in connection with "the causeway," as if next to Shallecheth.

b. In 2 Kings xxiii, 11 is made mention of a gate leading from "the suburbs" into the Temple, apparently not far from the palace; and this precisely agrees with the southern one of the two middle gates which Josephus states led to "the suburbs" (*Ant.* xv, 11, 5). The word "*parbar*" (which only occurs in these two Biblical passages, and in Ezek. xxvii, 28) is used by the rabbins as meaning "suburb," although its radical sense would appear to be an open building or space (see Gesenius and Buxtorf, *Lex.* s. v.).

c. At a point 265 feet north of the south-west corner of the Haram there still exists a gate (Bab el-Mugharibeh, "the gate of the Western Africans") in the modern wall, leading into the Haram, and in the nature of the case there must always have been a gate near this spot.

d. Beyond this point, as we shall presently see, there is no opportunity for a gate south of the point where the north wall of Zion would have joined the Temple; but that wall must have included one of these "gates to the suburbs," both for the sake of convenience and to prevent an undue crowding of three gates in the western Temple wall north of its junction with the Zion wall. Here, however, there is just convenient space for a gate, and a suitable locality about half-way between the bridge and the Zion wall.

e. These views are confirmed by the following point:

4. Josephus mentions (*War*, vi, 3, 2) as lying along this wall "*John's Tower*, which he built in the war he made against Simon, over the gates that led to the *Xystus*," by which gate we understand this of *Parbar*, and that the tower was constructed over an enlargement of its gateway lying opposite Simon's or the Lying-out Tower.

5. The next object of interest is "the *Council-house*" mentioned by Josephus as the termination of the old wall at the Temple (*War*, v, 4, 2), which plainly implies that it lay in the corner where the city and Temple walls met, and immediately joined them both. This building we therefore locate on that part of the Haram which adjoins the termination of the present Street of David, for the reasons following:

a. The courses of old foundation-stones forming "the Jews' Walling-place" show that there was no structure anciently adjoining them, and therefore the Council-house must be located north of this spot.

b. The space here unappropriated (about 100 feet, between the Jews' Walling-place and David Street) would be a suitable one for a public building with its interior court and connected offices.

c. The *Mukhama*, or "town-hall," of the modern city is exactly on this spot, and "some of it has more the appearance of being *in situ* than many of the other remains in the city" (*Ordinance Survey*, p. 23).

6. Just north of the Zion wall thus located, we would place one of the gates of *Aseppim*, referred to in 1 Chron. xxvi, 17 as lying on the western side of the Temple, identical with Josephus's other gate leading to the suburbs, at a convenient place, and uniformly situated with respect to the gate above and that below, and just at the present Bab es-Silleh, or "Gate of the Chain," at the head of the modern "Street of David," which is the principal entrance to the Haram.

7. Adjoining this on the inside must have been the *House of Aseppim*, or "collections" (1 Chron. xxvi, 15), occupying (part of) the cloister between the two gates of the same name. It probably was the place of deposit for the Temple offerings (see Lightfoot, *Works*, ix, 230). This is apparently "that northern edifice which was between the two gates" mentioned by Josephus (*War*, vi, 2, 7), for that these were the two gates of *Aseppim* is evident from several considerations:

a. The Romans, although then assaulting the outer Temple wall, evidently attacked its north-west corner, where the Temple proper was nearest to them, and therefore would not have reared their engines south of the junction of the old wall with the Temple, which leaves but these two gates for the sphere of their operations on the west.

b. That this building was on the west side of the Temple is clear from the fact that of the four engines the first was opposite the north-west angle of the inner court [from a northerly point of attack], and the last one farther along the north side; if, then, this second one be opposite the same north-west corner of the inner court from a westerly direction, the third will be farther south on the west side, between the south gate of *Aseppim* and the old wall—a natural and consistent arrangement. The Tower of Antonia proper prevented any being reared nearer the extreme north-west corner of the outer wall.

8. The other *Gate of Aseppim* we therefore place at a corresponding distance northward, opposite where a gate enters the Haram from the modern "Cotton Mart," and hence called Bab el-Kattanin. Lightfoot asserts that this gate (which, however, he calls Shallecheth) was diametrically opposite the eastern gate (*Works*, ix, 226), but apparently without any authority. This is evidently also Josephus's "last [gate on this side that] led to the other city," i. e. *Acra* (*Ant.* xv, 11, 6).

9. In this last passage, also, Josephus states that on passing out of this gate "the road descended down into the valley [of the Tyropæon] by a great number of steps, and thence up again by the ascent," which agrees with the fact that the detritus adjoining the wall is here 72 feet deep (*Ordinance Survey*, p. 29).

10. We next arrive at the north-west corner of the Temple enclosure, about 1000 feet from the east as well as the south side. Near this corner were private passages for the Roman guard from Antonia to the galleries within the wall (Josephus, *War*, v, 5, 8).

11. On the north side there was but one gate (the "two gates" of Josephus [*War*, vi, 2, 7] have been shown above not to belong to the north side), which the Talmud calls *Tedi* (*Middoth*, i, 3), a word of uncertain signification, but apparently indicative of "privacy" from its being less used, and therefore less ornamented, than the other gates (so Lightfoot from the Talmud), which the obstruction of Antonia would naturally occasion. We place it in the middle of the wall, nearly opposite both the Gate of Song and the present "Gate el-Hitta," on the north side of the Haram.

12. The north-east corner of the square would thus fall just south of the Golden Gate, considered as representing the tower at that angle of the enclosure of Antonia, possibly the old tower of Meah (Neh. iii, 1; xli, 39).

13. On the east side there was but one gate, that of *Shushan* (*Middoth*, i, 3), so called from a representation of that city on the walls of one of its chambers. It was opposite the entrance of the porch of the Temple, in order that the priest, when he burned the red heifer on the Mount of Olives, might exactly face the altar; on which account the tower over the gate was lower than those surmounting the other gates, so as not to intercept his view. So infers Lightfoot from the Talmud and Maimonides (*Works*, ix, 218, 219); which location, however, Mr. Williams finds it necessary to dispute (*Holy City*, ii, 355, note 5). This position shows that this gate and the altar were in a range with the other gates between them. By an inspection of the sectional view of the Temple on the map, it will appear that at a certain height on the Mount of Olives the fire on the altar might be seen through the inner gates and over this gate. We find no traces of this gate mentioned by travellers.

14. At the south-east corner Josephus says there was a *tremendous precipice* (*Ant.* xv, 11, 3, 5), apparently "the pinnacle of the Temple" on which the tempter placed Christ (Luke iv, 9), still to be recognised in the steep descent at this point, and proved to have been anciently more profound by the vaulted substructions beneath the inside of the Haram, raising this angle of its platform above the old bed of the valley. The wall is here about 60 feet high, and about 80 feet deep from the present surface of the ground outside. From Josephus's language

in War, vi, 3, 3, it is evident that the precipice at the north-east angle was also very considerable.

15. On the south side, according to the Talmud, were two gates, both named *Huldah* (*Middoth*, i, 3), perhaps from the propheticness of that name. These are evidently the "gates in the middle" of this side mentioned by Josephus (*Ant.* xv, 11, 5). We conclude that they lay very near together, and (with Dr. Robinson) identify them with the double gateway still found in the south Haram wall at the point where the modern city wall joins it. Its entire breadth is 42 feet (Robinson, *Bibl. Res.* i, 450) and it is reached by a sloping passage from the platform of the Haram, as the embankment here could never have otherwise admitted an exit, nor even then without exterior steps. Lightfoot, however, makes these gates divide the wall into three equal parts (*Works*, ix, 224), apparently merely arguing from the statement of Josephus. It is worthy of note that in 1 Chron. xxvi, 14-18 but one set of guards is constantly assigned to the south side, in like terms as to the single gates on the north and east, whereas four sets are, in both enumerations, assigned to the west side. The other modern vestiges of portals on this side are of inferior size and antiquity.

16. On the several sides of the Court of the Gentiles that lay within the outer wall (called also the Outer Court, Lower Court, and by the rabbins usually "Mountain of the Lord's House") there were several objects worthy of special note:

(1.) On the north and west sides were double interior porticos or *cloisters*, each 15 cubits wide, supported by columns and sustaining a roof on cedar beams (Josephus, *War*, v, 5, 2).

(2.) On the east side was *Solomon's Porch* (John x, 23; Acts iii, 11), of the same size and style with those on the north and west (Josephus, *Ant.* xv, 11, 3; xx, 9, 7).

(3.) On the south side was the *Royal Portico* (apparently so called after Herod, who rebuilt it; Josephus, *War*, i, 21, 1), which differed from the rest in being triple, the two side aisles being 30 feet broad, and the middle one once and a half as broad (*Ant.* xv, 11, 5). Lightfoot has strangely set these down as being respectively 15 and 424 cubits broad (Pitman's edition of his *Works*, ix, 239, with which his own map agrees; the English folio edition, i, 1061, has the same numbers; but the Latin edition in Ugolino, *Thesaurus*, ix, 596, has for the middle aisle *forty-one* cubits), in which we suspect some oversight (perhaps from thinking of the dimensions of the other cloisters), as all editions of Josephus here read alike, and the *Middoth* does not particularize on this point. The hypothesis of Williams (*Holy City*, ii, 401) that would throw the Royal Portico outside the Temple area is opposed to all ancient authority; so much so that even his coadjutor Prof. Willis is constrained to dissent from him (*ibid.* i, 109).

(4.) These cloisters were adorned with Corinthian columns of solid marble, 162 in number (of such size that three men could just span them with their outstretched arms, making about a diameter of six feet), which separated the aisles, besides another row half imbedded in the outer wall (Josephus, *Ant.* xv, 11, 5). We understand this to be the number of all the columns that stood alone in all the circuit of this court, and not those of the Royal Portico merely; for they would then be nudely crowded, and the average space between them which we have made (about 45 feet) is no greater span for the roof timbers than across the middle aisle of the south cloister. The harmony with which the several gates fall in between them when thus distributed is no little corroboration of the entire scheme. In the substructed vaults the rows of piers are 15 feet apart, and thus certain rows of them would fall exactly under these pillars, these piers also averaging about half the distance apart of the columns above. (See Prof. Willis's remarks in Williams's *Holy City*, appendix, i, 125-128; although we cannot see why he should think that a column stood over each pier one way when they could have been only over every other, or every third one, the other way.) These columns were 25 cubits high on three sides, which determines the height of the roof on those sides (Josephus, *War*, v, 5, 2); but on the south side (the shafts of) the two exterior rows were 27 feet high, the capitals and double bases raising the roof to 50 feet, and the middle aisle was twice as high, probably by another series of columns of the same size surmounting the first (*Ant.* xv, 11, 5). Balustrades doubtless guarded the edges of the flat roofs, and the gates were probably capped with turrets, for ornament as well as defence.

(5.) There were *porters' lodges* adjoining at least five of the gates (*Middoth*, i, 1), and probably similar structures for the accommodation of the Levites guarding each of the gates (1 Chron. xxvi, 12, 13).

(6.) The Talmud also speaks of *shops* in this court, where articles used in sacrifice were kept for sale, as well as of a room in which the Jewish "Council of Twenty-three," and afterwards the Sanhedrim, sat; these Lightfoot locates near the Shushan Gate, the former on the ground-floor and the latter overhead (*Works*, ix, 241-244). It was probably an abuse of this privilege of sale that led to the introduction of cattle, sheep, and pigeons by the traders whom Christ expelled.

## (II.) THE SACRED ENCLOSURE.

Brevity will require that in the consideration of the details of the interior portions of the Temple the simple dimensions and statements should be exhibited, together with their authority, with as little discussion as possible.

1. A *lattice-wall* all around, 1 cubit broad, 3 cubits high, with equidistant *pillars* containing notices of non-admission (Josephus, *Ant.* xv, 11, 5; *War*, v, 5, 2); called *chel* (Lam. ii, 8).

2. This stood 12 *steps*, each one half cubit high and broad, above the Gentiles' Court (on the north and south sides) (*Middoth*, ii, 3), but 14 [on the east side] (*War*, v, 5, 2).

3. Adjoining was a *platform*, 10 cubits wide (*War*, v, 5, 2).

## (III.) THE COURT OF THE WOMEN.

1. This court (called also New Court, 2 Chron. xx, 5; Outer Court, Ezek. xli, 21; Treasury, John viii, 20) was 135 cubits square [internally] (*Middoth*, ii, 5); "four-square" (*War*, v, 5, 2).

2. A *gate* on each side (*War*, v, 5, 2). These were 30 cubits wide [including ornaments], supported by pillars at the side, and having rooms above (*War*, v, 5, 3).

3. The east gate (called "Beautiful," Acts iii, 2) was 40 cubits wide [including side ornaments of 5 cubits] (*War*, v, 5, 3).

4. There were 5 *steps* from the platform [i. e. the difference between the floors of this court and that of the Israelites] (*War*, v, 5, 2, 3).

5. There were 15 *steps* to the Court of the Israelites (*War*, v, 5, 3); circular for the "Psalms of degrees" (*Middoth*, ii, 5).

6. *Corner courts* of the Women's Court, each 40 cubits from east to west [and 30 broad], with interior open spaces, 20 cubits by 14, for boiling sacrifices; the covered rooms around that in the north-east corner for performing the ceremony of release from a Nazarite's vow, in the south-east for a wood repository, in the south-west for cleansing lepers, in the north-west chambers for wine and oil for offerings (*Middoth*, ii, 5; Ezek. xli, 21-24). Lightfoot, however, makes the Nazarites' room in the south-east, the wood-room in the north-east, the lepers' room in the north-west, and the wine and oil rooms in the south-west (*Works*, ix, 307), correcting Surenhusius's mistranslation.

7. Single galleries of two stories [men below, women above] between the corner courts [on the north, east, and west sides] (*Middoth*, ii, 5); supported by columns similar to those of the Gentiles' Court (*War*, v, 5, 2).

8. There were eleven *treasure-chests* distributed in front of the columns in this court, besides the two at the gate Shushan for the half-shekel tax (Lightfoot, from the rabbins, *Works*, ix, 315).

9. Underground rooms for musical instruments on each side of the gate between this and the Israelites' Court (*Middoth*, ii, 6).

10. There was a *tower* over the east [Beautiful] gate with an occult [subterranean] passage from the Tower Antonia for the Roman guard (*Ant.* xv, 11, 7).

## (IV.) THE COURT OF THE ISRAELITES.

1. This was 187 cubits from east to west, 135 from north to south, 8 cubits wide on the north and south, and 11 on the east and west (*Middoth*, ii, 6).

2. Surrounded by a portico similar to those of the Gentiles' Court, but single (*War*, v, 5, 2).

3. Had three gates on the north and south, none on the west (*Middoth*, i, 4; *War*, v, 5, 2). Those on the north and south equidistant (*Ant.* xvi, 11, 5; *Middoth*, v, 3).

4. East gate called Higher Gate (2 Kings xv, 35; 2 Chron. xxvii, 8). New Gate (Jer. xxvi, 10; xxxvii, 10). Gate of Entrance (Ezek. xl, 15). Gate of Nicanor (*Middoth*, i, 4).

5. Gates and rooms in the wall adjoining as follows, beginning at the south-west corner (for the authority of most of these points it is sufficient to refer to Lightfoot's citations [*Works*, ix, 239-280], as there can be no dispute respecting them. We have not in all cases arranged the rooms precisely like Lightfoot, but have made a few slight changes where they seemed requisite):

- (1.) *Sentinel's Hall*, west of the first gate.
- (2.) *Gate of Knitting*.
- (3.) *Guard-room*, adjoining east.
- (4.) *Gate of Firetrials*, in the middle.
- (5.) *Guard-room* adjoining it.
- (6.) *Wood-room* for the use of the altar, adjoining the
- (7.) *Water-gate*, the last on this side.
- (8.) *Well-room*, with its draw-well connected with a reservoir [the aqueduct from Bethlehem?] deriving its waters from a westerly direction, and an engine for forcing it into the priests' laver.
- (9.) *House Gatzth*, at the south-east corner, consisting of two parts:

[1.] The *Session-room* of the Sanhedrim, with its triple semicircles for seating the members, and its desks. From a comparison of the number of members with the size of the room, we find that the space in the wall could by no means contain them, and have therefore enlarged it outwardly.

[2.] A room for the priests to pray and cast their lots in.

(10.) On the south side of the Gate of Nicanor, the

*Pastry-man's Chamber*, for baking the salt cakes burned with the daily sacrifice.

(11.) On the north side of the same gate, the *Priests' Wararobe*, for the pontifical dresses.

(12.) In the north-east corner, the *Earthenware-room*, for the sacred pottery.

(13.) A *Guard-room*, adjoining on the east.

(14.) *The Gate of Song*.

(15.) Adjoining this, a *Wash-room* for cleansing the entrails, etc., of sacrifices.

(16.) A *Room for Hides* of victims, and

(17.) *The Salt-room*, for the salt used in preserving them, both in order, adjoining

(18.) *The Gate of Women*. Adjoining this,

(19.) A *Treasure-room*, for the more permanent deposit of the money from the House of Asuppim.

(20.) A *Guard-room*, and next,

(21.) The other *Treasure-room*, for the same purpose as the former. These adjoining

(22.) *The Gate of Burning*, the last of the six.

(23.) The interval between this gate and the western wall was called the *House of Burning*, and was divided into three equal parts. This building projected inwardly into the Court of the Israelites, like one portion of the House Gazihi. These two buildings alone had entrances from the sacred enclosure, all the other rooms being entered only from the court within:

[1.] Adjoining the gate, the *House of the Consecrated Stones* of the former altar (removed after the rededication under the Maccabees, as having been desecrated by Antiochus Epiphanes), in the northern subdivision; and on the south the *Shew-bread Bakery*.

[2.] In the middle the *Priests' Hall*, where was a fire for the use of the guards at night.

[3.] The western portion was occupied, on the north for a *Priests' Bathing-room*, and on the south for keeping the *Lambs* selected for the daily sacrifice.

6. The principal difficulty connected with this court is the number of *steps*, and their height, leading into it on the north and south, and arises from a confusion in the terms by which Josephus mentions them. He says (*War*, v, 5, 2), that between the sacred platform and the interior court "were other steps, each of 5 cubits apiece," which we understand to mean that the Court of the Israelites was entered by [two flights of] steps, each [flight] rising 5 cubits, thus making 20 steps, in two sets of half-cubit steps. Again he says (*ibid.* § 4) that "there were 15 steps [those of the "degrees"] which led away [i. e. eastward] from the [west] wall of the Court of the Women to [i. e. towards] this greater gate [the Beautiful Gate], whereas those that led thither [i. e. to the platform down to which the Beautiful Gate led] from the other gates [opening towards this platform] were five steps shorter," by which we can only understand (according to the above interpolations) that the number of the steps leading out of the Court of the Israelites on the east exceeded by 5 the number [in each flight] of those on the north and south; for if these latter were 10 but in all, each must have been one cubit in the rise ( $7\frac{1}{2}$  cubits at the Nicanor Gate +  $2\frac{1}{2}$  at the Beautiful Gate = 10), an impracticable ascent. Finally, he says (*ibid.* § 2) that "the height of its buildings [those of the Women's Court], although it were on the outside 40 cubits, was hidden by the steps, and on the inside that height was but 25 cubits," which we take to denote that the top of the wall enclosing the Court of the Israelites (which was continuous with that of the Court of the Women) was 40 cubits from the level of the floor of the Court of the Gentiles, the intervening steps making the difference (15 cubits) of its internal altitude—as would be true within a single cubit ( $\frac{12+10+10}{2}=16$ ). The gate-turrets

were still higher than this. The steps mentioned by Josephus (*War*, v, 1, 5) as preventing the erection of John's engines on any other spot than "behind the inner court over against the west end of the cloister" seem to be those that ran around the three sides of the Priests' Court, at the railing separating it from the cloistered Court of the Israelites.

7. The thickness of this wall is nowhere stated in the Mishna, but is given by Josephus as being 8 cubits (*War*, vi, 5, 1, at the close); and the numerous rooms contained within it would seem to justify a greater thickness than in any of the other walls.

#### (V.) THE COURT OF THE PRIESTS, THE GREAT ALTAR, AND THE TEMPLE PROPER.

These are treated of in the Mishna in the fullest detail, and the minutest points—to the thickness of the walls and partitions, the number, size, and position of the doors, the dimensions, order, and situation of the rooms and passages, with all their peculiarities and contents—are given with the precise explicitness of specifications for a builder's contract; so that as to everything, great or small, contained within these bounds there is such full and trustworthy authority that all one has to do is to collect and plot them down on the plan. This the reader will find so carefully and completely done to his hand by Lightfoot, in his *Prospect of the Temple*, so often referred to, that to detail it here would be but to repeat his state-

ments: we have examined his authorities and conclusions in detail, and believe that no accurate description can do much more than follow his digest on this subject. We have embodied the results in our map accompanying this volume. The points in which we have varied from his plan are too few and unimportant to be worth enumerating. One particular, however, requires special consideration, because its settlement involves the discussion of the few points that have not been determined above; and to this we add such other remarks as will convey a sufficiently definite idea of the main edifice.

1. *The Position of the Great Altar*.—Its distance from the northern boundary of the Court of the Israelites is given in the Mishna in the following words: "From north to south [the Israelites' Court was] 135 cubits [wide], as follows: from the ascent to the extremity of the altar [i. e. the whole length of the altar including its inclined ascent] were 62 cubits [i. e. horizontal measure, for the altar is elsewhere given as 32 cubits square, and the slope of the ascent as another 32 cubits, which would give 64 instead of 62 cubits, measured superficially (see Lightfoot, *Works*, ix, 413)], from the altar to the rings 8 cubits; the place of the rings was 24 cubits, thence from the rings to the tables were 4 cubits, from the tables to the columns 4, from the columns to the wall of the court 8 cubits [making thus 110 cubits]; the rest [25 cubits] were as well the space between the ascent and wall as a place of columns' (*Middoth*, v, 1). This last clause is somewhat ambiguous, but is generally understood as meaning that there was a space of 25 cubits between the south wall and the foot of the "ascent," which contained some extra posts (like those on the north side) for sacrificing on crowded occasions—an interpretation from which we do not see any good reason for dissenting. So L'Empereur (in his separate commentary on the *Middoth*, p. 173) explains, "Partly for an [open] space and partly for the place of [extra] columns," assigning  $12\frac{1}{2}$  cubits to each portion, which amounts to the same thing as to the point in question. So also Lightfoot (*Works*, ix, 413). The position of the altar from east to west is fixed with regard to the court in which it lay in terms which are free from any ambiguity.

In common with most antiquarians, we are disposed to find the native rock, on which the altar is assumed to have been reared, in the remarkable *Sacred Rock* under the dome of the central mosque of the Haram. This is 50 or 60 feet broad, occupying nearly the whole space immediately under the dome, and rising about 5 feet above the floor of the building, which is 12 feet higher than the rest of the enclosure. The centre of the rock is about 735 feet from the southern and 610 from the eastern wall of the Haram. The frequent supposition that it stood within the most holy place, or at least within the Temple proper, is negated by the relative distances presently to be noticed from the Talmud. The positive reasons for making the altar coincide with the Sacred Rock may be stated as follows:

(a.) Tradition—Jewish, Christian, and Moslem—favors it (see Williams, *Holy City*, ii, 340-343).

(b.) This rock is prominent above all other spots, and we know that the great altar was higher than even the floor of the Temple itself.

(c.) The upper platform of the Haram thus most nearly coincides with that of the sacred enclosure of the Temple.

(d.) The cave and sewer at the south-east corner of the present rock would thus be identical with the ancient cesspool and drain for the blood sprinkled around the altar.

This site of the great altar fixes the general position of the Temple and sacred enclosure generally within the great area, and agrees with the only definite statement in the Mishna on the subject, namely, that "the greatest space between the Temple and the wall of the outer court was on the south side, the next greatest on the east, the next on the north, and the least on the west" (*Middoth*, ii, 1). According to our arrangement, the spaces (at the nearest point) between the *chél*, or sacred fence, and the inner surface of the outmost wall are respectively on the west about 73 feet, on the north about 80 feet, on the east about 239 feet, on the south about 643 feet. Lightfoot's plan has nearly the same. Dr. Wm. Brown (of Scotland), in his work on the *Antiquities of the Jews* (i, 70), lays them down in cubits, as follows: south, 259; east, 90; north, 72; west, 49. Fergusson arbitrarily refers these measurements to the inner court of the Temple (*Temples of the Jews*, p. 118), on the ground that the Talmud states that "in the place largest in measurement was held most service" (*Middoth*, ii, 1); but the text obviously means the space in the outer court, as that alone is the subject there treated of.

The position of the altar also fixes the line of the boundary between the tribes of Judah and Benjamin, which at this date cut off one cubit from the south-east corner of the altar—a circumstance of which the rabbins take frequent notice (see Lightfoot, *Works*, ix, 395). This boundary originally ran entirely south of the holy city (*Josh*, xv, 7-9; *xviii*, 15-17, but the conquest of Jebus by David appears to have annexed Mount Zion permanently to Judah (2 Sam. iv, 7). The subsequent purchase of the threshing-floor of Araunah the Jebusite by David (*xxiv*,

24: 1 Chron. xxi, 26) as the site of his altar, and eventually of the Temple (2 Chron. iii, 1), does not seem to have removed it entirely out of the tribe of Benjamin.

2. *General Description of the Temple Proper.*—This we find well summarized in Winer (*Realwörterb.* ii, 583 sq.), from the combined statements of the Talmud and Josephus (the latter, however, although a priest by birth, and therefore entitled to admission to the building, so constantly mixes the description of Herod's with that of Solomon's Temple that we must often distrust his details).

This edifice was constructed upon new foundations (Josephus, *Ant.* xv, 11, 3), and of white marble, the blocks being in some instances 45 cubits long, 6 broad, and 5 high (*War*, v, 5, 6; comp. *Ant.* xv, 11, 3). The entire width (from north to south) of the porch was (exteriorly) 100 cubits; but the remainder (rear part) of the building was only 60 cubits (according to the Talmudists 70, including the side chamber of 5 cubits, the wall of 6 cubits, etc.), so that the porch projected 20 (or 15) cubits on each side beyond the rest of the structure. Its length was also 100 cubits, and its height the same; but Josephus says (*Ant.* xv, 11, 3) that eventually it sank 20 cubits (the original height being 120), a statement which Hirt (p. 10) regards (probably with justice) as a mere legend. The interior space was, according to Josephus, so divided that the porch had a length (from north to south) of 50 cubits, a breadth of 20, and a height of 90 (comp. *War*, v, 5, 5); the holy place a length of 40 cubits, a breadth of 20, and a height of 60; and the most holy place a length and breadth of 20 cubits, and a height of 60; but the Talmud (*Middoth*, iv, 6) makes the height of both the latter rooms to have been only 40 cubits, by which we suspect it means the extra height above the ceiling of the most holy place, since this last was a perfect cube. The entire building also seems to have been 100 cubits in each dimension, as Josephus in the main indicates, although his numbers in several passages appear to be confused or corrupt. This likewise is the statement of the Talmud (*ibid.* iv, 7), according to which the length (from east to west) of the porch was only 11 cubits, that of the sanctuary 40 cubits, and that of the shrine 20 cubits; while on the west, below the holy of holies, was a space (for a chamber) of 6 cubits (comp. also *ibid.* iv, 3), besides 28 cubits for the thickness of the walls and partitions. If, as Josephus and the Talmud both state, the porch was 100 cubits high, but (as the latter states) only 90 high on the inside, the difference of 10 cubits may have been that of the peaked roof, if a gable; but the difference in their numbers as to the height of the rear portion of the building gives probability to the statement of the Talmud (*ibid.* iv, 6) that there was an upper room (עלית) over the holy and most holy places,

containing trap-doors in the floor, through which workmen were let down into the most holy place to make repairs (*ibid.* iv, 5). Josephus calls this part of the building τὸ ὑπερφόν μυστος, and the Talmud gives it a height of 40 cubits, which apparently refers only to the intermediate space left by the difference between the holy and the most holy place. As to the style of the roof (whether flat or peaked) Josephus says nothing; he only remarks (*War*, v, 5, 6) that it was surmounted (κατὰ κορυφήν) by golden spikes (σφαλοί), probably of gilded iron, fastened with lead, for scaring away the birds: the same are mentioned in the Talmud (כולה עורב, *Middoth*, iv, 6), where they are said to have been one cubit in height. The roof itself appears, according to the Mishna, to have been a low gable (see L'Empereur, *ad Middoth*, iv, 6), with a balustrade (מצקרה) three cubits high. The space above the עליה is thus divided (*Middoth*, iv, 6): 1 cubit בירר (? ceiling); 2 cubits ביה דלפה (place of rain-water); 1 cubit מקרה (timber); 1 cubit יוכה מצ (flooring); 3 cubits railing; 1 cubit scarecrows. On both sides of the interior apartments was a space of 20 cubits devoted to a suite of rooms (οἰκοὶ τριστεγῶν), which, however, extended only 60 cubits high (Josephus, *Ant.* xv, 11, 3; *War*, v, 5, 5). According to the Talmud (*Middoth*, iv, 3), these (מארים) were in all 38; namely, 15 on the north and south side each, and 8 on the west or rear (comp. the "many mansions," μνοὶ πολλοί, of John xiv, 2). The shoulder or projecting space (north and south) on each side of the porch (40 cubits in Josephus, 30 in the Talmud) was used as a depository of the sacrificial implements (בית ההילפות, *locus secespitarum*, *Middoth*, iv, 7).

The most holy place, which was entirely empty (ἐκεῖτο οὐδὲν ἵλας ἐν αὐτῷ, Josephus, *War*, v, 5, 5), except the stone (אבן שחה) which occupied the place of the ark (Mishna, *Yoma*, v, 2), and on which the high-priest set the censer (the rabbins relate many marvels concerning it), was separated at the doorway from the holy place (Josephus, *War*, v, 5, 5) by a veil (καταπίτασμα), which was torn by the earthquake at Jesus' death (Matt. xxvii, 51). The rabbins speak of a double veil: according to the Talmud these occupied a space of 1 cubit between the apartments (מקסיין, *Middoth*, iv, 7). The holy place had an entrance with two gold-plated door-leaves, which, according to Jo-

Restoration of Herod's Temple (oblique view of the front of the central building), according to Fergusson.

sephus (*War*, v, 5, 4), were 55 cubits high and 16 broad; but, according to the Mishna (*Middoth*, iv, 1), 20 cubits high and 10 broad—a difference which Lightfoot reconciles by supposing that Josephus includes the decorations (cornice, entablature, etc.). The Talmudists also speak of a double door at this passage, which the thickness of the walls renders probable. The sanctuary stood open, or was closed only by a screen of embroidered Babylonian tapestry of byssus. See *VAIL*. As furniture of the holy place Josephus mentions only the seven-armed candelabrum, the table of shew-bread, and the altar of incense. The porch had a doorway 70 cubits high and 26 broad (*Mishna*, 40 high and 20 broad, *Middoth*, iii, 7; probably to be reconciled as above). The porch contained two tables, one of marble, the other of gold, on which the priests daily set respectively the old and the fresh shew-bread taken from and carried into the Temple (*Mishna*, *Shekal*, vi, 4).

In front of the porch, within the priests' court, stood in close proximity (but somewhat to the south, *Middoth*, iii, 6) the laver (בִּירָה); and there (22 cubits from the porch) stood the great altar [see *BURNT-OFFERING*], the interven-

1706], Green [*ibid.* 1737], and Huldreich (*Zur*, 1732). Herod, in imitation of the Greeks and Romans, suspended in the porch several of the rich spoils and trophies which he had taken from the Arabs and other barbarous tribes of the East. This was a common custom among the heathen nations; Virgil introduces *Aeneas* boasting of having suspended the spoils which he took from the Greeks on the portals of a Grecian temple (*Æn.* iii). See *GAM-MADIM*.

**IX. The Apocalyptic Temple.**—In the vision of John on Patmos he expressly tells us respecting the New Jerusalem, "I saw no temple therein, for the Lord God Almighty and the Lamb are the temple thereof" (*Rev.* xxi, 22). The celestial city itself, in other words, is to be one vast temple filled with the perpetual Shechinah. We here give Paine's sketch of the ideal city on the mountain, the length of which was equal to its breadth, and this again was equal to the height of the city above the plain (*ver.* 16).

The Celestial City (after Paine).

ing space being regarded as especially holy (*Mishna*, *Chelim*, i, 9). North of this were 6 rows of rings (in the pavement), to which the animals to be slaughtered were fastened; a little beyond were 8 low pillars with cedar beams across them, from which the sacrifices were suspended; and between these pillars stood marble tables (שְׁלֵחָנוֹת שֵׁשׁ); on which their flesh and entrails were laid (*Middoth*, iii, 5; v, 2; *Tamid*, iii, 5; *Shekalim*, vi, 4). West of the altar stood two tables; one of marble, on which the fat of the victims was deposited; the other of silver (?), upon which were kept the implements for this service. See *SACRIFICIAL OFFERING*.

**3. Magnificence of the Central Building.**—The vast sums which Herod laid out in adorning this structure gave it the most magnificent and imposing appearance. "Its appearance," says Josephus, "had everything that could strike the mind and astonish the sight. For it was on every side covered with solid plates of gold, so that when the sun rose upon it, it reflected such a strong and dazzling effulgence that the eye of the beholder was obliged to turn away from it, being no more able to sustain its radiance than the splendor of the sun" (*War*, v, 5, 4). To strangers who approached the capital, it appeared, at a distance, like a huge mountain covered with snow. For where it was not decorated with plates of gold, it was extremely white and glistening. The historian, indeed, says that the Temple of Herod was the most astonishing structure he had ever seen or heard of, as well on account of its architecture as its magnitude, and likewise the richness and magnificence of its various parts, and the fame and reputation of its sacred appurtenances. Tacitus calls it *immense opulente templum* (*Hist.* v, 12). Its external glory, indeed, consisted not only in the splendour and magnificence of the building, but also in the rich gifts with which it was adorned, and which excited the admiration of those who beheld them (*Luke* xxi, 5). In the portico the various votive offerings made both by Jews and foreigners were deposited (see Richter, *Avshnara Templi Hierosol.* [Lips. 1764]). Among these treasures (2 *Macc.* iii, 2: ix, 16; *Josephus*, *Ant.* xiv, 16, 4; xviii, 3, 5; xix, 6, 1; *War.* ii, 17, 3; v, 13, 6; *Apion*, ii, 2; *Philo*, *Opp.* ii, 669, 691) we find specially mentioned a large golden table, presented by Pompey the Great, and several golden vines of exquisite workmanship and immense size; for Josephus assures us that some of the clusters of golden grapes were as tall as a man (*War*, v, 5, 4). One such golden vine (גֶּפֶן שֶׁל זָהָב, *Middoth*, iii, 8) especially seems to have been trained up over the entire front of the building (*Josephus*, *Ant.* xv, 11, 3; comp. *Tacit. Hist.* v, 5). See the monographs *De Vite Aurea in Templo* by Janus [Lips.

#### X. Sacred Observances Connected with the Temple.

**1. The Daily Service.**—The following is an outline of the regular duties of the priesthood:
